Congressional Record

PROCEEDINGS AND DEBATES OF THE 95th CONGRESS, FIRST SESSION

SENATE-Monday, April 4, 1977

(Legislative day of Monday, February 21, 1977)

The Senate met at 12:30 p.m., on the expiration of the recess, and was called to order by Hon. Howard M. Metzenbaum, a Senator from the State of Ohio.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Hear the words of the 53d chapter of Isaiah, the 6th verse:

All we like sheep have gone astray; we have turned everyone to his own way; and the Lord hath laid on him the iniquity of us all.—Isaiah 53: 6.

Let us pray.

Almighty God, may we enter this Holy Week with reverent meditation upon those mighty acts of redemption and new life. Amid the busy pace of daily duties help us to remember that He was wounded for our transgressions, He was bruised for our iniquities; the chastisement of our peace was upon Him; and with His stripes we are healed. Walking the way of the cross may we find it the way of life and peace.

Through Him who gave His life for

many, Amen.

APPOINTMENT OF ACTING PRESI-DENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,

PRESIDENT PRO TEMPORE, Washington, D.C., April 4, 1977.

To the Senate:

Being temporarily absent from the Senate on official duties, I appoint Hon. Howard M. METZENBAUM, a Senator from the State of Ohio, to perform the duties of the Chair during my absence.

James O. Eastland, President pro tempore.

Mr. METZENBAUM thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of Friday, April 1, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

CXXIII—638—Part 9

COMMITTEE MEETINGS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that all committees may be authorized to meet during the session of the Senate today.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMPILATION OF COMMITTEE MEMBERSHIPS

Mr. ROBERT C. BYRD. Mr. President, I have asked the Democratic Policy Committee to prepare a compilation of the committee memberships so as to indicate the service overlap among the committees. Such a compilation should be helpful to committee chairmen and members of the committees.

It seems to me that it would enable them perhaps to so schedule committee meetings from time to time as to avoid problems for committee members who want to attend but who find that two or more committees on which they serve are scheduled to meet at the same hour.

Just as an example, the Committee on Agriculture, Nutrition, and Forestry has on its committee four members who are also members of the Appropriations Committee; four members who are members of the Foreign Relations Committee; three members who are on the Budget Committee; three members who are on the Finance Committee; two members who are on the Commerce Committee; two members who are on the Judiciary Committee; two members on the Rules Committee; two on Veterans' Affairs; one on Armed Services; one on Banking; and one on Human Resources.

I think this compilation would be helpful for the chairmen and staff directors of the various committees to better arrange their committee schedules so as to meet at times that would avoid, to the extent possible, conflicts and overlaps among the committees.

I think this may be helpful until such time as the computerization of the committee schedules goes into effect in conformity with the requirements of the Stevenson resolution. The object is to avoid the situation in which several committees or subcommittees schedule meetings at the same hour, thus causing many Members to miss some meetings because of inability to be in two different places at once. As so often happens, one committee will find it impossible to muster a quorum because many of its members

are in attendance at committee meetings elsewhere.

Mr. President, I ask unanimous consent that this memorandum be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

(Service on other committees of Agriculture Committee Members)

Appropriations, 4, Huddleston, Leahy, Bellmon, Young.

Foreign Relations, 4, Clark, Humphrey, McGovern, Stone.

Budget, 3, Bellmon, Dole, Hayakawa. Finance, 3, Talmadge, Curtis, Dole. Commerce, 2, Melcher, Zorinsky. Judiciary, 2, Allen, Eastland. Rules, 2, Allen, Clark. Veterans, 2, Stone, Talmadge. Armed Services, 1, Helms. Banking, 1, Lugar. Human Resources, 1, Hayakawa.

COMMITTEE ON APPROPRIATIONS
(Service on Other Committees of Appropriations Committee Members)

Budget, 6, Chiles, Hollings, Johnston, Magnuson, Sasser, Bellmon.

Governmental Affairs, 6, Chiles, Eagleton, McClellan, Sasser, Mathias, Stevens.

Judiciary, 5, Bayh, Byrd, W. Va., DeConcini, McClellan, Mathias.

Agriculture, 4, Huddleston, Leahy, Bellmon, Young.

Commerce, 4, Hollings, Inouye, Magnuson, Stevens.

Energy, 3, Johnston, Hatfield, Weicker. Banking, 2, Proxmire, Brooke. Human Resources, 2, Eagleton, Schweiker. Rules, 2, Byrd, W. Va., Hatfield. Armed Services, 1, Stennis. Environment, 1, Burdick. Foreign Relations, 1, Case.

COMMITTEE ON ARMED SERVICES
(Service on Other Committees of Armed Services Committee Members)

Banking, 4, McIntyre, Morgan, Garn, Tower.

Energy, 3, Bumpers, Jackson, Bartlett.
Environment, 3, Anderson, Culver, Hart.
Judiciary, 3, Culver, Thurmond, Scott.
Commerce, 2, Cannon, Goldwater.
Governmental Affairs, 2, Jackson, Nunn.
Agriculture, 1, Helms.
Appropriations, 1, Stennis.
Budget, 1, Anderson.
Finance, 1, Byrd, Va.
Rules, 1, Cannon.
Veterans, 1, Thurmond.

COMMITTEE ON BANKING, HOUSING, AND TIRBAN AFFAIRS

(Service on Other Committees of Banking Committee Members)

Armed Services, 4, McIntyre, Morgan, Garn, Tower.

Commerce, 3, Riegle, Stevenson, Schmitt. Human Resources, 3, Cranston, Riegle, Wil-

Appropriations, 2, Proxmire, Brooke. Budget, 2, Cranston, Heinz. Foreign Relations, 2, Sarbanes, Sparkman. Agriculture, 1, Lugar. Governmental Affairs, 1, Heinz. Rules, 1, Williams. Veterans, 1, Cranston.

COMMITTEE ON THE BUDGET

(Service on Other Committees of Budget Committee Members)

Appropriations, 6, Chiles, Hollings, Johnston, Magnuson, Sasser, Belmon. Energy, 4, Abourezk, Johnston, Domenici,

McClure. Environment, 4, Anderson, Muskie, Do-

menici. McClure.

Governmental Affairs, 4, Chiles, Muskie, Sasser, Heinz.

Agriculture, 3, Bellmon, Dole, Hayakawa. Banking, 2, Cranston, Heinz. Commerce, 2, Hollings, Magnuson. Human Resources, 2, Cranston, Hayakawa. Judiciary, 2, Abourezk, Biden. Armed Services, 1, Anderson. Finance, 1, Dole. Foreign Relations, 1, Biden. Veterans, 1, Cranston.

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

(Service on Other Committees of Commerce Committee Members)

Appropriations, 4, Hollings, Inouye, Magnuson, Stevens.

Banking, 3, Riegle, Stevenson, Schmitt. Finance, 3, Long, Danforth, Packwood. Agriculture, 2, Melcher, Zorinsky. Armed Services, 2, Cannon, Goldwater. Budget, 2, Hollings, Magnuson. Energy, 2, Durkin, Ford. Foreign Relations, 2, Griffin, Pearson. Governmental Affairs, 2, Danforth, Stevens. Rules, 2, Cannon, Griffin. Human Resources, 1, Riegle. Veterans, 1, Durkin.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

(Service on Other Committees of Energy Committee Members) Budget, 4, Abourezk, Johnston, Domenici,

McClure. Finance, 4, Haskell, Matsunaga, Hansen,

Laxalt. Appropriations, 3, Johnston, Hatfield,

Weicker. Services, 3, Bumpers, Jackson, Armed

Bartlett. Judiciary, 2, Abourezk, Metzenbaum.
Veterans, 3, Durkin, Matsunaga, Hansen.
Commerce, 2, Durkin, Ford.
Environment, 2, Domenici, McClure.

Governmental Affairs, 2, Jackson, Metcalf. Foreign Relations, 1, Church. Rules, 1, Hatfield.

COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

(Service on Other Committees of Environment Committee Members) Budget, 4, Anderson, Muskie, Domenici, McClure. Armed Services, 3, Anderson, Culver, Hart.

Finance, 3, Bentsen, Gravel, Moynihan. Human Resources, 3, Randolph, Chafee, Stafford.

Energy, 2, McClure, Domenici. Judiciary, 2, Culver, Wallop. Veterans, 2, Randolph, Stafford. Appropriations, 1, Burdick. Foreign Relations, 1, Baker. Governmental Affairs, 1, Muskie. Rules and Administration, 1. Baker.

COMMITTEE ON FINANCE

(Service on Other Committees of Finance Committee Members)

Energy, 4, Haskell, Matsunaga, Hansen, Laxalt.

Agriculture, 3, Talmadge, Curtis, Dole. Commerce: 3, Long, Danforth, Packwood. Environment 3, Bentsen, Gravel, Moynihan. Governmental Affairs, 3, Ribicoff, Danforth,

Veterans, 3, Matsunaga, Talmadge, Hansen. Human Resources, 2, Hathaway, Nelson. Armed Services, 1, Byrd (Va.). Budget, 1, Dole. Judiciary, 1, Laxalt.

COMMITTEE ON FOREIGN RELATIONS (Service on Other Committees of Foreign Relations Committee Members)

Agriculture, 4, Clark, Humphrey, Mc-Govern, Stone.

Rules, 4, Clark, Pell, Baker, Griffin. Governmental Affairs, 3, Glenn, Javits, Percy.

Banking, 2, Sarbanes, Sparkman. Commerce, 2, Griffin, Pearson. Human Resources, 2, Pell, Javits. Appropriations, 1, Case. Budget, 1, Biden. Energy, 1, Church. Environment, 1, Baker. Judiciary, 1, Biden. Veterans' Affairs, 1, Stone.

COMMITTEE ON GOVERNMENTAL AFFAIRS (Service on Other Committees of Governmental Affairs Committee Members)

Appropriations, 6, Chiles, Eagleton, Mc-Clellan, Sasser, Mathias, Stevens. Budget, 4, Chiles, Muskie, Sasser, Heinz. Finance, 3, Ribicoff, Danforth, Roth. Foreign Relations, 3, Glenn, Javits, Percy. Armed Services, 2, Jackson, Nunn. Commerce, 2, Danforth, Stevens. Energy, 2, Jackson, Metcalf. Human Resources, 2, Eagleton, Javits. Judiciary, 2, McClellan, Mathias. Banking, 1, Heinz. Environment, 1, Muskie.

COMMITTEE ON HUMAN RESOURCES (Services on Other Committees of Human Resources Committee Members)

Banking, 3, Cranston, Riegle, Williams. Environment, 3, Randolph, Chafee, Staf-

Veterans, 3, Cranston, Randolph, Stafford. Appropriations, 2, Eagleton, Schweiker. Budget, 2, Cranston, Hayakawa. Finance, 2, Hathaway, Nelson. Foreign Relations, 2, Pell, Javits.
Governmental Affairs, 2, Eagleton, Javits.
Judiciary, 2, Kennedy, Hatch.
Rules, 2, Pell, Williams.
Agriculture, 1, Hayakawa.
Commerce, 1, Riegle.

COMMITTEE ON THE JUDICIARY (Service on Other Committees of Judiciary Committee Members)

Appropriations, 5, Bayh, Byrd, W. Va., De-Concini, McClellan, Mathias.

Armed Services, 3, Culver, Scott, Thurmond

Energy, 3, Abourezk, Metzenbaum, Laxalt. Agriculture, 2, Allen, Eastland. Budget, 2, Abourezk, Biden. Environment, 2, Culver, Wallop. Governmental Affairs, 2,

Affairs, 2, McClellan. Mathias.

Human Resources, 2, Kennedy, Hatch. Rules, 2, Allen, Byrd, W. Va. Finance, 1, Laxalt. Foreign Relations, 1, Biden. Veterans' Affairs, 1, Thurmond.

COMMITTEE ON RULES AND ADMINISTRATION (Service on Other Committees of Rules Committee Members)

Foreign Relations, 4, Clark, Pell, Baker, Griffin.

Agriculture, 2, Allen, Clark. Appropriations, 2, Byrd, W. Va., Hatfield. Commerce, 2, Cannon, Griffin. Human Resources, 2, Pell, Williams. Judiciary, 2, Allen, Byrd, W. Va. Armed Services, 1, Cannon. Banking, 1, Williams. Energy, 1, Hatfield. Environment, 1, Baker.

COMMITTEE ON VETERANS' AFFAIRS (Service on Other Committees of Veterans' Affairs Committee Members)

Energy, 3, Durkin, Matsunaga, Hansen. Finance, 3, Matsunaga, Talmadge, Hansen. Human Resources, 3, Cranston, Randolph, Stafford.

Agriculture, 2, Stone, Talmadge. Environment, 2, Randolph, Stafford. Armed Services, 1, Thurmond. Banking, 1, Cranston. Budget, 1, Cranston. Commerce, 1, Durkin. Foreign Relations, 1, Stone. Judiciary, 1, Thurmond.

ANNOUNCEMENT OF 4 P.M. CONVEN-ING TIME ON CERTAIN DAYS DURING MAY

Mr. ROBERT C. BYRD. Mr. President, at this time, I wish to announce in advance, so as to give committees ample opportunity in which to take advantage of it, days on which the Senate will not be coming in until 4 p.m. during the month of May.

ORDER TO CONVENE ON TUESDAY, MAY 3, 1977, AT 4 P.M.

Mr. President, I ask unanimous consent that when the Senate convenes on Tuesday, May 3, it convene at the hour of 4 p.m.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. ORDER TO CONVENE ON THURSDAY, MAY 5, 1977, AT 4 P.M.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate convenes on Thursday, May 5, it convene at the hour of 4 p.m.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. ORDER TO CONVENE ON TUESDAY, MAY 10, 1977, AT 4 P.M.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate convenes on Tuesday, May 10, it convene at the hour of 4 p.m.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. ORDER TO CONVENE ON THURSDAY, MAY 12, 1977, AT 4 P.M.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate convenes on Thursday, May 12, it convene at the hour of 4 p.m.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

PURPOSE

Mr. ROBERT C. BYRD. Mr. President, this will give committees and staffs ample notice of those days, which we can now foresee, on which the Senate will convene at 4 o'clock in the afternoon, thus giving all committees virtually an entire day on those dates for markup of bills without interruptions from the floor.

Under the Stevenson resolution, they are allowed to meet 2 hours after the Senate comes in without consent. This would mean that on Tuesday and on Thursday, May 3 and May 5, respectively, and Tuesday and on Thursday, May 10 and May 12, respectively, committees can be assured that they can have virtually a full day of meetings without interruptions from the floor.

I think it is very important—in view of the budget deadline of May 15 on which, in accordance with the Budget Reform Act, committees must have reported certain types of authorizing measures—that committees have as much time in the early part of May as possible, and also in April, in which to prepare measures so as to meet the May 15 deadline.

I also think that prior to May 15, on most of the days—even aside from those dates on which the Senate will be coming in at 4 p.m.—committees can pretty well count on morning sessions. There will also be other days prior to May 15, which I cannot announce at the moment, when the Senate will come in subsequent to the hour of 12 p.m. Committees will, hopefully, be able to take advantage of the hours when the Senate is not in session so as to hold uninterrupted markups and, in some cases, hearings.

For the record, Mr. President, through tomorrow, April 5, the Senate will have been in session 50 days this year. Of those 50 sessions, the Senate has met prior to 12 o'clock noon on only 16 occasions. On 34 of the 50 days, the Senate will have met at no earlier than 12 o'clock noon—in at least 22 instances, subsequent to 12 o'clock noon.

The leadership has felt that the committees should be accommodated as much as possible, and for this reason I have tried to avoid coming in prior to 12 o'clock noon, whenever possible during January, February, and March of this year.

- Mr. President, I ask unanimous consent to have printed in the RECORD a breakdown of the convening times at which the Senate has met during those 50 days of the session.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CONVENING HOURS—THROUGH APRIL 5, 1977 DAYS IN SESSION—50

Convening times:

9:15 a.m., 1 day; 9:30 a.m., 2 days; 9:45

a.m., 2 days; 10:00 a.m., 4 days; 10:15 a.m., 1 day; 10:30 a.m., 2 days; 11:00 a.m., 4 days; 12 n., 12 days; 12:30 p.m., 1 day; 1:30 p.m., 1 day; 1:45 p.m., 1 day; 2:00 p.m., 5 days; 3:00 p.m., 2 days; 4:00 p.m., 2 days; 8:00 p.m., 1 day.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I yield the floor.

I yield back the remainder of my time.

The ACTING PRESIDENT pro tempore. The Senator from Alaska is recognized.

Mr. STEVENS. Mr. President, I yield back the time of the minority leader. I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, two budget waiver resolutions are at the desk: Senate Resolution 127, which is a budget waiver resolution on S. 36, and Senate Resolution 129, which is a budget waiver resolution on S. 266. It is my understanding that these waiver resolutions have been cleared.

WAIVER OF THE CONGRESSIONAL BUDGET ACT WITH RESPECT TO THE CONSIDERATION OF S. 36

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Senate Resolution 127 at this time.

The ACTING PRESIDENT pro tempore. The resolution will be stated by title

The legislative clerk read as follows:

A resolution (S. Res. 127) waiving section 402(a) of the Congressional Budget and Impoundment Control Act of 1974 with respect to the consideration of S. 36, a bill to authorize appropriations for nonnuclear energy research, development, and demonstration programs conducted by the Energy Research and Development Administration.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the resolution.

The resolution (S. Res. 127) was considered and agreed to, as follows:

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 36, a bill to authorize appropriations to the Energy Research and Development Administration for fiscal year 1977 for the pur-pose of research and development of new forms of energy, energy conservation techniques, and conversion of energy. Such waiver is necessary to permit consideration of the Energy Research and Development Administration authorization for fiscal year 1977, which was reported by the Committee on Energy and Natural Resources prior to May 15, 1976, but which failed to become law during the last session of Congress. If consideration of S. 36 is prevented, the Energy Research and Development Admin-

istration will be unable to reprogram above amounts contained in relevant appropriations bilis; will be unable to initiate, with specific congressional direction, the National Energy Extension Service for which appropriations have already been made; and will be unable to initiate, with specific congressional direction, certain solar energy projects. In addition, certain other provisions relating to a small grants program for appropriate technology, measures dealing with employee and organizational conflicts of interest will not be authorized without passage of S. 36.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

WAIVER OF CONGRESSIONAL BUDG-ET ACT WITH RESPECT TO CON-SIDERATION OF S. 266

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Senate Resolution 129, which is the budget waiver resolution on S. 266.

The ACTING PRESIDENT pro tempore. The resolution will be stated by title.

The legislative clerk read as follows: A resolution (S. Res. 129) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 266.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the resolution.

The resolution (S. Res. 129) was considered and agreed to, as follows:

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 266, a bill to authorize appropriations for fiscal year 1977 to the Energy Research and Development Administration. Such waiver is necessary to extend a program of the Energy Research and Development Administration, and increase the authorization for the program to allow completion of remedial action concerning a potential health hazard caused by the use of sand containing uranium mill tailings for the construction of buildings, in the Grand Junction, Colorado area.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. STEVENS. I move to lay that motion on the table.

ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Oklahoma (Mr. Bartlett) is recognized for not to exceed 15 minutes.

THE B-1 BOMBER

Mr. BARTLETT. Mr. President, after 23 years of analysis, planning, and testing, the U.S. Air Force has now begun procurement of an intercontinental bomber—the B-1 bomber—which will ultimately replace our aging B-52 Strato-

fortress. Despite much study and long delay, however, the Carter administration has decided that further study and further delay are in order. Secretary of Defense Harold Brown has proposed that the authorization for B-1 production be cut from eight aircraft to five aircraft in order to reduce the defense budget for fiscal year 1978 by \$280 million. Secretary Brown justified the reduced production rate on the grounds that further examination of the requirement for the B-1 bomber may result in modifications to production aircraft, reduction in the number of planes purchased, or even cancellation of the entire B-1 bomber force. A decision by President Carter is expected in May, but one thing is clear. Continued delay in the B-1 program only drives the costs of production upward.

The major issues surrounding the B-1 bomber are no longer to be found in the realm of Research and Development on the B-1 aircraft itself. Despite intense controversy and criticism, the B-1 advanced strategic bomber has emerged from the development phase fully capable of performing the missions assigned to it in the 1980's and beyond. While its high altitude, high speed capability forces the Soviet Union to retain extensive air defenses, its automatic terrain-following radar and low radar cross-section permit the B-1 bomber to penetrate enemy air space at low altitude to avoid detection.

If discovered, the B-1 can destroy enemy surface-to-air missile sites with its short range attack missiles-SRAM-or escape by using its high speed and sophisticated electronic countermeasures. Furthermore, the B-1 bomber is far less vulnerable to a surprise nuclear attack than the older B-52 because it is easier to disperse, withstands greater nuclear heat and blast effects, and escapes from smaller runways faster. Soviet submarine launched ballistic missiles, even when fired at low trajectories in order to reduce warning time, will have great difficulty destroying a B-1 as it leaves its bomber base headed toward the Soviet Union. With its advanced technology and its ability to carry a greater weapons load over intercontinental distances with more accuracy than either the B-52 or the FB-111. the B-1 bomber has proved itself ready for production. Further funding for research and development is now oriented toward refining the system and taking advantage of the growth potential inherent in this, the world's finest strategic bomber.

The B-1 bomber is ready now, and it is already in production. Through fiscal year 1977, Congress has appropriated over \$4 billion for the B-1 program including over \$1 billion for procurement. Last year Congress appropriated funds the first three production aircraft, and the Ford administration originally requested \$11/2 billion this year for eight aircraft. Even at normal production rates, however, the B-1 will reach initial operational capability only in 1982 with most of the force available later in the eighties. Nevertheless, President Carter feels compelled to lower the production rate in order to study alternatives to our present B-1

program-options which have all been studied before.

None of the alternatives to the continued production of the B-1 bomber would be available any sooner, and none has proved more cost effective. The proposed B-52X would require at least 10 years of development in order to equip our old B-52 airframes with the new super critical wing now in advanced development, new turbofan engines, new avionics and a low-altitude ride control feature. A simpler modification—the B-52I-would merely replace the engines on the older B-52's and could be available as early as 1985, 3 years after the first B-1 bomber is operational. These programs to modernize the B-52 would result in a less capable aircraft available at a later date and would require a reduction in the size of our strategic bomber fleet while modifications were being made.

Because the FB-111, formerly the TFX, is no longer in production and has limited range, payload, and growth capability, few people continue to suggest it as an alternative to the B-1. However, a new bomber could be designed, perhaps based on one of the concepts rejected in the original advanced manned strategic aircraft competition. Assuming that this new bomber did not suffer the delays and political opposition that have faced the B-1, it still would not be available in any number until the 1990's. Such a new bomber would require R. & D. expenditures beyond the \$3.5 billion spent for the B-1 already.

The air launched cruise missile-ALCM-promises to add to the effectiveness of the B-1 bomber. For this reason, some opponents of the B-1 have suggested that the ALCM itself could substitute for the penetrating bomber. According to a popular view, wide-bodied transports could launch cruise missiles while standing off the coast of the Soviet Union. Whether these modern day dirigibles could survive the onslaught of Soviet long range interceptors, much less escape from their bases before a nuclear attack, is questionable. The number of targets in the Soviet Union which they could reach would be limited by the range of their cruise missiles. Also, present and planned cruise missiles cannot conduct reconnaissance, carry heavy megatonnage, attack extremely hard targets or targets which are difficult to locate precisely, avoid unexpected enemy defenses, or perform many of the other functions of the manned penetrating bomber. Furthermore, even a crash program to select and modify a wide-bodied commercial airliner would not make this alternative operational before the B-1 bomber. The cost effectiveness of a widebodied ALCM carrier, suggested by last year's Brookings pamphlet, is not supported either by the joint strategic bomber study prepared by the Department of Defense nor by a more recent study published at Georgetown University's Center for Strategic and International Studies.

There is no real alternative to the B-1 bomber now. Its production permits the United States to maintain military parity even if the Soviets continue their present buildup. Taking advantage of recent im-

provements in guided weapons and nonnuclear munitions, the B-1 will greatly enhance our conventional deterrence. But, above all, it will insure strategic nuclear deterrence. The B-1 bomber strengthens the strategic triad by preventing the Soviet Union from concentrating its efforts against our land- and sea-based missiles and provides a backup if technological breakthroughs should endanger those forces. The B-1 force will be less expensive than our missile launching submarine fleet and will probably be less vulnerable in the 1980s than our Minuteman ICBMs. While the B-1 bomber will give our own President greater flexibility in deterring Soviet threatsconventional as well as nuclear, it compels the Soviet Union to continue deployment of an air defense system larger than the entire U.S. Air Force.

Before implementing any delays in the B-1 bomber program, President Carter should remember that by contributing to a stable nuclear balance the B-1 bomber is a powerful tool for arms control. The slow speed of the manned bomber signals the Soviets that we do not seek a disarming first strike, but its heavy payload assures massive retaliation if the Soviet Union should attack the United States. Even today, 52 percent of the equivalent megatonnage-EMT-deliverable by our strategic nuclear forces is carried on manned bombers-bombers which can return and attack again if necessary.

Mr. President, I am finished with my remarks. I yield the floor.

ROUTINE MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business for not to exceed 15 minutes, with statements therein limited to 5 minutes.

Is there morning business? Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President. ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS

Mr. ROBERT C. BYRD. Mr. President. the distinguished chairman of the Committee on Armed Services (Mr. STENNIS) has written to me asking permission for the Armed Services subcommittees as follows to meet at the times designated. I have cleared this with the other side of the aisle.

I ask unanimous consent that the following subcommittees be authorized to meet at 10 a.m. on Wednesday: The Military Construction and Stockpile Subcommittee; the Research and Development Subcommittee; and that those two same subcommittees be authorized to meet at 2 p.m. on Wednesday; and that

on Thursday the Research and Development Subcommittee be authorized to meet at 10 a.m.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. Mr. ROBERT C. BYRD. Mr. President,

I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. Melcher). Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

REPORT ON THE FOOTWEAR INDUS-TRY—MESSAGE FROM THE PRESI-DENT RECEIVED DURING THE ADJOURNMENT—PM 62

Under authority of the order of April 1, 1977, the following message was received on April 1 during the adjournment of the Senate and referred to the Committee on Finance:

To the Congress of the United States:
In accordance with Section 203(b) (1)
of the Trade Act of 1974, enclosed is a
report to the Congress setting forth the
action that I am taking pursuant to that
section with respect to import relief for
the U.S. non-rubber footwear industry,
and explaining the reasons for my decision.

JIMMY CARTER. THE WHITE HOUSE, April 1, 1977.

DEFERRALS ON ENERGY RESEARCH AND DEVELOPMENT ADMINISTRA-TION FUNDS—MESSAGE FROM THE PRESIDENT—PM 63

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was referred jointly to the Committees on Appropriations, the Budget, Commerce, Science, and Transportation, and Energy and Natural Resources:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report two new deferrals of Energy Research and Development Administration funds totaling \$127.2 million. The deferrals have no effect on budgetary outlays for fiscal year 1977 or subsequent years. In addition, I am reporting a revision to a previously transmitted Department of Commerce deferral.

The details of each deferral are contained in the attached reports.

JIMMY CARTER.

THE WHITE HOUSE, April 4, 1977.

MESSAGES FROM THE HOUSE

ENROLLED BILL SIGNED

At 12:35 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its clerks, announced that the Speaker has signed the following enrolled bill:

S. 626. An act to reestablish the period within which the President may transmit to the Congress plans for the reorganization of agencies of the executive branch of the Government, and for other purposes.

The enrolled bill was subsequently signed by the Deputy President pro tempore (Mr. Humphrey).

At 2:23 p.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the House has passed the bill (H.R. 1828) relating to the effective date for the changes made by the Tax Reform Act of 1976 to the exclusion for sick pay, in which it requests the concurrence of the Senate.

The message also announced that the House has passed the bill (S. 1025) to amend the Securities Exchange Act of 1934 to increase the amount authorized to be appropriated for the Securities and Exchange Commission for fiscal year

1977, without amendment.

The message further announced that the House disagrees to the amendments of the Senate to the bill (H.R. 4877) making supplemental appropriations for the fiscal year ending September 30, 1977, and for other purposes; agrees to the conference requested by the Senate on the disagreeing votes of the two Houses thereon; and that Mr. Mahon, Mr. Whitten, Mr. Boland, Mr. Natcher, Mr. Flood, Mr. Steed, Mr. Shipley, Mr. Slack, Mr. McFall, Mr. Long of Maryland, Mr. Yates, Mr. McKay, Mr. Bevill, Mr. Cederberg, Mr. Michel, Mr. McDade, Mr. Andrews of North Dakota, Mr. Edwards of Alabama, and Mr. Coughlin were appointed managers of the conference on the part of the House.

At 3:30 p.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the House has passed the bill (S. 925) to provide temporary authorities to the Secretary of the Interior to facilitate emergency actions to mitigate the impacts of the 1976–77 drought, with an amendment in which it requests the concurrence of the Senate.

The message also announced that the House has passed the bill (H.R. 5306) to amend the Land and Water Conservation Fund Act of 1965, and for other purposes, in which it requests the concurrence of the Senate.

The message further announced that the House has agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4800) to extend the Emergency Unemployment Compensation Act of 1974 for an additional year, to revise the trigger provisions in such act, and for other purposes.

COMMUNICATIONS FROM EXECU-TIVE DEPARTMENTS, ETC.

The PRESIDING OFFICER laid before the Senate the following communications which were referred as indicated:

EC-1033. A letter from the General Counsel of the General Accounting Office transmitting, pursuant to law, a report of the release of budget authority concerning nine rescissions contained in the President's seventh special message for fiscal year 1977: jointly, pursuant to the order of January 30, 1975, to the Committees on Appropriations, the Budget, Commerce, Science, and Transportation, Armed Services, Foreign Relations, and Energy and Natural Resources, and ordered to be printed.

EC-1034. A letter from the Chairman of the Administrative Conference of the United States transmitting, pursuant to law, comments upon the proposed rules of practice of the Interstate Commerce Commission respecting matters involving common carriers by railroad (with an accompanying report); to the Committee on Commerce, Science, and

Transportation.

EC-1035. A letter from the Vice President for Government Affairs of the National Railroad Passenger Corporation transmitting, pursuant to law, a report of revenues and expenses for each train for the month of December 1976 (with an accompanying report); to the Committee on Commerce, Science, and Transportation.

EC-1036. A letter from the Administrator of the Federal Energy Administration transmitting a draft of proposed legislation to amend the Federal Energy Administration Act of 1974, the Energy Policy and Conservation Act, and the Energy Policy and Conservation Act to provide for authorizations of appropriations to the Federal Energy Administration (with accompanying papers); to the Committee on Energy and Natural Resources.

EC-1037. A letter from the Secretary of the Interior transmitting, pursuant to law, the sixth annual report on the operation of the Colorado River describing the actual operation during water year 1976, and a projected plan of operation for water year 1977 for the reservoirs in the Colorado River Basin (with an accompanying report); to the Committee on Energy and Natural Resources.

EC-1038. A letter from the Administrator of the Federal Energy Administration transmitting, pursuant to law the annual report on the Weatherization Assistance Program (with an accompanying report); to the Committee on Energy and Natural Resources.

EC-1039. A letter from the Governor of Michigan, State Cochairman of the Upper Great Lakes Regional Commission, transmitting, pursuant to law, the annual report of the Upper Great Lakes Regional Commission for 1976 (with an accompanying report); to the Committee on Environment and Public Works.

EC-1040. A letter from the Acting Administrator of the General Services administration transmitting, pursuant to law, a report of the Building Project Survey for Chattanoga, Tennessee (with an accompanying report); to the Committee on Environment and Public Works.

EC-1041. A letter from the Secretary of Housing and Urban Development transmitting a draft of proposed legislation to amend the Disaster Relief Act of 1974 to provide for authorization of appropriations thereunder through fiscal year 1978 (with accompanying papers); to the Committee on Environment and Public Works.

and Public Works.

EC-1042. A letter from the Director of the Tennessee Valley Authority transmitting, pursuant to law, the annual report of the TVA for activities during the fiscal year beginning July 1, 1975, and ending June 30, 1976, and the transition quarter (with an accompanying report); to the Committee on Environment and Public Works.

EC-1043. A letter from the Chairman of the United States International Trade Commission transmitting, pursuant to law, the ninth quarterly report on trade between the United States and the non-market economy countries (with an accompanying report); to the Committee on Finance.

EC-1044. A confidential communication from the Comptroller General of the United States transmitting, pursuant to law, a report on the status of the Army's Copperhead and the Navy's 5-inch and 8-inch guided projectile programs (PSAD-77-26, April 1, 1977); to the Committee on Governmental Affairs.

EC-1045. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Audit of the Minority Printing Clerk, House of Representatives, Fiscal Years ended September 30, 1974, 1975, and 1976" (GGD-77-41, March 81, 1977) (with an accompanying report); to the Committee on Governmental Affairs.

EC-1046. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Audit of the Majority Printing Clerk, House of Representatives, Fiscal Years ended August 31, 1974, 1975, and 1976" (GGD-77-42, March 31, 1977) (with an accompanying report); to the Committee on Governmental Affairs.

EC-1047. A letter from the Secretary of Housing and Urban Development transmitting, pursuant to law, two reports of the Department's intention to: (1) alter an existing system of personal records and (2) establish a new system of personal records, in accordance with the Privacy Act (with an accompanying report); to the Committee on Governmental Affairs.

EC-1048. A letter from the Comptroller

EC-1048. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Status of the F-16 Aircraft Program" (PSAD-77-41, April 1, 1977) (with an accompanying report); to the Committee on Governmental Affairs.

EC-1049. A letter from the Attorney General transmitting a draft of proposed legislation to amend the Juvenile Justice and Delinquency Prevention Act of 1974, and for other purposes (with accompanying papers); to the Committee on the Judiciary.

EC-1050. A letter from the Attorney General transmitting a draft of proposed legislation to amend the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 801 et. seq.) to extend for two fiscal years the appropriation authorizations for the administration and enforcement of that Act (with accompanying papers); to the Committee on the Judiciary.

EC-1051. A letter from the Deputy Director of the Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, a report that the appropriation to the Department of the Treasury for salaries and expenses of the United States Customs Service for the fiscal year 1977 has been reapportioned on a basis which indicates the necessity for a supplemental estimate of appropriation; to the Committee on Appropriations

Committee on Appropriations.

EC-1052. A letter from the Deputy Director of the Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, a report that the appropriation to the Department of the

Treasury for salaries and expenses of the United States Secret Service for the fiscal year 1977 has been reapportioned on a basis which indicates the necessity for a supplemental estimate of appropriation; to the Committee on Appropriations.

EC-1053. A letter from the Deputy Assistant Secretary of Defense transmitting, pursuant to law, the annual report concerning the administration of Officer Responsibility Pay for the calendar year 1976; to the Committee on Armed Services.

EC-1054. A letter from the Deputy Assistant Secretary of Defense, Installations and Housing, transmitting, pursuant to law, notice of six construction projects to be undertaken by the Naval and Marine Corps Reserve (with an accompanying report); to the Committee on Armed Services.

EC-1055. A letter from the Secretary of Housing and Urban Development transmitting, pursuant to law, a report of findings and recommendations concerning Community Development Block Grant fund allocation formula change (with accompanying papers); to the Committee on Banking, Housing, and Urban Affairs.

EC-1056. A letter from the Acting Assistant Secretary of the Interior transmitting, pursuant to law, notice of the receipt of project proposals under the provisions of the Small Reclamation Projects Act of 1956; to the Committee on Energy and Natural Resources.

Committee on Energy and Natural Resources. EC-1057. A letter from the Secretary of Agriculture transmitting, pursuant to law, the annual report for 1976 of animal welfare enforcement (with an accompanying report); to the Committee on Environment and Public Works.

EC-1058. A letter from the Assistant Legal Adviser for Treaty Affairs of the Department of State transmitting, pursuant to law, international agreements other than treaties entered into by the United States within the past sixty days (with accompanying papers); to the Committee on Foreign Relations.

EC-1059. A letter from the Administrator of the Agency for International Development of the Department of State transmitting, pursuant to law, a report régarding activities carried out under Title XII of the Foreign Assistance Act of 1961 (with an accompanying report); to the Committee on Foreign Relations.

EV-1060. A letter from the Mayor of the District of Columbia transmitting, pursuant to law, his response to the Comptroller General's report (FGMASD-76-75), relating to the District of Columbia Government's accounting controls over undelivered checks and the adequacy of internal controls established to prevent duplicate payments (with an accompanying report); to the Committee on Governmental Affairs.

EC-1061. A letter from the Acting Administrator of the General Services Administration transmitting, pursuant to law, a report on a proposed Presidential archival depository to house the John Fitzgerald Kennedy Library (with an accompanying report); to the Committee on Governmental Affairs.

EC-1062. A letter from the Acting Assistant Secretary for Education transmitting, pursuant to law, the annual report of the activities of the Advisory Council on Education Statistics (with an accompanying report): to the Committee on Human Resources

EC-1063. A letter from the Executive Secretary to the Department of Health, Education, and Welfare transmitting, pursuant to law, a copy of the document "Final Regulation for Research projects in vocational education" which has been transmitted to the Federal Register (with accompanying papers); to the Committee on Human Resources.

EC-1064. A letter from the Acting Administrator of the American Revolution Bicentennial Administration transmitting, pur-

suant to law, the Fourth Report of the American Revolution Bicentennial Board for the period June 1976 through December 1976 (with an accompanying report); to the Committee on the Judiciary.

PETITIONS

The PRESIDING OFFICER laid before the Senate the following petitions which were referred as indicated:

POM-117. Resolution No. 77-10 adopted by the Council of the City of Seward, Alaska supporting Alaska State Senate Joint Resolution No. 15 relating to the proposed Trans-Alaska Gas Pipeline; to the Committee on Energy and Natural Resources.

POM-118. House Joint Resolution No. 206 adopted by the General Assembly of the Commonwealth of Virginia memorializing Congress to create and implement a national coal policy fostering maximum usage and development of coal resources within the United States; to the Committee on Energy and Natural Resources;

"House Joint Resolution No. 206

"Whereas, the United States is importing petroleum valued at approximately thirtysix billion dollars per year while experiencing the accompanying devastating effects on the balance of payments, the job market and national economy in general; and

"Whereas, the import payments for petroleum will continue to increase because of international pricing increases as well as the increase in total volume required by the expanding economy in the United States;

"Whereas, in the production of electrical energy, coal and nuclear energy appear to be the main source of power for the new generation capacity in the future; and

"Whereas, the current environmental problems of nuclear energy as perceived by the public have slowed the growth rate of this technology substantially; and

"Whereas, coal must be able to make a more significant contribution to electrical generation than what was projected originally in order to compensate for the shortfall of growth and nuclear power and increasing dependence upon foreign oil; now, therefore, be it

"Resolved by the House of Delegates, the Senate concurring, That Congress is hereby memorialized to create and implement a national coal policy fostering maximum development and utilization of coal resources in the United States while addressing the areas of liquefaction and gasification, direct combustion, development and transportation, exploration and mapping and expanded markets; and, be it

"Resolved further, That the Clerk of the House of Delegates is directed to send copies of this Resolution to the Speaker of the United States House of Representatives, the President of the United States Senate and the members of the delegation to the Congress of the United States of this Commonwealth in order that they may be apprised of the sense of this Body."

POM-119. House Joint Resolution No. 264 adopted by the General Assembly of the Commonwealth of Virginia encouraging the United States Department of Transportation to enforce adequate tanker safety standards; to the Committee on Commerce, Science, and Transportation:

"House Joint Resolution No. 264

"Whereas, The Ports and Waterways Safety Act of nineteen hundred seventy-two charges the United States Department of Transportation, through the United States Coast Guard, an agency of the Department of Transportation, with developing adequate safeguards for all oil tankers entering Amer-

ican waters and prohibiting the entry of those foreign vessels which do not comply

with tanker regulations; and

"Whereas, the wreck of the sub-standard Liberian tanker, Argo-Merchant, and recent oil spills in United States coastal waters involving vessels flying flags of convenience have graphically demonstrated the danger to life, property and the environment fostered by a failure to develop and enforce adequate tanker standards as is required by law; and

"Whereas, the great ports of Virginia and the Chesapeake Bay, and other waterways of the Commonwealth, are constantly used by foreign oil tankers; and

"Whereas, federal legislation preempts the Commonwealth's ability to enact legislation to protect Virginia life, property and the environment from the danger created by the use of sub-standard foreign tankers in Virginia

waters; now, therefore, be it "Resolved by the House of Delegates, the Senate concurring, That the United States Department of Transportation is encouraged to fulfill its responsibilities under The Ports and Waterways Safety Act of nineteen hundred seventy-two and that federal officials are hereby called upon to be certain that such responsibilities are fulfilled in the future as is required by law.

"Resolved further, That the Clerk of the House of Delegates, is directed to send copies of this Resolution to the Speaker of the United States House of Representatives, the President of the United States Senate, the Secretary of the Department of Transportation, and the members of the delegation to the Congress of the United States of this Commonwealth in order that they may be apprised of the sense of this Body.

POM-120. Senate Joint Memorial 106 adopted by the Legislature of the State of Idaho recommending the reconsideration of the proposal of the development of a highway by the U.S. Forest Service for the Burgdorf Hot Springs area; to the Committee on Energy and Natural Resources:

SENATE JOINT MEMORIAL No. 106

"Whereas, the Burgdorf Hot Springs is an area in Idaho which has unique and continuing historical character; and

Whereas, this is an area enjoyed by many generations of Idahoans since it was originally developed over a hundred years ago; and

Whereas, Burgdorf Hot Springs is on the National Register of Historic Places and is a portion of Idaho heritage worthy of protection and preservation; and

"Whereas, there is now pending a plan by the U.S. Forest Service to undertake construction of a two-lane highway through the Burgdorf townsite; and

Whereas, inadequate recognition given by the Forest Service to the unique character of the Burgdorf area in the planning stages of the highway project; and

Whereas, there is an alternative route which would prudently accomplish the same purpose with no direct adverse impact upon

the character of Burgdorf; and

"Whereas, no consideration has been given in the development of the proposal to the potential impact upon Burgdorf including the increased traffic through the area which could affect the authentic nature of the area and result in actual physical destruction of valuable natural features

"Now, therefore, be it resolved by the members of the First Regular Session of the Forty-fourth Idaho Legislature, the Senate and the House of Representatives concurring therein, that we find and declare that there is considerable evidence to indicate that the development of the highway as now planned by the U.S. Forest Service will adversely impact the Burgdorf Hot Springs area, and that we respectfully urge and recommend recon-sideration of this proposal. The citizens of the State of Idaho deserve the right to the continued enjoyment of their historical heritage and traditions. We find that in view of the existence of an alternative route with no impact on the Burgdorf townsite, the continuation of the present proposal is not in the interests of the people of the State of Tdaho

"Be it further resolved that the Secretary of the Senate be, and she is hereby authorized and directed to forward copies of this Memorial to the Honorable President of the United States, the Secretary of the Department of Agriculture, the Office of the Regional Forester, the Payette National Forest Supervisor, the President of the Senate and the Speaker of the House of Representatives of Congress, and the honorable congressional delegation representing the State of Idaho in the Congress of the United States." POM-121. House Joint Memorial No. 6

adopted by the Legislature of the State of Idaho urging the rejection of excessive demands for designation of wilderness areas and to insure responsible compromise between the desires for preservation and multiple use especially in the Nezperce National Forest; to the Committee on Energy and Natural Resources:

"HOUSE JOINT MEMORIAL NO. 6

"Whereas, a variety of external pressures which seem heavily weighted toward wilderness classification of lands in the commercial timber base, are exerted in decision arenas today; and

"Whereas, substantial lands have already been committed to the wilderness classifi-

cation: and

"Whereas, remaining acreages and essential for development of recreation, timbermining, and grazing in the Nezperce National Forest; and

"Whereas, further erosion of the potential base for multiple use development will seriously threaten the economic health of the

surrounding communities; and

"Whereas, in 1978, specific units under consideration for wilderness designation in the Nezperce National Forest would remove an additional 435 thousand acres from potential use, with a loss in allowable cut of approximately 15 million feet; and

Whereas, if the current study areas are authorized as wilderness, the potential annual yield from the Nezperce National Forest will decline from 144.5 million feet to an estimated 60 million feet; and

"Whereas, present mill capacities are 110-120 million board feet annually; and

"Whereas, further reductions will result in direct loss of not less than 130 jobs in 1978, with serious impact throughout the economy of the region; and

Whereas, over \$500,000 is returned annually to the schools and roads of the region as a result of the refund to counties from forest receipts, of which timber contributes the major portion; and

"Whereas, current planning procedures, with numerous appeals and subsequent delays, tie up large areas for indefinite periods

of time; and

"Whereas, adequate protection of forest areas should be balanced by protection of the interests of the citizens who reside in the nearby communities, as well as the goals and directions desired by the people of the State of Idaho.

'Now, therefore, be it resolved by the members of the First Regular Session of the Forty-fourth Idaho Legislature, the House of Representatives and the Senate concurring therein, that it is the finding of the Legislature that consideration should be given to the diversity of needs of the residents of this State, and specifically of the area dependent upon the balanced management of the Nezperce National Forest. urge the decision makers to reject excessive demands for designations of wilderness areas, and to insure responsible compromise be-

tween the desires for preservation and multiple use. We find that the withdrawal of additional areas now under consideration in the Nezperce National Forest, would adversely impact the region and have serious consequences on the future economic health of the area.

"Be it further resolved that the Chief Clerk of the House be, and he is hereby authorized and directed to forward copies of this Memorial to John McGuide, Chief, Forest Service, United States Department of Agriculture, the President of the Senate, and Speaker of the House of Representatives of the Congress of the United States, and the members of Congress representing the State of Idaho.'

POM-122. A resolution adopted by the Legislature of the Commonwealth of Massachusetts memorializing the President and the Congress to locate the Solar Energy Research Institute in Westborough, Massachusetts: to the Committee on Energy and Natural Resources;

"RESOLUTION

"Whereas, Solar energy has long captured the imagination of man because, if properly harnessed, it constitutes the earth's most abundant fuel source; and

Whereas, Technology for direct use of solar energy to heat and cool buildings is now in the commercial demonstration stage;

"Whereas, More costly and complex technologies for conversion of solar energy to electricity will be researched in the future:

"Whereas, The securing of the proposed Solar Energy Research Institute for New England will be a major step in solving the region's high energy costs, stabilizing our economy and dealing with our drastic unemployment problem, since high energy costs have meant the loss of 75,000 jobs in Massachusetts alone: and

"Whereas, Nowhere in the nation is there the technology and the brain-power that

exists in New England; and

"Whereas, From a cooperative effort among New England leaders, a unified voice that includes all 12 senators, 25 members of the House of Representatives, all the New England governors, plus the private sector in the persons of academic, business, industrial and labor leaders, calls for the location of the Solar Energy Research Institute in Westborough, Massachusetts, on the site of the former Lyman School; and

"Whereas, The 450-acre site is ideal for the massive federal facility designed to research solar energy, which some estimates say can result in a 10 billion dollar industry that will provide 7 per cent of the nation's energy needs by the turn of the century; and

Whereas, All the New England governors, in common purpose, have endorsed a simultaneous effort to secure federal approval for a Solar Energy Applications Center at a proposed location at Southeastern Massachusetts University in North Dartmouth; and

"Whereas, While the Solar Energy Research Institute would provide the vanguard for national solar energy research, the proposed applications center would constitute a dy-namic supplement in offering a clearinghouse for the dissemination of energy information, including economic data, vocational education, informational seminars and product/concept testing; and "Whereas, A decision on where to locate

the major federal project of a national re-search facility is anticipated before March

31st, 1977; therefore be it

"Resolved, That the General Court of Massachusetts hereby urges the President and the Congress of the United States to effect such action as may be necessary to provide for the location of the Solar Energy Research Institute in Westborough; and be it further "Resolved, That copies of these resolutions

be transmitted forthwith by the Clerk of the Senate to the President of the United States, to the presiding officer of each branch of Congress, and to each member thereof from this Commonwealth."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. MUSKIE, from the Committee on the Budget; Without amendment:

S. Res. 127. A resolution waiving section 402(a) of the Congressional Budget and Impoundment Control Act of 1974 with respect to the consideration of S. 36. a bill to authortze appropriations for nonnuclear energy research, development, and demonstration programs conducted by the Energy Research and Development Administration (Rept. No. 95-

S. Res. 129. A resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 266 (Rept. No. 95-84).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. FORD (for Mr. RANDOLPH), from the Committee on Environment and Public

William Meredith Cox, of Kentucky, to Administrator of the Federal Highway Administration.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. STENNIS, from the Committee on Armed Services

John C. Stetson, of Illinois, to be Secretary of the Air Force.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. PROXMIRE, from the Committee on Banking, Housing, and Urban Affairs:

Harry K. Schwartz, of Pennsylvania, to be an Assistant Secretary of Housing and Urban Development.

Geno Charles Baroni, of the District of Columbia, to be an Assistant Secretary of Housing and Urban Development.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Mr. HELMS. As in executive session, Mr. President, from the Committee on Armed Services, I report favorably the nominations of 17 in the Reserve of the Air Force, for appointment to the grade of major general and brigadier general (list beginning with James D. Isaacks) I ask that these nominations be placed on the Executive Calendar.

The PRESIDING OFFICER. Without

objection, it is so ordered.

Mr. HELMS. In addition, there are 66 for appointment in the Marine Corps to the grade of second lieutenant (list beginning with Burleigh H. Bagnall); and there are 39 in the Air National Guard for promotion to the grade of lieutenant colonel (list beginning with Robert J. Aldrich, Jr.); and there are 2,504 in the Navy for temporary promotion to the grade of lieutenant (list beginning with Rex T. Aaron). Since these names have already appeared in the Congressional RECORD and to save the expense of printing again, I ask unanimous consent that they be ordered to lie on the Secretary's desk for the information of any Senator.

The PRESIDING OFFICER. Without

objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the Record of March 18 and March 21, 1977, at the end of the Senate proceedings.)

HOUSE BILLS REFERRED

The following bills were each read twice by their titles and referred as indicated:

H.R. 3437. An act to make certain technical and miscellaneous amendments to provisions relating to vocational education contained in the Education Amendments of 1976; to the Committee on Human Resources.

H.R. 5306. An act to amend the Land and Water Conservation Fund Act of 1965, and for other purposes; to the Committee on Energy and Natural Resources.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that today, April 4, 1977, he presented to the President of the United States the enrolled bill (S. 626) to reestablish the period within which the President may transmit to the Congress plans for the reorganization of agencies of the executive branch of the Government, and for other purposes.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated.

By Mr. HUMPHREY:

S. 1219. A bill to provide for a mechanism to facilitate producer owned or controlled storage and orderly marketing of agricultural commodities and to authorize the establishment of an international emergency food reserve to meet humanitarian food relief requirements in foreign countries: to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. GRAVEL:

S. 1220. A bill for the relief of Allen D. Ray: to the Committee on the Judiciary. By Mr. SCOTT:

S. 1221. A bill to amend chapter 44 of title 18 of the United States Code (respecting firearms) to penalize the use of firearms in the commission of any felony and to increase the penalties in certain related existing provisions; to the Committee on the Judiciary.

By Mr. HELMS:

S. 1222. A bill for the relief of Faiz ur Rahman Faizi, Washima Faizi, and Tania Faizi; to the Committee on the Judiciary.

By Mr. McGOVERN:

S. 1223. A bill to establish a National Commission on Food Production, Processing, Marketing, and Pricing to study the food industry from the producer to the consumer; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. HANSEN (for himself and Mr. WALLOP)

S. 1224. A bill to amend the Act of May 18, 1947, c. 80, sec. 3, 61 Stat. 102, as amended (25 U.S.C. 613) to permit per capita payments from excess tribal trust funds of the Shoshone and Arapahoe Indian Tribes of Wyoming; to the Special Committee on Indian Affairs.

By Mr. METCALF (for himself and Mr. MELCHER)

S. 1225. A bill to amend the Comprehensive Employment and Training Act of 1973 to provide and improve the allotment of funds provision, and for other purposes; to the Committee on Human Resources.

By Mr. SCOTT:

S.J. Res. 43. A joint resolution proposing an amendment to the Constitution of the United States relating to the participation in nondenominational prayers in any build-ing which is supported in whole or in part through the expenditure of public funds; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HUMPHREY:

S. 1219. A bill to provide for a mechanism to facilitate producer owner or controlled storage and orderly marketing of agricultural commodities and to authorize the establishment of an international emergency food reserve to meet humanitarian food relief requirements in foreign countries; to the Committee on Agriculture, Nutrition, and Forestry.

DOMESTIC AND INTERNATIONAL FOOD SECURITY ACT OF 1977

Mr. President, Americans can take pride in their food and farm economy.

Food production and marketing in the United States has evolved into a highly efficient and balanced system which has been able to provide immeasurable benefits to the American economy. Despite increases in food prices in recent years, we still enjoy an abundance and variety of food at prices which are considerably lower than almost any other developed nation.

The steadily increasing productivity of our farmers has provided the United States with a comparative advantage in world trade which has helped offset inflationary trade deficits in our nonagricultural trade. It is, therefore, clear that the continued strength of our farm economy is an essential component of American economic prosperity.

Yet, the strength of our food and farm economy is becoming increasingly threatened by factors which can disrupt the balance and stability that are necessary for continued growth. Fluctuating demand for our farm production which has come as a result of increased participation in world trade has led to disruptions which have been costly both to producers and consumers.

Our experience has shown that excessive volatility in commodity markets not only adds to the food bill of the American housewife and the feed prices of livestock farmers, but it also leads to inflation in the cost of farming by encouraging the rise in the prices of fixed farm inputs, such as land, which most probably would not be sustained by longer term price trends.

The inflation in the cost of production inputs may be eroding the competitive advantage American farmers enjoy in world trade. Such inflation seriously restricts the access of prospective farmers to entering production. And further increases in costs of production may further burden the American taxpayer in providing income and production security for producers in times of excess supply.

The free movement of commodity prices is basic to a healthy agricultural economy. We have yet to come up with a scheme which could do a better job than the free market in allocating production resources and signaling the need for production adjustments.

But there are points at which the market signals are loud and clear. Beyond these points, individuals or groups are unnecessarily hurt. At the one extreme, the further deterioration in price beyond a certain point may result in forcing even efficient farmers out of business, who otherwise might be sustained on the basis of longer term price trends and production needs.

At the other extreme, some farmers may reap a windfall, but at the same time volatile price increases may lead to problems down the road by fueling an inflation in farming costs and by bringing new producers into production and changing patterns of consumption which might not have been necessary on the basis of sustainable average prices over the longer term.

Let me offer an example which is close to home. When the price of sugar went up to 65 cents a pound a few years ago, our Minnesota beet producers enjoyed a good and well-deserved return for the first time in many years. But the 65 cents a pound sugar led to increased costs for land, machinery, and other production inputs. Sixty-five cents a pound sugar brought a lot of new people into production. Sixty-five cents a pound sugar brought competing high fructose corn sweeteners into production.

But now sugar has dropped precipitously to around 10 cents a pound. Yet, the price of land and other farm inputs has not shown a corresponding decline. Most of the new producers have stayed with sugar production, and the high fructose corn sweetener manufacturers who made large capital investments in the expansion of production are still in the picture as strong as ever.

I could not be more pleased when our sugar producers were enjoying good prices. But it now is clear that unrestrained price volatility just is not in the long term interest of producers.

It is also clear that excessive price volatility has had an adverse impact on the consumer. In the case of the livestock, dairy, and poultry producer, it has interfered with his production planning and led to substantial losses and bankruptcies over the past several years.

In the case of the retail consumer, price increases have been permanently built into the marketing system. While the consumer can accept and expect a gradual increase in food prices, the abrupt increases experienced over the past several years have done little to en-

courage consumers to support the legitimate needs of farm producers.

Recognizing the need for some safeguards to protect producers and consumers from excessive price volatility, I have throughout my career in the Congress proposed measures which would provide greater security for American agriculture. I have tried to design a mechanism which would not interfere with the normal operation of the free market mechanism, but would restabilize the market only when certain factors have caused it to go out of control.

One of the criticisms of most past proposals in this area has been that they gave the Federal Government too much influence over commodity marketing. No one could be more critical than myself of the way the Federal Government abruptly unloaded its grain inventories in 1973 to the detriment of the American producer and consumer. Therefore, I have tried to develop an approach which is based upon minimal Government involvement in commodity marketing.

The bill I am introducing today is the product of over 18 months of study and consultations with farmers, economists, consumers, and Government officials. I believe it represents a fair balance of the interests of all groups and individuals involved in the production, marketing and consumption of food. My bill, I believe, represents a serious starting point for meeting the present challenges which must be faced in shaping food and agricultural policy in the years ahead.

Specifically, my bill would permit the Secretary of Agriculture to extend Federal commodity loans beyond their normal 1 year termination date to permit producers to hold some part of their production which is surplus to existing market requirement for sale at some time in the future when such supplies are in greater need.

In exchange for suspension of interest on the loan, storage payments and any additional considerations necessary to encourage adequate participation in the program, producers would agree to market some portion of the commodities stored under the program or forfeit all or part of the direct financial benefits they have received when the market price reaches specific levels.

To provide for the orderly marketing of commodities held under the program, three "release points" would be estab-lished, at 150 percent, 175 percent, and 200 percent, respectively, of the loan rate prevailing at the time of release. For example, using the current \$2.25 loan rate for wheat, the Secretary of Agriculture could call for repayment of the loans equivalent to up to one-quarter of the wheat stocks held under this program whenever the average market price reached \$3.37, and one-half of the stocks when the price reached \$3.93, and the remainder of the stocks when market prices reached \$4.50. The Secretary also would be able to call for commodity deliveries at all three points.

In addition, my bill would raise the minimum price at which grain stocks held by the Commodity Credit Corporation could be sold onto the domestic

market, from 115 percent to 150 percent of the current loan rate, and would provide that no more than half the inventories on hand at the beginning of each quarter could be sold during that quarter.

It further is my hope that the Secretary of Agriculture would refrain from any sales from Government stocks until all stocks held under the extended loan program by the producers had been released. The increased minimum release price for Government held stocks is intended to provide producers with some protection from premature release of Government held stocks to dampen market prices, as has happened in the past as a result of political pressures.

The limitation on the quantity of stocks which can be released during any quarter is intended to help avoid the situation of 1973 when Government held stocks were exhausted before the price rationing mechanism had come into full play.

My bill also authorizes the Secretary to acquire up to 2 million tons of food grains to be released only for emergencies or crop shortfalls in developing countries. The 2 million tons is intended to represent a commitment of "good faith" toward the negotiation of an international food reserve with other nations.

Pursuant to such an agreement with other countries to establish a food reserve to meet emergencies and crop shortfalls in developing countries, the Secretary of Agriculture would be authorized to acquire and maintain up to 6 million tons of food grains to be used for such purposes.

The World Food Conference of 1974 recognized the need to provide for greater food security for the developing world and recommended an international undertaking toward this objective, based upon a system of buffer stocks of food to help balance out sharp swings in food availability.

The discussions on international grain reserves have followed several separate tracks. The first is to create stocks to be held to meet food emergencies in developing nations. The World Food Council has discussed building an inventory of 500,000 tons for such purpose. Actually, it would be difficult to imagine a circumstance when needs of such a small magnitude could not be drawn from regular food aid programing. However, I support such a reserve if it will lead to the better coordination of, and an improvement in, the mechanism for multilateral food relief.

Another threat to food security is crop shortfalls in developing nations. In this situation there is generally a longer "leadtime" to provide for food needs in the affected countries. Again, with the possible exception of the Asian subcontinent, such needs could be met through regular concessional sales or grants of food under existing programs. However, a combination of severe crop shortfalls such as were experienced in 1973–74 would result in significant price increases for basic food commodities and a corresponding decline in the volume of available food assistance.

The International Emergency Food Reserve I am proposing would be designed to meet both of these contingencies-emergency relief as well as crop shortfalls.

Mr. President, the time has come to develop a system of food and farm security which provides for the long term strength of the American agricultural economy, assures domestic con-sumers of an adequate food supply at reasonable food prices, and permits the United States to continue its role of leadership in providing for humanitarian food needs abroad. I believe the proposal I am offering today represents a positive and broadly acceptable step toward this goal, and I ask my col-leagues to join with me in support of my proposed Domestic and International Food Security Act of 1977

Mr. President, I ask unanimous consent that the text of my bill be printed

in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1219

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Domestic and International Food Security Act of 1977."

POLICIES AND PURPOSES

SEC. 2. It is the purpose of this Act to strengthen and improve the food and agricultural economy of the United States by the use of measures which will maintain adequate economic incentives for farm production, permit structural adjustments to meet fluctuating demands for food and feed, and decrease excessive fluctuations in the prices of food and feed, and to authorize a specific commitment by the United States to reserve a portion of its food abundance to meet humanitarian food relief requirements in developing countries, in order to encourage the participation and progress of other nations toward the establishment of an international system of grain reserves to provide for greater food security within the developing nations of the world.

SEC. 3(a). The Congress declares it to be the policy of the United States to encourage strong American agricultural economy which provides producers with an adequate return on their labor and capital investment in food production and assures consumers an adequate and consistently accessible food and feed supply, and to limit government involvement in the production and marketing of food only to the protection of producers and consumers against such exceptional circumstances as may threaten these

objectives.

(b) The Congress declares it to be the policy of the United States to seek agreement with the other major grain exporting and importing nations of the world on an inter-national system of grain reserves as recom-mended by the World Food Conference which helps assure adequate supplies to meet present and anticipated world food needs, provides for orderly adjustment to changes in available world food supplies and protects the access of developing nations to available supplies to meet food requirements in times shortage. Such reserves would be established through negotiations with other nations, and the costs and benefits of such reserves would be shared equitably among the participating nations.

TITLE I—PRODUCER STORAGE PROGRAM

SEC. 101. (a) The Secretary is authorized to formulate and carry out a program under which the producers of wheat and feed grains will be able to extend the time period for the orderly marketing of such commodities (such program hereinafter referred to as the

program")

(b) In carrying out the program, the Secretary shall (1) permit a producer, at any time prior to the expiration of the term of the initial price support loan made to such producer on any crop of wheat or feed grains, to extend the term of such loan for any period not in excess of three years, (2) subject to the provisions of section 102, pay for the costs of storage of any such commodity, plus any additional consideration necessary to encourage adequate participation in the program, (3) not require any payments on interest accrued by the producer after an agreement is reached to extend the term of such loan except as pro-vided below, and (4) require any producer whose loan has been extended on any such commodity under this Act and who has removed such commodity from storage and marketed it during the period of the ex-tended agreement to repay to the Commod-ity Credit Corporation any accrued interest and the amount of any advances made by the Secretary for the payment of storage costs or additional consideration as a part of participation in the program, except as provided in section 102.

SEC. 102. (a) Whenever the average market price for the previous five trading days for any commodity stored under the program is equal to or greater than 150 per centum of the current loan rate for such commodity the Secretary is authorized to take certain steps affecting one-quarter the commodities stored by the producer under this Act. The Secretary is authorized to call for delivery to the market one-quarter of the commodities stored by such producer. The producer shall repay the outstanding loan for commodities called for delivery by the Secretary. For any remaining balance of the one-quarter quantity not called for delivery the Secretary shall issue an order, requiring the producer within 60 days after the date of such order, to either (1) repay the loan obligation outstanding plus any ac-crued interest thereon, or (2) establish that at least an equivalent quantity of such commodity originally under the loan has been marketed or otherwise disposed of by such producter and an equivalent portion of the principal of such loan has been repaid.

(b) Whenever the average market price for the previous five trading days for any commodity stored under the program is equal to or greater than 175 per centum of the cur-rent loan rate for such commodity the Secretary is authorized to take certain steps affecting one-half the commodities stored by the producer under this Act. The Secretary is authorized to call for delivery to the market one-half of the commodities stored by such producer and he shall assure that at least one-quarter of the total quantity stored by the producer shall actually be delivered. The producer shall repay the outstanding loan for commodities called for delivery by the Secretary. For any remaining balance of the one-half quantity not called for delivery the Secretary shall issue an order, requiring the producer within 60 days after the date of such order, to either (1) repay the loan obligation outstanding plus any ac-crued interest thereon and one-half the storage payments, or (2) establish that at least an equivalent quantity of such commodity originally under the loan has been marketed or otherwise disposed of by such producer and an equivalent portion of the principal of such loan has been repaid.

(c) Whenever the average market price for the previous five trading days for any commodity stored under the program is equal to or greater than 200 per centum of the current loan rate for such commodity the Secretary is authorized to take certain steps affecting all of the commodities stored by the producer under this Act. The Secretary is authorized to call for delivery to the market all of the commodities stored by such producer and he shall assure that at least onehalf of the total quantity stored by the producer shall actually be delivered. The producer shall repay the outstanding loan for commodities called for delivery by the Secretary. For any remaining balance of the total of the commodities not called for delivery the Secretary shall issue an order, requiring the producer within 60 days after the date of such order, to either (1) repay the loan obligation outstanding plus any accrued in-terest thereon, storage payments, or other consideration received pursuant to section 101(b)(2), or (2) establish that at least an equivalent quantity of such commodity originally under the loan has been marketed or otherwise disposed of by such producer and an equivalent portion of the principal of such loan has been repaid.

SEC. 103. (a) Ninety days before the beginning of the marketing year for each respective crop included in this program the Secretary shall announce the total quantity of such commodity which will be held under the provisions of this program. In no case shall such total quantity exceed one-third of the average annual total production of such commodity for the previous three crop years, or the level recommended by the Secretary after one year of study which shall include consultatations with commodity producers who might be affected or their representatives.

(b) Ninety days before the beginning of the marketing year for each respective crop the Secretary shall announce the maximum quantity of any commodity which any producer may have in storage under the program at any time; Provided, That such quantity may not exceed 50 per centum of the average production of such commodity on the farm for the three years immediately preceding the crop year in which the determination is made.

SEC. 104. In order to insure that there are adequate storage facilities available to carry out the purposes of this Act, the Secretary is authorized to make loans through the Commodity Credit Corporation to assist producers to construct new storage facilities or to expand or improve existing storage facilities. Such loans may be made on such terms and conditions as the Secretary deems appropriate except that no loan may be made to any producer in an amount in excess of \$40,000. The amount of a loan under this section shall be based upon the funds necessary to construct a facility adequate to store the average quantity of wheat and feedgrains produced by the borrower during the three preceding crop years. Preference shall be given to producers without storage facilities in carrying out this section.

SEC. 105. The third proviso of the third sentence of section 407 of the Agricultural Act of 1949 (7 U.S.C. 1427) is amended by (1) inserting after "That the Corporation shall not" the following: "sell in any quarter any quantity of its stocks of wheat, corn, grain sorghum, barley, oats, rye and soybeans in excess of a quantity equal to one half of the total quantity of such commodities on hand at the beginning of such quarter nor shall the Corporation"; and (2) striking out '115 per centum" and inserting in lieu thereof

"150 per centum"

SEC. 106. As used in this Act: (a) the term "feed grains" means corn, grain sorghum, barley, oats, and rye; and (b) the term "Secretary" means the Secretary. means the Secretary of Agriculture of the United States.

TITLE II—INTERNATIONAL EMERGENCY FOOD RESERVE

SEC. 201. The President is authorized to enter into negotiations with other nations to develop an international system of food reserves to provide for humanitarian food relief needs and to establish and maintain a food reserve of grains in concert with other nations as the contribution of the United States toward the development of such a system to be made available in the event of food emergencies in foreign countries or the United States. Such reserve shall be known "International Emergency Reserve"

SEC. 202. (a) The Secretary is authorized to build minimum stocks of foodgrains for an International Emergency Food Reserve of no less than 2 million tons as an indication of the United States commitment to this establishment of an international system of national food reserves. Pursuant to the completion of an international agreement on such an undertaking, the Secretary is authorized to increase such stocks to a level no greater than six million tons.

(b) (1) The Secretary shall build a reserve of no less than 2 million tons by the earliest possible date. As soon as practicable following the effective date of an international agreement pursuant to subsection (a) the Secretary shall increase the minimum level of stocks to such level as may be established as a provision of the United States' participation in such international agreement. The Secretary shall re-establish such reserve to level prescribed under the respective cases provided for above by the earliest possible date following any action under section 203 which has drawn the reserves to a level

less than two million tons.

(2) Such reserve can be acquired by the Commodity Credit Corporation as the result of defaults on loans made under price support programs administered by the Secretary. The Secretary may also acquire such reserve through purchases on the market to the extent that quantities acquired by the Commodity Credit Corporation under price support operations are inadequate to meet objectives of section 202. Purchases made by the Secretary under this section may be made at a price not in excess of 175 per centum of the current loan rate under any price support program.

SEC. 203. Grains in the International Emergency Food Reserve may be disposed of only under the following circumstances:

(1) Such grains may be utilized for the purpose of providing humanitarian relief in any foreign country struck by a major disaster, as determined by the President.

(2) Such grains may be utilized for the purpose of assisting any developing country to meet its food requirement in any year in which there has been such a severe shortfall in such food production, as determined by the Secretary, as to warrant the use of

U.S. grains for such purpose.

Sec. 203. Notwithstanding any provision of this Act, the Secretary shall provide for the periodic rotation of stocks of the national Emergency Food Reserve, utilizing insofar as practicable commodity distributions under P. L. 580 and other federal programs, to avoid spoilage and deterioration of such stocks, but any quantity removed from such reserve for rotation purposes shall be promptly replaced with an equivalent quantity purchased on the open market.

By Mr. SCOTT:

S. 1221. A bill to amend chapter 44 of title 18 of the United States Code-respecting firearms—to penalize the use of firearms in the commission of any felony and to increase the penalties in certain related existing provisions; to the Committee on the Judiciary.

PROPOSED MANDATORY MINIMUM SENTENCES FOR USE OF FIREARMS

Mr. SCOTT. Mr. President, I am sending to the desk a bill that would impose mandatory minimum sentences for the use of any firearm to commit a felony cognizable in a Federal court, and for the use of a firearm transported in interstate or foreign commerce to commit a crime punishable by a prison term exceeding 1 year upon conviction in a State court.

Under the measure, an offender convicted for the first time would receive a prison term not less than 1 year, nor more than 3 years. In second and subsequent offenses, a repeat offender would receive not less than 5 years nor more than 10 years. The sentence imposed for the use of the firearm could not be suspended, reduced by probation, or run concurrently with the sentence of the connected offense.

Ours is a nation desiring certainty of punishment upon conviction of serious crimes, to insure that our criminal laws are an effective deterrent. Many believe that mandatory prison sentences will curb violent crime. I understand that provisions exist in a number of State criminal laws, with numerous organizations across the Nation favoring mandatory minimum sentences for gun-related offenses.

There appears to be broad agreement in Virginia that there should be no national registration or licensing of firearms, but that mandatory minimum sentencing for firearms-related crimes is a more desirable approach.

By Mr. McGOVERN:

S. 1223. A bill to establish a National Commission on Food Production, Processing, Marketing, and Pricing to study the food industry from the producer to the consumer; to the Committee on Agriculture, Nutrition, and Forestry.

A NATIONAL COMMISSION ON FOOD PRODUCTION, PROCESSING, MARKETING, AND PRICING

Mr. McGOVERN. Mr. President, today I introduce legislation to establish a National Commission on Food Production, Processing, Marketing, and Pricing. The legislation is timely, because it virtually coincides with the public release of a study done in part of this area by the Joint Economic Committee. This study concludes that there is a substantial probability that monopoly marketing practices exist in cities where there is a concentration of the food market centered in one or two large food purveyors. The Joint Economic Committee study centers on the impact on consumers of market concentration in food retailing. Obviously, this is an important approach. though I feel that to fully justify our responsibilites to the American people, a broader approach through the whole food chain is appropriate.

Senators will recall the original food Commission study in 1964 and 1965. Though worthwhile and informative, it appears to me that the principal deficiency in the study was the lack of authorization to continue monitoring production, processing, marketing, and pricing procedures after the Commission's work was completed. This conclusion was reinforced in 1975 during the national food price inquiry of the Senate Select Committee on Nutrition and Human Needs, which held 2 days of hearings and has published several volumes of food industry studies. We need an accurate and full evaluation of the state of competition in the food industry today.

Lest anyone misunderstand the thrust of this legislation, let me assure everyone that its aim is to review every single production, processing, and marketing and pricing practice in the industry. I start with no preconceived concepts of who are the saints or who are the sinners. It is conceivable that there are none. I do feel that it is necessary and desirable to determine in the first instance where the spread is in food from the time it is produced by farmers to the time it reaches the dinner table, and in the second instance, I feel it to be in the public interest that the pitfalls of the first Commission do not occur again by providing a monitoring mechanism to carry on the primary functions of the Commission once its original authority lapses.

As a Senator from a State whose principal function in the food chain is one of production; I have firsthand knowledge and experience with the dissatisfaction producers have for what they consider their fair share of the food dollars. Those Members of the body from the centers of population serve constituencies where processing, transportation, and marketing contribute to the ultimate cost to consumers. In a very real sense, each Member of the body serves that greatest constituency, the American people who express unrest at the checkout

counter of the supermarket.

I say, Mr. President, that we thus have a community of interest in everything that happens to what we all put in our daily diets. Absence of definitive studies in this area for over 12 years clearly indicates that such pursuits are desirable. We must start the investigative process now to determine what legislaion is necessary. The life of the Commission under the legislation is limited to 2 years. with the important mandate to the Commission that its report indicate to the Congress its recommendations on where its primary monitoring functions for the purpose of maintaining current data will reside under the current organizational framework of the U.S. Government. I feel that by the end of the study, the Commission itself will be the best judge of the appropriate department, commission, or board where the functions it establishes will be best perpetuated. It is high time that this Congress act swiftly to allow the Commission to commence with its functions.

Mr. President, I ask unanimous consent that the text of the bill be printed at the conclusion of my remarks as well as the March 20, 1977, press release of the Joint Economic Committee:

There being no objection, the material was ordered to be printed in the RECORD. as follows:

S. 1223

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there is hereby established a National Commission on Food Production, Processing, Marketing, and Pricing (hereinafter referred to as the "Commission").

ORGANIZATION

Sec. 2. (a) The Commission shall be composed of fifteen members, none of whom may be employees of the Federal Government or Members of Congress, except as provided in paragraphs (1) through (4) of this subsection, including-

(1) one member of the majority party of the House of Representatives, to be appointed by the Speaker of the House of Representa-

(2) one member of the majority party of the Senate, to be appointed by the President

pro tempore of the Senate;

(3) one member of the most numerous minority party of the House of Representatives, to be appointed by the Speaker of the House of Representatives;

(4) one member of the most numerous minority party of the Senate, to be appointed by the President pro tempore of the Senate;

(5) three members to be appointed from among the public at large by the President pro tempore of the Senate;

(6) three members to be appointed from among the public at large by the Speaker of

the House of Representatives; and

(7) five members to be appointed by the President, by and with the advice and consent of the Senate, one of whom shall be designated as the Chairman at the time of his appointment and who, by background, experience, and education, is particularly suited to the position.

A Vice Chairman shall be selected by a majority vote of the full Commission. The Commission members shall represent, as far as practicable: producers, processors, and dis-tributors of food products; labor; agricultural economists; antitrust practitioners, including lawyers and economists; and consumers, who shall be representatives of bona fide consumer organizations or individuals who are not paid employees or consultants of an organization engaged in food production or distribution.

(b) Any vacancy in the Commission shall not affect its powers, except the selection of a Vice Chairman, and shall be filled in the same manner as the original position.

(c) Eight members of the Commission shall constitute a quorum.

COMPENSATION OF MEMBERS

Sec. 3. Each member of the Commission. except members appointed pursuant to section 2(a)(1) through (a)(4), may receive compensation at the highest rate of pay for grade GS-18 of the General Schedule under section 5332 of title 2, United States Code, for each day such member is engaged upon the work of the Commission, and each member shall be reimbursed for travel expenses, including per diem in lieu of subsistence as authorized under section 5703 of title 5, United States Code.

DUTIES OF THE COMMISSION

Sec. 4. (a) The Commission shall study and appraise the economic and industrial structure of all segments of the food industry, including, but not limited to-

(1) the actual changes, since the National Commission on Food Marketing (established by Public Law 88-354, 78 Stat. 269) concluded its study in the various segments of the food industry;

(2) economic forecasts with respect to the persistence of economic concentration, integration, diversification, and centralization and anticompetitive actions by firms or groups of firms in the food industry;

(3) desirable structural changes in the various segments of the food industry to assure both efficiency and the benefits of the best economies of scale and coordination in the production, processing, and distribu-tion of food while maintaining competition in price and adequate services to consumers and acceptable levels of competition in all segments of the industry from producer to consumer;

(4) changes, if any, in law or public policies, in the economic organization and operations of farming and of food assembly, processing, and distributions, to achieve the best levels of competition and lower prices for consumers:

(5) the effectiveness of the services, including dissemination of market news, and regulatory activities of the Federal Government in terms of present as well as probable future developments in the industry and the impact of such services upon the ultimate consumers:

(6) the effect of food imports and exports on producers, processors, and consumers in the United States;

(7) the effect of wages and other labor compensation provisions on the price of food:

the effect of transportation on the (8) availability, distribution, price, and cost of food; and

(9) the profitability of corporations and other organizations engaged in the food in-

dustry and the use of such profits. (b) The Commission shall make such interim reports as it deems advisable, and it shall make a final report of its findings, conclusions, and legislative recommendations to the President and to the Congress not later than two years after the date of enactment of the Act.

(c) All books, papers, reports, memorandums, and all of the documents collected, produced, obtained, or in the custody or possession of the Commission shall be transmitted to a Department, Agency, or Commission of the Federal Government determined the Commission as the Department, Agency, or Commission most appropriate to carry forth the future functions enumerated hereafter in the provisions of this Act, which Department, Agency, or Commission shall maintain them and make them readily available for public inspection and copying, except that any information so transmitted shall be held by such Department, Agency, or Commission in such status, with respect to confidentiality and privacy considerations, as this Commission deems appropriate.

POWERS OF THE COMMISSION

SEC. 5. (a) The Commission, or any three members thereof authorized by the Commission, may conduct hearings anywhere in the United States or otherwise secure data and expressions of opinions pertinent to the study. In connection therewith the Commission is authorized by a majority vote-

(1) to require all working papers, studies, interim reports, and the final report of the National Commission on Food Marketing established by Public Law 88-354 to be made

available to the Commission:

(2) notwithstanding any provision of the Federal Reports Act, to require, by special or general orders, any person to submit in writing such reports and answers to questions as the Commission may prescribe and within such reasonable period and under oath or otherwise as the Commission may determine:

(3) to administer oaths;(4) to require by subpens the attendance and testimony of witnesses in the production of all documentary evidence relating to the execution of its duties;

(5) in the case of disobedience to a subpena or order issued under subsection (a), to invoke the aid of any district court of the United States in requiring compliance with such subpena or order;

(6) in any proceeding or investigation, to order testimony to be taken by deposition before any person who is designated by the Commission and has the power to administer oaths, and in such instances to compel testimony in the production of evidence in the same manner as authorized under paragraphs (4) and (5); and

(7) to pay witnesses the same fees and mileages as are paid in like circumstances in

the courts of the United States.

(b) Any district court of the United States within the jurisdiction of which an inquiry under this Act is carried on may, in case of refusal to obey a subpena or order of the Commission issued under subsection issue an order requiring compliance there-with; and any failure to obey the order of the court may be punished by the court as a contempt thereof.

(c) Notwithstanding any other provision of law, the Commission is authorized to require directly from the head of any executive department, agency, or independent establishment of the Federal Government available information deemed useful in the discharge of its duties, and all such departments, agencies, and establishments are authorized and directed to cooperate with the Commission and to furnish all information requested by the Commission, except that any information so obtained shall be held by the Commission in the same status, with respect to confidentiality and privacy con-siderations, as such information was held by the furnishing department, agency, or independent establishment.

(d) The Commission is authorized to enter into contracts with Federal or State agencies, private firms, institutions, and individuals for the conducting of research or surveys. the preparation of reports, and other activities necessary to the discharge of its duties.

(e) Subject to the provisions of section 552 of title 5. United States Code, when the Commission finds that publication of any information obtained by it is in the public interest and would not give an unfair economic, business, or competitive advantage to any person and would not constitute a breach of any agreement or understanding between the Commission and any person providing such information with respect to the confidentiality of such information; it is authorized to publish such information in the form and manner deemed best adapted for public use, except that data and infor-mation which would separately disclose the business transactions of any person, trade secrets, or names of customers shall be held in confidence and shall not be disclosed by the Commission or its staff.

ADMINISTRATIVE ARRANGEMENTS

SEC. 6. (a) The Commission is authorized to appoint and fix the compensation of an executive director without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to the provisions of chap-ter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates. The Executive Director, with the approval of the Commission, shall employ and fix the compensation of such additional personnel as may be necessary to carry out the functions of the Commission, except that no individual so appointed shall be paid at a rate in excess of the rate for GS-18 of the General Schedule under section 5332 of title 5, United States Code.

(b) The Executive Director, with the approval of the Commission, is authorized to obtain the services of experts and consultants provided under section 3109 of title 5, United States Code.

(c) The head of any executive department, agency, or independent establishment of the Federal Government is authorized to detail, on a reimbursable basis, any of its personnel to assist the Commission in carrying out its work.

(d) Financial and administrative services (including those relating to budgeting and accounting, financial reporting, personnel, and procurement) shall be provided to the Commission by the General Services Administration, for which payment shall be made in advance, or by reimbursement, from funds of the Commission in such amounts as may be agreed upon by the Chairman of the Commission and the Administrator of General Services

(e) Ninety days after submission of its final report, as provided in section 4(b), the Commission shall cease to exist.

ANNUAL REPORTS ON THE FOOD INDUSTRY

SEC. 7. (a) Not later than six months after the date of the filing of the final report required under section 4(b) and annually thereafter, the Federal Trade Commission, the Department of Justice, and the Department of Agriculture shall each separately submit to the Congress and shall each separately publish in the Federal Register, separate reports on the policy planning, budget allotments, investigations, complaints, indictments, litigation, and other actions of each such agency with respect to the enforcement of the antitrust laws on the various

sectors of the food industry.

(b) Not later than one year after filing of the report required under section 4(b) and annually thereafter, that section of the Federal Government denominated in section 4 (c) shall submit to the Congress and shall publish in the Federal Register, indexes of the structure and the state of competition in the food industry, based on economic indicators available to or collected by the body re ferred to hereinabove. Such indexes shall include an account of all major segments of the food industry by commodity as well as by line of business; indicating marketing structure, performance and trends, growth of horizontal and vertical integration, and possible monopoly overcharges; and be accompanied by an expository, narrative explanation of all such indexes together with specific recommendations to promote competition in the food industry.

AUTHORIZATION OF APPROPRIATIONS

SEC. 8. (a) There is hereby authorized to be appropriated to the Second National Commission on Food Production, Processing, Marketing, and Pricing such sums, not in excess of \$6,000,000, as may be necessary to carry out the provisions of this Act.

(b) There is hereby authorized to be ap-propriated to the successor body such sums not in excess of \$1,000,000, as may be neces sary to carry out the provisions of section 7. Such sums shall remain available for obligation until expended.

JEC STUDY REVEALS PATTERN OF HIGH FOOD PRICES AND PROFITS WHEN FEW CHAINS CONTROL LOCAL MARKET

JEC Chairman Richard Bolling (D-Mo.) today released a study examining food chain stores' profits and prices which was prepared for the Joint Economic Committee by researchers at the University of Wisconsin. The study, entitled "The Profit and Price Performance of Leading Food Chains, 1970–1974," is based on subpoenaed confidential company records. These detailed records from the 17 largest food retail chains were analyzed with computers in the two-year study by Drs. Willard Mueller, Bruce Marion, Ronald Cotterill, Frederick Geithman and John Schmelzer. It was released at a JEC hearing at 10:00 a.m. today in Room 318, Russell Senate Office Building.

The study found that retail food prices and profits are higher where few food chains are in competition. Prices in highly concentrated markets, where few firms control food retailing, were as much as 14 percent higher than in more competitive markets during 1974. The authors contend that "monopoly overcharges" in such markets totaled at least \$662 million in 1974 alone.

Rep. Gillis Long (D-La.) and Rep. Margaret Heckler (R-Mass.) conducted the hearing on

the study this morning. A second hearing is scheduled for April 5th at 10:00 a.m.

"This is a pathbreaking study of the impact on consumers of market concentration in food retailing," said Long. "The authors say that when too few supermarkets control sales, consumers pay more than necessary for food.

"There are many food chains nationally. Yet, in most local markets, only a handful of chains will be found in direct competition," continued Long. "This study found that consumers can expect to pay high prices for food, far higher than elsewhere, if only two or three chains dominate or compete in their local market. And these higher pricesup to 14 percent higher than in more competitive markets-are due primarily, if not entirely, to the absence of more firms and stiff competition they generate, according to the authors.

"This study," said Rep. Heckler, "indicates that consumers may be paying a penalty as a result of trends in the retail food industry."

"It is certain to generate controversy, and the Committee's hearings will provide a full and complete exchange in a public forum by economists, consumers, industry spokesmen and federal officials. The study and its conclusions will be extensively reviewed.

Mrs. Heckler added, "It is my particular hope that representatives of major food chains will be prepared to discuss the findings which show their prices and profits in noncompetitive markets to be higher than elsewhere.

"The study indicates that whether consumers pay low or high food prices is a matter of luck. Apparently, household food bills can vary as much as \$300 annually, depending on the number of local food

Additional major study conclusions:

Nationally-branded food item prices averaged 12 percent higher than so-called store brands, which frequently contain the same products.

Chain profits are significantly higher in markets where few stores compete.

A food chain will receive substantially higher profits in markets where it is a dominant firm than in areas where it does not control a major share of the market.

Excessive market concentration in one large eastern city alone resulted in excess prices totaling \$83 million in 1974; consumers in that city paid 6.9 percent more for food at retail because just two food chains dominated the market.

Confidential food chain profit data in 50 metropolitan areas and food chain prices in 36 metropolitan areas were utilized by the researchers. To preserve the confidentiality of the subpoenaed material, some firm and city identifications are not noted in the study. The authors are members of the University of Wisconsin Food System Research Group of NC 117, a North Central Regional Research Project on the Organization and Control of the U.S. Food System.

SCHEDULE OF HEARINGS: PRICES AND PROFITS OF LEADING FOOD CHAINS

March 30, 1977

Room 318, Russell Senate Office Building, 10:00 a.m.:

Dr. Willard Mueller, University of Wiscon-

Dr. Bruce Marion, University of Wisconsin. Dr. Kenneth Farrell, U.S. Department of Agriculture

Dr. Timothy Hammond, Food Marketing Institute.

Dr. Ray Goldberg, Harvard University.

April 5, 1977

Room 6202, Dirksen Senate Office Building, 10:00 a.m.:

Dr. Owen Johnson, Director, Bureau of Competition, FTC.

Dr. Willard Mueller. University of Wisconsin.

Dr. Bruce Marion, University of Wisconsin. Mr. Robert Adlers, Food Marketing In-

Mr. Mark Silbergeld, Consumers Union.

Copies of the study may be obtained from the Joint Economic Committee, Room G-133, Dirksen Office Building, Washington, D.C. 20510.

> By Mr. HANSEN (for himself and Mr. WALLOP):

S. 1224. A bill to amend the act of May 18, 1947, c. 80, section 3, 61 Stat. 102, as amended (25 U.S.C. 613) to permit per capita payments from excess tribal trust funds of the Shoshone and Arapahoe Indian Tribes of Wyoming; to the Special Committee on Indian Affairs.

Mr. HANSEN. Mr. President, today I am pleased to join with Senator Wallop in introducing legislation to amend the Shoshone and Arapahoe Per Capita Distribution Act, in order to allow per capita payments to be made from the excess tribal trust funds of the Shoshone and Arapahoe tribes

The Wind-River Reservation, in Wyoming, is populated by both the Shoshone and Arapahoe tribes. A substantial part of the economy of both these tribes is the per capita income derived from the tribal

trust property.

Under present law the income from tribal trust property is divided equally between the two tribes. A separate trust fund is established for each tribe. Present law directs 85 percent of each tribe's trust fund to be paid per capita to the members of the tribe on a monthly basis. The remaining 15 percent is reserved for governmental and administrative purposes of the tribes.

As of the beginning of this year, the Shoshone tribe's administrative fund was nearly \$23/4 million-well above the tribal government's needs. The Arapahoe Tribe expects to have more than \$1 million on deposit by the end of 1978.

The bill I am introducing today has two major features: First, it provides that 100 percent of the interest earned on all trust funds of the tribes be available for per capita distribution, rather than including it in the 15-percent administrative fund.

Second, the bill provides that all funds in excess of \$1 million in the administrative fund will be added to the 85-percent fund for per capita distribution. This will not only prevent any decrease in the payments, but, when circumstances warrant, will allow an increase in the payments by a sum that does not exceed 20 percent of the per capita payments of the preceding year.

The per capita payments are fixed at the beginning of each calendar year based on an estimate of the next year's income. While royalties and rents can be estimated with some accuracy, an estimate of bonuses involves some guesswork. As a result, in some years, actual income has been less than the amount needed to meet the estimates.

To insure even payments, the Secretary of the Interior is presently authorized to withdraw money from the 15percent fund. He is also required; however, to repay such withdrawals out of the next or succeeding years' income. It is my hope that this legislation would clarify this situation and allow for a more integrated system of adjusting estimates and per capita payments.

The Joint Business Council of the two tribes has unanimously expressed the opinion that a fund of \$1 million is sufficient for contingencies and possible capital investments. Since the Government pays only 4 percent interest on the principal of the fund in the Treasury and pays no interest on the interest earned on the principal, it is felt that it is not wise economics to leave the excess on deposit. While the Bureau of Indian Affairs invests most of the funds in certificates of deposit, the rate of interest earned does not keep up with inflation.

The members of the two tribes believe that they should have the benefit of these excess funds, especially now when they are faced with the continually increasing cost of living. I urge favorable consideration of this legislation.

By Mr. SCOTT:

S.J. Res. 43. A joint resolution proposing an amendment to the Constitution of the United States relating to the participation in nondenominational prayers in any building which is supported in whole or in part through the expenditure of public funds; to the Committee on the Judiciary.

SCHOOL PRAYER

Mr. SCOTT. Mr. President, I am sending to the desk a joint resolution and ask that it be printed and referred to the Judiciary Committee. It is a proposed constitutional amendment to protect the right of persons to participate in nondenominational prayer in any public building which is supported in whole or in part through public funds.

In my opinion, the people in Virginia and across the country support a view that our major institutions, including schools, should provide a worthwhile example of the best in American values and basic principles, of our long-held religious heritage, and of our reverence for moral teachings. I believe that most Americans do support reinstating some form of religious observance in our public schools, without regard to a specific church affiliation.

It has been more than 14 years since the U.S. Supreme Court decided to limit the role prayer and other religious observances play in public school systems. This amendment proposes a step toward reaffirming the religious freedom and in these troubled times it would seem desirable that the Nation turn to God for guidance, regardless of the name he is called by any segment of Americans.

ADDITIONAL COSPONSORS

S. 53

At the request of Mr. Helms, the Senator from South Carolina (Mr. Thurmond) was added as a cosponsor of S. 535, the Equal Educational Opportunity Amendments of 1977.

S. 1150

At the request of Mr. Humphrey, the Senator from Montana (Mr. Melcher)

was added as a cosponsor of S. 1150, the Rural Housing Act of 1977.

S. 1174

At the request of Mr. Dole, the Senator from South Dakota (Mr. McGovern) was added as a cosponsor of S. 1174, the Critical Lands Resource Conservation Act of 1977.

NOTICES OF HEARINGS

1977 BUDGET OF FEDERAL RESERVE SYSTEM

Mr. PROXMIRE. Mr. President, the Committee on Banking, Housing, and Urban Affairs will hold a single hearing on the Federal Reserve System's 1977 budget at 10:30 a.m. on April 7 in room 5302, Dirksen Senate Office Building.

THE WAR POWERS RESOLUTION

Mr. SPARKMAN. Mr. President, I am happy to announce that the Committee on Foreign Relations will hold hearings to review the operation and effectiveness of the War Powers Resolution on July 13, 14, and 15.

It will be 4 years ago this November that the War Powers Resolution was enacted over the President's veto. Since that date it has faced three major tests: The evacuations of Phnom Penh and Saigon and the Mayaguez incident. We thus have the beginnings of a track record by which to gage the successes and failures of the consultation and reporting requirements of the resolution.

The so-called termination or withdrawal requirements have not—happily—ever been tested. Nonetheless, considerable thought has been given these and other provisions of the resolution by the academic community, and the committee may well benefit from their insights. I would hasten to add that we will be eager to hear the views of our colleagues in the House, as well as spokesmen for the executive branch, which now regards the resolution as constitutional.

I have long believed that so critically important a statute ought not to be amended without good reason, and that certainty and predictability are particularly necessary in legislation of this magnitude. It may well be that no amendments are called for; it will be the purpose of these hearings to determine whether that is so. But our country now finds itself presented with a promising opportunity to reflect on normally heated questions in a period of peace and tranquillity. It behooves this committee, and the Congress, to take advantage of that opportunity to ascertain whether the resolution requires further refinement. The stakes are high-war and constitutional crisis-and some years from now we may be glad that we looked again, carefully and coolly, at these momentous questions.

ADDITIONAL STATEMENTS

JERRY CRUMP—A GREAT AMERICAN

Mr. HELMS. I have three items, each concerning a gallant hero of my State, which I want to share with my fellow Senators. Together, these items should convey an important message to all of us.

They concern a young man who died a few weeks ago—a man who was awarded the Congressional Medal of Honor, a man who, at another time and place, demonstrated that he was willing to lay down his life for his country and for his fellow soldiers.

Talk about gallantry, Mr. President. Talk about heroism. The late Sgt. Jerry Crump, dead at 43, was the very spirit of America.

I shall ask unanimous consent in a moment, Mr. President, to have printed in the RECORD, first, a letter I have received from Mr. R. A. Miskelly, chairman of the western conference, Department of North Carolina, Veterans of Foreign Wars of the United States; second. some very inadequate comments of my own, written several weeks ago when I learned of Jerry Crump's death, and printed in a number of newspapers in my State; and third, an article from the March issue of the VFW Leader "No Wonder We Don't Have Patriotism," written by Tom Sieg. I believe I am correct in saying that Mr. Sieg is a reporter for the Winston-Salem Sentinel, where the article originally appeared.

Mr. Miskelly is past department commander of the VFW in North Carolina, and a distinguished citizen of my State.

I ask unanimous consent that the aforementioned three items be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

WESTERN CONFERENCE, DEPART-MENT OF NORTH CAROLINA, VET-ERANS OF FOREIGN WARS OF U.S., March 27, 1977.

DEAR SENATOR HELMS: Your tribute to Sgt. Jerry Crump in the March issue of the VFW LEADER was a beautiful article.

We in Blue Ridge Mountain Post No. 1142, Veterans of Foreign Wars in North Wilkesboro will have a pictorial memorial to Jerry Crump mounted on a wall of our post home and I am going to include the above mentioned article in our memorial.

I am enclosing another article that appeared in the same issue of the Leader. It reflects the feeling, I am sure, of all of us who have served our nation in all of the armed services. If I were to title these two articles—yours and Tom Sieg's—I think I would title them "Majestic" and "Tragedy".

Very sincerely,

R. A. MISKELLY.

REPORT FROM U.S. SENATOR JESSE HELMS

Washington.—A week or so back, there was a brief item in one of the North Carolina papers reporting that Jerry Crump of Lincolnton had died in a traffic accident. The item mentioned that Mr. Crump had been cited for heroism during the Korean War.

As I read the item, my mind raced back in time to one morning in 1952, when I went down to the White House with North Carolina's Senators Clyde R. Hoey and Willis Smith. President Truman had invited us to attend ceremonies in the Rose Garden for three young men who were being awarded the Congressional Medal of Honor—the top honor that can be bestowed upon a U.S. serviceman.

Two of the young men were there—Jerry Crump of Lincolnton, N.C., and another soldier—from the mid-west, as I recall. The third soldier, was not there. He had lost his life, and the President presented the Medal of Honor to his family.

Honor to his family.

Crump.—I shall always remember that

morning. It was a beautiful day. The families of the three men had come to Washington at the invitation of the President of the United States. General Omar Bradley, whom I saw recently at the inauguration of President Carter, stood with the President at the ceremony.

President Truman greeted everyone in the Oval Office; then we proceeded with the President to the Rose Garden. I remember that the President's voice choked up as he read each of the citations. Then he asked the two young men to stand beside him. He shook their hands simultaneously as the newsmen took pictures of the occasion.

Afterwards, there was a quiet luncheon at the Capitol for Jerry Crump and his family. Then they departed, heading back to Lincolnton. I never saw him again—but many times during the years since, I have wondered how

he was getting along.

Miracle.—Young Jerry had incredibly survived the severe wounds he suffered in battle on September 6-7, 1951. On September 7, a communist had lobbed a hand grenade into a group of Americans. Sergeant Crump, without a second thought, threw his body over the grenade to save the lives of his fellow soldiers.

He did so, without hesitation, knowing that it would undoubtedly cost him his own life. Miraculously, he was still barely alive after the grenade exploded. He was rushed to an Army hospital, where he was patched up, and then flown to another hospital where he pegan a series of operations over a period of more than a year.

Puzzled.—That morning at the White House he was a quiet, shy young American who seemed puzzled that so much attention

was being devoted to him.

As I say, I never saw Jerry Crump again after that day in Washington nearly a quarter-century ago. But I was saddened when I read of the traffic accident that cost him his life. In his quiet, modest way, he was a measurement of the greatness of America. He proved his willingness to sacrifice his own life for his friends and his country.

Maybe he didn't agree with the war in

Maybe he didn't agree with the war in Korea. But he didn't cut and run when duty called. He was willing to give everything he had for his country—and he almost did.

"No Wonder We Don't Have Patriotism" (By Tom Sieg)

"There used to be heroes," said Betty Rowland, "people we admired and respected. We used to honor them. And it just seems like we don't do that anymore."

"People have forgotten patriotism," said

Jack Ragan.

Ragan and Mrs. Rowland had come away from the recent funeral for Jerry Crump, winner of the Medal of Honor, saddened and

feeling somehow unfulfilled.

"In a military funeral," Ragan said, "the honor guard is at the head and foot of the casket at all times—in the home, at the funeral home, at graveside. They did not have this. In fact, there was no honor guard in the funeral home when we arrived. All during the time of the service, the honor guard wasn't, at the casket either."

"And what was the good of having the honor guard there," asked Mrs. Rowland, "if they didn't stay with the casket until it went

into the ground?"

There were other things that bothered Ragan, who is commander of VFW Post 6367, and Mrs. Rowland, an auxiliary member at that post and at Clyde Bolling Post 55 of the American Legion.

"It's a lonesome thing to walk in and just see a casket," said Mrs. Rowland. "The casket was there. His Medal of Honor flag was there, with the American flag covering it. But there was nothing to show that he had won the nation's highest honor.

"We were told that a military general was supposed to be there, but we didn't see any. The highest rank was colonel."

"There was no one there from the state's Department of Military Affairs," said Ragan. "I know, because I asked . . . There was no one from the governor's office that I could find."

To Ragan and Mrs. Rowland, it was not a fitting ending to a story that began when an 18-year-old GI killed 24 enemy soldiers in one action and then threw himself on a hand grenade to protect his wounded buddles.

"He was such a quiet, unassuming, gentle person," said Mrs. Rowland, "not what I thought someone who did what he did would be like...He was invited to the White House; he met John F. Kennedy. Everybody respected him and gave him all those medals while he was alive.

"Then all of a sudden at 43 years old he dies, and it seems to me that the government just forgot. It's no wonder we don't have any patriotism in our country any-

more .

"I can remember World War II and how we felt about a few people that we knew who got out of serving—they were physically able, but they didn't serve. We all knew people like that. And I remember how really proud I was of my daddy when he joined, as well as some friends we knew who were also a little older.

"Then with Vietnam, the boys were made fun of and they were laughed at. The uniform was not an honor symbol anymore. Even now, the Vietnam veterans—we've taken that pride away from them. And I miss that thing of everybody being proud.

"I guess it all boils down to what I feel: that I as an average citizen who had never seen a military funeral—I went to a service for a man who had done more than I hope I'll ever be called on to do, and there was no pride, love, respect for country. It seemed to me everybody had forgot what so many had done."

"It seems," said Ragan, "that the people have forgotten the sacrifices that not only the men in service went through, but also the sacrifices that they themselves had to make in this country—like rationing sugar, gasoline, things like that.

"If people could visit a VA hospital and see these veterans they would stop and remember exactly what we did do, because, you see, there are a lot of hospitals that have people who will be there for the rest of their lives.

"People have just forgot what patriotism means. Do you know what it means?

"That love for country in the hearts of the people which shall make that country strong to resist foreign opposition and domestic intrigue—which impresses each and every individual with a sense of the inalienable rights of others and prepares him to accept the responsibility of protecting those rights."

And then, speaking for himself, Mrs. Rowland and others:

"We're still patriotic. We still love our country and our flag, and we're proud of what we've done for them. We'd go back and fight again if needed. That's just how we feel."

DAIRY PRICE SUPPORTS: THE BERGLAND DECISION

Mr. PROXMIRE. Mr. President, Agriculture Secretary Bergland recently decided to raise dairy price supports to about 83 percent of parity, effective April 1, 1977.

I have criticized Mr. Bergland's decision because, in my view, 83 percent of parity is not enough. It falls below the

commitment that President Carter made to Wisconsin dairy farmers last year that he would raise supports to 85 percent of parity. The \$9 per hundredweight which the new price supports will bring Wisconsin dairy farmers is far below the more than \$10 cost of production—not even counting management and labor—that University of Wisconsin experts have calculated.

Farmers, and especially dairy farmers, are the No. 1 victims of economic injustice in this country. Compared to those not on the farm, they work longer hours. They have improved their efficiency and productivity far more. They make a large investment—it now averages about \$200,000 per farm. And they take a much bigger risk on that investment because of weather, inflation, and fluctuating prices.

And yet, with all this, they get an income that is less than two-thirds of the income of those off the farm.

What Secretary Bergland has done will help dairy farmers in Wisconsin and elsewhere, but it will not help enough.

Mr. President, despite the facts that I have outlined above, Secretary Bergland's decision has been criticized by some as being somehow "too generous" to our dairy farmers. That criticism makes no sense to me. Nor does it seem reasonable to either Robert G. Lewis, secretary and chief economist of the Farmers Union, or to Congressmen Richard Nolan and Jim Jeffords, who have contributed articles to today's Washington Post in defense of dairy price supports set at least at the level decided on by Secretary Bergland.

So that my colleagues may have the benefit of reading the full text of the excellent articles by Messrs. Lewis, Nolan, and Jeffords, I ask unanimous consent that they be printed in the Record.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

FAMILY-FARMERS FACE EXTINCTION (By Robert G. Lewis)

Your March 22 editorial should have been entitled "Battering (not "Buttering Up") the Dairy Farmers." It was meanly unjust to these unusually hard-working and poorly paid citizens. But in the end, it will be consumers who will suffer if the attitude your editorial displayed should prevail and the family-farmers are at last battered into economic extinction. What a day of reckoning it will be if consumers become dependent for their milk and cheese upon a "General Foods Corporation" that fixes its prices like General Motors and the other industrial "Generals" do.

Your editorial is insensitive and short-sighted on two counts:

First, it isn't fair. The price farmers get for milk under the new price support announced by the administration (\$9 per 100 lbs.) will barely cover dairy farmers out-of-pocket production costs and leave them returns for their labor and investment far below what any other workers and businessmen would consider acceptable. After allowing for feed produced by the dairy farmer himself at less than it cost him to produce it, and only \$2.04 to \$3.08 per hour for the farmer's labor, the U.S. Department of Agriculture found that the average cost of producing milk in the U.S. in 1976 was \$9.24 per 100 lbs. The cost will go higher in 1977. The excess of the cost above the \$9 support price

will have to come out of the farmer's own

hide—and his wife's and kids'.
Second, it isn't smart. Milk is extremely important to our American diet-and it's extremely big. The cost of stabilizing this vital segment of our economy must be viewed in a realistic perspective. If the cost of buying surplus products does rise to around \$700 million this year, as some predict, it should be viewed against the total wholesale value of milk and dairy products in our economy around \$25 billion this year! The predicted "surplus" would amount to less than three per cent of the total supply, and it's not at all certain to be that big. If the unemployment rate should drop one or two percentage points, for example, or the weather take a bad turn, this small margin of error might disappear as quick as a wink. Have you for-gotten that we had a world wide protein shortage just a few years ago? And meat? And sugar?

Twenty-five years ago there were two million farms selling milk in the United States. Six out of seven have been starved out of existence. Yes, six out of seven-only 300,000 are left. Yes, starved-dairy farmers throughout all that time never averaged as much pay for their extremely demanding and responsible labor as the legal minimum wage. Consumers in this, the world's cheapest-food country, have been eating up the farmers, the goose that lays their golden eggs. Now we can't spare any more, and it's time to stop

You can't make either dairy cows or dairy farmers overnight to match the short-range ups and downs of the business cycle. It would better to pay the modest price of stabilizing and securing our independent family-worked farms than to get stuck for the far bigger cost of shortages as soon as there's a little change in the world's or the nation's economic situation.

MILK PRODUCTION: WHO WILL PAY? (By Richard Nolan and Jim Jeffords)

Your editorial criticism of Agriculture Secretary Bob Bergland's decision to raise government milk price supports ("Buttering Up the Dairy Farmers") brings to mind the old story of the puzzled housewife who wonders, "Why do we need farmers when we have supermarkets?" The lady's statement is as illogical as The Post's editorial.

While admitting that "the principle of price supports is a good and useful one," you draw the line at Secretary Bergland's "audacity" in pushing the program out of the realm of principle and into the realm of practical help for farmers who are desper-

ately in need.

Despite the Post's statement to the contrary, Mr. Bergland is certainly aware that he is now Secretary of Agriculture and not a congressman from Minnesota. He is also aware that the adjustment to 83 per cent of parity will undoubtedly save thousands of drought-stricken small dairy farmers from having to stop producing and prevent another production cutback of the kind that drove consumer prices out of sight in late

You do not have to be a congressman or Secretary of Agriculture to realize that the old "boom-bust" food price policy is as bad for consumers as it is for farmers. You do, however, have to be at least a casual observer

of recent history.

Between 1967 and 1969, price supports averaged between 83 and 87 per cent of parity. Farmers were getting a reasonably stable price for their milk (18-21 cents per half gallon) and consumers (who were pay ing between 52 cents and 59 cents per half gallon for the same product) were finding themselves able to plan and follow a pre-dictable milk budget for a change.

But inflation and drought hit hard in the spring of 1972. When the price support level

fell below 80 per cent of parity, farmers cut production. Dramatically higher European imports then pushed consumer prices to 80 cents per half gallon in 1974, while the market price for American farmers dropped

The point, of course, is that somebody is going to have to absorb the escalating cost of milk production in this country.

Clearly, the cost of milk for consumers will always rise in proportion to the cost of producing it. But consumer prices do not go down during periods of falling farm mar-ket prices. When American farmers cut production, the difference in supply is made up through European imports. The American consumer continues to pay while the American dairy farmer continues to go out of business.

Under Secretary Bergland's order, the Treasury will initially pay and regain a substantial share of the money through future Commodity Credit Corporation sales.

The Post's editorial is correct in pointing out that U.S. dairy farmers have succeeded in substantially increasing the amount of milk produced by an individual cow. But according to Dr. Clifford Burton, nationally recognized dairy expert at the University of Oklahoma, individual milk production per cow may be reaching an optimum level. Many of the highly productive herds producing today's milk were bred 13 years ago. Unless confidence in the pricing system is restored, production will permanently drop as those animals are slaughtered and the farmers who produced them retire or go out of business.

Minnesota, the nation's second largest dairy producing state, has already lost 34,-000 dairy farmers over the past 10 years. The cost of producing a hundredweight of milk in the Midwest now exceeds not only \$9, but \$10! The signs are clear, and if Bob Bergland learned anything as a congressman from Minnesota, he learned how to read

RELIGION IN AMERICAN LIFE

Mr. JAVITS. Mr. President, on March 8, 1977, on the occasion of the Annual Dinner of Religion in American Life, held at the Waldorf-Astoria Hotel. in New York City, when Sol M. Linowitz received the organization's annual award, he made some remarks which I ask unanimous consent to have printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS BY SOL M. LINOWITZ

As I look around this room and see so many who have done so much over the years for so many, I must admit that I have a sense of kinship with William Howard Taft's great-granddaughter who in her third grade autobiography wrote: "My Great-Grand-father was President of the United States, my Grandfather was a United States Senor, my Father is an Ambassador, and I am a Brownie."

I want you to know that in your presence, I am a Brownie.

I am truly grateful to you for the Award this evening, for the spirit in which you have tendered it, and for the auspices under which you have presented it. Let me express my special appreciation to the General Electric Company for the generous contribution which they have made on my behalf in the name of that distinguished American, Charles E. Wilson.

With your permission I would like to take a few minutes just to say a few things which are on my mind and my heart

We are met at a moment in history which

is uncertain, fearful and indeed, dangerous. While it is true as Professor Whitehead once said that "it is the business of the future to be dangerous," nonetheless there is reason for concern as we look about us.

We are at a time that has been called both the Age of Anxiety and the Age of Science and Technology. Both are accurate, for indeed one feeds upon the other. As our scientific and technological competence has increased, so have our fear and anxiety.

In a real sense we are at a time of paradox-a time when we have learned to achieve most and to fear most. It is a time when we seem to know much more about how to make war than how to make peace, more about killing than we do about living. It is a time of unprecedented need and unparalleled plenty, a time when great advances in medicine and science and technology are overshadowed by incredible achievements in instruments of destruction. It is a time when the world fears not the primitive or the ignorant man, but the educated, the technically competent man, who has it in his power to destroy civilization.

It is a time when malaise hangs heavy, when we can send men up to walk the moon yet hauntingly recall Santayana's words that people have come to power who "having no stomach for the ultimate, burrow themselves

downward toward the primitive".

No one needs to remind us that this moment may be the most fateful in all the long history of mankind. And that the outcome will depend on whether the human intellect which has invented such total instruments of destruction, can now develop ways of peace that will keep any man, no matter what his ideology, his race or his nation, from pushing the fatal button.

In the past men have warred over frontiers, they have come into conflict over ideologies. And they have fought over ideologies. And they have fought to better their daily lives. But today each crisis seems to overlap the other and we are engaged in a vast human upheaval that touches upon every phase of our existence-national and international, religious and racial.

Part of that upheaval is as old as hunger. Part is as new as a walk in lunar space. The overriding fact is that today we are all part of a global society in which there no longer is any such thing as a separate or isolated concern, in which peace is truly indivisible.

And the fact is that whether we like it or not, either we will all survive together or none of us will. Either we will all share the world's bounty, or none of us will.

We must, therefore, ask what chance we have to accepting our shrinking world with its fewer and fewer natural frontiers, or of transcending our ideological struggles unless we are prepared finally to get to the roots of the problem—the roots that are dug so deep in injustice and resentment in a worldwide contrast between wealth and misery. And the answers are vital not only to sound foreign policy, but to a compassionate domestic policy. Indeed, both are interrelated in an interdependent world. For there is no escape any longer from what I believe is surely the central fact of our time: That whether it be Africa or Asia or Latin America New York or Detroit or Washingtonhuman beings can no longer be condemned to hunger and disease and to the indignity of a life without hope.

Who are these human beings that make up this world in which we live-the millions upon millions no longer thousands of miles away, but not just down the runway? Here they are in microcosm: During the next 60 seconds, 200 human beings will be born on this earth. About 160 of them will be black. brown, yellow or red. Of these 200 youngsters now being born, about half will be dead before they are a year old. Of those that

survive, another half will be dead before they are 16. The 50 of the 200 who live past their 16th birthday, multiplied by thousands and millions, represent the people of this earth.

They, like their fathers and forefathers before them, will till the soil working for landlords, living in tents or mud huts. Most of them will never learn to read or write. Most of them will be poor and tired and hungry most of their lives. Most of them—like their fathers and their forefathers—will lie under the open skies of Asia, Africa, and Latin America watching, waiting, hoping. These are our brothers and sisters, our fellow human beings on this earth.

What kind of a tomorrow does the world offer these, the people of this earth? Two diametrically opposed philosophies are being presented. One we call Communism—the other Democracy. Each asks acceptance of a basic idea; each offers a larger slice of bread.

Make common cause with us, say the Communists, and accept three basic premises: First, dialetical materialism—all that matters is matter itself. Second godlessness—accept the notion that there is no spiritual being who determines your destiny. Third, accept the idea that the State is supreme and determines the will of the individual. Believe these things and accept them, say the Communists, and we promise you more food in your stomachs, more clothes on your backs, a firmer roof over your heads.

And what about Democracy? Because democracy rejects absolutes, it tends also to resist precise definition. But when you and I think of Democracy, we think of a system dedicated to the preservation of the integrity, dignity and decency of the individual person.

We talk of all men being created equal but what we really mean is that all men are created with an equal right to become unequal—to achieve the glorious inequality of their individual talent, their individual capacity, their individual genius. We don't talk of the common man because what we believe in is not man as common, but with a common right to become uncommon—to think uncommon thoughts, to believe uncommon beliefs, to be an uncommon man.

We like to say that in a Democracy every person has a right to life, a right to a decent life, which comes not from government, not from his fellow citizens, but from God. We say that in a Democracy it is the individual who matters; and because we count by ones and not by masses or by mobs, we believe that in a Democracy each human being, regardless of his race, his creed, his color, has the right—the God-given right—to stand erect with dignity as a child of God.

I submit to you that that is the essence of what we really mean when we talk about the impact of religion on American life—our deep faith in every man's right to stand erect and with dignity as a child of God. That is the basic principle to which we are committed as a nation and as a people; that is the foundation on which our system rests; and that is what distinguishes us in the eyes of the world—in the eyes of those millions who are searching for hope of a better future.

From the beginning there has been an expectation about us as a nation. From the beginning the world has looked to us to live up to certain standards of integrity, decency, dignity and humanity—to involve ourselves deeply in moving humankind toward a more humane world of freedom and justice.

Archibald MacLeish once wrote: "America is promises". America is, indeed, promises. We started with a promise over two hundred years ago. At the time when we were but a loose group of weak and scattered colonies of 3 million people, we lit up the western sky with a promise based on faith and hope—

the promise of a free and compassionate soclety committed to the preservation of fundamental human values.

From the beginning we have always treasured the human and the humane and we have always cared about what happened to other human beings. The promise we held out to the world—saying we did so "out of a decent respect to the opinions of mankind"—is still the promise of America to the millions on this earth.

And today as never before in our history we have the opportunity to redeem that promise. Today we have the science and the technology, the skills and the resources to make it happen, to put an end to the hunger and disease and privation that have for so long been the scourge of mankind.

The question is whether we have the will, whether we are prepared to do what we should and must if we are to be the kind of nation we have said we are.

We have a great responsibility to ourselves, to our heritage and to our children. We are not going to discharge that responsibility by building larger missiles or making more powerful warheads. We will not be issuing new and eloquent statements. We will only do it by remembering who we are and what we are—by tapping the very deepest within us as a people—by dedicating ourselves to the fulfillment of our mission as a beacon of hope for ourselves and for the other people of this world, not only as Americans but also as Christians and Jews, drawing upon the richest within our faiths.

As I indicated earlier, this is a time of uncertainty, of deep concern. But there is a moment in our history which I think suggests the temper in which we must approach whatever challenge is before us. On May 19, 1780 the Connecticut State Legislature was in session. For days there had been prophecies that it was to be day of doom. Then suddenly in mid-morning the sky turned from blue to grey to black. Men fell on their knees in fear and in prayer and there were many shouts for adjournment. Then a State Senator, Abraham Davenport, came forward to the podium, banged the gavel and said, "Gentlemen, either the day of judgment is approaching or it is not. If it is not, then there is no need to adjourn, and if it is, I choose to be found doing my duty. I therefore ask, let candles be brought"

I suggest this is a time for all of us to make that commitment. Let us also determine that no matter what lies ahead we will be found doing our duty to God and our country. Let us together ask that candles be brought.

PHILIP A. HART MEMORIAL CONCERT

Mr. MUSKIE. Mr. President, I had the privilege of attending a concert of the Detroit Symphony last Tuesday in memory of Phil Hart.

The concert was in part for the support of a scholarship program established in his name at Lake Superior State College in Michigan. In part, it was a way for Phil's many friends in Michigan and around the country to gather in a final tribute, to remember his greatness and his friendship.

The program from the concert included the reflections of journalists, friends, and colleagues. To share them with the Senate, I ask unanimous consent that the program from the Philip A. Hart Memorial Concert be printed in the RECORD.

There being no objection, the reflections were ordered to be printed in the RECORD, as follows:

PHILIP A. HART

"He has left us a legacy of honor whose preservation is the only tribute he would want".

"We're here tonight to enjoy the music. Phil Hart would want that.

"We're here because we believe in the importance of a college education and of financial aid for these who need or merit it through scholarships. He would be pleased by that, too.

"We're also here to honor Philip A. Hart, something with which he would be the least concerned, but would graciously acknowledge.

"We join many who have paid tribute to the late Senator from Michigan. Some of the things they remember and some thoughts they have had follow here, telling a story of this extraordinary man."

Cancer has finally stilled the voice of Michigan Senator Philip A. Hart... his death ended a life of public service that began nearly three decades ago and included, in addition to his 18 years in the Senate, a four-year stint as Michigan's lieutenant governor.

But clearly his fondest memories, and certainly his greatest fame, resulted from the time spent in the Senate, where he became one of its best liked and most respected members...

Early in his political career, Hart considered a Senate seat to be the best job possible, remarking at one time: "I honestly believe that to sit in the U.S. Senate in the midst of the 20th century is the greatest thing that could happen to any man."

But, in later years, he seemed to become disillusioned with the Senate and its slow plodding pace...

"You know," he told his fellow senators last summer, "the trouble is we believe all the things we say about each other in here. We think this is where it really happens. But it isn't. It's happening out there and in time, God willing, we finally react to it."—Richard A. Ryan, in The Detroit News.

Philip Hart was a politician. He recognized politics as an honorable, necessary and difficult vocation. He practiced it not as the "art of the possible," which is a wholly inadequate definition, but as a discipline of mind and of will, as a profession which should carry the common good beyond what is considered prudent and possible. He knew that politics is not a game to be scored, to be marked by winning and losing, but rather a continuing challenge...

He did not seek to be "the conscience of the Senate," as some have described him. His method was not to express moral judgment or indignation, but to make the reasoned and the pragmatic argument.

I do not think he would have accepted . that he "cut through every statements . . issue to find the truth and then laid that truth out for all to see." He was too modest and too honest to accept any such credit. Rather his effort was to come close to truth, to work around it and there on the edge to ask his colleagues-sometimes to urge them, but with modest hesitation and some expression of doubt on his part-to take the next step. He asked them to take the risk as an act of civil faith that the commitments of the Declaration of Independence could be realized, but only if they were willing to take chances on the side of liberty and of trust.

Phil Hart was not indecisive, as some of his critics have said he was. Like Adlai Stevenson, against whom the same charge was made, he refused to give a simple and immediate response to demands for decision when decision was not called for. He studied and reflected, and when ready he drew the line and marked the threshold. Then only he

would say to his Senate colleagues, "This is as far as I can or will take you. You may cross over with me, if you will, or stand back; but as for me, I have made the choice of crossing."—Former Sen. Eugene J. McCarthy of Minnesota in The New Repubic.

He was an ideal Senator, combining almost perfectly the twin roles of Senator from Michigan and United States Senator, faithfully representing the interests of the people of his state, and just as faithfully reconciling them with the larger interests of the nation as a whole.

Above all, for a generation in the Senate he was a missionary for civil rights, skillfully and successfully guiding every major civil rights bill through the gauntlet of the filibuster. He helped the nation understand the depth of division caused by segregation and discrimination . . "Every 'American," he said, "should be

"Every American," he said, "should be judged as an individual, by our individual merits—and not, while we are still 50 feet away, by the color God gave us."

Often, he started out by asking why. Why should a child growing up black in the urban ghetto be more likely to drop out of high school than to graduate from college? Why should a child born on an Indian reservation have no doctor for the first six years of life? Why should anyone's horizon be narrowed by the color of his skin or the Spanish lilt to his name?

Phil Hart irritated some by these questions. But he asked them softly, with understanding and compassion. He also asked them with quiet force and with irresistible logic and persistence. And more than any other senator in my time he was listened to, because to hear such questions and to understand them was to answer them . . .

Every cause he touched, he left better than he found it. Now, he belongs to Clay, Calhoun, Webster and other great Senate names. It is difficult to believe that any finer person ever graced the Senate chamber.—Sen. Edward M. Kennedy, in New Times.

During three terms in the Senate, he battled for civil rights, a better break for the consumer in the marketplace and reduction of giant concentrations of economic power by huge corporations

by huge corporations . . . Through his role on the Commerce Committee he played a leading role in behalf of consumer and environment legislation, including no-fault auto insurance and consumer protection measures.

His other major committee assignment, the Judiciary Committee, put him in the middle of battles about civil rights, gun control and criminal law and eventually led to the chairmanship of the antitrust subcommittee, which conducted investigations into drug pricing, auto insurance, oil pricing, distribution of wealth, market manipulation and related issues.

He was a co-sponsor of most major consumer legislation during his years in office and played a key role in the truth-in-packaging and truth-in-lending laws.

Perhaps his crowning legislative achievement, and a reflection of his decision to the principles of free and fair competition in the economy, was passage this year of the Hart-Scott-Rodino Antitrust Improvements Act. Signed into law September 30, 1976, the measure is designed to strengthen federal and state enforcement of the nation's antitrust laws. President Ford did not conduct a signing ceremony, but he sent Sen. Hart the only pen he had used in signing the bill . . .

When Sen. Hart announced on June 5, 1975, that he would not seek a fourth Senate term, he gave age as his reason . . . He said he would be 64 when he completed his third term in 1976 . . .

Undoubtedly age was a factor, but Sen. Hart privately hinted . . . that discouragement with the glacial pace of legislation

dearest to him and with the government's failure to do a better job for the people also were factors.

About a month after his retirement announcement, he told a reporter that it is best to have a man in office who, however mistakenly, sincerely believes that he can change the world overnight once he gets into the Senate.

"You and I know that he's not going to be able to do it, but he makes a better senator if he think's he's going to be able," Sen. Hart said.—Spencer Rich, in the Washington Post.

There are a few people who are almost universally respected. Respect, after all, must be earned. But Philip Hart was such a person.

He seemed to do the right thing, to say the right thing, before most people had even thought about the subject, let alone come to a conclusion.

In 1957, long before the Peace Corps or VISTA, Mr. Hart, then lieutenant governor of Michigan, urged the state's Young Democrats to find solutions to "poverty in Asia and Africa and prejudice in America."

In 1958, six years before the creation of the Equal Employment Opportunity Commission, he wrote Vice President Richard Nixon and requested that more facts be made available on the success or failure of eliminating racial discrimination in government-contracted jobs.

In 1959, his first year in the Senate—and more than a decade before financial disclosure legislation—he broke a state precedent and revealed the financial details of his office operations. That same year, he called for a system of federal election registrars to ensure voting rights for blacks in the South.

On through the years, example after example piled up. He was the man with the conscience. The man who fought for the rights of consumers. The man who started the home state auto companies in the eye. The man who made others realize that politics, despite so much evidence to the contrary, sometimes could be the kind of noble endeavor envisioned by the pragmatic but philosophical politicians who wrote the Declaration of Independence and Constitution of this country.

Knowing all that about Philip Hart, it is doubly difficult to reconcile it with the profound despair he felt in his last months. Not despair for himself—Philip Hart, who worked in the Senate so long as he could despite the cancer growing inside him, would waste no time on that—but despair because more had not been accomplished, because the basic structures of the economy had remained mostly unchanged, because not everyone shared his vision of what a better America would be.

Perhaps no greater tribute could be paid to Mr. Hart than to say he was wrong in that despair.

His being on earth, his being in the Senate, made a difference. Anyone older than 35 in this country can look back to the year Phil Hart was elected to the Senate, and state categorically that things have gotten better. Not perfect—human nature itself precludes that—but better. There may still be racial discrimination, but it is not tolerated by law. There may still be consumer deception, but the doctrine of caveat emptor is no longer acceptable. There may still be those who will defend to the death the status quo, but there are others who, having known or known of Philip Hart, will never be so inclined.—The Detroit Free Press.

On September 30, 1976, Phil Hart's colleagues took time during Senate proceedings to pay tribute to him and wish him well upon his retirement. Among the many words that were spoken are these:

When I think of Phil Hart, words come to mind like gentleness, kindness, compassion,

integrity, intelligence, dedication, modesty—and, above all, courage. . . .

In his tenure here, he has left a lasting mark, both on this body and on the nation . . . I do not know how many colleagues will be able to come to the floor this morning. I do know, however, that many of them, in their own way, paid tribute in a direct and personal way last week. I refer to a gathering initiated by his seatmate, Sen. Ed Muskie. Initially it was to be a small gathering (to show Hart drawings of the new Senate office building to be named in his honor). Then, as word spread through the corridors . . . more and more Senators stopped by. As a result, the meeting grew larger and larger and had to be moved from its original place, the majority leader's office, to a large area . . . The room filled to capacity . . . many Senators were standing and some sat on the floor at this unannounced meeting for Phil Hart.

Will Rogers once observed that "Heroes are made every little while, but only one in a million conducts himself afterward so that it makes us proud that we honored him at the time."

Phil Hart is such a hero. We are proud to know him and to have had the opportunity to honor him. Indeed, it is he who has honored us by his friendship and inspiration.—Sen. Robert P. Griffin of Michigan.

Under ideal circumstances the Senate would be, at all times, a body of unchallenged integrity, deep compassion, thoughtful deliberation, balanced judgment and great intellect.

Sadly, the 95th Congress will be without one Senator who has met every one of these standards throughout his 18 years in the Senate.

. . . Perhaps one of the most important things that needs to be said about Phil Hart is that he always kept a careful perspective of himself, his colleagues and the issues with which we were dealing. Never afflicted by an overgrown ego, Phil Hart commanded great respect for his interest, decency and self-effacing nature. It is ironic that in a world where one encounters some individuals who are a bit too self-important or a bit too impressed with themselves, that Phil Hart—so important to the Senate and so impressive an individual—has never fallen victim to those Washington maladies.—Sen. Birch Bayh of Indiana.

Phil Hart has set a standard to which every Senator should aspire. No other member of this body has expressed a greater moral force throughout his years of service here...

One of the most human and endearing traits of Phil Hart is his natural inclination to assume the best in the behavior of others. Remember his frank and refreshing confession of error, when he said that members of his family had tried unsuccessfully to persuade him that our intelligence agencies were engaged in illegal and improper practices. When the evidence later proved them right, Phil Hart was unstinting in his efforts to expose the wrongdoing and to advocate remedies designed to better protect the liberties of the people in the future.—Sen. Frank Church of Idaho.

He was not afraid to be in the minority nor did he allow the shifting winds of day-to-day politics to cloud his perceptions of what was right . . . He has left us a legacy of honor whose preservation is the only tribute he would want.—Sen. Charles H. Percy of Illinois.

The public record of Phil Hart does little to explain the effect he has had on all of us. For his greatness will always lie in a spirit that was always gentle, compassionate, courageous and decent. He has consistently helped to quiet the rancor, to soothe the bitterness during some very turbulent years of this Senate. He has taught us the value of the gentle word. He has helped remind us of the meaning of public service—that duty, honor and sensitivity must always be foremost—that service to our country is a personal, as well as a public commitment.— Sen. Edmund S. Muskie of Maine.

The Senate will soon be poorer. A gentle spirit and a quiet conscience will be gone from this place. But I do not believe Phil Hart's presence is likely to disappear with him. He made an indelible impression on us. He was unfailingly good humored, thoughtful and wise-not the stuff of sensation and media attention. He attended to the work of the country. He was firm and persistent in the struggle for social justice, peace in Southeast Asia, a system of free enterprise that is free.

The good fights are long ones. He never shrank from one, never abandoned one for some flash in the pan or because it was politically expedient to back off. That gentle man was tough. And he was effective because above all else he was principled, completely honest . . . he never compromised his high standards of conduct or his commitment to the welfare of the people he represented.—Sen. Adlai E. Stevenson III of

Illinois.

To his colleagues that day Phil Hart said: "There are no word combinations to express my appreciation-an appreciation that goes back to a father and mother who encouraged me to prepare, and to a state which welcomed me as a stranger and gave me the opportunity to serve and permitted me to sit with those here today and those who preceded me

"I leave as I arrived, understanding clearly the complexity of the world into which we were born and optimistic that if we give it our best shot, we will come close to achieving the goals set for us 200 years ago."

[Henry and Edsel Ford Auditorium] Tuesday evening, March 29, 1977, at 8 o'clock.

DETROIT SYMPHONY ORCHESTRA

Paul Freeman, conducting. Hon. G. Mennen Williams, narrator. Ann Hart, mezzo-soprano. Barber: Adagio for Strings

Dvorak: Symphony No. 8, G major, Opus 88, Allegro con bio, Adagio, Allegretto grazioso Allegro ma non troppo.

Intermission.

Remarks and introduction of guests. Ging heut' Morgen über's Feld, from "Lieder eines fahrenden Gesellen"

Handel: Lascia ch'io pianga, "Rinaldo"

Handel: Sorge infausta una procella, from "Orlando", Ann Hart.

Copland: A Lincoln Portrait, Hon. G. Mennen Williams.

THE EFFECTS OF GENOCIDE

Mr. PROXMIRE. Mr. President, if one tries to imagine the horrors of a genocidal purge, it becomes clear that we must act to place our country squarely on the side of those nations which have condemned this crime. We must ratify the Genocide Convention.

To conceive of the suffering that an Armenian faced in Turkey in 1922, or a Jew endured in Hitler's Germany, is to understand why the world body of nations acted to outlaw this act through the Genocide Convention.

Genocide creates more than the possibility of actually losing one's life. It instills fear in every member of the racial. cultural, or ethnic group being destroyed. Each person so designated to be mur-dered must live in eternal fear. He is driven to hiding, to fleeing his home, to denying his identity. Even if he saves his life, he must be forever wary of his situation. His life will never be the same.

Genocide is a horrible crime. It is our duty to condemn the commission of such a crime and that is exactly what the Genocide Convention is designed to do. By ratifying the Genocide Treaty, we are declaring that genocide is a crime against all mankind.

Let us place our Nation on the side of human freedom and dignity. Let us ratify the Genocide Convention and show the world that we still live up to the lofty standards of our Nation's birthright.

ENDANGERED SPECIES LEGISLATION

Mr. BAKER. Mr. President, I noted with much interest the editorial in this morning's Washington Post entitled the "Lousewort and the Law." There seemed to be two important points that the article was making about the Endangered Species Act.

First, the article noted that in many public works projects and other developments there are available alternative methods of proceeding which can, if used, avoid conflicts between the act and the particular project. This has been done in the past on a number of projects through negotiations that take into account both the requirements of the particular species and the needs of the particular project. Where such alternatives do exist it certainly is, as the editorial suggests, best to seek coexistence between the project and the endangered

Secondly, the article noted there are instances such as the Tellico project in my State of Tennessee which seemingly offer no alternatives. It is in situations such as Tellico that the Endangered Species Act seems so inflexible as to be unworkable because of its inability to balance other national interests with the protection of endangered species.

It might be of some benefit at this point to explore in some detail the philosophy contained in the present legislation which seems to be the root of the conflict on projects such as Tellico. The provisions of the present act seem to suggest that in cases of unavoidable conflict Congress would in every instance favor the preservation of an endangered species regardless of the social benefits to be derived from such project.

This approach to protecting endangered species seems unwise if not impossible. It must be realized that the process of evolution-speciation-is an ongoing, vigorous process. There are species of all types both evolving and being eliminated all the time. This has been the chain of events throughout the eons and it will undoubtedly continue in

the future. No type of legislation can or should attempt to totally stop this scheme. On the other hand, we as legislators should realize that man has because of his complex and sophisticated technology an unprecedented capability to radically alter ecosystems and therefore the species within those ecosystems. These man-induced changes occur at a much faster rate than do natural ecosystem changes. It is this man-induced increase in the rate of ecosystem change that needs to be monitored and controlled by our legislative efforts. The aforegoing being understood, the Post article suggests that our endangered species legislation should have the ability to limit or eliminate man's impact on certain ecosystems and the unique species they contain, but the legislation must also face the fact that in certain instances other priorities might prevail over species preservation.

The article notes and I agree that endangered species legislation must allow for consideration of other important national goals and priorities in cases such as Tellico. It is for this reason that I have asked the Environment and Public Works Committee to hold hearings on the subject. Hopefully the hearing process will allow us to develop a technique for carrying out the balancing process which many of us seem to agree is needed.

A NEW PROPOSAL FOR ECONOMIC DEVELOPMENT IN EGYPT

Mr. HUMPHREY. Mr. President, I believe the time has come to recognize that we need to change our thinking on how best to assist Egypt. The problem is not money, for the United States today is an important contributor to Egypt's economy. We have provided funds to assist in developing the infrastructure of that country, including expansion of some basic industry, improvement of the electrical power capabilities to set the stage for further economic development, and provision of training for hundreds of Egyptian specialists in modern business management, science, social science, and medicine. In addition, we have assisted Egypt in feeding her people in time of need, while concentrating on improvement of her own agricultural capabilities.

All of this is helpful, but it hardly begins to address the real needs in Egypt. What we need to consider is a new economic plan worked out in cooperation with Egypt-one which capitalizes on what we know how to do best. Egypt needs a rapid injection to get it on track. It has been outside the Western economic system for a long time and it has been adversely affected by Soviet trade and

assistance programs.

I do not think we can get the job done by leaving it to just our official developing efforts. Those in charge of administering our AID programs follow the law to the letter—and it may well be that the law, as it now stands, needs to be changed to accommodate the special problems in Egypt. After all, Egypt is the first big country to which we have given economic assistance after it underwent 10 years of Soviet domination of its economic system. The only result of the Soviet program was to send Egyptian resources and noncompetitive manufactured goods to the U.S.S.R. in return for Soviet arms.

We can do better, and we can help Egypt utilize resources which we and the oil producing countries can provide. In the past few years, oil states like Saudi Arabia and Kuwait have shown a willingness to assist Egypt, but they have lacked the managerial capability in their programs because they are, first of all, using their best people to bring industrial and social development to their own countries. They have tried to work with Americans on a private basis, but the problem has been that the biggest injection of resources has come from the U.S. Government. Yet, U.S. Government programs alone cannot resolve all of Egypt's economic problems.

we could come up with a plan, I think it may be possible to work swiftly to bring needed change and progress to Egypt. It would be desirable if we could undertake a crash effort to develop a plan in conjunction with the Egyptians themselves. It would be desirable if President Sadat could return home from his visit to the United States knowing that Congress was ready and willing to try and get a plan ready.

I have some tentative ideas on the ele-

ments of such a plan.

First, I think we have to ask our best industrial and business experts to tell us what kinds of assistance will produce the best results for Egypt and bring immediate hope to the people of Egypt. One possibility is small manufacturing industries producing needed consumer goods for the people of Egypt. To help these factories get started, we may have to nurse them along and-on an emergency basis-in cooperation with the Government of Egypt, they might require special rights and privileges for a period

Second, we have to do what we can to assist in developing the private sector in Egypt. This has floundered in part because most of the U.S. projects in Egypt have been aimed at the public sector. There is no doubt the public sector needs help, but public sector-type factories and basic industries do not earn the profits and the benefits in the same way that

private industry can.

Third, we have to consider whether other donors, especially the oil producing countries, will be willing to join us in certain joint efforts. Here I have in mind development projects which are designed to bring immediate results. To the extent possible, these projects should be designed to require the minimum in construction-which takes a long time-and maximizes output. With our knowledge of packaging and prefabrication, we ought to be able to design and move some industry to Egypt rapidly.

Fourth, we cannot neglect social programs; for example, programs like school lunches and breakfasts for children, which can employ Egyptians and bring real help to the people. Our knowledge of nutrition and food fortification can bring positive benefits to the children of Egypt. We could design school health programs. particularly in the rural areas where there are serious health problems caused by nonpotable water and lack of drainage systems. Much of this can be prevented by education and training.

We can also help the hundreds of thousands of Egyptian college students. An inexpensive and important project would be to provide Egypt textbooks in the areas of engineering, science, and medicine. Our Ambassador to Egypt has attempted to do this, and I congratulate him for his effort. But he ran into a bureaucratic blockage and an almost complete misunderstanding of how important an effort of this kind is. It is no surprise that the recent rioting in Egypt was fueled, in part, by students. I think we can do better and we need to get behind our Ambassador's efforts to assist in change of this nature.

These four points need expansion and technical elaboration. We have the experts-but I think we have to get them all working together, with a concrete new economic plan as their immediate goal.

Today I suggest that we set aside \$1 million from the final amount of assistance the Congress decides to authorize for Egypt. This fund would be used for a crash study by outside expertsfrom private business and industry, from the banking community, from development efforts-to develop a broadly based development program for Egypt. I emphasize that this plan must be worked out in concert with the Egyptian Government and with the private sector of that country. If we can put the right people together-and I think this can be done-we ought to be ready to get this program underway in the near future.

One of the best hopes for peace in the Middle East is rapid economic and social development. We have a lot to offer-and more than just money. We have experience and capability, if we use it correctly. Egypt is a special case because it is not only an underdeveloped country, but it also is one which has suffered economically from Soviet mismanagement. It is a country in which the United States has a significant stake in insuring that its people realize their full economic potential. By bringing our creative talents to bear on the problems of Egypt, and by working directly with all sectors of the Egyptian society, we can assist in helping to bring changes for the better in that important country.

STATE'S RIGHTS OVER ERDA'S SE-LECTION OF NUCLEAR WASTE DUMPING SITES

Mr. RIEGLE. Mr. President, on January 31, 1977, Representatives Bob CARR and PHILIP RUPPE introduced H.R. 2675. a bill which would give States veto power over Federal selection of nuclear waste disposal sites. I introduced this same bill in the Senate on March 15,

Granting the States the right, through the passage of a concurrent legislative resolution, to prohibit the construction of nuclear waste disposal facilities, will enable citizens to become more involved in the decisionmaking process.

I recognize that there are some who will argue that the question of "nuclear waste disposal" should be left to the technical experts and not the subject of public debate. Unfortunately, however, the track record of the nuclear regulators charged with protecting the public health and safety has been abysmally poor. Consequently, today, over 30 years after the passage of the Atomic Energy Act and with an accumulation of more than 80 million gallons of high level radioactive waste, the plans for ultimate disposal of these waste materials are so in flux that neither the AEC nor its successor agency ERDA have yet published an environmental impact statement on its research and develop-ment plan for long-term radioactive waste disposal. Our Government has yet to identify a single site or method for the permanent, safe disposal of highlevel radioactive waste materials.

Michigan Governor Milliken's

force report on nuclear waste disposal makes reference to the leakage of over 500,000 gallons of radioactive waste materials from storage tanks at Hanford, Wash. But there have been several other instances of radioactive leakages-and the Federal agencies with regulatory responsibility in this area often seem more concerned with the adverse impact of publicity regarding disclosure of leaks than with public health and safety. I might add that even the congressional oversight arm—the Joint Committee on Atomic Energy-historically was more interested in the growth of the nuclear industry rather than the dangers of radioactive contamination. Thus the public cannot assume that its interests are presently being adequately safeguarded by the nuclear experts.

The related issues of nuclear energy and radioactive waste disposal raise profound social and moral questions, the resolution of which will have significance for future as well as for present genera-

These are policy questions—and they need to be debated and decided in the widest possible public forum. The experts can be helpful in assessing the alternative costs, benefits and risks of different energy and waste storage, strategies, but it is only the people, either directly or through their elected representatives, that can make the decision as to whether or not the risks to human life of any given course of action are worth taking. In this connection, it needs to be emphasized that we are talking about materials that have not only uniquely devastating toxic properties but also, in the case of some nuclear wastes, need to be concealed from the environment for literally hundreds of thousands of years.

ERDA is currently studying geological formations in 45 States. In 13 of those States the prospects look good enough for nuclear waste storage that they will begin experimental drilling to determine the composition of the salt formations. The 13 States are Colorado, Indiana, Louisiana, Michigan, Mississippi, Nevada, New York, Ohio, South Dakota, Tennessee, Texas, Utah, and Washington. Extensive geological studies have already been carried out in New Mexico and Kansas. These States are the most likely candidates for ERDA's selection of nuclear waste dumping sites. Passage of this bill would mean that no Government action could be taken unless the ERDA projects were acceptable to the citizens themselves.

The selection of a site for nuclear waste dumping is far too serious an issue to be left solely to a regulatory body. The people have a right to know. They have a right to be involved in the decisionmaking process. And we in Government have an obligation to widen, not to restrict, the opportunities for citizen participation. If we appear to resist direct citizen involvement in the making of energy-related decisions, we will only be aggravating public fear and frustration, thereby making more difficult the development of a needed national consensus in support of the very hard decisions that must soon be made on a national energy policy.

ELIMINATION OF PURCHASE RE-QUIREMENT IN FOOD STAMP PRO-GRAM

Mr. McGOVERN. Mr. President, the most important issue to be decided in relation to the food stamp program this year is whether to eliminate the purchase requirement. For this reason, I call the attention of my colleagues to an editorial that appeared on Sunday in the New York Times.

As the editorial points out, elimination of the purchase requirement, or EPR, is one of the most significant reforms we can make in the food stamp program. EPR would enable hundreds of thousands of needy people, who now qualify for food stamps but who simply cannot afford them, to get their stamps. It would also reduce the administrative complexities in the program, and eliminate the cumbersome issuance procedure, with its potential for abuse by vendors.

I ask unanimous consent that this editorial be printed in the RECORD.

There being no objection the editorial was ordered to be printed in the Record, as follows:

HELP FOR-AND FROM-THE POOR

Food stamps are coupons which poor people buy at discount prices and spend for food. For all the sneers about "funny money" and for all the complaints about welfare chiseling, they work. Welfare reform theories have come and gone in Washington's abstract breezes; food stamps have fed the hungry. Some 27 million Americans will rely on them sometime this year. But there is a problem. Many needy and eligible people—perhaps two million—are denied food stamps because of a quirk. The new Democratic Administration now has an opportunity to rectify that wrong.

The quirk is that, not surprisingly, many

The quirk is that, not surprisingly, many poor people lack capital. Say a poor family of four earns \$350 a month. For \$95 in cash, it can buy stamps worth \$166 at a supermarket—a bonus of \$71 worth of food. But the family has to have the \$95 at the right time each month (or half that amount, twice a month). Those who don't, though eligible in every other way, are out of luck.

There is a straightforward remedy, embodied in bills proposed by Senators George McGovern, Robert Dole and others, called EPR: eliminate the purchase requirement.

That is, simply give the family its \$71 in free food stamps. That would greatly reduce the number of stamps, reduce administrative costs, reduce the chances of fraud, and reduce the hassle for recipients. Most important, it would extend the program to poor people who need it and are entitled to participate.

There are two main objections to the proposal. One is that it might undermine the nutritional value of the program. Now, a family—to use the same example—must spend its own \$95 on food, while under EPR it could spend that \$95 for anything-food, sudden big fuel bills, or lottery tickets. This objection is vulnerable to simple arithmetic. Even if this family spends every bit of its own money and stamps on food, that would still come out to only 46 cents a meal per person. Perhaps such a family could spend less, but not for long and not without somebody going hungry. If there are some people with such urgent competing needs that they are willing to go hungry, that painful choice ought to be their own. To deprive two million other needy people of benefits on these grounds seems short-sighted and inhumane.

The other objection to the EPR reform is cost. No family now on food stamps would get any additional benefit, but introducing benefits to those now excluded would cost perhaps \$500 million. It appears that the Carter Administration is willing to accept the reform—but only if all or most of the cost can be saved by reducing the amount of the benefits. Granted, the Administration is trying hard to hold down an already large budget deficit. But to accept that reasoning is to accept a perversion of a humane principle: give bread to some poor people by taking it from the mouths of other poor people.

The Administration has found hundreds of millions to help dairy farmers. Can their—or anyone's—case for Federal help be as compelling as that of the hungry?

EUROCOMMUNISTS EXPOSED

Mr. GARN. Mr. President, the Constitution clearly envisions the participation of the Senate in the formulation of foreign policy. I recognize full well that foreign policy cannot be made by 100 Senators acting individually, but from time to time I feel obliged to comment on current trends in foreign policy, and to suggest possible alternatives. Over the weekend, one such trend came to my attention, and I present some comments on our relations with Europe's Communist parties.

The Sunday Washington Post reports the dismay of French President Valery Giscard d'Estaing over meetings between American diplomats and a member of the French Communist Party Politburo. As the article pointed out, there is nothing strange about such a meeting. What is strange is the publicity given to the meeting by the American diplomats in France. It has been the practice to keep talks between Americans and Communists as quiet as possible, and the change is seen as a shift of some significance in American policy.

Coupled with Secretary of State Vance's recent attentions to Socialist Party leaders, the talks with the Communists are perceived as lending a legitimacy to leftist politicians which is quite displeasing to President Giscard d'Estaing. It seems to suggest that the United States would not be terribly displeased if the leftists were to unseat the

present center Government of France.

Certainly I have never been called one of Henry Kissinger's staunchest supporters in the area of foreign policy, but Secretary Kissinger did recognize the dangers inherent in Eurocommunism, both to the European countries themselves, and to our relations with them. To his credit, Secretary Kissinger made very plain the problems of leftist governments involved in Western alliances.

By an interesting coincidence, this apertura a sinistra comes at the time when the subservience of the Eurocommunist parties to Moscow has just been displayed again. As Michael Ledeen noted in the March 26 issue of the New Republic, representatives of the French, Italian, and Spanish Communist parties got together recently to accomplish two things. They wanted to legitimize the Spanish Communist Party, and to demonstrate to the world the independence of the Western Communist Parties. But, before the meeting, emissaries were sent to Moscow to reassure the Kremlin that nothing serious would be said, and that if, by accident, it was, Moscow need not take it too personally. To quote Ledeen:

The gesture shows once again how farfetched it is to suppose there is a genuine rupture between the new communist protestants and the Kremlin theologists.

The best the Eurocommunists could muster was a statement that the Helsinki treaty should be fully implemented, while hastening to deny that they were in any way criticizing the treatment of dissidents in the Soviet Union.

I ask unanimous consent that the Post and New Republic articles be printed in the Record, and I urge the Senate and the administration to consider them well.

There being no objection, the articles were ordered to be printed in the Record, as follows:

[From the Washington Post, Apr. 3, 1977] GISCARD REPORTED UNHAPPY OVER U.S. TALKS WITH LEFT

(By Jim Hoagland)

Paris, April 2.—President Valery Giscard d'Estaing voiced concern to U.S. Secretary of State Cyrus R. Vance today about an evident softening of American opposition to the Socialist-Communist alliance that is seeking to take control of France politically, informed sources reported.

Giscard, whose centrist and conservative supporters were drubbed by the Socialists and Communists in municipal elections last month, indirectly but unmistakably suggested that recent American contacts with the two leftist groups are undercutting his position, according to the sources.

Stopping over here immediately before returning to Washington, Vance briefed the French leader on the collapse of nuclear weapons limitation talks in Moscow earlier this week. While concerned about the impact of new difficulties on detente, French officials reportedly view the failure in Moscow as a "temporary" setback.

The discussion of official American attitudes toward the increasingly strong French left was seen here as another sign of Giscard's sensitivity to the growing acceptance the Communists are gaining through their alliance with the larger, less doctrinaire Socialist Party.

The Carter administration has not carried over the aggressively worded warnings frequently sounded by Henry Kissinger during the Nixon and Ford administrations. Kissinger stressed that the United States could not have close cooperation with a Western

European government that included Communists.

In meetings with two senior officials of the Socialist Party in February in Washington, Vance put a significantly different emphasis on what Washington's reaction would be to a victory by the Socialist-Communist alliance in the legislative elections scheduled 11 months from now, according to the Socialists and other informed sources.

Vance repeated the Kissinger formulation that European voters are free to choose their own governments, but Washington would reassess its view toward governments with Communist participation, according to American and French Socialist versions of the conversations.

While in office Kissinger strongly accented the probability of a hostile American reaction. Last year he instructed American diplomats here to go out and see Socialist leaders to hammer that point home.

Vance, however, put his emphasis on the assurances that the United States would not interfere in internal French affairs, if the Socialists and Communists beat Giscard's right-center coalition in the legislative elections

Reports of the conversations between Vance and Socialist leaders Michel Rocard and Jean-Pierre Cot leaked into the French press last month at about the time it became known here that two American diplomats had visited Communist Party Politburo member Jean Kanapa for a discussion in his office.

Kanapa, one of the most important figures in the party, is considered by many French analysts to be one of the more "Stalinist" officials in a party that now consistently claims it is following a more liberal, politically tolerant "Euro-Communist" program.

ically tolerant "Euro-Communist" program.

The talk with Kanapa broke little new ground, according to informed sources, but it has created a stir in the French press, which has interpreted the meeting as an important shift in American policy.

portant shift in American policy.

Embassy sources and a State Department spokesman in Washington sought to minimize the significance of the meeting, which they said was part of a continuing process of talks between lower-level U.S. diplomats and local Communists.

Under guidelines established at the embassy, only the ambassador and his top political aides refuse to have any formalized contacts with the Communists.

But information about past lower level meetings here and in Rome with Italian Communist officials was kept secret during Kissinger's reign, and mention of the meeting with Kanapa has had the impact of suggesting a policy change that Giscard reportedly indicated today could amount to interference in French internal affairs.

Vance reportedly assured the French president that the press had taken the American contacts with the left out of context, and had been inaccurate on some points.

The Moscow negotiations and the French political question took up relatively little time in the meeting, which concentrated on Africa. France is deeply concerned about the fate of President Mobutu Sese Seko's regime in Zaire and the future of Djibouti, which is to become independent in May.

The French president also sought once

The French president also sought once again to press home the probability of a strong hostile reaction by French public opinion if the Concorde supersonic jetliner is not granted landing rights in New York. Walking with Vance from the Elysee Palace meeting room, Giscard asked him, "Are you going back on Concorde?"

CARTER'S HUMAN RIGHTS CAMPAIGN HAS CALLED THEIR BLUFF: EUROCOMMUNISTS EXPOSED

(By Michael Ledeen)

Jimmy Carter's human rights campaign has been an unwelcome surprise to the Communist party leaders of Western Europe. Accustomed by now to sympathetic treatment from most of the American media and publicly delighted with the election of the new President, the Italian, French and Spanish Communist parties have been in a state of acute embarrassment for several weeks. The growing international consensus on behalf of the dissidents of Eastern Europe and some particularly heavy-handed actions by the Kremlin have exposed the hollowness of eurocommunist avowals of faith in democracy, pluralism and the integrity of Western society.

Party chiefs Santiago Carrillo of Spain, Enrico Berlinguer of Italy and Georges Marchais of France met in Madrid this month for what had been billed as an historic encounter. This eurocommunist summit was supposed to celebrate the formal baptism for the newly reformed communist church. Instead, it revealed that the three paladins of the faith agree on very little indeed, and that they are still quite unprepared to take public positions on the two questions which most concern outsiders: the relationships between the eurocommunists and Europe, and between eurocommunists and the Soviet Union. It proved impossible for the three spokesmen to draft statements dealing with human rights and the plight of the East European dissidents.

The eurocommunist summit was intended to confer legitimacy upon Santiago Carrillo's Spanish Communist party as it makes its formal entry into Spanish politics. It also was intended to present to the world the image of an ideologically coherent and respectable Western European communist movement. The first goal was abundantly fulfilled. Carrillo had the great satisfaction of watching security officers from the three countries protect the summit from unwanted intruders. Both Berlinguer and Marchais hailed the Spanish leader, called for the legalization of the PCE and, by their very presence and the smoothness with which the conference was carried off, added considerable luster to Carrillo's reputation.

The second goal was not achieved, despite Carillo's attempts to organize his conference into a real alternative to the kind of Soviet-dominated charades that had taken place in the past. Carrillo is eager to show the Spanish people that his party is completely cut off from the Russian mother church. He had drafted a statement for the summit that was critical of the Iron Curtain countries, and supported the demands of the dissidents there. He had asked Marchais and Berlinguer to support a statement expressing solidarity with the European Common Market.

No agreement on either of these points emerged from the Madrid summit. The French Communist Party is more chauvinistic than the Gaullists. And in the weeks preceding the reunion, Berlinguer had sent his right-hand man, Gianni Cervetti, to Moscow for consultations, presumably to reassure Brezhnev that nothing in the way of an independent eurocommunist gauntlet would be hurled down on Spanish soil. The gesture shows once again how far-fetched it is to suppose there is a genuine rupture between the new communist protestants and the Kremlin theologians. As a matter of fact, shortly before the opening of the Madrid summit, the three leaders were thrown into a near panic when news reached the Hotel Melia that Brezhnev had gone to Sofia with all the leaders of the Eastern European bloc. Berlinguer, Marchais and Carrillo were visibly shaken by the possibility of a counter-summit, and an aide was quick to tell newsmen, "We have no intention of a confrontation with any of our brother countries."

Brezhnev need not have worried. The only statement from Madrid which might inevitably have been read as expressing the slightest criticism of the Soviet Union was that which called for the full application of the Helsinki Treaty. When asked whether this represented a criticism of treatment of dissidents in the East, the eurocommunists denied it. The next day, however, perhaps embarrassed by their previous reticence, some of the gurus of the summit hinted that one might read some criticism of the Russians into the text.

On the last day of the Madrid summit, an international incident exploded in Venice. The Venice Biennale arts festival had scheduled a discussion of "cultural dissidents in Eastern Europe." The Russian ambassador asked the Italian Foreign Ministry, the Ministry of Cultural Riches and the Ministry of Spectacles (which control the budget for the Biennale) to cancel the program. The Italian officials uncourageously passed the request to the Biennale's president, the socialist Carlo Ripo di Meana, who promptly resigned. As this incident burst onto the front pages of the national press, it became evident that Italian journalists had been following this question for some time in total silence. They observed that the Biennale had been under attack for months, not only in the pages of Izvestia (which had called the proposed program a "provoca-tion") but also within the board of the Biennale itself. The communist members had, in the words of Ripa di Meana, "proposed procrastinating alternatives, to prevent the Biennale discussion on dissent from taking place." Carlo Guilio Argan, the communist art historian who is also the mayor of Rome, said that he could see no point in having a "Solzhenitsyn parade" at the Biennale. The communist and left-wing press were filled with comments of this sort. They had been wildly enthusiastic two years be-fore when the Biennale was devoted to fascist Chile."

Italian Premier Androetti and Foreign Minister Foriani simply ducked the question and left it to the president of the Biennale. However, no one ever suspected that the Italian government was a bastion of courage and independence. Androetti knows that any offense to the party of Berlinguer is likely to bring down his feeble regime, and throw Italy into even greater chaos. But one might have expected some small show of Independence on the part of Berlinguer himself, whose righteous indignation at speeches by Henry Kissinger last year—ostensibly because they constituted foreign interference in internal Italian affairs—knew no bounds.

The Italian Communists have been severeshaken by the phenomenon of Eastern European dissidence, and they are caught between a rock and a hard place. They dare not attack Amalrik, Bukovsky and company for fear of presenting a Stalinist image to the West. Yet they are equally incapable of embracing the cause of human rights within the Soviet bloc, because their own rank and will not tolerate such an "anti-Soviet" position. In short, it appears that President Carter's human rights campaign has exposed the apostles of eurocommunism for what they really are: a group which speaks of democracy and pluralism only in the future tense, insofar as it concerns a hypothetical advance to power on their own part. From Madrid to Rome, eurocommunism has had its liberal mask pushed sharply to one side, and its old undemocratic, unwaveringly pro-Soviet face has reemerged.

MINNESOTA GOOD ROADS, INC. VISITS WASHINGTON

Mr. HUMPHREY. Mr. President, last week, it was my privilege to welcome a delegation of legislators, labor leaders, business people, and local government officials who came to Washington to discuss personally with their representatives legislation which affects highway and road transportation.

The occasion was the annual fly-in sponsored by Minnesota Good Roads, Inc.

This organization performs an important function in providing local leaders and their concerns direct access to national policymaking. Issues of primary concern to the 1977 delegation were elimination of redtape. Highway trust fund policy, bridge funding, and rebuilding the secondary road system.

These issues were addressed in a prepared statement by Charles J. Swanson, president of the Minnesota County Engi-

neers Association.

I wish to call particular attention to Mr. Swanson's comments on the aggressive program undertaken by the Minnesota Legislature to finance needed bridge construction. Recent figures indicate that 95 percent of Minnesota's bridges were built before 1935, and 4,403 bridges are considered deficient. In seeking greater Federal funding for bridge replacement, I have repeatedly stressed that deficient bridges are not only a safety hazard, they also are a serious impediment to moving farm produce rapidly and economically to market.

I commend this statement to the careful attention of my colleagues. I believe it supports and reinforces the interest that many of us share in increasing the Federal aid to secondary road systems, and in creating a transportation system responsive both to heavily populated and to urban areas.

Mr. President, this meeting impressed me again with the fact that States have a great fund of experience and knowledge in roadbuilding and it must be national policy to minimize the redtape that frustrates and immobilizes this capacity.

I offer my sincere congratulations to Minnesota for moving forward on bridge replacement, and for the vigorous efforts now underway to develop a comprehensive transportation plan. The opinions and recommendations of State road builders and users, many of whom are members of Minnesota Good Roads, are an invaluable source of information to their congressional delegation.

Mr. President, I ask unanimous consent that Mr. Swanson's remarks be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS BY CHARLES J. SWANSON

Ladies and gentlemen, it gives me great pleasure in appearing before you to give you a résumé of some of the thoughts that the people in Minnesota concerned with transportation systems have. Yes, we realize there is more than one mode of transportation and I will address myself to that a little later.

Those of us on the "fly in" would like to take this opportunity to thank "Mr. Good Roads" from Minnesota Bob Johnson and all the staff in Washington for the arrangements they have made which make these annual "fly ins" a success and also the Senators and Representatives who have availed themselves to this group both collectively and individually.

I'm sure on every "fly in" Minnesota has participated in, you have had the subject of "red tape" drummed into you, not only by people like myself but virtually every participant on the "fly in," and I'm happy to say

that it appears that the message is beginning to come across. We will continue to stress "red tape" procedures but feel that the 'regulations reduction task force," presently being chaired by Mr. W. H. White of the Federal Highway Administration is the shfning light on the horizon we have been looking for. We feel fortunate that, among the few States chosen nationwide. the Department of Transportaion and the Minnesota County Highway Engineers Association were given an opportunity to be interviewed and answer their questionnaire and also submit documentation on our problems with regulations and "red tape." We feel that they are sincere in their efforts and would hope that any recommendations for improvement on the present procedures that may be forthcoming would be taken seriously by our congressional delegation and staff.

A classic example of the type of "red tape" this committee should concern itself with is the St. Paul F.A.U. Bikeway Project which has been summarized by our State aid division of the Minnesota Department of Trans-

ortation:

What started out at first as what appeared to be a simple bikeway project has now turned into a major Federal action requiring a negative declaration and 4(f) document as a result of a segment of the bikeway being

proposed to go through a park.

Getting to the point of an acceptable draft negative declaration and draft 4(f) document for circulation gets to be quite time consuming and beyond that point, we have a minimum 45 day comment period, then preparation of a final negative declaration and 4(f) document and the approval by the Secretary of Transportation. Because of this extra process if everything would go reasonably well, and often it doesn't, we have to be looking at a minimum of 6 months additional time in processing the project, not to mention countless man hours in writing, reviewing, submitting, resubmitting, circulating, finalizing, etc., etc., in jumping through the hoops with a draft and final negative declaration and draft a final 4(f) document. All for what? So the Secretary of Transportation can concur that there is no feasible and prudent alternative to the use of park land for a bike trail.

Ridiculous? Maybe, but wait a minute, perhaps a feasible and prudent alternative is to not build a bike trail at all, or if it is built, to stay out of the park with it. On the other hand, a bike trail is at least partly for recreation isn't it? I would say that in Minnesota, in excess of 95 percent of all biking is recreational. A park is for recreation isn't it? Isn't there some logic here that implies that parks and bikeways kind of go together or at least are highly compatible? So we are back to the thought that there is nothing inconsistent and a lot of things in favor of bikeways in parks, but why does it have to be such a long drawn out process when Federal funds are used?

Well, it doesn't have to be, depending on the Federal program. For example, the 1976 Federal Highway Act included a bikeway demonstration program. This program provides \$6 million for bikeway projects in the U.S. These projects were selected on the basis of demonstration value and potential for nationwide application to new ideas for bikeways

Because it was anticipated that many of these projects by their very nature would be involved in 4(f) land, the F.H.W.A. wrote and published in the Federal Register a 2-page negative declaration and a 4(f) document intended to cover possibly 30 to 90 yet to be developed but potentially unique bikeway projects. Naturally, if significant and adverse effects are anticipated a negative declaration—4(f) would be needed for a specific project, but the intent here is obviously

to short cut the process as much as possible and for as many demonstration projects as possible where 4(f) land use for bikeways is involved.

The question can be asked, if a blanket negative declaration—4(f) is good for a demonstration bikeway project why isn't it good for a F.A.U. bikeway project or a rural secondary bikeway project or a primary bikeway project where 4(f) lands are involved?

Getting back to the St. Paul bikeway project, it requires a 23 page document and 6-8 months of processing time on what appears to be a routine "run of the mill" bikeway project while on the other hand the same results can be accomplished by a 2 page blanket negative declaration on possible 30-

90 future projects.

What is wrong with spending F.A.U. money on a bikeway a little faster? Why can't a similar approach on negative declaration—4 (f) for other types of Federal funding on bikeway projects or similar minor uses of 4(f) land which will enhance the recreational value be accomplished? Keeping in mind that if local, State, and division F.H.W.A. personnel found anticipated significant adverse effect from a proposed project, then a specific negative declaration and 4(f) could be done for a specific project.

This leads us to believe that considerably more authority could be given to the division office of the Federal Highway Adminsitration.

Our second area of concern is the "404 permits" required. Today a road authority, when crossing a stream of 5 cubic feet per minute, defined as one that you can jump across, needs permits from the Corps of Engineers, Coast Guard and the Department of Natural Resources. What would be wrong with having one agency, say the D.N.R., review and issue permits under an agreement with the other affected agencies? Road authorities have been waiting from 4 to 6 months with no permits being issued by the Federal agencies, and ladies and gentlemen, this is the rule rather than the exception. Why must be have this proliferation of bureaucracy?

If there is any sincerity about the proclaimed goals of reducing Federal "red tape" and paper work, these types of situations would be a great place to initiate some changes. Let's all get behind the task force on the reduction of regulations and initiate

the necessary changes.

A grave concern of my colleagues here today, are the number of deficient bridges in the State of Minnesota, presently num-bering 4.403 with a replacement cost of in excess of 600 million dollars. The Minnesota Legislature has taken the bull by the horns, so to speak, by authorizing bonding for 50 million to be used strictly for bridge replacement. Legislation is presently being considered to extend this bonding authority with these monies being shared by the MN/DOT, counties, cities and townships, both on and off the Federal system. Incidentally, Minnesota is one of only six States presently utilizing local monies for the replacement of bridges on the Federal aid system. When legislation is considered and appropriations are made on the Federal level for this worthwhile cause of replacing our deficient bridges, let's not penalize the States that have taken the initiative, as is so often done on other federally funded programs. Provisions should be made for a credit or pay back to States that have invested considerable local monies on the Federal system.

Another activity which has received very little recognition in most States is that of the historical society and their search for artifacts on proposed construction projects. In Minnesota the historical society has operated on a budget of \$25,000 annually for their work with the MN/DOT and a handful of counties, spending token amounts to sup-

plement their work. Federal law requires that we must have their review of any anticipated projects and I feel we should give them our wholehearted cooperation. Since this is a Federal requirement, adequate Federal funding should be made available to carry on this worthwhile effort. It should be pointed out that they have come to the aid of many agencies in their battles with the self-appoined environmentalist by certifying that the area of a proposed project has no historical significance.

The last area I would like to touch on today deals with funding and, more specifically, the Highway Trust Fund. It has been emphasized on the past "fiy ins" that we must maintain the trust fund in its present form and not dissolve it or open it up to non-highway related areas. It has been equally emphasized that there aren't sufficient monies in the fund to take care of highway needs, let alone other areas of concern.

The counties in Minnesota feel what we need is a complete and thorough needs study of all roadway systems, not just a select few. Sure, there have been "white wash" studies on a crash basis in the past which are for the most part meaningless.

In Minnesota we have approximately 128,000 total miles of roadway with approximately 43,400 miles being on the trunk highway system, county State aid highway system and the municipal State aid street system. This is one-third of our total system that has a complete and thorough needs study. Before we talk of breaking the trust fund, let's look at the total picture as it relates to needs. We feel an adequate needs study on the total system in Minnesota would take approximately three years to complete, but I'm sure would reinforce our position that all our roadways are not complete and up to standards and lay to rest once and for all the myth that more roadways need not

The Minnesota Legislature in the past year has created a department of transportation which I feel quite adequately endorses the feeling of Minnesota that there are other modes of transportation, i.e., rail, waterway, pipelines, air and public transit. I'm sure it can and will be pointed out that the other means of transportation also have some real needs in the terms of dollars it will take to better serve the people of Minnesota and the nation. We would therefore wholeheartedly recommend the retention of the highway trust fund with additional funding rather than less and also the establishment of adequate funding for the other modes as determined by their needs.

OCCUPATIONAL SAFETY AND HEALTH ACT

Mr. McCLURE. Mr. President, many times in the past I have received letters from disgruntled businessmen decrying the excesses of the Occupational Safety and Health Act. But the most impressive evidence may come from an employee of OSHA arguing on the same side. If there were ever any question that OSHA is overly oppressive, poorly managed, and duplicative, this letter from an OSHA compliance officer will make things graphically clear. For obvious reasons, he has asked that his name not be used. but the text of his letter so clearly illustrates the need to reconsider and reshape the law, that I am asking it be printed in the RECORD in full, together with a statement this same man prepared.

Nobody wants to see hazardous working conditions for our Nation's workers. We are all in favor of safety, but we must recognize that desirable goals are

invalidated when unconstitutional means are used in attempting to achieve them. At some point the American people—employees and employers alike—are going to stand up and say, "We've had enough."

One man in my own State has done just that in what I consider an act of courage and patriotism. Mr. F. G. Barlow, an electrical contractor from Pocatello, Idaho, refused to let a Federal inspector go through his place of business. A three-judge Federal court agreed with him that a warrantless search violated the right guaranteed by the fourth amendment, to be protected from unreasonable searches and seizures. I believe the decision is a major victory for the small businessman who has found himself at the mercy of the OSHA inspector.

Mr. President, I ask unanimous consent that the text of this letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEAR SENATOR MCCLURE: I have been an Occupational Safety and Health compliance officer for two years. This job is my sole source of income. I must be honest with myself, therefore, I must agree with your article completely.

First, many of the General Industry Standards are duplications, in one form or manner, of the following private and governmental agency functions; Liability insurance companies, Fire insurance companies, State, city and town Fire Marshals, Department of Environmental Protection, State and local Health Departments, Financial companies holding 1st. and 2nd. mortgages, State and local building inspectors and a few other organizations.

Many of the above are deeply concerned with not only the worksite but also with the safety and health of the employees.

This program, initiated in early 1971, has done nothing noticeable, as of this date, concerning the accident incidence rate in industry, construction or agriculture.

Senator McClure, let us be honest with ourselves. My opinion is that an effective compliance officer should have a minimum of 30 months of intensive training in all aspects of safety and health. We received 4½ weeks of training at the O.S.H.A. Institute in Rosemont, Illinois. We were not individually graded and the instructors left much to be desired as far as their efficiency was concerned.

The fear we instill on many employers during an inspection is unbelievable. Will they close me down? How much is the fine going to be? Must I go to court and if so what will happen? Will I have to lay off some employees? How much will it cost to make the necessary corrections in order to comply with O.S.H.A.? These and other thoughts go through their minds, I am sure, as we do the walkaround, in their worksite.

An opinion, if I may. Reduce the O.S.H.A. staff 50%. The remainder would then be (O.S.H.A. Consultants). They would work with employers and help them, when needed, to minimize the safety and health hazards which may be found on the worksite. The only time a monetary penalty would be issued would be when there is a serious violation. Only under these circumstances would they have any clout.

Enter these worksites as a friend who is knowledgeable, understanding, concerned and willing to help. This, Senator, is my humble opinion as to how O.S.H.A. should operate. You may use any of the enclosed, at your discretion, but not my name. I am sure you realize my reason.

The enclosed is something I had written approximately one year ago. It is not completed but my objective, at that time, was to show how much knowledge an effective compliance officer must have and how asinine some of the standards are. Kindly excuse what errors you may find in grammar, etc. Thank you.

Sincerely,

(Name withheld.)

WHERE IS THIS UNIQUE MAN?

Compliance officers under O.S.H.A. must be a rare breed, indeed! The knowledge necessary to perform their duties according to the General Industry Standards is really something. Let us, for a minute, go down the standards and get a glimpse, if possible, of the knowledge one should and/or must have to be an effective compliance officer.

Walking and working surfaces—The floor is irregular—how much and how bad? There is a hole! How many centimeters and can a person fall into that hole? A nail is protruding from the floor—CITE.—this is a tripping hazard! The first rung on a wood ladder looks a bit weak—CITE. The employer tells the compliance officer that the ladder is used approximately once every two months to change a few light bulbs—CITE.

Next we have means of egress. Are they wide enough? The building inspector, and local fire marshal have been there many times and long before O.S.H.A. became effective. In a 12' x 12' room with one door is it necessary to put up an "EXIT" sign? O.S.H.A. says yes, most of the time.

Forgetting details, for the moment, a compliance officer must know the standards covering the following: Powered, platforms, manlifts and vehicle mounted work platforms. Then we go into Chemicals. Occupational Health and Environmental Control. This subject covers more than 356 chemicals used in industry from Acetaldehyde through Zirconium with Dimethylaminazobenzene somewhere in between!!

Now we shall move into the Hazardous Materials section which covers compressed gases. i.e. Acetylene, hydrogen, nitrous oxide, flammable and compressed liquids. Explosive and blasting agents are included and also petroleum gases and anhydrous ammonia.

The area of "Personal Protective Equipment" is next. Ear plugs, hard hats, safety shoes, masks, etc. are in this area. Who must wear them and when? The standards are there but can we implement them? Very difficult.

On all inspections a First Aid Kit is asked to be seen. What is a First Aid Kit according to O.S.H.A.? Quote, "First aid supplies, approved by a consulting physician shall be readily available." How many small employers are going to purchas a First Aid Kit, take it to a doctor and have him sign a statement that this kit complies to O.S.H.A. standards?

Fire Protection. O.S.H.A. comes in after the local and state fire marshal, the fire insurance man, the health department, local and state, and other agencies. We often conflict with local regulations and with local fire marshals.

Compressed gas and compressed air equipment comes next. This section, at times, is full of hot air and I shall not devote any further comments on that subject.

Now we have Materials handling and Storage. This one is a doozy. I do know a well stacked woman but have grave doubts about well stacked shelves and storage areas!

Machinery and Machine Guarding—This is an important area which should be given serious consideration. Unfortunately, the various means of guarding which O.S.H.A. accepts leaves much to be desired. The employer may use the minimum means of guarding but I would not sleep too well at night.

NATURAL FOODS MONTH

Mr. McGOVERN. Mr. President, I would like to bring to your attention that April has been designated as Natural Foods Month by the National Nutritional Foods Association in cooperation with various regional and educational affiliates throughout the Nation.

The National Nutritional Foods Association is a nonprofit organization representing retailers, manufacturers, distributors, publishers, educators, and agronomists in the nutritional foods industry from all parts of the United States.

The designation of April as Natural Foods Month has been designed to remind Americans that their eating habits have deteriorated considerably during this century to the detriment of their health.

Complex carbohydrates, fruits, vegetables, and whole grain products, which were the mainstay of the American diet, now play a minority role. At the same time, there is an overconsumption of fats and salt. It has been pointed out to the Nutrition Committee that these and other changes in the diet are contributing to malnutrition that may be damaging to the Nation's health.

Max Huberman, president, National Nutritional Foods Association, said:

Various educational events will be held throughout the country in April by members of the National Nutritional Foods Association to enhance the nutrition education of all segments of the community and to better inform consumers about the nutritional value of fruits, vegetables, whole grains, and other processed foods.

We are pleased to note that the staff of the National Nutritional Foods Association has been working with the Nutrition Committee to educate the public in the potential benefits of following certain dietary goals.

One of the plans of the National Nutritional Foods Association during April, is to utilize its noncommercial educational television series "Viewpoint on Nutrition," to make comprehensive reports on the dietary goals for the United States that will enable consumers to make more healthful food choices.

NOW, ABOUT OUR LITTLE BILL

Mr. GARN. Mr. President, a few days ago, I called the attention of the Senate to the economic instability of the Castro regime in Cuba, by way of warning the United States against over-optimism on United States-Cuban trade. Today I would like to note that the Eastern European Communist regimes are also heavily in debt to the West, to the point that the Western economic community is worried.

The debt of the so-called Comecon countries is rapidly approaching \$50 billion, most of which was built up by means of soft loans, or loans at very favorable interest rates. My own constituents have often complained that the United States is apparently willing to lend money to the Soviet Union at interest rates far below the rates charged by banks to them. What is not as well known is that the banks them-

selves have lent money to these countries at extremely low rates.

A recent editorial in the Economist outlines some of the problems which a debt pattern of this sort brings with it, and especially the international political implications of this type of lending. I ask unanimous consent that the editorial be printed in the Record, and I urge my colleagues to consider the economic relationships we are slowly developing.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

Now, About Our Little Bill

The Soviet Union and its friends may be trying to go back to Polonius. "Neither a borrower nor a lender be" was a maxim they used to follow with some precision. But over the past few years Russia and the European members of its Comecon trading group—Poland, Czechoslovakia, East Germany, Hungary, Rumania and Bulgaria—have amassed a combined debt to the west which is currently estimated to have reached \$48.5 billion. Now they are saying they want to start the process of eliminating it. That would be a tall order, but even an attempt to cut back the size of the debt is going to cause them difficulties.

This communist debt has been accumulated with the willing collaboration of western bankers and western governments. The bankers were glad to lend to the communists some of the petrodollars which poured into their coffers after the quintupling of oil prices in the wake of the 1973 Arab-Israeli war. The governments were glad to grant soft credits at well below market rates of interest in the hope that these credits would generate exports and thus jobs in the west. But now many people in the west, and in the communist world, feel that the process has gone too far.

Not that the borrowers are liable to default on their obligations. One communist country, North Korea, has defaulted on its debt, but North Korea is not a member of Comecon, and its experience has served as a warning to the Russians and their east European allies. If one or more members of Comecon defaulted, the flow of western technology and goods on which they all to some extent depend for their economic development would probably be shut off like a tap. Rather than let that happen, the Russians will probably bail out the most over-eager past borrowers, such as Poland and Hungary. But what the Comecon countries as a group will try to do is to prevent the total debt from rising still further, and if possible bring it down

Their intention to start paying back the debt is written into all these countries' fiveyear plans for the 1976-80 period, and they have recently had some modest success in at least slowing down its growth. According to provisional estimates they managed to reduce their \$10 billion trade deficit with the west in 1975 to about \$8 billion in 1976. Professor Joseph Berliner, an American authority on the Soviet economy, told a conference on this problem in Brussels on March 17th that the recent unease about the scale of Comecon borrowing is like the sinking feeling you get when a lift starts whistling upwards in a skyscraper. When it settles con's borrowing soon will, the stomach too returns to normal.

It will be hard for the communist countries to cut their debt drastically or rapidly. To do that would require them to export much more to the west than they import from it. But the Soviet Union cannot dig so much extra coal, or pump so much extra coll.

in a hurry; those things take time, and a lot of extra investment. It is equally difficult for the east Europeans suddenly to produce a lot more food for export. And the quality of communist manufactured goods is unlikely to improve quickly enough to make an appreciable addition to exports—especially since that improvement in quality depends partly on importing western technology on a scale which the communists are now decreasingly able to afford.

WHEN THE WIND TURNS COLDER

But even an attempt to trim a small slice off the debt will bring some uncomfortable times for communist governments. It will involve importing relatively less from the west, and exporting relatively more to it: both of which mean that fewer goods will be available for the people who live in the communist countries. That is liable to cause political tensions in places where the recent upsurge in credit-based imports from the west has led to expectations of a steadily rising standard of living. The new climate gives the western world an opportunity it is entitled to use.

Professor Marshall Shulman, President Carter's new adviser on Soviet affairs, wrote recently that "the measured development of economic relations can reasonably be made conditional upon Soviet restraint in crisis situations and in military competition". He singled out credit as the most easily adjusted instrument of such a policy. The Carter administration is thinking of linking the economic help the Soviet Union gets from America to the way Russia behaves in, say, southern Africa or the Middle East. An attempt should now be made to bring America's main allies in on this policy too.

Past experience has shown that it is not easy to stop western governments bidding against each other when it comes to providing cheap credits to communist governments. But the communist world is now in a curious half-way house in its economic relationship with the west. If you give somebody a small loan, you have a debtor; if you give him a big one, you have a partner. Before Russia becomes such a partner, the political conditions the west requires of it need to be spelt out. The leaders of the western world meet for their economic summit in London in May. The terms for providing future credit to the communist world should be one of the subjects on their agenda.

PRESIDENT CARTER'S FOREIGN POLICY INITIATIVES ENHANCE IMAGE OF UNITED STATES GLOB-ALLY

Mr. HUMPHREY. Mr. President, in yesterday's Washington Star, there appeared an excellent article by staff writer Henry S. Bradsher, analyzing President Carter's foreign policy initiatives.

I call this article to the attention of my colleagues in an effort to point out the global stakes in a far-reaching foreign policy initiative which includes our recent SALT proposals, emphasizing steps to begin reduction in nuclear arsenals; human rights concerns; U.S. peacekeeping efforts in the Middle East; and a U.S. sensitivity to the economic concerns of the less developed nations.

As Mr. Bradsher noted:

Since Jimmy Carter finished campaigning for the Presidency and began campaigning to improve the American image in the world, the Soviet Union has been growing increasingly unhappy.

Its irritation finally exploded into anger a few days ago when the United States as-

serted that Moscow had rejected a balanced proposal for disarmament. Decades of cultivating a world reputation for advocating disarmament—despite the actual Soviet arms buildup—was being challenged by this newly assertive American leadership.

It is clear that the positive nature of the President's foreign policy initiatives has once again placed the United States in a global leadership role and placed the Soviets on the defensive. But these initiatives are interlocking in nature. Few in the Congress would criticize the President for his "tough stand" on SALT matters. Few would disagree with the predominant role of the United States in Middle East peacekeeping efforts. The country has rallied in support of the President's stand on human rights violations in other nations. However, these initiatives must be buttressed by effective American programs of foreign assistance which are directly related to our discussions with the less developed nations in the "North-South dialog."

As Mr. Bradsher also noted:

And the effort which the Carter Administration now is formulating to help less-developed countries in their economic problems seems likely to lead to further Soviet displeasure...

The image competition is not yet clearly

The image competition is not yet clearly defined on what is known as "the North-South problem." This means relations between rich industrialized nations, mostly in the Northern Hemisphere, and the impoverished countries of the tropics and Southern Hemisphere.

The Soviet Union has withdrawn a bit from its expensive effort in the last 1950s and early 1960s to win influence by aiding less-developed countries. It now is more interested in attaching the economies of these countries to the Soviet economic system, deriving benefits from this, than in providing benefits to them by changing present economic relationships.

Carter's new team of international economists with outstanding reputations is moving cautiously so far on North-South relations. It is taking care not to worsen inflation in the United States or contribute to a depression by measures which would help the poor countries at the expense of American economic health.

But as economic proposals are made—there are several related deadlines next month—the U.S. image could acquire another dimension. If U.S. domestic politics and economics make it possible to provide meaningful help to less-developed countries, the Soviets are likely to find themselves on the losing end in yet another aspect of competition for world leadership.

The President has made the expansion of our bilateral and multilateral aid contributions a major initiative in our response to the concerns of the less-developed nations. Yet, already we have witnessed opposition in the Congress to this initiative—an opposition which can only let the Soviets off the hook, so to speak. I think, if the American people fully understood the implications of our sizable increase in contributions to the fifth replenishment of IDA, or of our expansion of bilateral assistance programs, this resistance in the Congress would be minimal at most.

All too often we try to compete with the Soviets on the military and strategic level. It is a costly process. As many Third World leaders are quick to point out, the United States should do what it is best at doing. We win the competition on the economic side. Yet, we stand on

the verge of giving up the best tool we have, if the congressional sentiment is such that deep cuts are made in the President's requests for bilateral and multilateral economic and humanitarian development assistance proposals.

I urge my colleagues to closely evaluate the implications of seriously jeopardizing what is a positive interlocking set of foreign policy initiatives being undertaken by the President. Each element is vital to the effectiveness of the overall policy.

Mr. President, I ask unanimous consent that Mr. Bradsher's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE NEW CARTER CAMPAIGN: BETTER U.S. IMAGE UPSETS RUSSIA

(By Henry S. Bradsher)

Since Jimmy Carter finished campaigning for the presidency and began campaigning to improve the American image in the world, the Soviet Union has been growing increasingly unhappy.

Its irritation finally exploded into anger a few days ago when the United States asserted that Moscow had rejected a balanced proposal for disarmament. Decades of cultivating a world reputation for advocating disarmament—despite the actual Soviet arms buildup—was being challenged by this newly assertive American leadership.

The Kremlin earlier had waxed indignant about Carter's human rights campaign. It has been unhappy about U.S. peacemaking efforts in the Middle East, fearing it would be left out of any substantive role.

And the effort which the Carter administration now is formulating to help less-developed countries in their economic problems seems likely to lead to further Soviet displeasure—although not of such a spectacular type as angry remarks by General-Secretary Leonid I. Brezhnev or Foreign Minister Andrei A. Gromyko.

Carter arrived at the White House with

Carter arrived at the White House with well-developed ideas about the need for morality in foreign policy. That meant advocating human rights, arms control, peace and a move toward economic equality.

He had not even moved in at 1600 Pennsylvania Ave. when he took the first major—but, in this country, little-noticed—step to claim world leadership for his administration.

The night before the inauguration Carter taped a speech promising that "the United States can and will take the lead" in trying to "lift from the world the terrifying specter of nuclear destruction" and in combating "poverty and hunger and disease and political repression."

The speech was broadcast around the world shortly after he was sworn in. An unprecedented announcement that the U.S. government was going to pay more attention to foreign opinion, it has proven to be a harbinger of a different approach to American foreign relations.

It is an approach that has made the Soviet Union feel threatened.

The Kremlin has been accustomed to defining the terms of world political discussion in Marxist ideology, to seizing the initiative in the propaganda war which goes on constantly as cold wars and detentes come and go. Suddenly the rules were being changed.

First came human rights.

Statements supporting dissidents in Czechoslovakia and the Soviet Union, a White House meeting with Vladimir K. Bukovsky and a letter to Andrei D. Sakharov did not take lengthy staff studies by the new administration. They came quickly because

they were instinctive reactions by Carter to injustice.

Soviet anger at what the Kremlin considered interference in internal affairs peaked in a public speech by Brezhnev 13 days ago and his private lecture to Secretary of State Cyrus R. Vance last Monday.

But on neither occasion did the Soviet Communist party leader directly link human rights with prospects for a new strategic limitations treaty. Contrary to the apprehensions of some Americans about the new Carter foreign policy style, the Soviet rejection of Carter's two SALT options on Wednesday was not a result of human rights irritation, as Gromyko made clear.

as Gromyko made clear.

It was the result of a Soviet feeling that they were being offered an unbalanced proposal, one which required them to give up real military strength in return for the U.S. repurciation of paper programs.

renunciation of paper programs.

If Carter had not then insisted publicly that it was balanced, the Soviets might not have feit their world image was challenged. But as soon as the United States cast them in the role of opposing a sensible disarmament plan, a new element was added to the competition for international influence.

In his heated address to journalists in Moscow Thursday, Gromyko contended that it was not a balanced proposal, that it was only a shady maneuver to give the United States an advantage.

Both Brezhnev's speech on March 21 and Gromyko's toast at a luncheon for Vance last Monday suggested a new flexibility in Soviet policy on the Middle East. This seems to be a reaction to the fluidity which Carter has introduced into the American search for peace between Arab nations and Israel.

Although the Soviets are cochairmen with the Americans of the Geneva conference that is supposed someday to work out Middle Eastern peace, they have found themselves left on the sideline by the new U.S. Initiatives. Moscow prides itself on the peacemaker image which it developed at times like the 1966 Tashkent conference after an India-Pakistan war, but it found Carter seizing that image, too.

The image competition is not yet clearly defined on what is known as "the North-South problem." This means relations between rich industrialized nations, mostly in the Northern Hemisphere, and impoverished countries of the tropics and Southern Hemisphere.

The Soviet Union has withdrawn a bit from its expensive effort in the late 1950s and early 1960s to win influence by aiding less-developed countries. It now is more interested in attaching the economics of these countries to the Soviet economic system, deriving benefits from this, than in providing benefits to them by changing present economic relationships.

Carter's new team of international economists with outstanding reputations is moving cautiously so far on North-South relations. It is taking care not to worsen inflation in the United States or contribute to a depression by measures which would help the poor countries at the expense of American economic health.

But as economic proposals are made—there are several related deadlines next month—the U.S. image could acquire another dimension. If U.S. domestic politics and economics make it possible to provide meaningful help to the less-developed countries, the Soviets are likely to find themselves on the losing end in yet another aspect of competition for world leadership.

PANAMA CANAL: BRITISH PRESS ALERT TO DISREGARD OF THE 1901 HAY-PAUNCEFOTE TREATY

Mr. HELMS. Mr. President, during the last decade, various Members of the Con-

gress have repeatedly stressed that one of the principal treaties governing the operation of the Panama Canal is the 1901 Hay-Pauncefote Treaty with Great Britain, which applied the rules for the Suez Canal to the Panama Canal.

The projected surrender of U.S. sovereignty over the Canal Zone is an obvious disregard of this treaty, the principles of which have been accepted by canal users and strictly observed by the United States. So far as can be ascertained, no effort has been made to secure the approval of the British Government, which is one of the largest users of the Panama Canal with a total of 1,148 transits out of 13,786 oceangoing transits during fiscal year 1975. In fact, relatively recent efforts by serious students of the canal problem to obtain information from State Department sources revealed that its responsible officials knew nothing about the Hay-Pauncefote Treaty until alerted to its existence by being questioned.

In the United Kingdom the situation is different, for an important London newspaper is alert to the canal subject now being debated in the United States. It has stressed that—

American plans to transfer sovereignty of the Panama Canal to Panama . . . will have to be approved by the British Government.

Mr. President, the failure of the State Department to take up this matter with the British Government as a party to the Hay-Pauncefote Treaty is indeed difficult to comprehend. The Panama Canal and its protective frame of the Canal Zone is not a shopping center convenient for use as a diplomatic plaything but one of the greatest works of man that serves the shipping of the entire world. The surrender of its sovereign control by the United States would probably be followed by worldwide consequences of malign character, especially for Latin American nations dependent upon it.

Mr. President, in order that the Congress, especially the Senate, may be fully informed, I ask unanimous consent that the article from the Daily Telegraph and the text of the 1901 Hay-Pauncefote Treaty be printed in the Record.

There being no objection, the material was ordered to be printed in the Record, as follows:

[From the London Daily Telegraph. Mar. 3,1977]

BRITAIN ONCE RULED SEA AND SO MUST APPROVE PANAMA TRANSFER

(By Desmond Wettern)

American plans to transfer sovereignty of the Panama Canal to Panama, which the Carter Administration intends to effect soon to rid America of the last vestiges of "colonialism," will have to be approved by the British Government.

This results from Britannia having once ruled the waves—or at least having had the world's largest merchant navy. The matter was decided in 1901.

The Hay-Pauncefote Treaty of that year requires that Britain be consulted before there is an change in the control of the Canal.

The treaty was signed on Nov. 18, 1901, by the British Ambassador in Washington, Lord Pauncefote, and the American Secretary of State, John Hay.

It superseded the earlier Clayton-Bulwer Treaty of 1850 and provided for unhindered passage of the Panama Canal, when it was completed, by the shipping of all nations.

OBJECTION UNLIKELY

It also gave the United States Government the "exclusive right for the regulation and management of the canal" and stipulated that "no change of territorial sovereignty or of the international relation of the country or countries traversed by the before-mentioned canal shall affect the general principle of neutralisation or the obligation of the High Contracting Parties (Britain and America) under the present Treaty."

Although this would seem to preclude any loop-hole for the Americans to transfer the Canal's sovereignty to another power, the Foreign and Commonwealth Office is reserving its position.

From a legal point of view the British Government is unlikely to object to any transfer of sovereignity though, at least concerning the treaty provisions, Whitehall's acquiesence would seem to be based on turning a blind eye rather than a close interpretation of the Treaty's five articles.

Britain's involvement in the Treaty derives from the days when it was Government policy to ensure free navigation around the world for the benefit of the British Merchant Navy, then easily the world's largest.

The Americans alone are entitled to "maintain such military police along the canal as may be necessary to protect it against law-lessness and disorder."

British shipping is now a close second to that of America in the use of the Canal. In 1973-74, the last year for which figures are available, 1,258 British merchant ships went through the Canal carrying 13,800,000 long tons of cargo compared to 1,322 American ships carrying 10,500,000 long tons.

The biggest users were Liberia, with 1,798 transits, and Japan with 1,348. Russian use amounted to only 242 transits involving 1,500,000 long tons of cargo.

BANKING INTERESTS

The use of the Panama Canal by British warships is now small. In 1976 a task group of some nine ships used it returning from a nine-month series of exercises and visits east of Suez, but since then no British warship has navigated the canal either way, I understand.

Apart from political considerations the Carter Administration is also believed to be under pressure from American banking interests to hand the canal over to Panama.

ACCESS TO PROFITS

American and international banks, including the London branch of Chase Manhattan, are believed to have lent the Left-wing regime of President Torrijos of Panama large sums and are anxious to obtain interest on their loans. It is felt that interest payment will be possible only if Panama has access to profits from canal dues.

British banks believed to have provided loans include the Orion Bank, William Brandts' and Son and Lloyds, and Bolsa International.

[Appendix C]

TREATY BETWEEN THE UNITED STATES AND GREAT BRITAIN TO FACILITATE THE CON-STRUCTION OF A SHIP CANAL

(Hay-Pauncefote Treaty)1

[Signed at Washington, November 18, 1901; ratification advised by the United States Senate, December 16, 1901; ratified by the President, December 26, 1901; ratified by Great Britain, January 20, 1902; ratifications exchanged at Washington, February 21, 1902;

¹ Manuscript, United States Department of State, Archives, Treaty Series, No. 401. Also S. Doc. No. 474 (63d Cong., 2d Sess.), pp. 292–94; W. M. Malloy, op. ctt., I, 782–84 (US).

proclaimed at Washington, February 22, 1902.]

[Articles]

II. Convention of April 19, 1850.
II. Construction of canal.

III. Rules of neutralization.IV. Change of sovereignty.

V. Ratification.]

The United States of America and His Majesty Edward the Seventh, of the United Kingdom of Great Britain and Ireland, and of the British Dominions beyond the Seas, King and Emperor of India, being desirous to facilitate the construction of a ship canal to connect the Atlantic and Pacific Oceans, by whatever route may be considered expedient, and to that end to remove any objection which may arise out of the Convention of the 19th April, 1850, commonly called the Clayton-Bulwer Treaty, to the construction of such canal under the auspices of the Government of the United States, without impairing the "general principle" of neutralization established in Article VIII of that Convention, have for that purpose appointed as their Plenipotentiaries:

The President of the United States, John Hay, Secretary of State of the United States of America;

And His Majesty Edward the Seventh, of the United Kingdom of Great Britain and Ireland, and of the British Dominions beyond the Seas, King, and Emperor of India, the Right Honourable Lord Pauncefote, G.C.B., G.C.M.G., His Majesty's Ambassador Extraordinary and Plenipotentiary to the United States:

Who, having communicated to each other their full powers which were found to be in due and proper form, have agreed upon the following Articles:—

ARTICLE I

The High Contracting Parties agree that the present Treaty shall supersede the aforementioned Convention of the 19th April, 1850.

ARTICLE II

It is agreed that the canal may be constructed under the auspices of the Government of the United States, either directly at its own cost, or by gift or loan of money to individuals or Corporations, or through subscription to or purchase of stock or shares, and that, subject to the provisions of the present Treaty, the said Government shall have and enjoy all the rights incident to such construction, as well as the exclusive right of providing for the regulation and management of the canal.

ARTICLE III

The United States adopts, as the basis of the neutralization of such ship canal, the following Rules, substantially as embodied in the Convention of Constantinople, signed the 28th of October, 1888, for the free navigation of the Suez Canal, that is to say:

1. The canal shall be free and open to the vessels of commerce and of war of all nations observing these Rules, on terms of entire equality, so that there shall be no discrimination against any such nation, or its citizens or subjects, in respect of the conditions or charges of traffic, or otherwise. Such conditions and charges of traffic shall be just and equitable.

2. The canal shall never be blockaded, nor shall any right of war be exercised nor any act of hostility be committed within it. The United States, however, shall be at liberty to maintain such military police along the canal as may be necessary to protect it against lawlessness and disorder.

3. Vessels of war of a belligerent shall not revictual nor take any stores in the canal except so far as may be strictly necessary; and the transit of such vessels through the canal shall be effected with the least possible delay in accordance with the Regulations in force, and with only such inter-

CONGRESSIONAL RECORD — SENATE

mission as may result from the necessities of the service.

Prizes shall be in all respects subject to the same Rules as vessels of war of the belligerents

4. No belligerent shall embark or disembark troops, munitions of war, or warlike materials in the canal, except in case of accidental hindrance of the transit, and in such case the transit shall be resumed with all possible dispatch.

The provisions of this Article shall apply to waters adjacent to the canal, within marine miles of either end. Vessels of war of a belligerent shall not remain in such waters longer than twenty-four hours at any one time, except in case of distress, and in such case shall depart as soon as possible; but a vessel of war of one belligerent shall not depart within twenty-four hours from the departure of a vessel of war of the other belligerent.

The plant, establishments, buildings, and all works necessary to the construction, maintenance, and operation of the canal shall be deemed to be part thereof, for the purposes of this Treaty, and in time of war, as in time of peace, shall enjoy complete immunity from attack or injury by belligerents, and from acts calculated to impair their usefulness as part of the canal.

ARTICLE IV

It is agreed that no change of territorial sovereignty or of the international relations of the country or countries traversed by the before-mentioned canal shall affect the general principle of neutralization or the obligation of the High Contracting Parties under the present Treaty.

ARTICLE V

The present Treaty shall be ratified by the President of the United States, by and with the advice and consent of the Senate thereof, and by His Britannic Majesty; and the ratifications shall be exchanged at Washington or at London at the earliest possible time within six months from the date hereof.

In faith whereof the respective Plenipotentiaries have signed this Treaty and there-

unto affixed their seals.

Done in duplicate at Washington, the 18th day of November, in the year of Our Lord one thousand nine hundred and one.

JOHN HAY. PAUNCEFOTE.

PRELIMINARY NOTIFICATION PROPOSED ARMS SALES

Mr. HUMPHREY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of \$25 million or, in the case of major defense equipment as defined in the act, those in excess of \$7 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Sen-

ate that such a notification was received on March 30 concerning an East Asian country: and that seven such notifications were received on April 1, 1977.

Interested Senators may inquire as to the details of this preliminary notification at the offices of the Committee on Foreign Relations, room S116 in the Capitol.

A "HARD LINE" HELPS THE GENUINELY NEEDY

Mr. McCLURE. Mr. President, for some time now, Congress has been struggling to reform the welfare laws. Almost everyone agrees that some sort of reform is needed. Unfortunately, every change we make seems to have the effect of bringing more and more Americans under the welfare mantle. It seems to me that those most harmed by expanding welfare eligibility are the truly needy in this coun--those individuals who through no fault of their own are unable to provide for themselves and their families.

These same thoughts can be found in a recent article in Humanist magazine. The article was written by a staff member of the Senate Finance Committee, David B. Swoap. Dave assisted many of us on the minority side in the drafting of food stamp reform legislation in the 94th Congress. He is one of the brightest young men working on Capitol Hill, and it is a pleasure to ask unanimous consent that his article be printed in the

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A "HARD LINE" HELPS THE GENUINELY NEEDY (By David B. Swoap)

Since their inception in the 1930s, the nation's public-assistance programs have grown in unparalleled fashion; they have escaped critical evaluation; and they have exacerbated many of the problems that they purport to solve or alleviate. What is worse, many of the so-called reform plans being pushed today are not reform at all; they would compound the situation and deepen the dependency spiral; and in the last analysis they have an effect upon the economy that is serious enough to jeopardize all that they hope to achieve.

The thoroughgoing commitment to income transfer over the last forty years has resulted in a massive redirection of resources. In the minds of many, this may be both desirable and necessary. However, the pattern has now become such an escalation that it threatens to engulf the ability of the taxpayer (and the economy from which he derives his income to pay his taxes) to sustain it.

In 1955, spending by all levels of government (federal, state, and local) was approximately \$97 billion, or slightly over 25 percent of the gross national product. Of this amount, government benefit payments to individuals accounted for \$15.6 billion, or 16 percent of total government spending and 4.1 percent of the GNP. In 1975, just twenty years later, total government spending stood at approximately \$478 billion—33.3 percent of the GNP. Benefit payments represented \$158 billion—33 percent of total government spending and 11 percent of the GNP. In other words, the proportion of government spend-ing for individual-benefit-payment programs more than doubled in that period of time, and the proportion of the GNP that went to sustain such programs almost tripled.

The belief that the nation has misdirected priorities and continues to spend proportionately more on defense than on social programs appears ill supported by the facts. In absolute terms, federal spending for defense in 1955 was \$39.4 billion; it increased in 1975 to \$79 billion. In relationship to total government spending, however, it dropped from 41 percent to 16.5 percent; in relationship to the GNP, it dropped from 10.4 percent to 5.5 percent. While its share of total government spending was being cut by 60 percent, then, that of benefit payment programs was doubling. While the defense proportion of the GNP was almost half in 1975 what it was in 1955, the share of individual-benefit-payment programs had almost tripled. Clearly, budget priorities overwhelmingly have fa-vored the benefit-payment programs of the nation in the last twenty years.

The Office of Management and Budget (The

Trend of Government Spending, 1955 2000) has had some interesting observations about the implications for the future should the rate of growth that we have seen in the last twenty years in the social programs

"Benefit payments to or on behalf of individuals rose more than twice as fast as our Nation's output [between 1955 and 1975]— by an average of 8.8 percent per year. At least three-fourths of this growth was ac-counted for by new programs and expansions of existing ones-not by normal growth in the beneficiary population.

Continuation of this trend for any extended period of time would produce fundamental changes in our Nation, as well as in the budget. Projections to the year 2000 illustrate the point. If the gross national product, nondefense spending, and benefits payments to individuals were to continue to grow in real terms at their average rates of growth in the past two decades, governments would lay claim to more than 55 percent of the Nation's output in the year 2000-even if real defense spending were held constant."

Even more revealing is the Office's analysis the effect of cutting defense, and then other direct operations, to finance the growth in payments to individuals. If the latter were to continue at the 1955-1974 rates, with total outlays being a constant share of the GNP, then all defense expenditures would have to cease by 1985, and all defense and all other government direct-operations expenditures would have to cease by 1991.

Critics of data of this nature usually contend that growth rates in social programs will not continue at these levels but that their peak has been reached and that they will stabilize in the long run at a lower growth rate. This view overlooks two very serious facts: first, without any major program changes, growth rates show no sign of lessening; and second, with the multi-plicity of new programs being considered and urged in Congress and elsewhere, there appears little likelihood that new accelera-

tive fuel will not be added.

OMB observed that holding government spending at about today's share of the GNP is possible only if direct government operations grew significantly more slowly than the GNP, and payments to individuals grew substantially more slowly than the 1955-1974 rate of 8.8 percent per year (for example, at not more than 5 percent per year). We see that this does not yet seem to be occurring. as indicated by the following recently released figures for fiscal 1973 through the projected 1978 budget. Health: up 129 percent, or an average of 25.8 percent per year; income assistance: up 88 percent, or an average of 17.6 percent per year; social services: up 56 percent, or an average of 11.2 percent per

Moreover, the 1978 figures on which these percentages are based are the amounts requested by the outgoing administration, before any modifications or adjustments by the incoming one. Additionally, as the budget year progresses, it is often necessary to request supplemental appropriations; over \$1.2 billion in additional appropriations have had to be requested by the outgoing administration to meet "rising unit costs and caseload" for public assistance in the current fiscal year; and as indicated earlier, they take into account none of any number of possible liberalizations that may emerge from the 95th Congress. Indeed, the cited 1978 figures include a number of program restrictions that neither the Congress nor the incoming administration may accept and, thus, on their face, in fact may be too low.

face, in fact may be too low.

Now, against this backdrop, one may logically ask: "How did we get where we are? Are we achieving our goals? Are the public-assistance expenditures indicative of the extent to which we are really serving need in this country?" I would submit that we have only the faintest idea of how we got where we are; it is impossible to determine if we have met our goals, for we have neither defined them nor created adequate yardsticks for measuring their achievement; and public-assistance expenditures are a very poor index of the extent to which legitimate need is being met.

Almost the entire pattern of both legislative and executive action over the past forty years in the public-assistance field has been one of adding one program on top of another, each predicated upon claimed potential that is rarely evaluated, each hardly ever taking into account the existence of the other (so that double or triple benefits thereby are conferred), and each of which usually ends up adding to the cost and dependency spiral. The curious thing, moreover, is that so many of these changes have been advanced by the same architects who designed the structure they are now trying to "reform," and so rarely are they held accountable.

This certainly is true in the current debate on welfare reform. Elsewhere in this magazine a number of welfare advocates are urging a guaranteed annual income of one kind or another, which will have the chief effect, in my judgment, of moving us directly and precipitously into even more serious fiscal and policy problems. In the name of "reform," changes are urged that would include more and more persons under the welfare mantle, weaken individual responsibility, remove the present eligibility tests of need, seriously undermine initiative, and require massive new tax outlays. Standardization of benefits is urged, when variation in benefits previously had been pressed to meet varying need circumstances. Inequities are decried, but the redress of an inequity almost always occurs upward, never downward, and often results in another being created. Simplicity is used as a convenient exhortatory tool, although complexity has been manipulatively useful in the past; and simplicity means even more errors will be created. Federalization is called for, notwithstanding the poor accountability, administrative, and service record of federal programs in general and of the Supplemental Security Income (SSI) program in particular. Both recipients and taxpayers may unite in the awareness that a federally run program rarely meets their respective needs

In "The Future Direction of Income Transfer Programs," in Public Administration Review (Sept./Oct. 1976), Congressman Bob Michel, minority whip of the U.S. House of Representatives and ranking Republican on the Labor/HEW appropriations subcommittee, defined the income-transfer program problem, stating that it is:

"The layering of one program on top of another, without regard for interrelationships and without provisions for determining accountability.

"A belief that money alone solves problems.

"A failure to see that monies spent in the public sector are often unproductive dollars—there is no multiplier effects, no insurance that jobs which are "created" supposedly by government will contribute to the economy.

"A general failure to consider the deleterious effects of massive welfare programs on personal and family responsibility.

"Legislating based upon shibboleths: that people, for example, will "go hungry" if we do not permit the food stamp program to barrel down the path of unrestrained expansion. People may very well go hungry if we do not stop it."

He continues:

"In addition, we have over the years created a kind of "interlocking directorate" between constituent groups who receive government funds, the bureaucrats who administer them, and the professionals who seek them. These interrelate with the politicians and their staffs who provide the funds and design the programs.

"And we have come to adopt the rather strange belief that the federal government is some sort of impersonal "donor" or charitable fund—when, in fact, it is ourselves. We—all of us—need to bite the bullet and put an end to this constant seeking—and providing—of more and more government largesse.

"Reform proposals abound. Sadly, most of them would only make things worse."

They would only make things worse because they extend and compound the errors of the past. What is happening is that the present confusion and dissatisfaction that surrounds the welfare system is being used, in many cases, to advance even further liberalizations and extensions to achieve the advocate's primary goal: an even greater measure of income transfer, an even greater proportion of the GNP that is devoted to government spending and individual benefit programs.

This is not, in my opinion, what most persons seek when they say they want welfare reform. To argue the point almost seems to belabor the obvious. In point of fact, however, greater and greater income transfer and enlargement of federal programs is not what the taxpayer means by his call for welfare reform. With a historic sense of compassion for the needy, he asks that the system be reformed to ensure that aid go in sufficient amounts only to those persons entitled by genuine need to receive it. Specifically, in my opinion, he asks that eligibility tests be con-structed so that need may not be artificial or manipulated, that benefits be adequate and decent, but not duplicative; that work requirements be enforced for the physically able, not simply paid lip service; that out-side resources be taken into account and relied upon wherever possible; that sufficient precision characterize the system so that errors are avoided to the greatest possible ex-tent; that persons responsible in the last analysis for the needy person—whether it be the individual himself or his parent—be required to meet his responsibility to the best of his ability; that opportunities for fraud and abuse of the system be reduced and hopefully eliminated; and that, finally, the system be operated within the limits of public resources and not in such a fashion as to call into question the very ability of the economy to survive.*

Officials at all three levels of government, if fundamental welfare reform is to be achieved, must undertake the comprehensive scrutiny of the Social Security Act, HEW regulations, and relevant state statutes and regulations that is required to identify all areas where there are loopholes, misallocation of resources, and provisions that are inconsistent with the above-stated objectives, and to close, modify or eliminate them. Examples abound:

The Social Security Act and the Food Stamp Act have no gross income ceilings for the receipt of AFDC or food stamps. Instead, net income is used; numerous exemptions and deductions are permitted, many with the hope that their allowance will serve as a work incentive. In many cases, however, their provision has a boomerang effect, for people once employed stay on welfare at higher and higher income levels. The disregard of the first \$30 of earned income, and ½ of the remainder, in the AFDC program has been estimated by HEW to have cost \$10 in added necessary benefits for every \$1 that it has saved through encouraging persons to become actively employed.

The federal statute also has a "fourmonth" rule: qualifying the recipient for the earnings disregard if he or she has been on welfare in any one of the preceding four months. The problem is that it is not a single four-month transition period; it is a constantly rolling-forward four-month period—so that the person always qualifies and remains on welfare. (They will always have been on welfare in the preceding month, so they continue to be eligible ad infinitum.)

With regard to outside resources, no means for universally checking reported income against actual income is required by HEW or most states, yet a relatively simple method exists in cross-checking employers, unemployment-compensation payroll reports with recipient reports of income.

Stepfathers, men "assuming the role of spouse," or two welfare families living together can often get by with no diminution of the original welfare grants whatever.

These are simply illustrations of the kinds of loopholes that can and should be closed. Often, however, recommendations for these kinds of changes are met with one (or a combination) of three criticisms: (1) Reform of this nature is simply incrementalism, or more pejoratively, tinkering, and much more massive reform is needed; (2) no actual "program" exists for this kind of reform, and therefore it is largely rhetorical or ephemeral; and (3) this kind of reform hurts needy people.

The charge that reform of the kind outlined is simply incrementalism or tinkering is often simply a smokescreen for the fact that the critic wishes to achieve even greater income-redistribution and does not want reform of this kind to hinder his efforts. If real welfare reform succeeds, his entire premise—that only sweeping changes in the nature of a guaranteed annual income, or more massive categorical programs, are worthwhile—because just a \$1 saving per person per month in the AFDC and food-stamp programs permits savings of \$132 million and \$228 million respectively. Second, among the key elements of welfare reform is target efficiency—to direct benefits to those who need them with greater precision and adequacy—and if fine tuning is needed to achieve that goal, we should not reject it.

to achieve that goal, we should not reject it.

The second and third criticisms were summed up in a recent column "Let's Not Talk About Welfare Reform," by Jodie Allen, a Washington-based research consultant, in which she wrote in the Washington Post (January 10, 1977):

^{*}That this should be something other than a pious platitude is becoming increasingly clear by the experience of New York and Great Britain.

"The cost-cutters... are those who don't care much whether the welfare system is fair, or adequate, or has "perverse incentives." They just wish it didn't cost so much... beyond a stout belief that you ought somehow to "get the cheaters off the rolls," it has no real program and when faced with the actual possibility of reducing assistance to a demonstrably needy family, members of this group are usually just as squeamish as anyone else."

She regrettably gives short shrift to the concerns, the program, and the differentiation ability of those who may have developed a cost-reduction program with some care. Her entire last point appears to translate into, "There are no opportunities for cost reduction, except at the expense of needy persons," which means, "All persons on welfare are legitimately there and are being paid in correct amounts." This appears not at all consistent with the facts. Surely in programs where aid is paid to ineligibles, or overpaid (and, it might be noted, underpaid), in the magnitude of 10, 20, or 30 percent of the cases, depending upon which program and which state is under consideration (current quality-control figures show errors in this magnitude range), the opportunity exists for structural reform that is embodied in a comprehensive program. Moreover, and perhaps even more telling in its potential, it can be done in a way that aids, rather than harms, needy persons.

The experience of California is a case in

The experience of California is a case in point. In the late 1960s, California was experiencing exactly what all the rest of the nation was experiencing: constantly escalating welfare costs, with a massive tax increase appearing inevitable if something were not done. Caseloads were increasing at the rate of 40,000 persons per month without regard to, employment patterns. Restive counties, sharing a significant amount of the burden, were calling for full assumption of welfare costs by the state or federal government.

Instead of simply shifting the problem from one layer of government to another, however, the governor insisted that the program itself needed reforming: and he appointed a task force of experts who went over the Social Security Act with a fine-tooth comb. After six months, in December of 1970, they emerged with over a hundred specific recommendations—all of which could be done within the confines of state law, or if they could not, were accompanied by recommendations for changes in the state statute. Among the provisions of the Governor's welfare-reform program were the following:

A new method of computing AFDC grants, so that persons income now had to be subtracted from the maximum aid payment.

An Earnings Clearance System, so that recipient reports of outside income were cross-checked with employer unemployment compensation-reports. In the first run of the top 10 percent of the earners, discrepancies were found in 41 percent of the cases.

found in 41 percent of the cases.

A Support Enforcement Incentive Fund (SEIF) to maximize location of the absent parent and enforcement of support orders. Over 85 percent of the AFDC problem was found to be caused by absent fathers. The SEIF in California returned 21.7 percent of every child-support dollar to the counties that normally would have abated the state portion of the welfare grant, with the requirement that they use it for additional child-support-enforcement efforts. Result: Child-support collections almost doubled in just five years, from \$36 million to \$66 million.

A requirement that assets be counted and included in a new, more comprehensive fashion.

A new, more detailed application and verification procedure.

The overall results:

Instead of caseloads rising by 40,000 persons per month, they started dropping by approximately 8,000 persons per month, a decline that continued throughout the Reagan administration.

This was not a national phenomenon; in the early 1970s, graphs markedly depict the downturn that occurred in California compared with the continuing escalation that other major industrial states and the nation were experiencing as a whole. When HEW finally reported a national downturn in cases for the first time in history in 1973, California accounted for 42 percent of the reason, and other states, including New York, had begun to emulate the California pattern.

had begun to emulate the California pattern. Nor was the caseload drop due "just to a decline in family sizes," as critics alleged; this was a contributing but minor factor, departmental research showed.

Forty-two of the fifty-eight counties in California were able to reduce their property taxes. Los Angeles County, which had approximately 44 percent of the caseload, was able to cut its welfare property tax rate from \$1.62 to 97 cents.

Over \$1.5 billion was actually saved in three years.

But perhaps most significantly, the tax savings occurred while California, as a part of welfare reform, simultaneously raised grants to those who remained on the rolls. AFDC increase in thirteen years, throughout the previous administration and into a portion of the Reagan Administration. Welfare reform permitted an instant increase of 27 percent in AFDC grants in 1971 and the incorporation of an annual cost-of-living increase, so that now AFDC grants in that state are approximately 50 percent above where they were prior to welfare reform. (California is one of only two states in the nation that provide such an automatic increase, the other being Massachusetts.)

That is the fact that is so often overlooked by the critics of this kind of real, thoroughgoing welfare reform. Resources can be located and freed for the legitimately needy by identifying those who have other resources on which to rely. The assumption that this kind of welfare reform "only hurts the poor" is a disservice to logic, reality, and the truly needy of America.

As stated earlier, numerous specific opportunities for improvement and strengthening of our nation's welfare system are there if one seeks to find them. If carried out with precision, care, and compassion, these improvements can benefit recipient and taxpayer alike It is hoped that, in the months and years ahead, conflicting goals and clashing rhetoric will not be permitted to obscure this fundamental fact.

TAX STIMULUS?

Mr. McGOVERN. Mr. President, the March 28 issue of the New Leader contains a letter to the editor from Robert Eisner, professor of economics at Northwestern University. Professor Eisner's letter raises serious questions concerning the efficacy of the heavy emphasis on income tax rebates contained in the economic stimulus packages currently being considered. His views are worthy of our careful attention. I ask unanimous consent that Professor Eisner's remarks be printed in the Record for my colleagues' consideration.

There being no objection, the remarks were ordered to be printed in the Record, as follows:

ON UNEMPLOYMENT

As Lane Kirkland has argued ("Putting America Back to Work," NL, February 14),

the Carter Administration economic package is too small and ill-focused to promise the economy substantial, speedy recovery. The loss is not only to today's unemployed. With each year of 7-8 per cent unemployment we sacrifice \$150-\$200 billion of output that would be produced with reasonably measured full employment. That is a loss to most of the nation, for those who are working pay with the fruits of their production—whether through taxes or inflation—to support those who are idle. What is more, as we bring up a new generation of youth lacking in jobs, hope and the habit of productive contributions to society, we lay a heavy burden on the years ahead in a continued and repeated cycle of welfare, dependence and crime.

The inadequacy of the Administration's economic package can be measured by comparing it with the relatively successful 1964 tax cuts. The legislation then reduced 1964 taxes by 1.4 per cent of 1963 gross national product and 1965 taxes by 2.4 per cent, Since GNP then was \$590 billion while in 1976 it was in the neighborhood of \$1,700 billion, we can quickly see that comparable tax reductions now would be approximately \$40 billion per year and not \$15 billion. And in 1964 we were starting with an unemployment rate of some 5.5 per cent rather than the 7-8 per cent figure we were suffering at the end of 1976!

The Administration's economic package is inefficient and ill-focused in its heavy emphasis on income tax rebates. Well established economic theory of consumer expenditures, both from the conservative quarter of Milton Friedman and the Keynesian side of Franco Modigliani, should remind us that temporary changes in tax rates are likely to have only slow and modest effects upon demand.

The Administration's business tax reductions are unfortunate, however, not essentially because they are presumed to lower the tax burden on business but rather because of their nature. There is no point to a further windfall in widening the already notorious investment tax credit loophole, allegedly to stimulate business investment. It is highly doubtful that the \$10 billion or so this would cost annually in lost tax revenues would bring anywhere near that amount of increased investment. To the extent it does stimulate investment at all, it does so by distorting the production process, leading firms to acquire a certain amount of additional machinery that would not be profitable without the tax subsidy.

The Administration's proposal of an employment payroll tax credit of 4 per cent is, on the other hand, a step in the right direction—although so miniscule as to be a sad joke. For it is 4 per cent not of payrolls but of the 5.85 per cent of payrolls constituted by the employer payroll tax for Social Security—in other words, it amounts to only .234 per cent, or, not much more than two-tenths of 1 per cent, of actual payroll costs.

Fortunately, the House Ways and Means Committee has come up with a much more imaginative and helpful proposal which, in one form or another, I think Kirkland and the AFL-CIO would do well to look upon with favor. It would offer a 40 per cent tax credit to any firm for up to \$4,200 of wages on increases in employment above 103 per cent of employment of the previous year. This would be a major incentive to firms to hire all workers—the unemployed, the young and others about to enter or reenter the labor force. And it would involve a relatively modest loss of revenues and windfall to firms who are not serving the purpose of increasing employment more than they would otherwise.

The Ways and Means Committee amendment could be improved by modifying, raising or eliminating the \$40,000 limit of the

tax credit per firm, which generally eliminates its effect on large companies. It might also be improved by raising the \$4,200 tax credit base per worker. Otherwise firms may in fact be unduly encouraged to hire partime workers, or workers for part of the year, rather than to generate genuinely full employment.

The House Committee's proposal is not necessarily a substitute for the public employment Kirkland and the AFL-CIO recommend. But it represents a very hopeful direction in which to move, with the potential for becoming a major step bringing the private sector of the economy up to its full potential. Compared to the tax rebates and investment credits that are such tired, inadequate echoes of the past, it offers a new direct focus on our number one economic problem: getting this nation to work again. It also has the secondary yet not trivial advantage of doing so by lowering the critical marginal labor cost to employers, and hence actually working to lower prices and combat inflation.

William P. Kenan. Professor of Economics, Northwestern University. EVANSTON, ILL.

BRUCE McLAURY OF THE BROOK-INGS INSTITUTION

Mr. ANDERSON. Mr. President, in January, Bruce McLaury resigned as president of the Ninth Federal Reserve District headquartered in Minneapolis to assume the presidency of the Brookings Institution. Mr. McLaury's distinguished credentials and extensive experience have more than qualified him for this important position. Mr. President, I ask unanimous consent that an article about Mr. McLaury and the Brookings Institution that appeared in the New York Times on Sunday, April 3, 1977, be printed in the RECORD. The article discusses Mr. McLaury's goals as the fourth president of Brookings and some of the many contributions of the institution to the Federal Government.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

Taking Over the Helm at Brookings (By Clyde H. Farnsworth)

Washington.—Just about the time a man from Plains, Ga., moved in at 1600 Pennsylvania Avenue, a man from Minneapolis turned up at 1775 Massachusetts Avenue at what is sometimes called "the other Government." No long lines of tourists wait outside 1775 Massachusetts Avenue, the home of the Brookings Institution. It represents not raw power, as the White House does, but the genteel influence of a university without students.

Bruce K. McLaury, the man from Minneapolis, and the 31 Brookings senior fellows and 16 research associates operate in an area of tree-lined streets and stately houses known as Embassy Row. The Brookings building itself, however, is an undistinguished modern office structure set behind a row of potted evergreens. There's a story about a drunk who wandered inside one day and remarked that it was the loveliest hospital he'd

"If I had been on the hustings like Carter, I too would have had a program," said the 45-year-old Mr. McLaury, a Harvard Ph. D. He arrived here from the presidency of the Federal Reserve Bank of Minneapolis to become the fourth president of the Brookings Institution in the 50 years since it was founded. He added that he was only joking—

Brockings is not an organization that is like-'ly to run out of programs.

The Brookings Institution harbors individuals working on questions of government policy, thanks to the gift of its founder, Robert Somers Brookings. This St. Louis manufacturer of wood products was appalled at the gulf he had found between academic research and the Federal bureaucracy.

The organization's influence lies in its fellows and the works they publish on economics, taxation, defense and foreign affairs. These books and pamphlets are not best sellers, but they are read in the intellectual establishment and in the corridors of power. Pressure on the fellows is much the same as on professors at a university. Robert Solomon, who came to Brookings last year from the Federal Reserve Board, noted, "You publish or perish."

From Brookings came the idea of Congressional budget reform, which in 1974 became a law setting up machinery for better control over revenues and spending. Alice P. Rivlin, a former Brookings fellow, is now chief of the Congressional Budget Office, which monitors the reform procedures.

Joseph A. Pechman, director of economic studies at Brookings, is known as the high priest of revenue sharing. His work contributed to the development of the mid-1960's in which the states were given nostrings-attached Federal funds.

Charles L. Schultze was a senior fellow specializing in anti-inflation policies who had been budget director during the Johnson Administration. He is now chairman of President Carter's Council of Economic Advisers. (When Richard M. Nixon was President, he also tapped Brockings for a chairman of the council, Herbert Stein.) Mr. Schultze is one of half a dozen Brockings fellows in the present Administration.

Emil M. Sunley Jr., a Brookings tax specialist, is now Deputy Assistant Secretary of the Treasury for Tax Policy. C. Fred Bergstein, senior fellow in foreign economic policy studies, has become Assistant Secretary of the

Treasury for International Affairs.

Henry J. Aaron, who once did a study for Brookings called "Why Welfare Is So Hard to Reform," has joined the Department of Health, Education and Welfare as an Assistant Secretary and is chief of the Administration's welfare study group. Two other Brookings fellows also joined H.E.W.—Karen Davis, deputy assistant to Mr. Aaron, and Thomas D. Morris, special assistant to the Secretary of H.E.W.

The pendulum swings from Brockings to the Government, but it also swings back. From the Ford Administration came A. James Reichley, who was a special assistant to the White House chief of staff, Richard B. Cheney. Mr. Reichley is now a senior fellow in governmental studies.

Arthur M. Okun, who was chairman of the Council of Economic Advisers under President Johnson, now edits with George L. Perry the influential Brookings Papers on Economic Activity, a three-times-a-year journal for professional economists. It goes to 5,000 subscribers.

Stephen Hess came to Brookings after serving as a speech writer for President Elsenhower and as a domestic adviser in the Nixon Administration. Mr. Hess, the author of a Brookings study entitled "Organizing the Presidency," advised Jimmy Carter during the transition period after last fall's election.

Although there are a few Republicans at the Brookings Institution, it seems to be mainly a haven for Democrats. One reason is that, although there is a wide mixture of ideas at Brookings, neo-Keynesian liberal views tend to dominate. John Maynard Keynes was an advocate of governmental stimuli, including deficit spending. Mr. Okun observes, "Just as it's difficult for Mil-

ton Friedman to get Keynesians at the University of Chicago, so it is difficult for us to get monetarists to come here." Professor Friedman is considered the apostle of the monetarist theory of economics.

There is another reason for the scarcity of Republicans at Brookings: Most practitioners of economics simply turn out to be Democrats. Paul W. McCracken, a Republican who served for a while as chairman of President Nixon's Council of Economic Advisers, wryly referred to this phenomenon in a recent speech: "You are looking at a significant proportion of the Republican economics profession."

Washington, does, however, have a fast-growing conservative think tank, the American Enterprises Institute. Former President Ford has just taken a job there, along with several other officials from his Administration. These include Robert Bork, former solicitor General, and Rudolph G. Penner, former deputy associate director for economic policy at the Office of Management and Budget.

As Brookings president, Mr. McLaury succeeds Kermit Gordon, who died last year. Mr. Gordon had been Budget Director in the Johnson Administration.

"Under Bruce we expect to do pretty much as we did under Kermit," says Philip Tresize, a senior fellow studying questions of international economic policy. "We are independent critics and commentators on public policy, and I don't see us being any less independent with a change in administration here or at the White House." Mr. Tresize, a former State Department official, was envoy to the Organization for Economic Cooperation and Development in Paris in the late 1960's.

President Nixon's chief domestic adviser, John D. Ehrlichman, castigated a 468-page Brookings analysis of alternatives for the 1973 Federal budget. This helped the analysis become one of the best sellers (36,000 copies) in the Institution's history. The book held that the nation's economic growth was not adequate to support new Federal programs. Its authors were Mrs. Rivlin, Benjamin A. Okner, Robert D. Reischauer (who now serves with Mrs. Rivlin at the Congressional Budget Office) and Nancy Teeters (who has become chief economist for the House Budget Committee).

While things may go on at Brookings in the quiet unflappable manner of past years, some eyebrows have been raised by the fact that the new president, unlike most of the fellows, is a registered Republican. But as a public servant most of his adult life, Mr. McLaury has never taken an active role in politics. Some say his lack of strong partisanship helped him land his new job.

Smitten by the Kennedy image in the early 1960's, Mr. McLaury came to Washington for the first time to work for Robert V. Roosa, who was Under Secretary of the Treasury for Monetary Affairs. Mr. Roosa is now a partner in Brown Brothers Harriman & Company, the Wall Street investment banking house, and also chairman of the Brookings board of trustees. He offered the post to Mr. McLaury last November.

Most of Mr. McLaury's career has been spent in the Federal Reserve System, first at the Federal Reserve Bank of New York and then at Minneapolis.

His philosophy, he said, "puts a premium on financial stability and paying for what gets done, and this colors my view of the world." He has been influenced by what his Brookings colleague Mr. Okun calls the equality-efficiency tradeoff.

Mr. McLaury commented that there were recognized limits to what social programs could accomplish. What he sees as a task of Brookings is to determine how far the Government should go in providing incentives to

encourage greater output, as distinguished from transferring income.

"If our game is public policy research," said Mr. McLaury, "then it is essential that we know the rules from the inside."

Brookings is a nonprofit, tax-exempt or-

Brookings is a nonprofit, tax-exempt organization with an endowment of \$35 million. The income from this account flow about 20 percent of the annual \$7 million budget. Two sizable gifts—one of \$10 million from the Ford Foundation and one of \$8 million from the funder's widow, Isabel Valle Brookings—account for the bulk of the endowment, which has shrunk in recent years as a result of the decline in stock prices.

Other sources of revenues include conference fees, the sale of books, interest and dividends, rentals and corporate gifts from such contributors as Exxon and General

Mr. McLaury expects he will have to become a fund raiser to keep Brookings functioning at a smooth tempo. An earlier president, Robert D. Calkins, was largely responsible for getting Brookings its rich endowments. Mr. Gordon brought it many of its stars such as Mr. Okun, who was preparing to go back to Yale after leaving as chairman of the Council of Economic Advisers in January 1969. Mr. Okun's decision to come to Brookings helped Mr. Gordon land George Perry from the University of Minnesota.

Mr. McLaury sees his mission as a challenge. "This is often called a prestigious place," he commented. "I guess it will be up to me to sustain the word prestigious."

NATIONAL COLLABORATION FOR YOUTH CONFERENCE ON YOUTH UNEMPLOYMENT

Mr. HUMPHREY. Mr. President, last Thursday I was honored to be the keynote speaker at the National Collaboration for Youth's Conference on Youth Unemployment, held here in Washington at the DuPont Plaza Hotel.

The National Collaboration for Youth is a cooperative effort that has brought together 12 national youth serving agencies under one roof, to better coordinate their services to youths. These outstanding organizations are:

Boys' Clubs of America, Boy Scouts of America, Camp Fire Girls, Inc., 4-H Youth Programs, Future Homemakers of America, Inc., Girls Clubs of America, Inc., Girl Scouts of the U.S.A., National Federation of Settlements and Neighborhood Centers, National Jewish Welfare Board, Red Cross Youth Service Programs, National Board of YMCAs, and National Board of the YWCA.

On Thursday and Friday of last week, more than 100 members of these organizations gathered here in Washington to examine their role in Federal legislation aimed at alleviating the youth unemployment problem. In my address, I explained the important role private nonprofit youth serving agencies would play in the Comprehensive Youth Employment Act of 1977, which I introduced in January. With youth unemployment being such a source of social and economic distress, and crime, in this country, we will have to depend heavily on these agencies to help in the creation of imaginative and effective youth programs.

Mr. President, I ask unanimous consent that my speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the Record, as follows:

REMARKS OF SENATOR HUBERT H. HUMPHREY

Thank you very much for inviting me to be a part of your Consultation on Youth Employment.

The organizations which make up the National Collaboration for Youth have an outstanding record of service to our nation's young people. The fact that you have taken time to hold this conference on youth unemployment demonstrates your willingness to take a leadership role in solving this tragic problem.

The young people of this country are fortunate to have such proven friends. The service to youth provided by organizations such as yours is the major reason why the Comprehensive Youth Employment Act of 1977, which I introduced in January, depends very heavily on nonprofit youth agencies as a prime source of job creation, job training and job counseling programs. You have had an outstanding record in the past, and that gives me great confidence that you will continue your outstanding performance in the future.

Now, more than ever, the youth of our nation need your help. All across the country, unemployment has dealt a devastating blow to the hopes and aspirations of our

people. In February, the unemployment rate among teenagers 16 to 19 years old was 18.5 percent, compared to 5.2 percent among adults 25 years old and over. Among black teenagers, the unemployment rate was 37.2 percent and, in many of our central cities, disadvantaged youths experience an unemployment rate that exceeds 60 percent.

There are 3.3 million young Americans under the age of 25 who want to work today, who are knocking on doors that remain closed to them. Ready, willing and able to work, they have no jobs.

And, let me add that there are hundreds of thousands of youths who have become so discouraged by the lack of jobs that they have just given up looking. Of course, these young people don't even show up in the "official" statistics.

This is a national tragedy and unconscionable waste of one of our nation's most valuable resources. Almost every teenager and young adult I've met wants desperately to work and to be accepted as a productive and useful member of our society. They want jobs, they want to be productive, they want to earn their way, they want to be given a fighting chance.

Unemployment cheats them out of all this. Joblessness tells our young people that there is no productive role for them. It tells them that they will have to wait—often for years—before we will admit them to adulthood, years before they can earn their own income and become contributors to our national economic life. I'm sure each of you has had daily experiences with the personal burdens of unemployed youth—the feelings of alienation, apathy and anger that accompany their deep frustrations.

The costs of this are enormous. Almost half a million of our unemployed young people are household heads, many with dependent children, but without the savings or unemployment benefits that many older workers can depend on until they find a new job.

How do you face your wife, your children and yourself when confronted with such a personal and economic calamity?

The economic loss is staggering—youth unemployment is now costing America, \$10 billion each year in lost income and pro-

But by far the largest cost to our youth is that joblessness denies them the opportunity to develop the basic work skills and work habits needed for employment while they are

In an economic situation which provides too few teenage jobs, how are our young people going to get the experience needed to perform adult jobs, or even the chance to break into the entry-level jobs that begin the career ladder in our nation's branesses and in government?

If we do not move swiftly to provide jobs for our youth, we may well end up in the 1980's and 1990's not only with a youth unemployment problem, but with a whole generation of middle-age Americans who have little or no job skills and who will need total rehabilitation to become productive and self-supporting workers.

In addition, youth unemployment is a major source of crime. In 1975, the last year for which we have comprehensive figures, 55 percent of all those arrested for crimes were under the age of 25. Seventy-five percent of arrests for serious crime involved youths under the age of 25. Youth made up 60 percent of those arrested for rape, 75 percent of those arrested for arson and robbery, and 35 percent of those arrested for vandalism, burglary and auto theft.

Most often, these crimes are committed by young people who have nothing valuable or productive to do and who have been totally alienated from the mainstream of our society and our economy. Young people who don't have productive jobs turn to the "shadow economy" of the dark streets and the back alleys in order to get by. They get into trouble. They destroy their own lives and become a lethal social cancer. There is no way that we can reduce or eliminate crime in this country until we solve the problem of youth unemployment.

The most direct and rapid way of alleviating youth unemployment is through specially targeted youth employment programs. Economic recovery alone will not be sufficient.

Too many young people live in decaying central cities or in rural areas where there are just no jobs to be had by youths or adults.

Many youth have failed in, or been failed by, our educational institutions, and have no marketable job skills and no way of obtaining skills.

The decline in small business, and the use by employers of artificial educational or experience requirements for jobs, also have worked to eliminate youth jobs.

Even if new employment opportunities open up as the economy improves, these structural problems will continue to plague our youth and deny them the jobs and work they need and deserve.

Only by creating useful and productive jobs that are specifically targeted at unemployed youth can we break the vicious cycle that denies jobs to young people because they are inexperienced or have poor skills.

The people of this country know that youth unemployment has become a major problem and needs a major solution. One of the most popular actions Congress could take this year would be to enact a youth employment pro-

A Gallup poll taken in January showed that 85 percent of those interviewed favored a youth employment program—one of the highest favorable ratings on any issue ever tested by the Gallup poll. Among youth, 95 percent were in favor. Clearly, our young people are eager to go to work.

I think Congress and the President have gotten the message. A number of major youth employment bills have been introduced in this Congress, and almost half of the members of the Senate—Republicans and Democrats alike—have sponsored or co-sponsored youth employment legislation. The Senate Human Resources Committee has shown its commitment to youth by unanimously voting to recomment \$2.5 billion in fiscal 1978 budget for a new youth employment program.

a new youth employment program.

The President also is fully aware of the serious extent of unemployment among youth. During February and March, I and a number of other Senators worked closely with President Carter and Labor Secretary Ray Marshall to develop a comprehensive youth employment program.

On March 9, as a result of our meetings, President Carter sent Congress a message outlining his proposals for the youth employ-ment bill. We expect to have the bill any day now, and the Human Resources Committee will begin hearings on it right away.

The President's proposals contained in his message should make for a very effective pro-

gram.

First, we will have a National Youth Conservation Corps that will employ young Americans in conservation programs in public parks, forest and recreation areas. Second, we will have a problem of youth

community improvement projects that will employ young people to improve neighborhoods and communities and to maintain and restore natural resources on publicly owned land.

Third, we will have a major new comprehensive youth employment and training initiative which will provide a broad range of job creation, job training, and job counseling programs for our nation's unemployed youth.

This is an outstanding package and a great credit to the President. As soon as we have his bill, I am confident that the Senate will move

swiftly on it.

Many of the President's proposals reflect the general principles embodied in the Com-prehensive Youth Employment Act of 1977, which I and my friend, Senator Javits, co-

First, the jobs that are created by the bill, whether they are in the private or public sector, must be useful and productive. Young people don't want make-work jobs any more than you or I do. The best way of insuring this is to have special projects initiated by local organizations that are concerned with youth.

We do this now with our summer program in Minnesota. We have a Center for Community Action that has employed 7,000 disadvantaged youth since 1971. They have built trails, constructed bridges, created picnic areas, and greatly expanded the recreational facilities available.

These young people take great pride in their work, and they should, because the people of Minneapolis, St. Paul, Hennepin and

Ramsey Counties value it.

These types of projects, and other programs to rehabilitate housing, repair railroad beds, provide day care for neighborhood children, and anything else that needs to be done at the local level, could provide useful work for hundreds of thousands of unemployed youth nationwide each year.

Second, the jobs must provide some useful

training.

Young people need to know how to get to work on time each morning, how to follow directions, and how to work cooperatively with others. These are the most basic skills, and they can't be learned sitting at home or on a street corner.

In addition, more specific skills also should taught-construction skills, mechanical

be taught should be taught as part of the job.

Third, we should provide both full-time and part-time jobs, in both the private and public sectors. Out-of-school youth need full-time work, and in-school youth need part-time work, often so they can stay in school. We shouldn't ignore either group.

We should expand our work-study programs to give secondary school youth a chance to include part-time work in their educational programs. We also should expand our on-the-job training programs in the private sector, since 85 percent of the young people in this country will depend on the private sector for jobs.

Finally, we must upgrade the job counseling and placement services available to our youth.

More and better trained professional counselors should be placed in our high schools and junior colleges. And a national databank on entry level jobs should be set up, connected to computer terminals in locations that are convenient to youth. We have got to bring our employers and our young people back together again.

In all of these programs, your organizations would be among the strongest focal points for leadership in your communities.

Your organizations know what is needed at the local level and what projects could provide useful work for young people. You have worked closely with young people for decades and know their needs. You can go out and use your experience and imagination to make sure that these programs work for our young people.

We need you. And our young people need you more than ever. I shall make every effort to assure that you are deeply involved in

our youth employment programs.

NOISE POLLUTION

Mr. ANDERSON. Mr. President, there is growing concern in the United States about the problems of noise pollution. The Congress recognized the health and safety problems of excessive occupational and residential exposure to noise with the passage of the Noise Control Act of 1972. In Minnesota, extensive attention has been given to the problems of noise in the environment, particularly highway and airport noise. State legislation was enacted in 1971, upon my recommendation as Governor, to provide jurisdiction over noise to the Minnesota Pollution Control Agency. The Pollution Control Agency subsequently established a noise control program. The Minnesota experience with the problems of noise pollution is detailed, Mr. President, in an article that appeared in the St. Paul Pioneer Press on March 27, 1977. I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NOISE POLLUTION (By Virginia Rybin)

When the slayer of a woman and two children becomes a sympathetic character, one might wonder just what the victims did to prompt the killings.

This happened recently in Japan, and the motive was nothing more than a loud piano.

The story is a vivid illustration of two major points made by Al Perez of the Minnesota Pollution Control Agency (PCA) in his basic sermon on the evils of noise.

Perez, chief of the PCA's Noise Pollution Control Section, emphasizes that noise has effects besides hearing loss and is consid-

ered a major irritant by virtually everybody. He said the Japanese story, related recently in a national U.S. publication, involved a man who asked that the children next door quiet down their piano-playing. When his request was not heeded, he killed the two children and their mother.

A defense fund was established for him, Perez said, and many people indicated that they could understand his outrage.

Extreme reactions like that of the Japanese man to noise irritation are not as rare as one might think, Perez said. But probably the most interesting thing about the story, he added, is the fact that so many people could express sympathy in spite of what he had done.

It may be surprising, but it correlates with U.S. Census Bureau study last year in which Americans named noise as their biggest complaint about their neighborhoods.

Casual observation alone will reveal that the noise to which Americans are exposed is growing from year to year. With that growth, studies indicate, has come an increase in environment related hearing impairments, along with side effects ranging from high blood pressure to mental upsets.

What is being done about the problem? There is some governmental regulation. though it is limited by small allocations of money and staff to this area of pollution. But public awareness of the dangers and pressure to do something about the problem may be a factor in bringing about more stringent regulation in the near future.

"Noise is no longer as acceptable." said Lee Wilson, St. Paul audiologist. People observe employes retiring after years of noisy jobs and having their final years marred by poor or totally lost hearing, he said, and they are unwilling to accept this as the status quo.

For regulation purposes, Perez divides into three categories-occupational, environmental and recreational.

Federal noise standards have been set for on-the-job noises, and they are enforced by the state Department of Labor and Industry. The second category is under the jurisdiction of the PCA and the federal Environmental Protection Agency (EPA).

Exposure to recreational noises, such as rock concerts, is a matter of choice, Perez noted, and about all that can be done is to inform people of the potential dangers.

In the Noise Control Act of 1972, Congress recognized that "inadequately controlled noise presents a growing danger to the health and welfare of the nation's population . . ." The act directed the EPA administrator to develop and publish noise regulations. State legislation authorized the PCA to adopt similar rules.

Two of the current state regulations set general standards, while a third gives specific noise limits for motor vehicles. They can be enforced and are to some degree, but the staff devoted to the noise pollution area is limited, Perez said. (He is the only fulltime professional employe and his student help which usually does not amount to enough hours to equal the work of another full-time person.)

The cost of enforcement is a factor locally, he said. The city official who has noise enforcement authority is likely to be responsible for hygiene and other areas, Perez said, and thus will not have much time to devote

to fighting noise pollution.

The PCA is trying to concentrate on those areas like highways which involve more than one community and leave local problems to city officials, he said. Those include one of most common complaints of city residents-barking dogs.

Though enforcement has been limited, Perez feels the PCA and EPA efforts have had effects beyond those efforts. He cited freeway barriers and quieter takeoff procedures at Minneapolis-St. Paul International Airport. People are trying to comply with the regulations, he said, partly in recognition of the likelihood that more enforcement will come.

This year, PCA plans call for adopting regulations involving airports and highways; they would include timetables for compli-

Perez said transportation is the chief source of environmental pollution when one takes intensity, duration and number of persons affected into account.

About 150,000 people live in the area affected by noise connected with Minneapolis-St. Paul International Airport, he said. About half are in Dakota County (mostly in Eagan), 5 per cent in St. Paul, 15 per cent in Minneapolis, and the remaining 30 per cent in Bloomington and Richfield.

The EPA is concerned mostly with regulating vehicles at the manufacturing level, Perez said, while the PCA concentrates on mon-

itoring after they are operating.

The PCA has planted devices temporarily in homes to measure airport noise. The agency also is studying the effects of high-way barriers by testing noise levels in homes near the sites where they will be built. The homes will be checked after construction.

The PCA has recorded more than 1,000 noise complaints since Perez' office opened some three years ago. He said about one in four are recorded, so there have been at least 4.000.

In most cases, it is suggested that the callers seek help at the local level, he said, and they are given contacts in their com-munities. The PCA does respond to citizen noise complaints but normally picks the unusual or those which affect large numbers because its resources are limited.

City noise ordinances are getting better, he said, and Minneapolis has a good one. It was that city which took action against Gould, Inc., for noise pollution. St. Paul does not have an ordinance. Perez said the noise problem caused by the lead oxide plant, which is near the boundary of the two cities, actually was worse on the St. Paul side.

Late in 1972, City Councilman Leonard Levine tried to get a St. Paul noise ordinance passed. Hearings were held, but it was never

acted on by the council.

Levine said the ordinance was referred back to committee after being challenged by some council members as allegedly unenforceable and too restrictive of personal freedom. He said it was also argued that it would duplicate state efforts.

This was the only time such an ordinance has been introduced in St. Paul, he said, and, since that time, there has not been "a substantial amount of public support" for such

Most people at hearings on the proposal expressed concern about airports and rail-roads, and, when they found that those were covered by federal standards, some walked

out, Levine said.

Perez, however, said federal regulations do not cover the entire airport and railroad problem. The EPA regulates the manufacturing of vehicles, he said, but the mat-ter of usage is up to state and local governments. Even a quiet vehicle could be a noise irritant if it were idling in one place long enough, he explained.

State standards can be enforced by cities, Perez said, but the municipalities cannot levy fines unless they have ordinances. These fines can be fairly easily levied through a tagging procedure, he said, while the state cannot issue tags and must go through a complicated civil procedure if polluters do

not comply voluntarily.

Ken Dzugan, city environmental planner, said St. Paul has no personnel enforcing state noise regulations. The city abolished its pollution control bureau some time ago.

Levine said there is a "cumbersome procedure" under which five adults can bring a nuisance complaint to the city attorney's office, and this could be used in noise cases.

In the occupational area, Minnesota has adopted the federal standard, which sets a maximum level of 90 decibels for eight hours if no hearing protection is provided. (These decibels are on the so-called "A" scale used in the noise pollution field. Scientists in other fields use different scales, Perez said.)

The maximum decibel rating allowed is higher when the time of exposure is reduced and lower when it is increased, said Ivan Russell, occupational safety and health di-rector for the state Department of Labor and

Russell heads a staff of about 40 state in-

spectors, who are responsible for checking machine safety, air contamination and a variety of other items besides noise pollution.

He said the inspectors do routine investigations and act on complaints. Citations can be issued, and state law allows for fines, he said, but the imposition of penalties is not common.

There is a federal proposal to reduce the maximum for eight hours to 85 decibels. Russell noted that decibels are logarithms (exponents which indicate the power to which a number must be raised to produce a given number), and this therefore would mean a substantial decrease in noise. The level of a sound doubles when it goes up three decibels, he said.

The proposed decrease has had major opposition from industry, whose representatives say it is not feasible to get noise down to that level, he said.

THE NINTH ANNIVERSARY OF THE ASSASSINATION OF DR. MARTIN LUTHER KING, JR.

Mr. MATHIAS. Mr. President, today is the ninth anniversary of the assassination of Dr. Martin Luther King, Jr. May I suggest that we take a moment to remember this great champion of civil rights and peaceful change as he, himself, wanted to be remembered.

Dr. King once was asked what he would like to be said about him after his death. He replied with great simplicity:

Say that I tried to love and serve humanity . . . say that I was a drum major for peace and righteousness.

We can say that and much, much

CHALLENGES OF WORLD FOOD AND POPULATION PROBLEMS

Mr. KENNEDY. Mr. President, the current efforts of both the Congress and the administration to review and revamp our Nation's basic foreign assistance programs and policies comes at a time when significant new trends are developing in the fundamental areas of world food and population problems.

This Sunday's Boston Globe carries a timely editorial which comments on many of these important issues and looks beyond the Green Revolution, which was to, but did not, significantly change the developmental challenges facing mankind.

As the editorial notes, the future of American efforts in this area "lies not so much in technological breakthrough, massive agricultural production or humanitarian efforts, as it does in inter-national planning. The present effort in the Sahel region of Africa, where virtually every developed nation in the world is cooperating with the six Sahel nations in a long-term development program, may be the wave of the future."

Mr. President, I commend to the attention of the Senate the thoughtful editorial in the Boston Sunday Globe, and ask unanimous consent that it be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

AFTER THE GREEN REVOLUTION

The growth rate of the world's population is beginning to slow down and since 1974

the three greatest grain producers—the United States, the Soviet Union and India have had bumper crops. But in terms of world hunger it is not a time for relaxed optimism. Populations are still growing, although at a slower rate, and fuel, including the firewood that the rural peoples of Africa and Asia depend upon for cooking and the petroleum that goes into chemical fertilizers, is growing more scarce and more expensive the time. A second Green Revolution, such as that which some scientists think can be sparked by genetic engineering, is far in the future if, indeed, it is a possibility at all.

Technology can help buy time, as it has in the past, but ultimately there are three paths the world must follow if the food and population problem is to be solved. First, national and international policies on the growth and distribution of grain must be established. Second, the richer countries must help the poorer countries to become self-sufficient. Third, more must be done to slow population growth.

The original Green Revolution came in the mid-Sixtles when food production was rapidly falling behind population growth in most of the developing countries. The monsoons had failed for two successive years in India and Pakistan and the world's food reserves had been seriously diminished. At this crucial point the new high-yielding varieties of rice and wheat began to be planted here and abroad. Their use spread like wildfire and in just a few years harvests soared nearly everywhere they were introduced.

The Green Revolution's most enthusiastic champions predicted an end to hunger but hadn't counted on the energy crisis of 1973-74, which greatly raised the costs of transportation, the operation of agricultural machinery and the manufacture of fertilizer. Drought conditions in Asia, Africa and Latin America increased the burden

Sometimes the Green Revolution itself is blamed for the setback. Critics say the new grains benefited the big farmers at the expense of the small and created vulnerable social and economic situations. They have also claimed that there was no per capita improvement in the amount of food raised in the developing countries.

Without the Green Revolution, on the other hand, there could have been a per capita decline in food production and a worldwide famine. As Lester Brown of Worldwatch Institute has pointed out, the Green Revolution may not have been a permanent solution to the food problem but it has bought time—up to 15 years, he thinks— during which the world can get population growth under control.

There is evidence that population control is beginning to take place. In North America, Western Europe, East Asia and China birthrates are declining. India has taken a hard line on birth control (too hard, it turned out, for the political fortunes of Mrs. Gandhi), and previously pro-natalist countries like Mexico and Brazil have reversed their policies. Between 1970 and 1975 the population growth rate did not rise significantly in any part of the world, although it is still by no means stabilized.

When people have plenty to eat and can afford to enjoy a few of the amenities of life, they tend to have fewer children. That is the main reason, beyond keeping people alive, why order must be brought to food production. As the world's greatest producer, the United States must re-establish the food reserves which were so seriously depleted by the Russian wheat deal of 1972. President Carter and Secretary of Agriculture Bob Bergland are committed to this goal, although they have not yet said how they will

In the Nixon and Ford Administrations our policy was to keep food reserves low because their existence had a tendency to depres farm prices which, in turn, discouraged

farmers from increasing their acreage. In consequence, farm prices soared (wheat export prices tripled in a year) and Third World countries were hardpressed to buy grain just when they needed it most. Any Carter plan must at once guarantee adequate price supports for American farmers and keep prices down for poor foreign customers

The United States cannot be expected to solve the world food problem unilaterally. We now account for half the world's grain exports, having actually doubled our production between 1970 and 1976, but we could be in a dangerous position if the world holds us responsible for every threat of famine. For that reason the Carter Administration must promote the establishment of international grain reserves and encourage the poorer nations to produce more food on their own.

Another look should be taken at PL 480, the so-called Food for Peace program, which is up for renewal in Congress this month. Begun in 1954 as a means of reducing the nation's huge post-war agricultural surplus, it has accounted for the export of \$26 billion worth of low-cost and free food since then. PL 480 has been known best for its humanitarian goals but it has been used more often as a political tool. As the Interreligious Taskforce on US Food Policy recently pointed out, the "less needy but politically favored" countries such as Korea, Chile and Portugal are apt to get priority consideration. During the food crisis of 1973-74, the United States actually reduced its food aid to many poor countries, including Bangladesh, where thousands faced starvation. Military friends, such as Israel and South Vietnam, have also tended to benefit.

Food aid, Emma Rothschild wrote in a recent New York Times Magazine article, has sometimes served as a "disincentive" to agricultural production abroad, making it possible for governments to neglect their own farmers. Food aid has not always reached the people it was intended for, and in some cases it has upset local economies. Rothschild recommends that food aid should be gradually phased out, although, in the Fifties and Sixties, when our grain reserves were high and India's agricultural potential had not been developed, such aid was an important factor in staving off famine in Asia. In two consecutive years the United States was able to ship one-fifth of its entire wheat crop to that country.

The future of American efforts lies not so much in technological breakthrough, massive agricultural production or humanitarian efforts as it does in international planning. The present effort in the Sahel region of Africa, where virtually every developed nation in the world is cooperating with the six Sahel nations in a long-term development program, may be the wave of the future.

In the past, American and Western European nations often took a narrow and concescending approach to providing aid to the Third World. In the Sahel program, which is not expected to bear fruit until at least 1985, it has been recognized that only by bringing about fundamental changes in production and lifestyle itself will the people of the region be able to survive. The goal is to ultimately make the Sahel countries self-sufficient, but it is recognized that this will mean everything from the construction of huge dams to the negotiation of major international agreements.

Without such a broad-based program, in which all the participating nations act as partners, there might not be much hope for the Sahel. If its problems are not solved on a more or less permanent basis, it might not be possible next time to launch the major relief effort that would be needed to bail it out, and that could start a spiral of disaster from which the world might never recover.

DAIRY FARMERS—VICTIMS OF PERMANENT ECONOMIC DEPRES-SION

Mr. ANDERSON. Mr. President, recently the Washington Post tried its hand at analyzing the economics of dairy farming and complained that Secretary Bergland had been too generous in raising price supports to beleagured dairy farmers. The Post editorial missed the mark badly, perhaps because the editorial staff does not understand that dairy farmers are being victimized by a permanent economic depression.

To its credit, however, the Post has printed replies from three distinguished gentlemen who know intimately the hardships experienced by family farmers trying to make a living raising dairy herds, Robert G. Lewis is the secretary and chief economist of the Farmers Union and discusses the startling disappearance of dairy farms during the past 25 years. Congressman RICHARD Nolan of Minnesota and Congressman JIM JEFFORDS of Vermont offer a succinct and accurate analysis of the market situation which both dairy farmers and dairy consumers struggle with each day. I highly recommend these pieces to all those seriously interested in understanding the realities of the dairy market.

Mr. President, I ask unanimous consent that both articles be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

Family-Farmers Face Extinction (By Robert G. Lewis)

Your March 22 editorial should have been entitled "Battering (not "Buttering Up") the Dairy Farmers." It was meanly unjust to these unusually hard-working and poorly paid citizens. But in the end, it will be consumers who will suffer if the attitude your editorial displayed should prevail and the family-farmers are at last battered into economic extinction. What a day of reckoning it will be if consumers become dependent for their milk and cheese upon a "General Foods Corporation" that fixes its prices like General Motors and the other industrial "Generals" do.

Your editorial is insensitive and shortsighted on two counts:

First, it isn't fair. The price farmers get for milk under the new price support announced by the administration (\$9 per 100 lbs.) will barely cover dairy farmers' out-ofpocket production costs and leave them returns for their labor and investment far below what any other workers and businessmen would consider acceptable. After allowing for feed produced by the dairy farmer himself at less than it cost him to produce it, and only \$2.04 to \$3.08 per hour for the farmer's labor, the U.S. Department of Agriculture found that the average cost of producing milk in the U.S. in 1976 was \$9.24 per 100 lbs. The cost will go higher in 1977. The excess of the cost above the \$9 support price will have to come out of the farmer's own hide—and his wife's and kids'.

Second, it isn't smart. Milk is extremely important to our American diet—and it's extremely big. The cost of stabilizing this vital segment of our economy must be viewed in a realistic perspective. If the cost of buying surplus products does rise to around \$70 million this year, as some predict, it should be viewed against the total wholesale value of milk and dairy products in our economy—around \$25 billion this year! The predicted

"surplus" would amount to less than three per cent of the total supply, and it's not at all certain to be that big. If the unemployment rate should drop one or two percentage points, for example, or the weather take a bad turn, this small margin of error might disappear as quick as a wink. Have you forgotten that we had a worldwide protein shortage just a few years ago? And meat? And sugar?

Twenty-five years ago there were two million farms selling milk in the United States. Six out of seven have been starved out of existence. Yes, six out of seven—only 300,000 are left, Yes, starved—dairy farmers throughout all that time never averaged as much pay for their extremey demanding and responsible labor as the legal minimum wage. Consumers in this, the world's cheapest-food country, have been eating up the farmers, the goose that lays their golden eggs. Now we can't spare any more, and it's time to stop it.

You can't make either dairy cows or dairy farmers overnight to match the short-range ups and downs of the business cycle. It would be better to pay the modest price of stabilizing and securing our independent family-worked farms than to get stuck for the far bigger cost of shortages as soon as there's a little change in the world's or the nation's economic situation.

MILK PRODUCTION: WHO WILL PAY? (By Richard Nolan and Jim Jeffords)

Your editorial criticism of Agriculture Secretary Bob Bergland's decision to raise government milk price supports "(Buttering Up the Dairy Farmers") brings to mind the old story of the puzzled housewife who wonders, "Why do we need farmers when we have supermarkets?" The lady's statement is as illogical as The Post's editorial. While admitting that "the principle of price

While admitting that "the principle of price supports is a good and useful one," you draw the line at Secretary Bergland's "audacity" in pushing the program out of the realm of principle and into the realm of practical help for farmers who are desperately in need.

Despite The Post's statement to the contrary, Mr. Bergland is certainly aware that he is now Secretary of Agriculture and not a congressman from Minnesota. He is also aware that the adjustment to 83 per cent of parity will undoubtedly save thousands of drought-stricken small dairy farmers from having to stop producing and prevent another production cutback of the kind that drove consumer prices out of sight in late 1974.

You do not have to be a congressman or Secretary of Agriculture to realize that the old "boom-bust" food price policy is as bad for consumers as it is for farmers. You do, however, have to be at least a casual observer of recent history.

Between 1967 and 1969, price supports averaged between 83 and 87 per cent of parity. Farmers were getting a reasonably stable price for their milk (18-21 cents per half gallon) and consumers (who were paying between 52 cents and 59 cents per half gallon for the same product) were finding themselves able to plan and follow a predictable milk budget for a change.

But inflation and drought hit hard in the spring of 1972. When the price support level fell below 80 per cent of parity, farmers cut production. Dramatically higher European imports then pushed consumer prices to 80 cents per half gallon in 1974, while the market price for American farmers dropped 25 per cent!

The point, of course, is that somebody is going to have to absorb the escalating cost of milk production in this country.

Clearly, the cost of milk for consumers will always rise in proportion to the cost of producing it. But consumer prices do not go down during periods of falling farm market prices. When American farmers cut produc-tion, the difference in supply is made up through European imports. The American consumer continues to pay while the American dairy farmer continues to go out of busi-

Under Secretary Bergland's order, the Treasury will initially pay and regain a substantial share of the money through future Commodity Credit Corporation sales.

The Post's editorial is correct in pointing out that U.S. dairy farmers have succeeded in substantially increasing the amount of milk produced by an individual cow. But according to Dr. Clifford Burton, nationally recognized dairy expert at the University of Oklahoma, individual milk production per cow may be reaching an optimum level. Many of the highly productive herds producing today's milk were bred 13 years ago. Unless confidence in the pricing system is restored, production will permanently drop as those animals are slaughtered and the farmers who produced them retire or go out of business.

Minnesota, the nation's second largest dairy producing state, has already lost 34,000 farmers over the past 10 years. The cost of producing a hundredweight of milk in the Midwest now exceeds not only \$9, but \$10! The signs are clear, and if Bob Bergland learned anything as a congressman Minnesota, he learned how to read

(This concludes additional statements submitted today.)

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

SUPPLEMENTAL HOUSING AUTHOR-**IZATION ACT OF 1977**

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to the consideration of S. 1070, which the clerk will state by title.

A bill (S. 1070) to authorize additional funds for housing assistance for lower income Americans in fiscal year 1977, to extend the Federal riot reinsurance and crime insurance programs, to establish a National Commission on Neighborhoods, and for other

The Senate proceeded to consider the bill, which had been reported from the Committee on Banking, Housing, and Urban Affairs.

The PRESIDING OFFICER. The time on this bill for debate is limited to 2 hours, to be equally divided and controlled by the Senator from Wisconsin (Mr. PROXMIRE) and the Senator from Massachusetts (Mr. BROOKE), with debate on any amendment in the first degree, except an amendment by the Senator from New York (Mr. Javits) on which there shall be 2 hours debate, limited to 1 hour, and with debate on any amendment in the second degree. debatable motion, appeal, or point of order limited to 20 minutes.

Who yields time?

Mr. BARTLETT. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. ROBERT C. BYRD. I yield 1 minute to the Senator from Oklahoma (Mr. BARTLETT)

Mr. BARTLETT. Mr. President, I ask unanimous consent that Ed King of my

staff be accorded the privilege of the floor during the debate and vote on this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, suggest the absence of a quorum, and ask unanimous consent that the time not be charged against either side of this first quorum call.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BARTLETT. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BARTLETT. Mr. President, I yield myself 1 minute on the bill.

Mr. President, I ask unanimous consent that Michael Maloof of Senator GRIFFIN's staff be accorded the privilege of the floor during debate and vote on this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BARTLETT. Mr. President, I suggest the absence of a quorum under the same conditions.

The PRESIDING OFFICER. Under the same circumstances, without the time being charged against the bill?

Mr. BARTLETT. Yes. The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The assist legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without

objection, it is so ordered.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the following members of the staff of the Committee on Banking, Housing, and Urban Affairs be permitted access to the Senate floor during the debate and voting on this measure: Robert Malakoff, Jo Ann Barefoot, Michael Barton, Ken McLean, Robert Kuttner, and Susan Kinsman.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, the Committee on Banking, Housing, and Urban Affairs has reported favorably S. 1070, the Supplemental Housing Authorization Act of 1977, which I understand is the pending bill.

The bill contains two titles, both of which I believe are noncontroversial. I will outline its provisions briefly, as follows

The first part of the bill contains supplemental authorizations for several programs of the Department of Housing and Urban Development. The committee has, for the most part, accepted the recommendations of the Department of Housing and Urban Development in approving these increases.

First, the bill would increase the authorization for section 8 rental assistance by \$378 million to a total of \$1,228,050,-000. Section 8 is our major housing program for lower income Americans, and this increase is necessary to bring its activity up to levels which have been planned by both the Ford and Carter administrations.

Second, the bill increases operating subsidy funds for public housing projects by \$19.6 million to pay for this winter's unexpectedly high heating costs.

Third, the bill extends the contract period for new, privately developed section 8 housing from 20 to 30 years. At present, the Government only commits to assist these units for 20 years, thus discouraging private lenders from financing section 8 with conventional loans which typically have at least a 30-year maturity. This change, requested by HUD, is designed to attract more private financing.

Fourth, the bill authorizes such appropriations as may be necessary for reimbursement of the FHA general insurance fund for losses on the sale of foreclosed properties from the FHA inventory. These losses are the result of the maladministration of the FHA programs in the late 1960's and early 1970's. While the administrative problems have been corrected for the most part, the losses must still be paid for today.

Fifth, the bill contains an increase of \$10 million, to a total of \$15 million, for the HUD urban homesteading program. Urban homesteading is a highly popular and effective plan by which HUD-foreclosed houses are sold at nominal cost to people who agree to live in them and fix them up. It is one way to dispose of the HUD inventory of foreclosed properties I mentioned above. The program has also been effective in attracting additional rehabilitation funds into neighborhoods, thus having a broad stabilizing effect. The \$10 million will provide for an additional 3,000 homestead units.

The final section of title I deals with the extension of existing Federal crime and riot insurance programs. Since 1968, the Federal Government has provided reinsurance of private insurance for properties located in areas which may be vulnerable to civil disorder, and thus may otherwise have difficulty obtaining insurance. While such disorders have, fortunately, diminished in recent years, the committee believes that the Federal Government should continue to reinsure these properties, since the program has been highly effective thus far, and since property insurance is essential to the health of urban areas.

The Federal crime insurance program offers direct Federal property insurance in areas where private companies do not offer it because of high crime rates. This program has not been widely used thus far, but HUD is intending to strengthen it through administrative changes. The committee believes that the availability of this insurance is critical to retaining and attracting small business and property owners in the inner city, and rec-ommends continuation of the program.

The bill extends HUD's ability to write crime insurance and riot reinsurance policies through April 30, 1978, and would authorize continuation of policies in force before September 30, 1978, through April 30, 1981.

Finally, title II of the bill would authorize creation of a Presidential Commission on Neighborhood Policy.

One of the most exciting trends in urban policy today is the new interest in developing city neighborhoods on a human scale. Policymakers are discovering that there are inner-city areas throughout the country that the residents truly care about, and that this sense of local neighborhood is the strongest possible foundation for rebuilding cities.

Much of the credit for defining the neighborhood issue and conceiving this commission as a unique citizens' panel rather than the usual body of credentialed experts belongs to Dr. Arthur Naparstek of the University of Southern California, to Gale Cincotta—who incidentally is an organizer in the Chicago area who has testified a number of times and has greatly impressed the committee—and the neighborhood groups around the country who have joined together to form National Peoples Action, and to Msgr. Geno Baroni, of the National Center for Urban Ethnic Affairs.

Father Baroni has recently been appointed an Assistant Secretary of HUD in charge of liaison with neighborhood groups. We anticipate that he will also be the administration's liaison with the Commission, and I could not think of a better person for President Carter to

have picked for that role.

This bill would create a Presidential Commission to consider ways in which public policy at the Federal, State, and local level can enhance these neighborhood environments, or can cease to undermine them. The Commission will report to the President in 1 year on how

our policies can be improved.

Mr. BROOKE. Mr. President, the distinguished chairman of the Banking Committee (Mr. Proxmire) has already made his statement outlining all of the provisions of the Supplemental Housing Authorization Act of 1977. I would like to highlight some of the important objectives of this bill, which I think will help meet the housing needs throughout the country.

The most innovative provision of the bill, in my opinion, creates a National Commission on Neighborhoods. This Commission will undertake a broad review of the vitally important issues of neighborhood preservation and revitalization. It will be funded for a 1-year period at a \$1 million authorization level.

I believe that we must go beyond our "demonstration" efforts and examine the causes of neighborhood decline and the effects of Government policies, laws, and programs which have an impact on our neighborhoods. I cosponsored Senate 417, the original bill providing for the Commission, which was incorporated in this Supplemental Authorization Act. And I think that the Commission can play a significant role in developing a policy to encourage conservation of our urban neighborhoods.

This Commission would study the current programs which affect our neighborhoods and make recommendations regarding encouragement of reinvestment in local communities, promotion of better maintenance and management in existing housing, and reorientation of our ef-

forts to better support the objectives of neighborhood preservation. The Neighborhood Commission would be composed primarily of neighborhood leaders and local officials who understand the concerns of local community residents. It will report its recommendations to Congress and the President within a year.

This bill also authorizes an increase in funding for HUD's urban homesteading demonstration program, expanding the program from \$5 to \$15 million in fiscal year 1977. This is a relatively new initiative by HUD to eliminate the blight of abandoned and deteriorated properties now owned by HUD by transferring these buildings to local communities for rehabilitation and ownership by new "urban homesteaders." In my city of Boston, a demonstration program is underway in Dorchester and Mattapan, where there are a large number of HUDowned buildings. The program is not large, but we hope that it will help to preserve these neighborhoods by rehabilitating properties which currently have a negative impact on their surrounding community.

In addition, we are providing supplemental contract authority in the amount of \$378 million for the section 8 low- and moderate-income housing program and the public housing program for low-income families and the elderly. This increase in authorizations for housing assistance will allow HUD to make payments for 400,000 housing units in fiscal year 1977, which was the goal established by the Ford and Carter administrations. This additional funding will be used for new construction, rehabilitation, and existing housing. These funds are desperately needed throughout the country because there is a tremendous backlog of applications for funding of section 8 projects, particularly by State housing finance agencies, such as the Massachu-

setts House Finance Agency.

In addition, section 8 funding is essential for projects for the elderly and handicapped under the section 202 program. The availability of this supplemental funding will allow the construction of new and rehabilitated housing and to help promote greater housing choice for low- and moderate-income families and the elderly.

I am particularly pleased that this bill provides an additional \$19.6 million in public housing operating subsidies to assist local housing authorities in paying for increased utility costs due to this year's severe winter weather conditions. This authorization will ease the financial burden on our public housing authorities, many of which are already faced with severe strains in their operating budgets.

Among other provisions, this bill provides needed authority for HUD to continue to provide coverage under its crime and riot insurance programs, and expansion of the contract period for privately financed section 8 projects to 30 years. We expect that these provisions will also aid in the rebuilding efforts of our Nation's cities.

Mr. President, I urge my colleagues to approve Senate 1070, the Supplemental Housing Authorizations Act of 1977.

UP AMENDMENT NO. 143, AS MODIFIED Mr. JAVITS. Mr. President, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from New York (Mr. Javirs) proposes unprinted amendment numbered 143.

The PRESIDING OFFICER. Is the Senator from New York presenting an amendment which, under the previous order, is allowed 2 hours? Is this that amendment?

Mr. JAVITS. Mr. President, I am hopeful that it will be very brief, but let us assume it is 2 hours.

The PRESIDING OFFICER. The Senator from New York is recognized.

Mr. JAVITS. Mr. President, this amendment deletes the "workable program" requirement for the purpose of securing mortgage insurance under section 220 of the National Housing Act. The reason for this amendment is that in 1974, when the community development program was established, urban renewal was folded into that program and the workable program requirement, which was entirely in order when we had an urban renewal program per se, was no longer required for community development funding.

However, the workable program requirement still applies in section 220 mortgages and it is simply anachronistic, something that has hung on because we did not take care of eliminating it. It does cause considerable difficulty because the statutory language still prevents people who would otherwise be eligible for insurance under section 220 of the National Housing Act from getting it.

Therefore, I understand that HUD is in favor of this amendment and there is simply a need to eliminate an anachronistic requirement.

Mr. PROXMIRE. Will the Senator vield?

Mr. JAVITS. I yield.

Mr. PROXMIRE. Mr. President, what the Senator has said is correct as far as I am aware. This amendment, as I understand it, would eliminate the requirement that a section 220 project must be related to a workable program plan, so-called. The workable programs have not been required since 1974, when the urban renewal program was consolidated in the community development program. Nevertheless, the existing law still requires that section 220 housing projects have a workable program and the action of the Senator from New York would simply eliminate that archaic requirement.

I am informed that HUD has no objection to this amendment and certainly I have no objection. I think it is an improvement.

I am very much in favor of the Javits amendment.

Mr. JAVITS. Mr. President, I thank my colleague very much. We omitted two words from the amendment at the desk. I send the modification to the desk.

will report the modification, an amendment to the amendment.

The assistant legislative clerk read as follows:

In the first paragraph, after the word "and" add the words "by deleting."

The PRESIDING OFFICER. Without objection, the modification is accepted. Mr. JAVITS. I yield back my time.

Mr. PROXMIRE. Mr. President,

yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New York, as modified.

The amendment, as modified, was agreed to, as follows:

On page 3 after line 24 add a new section as follows:

MISCELLANEOUS PROVISIONS RELATING TO MORTGAGE INSURANCE PROGRAMS

SEC. 105. (a) Sec. 101(c) of Title I of the Housing Act of 1949 is amended by deleting the following words in the first sentence "and no mortgage shall be insured, and no commitment to insure a mortgage shall be issued, under section 220 of the National Housing Act, as amended," and by deleting the first proviso of that section.

(b) The National Housing Act is amended

by deleting from Sec. 220(d)(1)(A)(ii) the words "in a community respecting which the Secretary of Housing and Urban Development has made the determination provided for by section 101(c) of the Housing Act of

1949 as amended".

UP AMENDMENT NO. 144, AS MODIFIED

Mr. JAVITS. Mr. President, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from New York (Mr. Javirs) proposes an unprinted amendment No. 144.

Mr. JAVITS. Mr. President, I send a modification to the desk. The figure "4" in parentheses should appear after 221 (d) on the first line.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

After section 221(d), insert "4" in parentheses.

The PRESIDING OFFICER. The amendment is so modified.

The amendment, as modified, is as follows:

On page 3 after line 24 add a new section as follows:

SEC. 106. Sec. 221(d) (4) of the National Housing Act is amended by deleting the words "other than a mortgagor refered to in subsection (d)(3)" from the first sentence of the section.

Mr. JAVITS. Mr. President, the reason for this amendment is to give a certain class of sponsors of low and moderate income housing, to wit, public bodies, cooperatives, limited dividend corporations, private, nonprofit corporations and associations, and other comparable mortgagors approved by the Secretary. who are regulated by the Federal, State. or local laws as to rent, charges, and other methods of operation, an opportu-

The PRESIDING OFFICER. The clerk nity to get mortgages either under section 221(d)(3) or 221(d)(4).

> Because 221(d)(4) is confined to private sponsors other than those referred to in 221(d)(3), the inability to choose between the two has prevented many projects from going forward because of the need for higher cost limits which are provided by 221(d)(4).

> Obviously, the Secretary has complete discretion as to whether she will lend at all. Therefore, the applicant should not be inhibited in the first instance and should be allowed to choose as between 221(d)(3) and 221(d)(4). Yet because of the technical terms of the law, those types of limited dividends, nonprofit, et cetera, which I have described, have been limited and they have been unable to apply under 221(d) (4) and have had to confine themselves to applying under 221(d)(3).

> Now, on the cost limits, for example, a single room apartment, an efficiency,

> under 221(d)(3), the cost limit is \$16,860. Under 221(d)(4) for a comparable apartment-and they are all scaled up after that-the figure is \$18,450. That is a difference of about \$1,600, which could make or break a given project.

> Obviously, it is our desire to facilitate the construction of low- and moderateincome housing. Also we wish to encourage nonprofit and limited dividend sponsors, remembering that the Secretary has complete discretion as to whether or not to issue a mortgage at all, we believe that the change proposed by this amendment should be made and that the sponsors of low- and moderate-income housing eligible under section 221(d)(3) should be able equally, if the Secretary agrees to use section 221(d)(4)

> Mr. PROXMIRE. Mr. President, this amendment, as I understand it, would assist in the construction of moderateincome housing under 221 by making eligible limited dividend sponsors, as the Senator from New York just said. But they have to be feasible projects only under the 221(d) (4) limitation.

> The Department of HUD has looked into this. They have been working on a legal opinion which would accomplish what the Senator from New York's amendment would accomplish. But I think the Senator from New York is wise to offer his amendment because we do not know when the legal opinion will be forthcoming or the content or nature of it. I think this amendment would make it very clear what the intention of the Congress is.

> I do believe Congress originally intended to permit a broader array of sponsors to build under 221(d)(4), including limited dividend sponsors.

> Therefore, I would accept the amendment offered by Senator Javits, which would authorize all mortgagors approved by the Secretary of HUD to build needed housing with HUD insurance.

> Mr. JAVITS. I thank my colleague. Mr. President, I yield back the remander of my time.

> Mr. PROXMIRE. I yield back my time. The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New York.

The amendment was agreed to. UP AMENDMENT NO. 145

Mr. BROOKE, Mr. President, I send an amendment to the desk, for myself and Mr. KENNEDY.

The PRESIDING OFFICER. amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. BROOKE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

That (a) section 102 of the Emergency Homeowners' Relief Act is amended-

(1) by redesignating subsection (b) as subsection (c); and

(2) by inserting after subsection (a) the following:

"(b) The Congress also finds that severe localized economic distress caused by the legal claims of the Mashpee Tribe in Mashpee, Massachusetts, may require the furnishing of assistance under this Act to avoid mortgage foreclosures and distress sales

resulting from the temporary loss of employment and income."

(b) Section 103(4) of such Act is amended by inserting "national or local" before "economic conditions".

(c) (1) Section 109(b) of such Act is amended by striking out "September 30, 1977" and inserting in lieu thereof "September 30, 1978"

(2) Sections 110 and 111 of such Act are each amended by striking out "October 1, 1977" and inserting in lieu thereof "October 1, 1978".

Mr. BROOKE. Mr. President, I have sent to the desk an amendment to the Emergency Homeowners Relief Act. This amendment, which my distinguished colleague from Massachusetts (Mr. KENNEDY) is cosponsoring, would provide that the Secretary of HUD must give special attention to the severe economic needs afflicting homeowners in the town of Mashpee, Mass., where Indian land claims have clouded title to almost every residence. In the supplemental appropriations bill on Friday, we set aside \$1 million to be directed to this particularly troubled town in the event that homeowners become unable to meet their mortgage commitments. This authorizing language would change the authorizing statute so that the special conditions in Mashpee are recognized as the reasons that the special appropriation was required.

This legislation also extends the authority for the Emergency Homeowners Relief Act to the end of fiscal year 1978. This act would otherwise have expired in September of this year. It is not only the people of Mashpee who need to be assured that emergency mortgage relief could be available to them if economic conditions worsen. All people who live in economically depressed areas need the assurance that, since our economy has not yet fully recovered, further economic decline or sudden swings in economic fortunes will be cushioned by the availability of emergency help.

As my distinguished colleague from Massachusetts (Mr. KENNEDY) and I mentioned Friday when we enacted the

special appropriation for emergency relief in Mashpee, the people of Mashpee need to know they have the help and support of the Congress for the unusual economic circumstances which have befallen them. Because land claims have tied up all titles in the town, employment has dropped off swiftly. Federal agencies are currently collecting data on the sudden and profound reverses suffered in that town. But we already know that the growing resort area businesses and the prosperous real estate market which were the hallmark of Mashpee in recent years are no more. There is no development: there is no rehabilitation: there are no land sales in Mashpee. Because this resort and retirement community's economy was based on this new development and growth, the interruption of normal commerce has brought severely reduced economic circumstances to hundreds of the families.

Although, as yet, the tragedy of foreclosure has not stricken any individual, we know all too well that many are unable to meet their most basic bills. It will not be long before this situation is reflected in a mounting problem in mortgage payments. And we need to have the possibility of Federal assistance available when the problem arises and for as

long as the problem lasts.

Mr. President, in the long run it is my hope and that of my colleagues from Massachusetts that the suit in Mashpee will be settled. Negotiations are proceeding at the moment. Although there will be continuing litigation, it is the intention of both sides to continue to discuss the outlines of possible settlement, because the people who live in Mashpee cannot tolerate the severe economic hardships imposed upon them by this suit. I believe that by adding this amendment to the Emergency Homeowners Relief Act we will provide them with the support and assurance they need.

Mr. President, this is not the only legislation I will be offering to help the people of Mashpee. Nor is it the across-theboards economic solution to the town's problems. Indeed there is no such ultimate solution short of clearing titles to people's homes and businesses through settlement of the case. However, we can provide emergency help, not only to homeowners but to small businesses as well. Later this week I will be offering a comprehensive emergency loan program to provide working capital to those small businesses whose operations have been virtually suspended because of the land claims. I have been working for several weeks with the members and staff of the Senate Small Business Committee. And I believe we will be proposing solutions which will be helpful to small businesses in many sections of the country who currently are ineligible for assistance because their specific problems do not meet the criteria established in the existing emergency or disaster relief programs. However, this mortgage assistance bill is an important first step to providing some help for the people of Mashnee

I hope that the distinguished chairman of the committee (Mr. Proxmire) will find it feasible to accept this amendment.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. BROOKE. I yield.

Mr. PROXMIRE. The Senator was correct in recalling the fact that on Friday we did provide for \$1 million in the supplemental appropriation for this particular purpose, and at the time we indicated that it would be necessary for us to provide the authorization for this on the bill before us today.

I want to be sure that this amendment would limit the funds to residential mortgages and not apply to any kind of busi-

ness loan.

I understand that there will be a separate small business amendment, which the Senator from Massachusetts will offer at a later time, which would meet that particular problem. However, as the Senator knows, the basic legislation dealt only with residential mortgages; and to broaden that in any way, it seems to me, probably would require some work on the part of the committee and further inquiry as to the implications.

Mr. BROOKE. Mr. President. I thank the distinguished chairman (Mr. Prox-

MIRE) for asking the question.

I feel, as does he, that this particular amendment should be limited to residences. That is the intent of the amendment, and I want to give the distinguished chairman (Mr. PROXMIRE) every possible assurance that it extends only to residential property and does not extend to small businesses.

The chairman is also correct that I will be offering legislation in the near future which will deal with relief for small businesses, but that will be a separate legisla-

tive package.

Mr. PROXMIRE. As the Senator will recall, on Friday we amended the 1977 supplemental appropriation, meaning that the funds provided there would be made available through September 30.

Is it the Senator's intention to authorize this for a longer period of time? Would he expect to authorize relief funds throughout fiscal 1978, or would this be limited to fiscal 1977, also?

Mr. BROOKE. As I said in my statement, it is my intent to extend this pro-

gram through fiscal year 1978.

Mr. PROXMIRE. I say to the Senator from Massachusetts that the staff suggests that there are problems if we extend this for another year beyond September 30, 1977. It seems to open the door more widely to localities coming along and seeking relief funds as a result of particular local problems. This was not the original intention of the legislation, as the Senator will recall.

In this case, we do have an unusual emergency. I would not consider it a precedent; because, as the Senator has pointed out so well, the claims of these Indians are completely unanticipated. It could have a devastating effect. This basic legislation could meet the problem.

But the staff feels that if we extend this for more than a year, it may complicate the situation. They would prefer, if the Senator would permit it, to have the amendment apply only through September 30, 1977. Meanwhile, we can take a look at the situation as the months go

on and see if it is necessary for us, at a later time, to reauthorize the program for the fiscal year of 1978.

Mr. BROOKE. I am not quite sure that I understand the reasoning of the staff as to what problems there would be if we extended it beyond September 30, 1977.

I do not think that we are opening up this program to other communities with other problems in the future. As I have already stated, it is also limited to residences and not to businesses.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum, and the time be taken out of my time on the bill.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without

objection, it is so ordered.

URANIUM RADIATION REMEDIAL ACTION

Mr. ROBERT C. BYRD. Mr. President, there is one bill on the Consent Calendar that has been cleared on both sides of the aisle and that has been on the Consent Calendar for 2 or 3 days.

I ask unanimous consent that the Senate proceed to the consideration of S. 266 on the Unanimous-Consent Cal-

endar.

There being no objection, the Senate proceeded to consider the bill (S. 266) to authorize appropriations for fiscal year 1977 to the Energy Research and Development Administration in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974, which had been reported from the Committee on Energy and Natural Resources, with an amendment to strike all after the enacting clause and

insert in lieu thereof: SECTION 1. Section 101 of Public Law 92-314 is amended by striking from subsection the "Operating expenses" "\$2,110,480,000" and substituting therefor the figure "\$2,113,480,000".

SEC. 2. Section 202 of Public Law 92-314 is

amended by-

(1) striking from subsection (b) the words "four years" and substituting therefor the words "seven years", and

(2) adding the following subsections:

"(h) That payment may be made to those who undertook action of a remedial nature prior to the date of this amendment without the determination required in subsection (b) of this section and notwithstanding the requirement in subsection (c) of this section: Provided, however, That the determination whether and to what extent such payment shall be made shall be the decision of the Administration based on the recommendation of the State; that requests for such payments shall not be considered after one year from the date of this amendment: And provided further, That the United States shall be released from any mill tailings related liability or claim thereof upon such payment.

"(i) That the requirement in subsection (c) of this section that any remedial action shall be performed by the State of Colorado or its authorized contractor may be waived in advance in writing by the State with approval of the Administration: Provided, however, That the determination whether and to what extent payment shall be made shall be the decision of the administration based on the recommendation of the State: And provided further, That the United States shall be released from any mill tailings related liability or claim thereof upon such payment."

SEC. 3. Section 204 of Public Law 92-314 is amended by striking the figure "\$5,000,000" and substituting therefor the figure

"\$8,000,000".

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed, and I move to lay that motion on the table.

The motion to lay on the table was

agreed to.

The title was amended so as to read:
A bill to amend Public Law 92-314 to authorize appropriations to the Energy Research and Development Administration for financial assistance to limit radiation exposure from uranium mill tailings used for construction, and for other purposes.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the Record an excerpt from the report (No. 95–72), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE MEASURE

The purpose of the legislation is to extend a program of the Energy Research and Development Administration and to raise the authorization for the program from \$5 million to \$8 million.

The program, which was authorized under Public Law 92-314, June 16, 1972, provides financial assistance to limit radiation exposure resulting from widespread use of uranium mill tailings for construction purposes in Grand Junction, Colorado. The law calls for a cooperative arrangement with the State of Colorado whereby ERDA is authorized to provide 75 percent of the costs of the program and Colorado provides the remainder.

S. 266 extends the deadline for applying for remedial work under the program by 3 years. It also provides for reimbursement to property owners who removed mill tailings at their own expense and enables the State of Colorado to waive the requirement in Public Law 92-314 that it perform the remedial

BACKGROUND AND NEED

The need for this program arose from investigations which revealed a potential health hazard caused by the widespread use of sand containing uranium mili tailings for the construction of buildings in the Grand Junction, Colo. area. The construction sand had been taken from the site of an abandon uranium mill and was used in approximately 500 private and public buildings. Investigations revealed the potential for the entry into the structures of hazardous radon decay gas, thus posing a health hazard. Thereafter a program was organized to limit the building occupants' exposure to radiation.

Work on the affected structures began in fiscal year 1973 and thus far remedial action has been completed on approximately 250 of the 500 buildings. However only \$1,200,000 of the \$5 million authorized in fiscal year 1972 remains available for costing in fiscal year 1977. This will not be sufficient to complete remedial action on the structures that

qualify under the regulations. In order to continue the project on an efficient schedule it will be necessary to make an additional \$3,000,000 of authorization available in fiscal year 1977 by increasing the authorized level of funding to \$8 million.

LEGISLATIVE HISTORY

S. 266, as introduced by Senator Jackson for himself and Senator Baker on January 14, 1977, has not been the subject of hearings in this session. However, this legislation is identical to portions of the Conference Report to H.R. 13350, the ERDA authorization bill for fiscal year 1977, which was considered in the Senate and in the House of Representatives in the second session of the 94th Congress. The conference report failed to be acted upon in the Senate last session.

As introduced, S. 266 provides authorizations for ERDA's nuclear energy research and development programs for fiscal year 1977. Action on a recent supplemental appropriations bill has negated the requirement to enact most of the authorization in S. 266; however, the provisions of the bill as amended by the committee are necessary to permit the expenditure of funds to limit radiation exposure from uranium mill tailings.

COMMITTEE RECOMMENDATION

The Senate Committee on Energy and Natural Resources, in open business session on March 10, 1977, by unanimous vote of a quorum present recommends that the Senate pass S. 266, amended as described herein.

COMMITTEE AMENDMENTS

The Committee on Energy and Natural Resources amended S. 266 by striking all language after the enacting clause and inserting new text consisting of the language of section 203 of S. 266, as introduced.

As originally introduced, S. 266 contained authorizations for the nuclear energy research and development programs of ERDA for fiscal year 1977. Because of the recent enactment by the Congress of a supplemental appropriations bill these authorizations are no longer necessary.

However, the committee believes that the language of section 203 should be retained in order to permit the remedial activities in Colorado to go forward without unnecessary delay. The committee therefore recommends that S. 266 be amended to include the language of that section.

The committee also recommends that the title of S. 266 be changed to reflect the contents of the bill as amended.

COST AND BUDGETARY CONSIDERATIONS

The Energy Research and Development Administration has estimated that an additional \$3 million of authorization will be necessary in fiscal year 1977 to complete the remedial work. However, the actual number of structures requiring work will not be known until the air sampling program is complete. Therefore, the estimate of cost is based on average cost experience to date, and could increase eventually when engineering estimates on all eligible structures are made. In order to maintain the current activity level, \$3 million has been appropriated in fiscal year 1977. An additional \$298,000 of costs is required for a total of \$1,498,000 of costs for remedial action work in fiscal year 1977. The remaining costs of \$2,702,000 will be requested in future years.

REGULATORY IMPACT EVALUATION

In compliance with paragraph 5 of rule XXIX of the Standing Rules of the Senate the Committee makes the following evaluation of the regulatory impact which would be incurred in carrying out S. 266.

The bill is not a regulatory measure in the sense of imposing Government-established standards or significant economic responsibilities on private individuals and businesses. The program authorized by S. 266 is a continuation of a remedial construction pro-

gram administered by the Energy Research and Development Administration through a cooperative arrangement with the State of Colorado.

No personal information would be collected in administering the program. The remedial construction does involve work in private residences, but the homeowners must request that the work be done. Therefore, there would be no impact on personal privacy.

The program has been administered by ERDA since 1972 and little, if any, additional paperwork would result from the enactment

of S. 266.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum, and I ask that the time not be charged against either side on the bill.

The PRESIDING OFFICER. Without

objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. BROOKE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. RIEGLE). Without objection, it is so ordered.

SUPPLEMENTAL HOUSING AUTHOR-IZATION ACT OF 1977

The Senate continued with the consideration of the bill (S. 1070) to authororize additional funds for housing assistance for lower income Americans in fiscal year 1977, to extend the Federal riot reinsurance and crime insurance programs, to establish a National Commission on Neighborhoods, and for other purposes.

Mr. BROOKE. Mr. President, I have discussed this at some length with the chairman of the committee (Mr. Prox-Mire), and I agree that the amendment will authorize relief funds only until September 30, 1977. With that provision and the assurance of my distinguished chairman that we are concerned only with residential properties and not small businesses, I trust that the chairman would be willing to accept this amendment.

Mr. PROXMIRE. Yes, I agree whole-

heartedly with the amendment.

I want to be sure the language has been changed to reflect what the Senator from Massachusetts has agreed to.

The PRESIDING OFFICER. Will the Senator send the modification to the desk, if that is possible?

Mr. PROXMIRE. I think that is correct. I think if we strike the last two lines it will accomplish the purpose.

Mr. BROOKE. The last four lines, Mr. President. We will send that to the desk as a modification of the amendment.

The PRESIDING OFFICER. The clerk will state the modification.

The legislative clerk read as follows: The modification by the Senator from Mas-

The modification by the Senator from Massachusetts strikes the last four lines.

The PRESIDING OFFICER. The amendment is so modified.

The amendment, as modified, is as follows:

(a) Section 102 of the Emergency Homeowners' Relief Act is amended—

(1) by redesignating subsection (b) as subsection (c); and

(2) by inserting after subsection (a) the following:

"(b) The Congress also finds that severe localized economic distress caused by the legal claims of the Mashpee Tribe in Mashpee, Massachusetts, may require the furnishing of assistance under this Act to avoid mortgage foreclosures and distress sales resulting from the temporary loss of equipment and income."

(b) Section 103(4) of such Act is amended by inserting "national or local" before "eco-

nomic conditions".

Mr. BROOKE. I yield back all of my time.

Mr. PROXMIRE. I yield back my time, Mr. President.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified.

The amendment, as modified, was agreed to.

UP AMENDMENT NO. 146

Mr. BROOKE, Mr. President, I send to the desk an amendment for Senator Heinz, and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The second assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. Brooke) for Mr. Heinz proposed unprinted amendment numbered 146.

Mr. BROOKE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, strike out lines 4 through 8 and insert in lieu thereof the following:

Sec. 102. Section 519(f) of the National Housing Act is amended by striking out "\$500,000,000" and inserting in lieu thereof "\$1,000,000,000".

Mr. BROOKE. Mr. President, this brief amendment essentially has two purposes. First, it reinstates the ceiling for losses incurred by the Federal Housing Administration's general insurance fund. Second, it raises the ceiling from its previous level of \$500 million to a more realistic level of \$1 billion.

The FHA general insurance fund is one of four funds which insure various Federal housing programs. In recent years the general insurance fund has suffered significant losses. These losses are due, in part, to the downturn in the economy which in turn has forced many families and owners of certain FHA-insured multifamily projects into default. In response to the rising default rate, the Department of Housing and Urban Development has strengthened its underwriting standards and has made commendable progress in reducing the inventory of HUD-owned properties. It is the purpose of this amendment to further the Department's efforts in this regard.

The present provision in S. 1070 which governs the FHA general insurance fund removes the ceiling entirely, and places responsibility for adequately funding the general insurance fund on the appropriations process. His amendment would not jeopardize the financial soundness of the

general insurance fund. Rather, it is his intent to fully restore the fiscal integrity of the fund by placing an adequate celling on the fund which would sufficiently cover current losses.

The need for such a ceiling is clear. In his view, it is the responsibility of the authorizing committee—in this case the Banking, Housing, and Urban Affairs Committee—to establish the authorization levels for each program under its jurisdiction. If the provision presently contained in S. 1070 is allowed to stand in its present form, the Banking Committee will lose its crucial oversight and review responsibility.

In the past, the Banking Committee has been most responsive in meeting the needs of HUD in this regard. It has also, he believes, sought to ascertain the reasons behind increased losses to the general insurance fund as well as assist the Department in taking remedial action. The Senator's amendment would, as he states, build upon the past positive relationship which has existed between the Department and the authorizing committee on this issue.

The amendment would also require HUD to periodically appear before the Banking, Housing, and Urban Affairs Committee and explain, in some detail, the need for additional funds. In his view, this is not an unnecessary or onerous burden for HUD. In fact, the positive benefits of committee review and oversight are substantial in terms of our ability to fully understand the complexities of the Department's programs and difficulties HUD faces in achieving its basic mission: that of housing America.

The amendment also will assist in focusing HUD's and the committee's efforts on the less glamorous—but essential—task of effectively managing its present housing stock. It has long been a concern of the Senator from Pennsylvania (Mr. Heinz) that too little attention has been paid to monitoring our existing housing inventory.

There are many reasons which contribute to the lack of attention given to the existing housing stock. Monitoring these units is an immensely more complex task than the production of new units. To effectively monitor existing housing requires an extensive investment of staff time and energy. Through more effective management of our existing inventory of homes ands apartments, however, the costs to the FHA general insurance fund may be substantially reduced over time.

Far more important than curtailing losses to the general insurance fund is the assurance of the quality of life for the residents of HUD-owned properties. When a HUD-insured project gets into financial difficulty, a basically sound facility begins to deteriorate rapidly. The first budget squeeze is put on maintenance and light switches go unrepaired. Faucets continue to leak and then ruin the ceiling in the apartment below. Broken windows are not fixed, which then increases heating costs and in turn places greater financial strains on the project and forces it closer to fore-

closure. In the meantime, the lives of the tenants of the building are being destroyed.

Monitoring and properly managing the existing housing stock is not glamorous. The lack of effective monitoring by HUD however, costs the taxpayers millions of dollars annually. It also contributes very directly to the deterioration of the quality of life for thousands of families and hundreds of neighborhoods that are adversely affected by a deteriorating single or multifamily property. It should therefore receive the attention it deserves, but seldom gets. Placing a ceiling on the FHA general insurance fund keeps the pressure on both HUD and the Banking, Housing, and Urban Affairs Committee to concentrate on our existing housing inventory. It is the position of the Senator from Pennsylvania (Mr. HEINZ), that if we are truly interested in maintaining our existing housing stock, this amendment ought to be adopted.

Mr. President, I agree with the Senator from Pennsylvania (Mr. Heinz). I think he makes a very strong case.

I ask unanimous consent that I be entered as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BROOKE. It is my hope that the distinguished chairman will see fit to accept this amendment.

Mr. PROXMIRE. Mr. President, the Banking Committee did act to lift the ceiling on the FHA losses. We did so by a very substantial margin.

The Senator from Pennsylvania was present when we acted. He made his case, and we disagreed with him. I should say that the committee has held hearings and revised the FHA legislation to reduce losses in the future. We are certainly well aware of the situation.

Mr. President, one of the problems I have is that I serve along with the distinguished Senator from Massachusetts as a member of the Appropriations Subcommittee that handles the money for HUD. In that capacity, of course, it is necessary for us to act for the Senate to appropriate funds to cover these losses. There is nothing we can do about the losses that have been sustained in the past. They are not discretionary. We cannot, unless we want to go back on the word of the Federal Government, repudiate the losses. We have to pay them.

So all the limitation does is to call to the attention of the full committee, the authorizing committee, the Banking Committee, the losses sustained by FHA and to permit us to act, which we must do anyway, to provide the additional funds. The objective, of course, must be to pay off the losses and restore the integrity of the FHA so it can do its job more effectively.

This does, I agree with the Senator from Massachusetts and the Senator from Pennsylvania, permit Congress to oversee HUD's actions through both authorization and appropriations. In view of the fact that two very distinguished members of the Banking Committee feel so strongly on this I do not see that there

is any problem involved here. It will mean an extra step by the committee, but I am perfectly willing to take that kind of action, and accept the amendment.

So let me just see if I thoroughly understand what the amendment would do. The present losses of the general insurance funds are \$1.34 billion. Congress has restored \$77.5 million. That means that there are outstanding losses of \$1,262,500,000. The House of Representatives has provided for an authorization ceiling of almost exactly that amount, \$1.3 billion. HUD wants the ceiling lifted. The Heinz-Brooke amendment would provide for a \$1 billion ceiling, and we would go to conference on that difference.

In view of the fact that the amendment would have the practical effect of requiring the Banking, Housing, and Urban Affairs Committee to review the losses of FHA whenever they exceed \$1 billion, even though all we can do is to review them as part of our oversight, I am willing to accept the amendment of the Senator from Massachusetts.

Mr. BROOKE, Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. BROOKE. I am very pleased that the chairman will accept this amendment offered by the distinguished Senator from Pennsylvania (Mr. HEINZ), and which I have now joined as cosponsor.

The Senator is quite correct. Under the provisions of this bill, the Appropriations Committee would have the primary responsibility for overseeing the FHA insurance fund. This amendment would give the authorizing committee as well as the Appropriations Committee an oversight responsibility. I think that it is important for the authorizing committee to play that role. As the distinguished Senator from Wisconsin (Mr. PROXMIRE) observed, we both have the pleasure and the responsibility of serving on both the authorization and appropriations com-mittees for HUD. This amendment will give us a first opportunity to review the problems in the authorizing committee. Whenever we see trouble down the road, we can recognize the problem early in the authorizing process before we reach the time when we must appropriate the

I am very pleased the Senator will accept this amendment and take it to conference.

I yield back all the remainder of my time.

PROXMIRE. Mr. President, I Mr. yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to. Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum and ask unanimous consent that it be taken out of my time.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President. I

ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered. ADDITIONAL STATEMENTS SUBMITTED ON S. 1070

Mr. MUSKIE. Mr. President, the Senate is now considering S. 1070 the supplemental housing authorization of 1977. This bill authorizes several initiatives that have been proposed by the new Secretary of Housing and Urban Development, Patricia Harris, as well as a National Commission on Neighborhoods that has been proposed by the distinguished chairman of the Banking, Housing, and Urban Affairs Committee, Senator Proxmire, and the distinguished Sen-

ator from Utah, Mr. GARN. This bill would authorize the appropriation during the current fiscal year of additional contract authority for assisted housing that would enable the Nation to provide decent homes for as many as 160,000 additional lower-income families.

The bill would lengthen the maximum contract term from the present 20 years up to 30 years for privately developed new or substantially rehabilitated section 8 housing. The administration believes that this provision would encourage private lenders to finance the construction of assisted housing without relying on Federal mortgage insurance.

The bill would also authorize a 1-year study of the impact of various Federal policies on our Nation's neighborhoods. This is a more modest version of the bill that passed the Senate during the last session, but failed to be considered on the House floor during the closing hours of the 94th Congress. The work of this commission should be useful in helping us make Federal programs more effective and responsive to the needs of people. Other provisions of this bill would authorize increased payments of operating subsidies to local housing authorities to cover this winter's high fuel costs, a moderate expansion of the urban homesteading program, and the reimbursement of losses in FHA's General Insurance Fund.

Mr. President, I would like to call the Senate's attention to how this bill relates to the third budget resolution for fiscal year 1977, which was adopted by Congress on March 3. That resolution was made necessary because of extraordinary developments in the economy that could not have been foreseen when the second budget resolution was adopted last September. The third budget resolution included room for a significantly expanded commitment to housing subsidy programs, such as that which this bill would authorize.

Enactment of this bill as reported, plus existing authorizations, would permit the appropriation for assisted housof an additional \$13.1 billion in budget authority in fiscal year 1977. Both the Senate and House passed versions of the supplemental appropriations bill, H.R. 4877, provide this \$13.1 billion in budget authority for assisted housing.

The spending ceilings established by the third budget resolution are sufficient to cover H.R. 4877, as passed by the Sen-

ate last Friday, as well as the emergency stimulus supplemental (H.R. 4876) that has been reported in the Senate and other possible requirements now known. The latest Senate budget scorekeeping report indicates that when these various requirements are taken into account, there will be about \$2.3 billion in budget authority and \$1.2 billion in outlays remaining within the third budget resolution ceilings.

I would note, however, that these calculations do not assume any additional appropriations for the GNMA emergency mortgage purchase assistance program. It is clear, therefore, that the budget is now very, very tight, and there are still 6 months to go in this fiscal year.

The congressional budget process is facing a severe test. Each Senator must understand that every amendment and every vote that may lead to additional spending will have serious implications for the Congress and its ability to maintain control over the Nation's fiscal policy. For that reason, I will oppose any amendment which would lead to major increase in funding this fiscal year, since the Budget Committee plans no revisions to the third budget resolution.

I have long believed, Mr. President, that the national goal of a "decent home and a suitable living environment for every American family" must remain one of the most pressing items on the agenda of the Congress. In fact, since the congressional budget process began, the Nation's need for decent housing has consistently been before the Budget Committee as one of the highest national priorities.

I am sure I speak for all my colleagues on the Senate Budget Committee in saying that the Budget Committee supports an effective Federal housing policy. We must not abandon the hope for human dignity and opportunity for every American. We will not relax the effort to fashion public programs that respond to that hope. But we cannot accept the waste of resources on well-intentioned programs that do not meet the needs they are intended to serve.

We in the Congress must carefully evaluate housing programs and make many difficult choices. Housing programs necessarily invoke long-term commitments, and our decisions this year will affect the budgets of many future years. Because of this, the place of housing programs within the budget will be a matter of special concern to the Budget Committee in the months ahead. The Senate Budget Committee is now engaged in marking up the first budget resolution for fiscal year 1978 which makes us vividly aware of the pressures of competing national needs.

I know that I am by no means the only Senator who is encouraged that President Carter has attracted very able people to positions of high responsibility for his administration's housing policy. I am pleased that Secretary Harris has launched a major effort to make the existing housing programs work and to assure that every dollar provided by Congress results as quickly as possible better housing for lower income

families.

Mr. DOLE. Mr. President, I rise in support of this legislation, especially title II which I believe is an important step toward permitting urban Americans a greater voice in developing Federal programs which affect their lives.

During the past few years, the number of Federal urban programs has multiplied from a mere 45 in 1946 to 435 in 1968. Expenditures for these programs have increased from \$1 billion to \$30 billion. And yet, despite all of this great effort and expense, our cities are still in

deep trouble.

Part of the reason for our lack of success in the past is the fact that we have overlooked the human dimension in our planning efforts. In the immediate post-World War II era, the great superhighways that increased housing opportunities in the suburbs often plowed through urban neighborhoods, uprooting residents and destroying community cohesion

Later, many city neighborhoods, alive with a sense of belonging, tradition and roots were destroyed and replaced by architecturally grim and administratively monolithic public housing projects. A new type of slum, one with little hope of culture and community, one in which gangs, violence, and alienation abound, is the result of this kind of "brick and mortar" myopia on the part of some ur-

ban planners.

One way to correct our past mistakes is to develop a strategy for urban revitalization that treats our urban areas as social organisms and builds on the unique resources which exist in the city. In short, we need to forge an urban strategy which is based on a coalition among diverse groups recognizing each others right in a pluralistic society to build a sense of community and ethnic pride. This pride in the diversity of America is in no way exclusionary. It springs from the self-confidence of a people who have achieved mastery over their destinies.

Successful efforts at neighborhood revitalization should, in fact, dissipate many of the fears and anxieties which have beset our cities. It will soon become clear that neighborhood revitalization and conservation are concerns equally of blacks as well as ethnics. What people are seeking in each case is a decent environment for living and for rearing

families.

Another way to improve our urban renewal record is to coordinate the current hodge-podge of urban programs so that Federal, State, city, and neighborhood resources are brought together in a cohesive manner to solve a common problem. Local neighborhood people need to be included in the total decisionmaking process. For far too long now, neighborhoods have had to conform to the designs and dictates of urban planners in Washington and in city hall who have not worked in concert with those neighborhood people who were closest to the problem. Revenue sharing and the Community Development Act, both initiated by the previous two administrations, were significant first steps in the decentralization of the urban decisionmaking process. We need to continue this decentralization effort until it reaches the neighborhood.

I support the creation of a National Commission on Neighborhoods because I believe it can lead to a greater understanding of the human dimension in urban program development, greater coordination of effort among Federal, State, and city officials, greater participation by community and business leaders in neighborhood revitalization activities and a depolarization of racial strife. It is my hope that the Commission will develop recommendations which will eventually lead to the creation of a realistic, comprehensive, and effective national neighborhood policy.

HOMESTEADING

Mr. BIDEN. Mr. President, in 1973, a unique urban housing experiment was undertaken in Wilmington, Del.—urban homesteading.

In August of that year, 10 city-owned, boarded-up houses were given away free to people who agreed to fix them up within 18 months and live in them for

at least 3 years.

The program had one major problem: city-owned, boarded-up properties represented a relatively small share of the boarded-up houses in the city. In November of 1973, therefore, I introduced the National Urban Homesteading Act which permitted the Department of Housing and Urban Development to transfer, without payment, Department-owned houses to communities with an approved homesteading program. My bill became law as part of the Community Development Act of 1974.

The program was launched as a demonstration project in 1975 when HUD announced it would award 1,000 structurally sound houses worth \$5 million and another \$5 million in rehabilitation loans for 23 cities selected from a total

of 61 applicants.

To date, the cities have accepted nearly 900 of the properties originally allocated to them, and about 70 percent of these have been conveyed to local homesteaders at little or no cost.

The Supplemental Housing Authorization Act of 1977, which has been approved by the House of Representatives and is now before this body, would make a total of 3,000 additional HUDheld houses available for urban homestead projects during the year. In addition to expanding the programs in the 23 demonstration cities, HUD estimates that assistance would be provided to at least 10 additional cities that have expressed an interest in urban homesteading.

The results of this demonstration's project are not yet conclusive; but they are encouraging. The previous Secretary of Housing and Urban Development, Carla Hills, listed urban homesteading as one of the major accomplishments of her term. The new administration, in recommending the expansion of the program, indicates that the program has been extremely successful, both in providing homeownership opportunities for a limited number of moderate-income families and in eliminating the blighting influence of boarded-up HUD properties.

Mr. President, urban homesteading is certainly not the answer to this country's housing problems—there is no single answer. But urban homesteading is a commonsense, self-help approach to solving part of the problem.

NEIGHBORHOOD COMMISSION

Mr. President, I think the people of Delaware are tired of seeing their hard-earned money being used by the Federal Government to undertake one study after another. That is why I am going on record against spending \$1 million of taxpayers' money to fund a study on neighborhood problems that would probably be put on a shelf somewhere. Besides, what can the Federal Government tell us about our neighborhoods that we do not already know as a consequence of 100 previous studies.

Mr. KENNEDY. Mr. President, the Supplemental Housing Authorizations Act of 1977 which we are considering today will bring some much-needed relief to the poor persons of this Nation who feel the implications and suffer the consequences of the housing crisis which

we are experiencing nationally. This bill includes an increase of \$378 million in HUD authority for housing assistance payments to support the poor in their efforts to find a decent place to live. That increase would enable HUD to provide assistance payments for 400,000 dwelling units, a goal established by the Carter administration for fiscal year 1977. These funds are necessary to enable HUD to provide assistance to local officials who are struggling to provide the type of housing which their communities desperately need.

This legislation also authorizes an additional \$19.6 million which is needed by local housing agencies to pay for the increased utility costs incurred during the most severe winter which this Nation has experienced. Unfortunately, it is the poor who know most dramatically the impact of weather on the quality of their

lives

The increase in funding for the urban homestead demonstration program which this legislation authorizes is needed if we are to restore vitality to our cities. This bill includes an increase in authorization of \$5 million to \$15 million during fiscal year 1977—three times the current level. This funding would mean that a total of 3,000 HUD-held houses would be available for urban homestead projects.

The extension of HUD authority to provide crime insurance and riot reinsurance contained in this bill represents a genuine effort to recommit ourselves to reshaping this Nation's inner cities. It is impossible for residents of inner cities to bear the full financial burden of this insurance. This program is an essential part of restoring credibility in our efforts to rebuild our cities.

One of the most heartening aspects of this legislation, the establishment of a National Commission on Neighborhoods, has special significance for me and the residents of the Commonwealth of Massachusetts whom I represent. The Commission will look for new ways of promoting reinvestment in existing city neighborhoods and making mainte-

nance and rehabilitation of existing structures as attractive from a tax viewpoint as demolition. The Commission will also make recommendations regarding modifications of local zoning and tax policies to facilitate preservation and revitalization of existing neighborhoods. The establishment of the Commission on Neighborhoods is good news for the older more established neighborhoods in New England and Massachusetts in particular.

The fact that the Commission will be composed largely of neighborhood leaders and local officials, and will reflect the racial, ethnic, and geographic diversity of this Nation's urban neighborhoods is indicative of the impact the Commission may have on national housing policies. The work of this Commission will be conducted not only in Washington but also in the neighborhoods of this Nation. I join my colleagues in supporting the work of the Commission.

Mr. President, in summary, the legislation we act on today will make a significant difference to our cities and to city residents. The goal of the new administration and this Congress is the revitalization of our urban centers and the reshaping of our cities' futures. We know that State governments and local communities are committed to a partnership effort to restore to the cities the hope they once held out to thousands and millions of families from all parts of this Nation and from every corner of the globe for a better life. We know that we have developed programs over the years which are especially designed to equip the cities to deal with crises that face them in every area from spiralling energy costs to unemploy-ment to a depressed economy. We know that full funding of these programs is essential if the job we have undertaken to renew our cities is to be effectively accomplished.

Mr. President, when unemployment figures swell across this Nation, they hit the cities hardest. When inflation grows, when housing starts are down, when heat and light and water supplies dwindle in quantity and spiral in cost, it hits the cities hardest. Our action today in assuring adequate funding for our urban programs is a renewal of our commitment to the cities and to all those constituents who have worked so hard and so long to make the cities work.

Mr. President, another aspect of this legislation introduced by my colleague Mr. Brooke and myself will authorize emergency mortgage relief funds for Mashpee, Mass. Mr. Brooke and I were successful in amending the 1977 supplemental appropriations bill to include \$1 million in mortgage relief payments to assist the residents of Mashpee.

As a result of an Indian land dispute, the citizens of Mashpee have been hard pressed to meet their mortgage obligations. The suit filed by the Wampanoag Indians has affected the whole economic stability of the town.

It is essential that we provide some type of financial assistance to the residents of this area who could be forced to sell their homes under distressful conditions, or in fact, lose their homes for lack of financial assistance until the dispute can be settled or negotiated.

Mr. MATHIAS. Mr. President, this supplemental housing authorization bill for 1977 will provide the Department of Housing and Urban Development under its new Secretary with the leeway to show the Congress and the Nation what it can produce.

Particularly important is the increase in public housing operating subsidies to take into account the high fuel heating costs caused by the recent severe winter.

In addition I was pleased to see an increase of \$378 million for the section 8 housing assistance payments program. This will insure that HUD could, with a big production push and shortened processing times, start new construction or rehabilitation of up to 400,000 homes in this fiscal year.

And lastly, but certainly not the least important feature of this authorization bill is funding recognition for the National Commission on Neighborhoods. This Commission would be established pursuant to S. 417 which Senator Proxume has reintroduced in this session, and of which I am a cosponsor.

This Commission will be charged with devising a strategy for the conservation of existing neighborhoods. The time has come for such a Commission as more and more we come to recognize the unique communities which are found in neighborhoods which hold those areas together and give the strength. There is a growing recognition of the needs of older declining cities, most of which are located in the Northeast, Great Lakes, the Mid-Atlantic regions of our country.

These cities derive their strength and vitality from the people of their neighborhoods including newcomers who are moving back to those cities and their neighborhoods in recognition of the many amenities which city living has to offer.

My home State's city of Baltimore is a good example of a city with an aging housing stock and old neighborhoods which are being viewed as resources rather than liabilities. Its urban homesteading program and neighborhood housing services lending program for home repair are recognized nationwide as innovative models.

I am confident the National Neighborhood Policy Act will be passed by both bodies this year. And I am encouraged by the statements of the HUD Secretary that these housing subsidy funds can and will be put to good use this year.

(This concludes additional statements submitted on S. 1070.)

Mr. PROXMIRE. Mr. President, as far as I know there are no further amendments to be offered on this measure, and I believe we can go to a third reading.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, and was read the third time.

The PRESIDING OFFICER. Is all time yielded back?

Mr. BROOKE. I yield back the remainder of my time.

Mr. PROXMIRE, I yield back the remainder of my time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (S. 1070) was passed, as fol-

S. 1070

An act to authorize additional funds for housing assistance for lower income Americans in fiscal year 1977, to extend the Federal riot reinsurance and crime insurance programs, to establish a National Commission on Neighborhoods, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Supplemental Housing Authorization Act of 1977".

TITLE I—SUPPLEMENTAL AUTHORIZA-TIONS AND EXTENSIONS OF HUD PRO-GRAMS

AMENDMENTS TO THE UNITED STATES HOUSING ACT OF 1937

SEC. 101. (a) The first sentence of section 5(c) of the United States Housing Act of 1937 is amended by striking out "and by \$850,000,000 on October 1, 1976" and inserting in lieu thereof "and by \$1,228,050,000 on October 1, 1976".

(b) Section 9(c) of such Act is amended by striking out "and not to exceed \$576,000,-000 on or after October 1, 1976" and inserting in lieu thereof "and not to exceed \$595,-600,000 on or after October 1, 1976".

(c) Section 8(e) of such Act is amended—
(1) by striking out "two hundred and forty months" in the first sentence and inserting in lieu thereof "three hundred and sixty months, except that such term may not exceed two hundred and forty months in the case of a project financed with assistance of a loan made by, or insured, guaranteed or intended for purchase by, the Federal Government, other than pursuant to section 244

of the National Housing Act"; and
(2) by striking out "In the case of" in the second sentence and inserting "Notwithstanding the preceding sentence, in the case

GENERAL INSURANCE FUND

SEC, 102. Section 519(f) of the National Housing Act is amended by striking out "\$500,000,000" and inserting in lieu thereof "\$1,000,000,000".

URBAN HOMESTEADING DEMONSTRATION

Sec. 103. Section 810(g) of the Housing and Community Development Act of 1974 is amended by striking out "not to exceed \$5,-000,000 for fiscal year 1977" and inserting in lieu thereof "not to exceed \$15,000,000 for fiscal year 1977".

FEDERAL RIOT REINSURANCE AND CRIME INSURANCE PROGRAMS

SEC. 104. Section 1201(b) of the National Housing Act is amended— (1) by striking out "April 30, 1977" in

(1) by striking out "April 30, 1977" in paragraph (1) and inserting in lieu thereof "April 30, 1978"; and

(2) by striking out "April 30, 1978" in paragraph (1)(A) and inserting in lieu thereof "April 30, 1981".

MISCELLANEOUS PROVISIONS RELATING TO MORTGAGE INSURANCE PROGRAMS

SEC. 105. (a) Section 101(c) of Title I of the Housing Act of 1949 is amended by deleting the following words in the first sentence "and no mortgage shall be insured, and no commitment to insurance a mortgage shall be issued, under section 220 of the National Housing Act, as amended," and by deleting the first proviso of that section.

(b) The National Housing Act is amended

by deleting from Section 220(d)(1)(A)(ii) the words "in a community respecting which the Secretary of Housing and Urban Development has made the determination provided for by section 101(c) of the Housing Act of 1949, as amended".

CONSTRUCTION OF MODERATE INCOME HOUSING

Sec. 106. Section 221(d)(4) of the National Housing Act is amended by deleting the words "other than a mortgage as referred to in subsection (d) (3)" from the first sentence of the section.

TITLE II-NATIONAL COMMISSION ON NEIGHBORHOODS

SHORT TITLE

SEC. 201. This title may be cited as the "National Neighborhood Policy Act".

FINDINGS AND PURPOSE

SEC. 202. (a) The Congress finds and declares that existing city neighborhoods are a national resource to be conserved and revitalized wherever possible, and that public policy should promote that objective.

(b) The Congress further finds that the tendency of public policy incentives to ignore the need to preserve the built environment can no longer be defended, either economically or socially, and must be replaced with explicit policy incentives encouraging conservation of existing neighborhoods. That objective will require a comprehensive review of existing laws, policies, and programs which affect neighborhoods, to assess their impact on neighborhoods, and to recommend modifications where necessary.

ESTABLISHMENT OF COMMISSION

SEC. 203. (a) There is hereby established a commission to be known as the National Commission on Neighborhoods (hereinafter referred to as the "Commission").

(b) The Commission shall be composed of twenty members, to be appointed as fol-

(1) two Members of the Senate appointed by the President of the Senate:

(2) two Members of the House of Representatives appointed by the Speaker of the House of Representatives; and

(3) sixteen public members appointed by the President of the United States from among persons specially qualified by experience and training to perform the duties of the Commission, at least five of whom shall be elected officers of recognized neighborhood organizations engaged in development and revitalization programs, and at five of whom shall be elected or appointed officials of local governments involved in preservation programs. The remaining members shall be drawn from outstanding individuals with demonstrated experience in neighborhood revitalization activities, from fields as finance, business, thropic, civic, and educational organizations. The individuals appointed by the President of the United States shall be elected so as provide representation to a broad cross section of racial, ethnic, and geographic groups. The two members appointed pursuant to clause (1) may not be members of the same political party, nor may the two members appointed pursuant to clause (2) be members of the same political party. Not more than eight of the members appointed pursuant to clause (3) may be members of the same political party.

(c) The Chairman shall be appointed by the President, by and with the advice and consent of the Senate, from among the pub-

lic members.

(d) The executive director shall be appointed by the President, by and with the advice and consent of the Senate, from among individuals recommended by the Commission.

DUTIES

SEC. 204. (a) The Commission shall undertake a comprehensive study and investiga-

tion of the factors contributing to the decline of city neighborhoods and of the factors necessary to neighborhood survival and revitalization. Such study and investigation shall include, but not be limited to-

(1) an analysis of the impact of existing Federal, State, and local policies, programs, and laws on neighborhood survival and re-

vitalization:

(2) an identification of the administrative, legal, and fiscal obstacles to the wellbeing of neighborhoods;

(3) an analysis of the patterns and trends public and private investment in urban areas and the impact of such patterns and trends on the decline or revitalization of

neighborhoods:

(4) an assessment of the existing mechanisms of neighborhood governance and of the influence exercised by neighborhoods on local government;

(5) an analysis of the impact of poverty and racial conflict on neighborhoods;

an assessment of local and regional development plans and their impact on neighborhoods;

(7) an evaluation of existing citizen-in-itiated neighborhood revitalization efforts and a determination of how public policy can best support such efforts; and

(8) a quantification, where feasible, of the costs and benefits to society from present programs, and a quantification, where feasible, of the costs and benefits to society of programs which are recommended as required by subsection (b).

(b) The Commission shall make recommendations for modifications in Federal, State, and local laws, policies, and programs necessary to faciliate neighborhood preservation and revitalization. Such recommendations shall include, but not be limited to-

new mechanisms to promote reinvestment in existing city neighborhoods;

(2) more effective means of community participation in local governance;

(3) policies to encourage the survival of economically and socially diverse neighborhoods:

policies to prevent such destructive practices as blockbusting, redlining, resegregation, speculation in reviving neighborhoods, and to promote homeownership in urban communities;

(5) policies to encourage better maintenance and management of existing rental

housing:

(6) policies to make maintenance and re-habitation of existing structures at least as attractive from a tax viewpoint as demolition and development of new structures;

(7) modification in local zoning and tax policies to facilitate preservation and revitalization of existing neighborhoods; and

(8) reorientation of existing housing and community development programs and other tax and subsidy policies that affect neighborhoods, to better support neighborhood preservation efforts.

(c) Not later than one year after the date which funds first become available to carry out this title, the Commission shall submit to the Congress and the President a comprehensive report on its study and investigation under this subsection which shall include its findings, conclusions, and recommendations and such proposals for legislation and administrative action as may be necessary to carry out its recommendations.

COMPENSATION OF MEMBERS

SEC. 205. (a) Members of the Commission who are Members of Congress or full-time officers or employees of the United States shall serve without additional compensation, but shall be reimbursed for travel, subsistence, and other necessary expenses incurred in the performance of the duties vested in the Commission.

(b) Members of the Commission, other than those referred to in subsection (a) shall receive compensation at the rate of

\$100 per day for each day they are engaged in the actual performance of the duties vested in the Commission and shall be entitled to reimbursement for travel, subsistence, and other necessary expenses incurred in the performance of such duties.

ADMINISTRATIVE PROVISIONS

SEC. 206. (a) The Commission shall have the power to appoint and fix the compensation of such personnel as it deems advisable, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and the provisions of chapter 51 and subchapter III of chapter 53 of such title, relating to classification and General Schedule pay rates, but at rates not in excess of a maximum rate for GS-18 of the General Schedule under section 5332 of such title.

(b) The Commission may procure, in accordance with the provisions of section 3109 of title 5, United States Code, the temporary or intermittent services of experts or consultants. Persons so employed shall receive compensation at a rate to be fixed by the Commission but not in excess of \$100 per day, including traveltime. While away from his or her home or regular place of business in the performance of services for the Commission, any such person may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 (b) of title 5, United States Code, for persons the Government service employed intermittently.

(c) Each department, agency, and instrumentality of the United States is authorized and directed to furnish to the Commission, upon request made by the Chairman or Vice Chairman, on a reimbursable basis or otherwise, such statistical data, reports, and other information as the Commission deems necessary to carry out its functions under this title. The Chairman is further authorized to call upon the departments, agencies, and other offices of the several States to furnish, on a reimbursable basis or otherwise, such statistical data, reports, and other information as the Commission deems necessary to carry out its functions under this title.

(d) The Commission may award contracts and grants for the purposes of evaluating existing neighborhood revitalization programs and the impact of existing laws on neighborhoods. Awards under this subsection may be

made to-

(1) representatives of legally chartered neighborhood organizations;

(2) public interest organizations which have a demonstrated capability in the area of concern; and

(3) universities and other not-for-profit

educational organizations.

(e) The Commission or, on the authorizaof the Commission, any subcommittee or member thereof, may, for the purpose of carrying out the provisions of this title, hold hearings, take testimony, and administer oaths or affirmations to witnesses appearing before the Commission or any subcommittee or member thereof. Hearings by the Commission will be held in neighborhoods with testimony received from citizen leaders and public officials who are engaged in neighborhood revitalization programs.

AUTHORIZATIONS OF APPROPRIATIONS

SEC. 247. There are authorized to be appropriated not to exceed \$1,000,000 to carry out this title.

EXPIRATION OF THE COMMISSION

SEC. 208. The Commission shall cease to exist thirty days after the submission of its report under section 204.

EMERGENCY HOMEOWNERS' RELIEF ACT AMENDMENTS

SEC. 209. That (a) section 102 of the Emergency Homeowners' Relief Act is amended-(1) by redesignating subsection (b) as

subsection (c); and

(2) by inserting after subsection (a) the

following:
"(b) The Congress also finds that severe localized economic distress caused by the legal claims of the Mashpee Tribe in Mashpee, Massachusetts may require the furnishing of assistance under this Act to avoid mortgage foreclosures and distress sales resulting from the temporary loss of employ-

ment and income.".

(b) Section 103(4) of such Act is amended by inserting "national or local" before

'economic conditions".

Mr. PROXMIRE. Mr. President, move to reconsider the vote by which the bill was passed.

Mr. BROOKE. I move to lay that mo-

tion on the table.

The motion to lay on the table was

agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make technical and clerical corrections in the engrossment of S. 1070.

The PRESIDING OFFICER. Without

objection, it is so ordered.

RECESS UNTIL 3:30 P.M.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate stand in recess for 1 hour.

There being no objection, at 2:30 p.m. the Senate took a recess for 1 hour.

The Senate reassembled at 3:30 p.m., when called to order by the Presiding Officer (Mr. ZORINSKY).

Mr. ROBERT C. BYRD. Mr. President,

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk

proceeded to call the roll.

Mr. LONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

TAX EXCLUSION FOR SICK PAY

Mr. LONG. Mr. President, is a Housepassed bill relating to sick pay benefits at the desk?

The PRESIDING OFFICER. H.R.

1828 is at the desk.

Mr. LONG. Mr. President, under the rules I believe if objection is heard to the bill being referred, it remains at the desk, and after a certain number of days can be called up off the calendar; is that correct?

The PRESIDING OFFICER. There is a procedure under rule XIV whereby the bill could be placed on the calendar

without going to committee.

Mr. LONG. Mr. President, I have been notified that there would be a request that the bill be held at the desk, hoping that we might not find it necessary to refer it to the committee, and thereby bypass the 3-day requirement on report-

The Senate committee has recommended the same subject matter in a much broader bill which is on the Senate Calendar, so I ask unanimous consent that the bill remain at the desk and that it be subject to being called up from the calendar at a future date.

Mr. BAKER. Mr. President, reservinb the right to object, is the Senate speaking of H.R. 1828?

The PRESIDING OFFICER, H.R. 1828.

Mr. BAKER. The request, as I understand it, is that the bill be held at the desk, and that we enter a unanimousconsent agreement that it can be called up at any time?

Mr. LONG. Well, I do not care to call

it up today

Mr. BAKER. Mr. President, I have no objection. I just wanted to clarify the request.

The PRESIDING OFFICER. Is the Senator asking unanimous consent that the bill be considered as having been read twice and be placed on the calendar?

Mr. LONG, Yes.

Mr. BAKER. Mr. President, reserving the right to object, I had not understood that. I have no objection to its being held at the desk, but I would object to its being read twice and being placed on the calendar.

Mr. LONG. I object to the bill going to the committee, Mr. President. Would that result in its being kept at the desk? The PRESIDING OFFICER. This is a

request that it be kept at the desk. Mr. BAKER. I have no objection to

that.

Mr. LONG. Under the rules, is not the bill to be read once?

The PRESIDING OFFICER. The bill could be read once.

Mr. LONG. I ask that it be read.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 1828) relating to the effective date for the changes made by the Tax Reform Act of 1976 to the exclusion for sick pay,

Mr. LONG. Mr. President, I ask that the bill be held at the desk.

The PRESIDING OFFICER. The bill will be held at the desk until after the second reading.

Mr. LONG subsequently said: Mr. President, I ask that what I am going to say appear previously in the RECORD, in connection with the discussion with reference to the bill relating to sick pay.

The Senator from Kansas, Mr. Dole, had informed me that he wished the bill to remain at the desk because this matter should be acted on before April 15, so that those who want to claim the benefit of the sick pay exclusion to which they would otherwise have been entitled except for the Tax Reform Act last year will be able to do so for the tax year 1976.

There may be at least one amendment which has been offered and agreed to in the committee regarding this tax treatment of income earned while working overseas. Such an amendment was offered by Senator RIBICOFF in the committee and was agreed to unanimously on the theory that the change in the law in 1976 was subject to a similar charge that many people would have made some adjustments had they known Congress was going to pass a law raising the taxes on their overseas pay during the course of last year.

It is also possible that an amendment

may be offered by the Senators from Kentucky to correct an oversight which occurred both in the House and in the Senate from the point of view of the Internal Revenue Service when we acted on the Tax Reform Act last year with regard to parimutuel betting on horse races. Those Senators properly feel the way the matter became law was a result of a misunderstanding with regard to what the language meant. They hope to straighten out that matter.

EMERGENCY UNEMPLOYMENT ACT AMENDMENTS-CONFERENCE RE-PORT

Mr. LONG. Mr. President. I submit a report of the committee of conference on H.R. 4800, and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. ZORINSKY). The report will be stated by

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4800) to extend the Emergency Unemployment Compensation Act of 1974 for an additional year, to revise the trigger provisions in such act, and for other purposes, having met, after full and free conference, have agreed to recommend and do recom-mend to their respective Houses this report signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of today's RECORD.)

Mr. LONG. Mr. President, the House and Senate conferees have reached agreement on the bill extending the Emergency Unemployment Compensation Act. This act provides benefits to unemployed workers who have exhausted their entitlement to regular and extended unemployment benefits in 32 States which have high levels of unemployment. Under existing law, this act expired on March 31.

Under the conference agreement, the program will continue in force for 10 more months as compared with 9 months under the Senate version and 12 months under the House bill. Benefits will be payable until January 31, 1978, but no new applications will be taken after October 31, 1977. The conference agreement retains the provision of existing law and the Senate bill under which the program goes into effect on a State-by-State basis when the State's insured unemployment rate exceeds 5 percent.

Both the Senate and House bills included provisions requiring applicants to accept suitable work, and the conference agreement includes elements from both bills in this respect. Unemployed individuals who cannot show that they have good prospects for reemployment in their usual job would have to be willing to look for and accept any reasonable job offer meeting basic suitability standards and paying at least as much as the unemployment benefits they had been drawing—including supplemental employer or union benefits.

Both bills reduce maximum entitlement under the emergency program from 26 to 13 weeks—that is, from a combined maximum under all programs of 65 weeks to a combined maximum of 52 weeks. The House agreed to accept a Senate amendment which would make this change effective April 30 so that no current recipients would face an abrupt cut-off of benefits because of the change.

The House also accepted the Senate amendment postponing for 6 months—until April 1980—a provision requiring that unemployment benefits be reduced by the amount of any pension payable. In addition, the House accepted an amendment permitting States to deny unemployment benefits to school employees during brief holiday recess periods. The House refused to accept a Senate amendment permitting States to deny benefits to certain substitute teachers.

Both the House and Senate bills provided for funding the emergency benefits program from general revenues for the remainder of its duration and permitting States an additional 2 years to repay certain loans from the Federal unemployment trust fund. These provisions are also included in the final version of the bill.

The Senate added to the bill a provision dealing with the method of determining pay increases for Federal judges, Members of Congress, and other highlevel Federal officials. Under this amendment, a separate rollcall vote will in the future be required in the Senate and in the House of Representatives before the pay increases recommended by the President can be implemented for each of the four categories of Federal officials covered by the procedure. The House conferees accepted this Senate amendment.

Mr. BARTLETT. Mr. President, although I voted against final passage of this bill when it was before us last week, and although my general feeling regarding this bill continues to be negative, I am most encouraged to note that this conference report retains the amendment which I offered on the floor last week pertaining to the procedure for pay raises for high level Federal officials. The Senate adopted that amendment by a vote of 82 to 13.

The amendment which I offered would require that as to all future recommendations of the Commission on Executive, Legislative, and Judicial Salaries, a recorded vote of each House of Congress will be required to approve any proposed pay increase. A different vote would be required for each of the classes of officials whose pay is subject to recommendations made by the Commission—Members of Congress, Federal judges, legislative branch officers, and high level executive branch officials.

The passage of this amendment by Congress will do much to effect genuine reform of the pay determination process. We have hidden for too long behind the anonimity offered by the present law, which allows substantial pay increases to go into effect without the Congress having to expressly take a position on them.

The people we represent resent this backdoor method of raising pay, and properly so. One of the most important duties we assume as Members of Congress is that of protecting the public purse from improper expenditures. We customarily determine the propriety of expenditures through full and open debate, and by each Member publicly taking a position on the issue. The procedure should be no different just because our own pay is involved.

As I mentioned previously, Mr. President, I believe the unemployment compensation bill itself is defective in a number of respects. I am pleased that a reformed procedure for congressional and other pay increases will now become the law of the land.

(Mr. NUNN assumed the chair at this point.)

Mr. JAVITS. Mr. President, I would like to ask the chairman of the Finance Committee a question.

There are quite detailed specifications in the conference report, which my staff has just had the chance to read, respecting the duty of an unemployed worker to accept another job. We just wanted to be sure that none of those cancel out the basic proposition that, if that worker is in an approved training program, that then he may continue in that program and is not obliged to accept another job under any of those conditions or risk being cut off from unemployment benefits.

Mr. LONG. If he is in a training program, he does not have to accept a job.
Mr. JAVITS. I thank the chairman.

Mr. President, there are some good parts of the bill and, like everything else in life, some disappointing parts. I do not think very much was given in terms of an extension of the program. The Senate bill provided a 6-month extension of FSB with a 3-month phaseout, and the House bill provided a 12-month extension. The whole thing was settled for 7 months plus a 3-month phaseout. It seems to me that that gives very inadequate consideration to the forecasts, even optimistic forecasts, for the future. As of today, 34 States participate in this program. The administration supported a 9-month extension of the program with a 3-month phaseout, and estimated that 1 year from now 20 States would still be participating if it is still authorized. Of course, the predictions that the tax program of the administration is going to stimulate a recovery, which will very materially reduce unemployment, are sharply controverted. Indeed, the administration itself is guarded in its projections for reduction of unemploy-

Also, we must note, Mr. President, that the FSB program has already been cut back, though I favor that cutback, by 13 weeks, from the 65-week level to 52 weeks. I would note that 25 States would be currently eligible to participate at the full 65-week level, if the full program were still in effect. Forecasts of economic recovery are little comfort to the long-term unemployed who are out of jobs in either the public or private sector and are entitled to some reasonable assurances of at least minimum

income security during this period of extremely high unemployment.

Let us remember, Mr. President, unemployed workers on FSB do not receive munificent sums. In my own State of New York, which is considered a leading State in respect of various activities of this character for the benefit of people who are suffering through no fault of their own, the maximum unemployment insurance benefit is \$95 a week, with many workers not even receiving that. Having endured a long period on such minimal subsistence level compensation, we are now telling these workers that they will not even receive those benefits because we project economic recovery, and the possibility of jobs for them sometime in the future.

Therefore, Mr. President, it is going to be necessary that we be very diligent as the end of this session of Congress approaches in order to be sure that the program, as seems to me inevitable, is continued if economic conditions so warrant.

Therefore, I will introduce legislation shortly to provide for a further extension of the program so that a bill may be before us and hearings may be held in order to be ready for such eventuality, which, unhappily, I think is very likely to occur.

Now, Mr. President, one very good thing the bill does is to provide prospective general revenue financing for FSB. It does not, however, provide retroactive general revenue financing. That raises

a very serious problem.

There has now been accumulated a debt owed from the Federal unemployment trust fund to the general funds of the Treasury of over \$5 billion for the costs of FSB. These moneys will have to be repaid from employer taxes collected over the next several years. That means, Mr. President, that additional taxes on the wages of any new workers who are hired constitute a disincentive to the hiring of new workers, something which is very unwise from our point of view if we wish to stimulate economic recovery. Therefore, I do not believe we can ignore the fact, that this recession was the deepest since the Great Depression, and that we really have to do something about retroactivity of this indebtedness. The billions of dollars of debt which have accumulated and the continuing borrowing which is going on right now by the State trust funds to meet their own commitments under the permanent UI system, which adds to that debt, is hardly a way in which to leave the situation. It is painfully clear that a financing reform is essential in respect to unemployment insurance, which continues to represent our first line of defense against recession. In addition to the over \$5 billion borrowed by the Federal trust fund to pay for FSB, the States have now borrowed over \$4 billion themselves. These debts-the result of the inability of the permanent UI system to accommodate a serious recession-constitute a continuing obstacle to reasserting the fiscial viability of the UI system.

Retroactive general revenue FSB financing is but a first step. We must develop a reasonable scheme for repayment of the outstanding State loans. Further, we must reconsider the entire financing structure of UI to avoid the financial situation the State and Federal UI funds now face as a result of this recession.

Mr. President, regarding the recession in terms of the individual worker, this morning I attended a hearing at which Prof. John Kenneth Galbraith, of Harvard, testified. We all know him very well. He is a distinguished American.

It clearly emerged there that, considering the OPEC drain upon the world, we could face a serious economic situation, much worse than the present one.

Without being a prophet of doom, but being realistic, we are responsible for the lives and fortunes of so many people. We only think of unemployment going down. Unemployment can, however, go up. One thing on which Senator Long and I do agree is the real solicitude we have for people who are hit, not through any fault of their own with economic hardship. It is something we have shared all of our lives here. I take great pride in it and I am sure he does, too.

I hope very much, I say to the Senator, that the Committee on Finance will continue to examine this situation, even though the permanent UI act does not figure in this bill. From that point of view, are we prepared for rainy days, very rainy days, as well as sunny days? None of us is prescient. We may find that the situation could—I hope it will not, and I shall knock myself out with my colleagues in the hope that it will not; but we have to remember that this system has to have the durability to sustain itself also through adverse periods.

I thank my colleague very much for his concern.

Mr. LONG. I thank the Senator.

Mr. President, we had hoped that it would not be necessary to extend this program, but the program has been extended. This bill will extend it again. We shall be voting on a series of recommendations by the President when we come back to provide tax advantages and also to provide funds for expanded public works. It is our theory that we should try to expand the economy by giving people tax advantages for putting more people to work, by giving the \$50 rebate, and by providing additional funds to encourage public service-type employment. It is our hope that we shall not have to extend this program again.

Six months from now, it may be that, in spite of our best efforts to get the economy moving—and it is moving now, but if it is not moving fast enough and we are not making enough headway—we may be compelled to extend the program again. But I hope not. I am an optimist, as most Senators are. We believe that if all these things work, the economy will be moving along so well that we shall not have to extend it.

This might be a good time to put in a plea for additional votes on the \$50 tax rebate. I am not sure we are going to pass that measure. But, I might mention it while the subject is before us.

If we can get enough steam behind the recovery that seems to be underway, then we shall not have to extend it. I am

sure that the Senator joins me, and all of us, in hoping that our efforts to get the economy in better shape will make it unnecessary to extend the program again. But if it is necessary, we shall face up to that and we may be compelled to extend it again.

Mr. JAVITS. I thank my colleague. We are going to have quite a basic difference of opinion as to what will get us going again, whether it is the \$50 rebate or a permanent tax cut of the rates. We shall fight that one out on another battlefield.

I thank the Senator.

Mr. GRIFFIN. Mr. President, I shall vote for the conference report, but, like the Senator from New York, for different reasons. I do so with some mixed feelings.

I want to comment on several amendments considered and adopted by the Committee on Finance which relate to new provisions of law enacted in 1976, requiring that all State and local public employees be covered by the unemployment compensation program. The amendments to which I refer specifically relate to the effect of that law as it would apply to employees of public school districts.

It came to my attention that in a number of States, including Michigan, where there is no waiting period before a person out of work can draw unemployment benefits, some unintended effects would have resulted from the 1976 amendments if left unchanged by the Congress.

For example, even though the law which was passed last year provided that teachers who had a contract for employment for the succeeding year, or had reasonable assurance of employment, would not be eligible for unemployment compensation during the summer months, loopholes were left which would have required the payment of unemployment compensation during vacations or holiday recesses, such as Christmas and Easter. This surely was not intended.

Furthermore, as the law was worded and was being interpreted, it would have provided for the payment of unemployment compensation to teachers during nonsummer breaks between school terms.

These two provisions would have had a very significant and costly effect. It is one thing to require that local public employees be covered by unemployment compensation. Congress can do that very easily. But local school districts have to pay for it. At least, they have to contribute to an unemployment compensation fund, just like private employers. The loopholes I have referred to would have amounted to million of dollars of unexpected, unanticipated bonuses, so to speak, for school teachers who suddenly found themselves covered by unemployment compensation.

I am pleased that the conference committee agreed to the Senate's proposed changes in these two areas.

There also was a third amendment which the Senate Committee on Finance adopted but which the House did not take, having to do with the coverage of substitute teachers. I say to the chairman that I appreciate the fact that the Senate committee took a look at this problem, and I think it is unfortunate

that the House would not accept the Senate amendment.

Let me just point out that in Michigan, if the law is not changed—and we still have some time, because it does not take effect until January 1, 1978—an occasional substitute teacher who works as little as 14 days in a school year could qualify for 39 weeks of unemployment compensation. In 36 States, as I understand it, an occasional substitute teacher who works as little as 25 days of a school year could qualify for 39 weeks of unemployment compensation.

I do not think that is what we intend. For those substitute teachers who work as regular employees of a school district and who work some minimum number of days in a school term—we had suggested 45 days as the cutoff—it might make sense that they could qualify for unemployment compensation. But to have a situation where a housewife, who just occasionally works as a substitute teacher, may want to work 1 day a week or 2 or 3 days a month, and then, after 14 days, is entitled to 39 weeks of unemployment compensation, would throw the ordinary system of operating schools completely out of kilter.

It would mean, in effect, that local school districts would not use a teacher who only wants to teach occasionally, because if she builds up 14 days of time, over a 14-week period she will be eligible for unemployment compensation. Therefore, a lot of those people who have been acting and working as occasional substitute teachers are actually going to lose that opportunity, and school districts will have to turn to what we would call regular substitute teachers.

I am going through this for the purpose of expressing my hope that the Committee on Finance will take a close look at this particular problem. I realize that the NEA has a point of view on this matter—and they ought to be listened to—but so do the school districts and school boards around the country who are going to face substantial additional expenses if we do not straighten out this one problem.

Mr. CURTIS. Will the Senator yield? Mr. GRIFFIN. I am glad to yield to the Senator from Nebraska.

Mr. CURTIS. The Senator from Michigan has presented the matter well and, in his earlier presentation to members of the Committee on Finance, he made a very strong case.

As it is, there is a great deal of inconsistency. When the summer vacation comes, a teacher who has every expectancy of teaching in the fall is ineligible for unemployment compensation. I think that is right. I think that is proper.

But as the Senator points out, we go overboard, perhaps by accident, but nevertheless, the law does.

Here is a substitute teacher who teaches for a few days. She may not want full employment, may not be the head of a household. They have all sorts of income. a dozen other things. But she is called upon to teach a few days and they do not need her any more. She becomes eligible maybe for 39 weeks of unemployment compensation.

It is something that brings the system in disrepute. It is something that the people who work day after day and pay their own way and carry the burden of taxes are apt to turn against in our system of unemployment compensation because we have other problems.

It is really in the interest of sound legislation that this amendment get further attention before this calendar year

expires.

I commend the distinguished Senator for the clarity and the emphasis which he has placed on it because it is a responsibility of the Senate.

Mr. GRIFFIN. It is an example of what the Federal Government can do to people while we are trying to help people.

In some States, there were no unemployment compensation programs for schoolteachers and school employees until we passed this law last year. But in Michigan, we already had unemployment compensation coverage for school employees. So along comes a Federally mandated program and it imposes entirely new criteria on a State that already has an unemployment compensation program for its teachers.

And the Federal Government does this without really taking into account the fact that teachers, who are paid on an annual contract for the most part but do not work the full calendar year, have an entirely different situation than other

types of employees.

Mr. CURTIS. Yes.

Mr. GRIFFIN. And that substitute teachers are still a different category of

We have passed this broad law without taking into account how it impacts on the system that is already in place in the

Mr. CURTIS. The Senator is correct. Mr. GRIFFIN. I hope very much that the committee will hold hearings and decide to make a change.

I thank the Senator.

Mr. CURTIS. Mr. President, I believe the conferees on this bill have done a very credible job. The bill, as it passed the Senate, is very much like what came back from conference. The House did extend this program for 12 months, the Senate for 6, they agreed upon 7.

There was one provision in the House bill that someone did not have to accept employment unless their offered employment was 120 percent of the unemployment compensation benefits they would draw.

I do not think that is a sound provision. I am glad that the Senate conferees were able to strike that out.

As the conference report stands, someone does not have to accept employment unless it equals the amount of the unem-

ployment compensation benefits. I voted against this measure when it

passed the Senate. I still am oppossed to it. There is a basic philosophical reason for my opposition. It shifts the cost of this emergency program from the employers, and in about three States the employees, to the General Treasury. Over a period of 2 years it is going to add about \$1 billion to the burdens of our Treasury.

We had an amendment on the floor here that the Senator from Nebraska now speaking offered. It failed to pass, it was to strike that out.

In addition to putting a burden of \$1 billion on our budget now, that we cannot stand, it is the beginning of a trend to shift the burden of unemployment compensation from the employers, as an ordinary course of doing business, to the General Treasury.

But with that shift, it changes the unemployment compensation system from one that has the characteristics of insur-

ance to welfare.

Also, I do not feel we should extend this emergency program until we have gone farther in cleaning up some of the abuses.

Unemployment compensation now is paid regardless of the income or assets of the recipient. It may be argued that that is all right where it is paid for by the employer, but certainly that is not correct when it is paid for by all the taxpayers from the general funds.

While I am opposed to the measure, I do say that the conferees did a good job in their meeting with the House because the House bill was more objectionable than what we passed here in the Senate.

Mr. President, I yield the floor. The PRESIDING OFFICER (Mr. DE-CONCINI). The question is on agreeing to the conference report.

The conference report was agreed to.

ENERGY RESEARCH AND DEVELOP-MENT ADMINISTRATION AUTHOR-IZATIONS, 1977

Mr. ROBERT C. BYRD. Mr. President, there is one measure on the calendar that was ready for clearance by unanimous consent. We found that Mr. HAYAKAWA had an amendment that he wished to call up and Mr. Jackson is here to handle the measure.

I ask unanimous consent that Senate proceed to the consideration of S. 36.

The PRESIDING OFFICER. The bill will be stated by title. The legislative clerk read as follows:

A bill (S. 36) to authorize Appropriations to the Energy Research and Development Administration in accordance with sec. 261 of the Atomic Energy Act of 1954, as amended. of 1974, and sec. 16 of the Federal Nonnuclear Energy Research and Development Act of sec. 305 of the Energy Reorganization Act 1974, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Energy and Natural Resources with amendments as follows:

On page 2, in line 22, strike out "\$463,742,-

000" and insert "\$464,242,000". On page 9, in line 21, strike out "5 MM" and insert "5MW"

On page 10, in line 19, strike out "Interior and Insular Affairs" and insert "Energy and Natural Resources".

On page 11, in line 11, strike out "Interior and Insular Affairs" and insert "Energy and Natural Resources".

On page 12, in line 14, strike out "Interior

and Insular Affairs" and insert "Energy and Natural Resources

On page 13, in line 19, strike out "Interior and Insular Affairs" and insert "Energy and Natural Resources'

On page 14, in line 4, strike out "(10)" and insert "(7) (H)".

On page 14, in line 14, strike out "Interior

and Insular Affairs" and insert "Energy and Natural Resources".

On page 15, in line 16, strike out "Interior and Insular Affairs' and insert "Energy and Natural Resources".

On page 15, in line 20, strike out "the support of" and insert "to support".

On page 16, in line 8, strike out "Interior and Insular Affairs" and insert "Energy and Natural Resources"

On page 20, in line 18, strike out "March 10" and insert "October 1".

On page 20, in line 21, strike out "Interior and Insular Affairs" and insert "Energy and Natural Resources".

On page 23, in line 16, strike out "\$6,000,-

On page 23, in line 10, strate out "5,000,000" and insert "\$6,660,000".

On page 23, in line 25, strike out "title III, subsection 302(1) and (2)" and insert "title II, subsection 202 (1) and (2)".

On page 25, in line 21, strike out "enacted of another the data of another and the this Act."

after the date of enactment of this Act, On page 34, in line 8, strike out "1004" and

insert "504". On page 34, in line 10, strike out "905 and 906" and insert "505 and 506".

On page 36, in line 6, strike out "905 and

906" and insert "505 and 506" On page 36, in line 17, strike out "904" and insert "504".

On page 37, in line 10, strike out "12(c)"

and insert "512(c)" On page 38, in line 2, strike out "904" and

"504" On page 40, in line 8, strike out "1004" and insert "505".

On page 40, in line 9, strike out "provide" and insert "invite".

On page 40, in line 10, strike out "for the

conduct" On page 40, in line 12, strike out "of" and

insert "to submit a plan for the conduct of". On page 45, in line 20, strike out "(a)" and insert "(c)".

On page 47, in line 12, strike out "(a)" and insert "(c)".

On page 47, in line 17, strike out "(a)" and insert "(c)

On page 47, in line 25, strike out "912(c)" and insert "512(c)".

On page 48, in line 4, strike out "(a)" and insert "(c)".

On page 48, in line 6, strike out "904" and insert "504".

On page 49, in line 22, after "1974" insert "as amended".

On page 50, in line 15, strike out "905 and 906" and insert "505 and 506" On page 51, in line 1, strike out "907" and

insert "507". On page 51, in line 15, strike out "904(d)"

and insert "504(d)" On page 52, in line 24, strike out "904" and insert "504".

On page 52, in line 25, strike out "905 and

906" and insert "505 and 506". On page 53, in line 11, after "1974," insert "as amended"

On page 54, in line 2, strike out "907 and 908" and insert "507 and 508".

Mr. JACKSON. Mr. President, I ask unanimous consent that all of the amendments be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the committee amendments.

The committee amendments were agreed to en bloc.

Mr. JACKSON. Mr. President, I yield to the distinguished Senator from California who I believe wishes to propose an amendment.

The PRESIDING OFFICER. The Senator from California.

UP AMENDMENT NO. 147

Mr. HAYAKAWA. Mr. President, I have an unprinted amendment to Senate bill 36 on energy research and development.

The PRESIDING OFFICER. amendment will be stated.

The legislative clerk read as follows:

The Senator from California (Mr. HAYAkawa) proposes unprinted amendment No.

On page 28, beginning with line 17, strike out all through line 8 on page 29.

Mr. JACKSON. Mr. President, I am willing to accept the amendment.

I might say that this amendment, which affects the collective bargaining problems at Lawrence Livermore Laboratory, was put on in the House. We did not put the amendment on in the

I think it is a matter that the House should reconsider. In light of the Senator's amendment I will accept it, because this should be finalized by the House.

Mr. HAYAKAWA. I thank the Senator. It is something of very great importance to the people of the laboratory. It seems to me to be a requirement of that one laboratory, as opposed to all others. This is why I have submitted this amendment.

Mr. JACKSON. Mr. President, it is largely a California problem.

Is that not correct?

Mr. HAYAKAWA. I understand that is the case.

Mr. JACKSON. I defer to the Senator, the distinguished educator from California.

Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 36

An act to authorize appropriations to the Energy Research and Development Administration in accordance with section 261 of the Atomic Energy Act of 1954, as amended, section 305 of the Energy Reorganization Act of 1974, and section 16 of the Federal Nonnuclear Energy Research and Development Act of 1974, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress finds that the traditional energy sources of this country are being depleted and we must convert to other forms of energy. In addition, it may be necessary to undertake aggressive conservation programs cut back on energy consumption and eliminate waste and reduce energy use. In spite of these efforts, Congress finds that energy consumption in this country will approximately double in coming decades. Therefore, it is essential that the policy of the Congress be established that every form of energy be put into use at the earliest possible moment, consistent with existing environmental laws, that new elements of energy production be placed on line as quickly as possible.

AUTHORIZATION OF APPROPRIATIONS FOR FISCAL YEAR 1977

SEC. 2. In accordance with section 305 of the Energy Reorganization Act of 1974 (42 U.S.C., 5875), and section 16 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5915), there is hereby authorized to be appropriated to the Energy Research and Development Administration for fiscal year 1977, subject to the provisions of this Act, the following:

(A) For nonnuclear energy research, development, and demonstration of fossil, solar, geothermal, and other forms of energy for energy conservation, and for scientific and technical education, \$1,175,671,000.

(B) For environmental research and safety, basic energy sciences, program support, and related programs, not directly associated with nuclear programs, \$464,242,000.

TITLE I-NONNUCLEAR PROGRAMS OPERATING EXPENSES

SEC. 101. For "Operating expenses", for the following programs, a sum of dollars equal to the total of the following amounts:

Fossil Energy Development

(1) Coal:(A) Coal liquefaction:

Costs, \$81,130,000.

Changes in selected resources,--\$4,300,000. (B) High Btu gasification (coal): Costs, \$59,254,000.

Changes in selected resources, -\$14,200,-

(C) Low Btu gasification (coal): Costs, \$50,000,000.

Changes in selected resources, -\$3,000,000.

(D) Advanced power systems:

Costs, \$12,800,000. Changes in selected resources, \$8,700,000. (E) Direct combustion (coal):

Costs, \$55,116,000.

Changes in selected resources, \$2,284,000. (F) Advanced research and supporting technology:

Costs, \$38,500,000.

Changes in selected resources, \$1,100,000: Provided, that the following thereof shall be for Systems Studies:

Costs, \$9,350,000.

Changes in selected resources, \$1,000,000. (G) Demonstration plants (coal):

Costs, \$50,600,000.

Changes in selected resources, \$2,400,000. (H) Magnetohydrodynamics:

Costs, \$27,841,000.

Changes in selected resources, \$10,145,000.

(2) Petroleum and natural gas:(A) Natural gas and oil extraction:

Costs, \$35,269,000. Changes in selected resources, \$7,900,000.

(B) Supporting research:

Costs, \$1,831,000. Changes in selected resources, \$0.

(3) In-situ Technology:

(A) Oil shale: Costs, \$12,085,000.

Changes in selected resources, \$9,000,000.
(B) Coal gasification:

Costs, \$13,536,000.

Changes in selected resources, \$1,500,000.

(C) Supporting research:

Costs, \$1,310,000.

Changes in selected resources, \$0.

Solar Energy Development

(4) Solar Heating and Cooling:

Costs, \$88,000,000.

Changes in selected resource, \$26,500,000.

(5) Other Solar Energy Programs:

Costs, \$136,100,000.

Changes in Selected resources \$35,600,000; including costs of \$3,000,000 and changes in selected resources of \$1,000,000 for initiation of activities of the Solar Energy Research Institute and costs of \$112,200,000 and changes in selected resources of \$27,500,000 for solar electric applications.

Geothermal Energy Development

(6) Geothermal Energy:

(A) Hydrothermal Technology Applications:

Costs, \$14,200,000.

Changes in selected resources, \$1,800,000.

(B) Other Geothermal Energy Development:

Costs, \$46,100,000.

Changes in selected resources, \$3,600,000.

Conservation Research and Development

(7) Conservation Research and Development:

(A) Electric Energy Systems:

Costs, \$22,000,000.

Changes in selected resources, \$4,000,000.

(B) Energy Storage: Costs, \$32,000,000.

Changes in selected resources, \$6,000,000.

(C) Building Conservation:

Costs, \$27,600,000.

Changes in selected resources, \$4,400,000.

(D) Industry Conservation:

Costs, \$18,000,000.

Changes in selected resources, \$4,000,000.

(E) Transportation Energy Conservation, including \$3,000,000 for methanol and other alternate fuels:

Costs, \$31,400,000.

Changes in selected resources, \$4,600,000.

(F) Improved Conversion Efficiency:

Costs, \$15,300,000.

Changes in selected resources, \$11,700,000.
(G) Energy Conservation Institutes and Extension Service:

Costs, \$18,000,000.

Changes in selected resources, \$7,000,000.

(H) Small Grant Program for Appropriate Technologies:

Costs, \$7,500,000.

Changes in selected resources, \$2,500,000.

(I) To carry out the municipal solid waste demonstration price guarantee program authorized by section 107 of this Act: Costs, \$200,000.

Changes in selected resources, \$4,800,000.

Scientific and Technical Education

(8) Scientific and Technical Education: Costs, \$3,750,000.

Changes in selected resources, \$1,250,000.

PLANT AND CAPITAL EQUIPMENT

SEC. 102. (a) For "Plant and capital equipment", including construction, acquisition, or modification of facilities, including land acquisition; and acquisition and fabrication of capital equipment not related to construction, a sum of dollars equal to the total of the following amounts:

(1) Fossil Energy Development Coal.
(A) Project 77-1-a, modifications and additions to Energy Research Centers, \$6,900,-

(B) Project 77-1-b for a high Btu pipeline gas demonstration plant (which is estimated to cost a total of \$500,000,000, including the non-Federal share of such cost) is authorized. The amount authorized for such plant is \$10,000,000.

(C) Project 7-1-c for fuel gas low Btu demonstration plant (which is estimated to cost a total of \$380,000,000, including the non-Federal share of such cost) is authorized. The amount authorized for such plant is \$5,000,000.

(D) Project 77-1-d, MHD component development and integration facility, \$6,700,-000

(2) Conservation Research and Development.

(A) Project 77-17-a Combustion Research Center, \$8,500,000.

(3) Capital Equipment, not related to construction.

(A) Fossil energy development, \$1,020,000.

(B) Conservation research and develop-

ment, \$12,000,000.

Solar energy development, \$8,500,000, (C) including \$1,500,000 for initiation of activities at the Solar Energy Research Institute in the areas of modification of facilities, acquisition and fabrication of capital equipment, and design of the final installation.

(D) Geothermal energy development, \$2,

350,000.

(b) There is authorized an additional sum of \$50,000,000 for the clean boiler fuel demonstration plant (project 76-1-a) authorized by section 101(b)(1) of the Act of December 31, 1975 (89 Stat. 1065).

(c) There is authorized an additional sum of \$15,000,000 for the five megawatt solar thermal test facility (76-2-a) authorized by section 101(b) (2) of the Act of December 31,

1975 (89 Stat. 1065).

(d) Solar Energy Development: Project 77-18-j, \$10,000,000 for the following Solar Energy Development Projects:

- (i) OTEC sea test facility, \$1,000,000. (ii) two 200 kW wind energy facilities, \$1,-000,000
- (iii) two 1.5 MW high velocity wind facilities, \$1,500,000
- (iv) total solar energy plant, \$1,500,000. (v) 5 MW solar thermal demonstration for
- small community, \$2,000,000. (vi) biomass conversion facility, \$3,000,000.

PROVISIONS RELATING ONLY TO FOSSIL ENERGY DEVELOPMENT PROGRAMS

Sec. 103. Funds appropriated pursuant to this Act for "Operating expenses" for fossil energy purposes may be used for (1) any fawhich may be required at locations, other than installations of the Administration, for the performance of research and development contracts, and (2) grants to any organization for purchase or construction of research facilities. No such funds shall be used for the acquisition of land. Fee title to all such facilities shall be vested in the United States, unless the Administrator determines in writing that the programs of research and development authorized by this Act shall best be implemented by vesting fee in an entity other than the United States: Provided, That, before approving the vesting of title in such entity the Administrator shall (A) transmit such determina-tion, together with all pertinent data, to the Committee on Science and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate, and (B) wait a period of thirty calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain), unless prior to the expiration of such period each such committee has transmitted to the Administrator written notice to the effect that such committee has no objection to the proposed action. Each grant shall be made under such conditions as the Administrator deems necessarv to insure that the United States will receive therefrom benefits adequate to justify the making of the grant. No such funds shall be used under clause (1) of the first sentence of this section for the construction of any major facility the estimated cost of which including collateral equipment, exceeds, \$250,000 unless the Administrator shall (1) transmit a report on such major facility showing the nature, purpose, location, and estimated cost of such facility to the Committee on Science and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate, and (ii) wait a period of thirty calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain), unless prior to the expiration of such period each such committee has transmitted to the Administrator written notice to the effect that such committee has no objection to the proposed action.

SEC. 104. Not to exceed 3 per centum of all funds appropriated pursuant to this Act for "Operating expenses" for fossil energy purposes may be used by the Administrator to construct, expand, or modify laboratories and other facilities, including the acquisition of land, at any location under the control of the Administrator, if the Administrator determines that (1) such action would be necessary because of changes in the national program authorized to be funded by this Act or because of new scientific or engineering developments, and (2) deferral of such action until the enactment of the next authorization Act would be inconsistent with the policles established by Congress for the Administration. No portion of such sums may be obligated for expenditure or expended for such activities, unless (A) a period of thirty calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain) has passed after the Administrator has transmitted to the Committee on Science and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate a written report containing a full and complete statement concerning (i) the nature of construction, expansion, or modification, (ii) the cost there-of, including the cost of any real estate action pertaining thereto, and (iii) the reason why such construction, expansion, or modification is necessary and in the national interest, or (B) each such committee before the expiration of such period has transmitted to the Administrator written notice to the effect that such committee has no objection to the proposed action: Provided. That this sentence shall not apply to projects to construct, expand, or modify such laboratories or facilities, the estimated total cost of which does not exceed \$25,000.

Sec. 105. Notwithstanding any other applicable provision of law, the initial authorization in this Act or any other Act heretofore or hereafter enacted to construct, pursuant to section 8 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5907), any fossil energy demonstration plant shall expire at the end of the three full fiscal years following the date of enactment of such authorization, unless (1) funds to construct each such plant are appropriated or otherwise provided pursuant to applicable law prior thereto, or (2) such authorization period is extended by specific Act of Congress hereafter enacted.

SEC. 106. All moneys received by the Administrator from any fossil energy activity shall be paid into the Treasury to the credit of miscellaneous receipts, except that on December 1 of each year the Administrator shall provide to the Committee on Science and Technology of the House of Representa-tives and the Committee on Energy and Natural Resources of the Senate a report of all such receipts for the preceding fiscal year, including, but not limited to, the amount and source of such revenues and the program and subprogram activity generating such revenues

GENERAL PROVISIONS RELATING TO NONNU-CLEAR PROGRAMS OTHER THAN FOSSIL EN-ERGY DEVELOPMENT

SEC. 107. The Administrator is authorized, subject to the appropriation of funds pursuant to section 101(7)(H) of this Act, to establish and implement, under section 7(a) (4) of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5906(a)(4)) and in accordance with section 7(c) of such Act (42 U.S.C. 5906(c)), price-support program to demonstrate mu nicipal solid waste reprocessing for the production of fuels and energy intensive products. Prior to entering into any contract for such demonstration, the Administrator shall submit to the Committee on Science and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate a full and complete report on the proposed commercial demonstration facility and the necessary project demonstration guarantees. Such contract shall not be finalized under the authority granted by this section prior to the expira-tion of ninety calendar days (not including any day on which either House of Congress is not in session because of an adjournment of more than three calendar days to a day certain) from the date on which such report is received by such committees.

GENERAL PROVISIONS RELATING TO ALL NON-NUCLEAR PROGRAMS

SEC. 108. Except as otherwise provided in this Act-

(a) no amount appropriated pursuant to this Act may be used for any nonnuclear program in excess of the amount actually authorized for that particular program by this

(b) no amount appropriated pursuant to this Act may be used for any nonnuclear program which has not been presented to, or requested of, the Congress,

unless (1) a period of thirty calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain) has passed after the receipt the Committee on Science and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate of notice given by the Administrator containing a full and complete statement of the action proposed to be taken and the facts and circumstances relied upon to support such proposed action, or (2) each such committee before the expiration of such period has transmitted to the Administrator written notice to the effect that such com-mittee has no objection to the proposed action: Provided, That the following categories may not, as a result of reprograming, be decreased by more than 10 per centum of the sums appropriated pursuant to this Act for such categories: Coal, petroleum and natural gas, in situ technology, solar, geothermal, and conservation.

SEC. 109. The Administrator shall submit to the Committee on Science and Technology of the House of Representatives and the Committee on Energy and Natural Resources of the Senate a detailed explanation of the allocation of all of the funds appropriated pursuant to this Act for nonnuclear energy programs and subprograms, reflecting the relationships, consistencies, and dissimilar-ities between those allocations and (a) the comprehensive program definition trans-mitted pursuant to section 102 of the Geothermal Energy Research, Development, and Demonstration Act, (b) the comprehensive program definition transmitted pursuant to section 15 of the Solar Energy Research, Development, and Demonstration Act of 1974 (42 U.S.C. 5564), (c) the comprehensive plan nonnuclear energy research, development, and demonstration transmitted pursuant to section 6 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5905).

SEC. 110. Section 13 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5912) is amended by—

- (1) striking, in the first sentence of subsection (a), the words "At the request of the Administrator, the" and inserting therein The":
- (2) striking, in the first sentence of subsection (b), the words "prepare or have prepared an assessment of the availability of adequate water resources." and inserting therein the following: "request the Water Resources Council to prepare an assessment

of water requirements and availability for such project."; and
(3) adding at the end thereof a new

subsection to read as follows

"(f) The Administrator shall, upon enact ment of this subsection, be a member of the Council."

SEC. 111. (a) The Administrator shall classify each recipient of any award, contract, or other financial arrangement in any nonnuclear research, development, or demonstration category as-

(1) a Federal agency,

(2) a non-Federal governmental entity,

(3) a profitmaking enterprise (indicating whether or not it is a small business concern),

(4) a nonprofit enterprise other than an educational institution, or

(5) a nonprofit educational institution

The information required by subsection (a), along with the dollar amount of each award, contract, or other financial arrangement made, shall be included as an appendix to the annual report required by section 15(a) of the Federal Nonnuclear Energy Research and Development Act of 1974 U.S.C. 5914): Provided, That small purchases or contracts of less than \$10,000, which are expected from the requirements of advertising by section 252(c) (3) of title 41, United States Code, shall be exempt from the reporting requirements of this section.

SEC. 112. (a) There shall be established within the Administration of a program for appropriate technology under the direction the Assistant Administrator for Conservation Research and Development. The Administrator shall develop and implement a program of small grants for the purpose of encouraging development and demonstration projects described in subsection (c) of this

(b) The aggregate amount of financial support made available to any participant in such program, including affiliates, under this section shall not exceed \$50,000 during any

two-year period.

(c) Funds made available under this section shall be used to provide for a coordinated and expanded effort for the development and demonstration of, and the dissemination of information with respect to, energy-related systems and supporting technologies appropriate to-

(1) the needs of local communities and the enhancement of community self-reliance through the use of available resource

(2) the use of renewable resources and the conservation of nonrenewable resources;

(3) the use of existing technologies ap-plied to novel situations and uses;

(4) applications which are energy-conserving, environmentally sound, small scale, durable and low cost; and

(5) applications which demonstrate sim-plicity of installation, operation and main-

tenance.

- (d) (1) Grants, agreements or contracts under this section may be made to individuals, local nonprofit organizations and institutions, State and local agencies, Indian tribes and small businesses. The Administration shall develop simplified procedures with respect to application for support under this section.
- (2) Each grant, agreement or contract under this section shall be governed by the provisions of section 9 of the Federal Non-Nuclear Energy Research and Development Act of 1974 and shall contain effective provisions under which the Administration shall receive a full written report of activities supported in whole or in part by funds made available by the Administration; and
- (3) In determining the allocation of funds among applicants for support under this section the Administrator may take into consideration:

(A) the potential for energy savings or energy production:

(B) the type of fuel saved or produced;

(C) the potential impact on local or regional energy or environmental problems; and

(D) such other criteria as the Administrator finds necessary to achieve the purposes of this Act or the purposes of the Federal Nonnuclear Energy Research and Development Act of 1974.

Guidelines implementing this section shall promulgated with full opportunity for

public comment.

(e) The Administrator shall—

(1) prepare and submit no later than October 1, 1977, a detailed report on plans for implementation, including the timing of implementation, of the provisions of this section to the Committee on Energy and Natural Resources of the Senate and the Committee on Science and Technology of the House of Representatives and shall keep such committees fully and currently in-formed concerning the development of such plans; and

(2) include as a part of the annual report equired by section 15(a)(1) of the Federal Nonnuclear Energy Research and Develop-ment Act of 1974 beginning in 1977, a full and complete report on the program under

this section.

SEC. 113. The Administrator, in consulta-tion with the Administrator of the Environmental Protection Agency, shall submit a report to the Congress, six months after enactment of this Act, on the environmental monitoring, assessment, and control efforts, relating to environment, safety, and health, which are required to successfully demonstrate any project, which is subject to sections 8 (e) and (j) of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5907 (e) and (f)), and is authorized by this Act or any prior Act. The report shall contain the extent to which monitoring and control is required, the estimated costs thereof.

TITLE II-FOR NONNUCLEAR ENVIRON-MENTAL RESEARCH AND SAFETY, BASIC ENERGY SCIENCES, PROGRAM SUPPORT, AND RELATED PROGRAMS

OPERATING EXPENSES

SEC. 201. For "Operating expenses", for the following programs, a sum of dollars equal to the total of the following amounts:

Biomedical and environmental research, \$119,500,000, of which \$1,000,000 shall be made available to the Water Resources Council to carry out the provisions of section 13 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5912)

(2) Operational safety, \$4,500,000.
(3) Environmental control te

- Environmental control technology, \$13,100,000.
 - (4) Basic energy sciences for the following:

(A) Material sciences, \$45,600,000.
(B) Molecular, mathematical, and geosciences, \$46,700,000.

- (5) Program support, \$205,635,000: Provided, That \$1,250,000 is authorized to be appropriated pursuant to this subparagraph to reimburse the National Bureau of Standards for costs incurred in carrying out the provisions of section 14 of the Federal Nonnuclear Energy Research and Develop-ment Act of 1974 (42 U.S.C. 5913).
- (6) To carry out the provisions of section 11 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5910), \$500,000 for the Council on Environmental Quality.

PLANT AND CAPITAL EQUIPMENT

Sec. 202. For "Plant and capital equipment", including construction, acquisition, or modification of facilities, including land acquisition; and acquisition and fabrication

of capital equipment not related to construction, a sum of dollars equal to the total of the following amounts:

(1) Biomedical and Environmental Re-

Project 77-6-a, modifications and additions to biomedical and environmental research facilities, various locations, \$4,200,-

(2) Program Support:

Project 77-16-a, laboratory support complex, Los Alamos Scientific Laboratory, New Mexico, \$6,000,000.

(3) Capital Equipment, not related to construction:

(A) Biomedical and environmental research, \$6,660,000.

(B) Environmental control technology, \$282,000.

(C) Basic energy sciences for the following:
(i) Material sciences, \$3,900,000.

(ii) Molecular, mathematical, and geosciences, \$3,000,000.

(D) Program Support, \$4,725,000.

LIMITATIONS

SEC. 203. The Administration is authorized to start any project set forth in title II, sub-section 202 (1) and (2) only if the cur-rently estimated cost of that project does not exceed by more than 25 per centum the estimated cost set forth for that project.

TITLE III-GENERAL PROVISIONS

SEC. 301. Subject to the applicable requirements and limitations of this Act, when so specified in appropriations Acts amounts appropriated for the Administration pursuant to this Act for "Operating expenses" or for "Plant and capital equipment" may be merged with any other amounts appropriated for like purposes pursuant to any other Act authorizing appropriations for the Administration.

SEC. 302. When so specified in appropriation Acts, amounts appropriated pursuant to this Act for "Operating expenses" or for "Plant and capital equipment" may remain

available until expended.

SEC. 303. (a) Any Government-owned contractor operated laboratory, energy research center, or other laboratory performing func-tions under contract to the Administration may, with the approval of the Administrator. a reasonable amount of its operating budget for the funding of employee-suggested research projects up to the pilot stage of development. It shall be a condition of any such approval that the director of the laboratory or center involved form an in-ternal review mechanism for determining which employee-suggested projects merit funding in a given fiscal year; and any such project may be funded in one or more succeeding years if the review process indicates that it merits such funding.

(b) Each director of a laboratory or center specified in subsection (a) of this section shall submit an annual report to the Administrator or projects being funded under this section; and on completion of each such project shall submit a report to the Techni-cal Information Center for the Administration for inclusion in its data base.

SEC. 304. The Administrator is authorized to perform construction design services for Administration construction project whenever the Administrator determines that the project is of such urgency that con-struction of the project should be initiated promptly upon enactment of legislation appropriating funds for its construction in order to meet the needs of national defense or protection of life and property or health and safety.

SEC. 305. Any moneys received by the Administration may be retained and used, as provided in annual appropriations Acts for operating expenses (except sums received from disposal of property under the Atomic Energy Community Act of 1955 and the Strategic and Critical Materials Stockpiling Act, as amended, and fees received for tests or investigations under the Act of May 16, 1910, as amended (42 U.S.C. 2301; 50 U.S.C. 98h; 30 U.S.C. 7)), notwithstanding the provisions of section 3617 of the Revised Statutes (31 U.S.C. 484), and may remain available until expended. Funds may be obligated for purposes stated in this section only to the extent provided in appropriations Acts

SEC. 306. Transfers of sums from the "Operating expenses" appropriation may be made to other agencies of the Government for the performance of the work for which the appropriation is made, and in such cases the sums so transferred, may be merged with the appropriation to which transferred.

SEC. 307. Notwithstanding any other provision of this Act, provisions of sections 304, 305, and 306 of this Act shall not be applicable to any fossil energy activity, program, or subprogram.

SEC. 308. (a) Each officer or employee of the Energy Research and Development Administration who-

(1) performs any function or duty under this Act or any other Act amended by this

Act; and (2) has any known financial interest-

(A) in any person engaged in the business, other than at the retail level, of developing, producing, refining, transporting by pipeline, or converting into synthetic fuel, minerals, wastes, or renewable resources, or in the generation of energy from such minerals, astes, or renewable resources, or in conducting research, development, and demonstration with financial assistance under this Act or any other Act amended by this Act, or

(B) in property from which minerals are commercially produced,

shall, beginning on February 1, 1977, annually file with the Administrator a written statement concerning all such interest held by such officer or employee during the preceding calendar year. Such statements shall be available to the public.

(b) The Administrator shall-

(1) act within ninety days after the date of enactment of this section-

(A) to define the term "known financial interest" for purposes of paragraph (2) of subsection (a) of this section; and

(B) to establish the methods by which the requirement to file written statements specified in subsection (a) of this section will be monitored and enforced, including appropriate provisions for the filing by such officers and employees of such statements and the review by the Administrator of such statements: and

(2) report to the Congress on June 1 of each calendar year with respect to such dis-closures and the actions taken in regard thereto during the preceding calendar year.

(c) In the rules prescribed in subsection (b) of this section, the Administrator may identify specific positions within the Administration which are of a policymaking nature and provide that officers or employees occupying such positions shall be exempt from the requirements of this section.

(d) Any officer or employee who is subject to, and knowingly violates, this section or any regulation issued thereunder, shall be fined not more than \$2,500 or imprisoned not more than one year, or both.

SEC. 309. The Administrator shall not use any funds appropriated pursuant to this Act under any contract in effect on or after October 1, 1977, for research, services, or material conducted or supplied by the Lawrence Livermore Laboratory for the Energy Research and Development Administration unless that contract specifically provides that the employees of the Lawrence Livermore Laboratory will be guaranteed the establishment of an impartial grievance procedure and further guarantees employees shall have

the right to self-organization, to form, join, or assist labor organizations, to bargain collectively through representatives of their own choosing, and to engage in other concerted activities for the purpose of collective bargaining or other mutual aid or protection, and shall also have the right to refrain from any or all of such activities: Provided, how-That no employee rights or activities shall be guaranteed in such contract which would be in violation of California State

TITLE IV-ORGANIZATIONAL CONFLICTS

SEC. 401. The Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 4901) is amended by adding a new section to read as follows:

"Sec. 19. (a) The Administrator shall by regulation require any person proposing to enter into a contract, agreement, or other arrangement, whether by advertising or ne-gotiation, for the conduct of research, development, evaluation activities, or for technical and management support services to provide the Administrator, prior to entering into any such contract, agreement, or arrangement, with all relevant information bearing on whether that person has a possible conflict of interest with respect to (1) being able to render impartial, technically sound, or objective assistance or advice in light of other activities or relationships with other persons or (2) being given an unfair competitive advantage. Such person shall insure, in accordance with regulations published by the Administrator, compliance with this section by any subcontratcor of such person, except subcontractors: Provided, That this requirement shall not apply to subcontracts of \$10,000 or less.

(b) The Administrator shall not enter into any such contract, agreement, or arrangement unless he affirmatively finds, after evaluating all such information and any other relevant information otherwise available to him, either that (1) there is little or no likelihood that a conflict of interest would exist, or (2) that such conflict has been avoided after appropriate conditions have been included in such contract, agreement, or arrangement: Provided, That if he determines that such conflict of interest exists and that such conflict of interest cannot be avoided by including appropriate conditions therein, the Administrator may enter into such contract, agreement, or arrangement, if he determines that it is in the best interests of the United States to do so and includes appropriate conditions in such contract, agreement, or arrangement to mitigate such conflict.

"(c) The Administrator shall publish rules for the implementation of this section, in accordance with 5 U.S.C. 553, as soon as possible after the date of enactment of this section but in no event later than 180 days after such date."

TITLE V-ENERGY EXTENSION SERVICE

SHORT TITLE

SEC. 501. This title may be cited as the "National Energy Extension Service Act".

FINDINGS AND PURPOSE

SEC. 502. (a) The Congress hereby declares

(1) that the general welfare and the common defense and security require a greater public knowledge of energy conservation opportunities;

(2) that scientific identification and practical demonstration of specifically designed energy conservation opportunities, the dissemination of information relating thereto, and the prompt delivery and acceptance of specific energy conservation opportunities re-

quire a national effort;
(3) that the national effort required to develop, demonstrate, and encourage acceptance and adoption of energy conservation opportunities should be coordinated at the Federal level by the Energy Research and Development Administration;

(4) that a special effort must be made to develop and demonstrate practical alternative energy technologies such as solar heating

and cooling;

(5) that successful implementation of energy conservation and new energy tech-nologies will require both public awareness and individual capability to use the conservation opportunities and new technology;

(6) that this required awareness and capability can only be achieved on a national basis by an active outreach effort;

(7) that existing energy outreach programs are underfunded:

(8) that any Federal outreach program should be organized with the States as full participants, and each State should plan and coordinate the outreach activities within the State, optimizing the use of existing outreach capabilities;

(9) that Federal assistance should be provided for energy outreach activity, including coordinated energy outreach activities and technical support in each State for such

(10) that the Energy Research and Development Administration should provide overall national direction and review of federally

assisted State energy outreach programs.

(b) The Congress declares that the pur-

poses of this title are-

(1) to establish a positive energy outreach program directed toward small business and individual energy consumers and the organizations that influence energy consumption:

(2) to stimulate, provide for and supplement programs for the conduct of evaluation, planning and other technical support of energy conservation efforts, including energy outreach activities of States.

ESTABLISHMENT OF EXTENSION SERVICE

SEC. 503. (a) There is established in the Energy Research and Development Administration an office to be designated as the Energy Extension Service (hereinafter in this Act referred to as the "Service"). The Service shall be headed by a Director who shall be appointed by and directly responsible to the Administrator of the Energy Research and Development Administration (hereinafter referred to as the "Administrator"). The Director shall be a person who by reason of training, experience, and attainments is exceptionally qualified to implement the programs of the Service. There shall be in the Service a Deputy Director who shall be appointed by the Administrator, who shall have such functions, powers, and duties as may be prescribed from time to time by the Director, and who shall act for, and exercise the powers of, the Director during the absence or disability of, or in the event of a vacancy in the office of, the Director.

- (b) The Director shall receive basic pay at the rate provided for level IV of the Executive Schedule in section 5315 of title 5, United States Code, and the Deputy Director shall receive basic pay at the rate provided for level V of such Schedule in section 5316 of such title.
- (c) The Director shall have overall responsibility for the national direction of the comprehensive program developed under section 504 and of all other activities conducted under this title and shall annually review the programs of the various States under sections 505 and 506 to insure that they are effectively promoting the realization of the objectives of this title.

DESCRIPTION OF EXTENSION SERVICE

SEC. 504. (a) The Service shall develop and implement a comprehensive program for the identification, development, and practical demonstration of energy conserving opportunities, techniques, materials, and equipment, techniques, including opportunities,

methods responsive to local needs or resources, and alternative energy technologies such as solar heating and cooling, for

(1) agricultural, commercial, and small

business operations, and

(2) new and existing residential, commercial, and agricultural buildings or structures. Such program shall provide for technical assistance, instruction, information dissemination, and practical demonstrations in energy conservation opportunities, and shall provide an active interface with end use energy consumers at the local level for the purpose of offering active outreach assistance and affording a communication channel for end user technology requirements. Such outreach assistance shall be provided by means of such appropriate local offices, including metropolitan city offices, county agents, and technical staff assistants, and may be required to provide energy extension services.

(b) The program authorized under subsection (a) of this section shall permit each State to establish a technical support institute at one or more colleges or universities designated by the Governor of that State.

Each such institute shall-

(1) arrange with other colleges and universities within the State to participate in

the work of the institute;

(2) assist in the coordination, support, augmentation and implementation of programs contributing to the understanding of local, State, and regional energy conserva-

tion problems and opportunities;

(3) provide a nucleus of administrative, professional, scientific, technical or other personnel capable of planning, coordinating and directing interdisciplinary programs re-lated to energy conservation methods, technologies and opportunities in support of the energy conservation and energy outreach efforts of such State.

(c) The comprehensive program developed under subsection (a) shall be implemented and carried out within each State pursuant to sections 505 and 506.

(d) The Director shall take such steps as may be necessary to insure that the comprehensive program is implemented in a manner which minimizes conflict with existing services in the private sector of the economy that are similar to those provided under such program.

INITIAL IMPLEMENTATION OF EXTENSION SERVICE

Sec. 505. (a) The Director shall within 45 days after the effective date of this title invite the Governor of each State through competitive procurement to submit a plan for the conduct of energy extension service activities as described in section 504 of this title throughout such State including provisions for appropriate technical support within such State of such activities, to dis-seminate information and provide advice and assistance to individuals, groups, and units of State and local government by means of—

(1) specific studies and recommendations applicable to individual residences, businesses, and agricultural or commercial es-

- tablishments;
 (2) demonstration projects;
 (3) distribution of studies and instructional materials;
- (4) seminars and other training sessions for State and local government officials and the public; and
 - (5) other public outreach programs.
- (b) Each State shall be accorded not more than ninety days to submit a plan to the Director under subsection (a) of this section. The Director shall promptly review such proposals and shall, with the approval of the Administrator, and subject to the limitations of section 512(c) (1) and (2), provide funds adequate for the support of the proposed energy outreach plan of a State if the Director finds that, such plan—

(1) meets the objectives of this title:

(2) was prepared with opportunity for input from State, county, and local officials, State universities and community colleges, cooperative extension services, community service action agencies, and other public or private organizations involved in active energy outreach programs;

(3) consistent with the objectives and requirements of this title, makes optimum use of existing outreach or delivery mechanisms or programs, and includes to the optimum extent any existing State, local, university, or other organizations' programs for energy information, education, or technology transfer which have objectives similar to those of this title and activities similar or related to those specified in section 504 and subsection (a) of this section;

(4) provides that the State will maintain, or require other participating entities within the State to maintain, and make available upon request to the Director, such records with respect to the use and expenditure of any Federal funds paid to the State, or to entitles within the State, under this title as

the Director may require;

(5) provides for the establishment of effective procedures for responding to external

inputs and inquiries;
(6) requires that, to the extent possible, within personnel and funding limitations, on-site energy evaluations will be made available to all consumers and small business concerns, and to other business concerns within such limitations (as to size or otherwise) as the Director may specify:
(7) provides that the State will furnish

and widely disseminate information on the types of assistance available under this title, and under other Federal and State laws, with respect to the planning, financing, installation, and effective monitoring of energy-re-

lated facilities and activities;

(8) provides that the allocation within the State of the funds made available to it under this title will be based on, or give due consideration to, such factors (specifically including potential energy savings and num-ber of persons affected) as the Director determines will best carry out the purpose of this title; and

- (9) requires the establishment and implementation of policies and procedures signed to assure that assistance provided under this title does not replace or supplant the expenditure of other Federal or State or local funds for the same purposes, but rather supplements such funds and increases the expenditure of such State or local funds to the maximum extent possible: Provided, That there shall be no requirement for matching State or local funds in the guidelines, unless such requirement is included in an annual authorization;
- (10) requires effective coordination of the programs under such State plans with other Federal programs which provide funds for university extension programs, in order to avoid duplication;

(11) requires the establishment and implementation of effective procedures specifi-cally designed for the dissemination of information to small business concerns;

- (12) limits to a maximum of 20 per centum the portion of the funds made available under this title which may be used for the pur-chase of equipment, facilities, and library and related materials;
- (13) prohibits the use of any such funds for the purchase of land or interests therein or the repair of buildings or structures; and
- (14) satisfies such other criteria as the Director may establish to carry out the purpose of this title.

IMPLEMENTATION OF NATIONAL EXTENSION SERVICE

Sec. 506. (a) Notwithstanding the provisions of section 505, the Director, on behalf of the Administrator, is authorized and

directed to invite in each State of the United States not then participating in the program at the earliest practicable date, but no later than one year after the effective date of enactment of this title, to submit a plan for the conduct of energy extension service activities, including provisions for appropriate technical support in such State, to disseminate information and provide advice and assistance to individuals, groups, and units of State and local government by means of-

(1) specific studies and recommendations applicable to individual residences, busises, and agricultural or commercial es-

tablishments;

(2) demonstration projects;

(3) distribution of studies and instructional materials:

(4) seminars and other training sessions for State and local government officials and the public; and

- (5) other public outreach programs.(b) Pursuant to authority described in subsection (a) of this section, the director, with the approval of the Administrator, shall issue guidelines for the preparation and submission of State plans under subsection (c). Such guidelines shall be designed to assure that the plans so submitted will be consistent with this title and will effectively contribute to the achievement of its objectives, and shall allow maximum flexibility and the exercise of maximum discretion by the States. In the preparation of such guidelines, the Administrator shall provide a reasonable opportunity for inputs by representatives of the several States and for a reasonable period for public review and comment. In any event, such guidelines—
 (1) shall require the establishment and
- implementation of policies and procedures designed to assure that assistance provided under this title does not replace or supplant the expenditure of other Federal or State or local funds for the same purposes, but rather supplements such finds and increases the expenditure of such State or local funds to the maximum extent possible;

(2) shall require effective coordination of the programs under such State plans with other Federal programs which provide funds for university extension programs, in order to avoid duplication;

(3) shall require the establishment and implementation of effective procedures specifically designed for the dissemination of information to small business concerns;

- (4) shall limit to a maximum of 20 per centum the portion of the funds made available under this title which may be used for the purchase of equipment, facilities, and library and related materials; and
- (5) shall prohibit the use of any such funds for the purchase of land or interests therein or the repair of buildings or struc-
- (c) On the effective date of the guidelines described in subsection (b) of this section, the Director shall invite the Governor of each State not then participating in the program to submit a plan for the conduct extension service activities energy throughout such State.
- (d) Each State plan submitted under subsection (c) shall be approved by the Director if the Director finds that such plan—
 - (1) meets the objectives of this title;
- (2) was prepared with opportunity for input from State, county, and local officials, State universities and community colleges, cooperative extension services, community service action agencies, and other public or private organizations involved in active energy outreach programs;
- (3) consistent with the objectives and requirements of this title, makes optimum use of existing active outreach or delivery mechanisms or programs, and includes to the optimum extent any existing State,

local, university, or other organizations' programs for energy information, education, or technology transfer which have objectives similar to those of this title and activities similar or related to those specified in section 904 and subsection (a) of this section;

(4) provides that the State will maintain, or require other participating entities within the State to maintain, and make available upon request to the Director, such records with respect to the use and expenditure of any Federal funds paid to the State, or to entities within the State, under this title as the Director may require;

(5) provides for the establishment of effective procedures for responding to ex-

ternal inputs and inquiries;

(6) requires that, to the extent possible, within personnel and funding limitations, energy evaluations will be made available to all consumers and small business concerns, and to other business concerns within such limitations (as to size or otherwise) as the Director may specify;

(7) provides that the State will furnish and widely disseminate information on the types of assistance available under this title, and under other Federal and State laws, with respect to the planning, financing, installation, and effective monitoring of energy-

related facilities and activities;

(8) provides that the allocation within the State of the funds made available to it under this title will be based on, or give due consideration to, such factors (specifically including potential energy savings and number of persons affected) as the Director determines will best carry out the purpose of this title: and

(9) satisfies such other criteria as the Director may establish to carry out the purpose

of this title.

(e) If the Director finds that a State plan submitted under subsection (c) does not satisfy the requirements of subsection (d). he shall provide a reasonable opportunity for the State to present arguments in support of such plan and to revise the plan with-in a reasonable period of time to satisfy such

requirements.

- (f) (1) If a State does not submit a plan under subsection (a) or its plan as so submitted (with any revisions made under subsection (e)) is not acceptable, the Director (after giving notice and an opportunity for comment to the Governor of such State) shall develop consistent with other subsections of this section an energy extension service plan for the State involved, which conforms to the requirements of subsection (d). In conducting energy extension service activities under any plan developed under this subsection, the Director is authorized to enter into agreements for the utilization of existing Agriculture Extension Service offices and personnel, or such other offices and personnel as may be appropriate, and to provide funds for such operations; and in carrying out the functions of such offices the Director shall make maximum use of any existing delivery mechanisms for the State or local region concerned which are appropriate for purposes of this section, while coordinating his activities in connection with the performance of such functions with all such mechanisms in the State or region which are related to, but not directly involved in, the program under this title
- (2) Each State shall have a period of one hundred and eighty days after the issuance of the indication referred to in subsection (b) (or a longer period if the Director finds, at the request of the Governor of such State, that an extension is justified) within which to submit its plan under subsection (c) and if necessary to revise such plan under subsection (e) before the Director may undertake the development of a plan for such State under paragraph (1) of this subsection.

- (3) Any such plan developed by the Director shall be transmitted to the Governor of such State adn shall not be implemented for ninety days after the date of transmittal: Provided, That notwithstanding the provisions of paragraphs (1) and (2) of this subsection, no such plan shall be implemented if the Governor within the ninetyday period notifies the Administration in writing of his objection to the implementa-
- tion of said plan.

 (g) The Director shall annually review implementation of State plans approved under subsection (d) to insure continued conformance with the requirements of this title. If the Director determines that the implementation of any approved State plan does not satisfy any of such requirements, he shall notify the Governor of the State and any other designated officials of the deficiency, with specific details, and shall provide a reasonable time and opportunity for remedial action. If, after such reasonable time and opportunity, satisfactory remedial action has not been taken to place the implementation in conformance with such quirements, the Director shall so inform the Administrator, who shall give the Governor notice of intention to terminate Federal assistance, after the opportunity for the Governor's comment, if the implementation continues to not satisfy all such requirements. Federal assistance shall be terminated thereafter if satisfactory action is not taken. In the event Federal assistance is terminated under this subsection, the Director shall proceed in accordance with the procedures in subsection (f) to develop an energy extension service for the State. In so doing, the Director shall provide for continuation of all activities under the State plan which were in conformance with the requirements of this title and shall effect only such changes in the activities under such plan as are necessary to satisfy such requirements. The Director shall give the Governor notice of any such changes and shall provide a reasonable opportunity for the Governor to comment prior to proceeding with the changes.
- (h) In any case where a State has submitted a State energy conservation plan under part C of title III of the Energy Policy and Conservation Act, as amended, the State's plan submitted under subsection (c) of this section shall specifically indicate how its proposed extension service program will complement or supplement any programs of public education under section 362(d) (4) of such Act which are included under such energy conservation plan. In any event, each State plan submitted under subsection (c) of this section shall indicate how its proposed extension service program will complement or supplement any other energy conservation programs being carried out within the State with assistance from Federal funds

or under other Federal laws.

- (i) The Director shall provide financial assistance to each State having a plan approved under subsection (d), from funds allocated to such State under section 512(c), and shall provide information and technical assistance to such State, for the development, implementation, or modification of the State's plan submitted under subsection (c) of this
- (j) Nothing in this title, or in the com-prehensive program developed under section State plan approved under this section, shall have the effect of modifying or altering the relationships existing between educational institutions and the States in which they are located in connection with activities provided for under this title.

ADMINISTRATIVE PROVISIONS

SEC. 507. (a) Director shall promulgate such regulations and directives as may be necessary to carry out the functions and projects of the Service.

- (b) The Director shall consult and cooperate with the Secretary of Housing and Urban Development, the Administrator of the Federal Energy Administration, the Secretary of Agriculture, the Administrator of the Environmental Protection Agency, Secretary of Health, Education, and Welfare, the Community Services Administration (and its Institute for Appropriate Technology), the Secretary of Commerce (and the Regional Centers of the Economic Development Administration in the Department of Commerce), the Administrator of the Small Business Administration, and the heads of other Federal agencies administering energy-related programs, with a view toward achieving maximum coordination with such other programs, and for the purpose of insuring to the maximum extent possible that all energy conservation and new energy technology information disseminated by or through Federal programs in a given area are consistent and are fully coordinated in order to mini-mize duplication of effort and to maximize public confidence in the credibility of Federal or federally assisted prorgams. It shall be the responsibility of the Director to promote the coordination of programs under this title with other public or private programs or projects of a similar nature.
- (c) Federal agencies described in subsection (b) shall cooperate with the Director in disseminating information with respect to the availability of assistance under this title, and in promoting the identification and interests of individuals, groups, or business and commercial establishments eligible for assistance through programs funded under

(d) At such time as the Energy Resources Council is terminated, pursuant to section 108 of the Energy Reorganization Act of 1974, as amended (42 U.S.C. 5818), there shall be established an Interagency Advisory Group, consisting of the Director (as Chairman) and the heads of the Federal agencies described in subsection (b) or their delegates, to assist the Director in carrying out his responsibilities under this section and to provide a mechanism for use by the Director and the heads of such agencies in the performance of their functions under subsections (b) and

COMPREHENSIVE PLAN AND PROGRAM

Sec. 508.(a) The Administrator is authorized and directed to prepare a comprehensive program and plan for Federal energy educa-tion, extension, and information activities authorized by this title and any other law. In the preparation of the program and plan, the Administrator shall utilize and consult with the head of each agency referred to in this title and any other Federal agency with an energy education, extension, or information program. Preparation of such program and plan shall not delay in any way the procedures specified in sections 505 and 506 or the implementation otherwise of this title. Rather, the program and plan should reflect the activities mandated by this title and serve as a mechanism for Federal Government-wide coordination and management of those activities with the activities of other Federal agencies under other law.

The comprehensive program and plan shall include, but not be limited to, the fol-

lowing elements:

(1) specific delineation of responsibility of each participating Federal agency in the conduct of this title:

(2) mechanisms established to coordinate the activities under this title, pursuant to

section 507 (b), (c), and (d);
(3) a detailed summary of all related Federal programs under other law, including program descriptions, types of delivery mechanisms, budget, and objectives;

(4) procedures for defining and measuring the effectiveness, in terms of increased energy efficiency, fuel savings, adoption of new energy technologies, and other appropriate criteria, of the activities under this title and related activities under other law;

(5) an assessment of other existing Federal assistance and incentives, other than public education, extension, and outreach programs, and their relation to such programs in achieving the objectives of this title;

(6) procedures pursuant to section 504(d) to minimize conflict with existing services in the private sector of the economy which are similar to those under this title and other law; and

(7) a comprehensive and integrated plan for the resulting Federal program, taking into account paragraphs (1) through (6).

(c) The Administrator shall transmit the comprehensive program and plan to the President and to each House of Congress within one hundred and eighty days after the date of enactment of this Act. Thereafter, the Administrator shall revise the program and plan on an annual basis and submit the revision as part of the annual fiscal year budget submission and the report required by section 15 of the Federal Nonnuclear Energy Research and Development Act of 1974.

ADVISORY BOARD

Sec. 509. (a) There is hereby established a National Energy Extension Service Advisory Board (hereinafter in this section referred to as the "Board"), which shall consist of not less than fifteen nor more than twenty members appointed by the Administrator from among persons representative of State, county, and local governments, State universities, community colleges, community service action agencies, consumers, small business, and agriculture. The Administrator shall designate one of the members of the Board to serve as its chairman, and shall provide the Board with such services and facilities as may be necessary for the performance of its functions. The Administrator shall reim-burse members of the Board for the full amount of any expenses (including travel expenses) necessarily incurred by them in the performance of their duties as such.

(b) The Board shall carry on a continuing review of the operation of the comprehensive program developed under section 504 and the various State plans approved under sections 505 and 506, for the purpose of evaluating their effectiveness in achieving the objectives of this title and determining how their operation might be improved to furtherance of such objectives.

(c) The Board shall report at least annually to the Administrator, the Director, and the Congress on the status of the program under this title, including any recommendations it may have for administrative or legislative changes to improve its operation.

CONFORMING AMENDMENTS

SEC. 510. (a) Secton 103 of the Energy Reorganization Act of 1974, as amended (42 U.S.C. 5801), is amended by redesignating paragraphs (7) through (11) as paragraphs (8) through (12), respectively, and inserting immediately after paragraph (6), the following new paragraph:

"(7) establishing, in accordance with the National Energy Extension Service Act, an Energy Extension Service to provide technical assistance, instruction, and practical demonstrations on energy conservation measures

and alternative energy systems to individuals,

businesses, and State and local government

(b) Section 108(b) of such Act (42 U.S.C. 5818(b)) is amended by striking out "and" at the end of paragraph (2), by striking out the period at the end of paragraph (3) and inserting in lieu thereof "; and", and by adding after paragraph (3) the following new paragraph:

"(4) insure that Federal agencies fully discharge their responsibilities under sections

507 and 508 of the National Energy Extension Service Act for coordination and planning of their related activities under such Act and any other law, including but not limited to the Energy Policy and Conservation Act.".

(c) Section 108 of such Act is further amended by adding at the end thereof the

following new subsection:

"(e) There is hereby established an Energy Conservation Subcommittee within the Council, which shall be chaired by the Administrator of the Energy Research and Development Administration, to discharge the responsibilities specified in subsection (b) (4) of this section and other related functions associated with the coordination and management of Federal efforts in the areas of energy conservation and energy conservation research, development and demonstration."

RECORDS

SEC. 511. Each State or other entity within a State receiving Federal funds under this title shall make and retain such records as the Administrator shall require, including records which fully disclose the amount and disposition of such funds; the total cost of the facilities and activities for which such funds were given or used; the source and amount of any funds not supplied by the Administrator; and any data and informa-tion which the Administrator determines are necessary to protect the interests of the United States and to facilitate an effective financial audit and performance evaluation. Such recordkeeping shall be in accordance with Federal Management Circular 74-7 (34 C.R.F. part 256) and any modification thereto. The Administrator, or any of his duly authorized representatives, shall have access until the expiration of three years after the completion of the facilities or activities involved, to any books, documents, papers, and records or receipts which the Administrator deems to be related or pertinent, directly or indirectly, to any such Federal funds.

APPROPRIATION AUTHORIZATION

SEC. 512. (a) There are authorized to be appropriated to the Director to carry out this title such sums as may be included in the annual authorization, for the fiscal year 1977 (as provided in section 101(7) (G) of title I of this Act), for the nonnuclear programs of the Energy Research and Development Administration.

(b) To the extent provided in the Act making the appropriation involved, any portion of the amount appropriated pursuant to subsection (a) for any fiscal year may be by the Director, with the proval of the Administrator, to the head of any other Federal agency for payment to or expenditure within one or more States under sections 905 and 906 upon a determination by the Director that the existence of regular payment channels or administrative relationships between that agency and the State involved (or entities within such State) makes such transfer and such payment or expenditure administratively more efficient or effec-tive or otherwise promotes the achievement of the objectives of this title; but no transfer of funds under this subsection shall result in any loss by the Director of any authority over program direction or control which is vested in him by this title.

(c) (1) The total amount appropriated pursuant to subsection (a) for any fiscal year (other than the portion thereof needed for administrative expenses, which shall not exceed 5 per centum of such total amount) shall be allocated among the States in accordance with the following formula:

(i) one-half shall be divided equally among all the States; and

(ii) one-half shall be divided among the States in proportion to their respective populations, with each State being entitled to a sum that bears the same ratio to one-half of such total amount as such State's population (determined on the basis of the most recent decennial census) bears to the total population of all the States (as so determined).

Amounts allocated to any State for any fiscal year in accordance with paragraphs (1) and (2) shall be expended only within that State.

(2) During the fiscal year in which this title becomes effective, the Director shall provide funds in accordance with paragraph (1) of this subsection for the implementation of the energy extension service activities in the maximum number of States determined by the Director to be feasible with the total amount appropriated pursuant to subsection (a): Provided, That in no case shall such number be less than ten States

DEFINITIONS

Sec. 513. As used in this title, the term—
(1) "energy conservation" means "energy conservation, efficient energy use and the utilization of renewable energy resources"; and

(2) "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, American Samoa, or any territory or possession of the United States.

Mr. JACKSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EMERGENCY DROUGHT ASSISTANCE

Mr. JACKSON. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on S. 925

The PRESIDING OFFICER (Mr. DE CONCINI) laid before the Senate the amendment of the House of Representatives to the bill (S. 925) to provide temporary authorities to the Secretary of the Interior to facilitate emergency actions to mitigate the impacts of the 1976–77 drought.

(The amendment of the House is printed in the House proceedings of to-

day's RECORD.)

Mr. JACKSON. Mr. President, today the House approved S. 925, legislation to provide temporary authorities to the Secretary of the Interior to facilitate emergency actions to mitigate the impacts of the 1976-77 drought. The Senate previously passed the bill on March 15, 1977, by a unanimous vote of 92 to 0.

The bill as passed by the House is identical in most respects to the Senate passed bill. The House, having had additional time to examine the predicted effects of the drought and the drought assistance program proposed by the Administration, has refined the measure so as to keep the basic assistance and mitigation program proposed by the Senate and to allow for the other assistance programs proposed by the administration. The changes made by the House in S. 925 are consistent with the intent of the Senate bill and in my view will be complementary to those programs which have yet to be put into effect.

I ask unanimous consent that a summary of the differences between the House and Senate passed versions of S.

925 be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD. as follows:

COMPARISION OF SENATE AND HOUSE VERSIONS OF S. 925, LEGISLATION TO PROVIDE TEM-PORARY AUTHORITY FOR DROUGHT MITIGATION The following are the substantive differ-

1. The House version clarifies the intent that Indian Irrigation projects constructed by the Secretary and projects constructed pursuant to the Small Reclamation Projects Act of 1956 (70 Stat. 104) as amended are eligible for the programs authorized by the Act.

2. The House version does not provide for making payments to irrigators on Federal reclamation projects who are without water. This is in keeping with the recommendation by the Administration that such activities are within the programs of the Department of Agriculture.

3. The House versions provides an allocation of the funding made available pursuant to the Act and the Emergency Fund Act of

194 as follows:

(a) authorizes an appropriation of \$100,-000,000 for purposes of the Act (the Senate version authorized \$200 million) of which not more than 15 percent may be made available for purposes other than the "water bank" program as authorized in both versions of the bill:

(b) provides that up to 15 percent of the Fiscal Year 1977 funds available to the Secretary of the Interior for the Emergency Fund Act of 1948 (62 Stat. 1052) may be used for non-Federally financed irrigation proj-

ects: and

(c) provides up to 5 percent of the Fiscal Year 1977 funds available to the Secretary of the Interior for the Emergency Fund Act of 1948 (62 Stat. 1052) may be available to State government drought emergency pro-

4. Up to \$10,000,000 of the funds available under the Act may be used for the pur-chase of water for the purposes of mitigating damage to fish and wildlife resources due

drought conditions.

5. The Senate version provided that irrigators not on Federal projects could receive assistance from the Secretary of the Interior for drought mitigation by making application to the respective State authorities. The House version provides for a non-reimbursable grant directly to the States for use in drought mitigation programs.

6. The Senate version of the bill provided for a two year payment deferral for costs owed to the United States for Federal Reclamation Projects; the House version pro-

vides for a one year deferral.

7. The Senate version provided for transauthority of previously appropriated funds in order to expedite funding of the programs pursuant to the Act and the Emergency Fund Act of 1948. Inasmuch as a total of \$130 million has already been included in the Supplemental appropriations measure (H.R. 4877) presently in conference, the transfer authority has been deleted from the House version of the bill.

In summation, whereas the Senate version authorized \$200,000,000 in anticipation of a much wider drought assistance program to be administered by the Secretary of the Interior, the House version authorizes \$100,-000,000 and integrates the authority granted pursuant to the Act with ongoing programs of the Department of Agriculture.

Mr. JACKSON. Mr. President, I recommend that the Senate adopt S. 925 as amended by the House. This action will provide the mechanism by which the Secretary may address the problems associated with the drought and in fact. take measures to prevent adverse social

and economic drought related impacts before they occur. There remain only a few weeks in which drought preventive efforts can be taken before the beginning of the irrigation season in much of the arid West. Final passage today, will allow the Federal Government to take advantage of the remaining time.

Mr. President, I thank the distinguished Senator from Idaho (Mr. Mc-CLURE) for both his efforts when this legislation was before the Senate Energy and Natural Resources Committee and for his assistance on the floor of the Senate. It has been a truly bipartisan effort to bring into being the funding and authority to help the drought stricken farmers in the Western United States. I must remark upon the high degree of coordination shown by the respective committees in both the Senate and the House.

In only 4 weeks time, both Budget Committees have acted upon budget resolutions, both Appropriations Committees have acted upon drought assistance funding, and both legislative committees have acted upon authorizing legislation.

It has been an extraordinary effort and all parties concerned have exhibited exceptional concern and cooperation.

Mr. President, it is my understanding that, whereas the administration had some misgivings regarding the original version of S. 925 as it passed the Senate, the House version is acceptable. From their standpoint, S. 925, as amended, provides a workable program which can be initiated immediately upon approval of this measure. In light of the desperate need of the farmers in the West for assistance, I move that the Senate concur in the amendments by the House to S. 925.

Before making that motion formally, Mr. President, I yield to the distinguished Senator from Idaho (Mr. McClure), who has been active in this matter.

Mr. McCLURE. Mr. President, I understand the urgency with which this matter is being addressed, and I do not intend by any of my actions to delay

As a consequence of my feeling, I will not at this time do more than surface some reservations I have about the action taken by the House, but I do have some very real concerns about what the House has done.

Admittedly, the entire question of how much we can do-and the manner in which it can be done-to alleviate the problems of the farmers in the droughtstricken areas in the West is very un-

We started out, in the bill introduced the Senator from Washington, with a bill that would have appropriated \$200 million to the Secretary of the Interior for use on Bureau of Reclamation projects. The Senator from Washington readily accepted my amendment-and I am grateful to him for having done so-which would broaden it to permit that money to be used not just on Federal reclamation projects but also outside of Federal reclamation projects and with individual irrigators as well as irrigation entities.

The House, in looking at this measure,

has decided that that money is not needed entirely, and they cut the authorization in half. That \$100 million already has been included in the supplemental appropriations bill that was passed in the Senate and is now in conference with the other body.

In addition, the House supplemented that by allowing, for the first time, the Emergency Fund Act of 1948 moneys to be used outside of Federal reclamation projects, and that is to the good. However, at the same time they did that, they limited the application of the Emergency Fund Act moneys for individual irrigators in two very important

First of all, unless it is an irrigation entity, they are limited to not more than 5 percent of the total amount of money that is available in that fund. That fund is being augmented by \$30 million, and that, with carryover funds, would mean that for the individual irrigators, not more than \$1.625 million is available under this act.

I do not know how anyone can say precisely how much individual irrigators might need; but if they do not happen to be on a Federal reclamation project and they do not happen to be a member of an irrigation entity existing under some other statute, they will be limited, out of this total of more than \$132.5 million, to not to exceed \$1.625 million.

I am not at all certain that what we have done here is to enact a very massive preference for everybody except the little guy, the small irrigator, the individual irrigator, who may need it most.

The second limitation that was placed even on that small amount of money by action taken in the other body was to require that that be run through a State program. Many State legislatures, such as in my State of Idaho, already have adjourned for the year. Unless a program is already on the books and administration is already underway, there will not even be a mechanism by which the State can administer the \$1.625 million that might be made available to it.

So, in two very important ways, the opportunity for the individual farmer who may need it most has been severely limited in favor of those who, through one device or another in the past, have

joined irrigation entities.

There is a very strong bias in this bill that has been written by the other body, a very strong bias in favor of those who join a Federal reclamation project as compared to all others. Second, and even more important, there is a very strong bias against the individual farmer who acted independently of an organization. For many of us in the West, that might indeed prove to be a very serious limitation.

My understanding of my conversations with the Senator from Washington is that if experience indicates that either of those inhibitions is so great as to stifle anyone, we will attempt to get some changes in either authorizations or appropriations or in the change of language. Is that correct?

Mr. JACKSON. The Senator is

Mr. President, I just wish to reiterate the fact that the distinguished Senator from Idaho was responsible for broadening the bill that I introduced, S. 925, to include the non-Federal irrigation reclamation projects. I think this was a proper move, because it had the effect of doing equity to the farmers who were not technically under the Federal Reclamation Act.

There is a tremendous amount of irrigated land in that category. I think it would be unfair for Federal tax dollars to be utilized only in the Federal projects and not the non-Federal projects.

I would say to the Senator, because of the emergency nature of the pending matter, I hope we could approve the amendments as adopted by the House even though we are not in total agree-

I would say further I shall support him and we will work together in passing whatever is also needed as time unfolds here in connection with the drought situation in the West. We will either do it in a separate bill or we will put it on as a rider to some other appropriate bill that may be before the Committee on Energy and Natural Resources. I want to assure him of that cooperation.

I think we will all agree we are laboring here under a certain rather unfortunate set of circumstances.

Mr. McCLURE. Mr. President, will the Senator yield on that point?

Mr. JACKSON. Yes.

Mr. McCLURE. I think we need to underscore that. None of us really knows what can be done under any of these conditions. Rather an unprecedented condition exists out in the West, and we do know what the responses are going to be, so I certainly share with the Senator from Washington—

Mr. JACKSON. The Senator is correct. What we tried to do in the Senate-passed bill was to vest substantial discretion in the Secretary to deal with a very broad range of problems that we know exist at the moment, and also problems that we are not sure will arise in any particular form in which we can do something about it

We know there are a lot of problems we cannot do anything about, areas that simply do not have water, period, and it is kind of hard to reallocate that.

The farmers who did not have water who were to get payments under a so-called water bank proposal, we hope that will be handled, and trust that it will, and we will work to that end, under a program that would be handled by the Department of Agriculture because some of those programs fall historically within the jurisdiction of the Agriculture Committees of the House and Senate.

Mr. McCLURE. Without prolonging the discussion here unduly today, let me say I appreciate the assurance given to me by the Senator from Washington because we are dealing in an area with a great deal of uncertainty.

Let me illustrate a couple of the reasons for my concern. As the Senator knows, up until the beginning of this century all irrigation that was done in the Western United States was done without benefit of a reclamation project.

Mr. JACKSON. In fact, everything prior to 1902; the first reclamation act, I believe, was passed in 1902.

Mr. McCLURE. That is correct. So whatever had been done prior to that date was done by individuals, sometimes acting on their own, sometimes in a canal company that was organized as a commercial activity, sometimes done under some form of State law that dealt with irrigation districts as such. So there were a variety of ways in which individuals, acting through State government or on their own through the century, applied whatever water irrigation they could to dried land.

Starting in this century from that point up to, say, 15 years ago most of the new irrigation that was done was done pursuant to either the Carey Act or the Reclamation Act. So that the great majority of new irrigation during that 50-year period was a Federal reclamation project.

In the last 15 years most of the lands in the Western United States that have moved to irrigation have moved by non-Federal means. Federal reclamation projects have been important, but in my State of Idaho we have averaged about 50,000 acres a year of land that have moved into irrigation, and very little of that being done through a formal irrigation district or through a formal reclamation district.

Mr. JACKSON. It has been on a sort of ad hoc basis

Mr. McCLURE. And the result has been there have been a great many people who drilled wells and put in sprinkler irrigation

Now, those people are the ones with the lowest priority in water rights. Many of them are also individual water rights, and they will have very little access to relief under this bill the way the House has amended it. The way we had written it here in the Senate they would have had an equal access to the relief under this bill.

One other kind of example: Some of the earliest water rights in my State are on the Wood River where river drainage for Sun Valley is located. Sun Valley, as a good many people know, is a ski resort which was in very tough times this year, and one of the reasons why it was was because there was no snowfall.

As of late February the projected water runoff in that drainage was 12 percent of normal, one-eighth as much water as they would normally expect. So those being the earliest water rights, and many of them being individual irrigators and individual diversions out of the stream rather than an irrigation district and not a reclamation project, will have no direct access except through the State program provision the other body wrote into this legislation.

So those people, among the driest in my State, will have the least access to benefits under this bill. That is the reason for my concern.

But I cannot say to the Senator from Washington or to anyone else that the \$1.625 million will be inadequate. I simply do not know. But I have to have a great deal of concern when \$1.625 million is available for all of the people situated in that category, and all the rest

of the \$132.5 million is available to everyone else.

Mr. JACKSON. I wanted to say to the Senator at that point that I will join with him in keeping an ongoing audit of what is happening and to find out where problems not covered by the bill, by this legislation, will occur.

These situations do occur. I want to say to the Senator again that I am prepared to move legislatively, and then we will be dealing with more specific situations.

Mr. McCLURE. Mr. President, for exactly the same reason that I am not going to oppose the passage of this or even oppose amendments now, the urgency of the situation, if we are to find any relief for these farmers for this year, we have to act now. There is very little time to develop additional information and then respond with changes in legislation.

I appreciate the Senator from Washington giving me his assurances for being willing to do it. Certainly the Senator from Washington recognizes, as do I, that the irrigation season is fast approaching, and there is going to be very little time to identify problems, develop legislation, and then respond to the problems in time to help any of the irrigators this year.

Mr. JACKSON. I would hope, I say to the Senator, too, that the Agriculture Committees of the House and the Senate will move in this area because we get into special drought situations that cover areas that are not traditionally considered reclamation areas, too, because of the unusual nature of it. I know he has some areas in his State that are out of that category, and I have, too, on the west side, where the drought has been unprecedented so that for the first time they are suffering from a real water shortage relying, as they have, some of them, on well water which is inadequate. Those people should not be dealt with on a different basis from those on a Federal project.

Mr. McCLURE. I say to the Senator there is a great deal of additional irrigation throughout all the upper Midwest, as dry land farmers have drilled wells and put in sprinkler irrigators, in order to assure themselves of adequate moisture supply for their crops. They have increased their production. They have also increased the fixed cost of operation, as well as the capital demands of their farming operation.

A good many of those people may find that those wells will go dry this year.

Mr. JACKSON. That is right.

Mr. McClure. Or they may have to deepen them or go to a great deal of expense to make it possible for them to keep in business this year. So there will be an ongoing problem developing. The last few days of rainfall in the upper Midwest made everyone believe that, "Hey, the weather is changed; now we are all right." But all of the figures would indicate that they are far from all right. The surface is a little bit more moist than it was 3 weeks ago but very little less is better.

Mr. JACKSON. Mr. President, I look forward to working with the distin-

guished Senator from Idaho and other colleagues so that we can have a continuous audit of the drought situation in the Far West.

Mr. President, I move that the Senate concur in the amendment adopted by the House of Representatives to S. 925.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. JACKSON. Mr. President, I move to reconsider the vote by which the Senate concurred in the amendment.

Mr. ROBERT C. BYRD, Mr. President, I move to lay that motion on the table. The motion to lay on the table was agreed to.

ORDER TO PROCEED TO CONSID-ERATION OF H.R. 1828 WEDNES-

Mr. ROBERT C. BYRD. Mr. President, ask unanimous consent that on Wednesday, after the two leaders or their designees have been recognized under the standing order, the Senate proceed to the consideration of H.R. 1828, an act relating to the effective date for the changes made by the Tax Reform Act of 1976 to the exclusion for sick pay. I make this request on behalf of Mr. Long, and I have cleared it with Mr. BAKER who is here to speak for himself in any way he wishes.

Mr. BAKER. Mr. President, if the Senator will yield. I simply say to the majority leader that is cleared on our side. The distinguished junior Senator from Kansas, who is one of the principals involved, indicates that that suits his convenience if we arrange that procedure.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE REPORTS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that committees have until midnight tonight to file reports.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER AUTHORIZING SECRETARY OF SENATE TO RECEIVE MES-SAGES

Mr. ROBERT C. BYRD. Mr. President. I ask unanimous consent that during the recess of the Senate over until 4 p.m. tomorrow the Secretary of the Senate be authorized to receive messages from the President of the United States and the House of Representatives, and that they be appropriately referred.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORITY FOR CERTAIN ACTION DURING RECESS OF SENATE

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that during the recess over until 4 p.m. tomorrow the Vice President, the President pro tempore, the Deputy President pro tempore, and the Acting President pro tempore be authorized to sign all duly enrolled bills and joint resolutions.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR BIDEN ON WEDNESDAY

Mr. ROBERT C. BYRD. Mr. President, ask unanimous consent that on Wednesday, after the two leaders have been recognized under the standing order, prior to the consideration of H.R. 1828. Mr. Biden be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ALEX HALEY

Mr. BAKER. Mr. President, on Wednesday at the close of legislative business it shall be my intention, then, if the majority leader is agreeable to this arrangement, that there be a time for Senators who wish to do so to pay tribute to Alex Haley. The State of Tennessee. my State and Mr. Haley's native State, will have an Alex Haley Day, and I thought it would be fitting and appropriate that we should have that opportunity to make those tributes.

Mr. ROBERT C. BYRD. Yes. Mr. President, at the conclusion of legislative business, there will be no problem on Wednesday and the Senators may speak as long as they desire without previous

I thank the Senator for notice of the intention of Senators to speak on that subject on that day.

Mr. BAKER. I thank the majority

Mr. ROBERT C. BYRD. Mr. President, I understand that there may be another conference report called up later today.

Mr. BAKER. Mr. President, for the information of the majority leader, on the executive calendar there is a nomination for a member of the Council on Environmental Quality, Mr. James Gustave Speth. This has been held prior to this time and that hold is now released and we can proceed to its consideration whenever the Executive Calendar is next called.

Mr. ROBERT C. BYRD. I thank the distinguished minority leader. If he has no objection I shall proceed to dispose of this nomination at this time.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD, Mr. President. I ask unanimous consent that the Senate go into executive session to consider the nomination of James Gustave Speth to be a member of the Council on Environmental Quality.

There being no objection, the Senate proceeded to the consideration of executive busisess

The PRESIDING OFFICER. The nomination will be stated.

COUNCIL ON ENVIRONMENTAL QUALITY

The second assistant legislative clerk read the nomination of James Gustave Speth, of the District of Columbia, to be a member of the Council on Environmental Quality.

Mr. BAKER. Mr. President, while I do not intend to oppose this confirmation. I did oppose the nomination of J. Gustave Speth in committee and would like to advise my colleagues of the reasons I view this nomination with mixed emotions. In reviewing Mr. Speth's qualifications and observing the substantial impact he has had on the environmental field over the last few years, one quickly comes to the conclusion that he is an outstanding attorney who has made many useful contributions to the overall success of some of our Nation's most important environmental legislation.

I have had the occasion through my work on the Senate Environment and Public Works Committee to work with Mr. Speth concerning the resolution of some most difficult and important issues arising from the implementation of the Federal Water Pollution Control Act. In these instances, even though we have not always agreed, the comments and criticisms of Mr. Speth working as a counsel for the Natural Resources Defense Council have proved to be helpful and always

thought provoking.

At the present time our Nation is facing a grave energy shortage. A solution of our energy problem will not be obtained through a battle between environmental and energy advocates who are irreversibly committed to their positions. We need policymakers who are willing to objectively review the problem and thoroughly weigh all the alternatives available for its solution. A more thorough review of Mr. Speth's record has left me with the impression that his bias against the use of nuclear energy in meeting our future energy demands is so long-standing and strident that it will prevent him from acting objectively on matters concerning nuclear energy in his role at CEQ. In the testimony which he gave to the Committee on Environment and Public Works in response to questioning on matters concerning the U.S. role in the field of nuclear energy, Mr. Speth did not modify or in any way alter the stances he had previously taken on the subject of nuclear power. These positions cause me concern relative to his objectivity.

I feel it is imperative that those who are to advise the President and influence national policy on the issues of environment and energy be able to objectively assess the alternatives available to resolve our present problems, including nuclear alternatives.

Mr. McCLURE. Mr. President, I did not vote in favor of J. Gustave Speth's nomination for membership on the Council on Environmental Quality in the Environment and Public Works Committee and will not support his confirmation today on the Senate floor. Although Gus Speth has demonstrated that he is intellectually capable in many respects. I do not believe he is flexible enough in his attitude toward environmental concerns to oversee the administration and implementation of the National Environmental Policy Act in a manner consistent with the goals of this act.

One of the fundamental goals and pol-

icies of NEPA is to use all practicable means and measures to create and maintain conditions under which man and nature can exist in productive harmony and fulfill the social, economic, and other requirements of present and future generations of Americans. Furthermore, it is the purpose of NEPA to strive toward achieving a balance between population and resource use which will permit high standards of living.

Likewise, it is the role of a member on the CEQ to be conscious of and responsive to the scientific, economic, social, esthetic, and cultural needs and interests of the Nation. Based on Speth's testimony and discussions with the nominee during his confirmation hearing last week, I am led to conclude that Mr. Speth is biased in his viewpoint toward the economic and social needs of this Nation, and doubt he will readily adapt himself to consider these particular components when carrying out the mandates of CEQ.

In particular, I am troubled with Mr. Speth's commitment to a single point of view in the nuclear field in which he has strong and deeply held individual views. I think it in the interest of our environment and critical energy situation that we not dismiss the option of nuclear power and specifically, the breeder reactor, as the nominee has done. There is too much evidence which refutes Mr. Speth's fear of plutonium contamination should plutonium be used as a commercial fuel.

Speth has described plutonium as being fiendishly toxic. Yet he cannot account for the fact that although there have been approximately 61/2 tons of plutonium injected into the atmosphere by weapons testing prior to 1975, 1,000 cases where body burdens of plutonium exceeded maximum permissible levels, and 30 years have passed since 25 men received excessive plutonium dosages working at Los Alamos, there have been no known deaths attributable to plutonium poisoning. This fact and other similar accounts which illustrate the controllability of plutonium is difficult for me to ignore, and I am suspicious the nominee has neglected to thoroughly investigate the beneficial aspects of nuclear power.

Mr. President, I am dubious that Gustave Speth will approach his duties at CEQ with an objective and open mind. I fear that his steadfast belief that nuclear reactors are too dangerous for our use will aggravate our energy situation and ultimately work toward the deterioration of the environment. For these reasons I will not be voting in favor of Mr. Speth's nomination for membership on the Council on Environmental Quality.

Mr. DOMENICI. Mr. President, following the President's nomination of Mr. Gus Speth to be a member of the Council on Environmental Quality, the Environment and Public Works Committee held a confirmation hearing on March 21 and has now reported favorably on the nomination to the full Senate. I opposed Mr. Speth's confirmation when the committee voted on this matter, and I would like to take this opportunity to make clear my reasons for taking this action.

However, I would first like to comment that my opposition to this nomination is by no means intended to be a reflection on either Mr. Speth's character, or his intelligence. He is a most outstanding and personable young man, whose past involvement with the Natural Resources Defense Council has more than adequately prepared him for this new role. He is experienced and knowledgeable in Federal Government procedures, and has been an effective advocate in environmental matters.

I have several specific concerns, however, that make it difficult for me to support Mr. Speth's nomination. These concerns arose in large part from Mr. Speth's testimony before the Environment and Public Works Committee, which convinced me that his opinions regarding issues expected to come before the CEQ are sufficiently strong and inflexible that he will be unable to exercise the degree of objectivity required in this important position. My concerns are related to two responsibilities of the CEQ: advising the President on environmental policy and interpreting the National Environmental Policy Act as it applies in individual

With regard to advising the President and the administration on environmental policy, Mr. Speth stated that he felt an obligation "to try to present both sides of a particular issue," before stating his own conclusion. He compared this with the role he has carried out at the Natural Resources Defense Council, that of providing an educational presentation in communications with Congress-"one in which you try fairly to present both sides of a particular issue." This bothers me a great deal. In what I have been able to determine about how the NRDC and Mr. Speth have operated, it is clear that there is never at any time the least doubt as to NRDC's position on a particular issue. As Mr. Speth has stated:

I guess I got the conclusion up in the front sometimes.

I am very concerned that he might provide this same sort of balanced presentation for the President.

Further in this regard, I was disturbed by Mr. Speth's answer to a question from Senator Baker regarding the advice he would give the President regarding nuclear power. Specifically, he testified that he would:

Call for an action-forcing pause in the issuance of new construction permits (for nuclear power plants) to force the industry and the government to face up to the need of solving the waste problem and the reactor safety problem.

To me, this indicates a man whose mind is already made up, and who will use every means at his disposal to force his views on others. I cannot reconcile this attitude with his profession of a willingness to "make every effort" to "inform—the President—of the spectrum of views," fairly and with some balance.

To move on to a second point, during the course of the confirmation hearing Mr. Speth was asked at several points to comment on how he would go about balancing what we regard as traditional environmental concerns against our Nation's social, esthetic, economic, and scientific needs, as mandated in NEPA. It became clear that Mr. Speth views the great responsibilities of the CEQ solely in the context of preserving what we might call our natural environment. Nuclear power and the breeder reactor must be sacrificed. Coal can be burned, but only if it can be done so cleanly. Our gross national product must be made to grow steadily with little or no increase in energy usage. Surely there must be room for give-and-take, for compromise. in environmental matters. The CEO must do more than look at only one narrow aspect of the total environment of human beings. In a certain sense, the man who judges everything solely by its impact on the preservation of our natural environment, is one of the greatest threats to the environmental movement in this country. I cannot accept this limited point of view in one being considered for such a high administration position.

Finally, I believe it is worth pointing out a few of the issues on which Mr. Speth's strongly held views preclude the possibility of his giving just consideration to differing opinions. With respect to nuclear power:

I believe that the waste problem and reactor safety problem are sufficiently unresolved at this time that we should take advantage of the current lull in new reactor starts to call a halt to the new issuance of permits until these problems are resolved.

and

We should adopt an energy R. & D. strategy based on the eventual phasing out of our reliance on nuclear power:

The breeder reactor program:

I think ... we should turn quickly away from efforts to develop and commercialize these technologies and maintain small residual programs.

Conservation:

Our prime energy resource in the decades ahead.

and, energy:

The energy (use) per capita is ... going to have to level off.

I have no quarrel with his right, or that of any of our citizens, to hold these views. I do object, however, when it is apparent in advance that such views are to form the basis for supposedly objective recommendations and interpretations at the highest levels of our Government. Consequently, I have chosen to vote against Mr. Speth's confirmation.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, I ask that the President be immediately notified of the confirmation of the nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. METCALF. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATE RESOLUTION 136-SUBMIS-SION OF RESOLUTION RELATING TO COMMON CAUSE AGAINST BAILAR ET AL.

Mr. METCALF. Mr. President, I send to the desk a resolution to authorize the furnishing of copies of certain documents or affidavits for in camera inspection by the U.S. district court in the case of Common Cause against Bailar.

I want to admonish the Senate that this resolution contains some provisions requiring the serious consideration of

every Senate office.

Mr. President, in the course of a status call on Common Cause against Bailar in the U.S. district court today, Cornelius B. Kennedy, counsel for subpensed Senate employees, agreed-subject to the consent of the Senate-to supply additional information to the court for in camera inspection with respect to the question of relevance.

It is, and has consistently been, the position of the Senate that additional information being sought by the plaintiff in this lawsuit is irrelevant to a determination of the constitutionality of the congressional franking statute. The Senate, of course, already has provided volumes of information to serve the inter-

ests of justice in this lawsuit.

Nevertheless, Mr. Kennedy agreed to furnish to the court specified information pertaining to mailings under the frank in 1972. It is my understanding that the information involved is the volume of mail sent out in each mailing by each Member of the Senate in that year. As I understand it, and I am not a party to the depositions in this lawsuit, Mr. Estep, director of the Senate Computer Center, testified that this information was available and could be furnished to the court.

I suggested to Mr. Kennedy that, if such information was available, it should

be provided to the court.

Mr. Kennedy also agreed to provide the court-again for its in camera inspection-information that has been sought by the plaintiff in subpenas to all 100 Senators' administrative assistants. This involves the meanings assigned to codes maintained in the computer for franked mail purposes, for a 3-year period, 1973-75, but which were not actually used for sending out mailings under the frank during that period. Moreover, it involves any manuals or specific instructions in individual Senate offices governing use of the codes for mailing purposes in the Senate computer.

Mr. Kennedy advised the court, however, that some of the information sought in these categories in all probability was simply not available. But the

court asked for such information in these categories as could be supplied, for its in camera inspection.

Providing such information will, of course, require additional interviews with all subpensed administrative assistants and their statements under oath. Thus, it will be necessary for the Senate, by resolution, to authorize their testimony by affidavit.

The resolution I am introducing today contains the necessary authorization for such testimony as well as authorization for submission of the 1972 information I described a moment ago.

Some of the material involved in the stipulation agreed to by Mr. Kennedysubject to the consent of the Senate-is to be provided to the court in 2 weeks.

In view of the forthcoming Senate recess, it is possible that adoption of this resolution could not take place under Senate rules until after the Senate returns from its already ordered recess. Therefore, tomorrow I am going to ask unanimous consent for the immediate consideration of the resolution, without referral to the Rules Committee. If there is objection I can see no way in which we can agree to the stipulation. In any event I shall do everything in my power to obtain prompt agreement and attempt to meet the deadlines accepted by Mr. Kennedy.

Mr. President, I ask unanimous consent that the resolution be held at the desk for 24 hours, that it not be referred

to committee until tomorrow.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The resolution is as follows:

Whereas, in the case of Common Cause et al. v. Benjamin Bailar et al. (Civil Action No. 1887-73), pending in the United States District Court for the District of Columbia, subpenas have been issued and served upon employees of the Senate, including employees serving in the office of a Senator, directing them to appear and give testimony and produce documents, papers, or records; and

Whereas, the dissemination of information by a Senator to his constituency concerning legislation proposed or enacted by the Congress, the administration of such legislation by the Executive branch, and the review of such matters by the courts is a part of the official business of a Senator under the Constitution of the United States: Now, there-

Resolved, That by the privileges of the Senate and by rule XXX of the Standing Rules of the Senate, no officer or employee of the Senate is authorized to produce documents, papers, or records of the Senate but by order of the Senate and information secured by officers and employees of the Senate pursuant to their official duties may not be revealed without the consent of the Senate.

SEC. 2. When it appears that testimony of an officer or employee of the Senate is needful for use in any court for the promotion of justice and, further, that such testimony may involve documents, papers, or records under the control of or in the possession of the Senate and communications, conversations, and matters related thereto, the Senate will take such order thereon as will promote the ends of justice consistently with the privileges and rights of the Senate.

SEC. 3. In response to matters, not previously disposed of by resolutions of the Senate, arising in connection with any subpena issued by the United States District Court for the District of Columbia in the case of Common Cause, et al. v. Benjamin v. Bailar, et al., pending as of April 4, 1977, the counsel for the subpensed Senate employees is authorized to furnish copies of documents or affidavits with respect to such case for in camera inspection by such Court.

SEC. 4. The Secretary of the Senate shall transmit a copy of this resolution to the United States District Court for the District

of Columbia.

Mr. METCALF. Mr. President, I suggest the absence of a quorum.

OFFICER. The PRESIDING The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF FLEXIBLE REGULA-TION OF INTEREST RATES-CON-FERENCE REPORT

Mr. PROXMIRE. Mr. President, I submit a report of the committee of conference on H.R. 3365 and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. DECONCINI). The report will be stated

by title.

The legislative clerk read as follows: The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3365) to extend the authority for the flexible regulation of interest rates on deposits and accounts in depository institutions, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of today's RECORD.)

Mr. PROXMIRE. Mr. President, the Senate passed H.R. 3365 on March 1, extending the authority by which deposit rate ceilings are established in financial institutions until October 1, 1977. The corresponding House bill provided for an extension until March 1, 1978, or for a year. The conferees agreed on a compromise date of December 15, 1977. In addition, the House bill provided for third party payment authority for Federal savings and loan associations in New York State, an extension of the Treasury Department's authority to borrow funds from the Federal Reserve System through August 31, 1977, and a modernizing of powers of Federal credit unions under the Federal Credit Union

The conferees accepted these provisions, with the exception of the third party payment authority for Federal savings and loan associations in New York, which was deleted.

Mr. President, it is my understanding that this conference report is noncontroversial and action today by the Senate is necessary in order that the House may act prior to the Easter recess.

Mr. BAKER. Mr. President, I ask unanimous consent to have printed in the RECORD a statement by the distinguished Senator from Texas Tower).

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR TOWER

I am concerned about the compromise reached by the House and Senate conferees on H.R. 3365 and wish to have my views known on this matter.

The compromise reached by the conferees would extend the authority of the bank regulatory to impose ceilings on time and savings deposits (Regulation Q) until December 15 of this year. The Senate bill had an extension until October 1, whereas the House had an extension until March 1 of next year. The extension to December 15 is, in my opinion, an acceptable compromise.

The conferees also agreed to include a provision in the House bill to extend until August 31, 1977, the authority of the Federal Reserve to purchase United States obligations directly from the Treasury. This authority would be used only on an emergency basis, and is needed for Treasury cash man-

agement purposes.

I have no quarrel with either of these provisions. I do, however, have some reserva-tions about proceeding at this time with what I consider to be piecemeal efforts at

financial reform.

The conferees have agreed to provisions in the House bill which would expand the financial powers of credit unions. I have no particular quarrel with these provisions, but I am concerned about including them in this legislation. I am convinced they belong in a comprehensive financial reform package and should not be adopted at this time. I supported these provisions in the Financial Institutions Act, which the Senate adopted in 1975. But, the Financial Institutions Act also attempted to maintain the competitive balance between institutions offering similar types of services to the public. There are no provisions in this bill to meet this need for competitive equality. For that reason, I believe the compromise agreed to by the House and Senate conferees is deficient, and for that reason, I did not sign the Conference report although I am a conferee.

Mr. BROOKE. Mr. President, I agree that the Senate should act formally in

this report. The minority has no objection and I join with the majority in asking that it be accepted by the Senate.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to. Mr. PROXMIRE, Mr. President, I suggest the absence of a quorum

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, tomorrow the Senate will convene at 4 p.m. The business for tomorrow will be the nomination of Mr. Peter F. Flaherty to be Deputy Attorney General. There is a 2-hour time agreement on the nomination and I know that there will be at least one Senator who wants a rollcall on the nomination, so there will be a rollcall on that nomination.

There may be other matters cleared for action by tomorrow, but as of now, that is about all I can say with respect to tomorrow.

Mr. BAKER. Mr. President, I know of nothing else. I assume that on Wednesday we are going to turn to H.R. 1828.

Mr. ROBERT C. BYRD. Yes, as of now, that is a measure that has come over from the House. Senator Long wants to take that up on Wednesday. There will be some amendments offered to the bill. At this point, I cannot say there will be anything beyond that for Wednesday, but there may be other measures and conference reports that will be brought up.

Mr. BAKER. I ask the majority leader

what he sees for Thursday.

Mr. ROBERT C. BYRD. Thursday is about the same as Wednesday as of now.

Mr. President, am I correct in saying that the order has been entered to go into executive session on tomorrow, after the leaders have been recognized under the standing order?

The PRESIDING OFFICER. The Sen-

ator is correct.

RECESS UNTIL TOMORROW AT 4 P.M.

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess until tomorrow at 4 p.m.

The motion was agreed to; and, at 5:06 p.m., the Senate recessed until 4 p.m. tomorrow, April 5, 1977.

NOMINATIONS

Executive nominations received by the Senate April 4, 1977:

DEPARTMENT OF COMMERCE

Jordan J. Baruch, of New Hampshire, to be an Assistant Secretary of Commerce, vice Betsy Ancker-Johnson.

COMMUNITY SERVICES ADMINISTRATION

Graciela (Grace) Olivarez, of New Mexico, to be Director of the Community Services Administration, vice Samuel R. Martinez, resigned.

DEPARTMENT OF JUSTICE

Andrew J. Chishom, of South Carolina, to be U.S. marshal for the district of South Carolina for the term of 4 years vice James E. Williams, resigning.

CONFIRMATION

Executive nomination confirmed by the Senate, April 4, 1977.

COUNCIL ON ENVIRONMENTAL QUALITY

James Gustave Speth, of the District of Columbia, to be a Member of the Council on Environmental Quality.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

HOUSE OF REPRESENTATIVES-Monday, April 4, 1977

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

The eternal God is thy refuge and underneath are the everlasting arms .-Deuteronomy 33: 27.

Our Father God, beyond whose love and care we cannot drift in the glory of a new morning and with the coming of Passover and Holy Week we lift our hearts unto Thee. We would quiet our souls in Thy presence and realize anew that Thou art our refuge and our strength and underneath are Thine everlasting arms.

Amid the difficulties and the demands of these days, may we hear Thy still, small voice which alone can lift our spirits and lead us along the ways of truth and love. Grant that we may not add to the discord and dissension of our time by our lack of self-control but may

we widen the circle of good will by our own good will and our unselfish endeavors on behalf of our country.

Give us courage and strength for the living of these days. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Chirdon, one of his secretaries, who also informed the House that on April 1, 1977, the President approved and signed a joint resolution of the House of the following title:

H.J. Res. 351. Joint resolution making further appropriations for the fiscal year 1977, and for other purposes.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 157. Concurrent resolution authorizing the printing of a compilation of tributes by Members of the House in the Halls of Congress to commemorate the years of service of the Honorable Gerald R. Ford.

The message also announced that the Senate agrees to the amendment of the House to a bill of the Senate of the following title:

S. 626. An act to reestablish the period within which the President may transmit to the Congress plans for the reorganization of agencies of the executive branch of the Government, and for other purposes.

The message also announced that the Senate had passed a bill with amendments and a concurrent resolution of the following titles, in which the concurrence of the House is requested:

H.R. 4877. An act making supplemental appropriations for the fiscal year ending September 30, 1977, and for other purposes; and

H. Con. Res. 142. Concurrent resolution urging the Canadian Government to reassess its policy of permitting the killing of newborn harp seals.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 4877) entitled "An act making supplemental appropriations for the fiscal year ending September 30, 1977, and for other purposes, requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. McClellan, Mr. Magnuson, Mr. STENNIS, Mr. ROBERT C. BYRD, Mr. PROXMIRE, Mr. INOUYE, Mr. HOLLINGS, Mr. BAYH, Mr. EAGLETON, Mr. CHILES, Mr. JOHNSTON, Mr. HUDDLESTON, Mr. LEAHY, Mr. Young, Mr. Case, Mr. Brooke, Mr. HATFIELD, Mr. STEVENS, Mr. MATHIAS, Mr. Schweiker, Mr. Bellmon, and Mr. WEICKER to be the conferees on the part of the Senate.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 37. An act to amend the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5906), and for other purposes; and

S. 1153. An act to abolish the Joint Committee on Atomic Energy and to reassign certain functions and authorities thereof, and for other purposes.

The message also announced that the Senate had passed the following resolution:

S. 131

Resolved, That the House of Representatives be notified of the election of Joseph Stanley Kimmitt, of Montana, as Secretary of the Senate, effective April 1, 1977.

And that the Vice President, pursuant to Public Law 86-380, appointed Mr. CHILES and Mr. HATHAWAY to be members, on the part of the Senate, of the Advisory Commission on Intergovernmental Relations, vice Mr. Muskie and Mr. Hollings.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C., April 1, 1977.

Hon. Thomas P. O'Neill, Jr.,

The Speaker, House of Representatives,

Washington, D.C.

DEAR MR. SPEAKER: I have the honor to

transmit herewith a sealed envelope from the White House, received in the Clerk's Of-

CXXIII 642 Part 9

fice at 4:47 p.m. on Friday, April 1, 1977, and said to contain a Message from the President wherein he transmits to the Congress a report with regard to import relief for the U.S. non-rubber footwear industry.

With kind regards, I am, Sincerely,

EDMUND L. HENSHAW, Jr. Clerk, House of Representatives. By Benjamin J. Guthrie.

REPORT WITH RESPECT TO IMPORT RELIEF FOR THE U.S. NON-RUBBER FOOTWEAR INDUSTRY-MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95-117)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Ways and Means and ordered to be printed:

To the Congress of the United States:

In accordance with Section 203(b) (1) of the Trade Act of 1974, enclosed is a report to the Congress setting forth the action that I am taking pursuant to that section with respect to import relief for the U.S. non-rubber footwear industry, and explaining the reasons for my decision.

JIMMY CARTER. THE WHITE HOUSE, April 1, 1977.

REPORT OF NEW DEFERRALS OF ENERGY RESEARCH AND DEVEL-OPMENT ADMINISTRATION FUNDS—MESSAGE FROM PRESIDENT OF THE UN PRESIDENT OF THE UN STATES (H. DOC. NO. 95-118) UNITED

The SPEAKER laid before the House the following message from the President of the United States, which was read and, together with the accompanying papers, referred to the Committee on Appropriations and ordered to be printed:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report two new deferrals of Energy Research and Development Administration funds totaling \$127.2 million. The deferrals have no effect on budgetary outlays for fiscal year 1977 or subsequent years. In addition, I am reporting a revision to a previously transmitted Department of Commerce deferral.

The details of each deferral are contained in the attached reports.

JIMMY CARTER. THE WHITE HOUSE, April 4, 1977.

APPOINTMENT OF CONFEREES ON H.R. 4877, MAKING SUPPLEMENTAL APPROPRIATIONS FOR THE FIS-CAL YEAR 1977, AND FOR OTHER PURPOSES

Mr. MAHON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 4877) making supplemental appropriations for the fiscal year ending September 30, 1977, and for other with Senate amendments purposes,

thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the gentleman from Texas? The Chair hears none and appoints the following conferees: Messrs. Mahon, Whitten, BOLAND, NATCHER, FLOOD, STEED, SHIPLEY, SLACK, McFall, Long of Maryland, Yates. McKay, Bevill, Cederberg, Michel, Mc-DADE, ANDREWS of North Dakota, EDWARDS of Alabama, and Coughlin.

PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE CON-FERENCE REPORT ON H.R. 4877

Mr. MAHON. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a conference report on the bill H.R. 4877, making supplemental appropriations for fiscal year ending September 30, 1977, and for other purposes

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

PRINTING ADDITIONAL COPIES OF "THE 1977 JOINT ECONOMIC RE-PORT"

Mr. BOLLING. Mr. Speaker, I ask unanimous consent for the immediate consideration of the resolution (H. Res. 470) to print additional copies of "The 1977 Joint Economic Report" for use of the Joint Economic Committee.

The Clerk read the resolution as fol-

H. RES. 470

Resolved, That there be printed for the use of the Joint Economic Committee one thousand seven hundred and twenty additional copies of its current report entitled "The 1977 Joint Economic Report".

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The resolution was agreed to.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON H.R. 4800, TO EXTEND EMERGENCY UNEM-PLOYMENT COMPENSATION ACT OF 1974

Mr. ULLMAN submitted the following conference report and statement on the bill (H.R. 4800) entitled "An Act to extend the Emergency Unemployment Compensation Act of 1974 for an additional year, to revise the trigger provisions in such Act, and for other purposes":

CONFERENCE REPORT (H. REPT. No. 95-158)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4800) to extend the Emergency Unemployment Compensation Act of 1974 for an additional year, to revise the trigger provisions in such Act, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 7, 9, 10, 11, 12, 13, 14, 15, 16,

That the House recede from its disagreement to the amendments of the Senate numbered 3, 4, 18, 19, 20, 21, 22, 25, and 26; and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment, insert the following:

(a) GENERAL RULE.—Section 103(f)(2) of the Emergency Unemployment Compensa-tion Act of 1974 is amended to read as fol-

"(2) No emergency compensation shall be payable to any individual under an agree-

ment entered into under this Act—
"(A) for any week ending after October

31, 1977, or

"(B) in the case of an individual who (for a week ending after the beginning of his most recent benefit year and before October 31, 1977) had a week with respect to which emergency compensation was payable under such agreement, for any week ending after January 31, 1978."

And the Senate agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amend-ment of the Senate numbered 2, and agree to the same with an amendment as follows: In lieu of the matter proposed to be in-

serted by the Senate amendment, insert the following:

SEC. 102. 13-WEEK MAXIMUM FOR THE EMER-GENCY BENEFITS AND EMERGENCY BENEFIT PERIOD.

(a) 52-WEEK DURATION PERIOD FOR EMER-GENCY BENEFITS.—Subsection (e) of section 102 of the Emergency Unemployment Com-pensation Act of 1974 is amended—

(1) by striking out paragraphs (2) and (3)

and inserting in lieu thereof the following: "(2) The amount established in such account for any individual shall be equal to the

lesser of—
"(A) 50 per centum of the total amount of regular compensation (including dependents' allowances) payable to him with respect to the benefit year (as determined under the State law) on the basis of which he most recently received regular compensation; or

"(B) 13 times his average weekly benefit amount (as determined for purposes of section 202(b)(1)(C) of the Federal-State Extended Unemployment Compensation Act of 1970) for his benefit year.";

(2) by redesignating paragraph (4) as paragraph (3); and

- (3) by striking out "amounts determined under paragraphs (2) and (3) with respect to any individual shall each" in paragraph (3) (as so redesignated) and inserting in lieu thereof "amount determined under paragraph (2) with respect to any individual
- all".
 (b) Emergency Benefit Period.—Section 102(c)(3)(A)(ii) of such Act is amended by striking out "26 consecutive weeks" and inserting in lieu thereof "13 consecutive weeks" weeks

(c) CONFORMING AMENDMENTS .-

(1) Section 105 of such Act is amended by striking out paragraph (5) and by re-designating paragraphs (6), (7), and (8) as paragraphs (5), (6), and (7), respectively. (2) Paragraph (2) of section 102(b) of

such Act is amended-

(A) by striking out "section 105(2)" and inserting in lieu thereof "section 105(a)(2)";

(B) by striking out "section 105(4)" and inserting in lieu thereof "section 105(a)(4)".

EFFECTIVE DATE.—The amendments

made by this section shall apply to weeks of unemployment ending after April 30, 1977. For purposes of determining an individual's entitlement to emergency compensation for weeks ending after April 30; 1977, there shall be taken into account any emergency compensation paid to such individual for weeks which end after the beginning of the in-dividual's most recent benefit year and before May 1, 1977.

And the Senate agree to the same.

Amendment numbered 5: That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment as follows:

In lieu of the matter proposed to be in-serted by the Senate amendment, insert the

SEC. 104. DENIAL OF EMERGENCY COMPENSA-TION TO INDIVIDUALS WHO REFUSE OFFERS OF SUITABLE WORK OR WHO ARE NOT ACTIVELY SEEKING WORK.

(a) GENERAL RULE.—Section 102 of the Emergency Unemployment Compensation Act of 1974 is amended by adding at the end thereof the following new subsection:

"(h)(1) In addition to any eligibility requirement of the applicable State law, emergency compensation shall not be payable for any week to any individual otherwise eligible to receive such compensation if during such week such individual-

"(A) fails to accept any offer of suitable work or to apply for any suitable work to which he was referred by the State agency,

"(B) fails to actively engage in seeking

"(2) If any individual is ineligible for emergency compensation for any week by reason of a failure described in subparagraph (A) or (B) of paragraph (1), the individual shall be ineligible to receive emergency compensation for any week which begins during period which-

(A) begins with the week following the week in which such failure occurs, and

"(B) does not end until such individual has been employed during at least 4 weeks which begin after such failure and the total of the remuneration earned by the indi-vidual for being so employed is not less than the product of 4 multiplied by the individual's average weekly benefit amount (as determined for purposes of section 202(b)(1)(C) of the Federal-State Extended Unemployment Compensation Act of 1970) for his benefit year.

"(3) Emergency compensation shall not be denied under paragraph (1) to any individual for any week by reason of a failure to accept an offer of, or apply for, suitable work-

"(A) if the gross average weekly remuneration payable to such individual for the position does not exceed the sum of-

"(i) the individual's average weekly benefit amount (as determined for purposes of section 202(b)(1)(C) of the Federal-State Extended Unemployment Compensation Act of 1970) for his benefit year, plus

"(ii) the amount (if any) of supplemental unemployment compensation benefits (as defined in section 501(c)(17)(D) of the Internal Revenue Code of 1954) payable to such individual for such week;

"(B) if the position was not offered to such individual in writing and was not listed with the State employment service:

"(C) if such failure would not result in a denial of compensation under the provisions of the applicable State law to the extent that such provisions are not inconsistent with the sions of paragraph (4); or

(D) if the position pays wages less than the higher of-

"(i) the minimum wage provided by sec-Semale

tion 6(a) (1) of the Fair Labor Standards Act of 1938, without regard to any exemption;

"(ii) any applicable State or local minimum wage.

"(4) For purposes of this subsection-

"(A) The term 'suitable work' means, with respect to any individual, any work which is within such individual's capabilities; except that, if the individual furnishes evidence satisfactory to the State agency that such individual's prospects for obtaining work in his customary occupation within a reasonably short period are good, the de-termination of whether any work is suitable work with respect to such individual shall be made in accordance with the applicable

"(B) An individual shall be treated as actively engaged in seeking work during any week if-

"(i) the individual has engaged in a systematic and sustained effort to obtain work during such week, and

the individual provides tangible evidence to the State agency that he has engaged in such an effort during such week.

"(5) Any agreement under subsection (a) shall provide that, in the administration of this Act, States shall make provision for referring applicants for benefits under this Act to any suitable work to which subparagraphs (A), (B), (C), and (D) of paragraph (3) would not apply."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to weeks of unemployment beginning after the date

of the enactment of this Act.

And the Senate agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment, insert the

following:

(a) GENERAL RULE.—Section 105 of the Emergency Unemployment Compensation Act of 1974 is amended by inserting "(a)" after "Sec. 105." and by adding at the end thereof the following new subsection:

And the Senate agree to the same. Amendment numbered 8: That the House recede from its disagreement to the amend-ment of the Senate numbered 8, and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment, insert the

following: (b) (1)

And the Senate agree to the same. Amendment numbered 23: That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment, insert the

following:

(c) DISQUALIFICATION OF TEACHERS -Section 3304(a) (6) (A) of the Internal Revenue Code of 1954 (relating to approval of State uneemployment laws) is amended-

(1) in clause (i)—

(A) by striking out "instructional research" and inserting in lieu thereof "instructional, research"; and

(B) by striking out "two successive academic years" and inserting in lieu thereof

'two successive academic years or terms";
(2) by striking out "and" at the end of clause (i); and

(3) by adding at the end thereof the fol-

lowing new clause:

"(iii) with the respect to any services described in clause (i) or (ii), compensation payable on the basis of such services may be denied to any individual for any week which commences during an established and customary vacation period or holiday recess if such individual performs such services in the the White House, roselved it

OXXXIII -- 642-Part 9

period immediately before such vacation period or holiday recess, and there is a reasonable assurance that such individual will perform such services in the period immediately following such vacation period or holiday recess, and".

And the Senate agree to the same.

Amendment numbered 24: That the House recede from its disagreement to the amendment of the Senate numbered 24, and agree to the same with an amendment as follows:

In lieu of the matter proposed to be in-

In lieu of the matter proposed to be inserted by the Senate amendment, insert the following:

(d) EFFECTIVE DATES .-

- (1) The amendment made by subsection (a) shall take effect as if included in the amendment made by section 314 of the Unemployment Compensation Amendments of 1976.
- (2) The amendment made by subsection (b) shall take effect as if included in the amendments made by section 506 of the Unemployment Compensation Amendments of 1976
- (3) The amendments made by subsection (c) shall take effect as if included in the amendments made by section 115(c) of the Unemployment Compensation Amendments of 1976.

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate to the title, and agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4800) to extend the Emergency Unemployment Compensation Act of 1974 for an additional year, to revise the trigger provisions in such Act, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action (other than action of a merely technical nature) agreed upon by the managers and recommended in the accompanying conference report.

AMENDMENT NO. 1: EXTENSION OF PROGRAM

House bill

The House bill extends the Emergency Unemployment Compensation Act of 1974 for an additional year.

Senate amendment

The Senate amendment extends the Emergency Unemployment Compensation Act of 1974 until September 30, 1977, with a phase-out under which individuals eligible for emergency compensation before September 30, 1977, may continue to receive such benefits until December 31, 1977.

Conference agreement

The conference agreement extends the Emergency Unemployment Compensation

Act of 1974 until October 31, 1977, with a phaseout under which individuals eligible for emergency compensation before October 31, 1977, may continue to receive such benefits until January 31, 1978.

AMENDMENT NO. 2: AREA TRIGGERS AND DURATION
OF EMERGENCY BENEFITS

House bill

The House bill provides for the payment of emergency compensation on the basis of State or area triggers. Under the House bill, emergency compensation will be payable in any area of a State if the rate of insured unemployment in such area or in the State in which such area is located is at least 5 percent and if there is an extended benefit period in effect for the State. The House bill defines an area as a labor market area or any part of a labor market area which is located within a single State and as all other parts of a State which are not located within a labor market area. The term "labor market area" means any area designated by the Secretary of Labor as being a contiguous population center with at least 250,000 individuals. The new area triggers take effect with the week beginning April 24, 1977.

The House bill also provides that the maximum duration of emergency compensation will be 13 weeks which results in a maximum duration of 52 weeks of unemployment compensation to any individual. This provision of the House bill applies to weeks of unemployment ending after March 31, 1977.

Senate amendment

The Senate amendment strikes out the area trigger provisions of the House bill. The Senate amendment retains the provision of the House bill which provides for a maximum duration of 13 weeks for emergency compensation; except that the Senate amendment allows the existing maximum duration of 26 weeks which applies to certain States to remain in effect until April 30, 1977. The Senate amendment provides for a 13-week minimum duration for the emergency benefit period.

Conference Agreement

The conference agreement strikes the area trigger provisions, provides for a maximum duration of 13 weeks for emergency compensation, allows the existing maximum duration of 26 weeks which applies to certain States to remain in effect until April 30, 1977, and provides for a 13-week minimum duration for the emergency benefit period.

AMENDMENT NO. 3: FINANCING OF EMERGENCY UNEMPLOYMENT COMPENSATION FROM GEN-ERAL FUNDS

House bill

The House bill provides that emergency compensation will be financed from general funds rather than from funds in the Unemployment Trust Fund. This provision of the House bill applies to benefits paid for weeks of unemployment ending after March 31, 1977.

Senate amendment

Except for some technical changes in the House bill, the Senate amendment also provides for financing of emergency compensation from general funds.

Conference agreement

The conference agreement follows the Senate amendment. Under this amendment, funds in the Extended Unemployment Account derived from the Federal unemployment tax shall be used to meet the costs of the extended benefit program. After March 31, 1977, the full amount of benefit payments under the emergency unemployment compensation program will be derived from nonrepayable general fund advances.

AMENDMENT NO. 5; DENIAL OF EMERGENCY COMPENSATION TO INDIVIDUALS WHO REFUSE OFFERS OF SUITABLE WORK OR WHO ARE NOT ACTIVELY SEEKING WORK

House bill

The House bill provides that an individual will be denied emergency compensation for any week if during such week—

 such individual fails to accept any offer of suitable work or to apply for any suitable work to which he was referred by the State agency, or

(2) such individual falls to actively engage in seeking work.

This disqualification would continue until the individual has been employed during at least four weeks and has earned an amount for being so employed equal to at least four times his weekly benefit amount.

Under the House bill, an individual would not be disqualified by reason of any failure to accept an offer of, or apply for, suitable work—

(1) if the average weekly wage for the position does not exceed the sum of 120 percent of the individual's weekly benefit amount plus the amount of any supplemental unemployment compensation benefits to which such individual is entitled,

(2) if the position was not offered to such individual in writing and was not listed with

the State employment service,

(3) if such failure would not result in a denial of compensation under the applicable State law to the extent that such law is not inconsistent with the new provisions of the House bill, or

(4) if the position does not pay wages equal to the higher of the Federal minimum wage or any applicable State or local mini-

mum wage.

The House bill defines suitable work as any work for which an individual is reasonably fitted by training and experience and any other work for which an individual lacks the required skills and training if in connection with the job the individual would be provided with the necessary training to perform the work. If the State agency determines that an individual's prospects for obtaining work in his customary occupation are poor, the determination of whether any work is suitable work for the individual shall be made without regard to whether the work involves lower pay or lesser skills than the individual's customary occupation.

Under the House bill, an individual would be treated as actively engaged in seeking work if the individual engaged in a systematic and sustained effort to obtain work during any week and if the individual provided tangible evidence to the State agency that he engaged in such an effort.

The provisions of the House bill apply to weeks of unemployment beginning after the date of the enactment of the bill.

Senate amendment

Under the Senate amendment, an individual would be disqualified from emergency compensation for refusing to accept, or apply for, any bona fide offer of employment which is within the individual's capabilities and which meets the conditions of present Federal law unless—

 the worksite of the position is located at an unreasonably great distance from the individual's residence,

(2) the position involves an unacceptably high risk to the health, safety, or morals of the individual, or

(3) the gross average weekly remuneration payable to the individual for the position does not exceed the individual's average weekly benefit amount.

Under the Senate amendment, failure to comply with the new eligibility requirements would disqualify an individual from receiving emergency benefits for the duration of his eligibility period.

The Senate amendment also provides that an individual would be ineligible to receive emergency benefits for any week if he falls to actively engage in seeking work during such week.

The Senate amendment also requires States to refer applicants for emergency compensation to any jobs which are within their capabilities.

The provisions of the Senate amendment apply to weeks of unemployment beginning after the date of the enactment of the bill.

Conference agreement

The conference agreement includes the following:

In addition to any eligibility requirements of the applicable State law, an individual would be disqualified from receiving emergency benefits for failing to actively seek work; failing to apply for any suitable work to which he or she was referred by the state agency; or failing to accept any offer of suitable work

of suitable work.

To meet the "actively seeking work" requirement for any week the claimant would have to engage in a systematic and sustained effort to obtain work during such week, and provide tangible evidence to the state agency that he or she has actively sought work for such week.

For the purposes of the emergency benefits program, any work would be considered suitable if it—

Was within the capabilities of the claimant:

Met the conditions of present Federal law;
Met the conditions of State law and practices pertaining to suitable or disqualifying
work that are not inconsistent with the provisions of this section, such as not requiring
an individual to take a job that involves
traveling an unreasonable distance to work
or poses an unreasonable threat to the individual's morals, health or safety;

Paid wages at least equal to the Federal or, if higher, any applicable state or local minimum wage:

Paid gross average weekly remuneration equal to the individual's weekly unemployment compensation benefit, plus any "Supplemental Unemployment Benefits" (SUB) to which the individual might be entitled because of agreements with previous employers; and

Was listed with the State employment service or offered in writing. (A written job offer would involve a written statement as to the availability of the job and the hours and wages it involved. It would not have to include other details such as a description of fringe benefits.)

State agencies would be required to refer claimants of emergency benefits to any job that would be considered suitable for the individual under the provisions of this sec-

If, however, an individual furnishes satisfactory evidence to the State agency that his or her prospects for obtaining work within a reasonably short period in his customary occupation are good, the determination of whether any work is suitable for the individual would be made in accordance with State law and practices pertaining to suitable or disqualifying work rather than the provisions of this section pertaining to suitable work. An example of the type of evidence required would be a recall notice from a former employer.

Failure to "actively seek work" or to apply for or accept an offer of "suitable work", as defined above, would disqualify an individual from receiving emergency benefits until he had worked at least 4 weeks and earned 4 times his or her weekly unemployment compensation amount. AMENDMENT NO. 18: TERMINATION OF INDIVID-UAL ENTITLEMENT FOR EMERGENCY COMPEN-SATION

House hill

No provision.

Senate amendment

Under the Senate amendment, an individual's eligibility for emergency compensation would expire 2 years after the end of the most recent benefit year for which regular benefits were paid.

Conference agreement

The conference agreement includes the Senate amendment.

AMENDMENT NO. 22: DISQUALIFICATION OF ILLEGAL ALIENS

House bill

The House bill would allow the payment of unemployment compensation to nonresident aliens who are lawfully present in the United States for the purpose of performing the work on which the benefits are based.

Senate amendment

The Senate amendment modifies the House provision to make it clear that unemployment compensation will not be paid on the basis of services performed by aliens unless such services are performed by aliens during periods in which they were lawfully present in the United States.

Conference agreement

The conference agreement includes the Senate version of the amendment.

AMENDMENT NO. 23: PAYMENT OF UNEMPLOY-MENT COMPENSATION TO EMPLOYEES OF ED-UCATIONAL INSTITUTIONS

House bill

The House bill corrects a clerical error in existing law and provides that teachers will be denied unemployment compensation for periods between successive academic terms as well as between academic years.

Senate amendment

The Senate amendment contains the provisions of the House bill and also provides 2 additional provisions. The first additional provision allows States the option of denying unemployment compensation to school employees during any established and customary vacation period or holiday recess if there is a reasonable assurance of employment following the vacation or recess period. The second additional provision allows States the option of denying unemployment based on services performed as a substitute teacher if the individual is paid for such services on a per diem basis and has performed such services less than 45 days during his base period.

Conference agreement

The conference agreement includes the provisions of the House bill and the first provision of the Senate amendment (relating to unemployment compensation to school employees during an established and customary vacation period or holiday recess); the conference agreement does not include the second Senate amendment (relating to substitute teachers).

AMENDMENT NO. 25: REDUCTION OF UNEMPLOY-MENT COMPENSATION FOR RETIREMENT BENE-PITS

House bill

No provision.

Senate amendment

The Senate amendment delays for 6 months the effective date of the provision which requires States to reduce unemployment compensation payable to any individual by the amount of retirement benefits the individual receives. Conference agreement

The conference agreement includes the Senate amendment.

AMENDMENT NO. 26: FEDERAL SALARY ACT

House bill

No provision.

Senate amendment

The Senate amendment would require that all future pay increases for Members of Congress, Federal Judges, and other senior Federal officials be subject to a rollcall vote in both the House and Senate.

Conference agreement

The conference agreement includes the Senate amendment.

TWO-PRICE SYSTEM FOR ENERGY FAIR TO ALL AMERICANS

(Mr. WEAVER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. WEAVER. Mr. Speaker, Thomas Murphy, the chairman of General Motors, in arguing against the two-price tax system for cars, says instead we must decontrol the price of energy: take the shackles off so we can produce more energy which will be, of course, much more expensive energy. I am sure that Chairman Murphy with his half a million dollars income from General Motors does not care if the price of gas goes up a dollar. He can afford it. But my millworking constituents who take home \$600 a month cannot.

That is why I advocate the two-price system for energy, as well as cars. Give all Americans some energy for essentials at a low price. Then, and only then, let the controls come off, and place a tax on the balance, and let the market decide who wants to pay the flagrantly high cost of new energy—besides Mr. Murphy.

NUCLEAR ARMS CONTROL

(Mr. DOWNEY asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. DOWNEY. Mr. Speaker, we should not be alarmed at the events in Moscow last week. Very simply, the Russians are putting President Carter to the test, just as they did President Kennedy in Vienna when he took office.

If there is any doubt in anyone's mind

that this is what is happening, just consider what happened.

First, the U.S. Government offered a simple ratification of the numbers agreed upon at Vladivostok. We also offered a more complex and far-reaching proposal, which was perhaps too much for the Soviets to digest in the short time available. but they were perfectly free to set aside the complex proposal and accept the simple one. They did not do this. Instead, they claimed the previous administration had offered a ban on cruise missiles, when in fact it had only offered a ban on air-launched ballistic missiles.

This twisting of our words is a standard Soviet negotiating tactic, and should disturb no one. When we rightly turned them down, they offered no counterproposal, but instead went into public agony over what they have described as the untrustworthiness of the Carter administration. They have continued this theme for several days, and possibly will continue it for several more weeks as they seek to pressure us into concessions.

In my view, President Carter is doing exactly the right thing by remaining cool but firm. In due course the Soviets will stop kicking and screaming and will get down to business-provided of course that our Government remains cool and firm.

It seems to me we should all make clear that we stand with our President-not because he is President but because he is right.

REPORT OF WAYS AND MEANS COM-MITTEE'S TASK FORCE ON CAPI-TAL FORMATION

(Mr. ULLMAN asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. ULLMAN, Mr. Speaker, today, I am releasing the report of the Ways and Means Committee's Task Force on Capital Formation. The report analyzes the economic forces determining the rate of capital formation and the effect on capital formation of various tax changes, although it does not contain any recommendations. It represents a summary of the materials presented by the staff of the Joint Committee on Taxation to the Task Force on Capital Formation. The task force, of which I was the chairman, met weekly between February and September 1976 to discuss the need for more capital formation and to consider a wide variety of tax changes designed to increase investment.

I am very concerned about the need to increase investment in the United States. Our tax policies will have to be responsive to this problem. The administration will address this issue in its comprehensive tax reform proposals, which are expected this fall. I anticipate that the administration will propose integrating the individual and corporate income taxes, which is discussed in some detail in this report. This report is an important contribution to the analysis of the issue of capital formation. I hope it will be read by all people who have an interest in using tax policy to promote capital formation.

CARTER'S LITTLE LIBERAL PILLS?

(Mr. MICHEL asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter:)

Mr. MICHEL. Mr. Speaker, I have examined the President's proposed electoral reforms and have found them less than convincing.

Election-day registration supposedly will solve the problem of nonvoting. But most studies show it is alienation and cynicism about Government, not registration complexities, that cause most people not to vote. The President has identified the disease, but his remedy will not cure it. Carter's little liberal pill is not the answer to nonvoting.

The President tells us that under his proposal safeguards against voter fraud will "rarely be needed." I wish I could share the President's confidence. I would prefer even stronger safeguards.

The proposed public financing for congressional races is nothing but the Incumbents Protection Act of 1977. We do not need it and we should not have it. All it would do is to make it easier for incumbents to win and more difficult for challengers.

The proposal to revise the Hatch Act amounts to sending public servants into involuntary servitude under political and union bosses eager for new areas to extend their power.

The President's message reminds me of those glorious-sounding Great Society messages we used to get, promising the world to everyone but not completely thought out.

My fear is the very real danger of enormous and widespread resentment and alienation once it is discovered-as it inevitably will-that these proposals have not led to the promised land of electoral reform.

Finally, before we even begin to debate, I call upon the President to present an "impact statement" as to how these reforms will affect the Federal system. In my view what the President is proposing could be the death-knell of our Federal system.

Carter's little liberal pills do not seem to me to be the medicine our electoral system needs.

Later in the day I will have a special order to outline my views in detail on the overall subject matter.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of clause 3(b), rule XXVII, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to, under clause 4 of rule XV.

After all motions to suspend the rules have been entertained and debated and after those motions to be determined "nonrecord" votes have been disposed of, the Chair will then put the question on each motion on which the further proceedings were postponed.

AMENDING THE LAND AND WATER CONSERVATION FUND ACT OF 1965

Mr. PHILLIP BURTON. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5306) to amend the Land and Water Conservation Fund Act of and for other purposes, as amended.

The Clerk read as follows:

H.R. 5306

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Land and Water Conservation Fund Act of 1965 (78 Stat. 987), as amended (16 U.S.C. 4601-4 et seq.), is futher amended as follows:

(1) Section 2(c)(1) is amended by deleting "\$600,000,000 for fiscal year 1978, \$750,-000,000 for fiscal year 1979, and \$900,000,000 for fiscal year 1980" and inserting in lieu thereof "and \$900,000,000 for fiscal year

1978".

(2) Section 5 is amended by adding the following at the end thereof: "Those appropriations from the fund up to and including \$600,000,000 in fiscal year 1978 and up to and including \$750,000,000 in fiscal year 1979 shall continue to be allocated in accordance with this section. There shall be credited to a special account within the fund \$300,-000,000 in fiscal year 1978 and \$150,000,000 in fiscal year 1979 from the amounts authorized by section 2 of this Act. Amounts credited to this account shall remain in the account until appropriated. Appropriations from the special account shall be available only with respect to areas existing and authorizations enacted prior to the convening of the Ninety-fifth Congress, for acquisition of lands, waters, or interests in lands or waters within the exterior boundaries, as aforesaid, of-

"(1) the national park system;

"(2) national scenic trails;

"(3) the national wilderness preservation system:

"(4) federally administered components of the National Wild and Scenic Rivers System; and

(5) national recreation areas administered by the Secretary of Agriculture. (3) Section 7(a) is amended by adding the

following new paragraph: "(3) Appropriations allotted for the acquisitions of land, waters, or interests in land or waters as set forth under the head-'NATIONAL PARK SYSTEM; RECREATION AREAS' and NATIONAL FOREST SYSTEM' in paragraph (1) of this subsection shall be available therefor notwithstanding any statutory ceiling on such appropriations contained in any other provision of law enacted prior to the convening of the Ninety-fifth Congress; except that for any such area expenditures not exceed a statutory ceiling during any one fiscal year by 10 per centum of such ceiling or \$1,000,000, whichever is greater. The Secretary of the Interior shall, prior to the expenditure of funds which would cause a statutory ceiling to be exceeded by \$1,-000,000 or more, and with respect to each expenditure of \$1,000,000 or more in excess of such a ceiling, provide written notice of such proposed expenditure not less than thirty calendar days in advance to the Committee on Interior and Insular Affairs of the House of Representatives and the Committee on Energy and Natural Resources of the Senate. With respect to those areas of the national park system existing prior to the convening of the Ninety-fifth Congress, it is

the express intent of the Congress that all land acquisition be completed, subject to any specific statutory limitation on the method of acquisition applicable to any individual area, within three complete fiscal years for lowing the effective date of this paragraph.".

(4) Section 7(b) is amended by changing

the period at the end thereof to a colon and adding the following: "Provided, howappropriations from the That fund may be used for preacquisition work in instances where authorization is imminent and where substantial monetary savings could be realized.".

(5) Section 7 is amended by adding the

following new subsection:

"(c) BOUNDARY CHANGES; DONATIONS .-Whenever the Secretary of the Interior de-termines that to do so will contribute to, and is necessary for, the proper preservation, protection, interpretation, or management of an area of the national park system, he may, following timely notice in writing to Committee on Interior and Insular Affairs of the House of Representatives and to the Committee on Energy and Natural Resources of the Senate of his intention to do so, (i) make minor revisions of the boundary of the area by publication of a revised boundary map or other description in the Federal Register, and moneys appropriated from the fund shall be available for acquisition of any lands, water, and in-terests therein added to the area by such boundary revision subject to such statutory limitations, if any, on methods of acquisition and appropriations therefor as may be specifically applicable to such area; and (ii) acquire by donation, purchase with do-nated funds, transfer from any other Federal agency, or exchange, lands, waters, or interests therein adjacent to such area, except that in exercising his authority under this clause (ii) the Secretary may not alienate property administered as part of the national park system in order to acquire lands by exchange, the Secretary may not acquire property without the consent of the owner, and the Secretary may acquire property owned by a State or political subdivision thereof only by donation. Lands, waters, and interests therein acquired in accordance with this subsection shall be ad-ministered as part of the area to which they are added, subject to the laws and regulations applicable thereto.".

Section 6(e)(1) is amended by adding the following new sentence: "Notwithstanding any other provision of law, in the case of land acquired for the Big Thompson/ North Fork Canyons Recreational Lands Acquisition Project in Larimer County, Colorado, for which financial assistance is authorized under this paragraph, if such land is located within the Big Thompson/North Fork Floodway, designated pursuant to the requirements of the National Flood Insurance Act of 1968 (title XIII, Public Law 90-448, as amended), and if such land is unimproved or includes structures which have sustained damage amounting to 50 per centum or more of their market value, such assistance may be provided for an amount equal to the market value of such land (not including any improvements thereon) immediately prior to the occurrence of the Big Thompson flood of July 31, 1976.".

The SPEAKER. Is a second demanded?

Mr. SEBELIUS. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from California (Mr. PHILLIP BURTON) will be

recognized for 20 minutes, and the gentleman from Kansas (Mr. Sebelius) will be recognized for 20 minutes.

The Chair recognizes the gentleman from California (Mr. PHILLIP BURTON).

Mr. PHILLIP BURTON. Mr. Speaker, yield myself such time as I may consume.

Mr. Speaker, H.R. 5306, as reported by the Committee on Interior and Insular Affairs, addresses a problem this House has long recognized: the need to rapidly and effectively acquire the areas which have been authorized as units of our national park system. Last Congress, legislation was enacted which raises the land and water conservation fund from \$300,-000,000 to \$900,000,000 over a 3-year period. This will do much to assist both State and Federal programs in the long run.

But there is a short-term need that is not adequately being met. We currently have more than \$800,000,000 worth of land which has been authorized, but not yet acquired for our Federal recreation lands. So long as we are faced with this amount of unacquired lands, we will continue to be caught in a situation where rapidly inflating land prices will continue to drive this backlog higher and higher. At the same time, any new areas authorized by this body will have to take their place in turn to be acquired, and their land values will inflate, thus aggravating this situation.

H.R. 5306 increases the authorized level of the fund from \$600,000,000 to \$900,000,000 in fiscal year 1978, and from \$750,000,000 to \$900,000,000 in fiscal year 1979. This additional \$450,000,000 over the next 2 years is then placed in a special account to be used only to acquire those areas in the national park system, the national wilderness preservation system, national scenic trails, national wild and scenic rivers, and national recreation areas which were authorized prior to this Congress. The bill expresses the intent of Congress that these areas be acquired within 3 years, and with this special account and the existing fund together, we should be able to meet that goal.

There are several other features of the bill which I should bring to the attention of the House.

Rather than go through the exercise of approving amendatory legislation every time inflation causes a statutory land acquisition ceiling to become insufficient, we permit a general increase in such expenditures under H.R. 5306, subject to certain restrictions. An agency may not exceed the ceiling by more than 10 percent or \$1,000,000, whichever is greater, in any given fiscal year. Our committee must also have written notice 30 days in advance when the ceiling is expected to be exceeded by a cumulative amount of \$1,000,000 or more.

We would therefore retain control over large increases over existing ceilings. I would also expect the Secretary to give us frequent status reports on the use of declarations of taking in acquiring these areas, rather than seeking advance written clearance in every case. In this way

we will retain our review of this action without unduly slowing down the acquisitions.

We also permit the Secretary to make minor boundary alterations in national park system areas after notifying the House and Senate committees. This is tightly limited authority, similar to that which we have included in individual bills in recent years. Such small adjustments as alining a boundary along property lines, or to conform to a road realinement along a park boundary, are indicated here. We will also permit the donation of lands adjacent to park areas by this bill, if the Secretary deems such lands to be of sufficient importance.

The bill permits certain preacquisition work to be done when the authorization of a new area is imminent. This would allow title searches to be carried out at an early time, so that acquisition could begin soon after authorizing legislation was passed. The Secretary should be able to develop some reasonable guidelines for exercising this authority, such as permitting this work in an area when either the House or the Senate has acted on a measure, or perhaps when both authorizing committees have begun their consideration, especially where the proposed area has already been found to be nationally significant.

We adopted an amendment authored by our colleague on the committee. Mr. JOHNSON of Colorado, which will allow the previous fair market value as it existed before the Big Thompson River flood of July 1976, to be paid to property owners along this river in Colorado. This will permit proper compensation of the people who were most affected by this flood, and will assist a recreation project to go forward for this area.

The Interior Committee also amended the bill to remove two amendments dealing with Federal recreation fee collections. We may wish to consider some amendments in this area as a separate matter at a later date.

Mr. Speaker, I would like to express my particular appreciation to the ranking minority member of our subcommittee. Congressman Keith Sebelius of Kansas, for his interest and work in this field, and for his coauthorship of this legislation. I would also like to make note of and express my thanks, to the other cosponsors of H.R. 5306, Representatives UDALL, YATES, BAUMAN, KASTENMEIER, BINGHAM, SEIBERLING, WON PAT, DE LUGO, LAGOMARSINO, SANTINI, TSONGAS, FLORIO, KOSTMAYER, CORRADA, REGULA, MILLER OF California, John Burton of California, Mr. HEFTEL and Mr. GUDGER, and to Representative GOODLOE BYRON of Maryland, who has sponsored a similar measure, H.R. 5524.

Mr. Speaker, H.R. 5306 will help us keep costs within reason by cutting through this backlog of land acquisition for our national parks. It will also help to protect the resources that made those areas worthy of our attention. I urge my colleagues to join me in passing this legislation.

Thank you.

Mr. JOHNSON of Colorado. Mr. Speaker, will the gentleman yield?

Mr. PHILLIP BURTON. I yield to the

gentleman from Colorado.

Mr. JOHNSON of Colorado. Mr. Speaker, I want to congratulate the gentleman from California (Mr. Phillip Burton) for bringing us this bill. I think it is one whose importance in the long run the public will come to understand. It is vital for the acquisition of these lands that are in question. It is a sound bill

Particularly, I want to thank the gentleman on behalf of the people of Colorado, and especially those who were victims of the Big Thompson flood disaster, for his help and for his support of this measure, which does relate to that disaster.

Mr. PHILLIP BURTON. Mr. Speaker,

I thank the gentleman.

Mr. SEBELIUS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, before I begin my presentation I do want to compliment the gentleman from California (Mr. Phillip Burton), the chairman of the subcommittee, for his work in respect to this bill. It is through his imagination and foresight that this bill is being brought to the attention of the entire House.

Mr. Speaker, as the ranking minority member of the Subcommittee on National Parks and Insular Affairs, I strongly support this bill, H.R. 5306. The principal thrust of this legislation is to create a special account within the land and water conservation fund which will be dedicated exclusively to the acquisition and elimination of all the remaining nonfederally owned lands within all national park system areas which were created prior to the beginning of the 95th Congress. It is the legislation's intention that this goal be achieved in no less than 3 complete fiscal years after enactment. To the extent that funds from this account are available, and a considerable amount should be, acquisition of similar lands is to be undertaken for various other congressionally authorized lands managed by other agencies-such areas as wilderness, wild and scenic rivers, national scenic trails and national recreation areas.

I want to point out too, Mr. Speaker, that money from the conventional segment of the land and water conservation fund is expected to continue to be available and allocated among the various Federal agencies as usual for land acquisition. Hence, the special account established by this legislation is supplemental to the money normally available.

Mr. Speaker, I believe it is extremely important that in prioritizing all acquisition funds, whether drawing from this special account or from the conventional fund itself, the agencies give the highest priority to the acquisition of authorized lands threatened with adverse development or use.

For example, I know that there have been some very unfortunate threats and actions by private owners to lands authorized for acquisition along our two national scenic trails—the Pacific Crest and Appalachian Trails—and I urge

that the utmost prompt acquisition attention be given these trails by the re-

sponsible agencies.

Like trails, because of their similar narrow corridor configuration, lands along our wild, scenic, and recreational rivers can easily be threatened by adverse actions of private owners, and I urge that proper acquisition attention likewise be devoted here.

Damage or development within these corridor configuration areas can be very conspicuous and irreparable, as due to the narrowness of the authorized Federal land holdings for these types of areas, there is no way for the trail or river traveler to skirt the damaged area once it occurs. The user has not the option of avoiding the damaged area, as he may be able to do in his travels within larger acreage wilderness, park, and recreation areas.

Mr. Speaker, there is another point that is important in the process of agencies acquiring developed properties within the boundaries of authorized areas. Once the Government acquires full title and the private owner is permanently gone from the premises, the Government should plan to remove the structures and development in a reasonably expeditious manner, and not continue to use the facilities for their own-governmentalconvenience. If the development warrented acquisition in the first place due to the impropriety of its presence with the purpose of the area's management plan and/or legislation, it should not be continued in use by the Government or anyone else, once acquired. The only possible exception I can conceive warranting continued use is if the facilities are conducive to possible concessioner or camp use or something similar, and such continued use is in accordance with the written management and development plan for the area.

I think that any exception to the removal of facilities so acquired should be fully justified by the agency and approved by the top administrator of the agency, in writing, retroactive to encompass all such private facilities ever purchased, all or in part with Federal funds. Furthermore, it might be a good idea for the agencies to inform the authorizing committees of both the House and the Senate as to the history and implications of this situation.

Mr. Speaker, the implementation of this legislation will very significantly contribute to the safeguarding, for all time, of our Nation's most precious scenic and natural outdoor recreation resources—for the benefit of current and future generations of Americans. I urge the adoption of this bill by my colleagues.

Mr. SKUBITZ. Mr. Speaker, the purpose of this bill is to establish in the land and water conservation fund a special amount to be used to acquire the backlog of lands which this Congress has previously authorized for inclusion in the National Park System. The bill also gives the Secretary of the Interior general authority to make more boundary changes in existing areas and to accept qualifying adjacent land by donation.

In 1965, the Congress created the Land and Water Conservation Fund.

The original act has been amended several times in order to raise funding levels. More recently, the 94th Congress enacted legislation, Public Law 94-422, to increase the fund from \$300 million in fiscal year 1977, to \$900 million per annum by fiscal year 1980.

H.R. 5306, this bill, increases the authorization level to \$900 million in fiscal year 1978 by providing \$300 million of new authorization in fiscal year 1978 and an additional \$150 million by fiscal year 1979.

This Congress has in its wisdom—authorized parks. It is high time now that we authorize the money in order to purchase these parks for each day the price gets higher and higher and higher.

And that is what this bill is all about. As you know the \$900 million funds do not come out of the general revenue fund but rather—out of the offshore oil royalty funds.

Although last year I questioned the wisdom of taking more funds out of the offshore oil for park purposes because such moneys were going into the general fund, and if now taken out of the general fund for park purposes, must either be replaced by new taxes or added to the debt through borrowing. On this issue I was defeated last year. Therefore, if the money is to be used, it ought to be used as recommended by this legislation.

Mr. UDALL, Mr. Speaker, one of the most successful conservation programs enacted by the Congress over the last decade or so is the land and water conservation fund program approved in the mid-sixties. This legislation has provided the financial stimulus which has enabled governments at all levels—Federal, State, and local—to meet the expanding and continuing demand for increased outdoor recreation opportunities throughout the Nation.

BACKGROUND

Over the years, the program has grown. It has grown in real terms; it has grown in accomplishments; and it has grown in popularity. When it was first created, the land and water conservation fund totaled only about \$100 million annually. All of the money came from admission and recreation fees, from the sale of surplus Federal property, and from motorboat fuels taxes. It was not long before we realized that, if we wanted this fund to do the job we expected of it, it would have to be expanded.

To accomplish this, it seemed reasonable to take some-not all, but someof the revenues received from the development and exploitation of the Outer Continental Shelf oil and gas resources and reinvest them in lasting outdoor recreation resources for the benefit of the American people. In this way, we could convert these depletable resources belonging to all of us into permanent resources for the benefit of present and future generations of Americans. To this end, the fund doubled and, last year, was increased in increments to \$600 million in fiscal year 1978, to \$750 million in fiscal 1979, and \$900 million in 1980, and

This action has made it possible for the States to enhance and expand recreation opportunities for their people in the cities, and permitted them to protect natural areas in their more rural settings. At the same time, the land and water conservation fund has been the sole source of appropriations for the acquisition of outdoor recreation lands for the National Park System, and has been a principal source of funds for recreation lands acquired by such other Federal agencies as the Forest Service, the U.S. Fish and Wildlife Service, and, to a lesser extent, the Bureau of Land Management.

In spite of all we have accomplished in just the last dozen years, Mr. Speaker, much remains to be done. Long existing national parks continue to contain privately held properties that should be acquired. Many of the major additions to the National Park System in recent years are located in the East, and along our coastlines and lakeshores where little public land exists. These areas require a major investment. As we look to the end of this century-indeed, as we look to the end of this decade-Mr. Speaker, we will see that time is running out. To save these areas for present and future generations of Americans, we must expand our pace and round out these acquisition programs. The opportunities for new and significant additions to the Nation's inventory of outstanding natural and scenic areas are fading fast, and the opportunity to consolidate and protect those areas which this Congress has said should and must be preserved requires an expanded effort.

OBJECTIVES OF THIS LEGISLATION

That is the principal purpose of this legislation, Mr. Speaker. It provides authority for the appropriation of \$450 million for an expanded and accelerated Federal land acquisition program. This money will be made available to the National Park Service, the Forest Service and the Fish and Wildlife Service to purchase lands which the Congress has found to be nationally significant areas. In many cases, these programs have been moving too slowly. It took a century to complete the acquisition of private landholdings in our first national park-Yellowstone-and we cannot afford to wait a hundred years to buy the lands at Indiana Dunes National Lakeshore, at the Buffalo National River. in Pictured Rocks National Lakeshore, or Cumberland Island National Seashore to mention just a few. Experience has shown that the longer we wait, the more it is going to cost. Recreation land values accelerate at a fast pace and the tempo increases once Federal recognition of an area is apparent.

In addition to the monetary considerations, Mr. Speaker, I think it should be recognized that once the Congress creates a park, or a national recreation area, or a seashore, people begin to come. They do not know that Uncle Sam has not purchased the lands. They look at these areas as their national parks, as their scenic rivers and trails, and as their

national lakeshores and seashores. Little do they know that these are just "paper parks" with imaginary boundaries drawn on a map and a congressional act printed in a statute book. They accept these areas as their own, even if the lands have not yet been purchased. The end result is hardship and hard feelings with the local landowners who deserve to have an opportunity to sell their land and receive compensation at fair market value for it in a reasonable period of time.

If enacted, Mr. Speaker, H.R. 5306 will help resolve this problem by providing a one-shot boost in the Federal land acquisition program.

Someone will undoubtedly ask: Why not let the States share in this incremental increase in the fund? The only honest answer to that question is that we think, as the committee which has worked with this program since its inception, that a major effort must be made to reduce and hopefully eliminate the backlog of unacquired lands in the National Park System and other outdoor recreation areas under Federal jurisdiction. Together with the other funds available to the Federal agencies, we think that real progress can be made in converting long existing congressionally authorized areas into tangible resources for the American people.

Mr. Speaker, we must do what is right. We must make our words in the law books have meaning to the men and women of this Nation, and to the old and the young. We can make a small step in that direction by enacting this bill and by following through with the actual funding in our appropriation bills so that when we say Congress authorizes a park, there will be a park to visit, and when we say Congress authorizes a national seashore, there will be beaches to walk on. That is what the people want, that is what they deserve, and that is what this bill seeks to accomplish.

CONCLUSION

I heartily recommend H.R. 5306 to my colleagues. It will help do a job that needs to be done and I hope the House will give it favorable consideration.

Mr. DON H. CLAUSEN. Mr. Speaker, as a member of the Subcommittee on National Parks and Insular Affairs, I am very pleased to be able to support this bill today. As long as I have been in the Congress, we have been authorizing "paper parks." That is to say, the new park areas are authorized on paper, but they fail to materialize on the ground—where it really counts—until years later, when the acquisition and development dollars finally come along.

Our authorizations have long been far ahead of our appropriations. Consequently, the park areas we intend to protect fail to be adequatedly protected until they are paid for. Moreover, during that interim period, the passage of time results in rapid escalation of land values, and when we finally do come up with the money, we often end up paying somewhere between half again to twice the price originally anticipated at the time of authorization.

An excellent case in point is the Point Reyes National Seashore, which at one time was within my congressional district in California. At the time of original authorization in 1962, the authorization ceiling for land acquisition was \$14,000,000. As the acquisition finally nears completion today, the final cost has run up to over \$50,000,000; nearly a threefold increase. Fortunately, this case is more glaring than most. However, statistics show that farm and rural land values over the past 5 years rose on an average of 18 percent annually.

This bill is designed to wipe out the backlog of authorized but yet unacquired lands within all units of the National Park System existing prior to the start of the 95th Congress—within about 3 years. If the appropriations are forthcoming at or near the authorization level, this objective can be achieved. Moreover, a significant part of the funds from this special account established by this bill will be similarly utilized by the Forest Service, Fish and Wildlife Service, and Bureau of Land Management, to significantly reduce their acquisition backlog also.

Mr. Speaker, this bill will save our Treasury millions of dollars by getting our park and outdoor recreation acquisition program on a pay-as-you-go basis. While the front-end fiscal obligation to do this is admittedly quite substantial, it will result in a tremendous savings in the long run.

Mr. Speaker, I urge my colleagues to lend their support to this important

Mr. PHILLIP BURTON. Mr. Speaker, I have no further requests for time.

The SPEAKER. The question is on the motion offered by the gentleman from California (Mr. Phillip Burton) that the House suspend the rules and pass the bill H.R. 5306, as amended.

The question was taken; and (twothirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the

GENERAL LEAVE

Mr. PHILLIP BURTON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

CLARIFYING THE REQUIREMENT THAT MEDICAL SERVICES BE PROVIDED BY THE VETERANS' ADMINISTRATION

Mr. ROBERTS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5027) to amend title 38 of the United States Code to clarify the requirement that medical services be provided by the Veterans' Administration in certain cases

The Clerk read as follows: H.R. 5027

Be it enacted by the Senate and House of Representatives of the United States of America in Congress asembled, That section 601(4)(C) of title 38, United States Code, is amended to read as follows:

"(C) private facilities for which the Administrator contracts in order to provide (i) hospital care or medical services to a veteran for the treatment of a service-connected disability or a disability for which a veteran was discharged or released from active military, naval, or air service; (ii) hospital care for women veterans; (iii) hospital care for veterans in a State, territory, Common-wealth, or possession of the United States not contiguous to the forty-eight contiguous States, except that the annually determined average hospital patient load per thousand veteran population hospitalized at Veterans' Administration expense in Government and private facilities in each such noncontiguous State may not exceed the average patient load per thousand veteran population hospitalized by the Veterans' Administration within the forty-eight contiguous States, but authority under this clause (iii) shall expire on December 31, 1978; or (iv) hospital care or medical services for the treatment of medical emergencies which pose a serious threat to the life or health of a veteran receiving hospital care in a facility described in clause (A) or (B) of this paragraph.".

SEC. 2. Section 612 of title 38, United States

Code, is amended-

(1) by striking out ", within the limits of Veterans' Administration facilities," in the matter preceding clause (1) of subsection (f);

(2) by striking out "(to the extent that facilities are available)" in subsection (f) (1)(A); and

(3) by striking out ", within the limits of Veterans' Administration facilities," in subsection (g).

The SPEAKER. Is a second demanded?

Mr. HAMMERSCHMIDT. Mr. Speaker, I demand a second.

The SPEAKER, Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Texas (Mr. ROBERTS), and the gentleman from Arkansas (Mr. HAMMERSCHMIDT), will be recognized for 20 minutes each.

The Chair recognizes the gentleman from Texas (Mr. Roberts).

Mr. ROBERTS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 5027 is designed to clarify the intent of the Congress pertaining to the furnishing of medical services to veterans in receipt of increased pension or additional compensation or allowances based on the need for regular aid and attendance or by reason of being permanently housebound. According to the Veterans' Administration, a technical amendment included in last year's Omnibus Health Care Act by the other body could mean that several thousand veterans who now receive services and treatment in the local community where they live may be required to travel great distances in order to receive their treatment in VA facilities.

This certainly was not the intent of our committee or the House and I hope the bill will be unanimously adopted so

that these thousands of veterans now receiving medical services on a contract basis will not have their fee cards terminated.

I now recognize the gentleman from Virginia (Mr. Satterfield).

Mr. SATTERFIELD. Mr. Speaker, I thank the gentleman from Texas, the chairman of the Veterans' Affairs Committee for his remarks.

Mr. Speaker, in the last days of the 94th Congress the Senate passed a comprehensive veterans' omnibus health care bill and sent it to the House for action. The House made many amendments to the bill as passed by the Senate. The VA favored a technical and conforming amendment to section 612(g) of title 38, United States Code, requiring that medical services be furnished "within the limits of VA facilities." In commenting on this proposed amendment, the VA provided assurance that this so-called technical amendment would not change the substantive law in any manner.

Following enactment it was learned that an interpretation was being placed on this provision which could terminate between 150,000 and 300,000 of the most severely disabled non-service-connected veterans in receipt of pension and an aid and attendance allowance or those who are permanently housebound from obtaining medical care and medication on a fee basis in the community on this technical and conforming amendment.

On March 1, 1977 the Subcommittee on Medical Facilities and Benefits of the Veterans' Affairs Committee conducted hearings on the bill, H.R. 3696. It was learned at that time from the Veterans' Administration that amendments to section 601(4)(c) and section 612(f) of title 38 included in Public Law 94-581 could also have an adverse impact on providing medical services to serviceconnected disabled veterans in the States of Alaska and Hawaii.

The purpose of the bill, H.R. 5027, a bill in lieu of H.R. 3696, is to restore the language of the law to its former state, prior to the adoption of the Omnibus Health Care Act of 1976.

The Committee on Veterans' Affairs took the unanimous position that the most logical way to proceed would be to go back to the language prior to the passage of Public Law 94-581 so that these veterans can continue to get the kind of treatment and service that they have been getting in the past. It will protect those service-connected veterans in the States of Alaska and Hawaii and will continue to provide essential medical care to the 150,000 to 300,000 most severely disabled non-service-connected veterans who would be adversely affected if the language was not changed.

Mr. Speaker, I urge passage of H.R. 5027

Mr. HAMMERSCHMIDT. Mr. Speaker. I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R.

This measure will eliminate certain language that was approved in Public Law 94-581 in the closing days of the

94th Congress and represented to our committee as technical and conforming amendments.

Somewhat belatedly, we learned that the so-called technical amendment had the effect of terminating fee-basis medical care and medication for somewhere between 150,000 and 300,000 severely disabled veterans. These are veterans who are in receipt of additional pension benefits for being housebound or in need of the aid and attendance of another per-

It was never the intent of our committee that these veterans be deprived of needed medical care. The bill before the House, H.R. 5027, will correct that situation and restore the status quo.

Additionally, the bill will restore essential medical services on a fee basis to service-connected disabled veterans residing in Alaska and Hawaii.

This legislation is essential, Mr. Speaker, if we are to continue providing the medical care for veterans to which this Nation is committed. I urge that the bill be passed.

Mr. SAWYER. Mr. Speaker, will the

gentleman yield?

Mr. HAMMERSCHMIDT. I am happy to yield to my colleague, the gentleman from Michigan.

Mr. SAWYER, Mr. Speaker, I rise in support of the two bills reported from our Subcommittee on Medical Facilities and Benefits, H.R. 5027 and H.R. 3695.

H.R. 5027 is a very important bill that seeks to clarify the intent of Congress in providing adequate medical care to needy veterans. Specifically, the bill corrects the results of Public Law 94-581, which would prevent thousands of veterans from obtaining medical care on a fee basis in the communities where they live. Unless this clarification is made, veterans would be required to seek treatment in Veterans' Administration facilities which can oftentimes involve expensive travel and ambulatory services.

It certainly was not the intent of Congress to cause this change in meeting the medical needs of our Nation's veterans, and I would urge my colleagues to support passage of H.R. 5027.

H.R. 3695 is another important bill that will maintain high levels of care for veterans confined to State veterans' homes. Presently, \$5 million is available yearly for grants by the VA for construction, remodeling, or renovations of these State care facilities.

I am personally acquainted with the fine work and care being given at the State veterans' home located at Grand Rapids, Mich., in my congressional district. A very real need exists to expand the program of assisting States in establishing additional home facilities, and I wholeheartedly support the increased authorization provided in H.R. 3695.

I commend our chairman, Mr. Rob-ERTS, subcommittee chairman, Mr. SAT-TERFIELD, and our subcommittee ranking minority member, Mr. HAMMERSCHMIDT, for their expeditious handling of the legislation to accomplish these badly needed changes, and I urge their passage by the full House.

Mr. ABDNOR. Mr. Chairman, I rise in support of H.R. 5027. This bill which I cosponsor, will correct a true injustice that resulted because of a technicality in Public Law 94-581, the Veterans' Omnibus Health Care Act of 1976. Public Law 94-581 was intended to tighten the fee-basis contract authority of the Veterans' Administration. A literal interpretation of the law precludes all fee-basis contract authority the VA possesses. The result is that 150,000 to 300,000 of our most severely disabed veterans will be deprived of desperately needed assistance. I do not feel that this was the intent of Congress. To clarify the significance of this law, I might point out that not all of our VA hospitals are geographically available to our veterans and much more importantly, not all of our veterans are capable of traveling even short distances. A classic example of those veterans who would be disadvantaged would be our veterans in Hawaii and Alaska where we have no hospitals. Or might also cite those veterans with spinal cord injuries. We have only 18 spinal cord centers throughout the country. Without the fee-basis contract authority these veterans and many others will face even harsher disadvantages than their disability places on them. I, therefore, urge my colleagues in joining me in support of this bill.

Mr. TEAGUE. Mr. Speaker, last year during the final week of the Congress, we enacted the Veterans' Omnibus Health Care Act of 1976, Public Law 94–581. It was a major medical bill that included more than 20 new provisions of law.

Title II of the act contained some 12 pages of medical technical and conforming amendments. One such conforming amendment provided that where any veteran is in receipt of increased pension or additional compensation or allowance based on the need of regular aid and attendance or by reason of being permanently housebound, or who, but for the receipt of retired pay, would be in receipt of such pension, compensation or allowance, the Administration, "within the limits of Veterans' Administration facilities," may furnish the veteran such medical services as the Administrator finds to be reasonably necessary. The Veterans' Administration assured the committee that the language, "within the limits of Veterans' Administration facilities," was being added so that section 612(g) would conform with the language in section 612(a) establishing eligibility for medical treatment for service-connected veterans.

In commenting on the amendment, the Veterans' Administration told the committee the proposed language change would provide for no substantive change in the law.

The problem arose following enactment of Public Law 94-581. The Veterans' Administration decided that the change did change the substantive law and would prevent the agency from allowing the more seriously disabled veteran from

being treated and cared for by a family physician in the community where the veteran lives. This would mean that more than 100,000 veterans now receiving care and treatment on a fee basis in the community where they live would no longer be allowed to receive such care, but would be required to travel to the nearest VA facility to receive such care. This would mean traveling great distances for many veterans.

Mr. Speaker, the reported bill would simply clarify the intent of the Congress that veterans now receiving care and treatment on a fee basis may continue to do so.

I support the bill and urge that it be adopted.

Mr. WYLIE. Mr. Speaker, I rise in support of H.R. 5027. This bill would return the law to what it was before the passage of Public Law 94-581 in one respect only, and that is with regard to the outpatient treatment of the most seriously disabled veterans.

Previously, those veterans who were in receipt of special pension allowances because they were housebound or in need of aid and attendance were authorized outpatient treatment by fee-basis physicians. Inadvertently, what was viewed as a conforming change in Public Law 94–581 developed into a restrictive amendment. It limited outpatient treatment to that available within the limits of Veterans' Administration facilities.

The effect of this restriction on those veterans who can never travel without difficulty and certainly never inexpensively can be easily understood.

In my opinion the restoration of their full entitlement is practically mandatory. I am going to vote for this legislation.

Mr. HILLIS. Mr. Speaker, I rise in support of this measure.

Last year when we passed the Veterans' Omnibus Health Care Act of 1976, Public Law 94–581, the Congress adopted what was at that time considered conforming or technical amendments. However, since the enactment of that measure, it has been determined that those technical amendments, indeed, made substantive changes in the law preventing the VA from having any fee-basis authority to provide care to some of our most disabled and deserving veterans. There is no question that this was not the intent of the Congress in adopting these amendments.

I commend the leadership of the Veterans' Affairs Committee for acting expeditiously on this matter to correct a great injustice being perpetrated on thousands of our most needy veterans due to a mistake by this body.

H.R. 5027 allows those veterans receiving fee-basis care to continue receiving this care as long as it is determined to be medically necessary. If this care is determined to be unnecessary, care could then be provided in VA facility or terminated as the case may be. This case-by-case review of fee-basis contracts will insure that this type of care is provided only in instances of medical necessity.

I strongly urge that every Member give his or her support to this measure.

Mr. HAMMERSCHMIDT. Mr. Speaker, I have no further requests for time, and I reserve the balance of my time.

Mr. ROBERTS. Mr. Speaker, I have no further requests for time, and I reserve the balance of my time.

The SPEAKER. The question is on the motion offered by the gentleman from Texas (Mr. ROBERTS) that the House suspend the rules and pass the bill H.R. 5027

Mr. BAUMAN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. Pursuant to clause 3 of rule XXVII, and the Chair's prior announcement, further proceedings on this motion will be postponed.

REVISE AND IMPROVE THE PROGRAM OF MAKING GRANTS TO THE STATES FOR THE CONSTRUCTION, REMODELING, AND RENOVATION OF STATE HOME FACILITIES

Mr. ROBERTS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3695) to amend title 38 of the United States Code in order to revise and improve the program of making grants to the States for the construction, remodeling, or renovation of State home facilities for furnishing hospital, domiciliary, and nursing home care for eligible veterans, and for other purposes.

The Clerk read as follows:

H.R. 3695

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subchapter V of chapter 17 of title 38, United States Code, is amended by deleting section 644 in its entirety.

SEC. 2. Subchapter III of chapter 81 of title 38, United States Code, is amended—
(1) by amending section 5031(c) to read

as follows:

"(c) The term 'construction' means the construction of new nursing home or domiciliary facilities, the expansion, remodeling, or alteration of existing hospital, nursing home care, or domiciliary facilities, and the providing of initial equipment for any such facilities.";

(2) by amending section 5031(d) to read as follows:

"(d) The term 'cost of construction' means the amount found by the Administrator to be necessary for a project of construction of facilities defined in section 5031(c), including architect fees, but not including the cost of acquisition of land.";

(3) by amending section 5032 to read as follows:

"The purpose of this subchapter is to assist the several States to construct State home facilities for furnishing nursing home care or domiciliary care to veterans, and to assist the several States to remodel, modify, or alter existing hospital, nursing home, or domiciliary facilities in State homes providing care and treatment for veterans."; and

(4) by amending section 5033 to read as follows:

"(a) There is hereby authorized to be appropriated \$15,000,000 for the fiscal year ending September 30, 1978, and a like sum for the succeeding fiscal year. Sums appropriated pursuant to this section shall be used in such manner as deemed appropriate by the Administrator for making grants to States which have submitted, and have had ap-

proved by the Administrator, applications for carrying out the purposes of section 5032 of this title.

"(b) Sums appropriated pursuant to subsection (a) of this section shall remain available until expended.".

SEC. 3. The heading at the beginning of subchapter III of chapter 81 is amended by inserting "HOSPITAL, DOMICILIARY, and" before "NURSING HOME CARE".

SEC. 4. The table of sections at the beginning of chapter 17 of title 38, United States Code, is amended by deleting in subchapter V the following:

"644. Authorization of appropriations.".

SEC. 5. The table of sections at the beginning of chapter 81 of title 38, United States Code, is amended by inserting in the heading of subchapter III: "HOSPITAL, DOMICILIARY, AND" before "NURSING HOME CARE".

The SPEAKER. Is a second demanded? Mr. HAMMERSCHMIDT. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from Texas (Mr. Roberts) will be recognized for 20 minutes, and the gentleman from Arkansas (Mr. Hammerschmidt) will be recognized for 20 minutes.

The Chair recognizes the gentleman

from Texas (Mr. ROBERTS).

Mr. ROBERTS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 3695 is an administration proposal. The bill would increase by \$5 million the annual authorization for grants to States for the construction, remodeling, or renovation of State home facilities furnishing care to veterans.

The increased annual authorization is necessary because of the increased number of applications received by the Veterans' Administration for such grants.

I believe we should continue to encourage States to provide such facilities for hospital, domiciliary, and nursing care for veterans.

I know of no opposition to the measure and I hope it will be adopted.

Mr. Speaker, I yield such time as he may consume to the gentleman from

Virginia (Mr. SATTERFIELD).

Mr. SATTERFIELD. Mr. Speaker, on January 19, 1977, the Deputy Administrator of Veterans' Affairs transmitted to the Speaker of the House a legislative proposal to expand and improve the program of making grants to the States for the construction, remodeling, or renovation of State home facilities for furnishing hospital, domiciliary, and nursing home care for eligible veterans.

On March 1, 1977, the Subcommittee on Medical Facilities and Benefits held hearings on the administration proposal, H.R. 3695. The subcommittee received testimony from the Veterans' Administration, the Paralyzed Veterans of America, the Disabled American Veterans, the American Legion, Amvets, the Veterans of Foreign Wars, and the National Association of State Veterans' Homes.

The subcommittee recommended H.R. 3695 to the full committee on March 9 and the full committee, by unanimous

voice vote, ordered the bill reported on March 10.

Under existing law financial grants by the Veterans' Administration are authorized to States for remodeling existing State hospital and domiciliary facilities (38 U.S.C. 644) and also for constructing new State nursing home facilities (38 U.S.C. 5033). Each program contains an annual appropriation authorization of \$5 million through 1970.

Several States have indicated interest in constructing new domiciliaries, either to replace structures which are not economical to remodel or to add additional domiciliary beds. Moreover, according to the Veterans' Administration, the Agency has received more requests for nursing home construction than it can support within the current annual authorization of \$5 million.

Over 10,000 veterans are being treated and cared for in State homes.

H.R. 3695 would reenact the two State home grants programs as a single provision of law. It would authorize the use of funds for the construction of new State home domiciliaries in the same manner as is now provided for State nursing home care. The bill would also increase the appropriation authorized to provide financial assistance toward other badly needed State home facilities.

Enactment of the reported bill would enable the Veterans' Administration to grant to eligible States \$15 million for fiscal years 1978 and 1979—an increase of \$5 million for each fiscal year.

Mr. Speaker, each of the veterans' organizations, the National Association of State Veterans' Homes and the Veterans' Administration, reported favorably on this bill.

Mr. Speaker, I urge passage of H.R. 3695.

Mr. HAMMERSCHMIDT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 3695. This measure will revise an existing program of making grants to States for the construction of State domiciliary homes and nursing homes for eligible veterans.

Under existing law, the Veterans' Administration is authorized to make grants to States for remodeling existing State hospital and domiciliary facilities and also for constructing new State nursing home facilities. Each of these programs authorizes an annual appropriation of \$5 million for each fiscal year through 1979.

Unfortunately, under existing law, States that do not presently operate State domiciliary facilities cannot participate in the Federal grant program, since it is limited to the remodeling of homes in those States that already operate State homes.

The law, on the other hand, contains no prohibition against any State constructing new State nursing home facilities or remodeling existing facilities. Our committee has received expressions of interest in constructing new domiciliary homes from States that do not presently operate such homes. My own State of Arkansas, for instance, has expressed interest in such a project.

The bill before us, H.R. 3695, will permit States that do not presently have veterans domiciliary homes to participate in the Federal grant funds that are available to States that are already operating such homes and wish to expand them. In combining the two provisions of existing law and the \$5 million per year authorization therefor, H.R. 3695 will provide an additional \$5 million authorization, making a total of \$15 million for each year through the 1979 fiscal year. Under this program, Mr. Speaker, the Federal Government does not provide all of the funds for the construction of domiciliary or nursing homes. The Federal Government provides up to 65 percent of the funds while the State must appropriate the balance of the funds needed for this construction. This is an excellent program and permits the Federal Government to share with State governments its obligation to the Nation's veterans at a fraction of the costs it would otherwise be required to underwrite should the care be provided in Federal facilities.

I urge that the bill be passed.

Mr. Speaker, I have no further requests for time, and reserve the remainder of my time.

Mr. TEAGUE. Mr. Speaker, I strongly support the bill, H.R. 3695, that would increase the annual authorization to expand and improve the program of making grants to the States for the construction, remodeling, or renovation of State home facilities by \$5° million. This bill would authorize a total of \$15 million for such grants in fiscal year 1978 and the same amount in 1979.

The Congress should do everything it possibly can to encourage more States to construct and operate medical facilities for care and treatment of veterans. Currently more than 10,000 veterans are receiving care and treatment in such homes. Under section 641 of title 38, the Administrator is authorized to pay each State a per diem rate of \$5.50 for domiciliary care, \$10.50 for nursing home care, and \$11.50 for hospital care, for each veteran receiving such care in a State home, if such veteran is eligible for such care in a Veterans' Administration facility. It is obvious that treatment and care in State homes results in a savings to the Federal Government in that all such veterans are eligible for treatment in VA facilities and most, if not all, would be receiving such care and treatment without the State home beds.

Mr. Speaker, I hope the reported bill receives the overwhelming support of the House.

Mr. WYLIE. Mr. Speaker, I rise in support of H.R. 3605. This bill would incorporate two separate State financial grants into a single provision of law. At the present time, one provision authorizes grants for the remodeling of existing State veterans' hospitals and domiciliaries and the other for the construction of new State nursing home facili-

ties. Each program contains an annual appropriation of \$5 million. The bill before us would increase the overall amount to \$15 million and authorize the Administrator of Veterans' Affairs to permit the eligible States to spend the money for either construction or alteration according to their need. Under the present law, the \$10 million appropriation requires that \$5 million be allocated to each of the two separate programs.

There is an ever-increasing number of older veterans in the United States. The need for their care and medical attention has increased accordingly, especially in the area of nursing care.

State nursing home facilities are needed badly. This legislation will be of particular help in providing new ones.

The State programs for care of veterans has been of great assistance to the Veterans' Administration in augmenting its programs. The veterans themselves many times prefer to use the State facilities because they are closer to their homes and their loved ones. There is also for consideration the fact the States share in defraying the costs involved, thus permitting the care of a large number of veterans for a comparable amount of the Federal Government tax dollar.

I am in complete accord with the aims of this bill, and recommend its passage. Mr. HILLIS. Mr. Speaker, I rise in

support of this measure.

H.R. 3695 is an effort by the House Veterans' Affairs Committee to insure the continuing improvement of the medical services available to our veterans. The medical facilities operated by the Veterans' Administration comprise the largest single hospital, nursing home, and domiciliary care program in the United States. Even so, it has become increasingly difficult to insure that the medical needs of our veterans are being met

With the continuing demand for nursing homes and domiciliary facilities, present appropriation levels have proven inadequate. H.R. 3695 will allow eligible States to be more flexible and responsive in meeting these needs. With this greater flexibility, and the increase in funding provided for by this measure, States will be able to construct needed domiciliary facilities and nursing homes which are long overdue. I strongly urge my colleagues to join with me in supporting H.R. 3695 which is vital in meeting the

needs of our aging veterans.

Mr. ABDNOR. Mr. Speaker, I rise in support of H.R. 3695. Today we have the opportunity to assist our States in providing care to our veterans. We have long assisted the State in caring for our veterans through grants from the Veterans' Administration, H.R. 3695 provides us with the opportunity to continue the authorization of these programs. Existing law provides \$5 million for grants to States for construction and renovation of State homes and domiciliaries. Several States have requested assistance and the current authorization will not meet the needs. H.R. 3695 would increase the authorization to \$15 million for fiscal year 1978 and the same amount for fiscal year

1979. It would also allow the Administrator to use the funds as he deems necessary. Passage of this measure will enable us to assist the States in providing better domiciliary and home care for our veterans. I urge a favorable vote.

Mr. ROBERTS. Mr. Speaker, I have no further requests for time, and reserve the remainder of my time.

The SPEAKER. The question is on the motion offered by the gentleman from Texas (Mr. ROBERTS) that the House suspend the rules and pass the bill H.R.

The question was taken.

Mr. HILLIS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. Pursuant to clause 3 of rule XXVII and the Chair's prior announcement, further proceedings on this motion will be postponed.

AUTHORIZING CONTRACTS WITH REPUBLIC OF THE PHILIPPINES FOR PROVISION OF HOSPITAL CARE AND MEDICAL SERVICES TO COMMONWEALTH ARMY VET-ERANS AND NEW PHILIPPINE SCOUTS

Mr. ROBERTS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5029) to amend title 38 of the United States Code in order to authorize contracts with the Republic of the Philippines for the provision of hospital care and medical services to Commonwealth Army veterans and New Philippine Scouts for service-connected disabilities; to authorize the continued maintenance of a Veterans' Administration office in the Republic of the Philippines; and for other purposes.

The Clerk read as follows: H.R. 5029

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That section 230(b) of title 38, United States Code, is amended by striking out "June 30, 1978" and inserting in lieu thereof "September 30,

Sec. 2. Section 632 of title 38, United States Code, is amended-

(1) by striking out "Veterans Memorial Hospital" each place it appears in such section and inserting in lieu thereof in each such place "Veterans Memorial Medical Cen-

(2) by amending the matter preceding clause (1) in subsection (a)—
(A) by striking out "a contract" and inserting in lieu thereof "contracts", and

by inserting immediately after "1978." the following: "and the period beginning on July 1, 1978, and ending on September 30, 1979.

(3) by striking out "July 1, 1978" in subsection (b) and inserting in lieu thereof

"October 1, 1979"; and

(4) by striking out "during the five years beginning July 1, 1973, and ending June 30, 1978—" subsection (d) and inserting in lieu thereof "occurring during the period begin-ning July 1, 1973, and ending September 30,

The SPEAKER. Is a second demanded? Mr. HAMMERSCHMIDT. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from Texas (Mr. Roberts) will be recognized for 20 minutes, and the gentleman from Arkansas (Mr. Hammerschmidt) will be recognized for 20 minutes.

The Chair recognizes the gentleman

from Texas (Mr. ROBERTS).

Mr. ROBERTS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, under current law the authority to provide benefits to the Republic of the Philippines for medical care and treatment of eligible veterans will expire in 1978. H.R. 5029 would simply extend that authority for 1 additional

The Congress for many years has acknowledged the moral obligation to provide care for service-connected Filipino veterans who fought with us during World War II to enable the Philippine Government to maintain a high standard of medical care for its veterans and for American veterans who reside in the Philippines. Although the Veterans' Administration and the State Department would prefer a 5-year extension of the current law, they support H.R. 5029.

Mr. Speaker, I yield such time as he may consume to the gentleman from

Virginia (Mr. SATTERFIELD).

Mr. SATTERFIELD. Mr. Speaker, I thank the gentleman from Texas (Mr. ROBERTS) for his remarks.

Mr. Speaker, the bill, H.R. 5029 would extend for a period of 1 year the benefits we have provided to the Republic of the Philippines to provide medical care and treatment as well as nursing home care to Commonwealth Army veterans and New Philippine Scouts. It would also extend for a period of 1 year the Administrator's authority to maintain the regional office and an outpatient clinic in

Mr. Speaker, the Philippines is the only foreign country in which the Veterans' Administration operates a comprehensive benefit program. This program resulted from several causes. The Philippines was a U.S. possession from 1898 until its independence was granted in 1946: Filipinos have served in and with the U.S. Armed Forces since the Spanish-American War, particularly during World War II; and in addition, the Armed Forces have continually recruited several thousand Filipinos each year to serve in the U.S. Armed Forces.

There are four basic categories of recipients of veterans' benefits residing in the Philippines. Filipinos with service in the regular components of the U.S. Armed Forces-including those who served before and during World War II as Philippine Scouts, called Old Scoutsare, for purposes of veterans' benefits, considered U.S. veterans. Approximately 20,000 of these veterans reside in the Philippines and they and their dependents are entitled to the entire plethora of benefits available to American veter-

In addition to these veterans, three additional groups of Filipino veterans are

entitled to limited benefits as a result of military service during and immediately after World War II.

These include approximately 110,000 Filipinos who served in the Philippine Commonwealth Army who were inducted into the U.S. Armed Forces of the Far East in 1941; approximately 312,000 who fought during World War II in guerrilla units recognized by the U.S. Army as part of the U.S. Armed Forces; and 30,000 Philippine Scouts, called New Scouts, enlisting in the U.S. Armed Forces under the provisions of the Armed Forces Voluntary Recruitment Act of 1945. By law these veterans and their dependents are entitled to limited monetary benefits, which are currently paid 50 cents in Philippine pesos for every U.S. dollar to which otherwise entitled.

In addition to monetary benefits, medical benefits for Filipino veterans are provided through a VA grant-in-aid program, primarily for inpatient care at the Veterans' Memorial Hospital in Manila. Filipinos who are "U.S. veterans" and American veterans are also treated at this hospital, but the Veterans' Administration pays their bills from funds appropriated to operate its own medical care system.

Since the enactment of Public Law 865, 80th Congress, approved July 1, 1948, there has been a special program of financial aid to the Republic of the Philippines to assist in providing hospitalization for Commonwealth Army veterans who sustained disabilities during their service in World War II. Public Law 865 established a grant-in-aid program. In addition, the act provided for the construction of the Veterans' Memorial Hospital in Manila at a cost of \$9.4 million, and authorized payments not to exceed \$3,285,000 per year for 5 years through June 30, 1953, as reimbursement for either contract hospitalization or expenses of operation of hospital facilities constructed under the act.

Public Law 84-421 extended the 5-year period of reimbursement for an additional 5 years through June 30, 1958, and authorized payments of \$3 million the first year with payments decreasing by \$500,000 each subsequent year.

Public Law 85-461 authorized modification and extension of the program for another 5 years. The law stated that beginning July 1, 1958, the total of all payments for hospitalization plus cost of travel authorized in connection with hospital care would not exceed \$2 million for any fiscal year.

Public Law 88-40, approved June 13, 1963, extended both the hospitalization and outpatient programs for eligible veterans for an additional 5 years, terminating June 30, 1968.

Public Law 89-612, approved September 30, 1966, expanded and extended the grant-in-aid program for an additional 5-year period ending June 30, 1973. In addition to extending the authority to pay for the expenses of hospitalization and outpatient programs under previous laws for Commonwealth Army veterans for service-connected disabilities, the act broadened the authority to include payments for hospital care at the Veterans' Memorial Hospital of such veterans for nonservice-connected disabilities if they were unable to defray the expenses of necessary hospital care. Moreover, the act authorized such care for New Philippine Scouts who enlisted before July 1, 1946, for either service-connected or nonservice-connected disabilities, if they qualify as veterans of a war unable to defray expenses.

Finally, Public Law 93–82, approved August 2, 1973, extended through June 30, 1978, the grant authority for hospital care and medical services for eligible veterans at a level of \$2 million annually. and authorized that an amount not to exceed \$250,000 of that amount could be used to provide nursing home care for eligible veterans requiring such care. That law also provided for an annual grant of \$50,000 for education and training of health service personnel at the Veterans' Memorial Hospital, and \$50,000 for replacing and upgrading equipment and rehabilitating the physical plant at such hospital through June 30, 1978.

The reported bill, H.R. 5029, would extend for 1 year the current authority of the President to assist the Republic of the Philippines in providing medical care and treatment and nursing home care to certain Commonwealth Army veterans and New Philippine Scouts, and would authorize the Administrator of Veterans' Affairs to continue to maintain an office in the Republic of the Philippines. The bill is identical to H.R. 5030, cosponored by the Honorable Lester L. Wolff.

Congress has continued to acknowledge certain moral obligation to provide care for service-connected Filipino veterans and to recognize, as a practical matter, that the program enables the Philippine Government to maintain a high standard of medical care for its veterans which would not be possible if

such assistance was withheld.

Although the U.S. position has always been that the Philippine Government would eventually be expected to assume full responsibility for the operation and maintenance of the Veterans' Memorial Hospital, because of the state of the Philippine economy, the Veterans' Administration and the Department of State have recommended that the current law be extended an additional 5 years.

Data before the Committee on Veterans' Affairs suggests that the Government of the Philippines may now be less able to bear the cost of assuming total responsibility for the medical program than it would have been at the beginning of this decade.

Therefore, the Committee on Veterans' Affairs has reported H.R. 5029 which would simply extend current authority through fiscal year 1979, in lieu of H.R. 2860, a bill favored by the administration that would have extended current authority for another 5 years.

The committee considered the 5-year extension request; however, except for an inspection of the veterans' hospital in 1976 by the Honorable Don EDWARDS, ranking member of the Subcommittee on Medical Facilities and Benefits, it has been several years since the committee has made a site visit in reference to the hospital program in the Philippines, and the committee feels an onsite inspection of the VA office, hospital, and clinics is necessary before making a long-term commitment. Such site inspection will be made prior to September 30, 1979.

A 1-year extension of current law, rather than a 5-year extension as proposed by the administration, should not be interpreted to mean that the committee or the Congress is giving serious thoughts to reducing the medical benefit program in the Philippines. The committee recognizes the Nation's responsibilities to the Commonwealth Army veterans and eligible Philippine Scouts who fought so gallantly with the U.S. Armed Forces against a common enemy in World War II.

Mr. Speaker, I urge the passage of the bill, H.R. 5029.

Mr. HAMMERSCHMIDT. Mr. Speaker, I rise in support of H.R. 5029, a bill which would continue a program initiated by the enactment of Public Law 865 of the 80th Congress in 1948. This program was designed to provide medical care for Philippine Commonwealth Army veterans who incurred disabilities during service in World War II. A part of this law authorized funds for the construction of the Veterans Memorial Hospital, Manila. It was, in essence, a program of financial aid grants.

The program has been extended by legislation on five occasions, for periods of 5 years, most recently in 1973. There has been a broadening of the basic law in the intervening years consisting, in part, of adding certain New Philippine Scouts to the eligibles, hospitalizing those unable to defray the costs of hospital care for non-service-connected disabilities, and updating and maintenance of the hospital and equipment.

The goal of the United States has been that ultimately the Government of the Philippines would asume the costs of operation and maintenance of the Veterans Memorial Hospital. This goal has not yet been attained, and under the present law the program will expire on June 30, 1978. The legislation under consideration would extend this date by only 1 year. Before the new deadline that would be established is reached, the Committee on Veterans' Affairs intends to survey the program with the view toward determining to what extent future grants should be made.

Since we certainly have, at the very least, a moral obligation to provide medical care for those loyal veterans of the Philippines who valiantly assisted us during World War II, I favor the continuance of H.R. 5029 and will, therefore. vote for its passage.

Mr. HILLIS. Mr. Speaker, I rise in support of this measure.

Since 1948 the United States has recognized to varying degrees its obligation to provide adequate compensation to Filipino veterans who have a serviceconnected disability. This obligation is a direct result of the special relationship

which the American people have with the Filipinos. The \$2.1 million authorized in this legislation will insure that those Filipinos who came to the aid of the United States and risked their lives in battle are not forgotten. May it never be said that we forgot those who fought on the behalf of the United States. To that end. I urge my fellow colleagues to support H.R. 5029, which will demonstrate to those eligible Filipino veterans the appreciation we have for their loyalty.

Mr. TEAGUE. Mr. Speaker, I strongly support the bill H.R. 5029, a bill to extend the authority of the President to assist the Republic of the Philippines in providing medical care and treatment and nursing home care to certain Commonwealth Army veterans and certain Philippine Scouts. Current authority to provide such assistance will expire on September 30, 1978, and the reported bill would permit the authority to continue

through fiscal year 1979.

Mr. Speaker, Public Law 865 of the 80th Congress authorized the construction of the Veterans Memorial Hospital in the Philippines. When this hospital was opened on November 20, 1955, it was beyond any doubt one of the finest and best equipped hospitals in Southeast Asia. I attended the dedication. The hospital was a showplace and a monument to the close ties existing between the United States and the Republic of the Philippines. In 1966, when we expanded the existing program at that time, I stated that the medical care program was fulfilling its mission of providing the best of medical care for veterans who served in the organized military forces of the Commonwealth of the Philippines while such forces were in the service of the Armed Forces of the United States. The reported bill will assure the continued efficient operation of the hospital and will assist the Philippine Government in providing a high standard of medical care for veterans through fiscal year 1979.

I am pleased that the committee report takes note of the fact that a 1-year extension of the current law should not be interpreted to mean that the Congress is giving serious thought to reducing the medical benefit program in the Philippines. I think it is very important to assure the continued and effective operation of this hospital as a symbol of the solidarity of the two nations.

Mr. Speaker, I have been privileged to have visited the hospital several times. I am delighted that the Subcommittee on Medical Facilities and Benefits plans to make a site visit sometime during the next year. I think the subcommittee will find that the hospital is fulfilling its intended mission.

I support the bill and I hope it is

adopted by unanimous vote.

Mr. ABDNOR. Mr. Speaker, I rise in support of H.R. 5029. This bill will authorize \$2.1 million for the continued operation of the Veterans Memorial Hospital in Manila to assist the Republic of the Philippines in caring for Commonwealth Army veterans and members of the Philippine Scouts who sustained disabilities during World War II. It has consistently been the U.S. position that the Philippine Government should eventually take over full responsibility for the operation of the facilities, but until that time that we should assist in providing adequate care for those who fought so valiantly with our forces in World War II. I feel that we should continue this obligation and ask that you join me in support of this measure of which I am a cosponsor.

Mr. HAMMERSCHMIDT. Mr. Speaker, I have no further requests for time and reserve the balance of my time.

Mr. ROBERTS. Mr. Speaker, I have no further requests for time and reserve the

balance of my time.

The SPEAKER pro tempore (Mr. SISK). The question is on the motion offered by the gentleman from Texas (Mr. ROBERTS) that the House suspend the rules and pass the bill H.R. 5029.

The question was taken; and (twothirds having voted in favor thereof) the rules were suspended and the bill was

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ROBERTS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous matter on the three veterans bills just passed (H.R. 5306, H.R. 5027, and H.R. 3695).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

EFFECTIVE DATE OF CHANGES IN SICK PAY EXCLUSION

Mr. ULLMAN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1828) to provide that the changes made by the Tax Reform Act of 1976 to the exclusion for sick pay shall only apply to taxable years beginning after December 31, 1976, as amended.

The Clerk read as follows:

H.R. 1828

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. ONE-YEAR POSTPONEMENT OF EF-FECTIVE DATE OF CHANGES IN THE SICK PAY EXCLUSION

(a) Section 505 of the Tax Reform Act of 1976 (relating to changes in exclusions for sick pay and certain military, etc., disability pensions; certain disability income) is amended by adding at the end thereof the following new subsection:

"(f) EFFECTIVE DATE FOR SUBSECTION (a). The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1976."

(b)(1) Paragraph (1) of section 505(c) such Act is amended by striking out "1976" and inserting in lieu thereof "1977".

(2) Paragraph (3) of such section 505(c) is amended by inserting "or January 1, 1977," after "January 1, 1976,".

(c)(1) Paragraph (1) of section 505(d)

of such Act is amended by striking out "1976" and inserting in lieu thereof "1977"

(2) Paragraph (2) of such section 505(d) is amended by inserting "or December 31, 1976," after "December 31, 1975,".

(3) Subsection (d) of section 505 of such Act is amended by striking out "this subsection" and inserting in lieu thereof "such section 105(d)".

(d) The amendments made by this section shall take effect on October 4, 1976.

SEC. 2. TREATMENT OF CERTAIN ELECTIONS OF ANNUITY STARTING DATE.

(a) Any election made under section 105 (d) (7) of the Internal Revenue Code of 1954 or under section 505(d) of the Tax Reform Act of 1976 for a taxable year beginning in 1976 may be revoked (in such manner as may be prescribed by regulations) at any time before the expiration of the period for assessing a deficiency with respect to such taxable year.

(b) In the case of any revocation made under subsection (a), the period for assessing a deficiency with respect to any taxable year affected by the revocation shall not expire before the date which is 1 year after the date of the making of the revocation, and, notwithstanding any law or rule of law, such deficiency, to the extent attributable to such revocation, may be assessed at any time during such 1-year period.

(c) The amendments made by the first section of this Act shall not apply

- (1) with respect to any taxpayer who makes or has made an election under section 105(d)(7) of the Internal Revenue Code of 1954 or under section 505(d) of the Tax Reform Act of 1976 (as such sections were in effect before the enactment of this Act) for a taxable year beginning in 1976, if such election is not revoked under subsection (a) of this section, and
- (2) with respect to any taxpayer (other than a taxpayer described in paragraph (1)) who has an annuity starting date at the be ginning of a taxable year beginning in 1976 by reason of the amendments made by section 505 of the Tax Reform Act of 1976 (as in effect before the enactment of this Act), unless such person elects (in such manner as the Secretary of the Treasury or his delegate may by regulations prescribe) to have such amendments apply.

The SPEAKER pro tempore. Is a second demanded?

Mr. CONABLE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

Mr. ULLMAN. Mr. Speaker, H.R. 1828 generally postpones for 1 year the effective date of the sick pay revisions made by the Tax Reform Act of 1976.

The 1976 act made extensive changes in the tax treatment of sick pay; it generally repealed the provision and substituted a new, more restricted, disability income exclusion. The major changes made by the 1976 act in this provision include the following: The exclusion is available only if the taxpayer is permanently and totally disabled; the exclusion is phased out for adjusted gross incomes of more than \$15,000; and, under certain circumstances if a taxpayer wishes to recover tax-free the amount of any contributions he or she made to an annuity program, the taxpayer must make an irrevocable election not to use

the sick pay exclusion for that year and

any subsequent year.
Although the Tax Reform Act of 1976 did not become law until October 4, 1976, the revisions in the sick pay exclusion were made applicable back to January 1. 1976. Even though the House version of the tax reform bill, which passed on December 4, 1975, changed the sick pay provision prospectively, by applying the revisions to taxable years beginning after December 31, 1975, most of the taxpayers affected by the change were not aware of it.

By October 4, 1976, many people had received amounts which were excludable as sick pay under the old law, but not under the new law. In many of these cases, the taxpayers did not fully realize what changes had been made until they examined the tax forms and instructions this year, and had to come up with the additional money to pay the increased tax liabilities.

This bill relieves those taxpayers of these unanticipated tax increases by generally postponing for 1 year the effective date of the sick pay provisions. Under this bill, the sick pay provisions generally begin to apply in 1977—that is, for taxable years beginning after December 31, 1976.

The bill also contains a number of technical provisions designed to protect people who made certain elections relating to sick pay under the 1976 act provisions. These people will be given the opportunity to revoke those elections and make new elections beginning in 1977 or at a later date. Also, for some people the 1976 act rules reduce current or future tax liability. For those relatively few people who prefer the 1976 act rules, the bill permits them to stay on those rules for 1 more year.

In effect, taxpayers are permitted by the bill to choose whether 1976 is to be their last year under the old rules or their first year under the new rules.

This delay in the effective date is estimated to result in a one-time \$327 million reduction in receipts, all in fiscal year 1977. The third concurrent budget resolution, as agreed to by the Congress. provides sufficient room for this revenue reduction.

Mr. Speaker, I believe the changes made by this bill are reasonable and fair. I urge the House to pass the bill, H.R.

Mr. CONABLE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 1828, which would change the effective date of changes in the sick pay exclusion in the Tax Reform Act of 1976 by 1 year. so that the new provisions would apply to taxable years beginning after December 31, 1976.

The bill would also permit taxpayers as to whom the new rules resulted in lower taxes than the pre-1976 rules to have the option of keeping the new Tax Reform Act rules in effect for taxable year 1976. In fact, of course, many people have already filed their 1976 tax returns in accordance with the new rules, which are incorporated into the relevant tax forms and instructions.

I believe that the change in the effective date in this bill is an equitable and necessary one. The Tax Reform Act of 1976 was not enacted into law until the very end of the preceding Congress, in October 1976. The House version of the act had passed in December 1975, with a yearend 1975 effective date. The Senate merely used the House effective date in its version of the act. Therefore, there was no opportunity to change what had become a retroactive date in conference. the committee report on this bill points out, the result has been that many taxpayers who are retired on disability pensions have been faced with a substantially increased tax liability for 1976 which has come on them unexpectedly.

The relief in this bill is necessary. I urge its passage.

Mr. Speaker, I yield 2 minutes to the gentleman from Indiana (Mr. HILLIS).

Mr. HILLIS. Mr. Speaker, I rise in very strong support of this important legis-

Mr. Speaker, the retroactive changes implemented in the sick pay disability provision (section 505) of the Tax Reform Act of 1976 are extremely unfair. This unexpected and insensitive tax change affects those who are least able to afford it. Action to provide relief to the many sick and disabled individuals who are only now finding they must be responsible for taxes for which they were previously exempt, is necessary. It is only right that these people have ample opportunity to prepare to pay the added tax liability imposed by section 505 of the law. As it is, many are having to borrow or deplete their savings to make the lump sum payment now expected.

I am pleased that the necessity for legislation to provide relief for sick and disabled individuals has been recognized by many of my colleagues, who, like me, have cosponsored legislation to postpone the effective date of these changes for 1 year. The Ways and Means Committee has acted expeditiously in reporting out the bill, H.R. 1828, sponsored by my distinguished colleague from Indiana, Mr. JACOBS. Our positive action on H.R. 1828 to make these changes effective for taxable years after 1976, is owed to the many people who are being unfairly affected.

Mr. CONABLE. Mr. Speaker, I yield 5 minutes to the gentleman from Virginia (Mr. Robert W. Daniel, Jr.)

Mr. ROBERT W. DANIEL, JR. Mr. Speaker, as the original coauthor, with Senator ROBERT DOLE, of legislation to extend for 1 year the sick pay exclusion, I would like to urge my colleagues to support the bill we are considering today. H.R. 1828. Except for necessary technical amendments, which I supported during my testimony before the Ways and Means Committee, H.R. 1828 is identical to the original sick pay legislation that I introduced and that is now cosponsored by over 200 House members.

This impressive display of support for a short-term change in the Tax Reform Act of 1976 demonstrates the desire of many, if not most, of our colleagues to prevent a great injustice to over a million Americans.

The sick pay exclusion, prior to passage of the Tax Reform Act of 1976, was an exclusion from gross income of up to \$5,200 annually-\$100 per week maximum-in amounts received under wage continuation plans when "absent from work" because of personal illness or injury. The sick pay exclusion was often used, for example, by persons receiving a disability pension, many of those persons only partially disabled—for purposes of the job they formerly held—and presently employed in another capacity.

The use of the exclusion for deducting sick pay-as opposed to disability income-involved a waiting period which depended upon the proportion of normal salary covered by the wage continuation plan and the length, if any, of hospitalization of the taxpayer. The disabilityrelated exclusion provided that during the period that a retired employee was entitled to the sick pay exclusion, he could not recover any of his contribution toward any annuity through the section 72 (Internal Revenue Code) deduction.

The Tax Reform Act of 1976 restricted use of the sick pay exclusion, as of January 1, 1976, to those under age 65 who had retired on permanent and total disability-"unable to engage in any substantial gainful activity." Moreover, the maximum amount excludable was to be reduced on a dollar-for-dollar basis by any of the taxpayer's adjusted gross income in excess of \$15,000; thus the exclusion, if the taxpayer had received the maximum \$5,200, would not apply at all if his total income was \$20,200 or more. Where the taxpayer was married at the close of the taxable year, a joint return was required.

As we all know, the Tax Reform Act was a very voluminous piece of legislation, one whose conception and development into public law exhausted the better part of the duration of an entire Congress. It is not my intention today to argue the merits of a retention or elimination of the sick pay exclusion. I hope simply to convince my colleagues that the timing of the sick pay changes, whatever their merits, presents a real hardship for thousands upon thousands of taxpaying citizens; moreover, that the 1-year gain from stricter treatment of the exclusion in 1976, particularly with consideration of the imminent tax stimulus to the economy, can be fore-

Needless to say, a majority of our colleagues have heard from taxpayers who do not accept the logic of the restrictions of the sick pay exclusion. The urgent question before us today, however, is simply this: Shall the stricter treatment of the sick pay exclusion be applied to all of the tax year 1976, or should the Congress make the sick pay changes first effective in the current tax year, 1977?

We are going to decide an issue of fairness today. The Congress certainly had the right to change the sick pay exclusion, but is it fair to revoke a deduction for sick and disabled people toward the end of a tax year? I think not.

Because the Tax Reform Act was not signed into law until October 1976, the stricter treatment of the sick pay exclusion was, in effect, retroactive. Indeed, because estimated taxpayments and withholding were based on the former law, many affected taxpayers paid or withheld far too little money. As a result, these Americans, many of whom are in dire financial condition as a result of their illness or disability, are expected to pay an additional lump sum tax of up to hundreds of dollars. Few of the 1.2 million Americans affected are fortunate enough to be able to absorb such a large, unexpected financial loss without severe personal sacrifice.

As one of my constituents wrote:

If the tax law were made effective as of January 1, 1977, we could make arrangements to have the tax withheld during the year and not have to face having to pay such an unexpected sum at the end of the year.

Or, as one man from North Carolina wrote:

My Federal income tax is paid wholly on an estimated basis. The estimate for 1976 took into consideration my qualification for "sick pay exclusion" from my Civil Service retirement annuity. It frightens me to think of the additional tax due next April unless your measure is approved.

Finally, as another of my constituents wrote:

Most people who live on a fixed income live on a very tight budget. Many will be unable to pay this added tax without undue hardship as they have had no opportunity to save for this unexpected taxation.

The 1-year extension of the sick pay exclusion is supported by a wide range of citizen groups. These include the American Association of Retired Persons, the National Association of Retired Federal Employees, the National Treasury Employees Union, the National Federation of Federal Employees, the Air Force Sergeants Associations, the United Mine Workers, and the AFL-CIO.

Both the Senate and House have accepted changes in the 1977 budget resolution to accommodate the 1-year loss of \$327 million. The Senate Finance Committee has attached sick pay extension language to the President's tax reduction legislation, indicating the other body's interest in this measure. Mr. Dole's legislation, S. 4, has attracted 30 Senate

cosponsors.

We have a chance today to show over a million Americans that the Congress is compassionate, sensitive and fair in the application of tax law. I ask my colleagues to act quickly and favorably on H.R. 1828.

Mr. CONABLE. Mr. Speaker, I yield such time as he may consume to the gentleman from Virginia (Mr. Wamp-LER) .

Mr. WAMPLER. Mr. Speaker, it is a pleasure for me to rise in support of H.R. 1828, to defer the effective date of the sick pay exclusion for 1 year, to apply only to taxable years beginning after December 31, 1976.

The Committee on Ways and Means

has taken prompt action on this measure, for which they are to be commended. The House of Representatives, by considering this measure on a timely basis, is showing to the American people that we are sensitive and compassionate to the special problems resulting from legislation which we have previously endorsed, namely the Tax Reform Act of 1976. By our willingness to correct this apparent inequity, we may perhaps regain a part of the confidence lost in the House and in the Congress by our citizens. It was not the intent of the 94th Congress to force this hardship on our disabled and elderly who are hardest hit by this retroactive taxation on their sick and disability pay.

Approximately 1.2 million taxpayers

are affected by the sick pay exclusion. and these persons had every right to expect to take advantage of the personal income tax deduction of up to \$100 per week in sick or disability pay on their 1976 tax returns. To eliminate this exclusion retroactively, whether intentionally or not, is most unfair, leaving many of our sick or disabled with unexpected taxes which are a hardship for them to pay on their limited incomes, and in some cases impossible for them to pay on a timely basis.

Again, I commend my colleagues on the Committee on Ways and Means for their thoughtful consideration of this important matter, and I feel sure my colleagues in the House of Representatives will today rectify this oversight included in the Tax Reform Act of 1976 by affirmative consideration of this measure to defer the effective date of the sick

pay exclusion for 1 year.

Mr. CONABLE. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. REGULA).

Mr. REGULA. Mr. Speaker and my colleagues, I rise today in support of H.R. 1828, a bill to make the sick pay exclusion provision contained in the Tax Reform Act of 1976 effective for taxable years beginning after December 31, 1976, rather than December 31, 1975.

As you know, section 505 of this act repealed the provision under prior law that enabled an employee to exclude from income up to \$100 per week received under wage continuation plans, when he was absent from work as a result of injury or sickness. The act continued the exclusion of up to \$5,200 a year for retirees under age 65, but only if they were permanently and totally disabled.

The impact of the retroactive sick pay exclusion provision will be deeply felt by 1.2 million Americans. Each of these individuals will be required to pay an average of \$272 in extra taxes for calendar year 1976. It is only fair to allow those people affected by the change provided for in section 505, the sick and disabled of our Nation, ample opportunity to make provision for payment of this additional tax liability. I cannot fathom the wisdom of forcing these people to borrow or dip into their savings in order to make a lump sum payment for taxes which they were not expecting and for which they had not received adequate advance notice. Borrowing or withdrawing from their savings are the only alternatives presently available to these people, unless they want to be assessed a penalty by the Internal Revenue Service for failure to meet their tax obligations.

We in Congress must correct the injustice embodied in the current law by moving swiftly and positively toward enactment of H.R. 1828. As you are aware, the timetable for enactment of this bill is a strict one. For this reason, I urge all the Members of the House of Representatives to give their mutual consideration and approval to H.R. 1828. By doing this, we would be able to reconcile the injustice contained in the present sick pay exclusion provision of the Tax Reform Act of 1976, prior to April 15, 1977, the final filing date for Federal income tax returns.

Mr. CONABLE. Mr. Speaker, I yield such time as he may consume to the gentleman from Pennsylvania MARKS).

Mr. MARKS. Mr. Speaker, I rise in support of H.R. 1828, a bill to extend the effective date of the sick pay exclusion provided for in the Tax Reform Act of 1976. As one of the 180 bipartisan cosponsors, I am pleased that the Ways and Means Committee has acted so expeditiously on this bill. The bill will alleviate an unnecessarily heavy burden on a segment of the taxpaying public which can least afford it-the nearly 1 million tightly budgeted retirees and other individuals living on disability compensation.

I am sure that all of us have seen a good deal of very concerned correspondence on the sick pay exclusion cross our desks. Those worried constituents are justified in their feelings-section 505 of the Tax Reform Act of 1976 which restricts eligibility for exclusion of sick pay benefits to those under 65 and retired on permanent/total disability, is grossly inequitable. It is clearly a case of retroactive taxation as the 1976 tax law was passed virtually at the end of a tax year. Many individuals anticipated the customary exclusion for 1976 and budgeted accordingly; many have paid their 1976 taxes based on the assumption of that exclusion. Whatever the relative merits of the initial repeal of the sick pay exclusion itself, I sincerely feel that we should give the affected group of taxpayers at least 1 year to plan for a tax liability of this size. They should not be penalized for Congress time schedule in the 94th Con-

I would like to remind all of us that. as our colleague and primary sponsor of the bill, Bob Daniel of Virginia, has pointed out, "This is just a matter of fairness." I urge my colleagues to vote in favor of this bill.

Mr. CONABLE. Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan (Mr. SAWYER).

Mr. SAWYER, Mr. Speaker, when the Tax Reform Act of 1976 became law on October 1, 1976, it made extensive revisions in the sick pay exclusion retroactive to January 1, 1976. This bill before us, H.R. 1828, is a very simple piece of legislation. It will allow the many tax-payers affected, the advance notice that is reasonable and necessary in meeting their Federal tax obligations by making changes applicable only after December 31, 1976.

To expect taxpayers to bear increased tax burdens resulting from changes in law which establish a retroactive effective date is grossly unfair and establishes a bad precedent for future tax revisions.

I applaud the grassroots effort made to eliminate the sick pay exclusion inequity for 1976, and I hope President Carter will approve this legislation expeditiously in consideration of the many persons awaiting congressional action before filing their 1976 Federal income tax return. I am pleased to have been a cosponsor of similar legislation and I urge adoption of H.R. 1828.

Mr. CONABLE. Mr. Speaker, I yield such time as he may consume to the gentleman from Minnesota (Mr. Hage-

Mr. HAGEDORN. Mr. Speaker, I rise in behalf of H.R. 1828 which would delay from December 1, 1975, to December 1, 1976, the effectiveness of provisions of the Tax Reform Act of 1976 which modify the treatment of sick pay benefits. As a result of this legislation, many taxpayers who were formerly entitled to an exclusion from income of up to \$100 per week have, retroactively, been denied this benefit for 1976.

It is unnecessary to debate the merits of the sick pay exclusion at this time. H.R. 1828 does not restore it; it simply delays it. What is at issue is whether or not taxes ought to be imposed upon individuals after they have acted in good faith on the basis of tax provisions then in existence. I do not believe that this is proper. Individual taxpayers must be given the opportunity to arrange their financial affairs in a manner best suited to take advantage of Federal revenue laws. They should not have to bear unexpected or unanticipated tax burdens simply because they failed to predict the outcome of legislative debate. The sick pay exclusion was eliminated in October of 1976 by an act which purports to carry this treatment back to the beginning of the year. Unless we approve this legislation, many of those retired on disability pensions are going to be subject to heavy interest payments and penalties for inability to pay their full obligations on time. I wish to strongly urge this body to approve this legislation and to consider instituting safeguards to insure that this sort of "after-the-fact" legislating does not occur again.

Mr. CONABLE. Mr. Speaker, retroactivity is a very bad principle, even when it occurs through inadvertence, as a result of the delayed procedures here in the Congress. I urge support of this leg-

Mr. Speaker, I yield such time as he may consume to the gentleman from Maryland (Mr. BAUMAN).

Mr. BAUMAN. Mr. Speaker, I want to

pay a special word of tribute to the gentleman from Virginia (Mr. Robert W. Daniel, Jr.), who was the originator and prime sponsor of the first bill introduced to accomplish the restoration of the sick pay exclusion in the tax law. Because of the vagaries of politics in the House of Representatives, the majority party has the prerogative of presenting legislation.

It has a very worthy sponsor in this case. But without the determined effort made by the gentleman from Virginia, this legislation would not have come to passage today. I am sure it will have the endorsement of the House and the people in his district and in mine, and all across the country. They will have benefited considerably by his interest in changing what was definitely a mistake in the tax law.

Mr. Speaker, the unexpected and sudden elimination of the exclusion of sick pay as a taxable item for the entire year of 1976 poses a heavy tax burden to bear on those who can least afford it. Legislation to put at least a 1-year delay on this change will help redress the situation which is why I have cosponsored and do support legislation to defer the effective date of "sick pay" for 1 year, such as that pending today.

This change has retroactively increased the 1976 tax liability of many citizens, particularly those who are retired and on fixed incomes. We must see enacted at the earliest possible time, and hopefully enacted before the April 15 income tax deadline, legislation to delay this regressive and unfair tax imposed on more than a million sick or disabled Americans.

The retroactive nature of the elimination of the sick pay exclusion produces a cruel and costly surprise for retirees who must plan their long-term tax obligations very carefully. They cannot afford such additional and unforeseen tax burdens. The public reaction against this elimination has been overwhelming, a fact neither hearings nor further studies need to prove.

Literally thousands of letters have poured into my office protesting this retroactive policy. The message is being sent by citizens who hold in common their disappointment in and impatience with any branch of Government which could seem so insensitive to their situations. These citizens are hardly in a position to withstand the financial barrage mistakes and legislative second thoughts which end up becoming the tax law of the land. These citizens have no special trusts or funds or bank accounts from which to pay their obligations. In most cases, they are only one paycheck ahead of these obligations.

This is why I am particularly pleased that at least in this area, the Congress is doing something for, rather than to, the citizens of our Nation. The legislation we consider here today would provide for an amended return on the part of those citizens who have already made the "irrevocable election" to use section 72 exclusion of the tax form, but who would not have made that election on their 1976 returns if H.R. 318 had been

enacted earlier. This bill would change the effective date of the elimination of the sick pay exclusion from January 1, 1976, to January 1, 1977, thus providing for the needed relief to those citizens presently being victimized.

This is certainly the responsible solution needed to solve what has become a

nightmare for all too many.

I certainly hope we follow the action of the other body in passing this legislation and sending it along to the President for his signature in order that it become law before the April 15 deadline. In this way, we can assure that the beleaguered taxpayer is spared at least some of the confusion and paperwork he must put up with each year during tax time, and our action here today would also save the face of a Federal agency in what certainly deserves to be called for them, an embarrassing situation.

Mr. ROBERT W. DANIEL, JR. Mr. Speaker, will the gentleman yield?

Mr. BAUMAN. I yield to the gentleman from Virginia (Mr. ROBERT W. DANIEL, JR.).

Mr. ROBERT W. DANIEL, JR. I thank my friend, the gentleman from Mary-

land, for yielding.

Mr. Speaker, I want to say to the gentleman from Maryland (Mr. Bauman) that I am deeply grateful for his generous comments.

Mr. CONABLE. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. Whalen).

Mr. WHALEN. Mr. Speaker, I rise in support of the legislation before us today which would provide that the changes made by the Tax Reform Act of 1976 regarding tax exclusion of sick pay and disability payments would apply only to taxable years beginning after December 31, 1976. Also, I strongly urge that the exclusion of these payments for tax exemption purposes be reconsidered in the months ahead.

Before October 4, 1976, when the Tax Reform Act was passed, an employee who retired on disability or was off the job for an extended period due to ill health could exclude from Federal taxation up to \$100 per week or \$5,200 per year in sick pay benefits. Sick pay is the designation for payments which a worker who has been the victim of illness or serious personal injury receives under a wage continuation plan. The tax reform bill repealed this exclusion retroactively to January 1, 1976, except for those persons under 65 who were permanently and totally disabled. To qualify as totally disabled, a person must be unable to perform any substantial gainful activity due to a mental or physical impairment which is expected to last at least 12 months or result in death.

I disagree with the retroactive application of this provision of the Tax Reform Act. I, personally—and I believe most of my colleagues in the House and Senate—did not realize the serious impact which this particular provision of the law would have on some 1.2 million American tax-payers who had anticipated having the benefit of this exemption for the tax year of 1976. Certainly, the individual tax-

payer must be given more advance warning when a change of this magnitude and nature is made.

By imposing retroactive new rules, the Tax Reform Act placed an additional tax liability on retired employees which those persons had no reason to anticipate. These individuals—often retired and living on fixed incomes and already burdened by difficult and unusual medical and financial problems—expected to use the sick pay exclusion when filing their tax return for 1976. Perhaps the most onerous aspect of this legislation is the possibility that the people affected might have been required to pay fines or penalties for underpayment of estimated taxes.

Mr. Speaker, the cost of extending the personal income tax deduction for sick pay through 1976 would be approximately \$327 million in anticipated Federal revenues for fiscal year 1977. When compared with other Federal expenditures this seems to be a small amount to pay for assuring that no one will face unexpected tax liability and penalties for sick pay they received in 1976.

I have received a tide of mail from men and women in the Third Congressional District of Ohio who are being personally affected by the new provision. It would be difficult to overstate the anxiety which this measure has caused to the elderly and the ill who are already having a

hard time making ends meet.

I hope the House will act today with compassion and thoughtfulness and will rescind the retroactive provision of this law. In addition, I request prompt consideration by the House Ways and Means Committee of the wisdom of allowing the exclusion of this exemption to go into law at this time. In my view, it is unfair to deprive one sector—in this case, the elderly and the ill—of a tax break while allowing many other tax breaks or loopholes to go unchecked because of powerful and influential lobbies.

Mr. CONABLE. Mr. Speaker, I reserve

the balance of my time.

Mr. ULLMAN. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas (Mr. Pickle), a member of the committee.

Mr. PICKLE. Mr. Speaker, I rise in support of H.R. 1828, effective date of changes in sick pay exclusion. I was a cosponsor of this bill that would delay for 1 year the changes made by the Tax Reform Act of 1976 with respect to the exclusion of sick pay from income. I have had many letters from my constituents explaining how, since they were not aware of the change, they were faced with a larger and unexpected final taxpayment due with their 1976 tax returns. Many of these taxpayers were retired on disability pensions and this large unexpected payment was a serious hardship that they were pressed to meet. By changing the date that this becomes ef-fective for 1 year to taxable years beginning after December 31, 1976, they at least have time to budget for the change.

The bill also assists those taxpayers who prefer the tax treatment provided in the Tax Reform Act to the old sick pay provision to benefit from the annuity exclusion "as if" the Tax Reform Act disability income exclusion still applied to 1976, if they wish. Those who wish to change their "irrevocable" elections or to undo their recoveries of contributions for 1976 are also permitted to do so by the bill.

This bill is attempting to give taxpayers this year to adjust to the new changes, to use them if they wish, or to wait for another year. It seems fair to me in making such a far-reaching change, that taxpayers at least have a

year to adjust to the change.

I also wish to thank our chairman, the Honorable Al Ullman, for making it possible to consider this bill at this time, and to thank the Honorable Andy Jacobs for his leadership in bringing about this vote. It was the persistence of the gentleman from Indiana (Mr. Jacobs) that helped get the bill before us, and in the budget.

Mr. JACOBS. Mr. Speaker, will the

gentleman yield?

Mr. PICKLE. I yield to the gentleman from Indiana (Mr. Jacobs).

Mr. JACOBS. I thank the gentleman

for yielding.

Mr. Speaker, I would like to return the compliment of the gentleman from Texas (Mr. Pickle). He was, obviously, one of the strongest advocates of this

legislation in the committee.

I think it should be pointed out that when the other body makes an error, it is nice to have the House of Representatives to correct it. And when the House of Representatives is correcting such an error, it is particularly gratifying to have the kind of chairman (Mr. Ullman), who keeps his word when he says the bill will be brought up before the 15th of April. When the occasion arises, the House of Representatives can act expeditiously, especially if the gentleman from Texas (Mr. Pickle) is around.

Mr. PICKLE. The gentleman is very kind.

Mr. DON H. CLAUSEN. Mr. Speaker, I rise in strong support of H.R. 1828, to deter the effective date of the sick pay exclusion for 1 year, and I would like to commend the chairman and members of the House Ways and Means Committee for the prompt attention given this problem.

As a cosponsor of similar legislation, I was pleased with the immediate consideration my proposal and others like it received by the committee. This positive action made it possible for us to vote on

this legislation today.

The need for the change in the effective date stems from the fact that the Tax Reform Act of 1976 was not enacted until October 1976 while the sick pay revisions contained in the act were made retroactive to January 1, 1976. As a result many taxpayers are faced with a sudden and considerable tax burden.

In discussions I have had with my constituents and in the mail I have received, the point is made over and over again that this unexpected tax is inequitable as they were given no time to plan for it. I agree completely.

A taxpayer in Fort Bragg, Calif. wrote:

The worst problem, however, is that I had no opportunity to prepare for the impact of the revised Federal tax regulations and, as a result, am faced with a tax liability of some \$800 which I am absolutely unable to pay.

A family from Napa, Calif. called the sick pay benefit a burden as they must now come up with several hundred dollars to pay the tax.

Many have indicated to me that they will be forced to borrow the money to pay the tax liability if this corrective legislation is not enacted. These people are already living on limited incomes and this additional hardship may be too much for many to bear.

I urge my colleagues to join us in providing the needed relief for this group of taxpayers by voting for the extension of

the effective date.

Mr. LEGGETT. Mr. Speaker, I am pleased to add my wholehearted support to the provisions of H.R. 1828. Our action in making retroactive changes to tax treatment of sick pay, which was in my case inadvertent, has caused a great deal of anger, frustration, and consternation among those of my constituents who it affected. They do not consider that they were treated fairly in this matter, and I agree with them. For individuals whose tax affairs were prearranged based on treatment in effect at the beginning of the year and for those who make estimated payments, the rules were changed in the middle of the game. That is not the American way of doing business.

I am gratified at the rapid response of the Committee on Ways and Means in providing legislation to deal with this obvious inequity. One of the major reasons that fast action is called for in this instance is, as members are aware, that we are not talking here of a tax loophole of major proportions for wealthy individuals or large corporations. We are speaking of tax equity for wage and salary earning individuals, mostly retired. all of whom are disabled to some degree. This disability brings about both a reduced earning capacity and increased expenses due to medical needs. It is this dual drain that the sick pay exclusion was designed to take cognizance of.

The committee estimates that this bill would reduce Federal receipts by \$327 million in this fiscal year. While that is not an insignificant sum, it will not bankrupt the Federal Government, and it is certainly little enough to pay for a tax code Americans can have confidence in. In the interests of equity and fair play, I most strongly urge adoption of this measure.

Mr. LENT. Mr. Speaker, I rise in support of H.R. 1828, which would eliminate the retroactive application of changes made in the sick pay/disability exclusion law by the 1976 Tax Reform Act.

The fact that this change was to be applied retroactively can only be the result of confusion in getting the 1976 Tax Reform Act passed in the final days of the 94th Congress.

That the Congress must act to eliminate this error is obvious. Almost a million Americans, who retired on disability pensions, have been counting on the availability of this exclusion in estimating their withholding, and in preparing budgets for the 1976–77 tax years. To require them to pay this tax increase retroactively would work an unbearable hardship on many. Furthermore, to let this retroactive application of the law stand would set dangerous precedents of the kind our Constitution seeks to avoid in prohibiting the passage of any ex post facto laws.

I would also like to commend my colleague from Virginia, ROBERT DANIEL, for the effort he and his staff have put in to expedite congressional consideration of this badly needed legislation.

I urge an affirmative vote on this bill. Mr. ROGERS. Mr. Speaker, I rise in support of this bill, H.R. 1828. I am most pleased to see the House consider this bill today and I compliment the chairman of the Ways and Means Committee for the expeditious action the committee gave this legislation. I was pleased to join many Members of the House in cosponsoring legislation to prevent the retroactive taxation of disability retirement benefits received in 1976.

Since enactment of the Tax Reform Act in October, it has become apparent that this provision would impose a great hardship on many taxpayers across the country. The provision would have a particularly severe impact on great numbers of residents in my district in south Florida, who are retired on partial disability pensions with little or no outside income, and who had not set aside funds to meet this additional tax liability. I have been contacted by many constituents who will be required to borrow funds or deplete savings to meet this unexpected burden, which in many cases runs into many hundreds of dollars.

This bill will lift that burden and I

This bill will lift that burden and I urge each of my colleagues to support it. Again I commend the leadership and the committee for enabling such expeditious action on this legislation, which is so important to many of our people.

Mr. FISHER. Mr. Speaker, I would like to speak in favor of the proposal to eliminate the retroactivity feature of the changes which the Tax Reform Act of 1976 made to the tax treatment of disability and other sick pay.

The Tax Reform Act of 1976 estab-lished considerably tougher standards which a taxpayer must meet if he wishes to claim the annual exclusion of \$5,200 for disability and sick pay. These new requirements, which prevent many disabled retirees from claiming the socalled sick pay exclusion, are effective for the 1976 taxable year, even though the Tax Reform Act was not signed into law until October of that year. As a result, unless Congress acts to repeal the retroactive effect of the new provision, many taxpayers will discover that they owe a substantially higher 1976 tax bill than they thought they would have to This is a particularly cruel blow for many disabled retirees, who are living on a fixed income and will have great difficulty in raising money for this tax back-payment. To prevent this unfair and harsh result, I urge swift passage of H.R. 1828.

However, although I support the bill under consideration, it does not extend as far as I would like. Many individuals, who retired several years ago partially in reliance on the tax treatment of their disability payments, will face another hardship next year when they have to pay their taxes. It seems to me that the tax treatment accorded retired people should not be changed after the fact. Elderly taxpayers, unlike some other groups, are unable to meet cost-of-living increases with higher wages or salaries and are therefore hard-pressed to absorb a higher tax bill and higher prices while their income remains the same.

For these reasons, I hope that the Ways and Means Committee will give consideration later this year to a bill I have offered (H.R. 1828) that would provide a grandfather clause for those individuals who had retired on disability as of the date the Tax Reform Act was signed into the law. Those people would continue to receive the benefit of the \$5,200 exclusion for disability payments as if no change in the law had occurred. In most cases, this would mean that a disabled retiree could claim the sick pay exclusion until he reached age 70.

The bill before us is a necessary first step but only that.

Mr. BOB WILSON of California. Mr. Speaker, as the cosponsor of similar legislation, I would like to express my wholehearted support for H.R. 1828, which will postpone for 1 year the effective date of the change in the sick pay exclusion.

The Tax Reform Act of 1976 substantially revised the requirements of the sick pay exclusion and, additionally, made these changes retroactive to January 1, 1976. What this means is that many, many taxpayers now find that they must ante up hundreds of dollars in additional taxes by April 15. It is important to emphasize that we are not talking about a tax shelter for the well-todo, but rather about disabled workers trying to make ends meet. The average taxpayer does not have access, and cannot afford, a tax lawyer to keep him apprised of impending amendments to the Internal Revenue Code. Few of these individuals had any notion that the law would be changed, much less that it would be made retroactive. They will have to dig deeply into savings or take out loans in order to meet this obligation.

Further, I would urge the House Ways and Means and Senate Finance Committees to take another look at the change itself. I am concerned that, in trying to get at a few well-publicized abuses, we have penalized a great many innocent people. For example, I have been told that some Federal agencies have actively pushed disability retirement on their older employees as a means of meeting manpower ceilings and cutbacks. To change the rules on these individuals now, after retirement, is patently un-

fair and the entire situation needs further exploration. Additionally, we should take another look at the age 65 cutoff.

The most immediate need is to postpone the effective date of the sick pay revision until this tax year, so that those affected can assure that they pay sufficient taxes during the year. Action is imperative with April 15 barrelling down on us and I hope we can enact H.R. 1828 without delay.

Mrs. HOLT. Mr. Speaker, I rise in support of H.R. 1828, to defer the effective date of sick pay exclusion for 1 year. As you probably know, this is similar to H.R. 318 which I cosponsored and also to H.R. 933 which I myself have introduced.

As everyone knows, the Tax Reform Act of last year was undertaken in haste and there are many provisions, such as the repeal of sick pay exclusion, that were not fully considered with respect to their impact upon the sick and the disabled—the very people who were previously entitled to exclusion, at \$100 per week and up to \$5,200 a year.

Mr. Speaker, I am sure that every Member of Congress has been flooded with letters, mailgrams, and telephone calls pointing out the precipitous repeal of sick pay exclusion and the damage caused by the repeal being made retroactive to the 1976 tax year.

My constituents are desperate. The Tax Reform Act did not pass Congress until October last year and it was not signed into law until November. Thousands of those who fully expected to exclude sick pay in their 1976 income tax returns now feel betrayed by Congress. Taxes on sick pay were not withheld from their pay in 1976, and now they are forced to make a huge tax payment.

The deadline for income tax filing is exactly 11 days away. The folks back home are waiting in anguish for the outcome of H.R. 1828. They cannot wait until the last minute to file their income tax returns.

Mr. Speaker, the thrust of protests from my constituents generally runs as follows:

They are faced with the need to come up with several hundred to several thousand dollars to pay their taxes. Money saved for contingencies such as college tuition for children and other family needs is going to be wiped out. All of a sudden, they are faced with financial crises.

They suspect that Congress took advantage of them so that Members of Congress can get their pay raise this year.

Mr. Speaker, I would like to share a constituent letter which is representative of the opinion of my district in Maryland.

(From a resident of Clinton, Md.)

I am writing to you in regard to the 1976 Tax Reform Act as it affects all the people on disability retirement from the Federal Government (Civil Service). To curtail (take away) the \$5200 sick pay exclusion from these people is both discriminatory and unjust.

I cite the following programs that are not reportable income and therefore not taxable. Disability retirement payments and all other

benefits received from the Veterans Administration, Workmen's compensation for sickness and injury, Railroad Retirement and Social Security. Why single out the disability retiree from Civil Service? Prior regulations gave the Civil Service disability retiree \$5200 a year sick pay exclusion and all over that amount was fully taxable. They could also if possible have an earning capacity up to 80% of the current salary of the position vacated. My husband retired from the Federal Government in 1973 after having been on a year's sick leave. He had a combined 311/2 years of military and civil service and retired on disability because of degenerative arthritis (properly documented by doctor's certificate). He has driven a school bus for several years earning about 1/4 of the amount allowable. This is not a physically demanding job. He is doing it as a matter of survival because of inflationary cost of food, utilities, gasoline, exorbitant property taxes, etc.

In the Federal Column of this morning's paper it was written that the Government would lose \$380 million if the Dole-Daniel bill went through for a reprieve for these people for the 1976 tax year. The Government is not the loser. All Civil Service disability retirees are the losers. Where are we going to get the money to pay unexpected tax impositions? Some just will not have it to pay. Some will have to take money they have sacrificed to save to pay taxes. Robin Hood took from the rich to give to the poor. It is a different story today. The Government is wiping out the middle class person. The effort to curtail the sick pay exclusion and the granting of the fat \$13,000 a year pay raise to top level Government seem to have been done hand in hand. Take out of the hands of those who worked hard all their lives and then for one reason or another retired on disability and put into the hands of the politicians. How can they sleep nights reaping the monies of others?

Let me tell you what it will do to us personally. With the sick pay exclusion of \$5200, we will owe \$274 on our 1976 taxes. Without the sick pay exclusion it will be \$1478 to Uncle Sam (Greedy Uncle Sam). When I think how hard it has been to save a little and then see it go to the Government, I could sit down and cry.

I further question the legality of such an act. To make such an act retroactive to Jan. 1, 1976 without prior knowledge or warning to those involved is criminal. The Dole-Daniel bill would reprieve it for 1976 but make it effective January 1, 1977. Those who retired before December 31, 1975 should not be affected at all. They should be able to continue getting the "sick pay exclusion" and other benefits under which they retired. To say that it must be a total and permanent disability and resultant death as a qualification is terrible. It may be a permanent disability but not a total one. Why even people without a arm or leg can work if they want to.

The rich pay no where near the taxes by comparison as the middle class because of their write-offs and loop-holes. Those on welfare and receiving food stamps pay nothing (we are supporting them by our tax dollars much to our chagrin. Many of them could get out and work if they wanted to. I have been in the grocery store and seen baskets piled high with beautiful cuts of meat and other goodies (things I cannot afford to buy) and then get to the register and pull out food stamps. The middle class doesn't stand a chance.

Are the politicians willing to use some of their fat pay raise to drop some money in a hat if we who are involved in the "sick pay exclusion" curtailment were to pass one? The situation in this country is

becoming frightening. It seems as if communism is moving in and dictating and controlling our every move and money.

Those in office were put there because we had confidence they would do for the working person and for their civil servants. They are certainly letting us down

are certainly letting us down.

Any help you can give us in this matter is appreciated. I am sure you will be sitting in on meetings regarding this issue. Please voice a vote in our direction. One that would keep the sick pay exclusion not only for 1976 but in the future. These people earned it. We are not asking for anything that is not justifiably ours. Nothing on a silver platter, no hand out. Just something that is rightfully ours.

We are hoping the committee you Chair will come to our rescue.

Mr. KETCHUM. Mr. Speaker, I rise in support of H.R. 1828. This bill is absolutely necessary as a consequence of the Tax Reform Act of 1976, passed late last year, which eliminated the sick and disability tax deduction retroactive to January 1, 1976. When the Tax Reform Act was enacted on October 4, 1976, many families were left with as much as \$1,000 or more in unexpected taxes.

Without anticipating a change in the tax structure late in the year, those who received sick and disability pay withheld far too little money. As a result, those employees who received sick and disability pay, many of whom are in dire financial straits due to their illness or disability, are required to pay back an additional lump sum tax of hundreds of dollars. A hardship which I doubt seriously was intended by the Congress when it passed the Tax Reform Act.

My good friend and colleague, Congressman Bob Daniel, Republican of Virginia, on the first day of the 95th session of Congress, introduced legislalation providing for a 1-year extension of this sick pay exclusion. I immediately endorsed his efforts, and through personally contacting every Member of Congress, the gentleman from Virginia was able to obtain 180 cosponsors to his bill. His tremendous efforts are to be lauded at this time.

The administrative complexities and burdens anticipated in addressing this problem stated as the primary causes for objection by the Commissioner of the Internal Revenue Service hold little water in exchange for fairness and reason. I am hopeful that we will pass a 1-year extension of the sick pay exclusion today, and demonstrate to the American people that we in the Congress are not heartless, insensitive, and unjust in our application of tax law.

Mr. FISH. Mr. Speaker, I commend my colleagues Mr. Jacobs and Mr. Dan-IEL, for their efforts in bringing this legislation before the House for a vote. This bill, H.R. 1828, which will extend the 1976 sick pay exclusion for 1 additional year, is greatly needed. This view is shared by many of my colleagues, which is attested to by the number of Members of the House that have cosponsored the Daniel bill or similar legislation.

The Tax Reform Act of 1976, was passed and signed into law on October 4, 1976. The section of that act that we

are concerned with today is section 505, which increased the tax liability of those eligible for sick pay exclusion tax benefits. The problem arises from the fact that the act was signed into law late in the year, and then made effective for that same year.

Many of our elderly, beneficiaries of the sick pay exclusion, did not become aware of the change in the law until late 1976, or early 1977, and subsequently are now faced with a much greater Federal income tax liability than they anticipated.

Our elderly already face greater financial insecurity than other segments of our society, and not having the ability to plan on the amount of money they thought would be available to them this year, poses a particularly heavy financial hardship.

It is for this reason that the House should pass, and the President sign, H.R. 1828, at the earliest possible time.

This legislation will alter the effective date of section 505, of the Tax Reform Act of 1976, by making it effective in 1977, instead of 1976. This will relieve the current financial hardship for the elderly beneficiaries of this section, by allowing them to file under the old law. It will also allow those that have already filed their 1976 return, to file an amended 1040 form, and to receive a repayment of the additional funds they were required to pay under the new law.

Mr. Speaker, I urge the House to suspend the rule and pass, H.R. 1828.

Mrs. KEYS. Mr. Speaker, I rise in support of H.R. 1828, a bill to change the effective date of the sick pay exclusion provisions of the Tax Reform Act from January 1, 1976, to January 1, 1977. I also ask my colleagues' support for H.R. 1680, a bill to relieve taxpayers of any penalties which they might be assessed as a result of the recent changes in the law.

The Tax Reform Act was passed by the House in December 1975 with a prospective effective date of January 1, 1976. However, by the time the Senate completed action on the bill and it was enacted into law, the original effective date had long since passed. The October 1976 enactment date meant that many taxpayers suddenly owed taxes which they had not anticipated on the first of the year. To add injury to insult, they were subject to penalties for failure to pay estimated taxes sufficient to cover their new liabilities.

The above measures introduced by Congressman Jacobs and myself are an effort to remedy that situation.

H.R. 1680 relieves taxpayers of interest or penalties due to underpayment of estimated tax where that underpayment is attributable to changes made by the Tax Reform Act of 1976. In addition, it relieves employers of any penalties which might accrue because of failure to withhold sufficient funds from employee wages. Under the bill, taxpayers will be given until April 15, 1977 to pay their full tax bill

As a general rule, the Internal Revenue Service assesses penalties in cases where the taxpayer has failed to with-hold or pay estimated taxes equal to approximately 80 percent of his tax liability by January 15 of the year in which the taxes are due. Because the Tax Reform Act was enacted only 2 months before the end of the year, employers did not withhold adequate funds nor did taxpayers pay sufficient estimated taxes before 1976. Indeed, the vast majority of Americans were completely unaware of their obligations under the 80-percent rule because employers regularly computed withholding on their behalf.

This year many taxpayers were stunned to find that they not only owed more taxes, but that the Government was going to penalize them for not anticipating the actions of the Congress. Simple equity dictates that we resolve this issue in the taxpayers' favor and approve H.R. 1680.

Mr. Jacobs' bill offers additional relief to those taxpayers affected by the changes in the sick pay exclusion by postponing the effective date of the provision for 1 year. To do otherwise would impose an undue hardship on many people who relied on the exclusion in budgeting their personal expenses in 1976. This extension will, of course, cost the Treasury some additional revenue. However, the Federal budget is better able to absorb the shock than are 1 million family budgets.

Mr. Speaker, both these bills offer simple justice for American taxpayers who must accommodate themselves to changes in the law, and I urge my colleagues to support their adoption.

Mr. BIAGGI Mr. Speaker, I rise to urge the immediate approval of H.R. 1828 by the House. Postponement of the implementation date of the unfortunate sick pay provisions of the Tax Reform Act is critically important if hundreds of thousands of Americans are to be prevented from having to endure an unexpected and unnecessary tax burden.

The practical importance of this legislation belies its simplicity of content. While Congress did pass the Tax Reform Act of 1976, there were many including myself, who were opposed to the changing of the old sick pay exclusion to a newer disability income exclusion. Many of us sought an outright repeal of this provision of the act, but it did not appear as if such legislation could be passed until much later in the year. Meanwhile, thousands of taxpayers discovered that the changes in the sick pay exclusion were effective back to January 1, 1976. The result were thousands of horrified taxpayers began flooding various congressional offices with letters requesting immediate legislative relief, which would prevent them from having to shoulder this additional burden in this tax year.

The response to this outcry is H.R. 1828, which I have cosponsored. The bill simply delays for I year, the implementation date of the sick pay provisions of the Tax Reform Act including for those taxpayers who may have made their irrevocable elections relative to the full col-

lection of contributions to their annuity program.

The actual number of Americans who will benefit from this legislation is not known. However, we do know that at least 250,000 retired Federal annuitants will benefit directly from this legislation.

I hope the fight will not end with the mere passage of this legislation. This is admittedly a stopgap measure. It is imperative that the House Ways and Means Committee continue their deliberations on these provisions of the Tax Reform Act. The actual revisions in the Tax Reform Act related to sick pay exclusion promote an arbitrary and unfair requirement on disabled Americans. I have particular objections to the language which requires disabled taxpayers—over 65 and those under 65 who are totally disabledwho wish to recover tax free their total contributions to an annuity program from making an irrevocable declaration that they will not seek the benefits of the disability income exclusion for this or any other subsequent year. This provision is patently unfair and arbitrary, and should be struck down.

I commend the House Ways and Means Committee, and its distinguished chairman, Mr. Ullman for their expeditious consideration of this legislation. It demonstrates the Congress concern and compassion for the plight of thousands of disabled Americans—many of whom might be penniless after April 15, if we were not to act on this legislation. This Congress has shown it can admit to its mistakes as well as respond to the voice of the people.

Mr. BAUCUS. Mr. Speaker, it is my hope that the House of Representatives will pass H.R. 1828, which calls for a 1-year delay for the effective date of changes in the sick pay exclusion tax provisions.

The Tax Reform Act of 1976 made many changes in the sick pay provisions. While these changes will benefit many permanently disabled workers, it also created a severe financial hardship for others who had not planned for this tax change to occur during 1976.

H.R. 1828 would allow individuals to use either the old or new sick pay provisions in paying their 1976 taxes. Specifically, this bill changes the effective date of the sick pay exclusion in the Tax Reform Act of 1976 from January 1, 1976, to January 1, 1977, for those taxpayers who wish to claim the old sick pay exclusion.

While I support the new sick pay exclusion provisions, I feel that it would be grossly unfair to put it into effect retroactively. The Tax Reform Act was not enacted until September of 1976, or a full three-quarters of the way through the 1976 tax year. It seems to me that this is just too far into the year to expect those individuals who were adversely affected by these tax changes to pay taxes that are substantially higher than they had allotted for.

The Tax Reform Act made two basic changes in the sick pay exclusion provisions. First, it substituted a new disability income exclusion of \$100 a week for taxpayers under the age of 65 who have had to retire because they are permanently and totally disabled. Also, those who are over 65 or who are permanently and totally disabled can choose to recover tax-free the amount of contributions that they have made to an annuity program, but only if the taxpayer agrees that they will not seek the benefits of the disability income exclusion for that year and all future years.

I have heard from many of my constituents who, if we do not change the effective date, will face a most unfortunate financial burden as the result of these new provisions. While our tax system most certainly needs a thorough revision, effective tax reform must be brought about in a realistic manner. The purpose behind the new sick pay exclusion provisions was not to disadvantage the many taxpayers who had no advance warning of this tax change, and I therefore feel that it is our responsibility to correct our mistake and change the effective date to January 1, 1977.

Mr. ASHBROOK. Mr. Speaker, I support H.R. 1828 which makes a 1-year postponement in the effective date removing the sick pay exclusion.

In my opinion, this bill would not have been needed if tax bills were not considered under a closed rule. In the name of reform the so-called Tax Reform Act of 1976 made a number of changes which have only made the tax code even more complicated.

The repeal of the sick pay exclusion is a good example. Not only was the exclusion repealed, but it was made retroactive to the beginning of 1976. Thousands of Americans found themselves faced with a greater tax liability than they had expected. The bill before us undoes some of the damage this has caused by making the repeal of the sick pay exclusion effective as of January 1, 1977 rather than 1976. At least, this is some improvement.

The tax laws of our country have become too complicated. Two changes are definitely needed: Simplification of the law and more equitable treatment of all. At present our tax laws are a hodgepodge of often contradictory impulses.

Mr. BURKE of Florida. Mr. Speaker, I strongly support H.R. 1828 which would preserve the sick pay exclusion for the 1976 tax year. This bill is identical to H.R. 318 of which I am a cosponsor.

Mr. Speaker, as you are aware, the Tax Reform Act of 1976, Public Law 94-455, generally repeals the sick pay exclusion and substitutes a maximum annual exclusion of up to \$5,200 a year for individuals under age 65 who have retired on disability and who are permanently and totally disabled. After age 65, these individuals will be eligible for the revised elderly credit. The maximum amount excludable is to be reduced on a dollar-fordollar basis by the individual's adjusted gross income-including disability income-in excess of \$15,000. These provisions apply equally to civilian and military personnel with respect to taxable years beginning after December 31, 1975. Of course, individuals who incur extraordinary medical expenses due to sickness or injury may continue to deduct those medical expenses as under present law.

It is my judgment, however, that we cannot justify so sudden and so considerable a tax liability. In view of the fact that the Tax Reform Act of 1976 was passed only last fall, the retroactive aspect of the bill's sick pay changes is uniquely unfair as well as personally burdensome to the million or more taxpayers directly affected. To notify a person at the end of a tax year that he has acquired an additional liability retroactive to the beginning of the tax year is hardly a recommended course of action. Nor is it to be taken lightly. The very fact that this bill has been given early consideration is indicative of that fact.

Mr. Speaker, I have received numerous letters from constituents complaining that the removal of the sick pay exclusion provision retroactively constituted for them an unforeseen and substantial tax liability. Many of those who have paid their taxes on an estimated basis are now faced with additional payments amounting in some cases to \$1,000 or more. That is a lot of money. The net effect this will have on many persons—especially those who live on fixed incomes will be to wipe out their savings accounts and to make them increasingly vulnerable to the many unexpected difficulties we all encounter in life. It should be clear that the basic inequity in this provision is that those who can least afford additional burdens are those most affected.

Nor should we underestimate the severe emotional and psychological impact which this measure can and has had upon those affected. Imagine the tremendous anxiety a person would suffer upon discovering that he was suddenly forced to pay as much as \$1,000 or more in taxes when he knows that this would take all the extra funds-or perhaps even more-he has accumulated. The toll this could have on his life-his relations with his friends, his family, and his self-pride-could potentially be enormous. In fact, it could needlessly embitter him and add to that reservoir of resentment which tends to undermine democratic governments.

Mr. Speaker, it should be further noted that the retroactive character of the sick pay exclusion provision can hardly be considered a necessary aspect of the budget. The amount of money in question is only \$380 million and the third concurrent resolution on the budget for fiscal year 1977 has already taken in account the possible postponement of the sick pay exclusion provision until next year. This very fact undermines the argument that the retroactive application of this provision was necessary to assure sufficient revenue gains to offset some of the bill's spending provisions. The truth is that the only significant impact which can result from making this provision retroactive is the untold injury and deprivation the many would suffer who are already in the lower economic

strata and who are already having difficulty achieving economic survival.

It should be further noted that should H.R. 1828 be enacted into law it would be acceptable within the general context of imminent tax cuts also under consideration by the Congress. By simply postponing the effective date of the sick pay exclusion provision, the Congress would in effect be adding to its economics stimulation package.

ulation package.

Mr. Speaker, I ask you and my colleagues in the U.S. House of Representatives to bring back to quick and successful passage this legislation so that the sick pay exclusion provision will be postponed until December 31, 1976. If we act now before the April 15 filing date for Federal income tax, both the taxpayer and the Internal Revenue Service will be saved a great deal of confusion and paperwork. In addition, the taxpayer will be relieved of the added financial and psychological burdens associated with the retroactive aspect of this provision.

Mr. MONTGOMERY. Mr. Speaker, I would like to commend the Committee on Ways and Means for reporting this bill out in a timely fashion in order to bring a measure of relief to those persons receiving disability retirement pay. I strongly support H.R. 1828 and urge its

approval by my colleagues.

When the 1976 Tax Reform Act was passed, we, unfortunately, did not realize at that time the great disservice we were doing to persons on disability retirement pay by making the sick pay exclusion provision effective for all of calendar year 1976. We gave them no advance warning that this tax provision would be changed, thereby giving them an opportunity to increase their estimated tax payments in order to cover any increased taxes they might owe for the 1976 tax year.

Mr. Speaker, I am hopeful the Senate will also give speedy approval to this measure in order that it might become law prior to the April 15 filing deadline. I would also hope that the Internal Revenue Service will take extra efforts with those people of disability retirement pay to assist them in filing their returns and make certain that they do not overpay their taxes for last year. There are some who have already filed on the basis of the 1976 Tax Reform Act and these are the ones for which special consideration must be given in order to make certain that any refund they are due is paid in a prompt manner. I urge my colleagues to give their strong support to H.R. 1828.

Mr. CONABLE. Mr. Speaker, I have no further requests for time.

Mr ULLMAN. Mr. Speaker, I yield

back the balance of my time.

The SPEAKER pro tempore (Mr. Sisk). The question is on the motion offered by the gentleman from Oregon (Mr. Ullman) that the House suspend the rules and pass the bill H.R. 1828, as amended.

The question was taken.

Mr. BAUMAN. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 3(b) of rule XXVII and the Chair's prior announcement, further proceedings on this motion will be postponed.

RELIEF FOR CERTAIN UNDERPAY-MENTS OF ESTIMATED TAX

Mr. ULLMAN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1680) to relieve taxpayers from liability with respect to certain underpayments of estimated tax, underwithholding, and interest on underpayments of tax attributable to the application to 1976 of the sick pay and other provisions of the Tax Reform Act of 1976.

The Clerk read as follows:

H.R. 1680

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

Section 1. Underpayments of estimated tax. No addition to the tax shall be made under section 6654 or 6655 of the Internal Revenue Code of 1954 (relating to failure to pay estimated income tax) for any period before April 16, 1977 (March 16, 1977, in the case of a taxpayer subject to section 6655), with respect to any underpayment to the extent that such underpayment was created or increased by any provision of the Tax Reform Act of 1976.

SEC. 2. UNDERWITHHOLDING.

No person shall be liable in respect of any failure to deduct and withhold under section 3402 of the Internal Revenue Code of 1954 (relating to income tax collected at source) on remuneration paid before January 1, 1977, to the extent that the duty to deduct and withhold was created or increased by any provision of the Tax Reform Act of 1976

Sec. 3. Interest on underpayments of tax. No interest shall be payable for any period before April 16, 1977 (March 16, 1977, in the case of a corporation), on any underpayment of a tax imposed by the Internal Revenue Code of 1954, to the extent that such underpayment was created or increased by any provision of the Tax Reform Act of 1976.

The SPEAKER pro tempore. Is a second demanded?

Mr. CONABLE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Oregon (Mr. Ullman).

Mr. ULLMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 1680 provides relief to taxpayers from penalties, additions to tax, and interest which they would otherwise incur as a result of provisions in the Tax Reform Act of 1976 which were made applicable to 1976.

A number of provisions of the 1976 act, which was enacted on October 4 of last year, were made applicable from January 1, 1976. For many taxpayers these provisions increased their income, increased their income tax liabilities, or increased the amounts that should have been withheld by their employers from their wages and salaries.

Individuals are required to file quarterly estimated tax returns and make estimated tax payments if they have substantial amounts of income not subject to withholding. Because of the 1976 act changes, many people ended the year with larger tax liabilities than they had taken into account in calculating their estimated taxes. As a result, in many cases, these people technically underpaid their estimated taxes even though the amounts that they paid were proper amounts under the law as it existed at the time the estimated tax payments were due. Present law requires the Internal Revenue Service to assess what is called an "addition to tax" at the rate of 7 percent a year on these underpayments and this addition to tax cannot be forgiven even though the taxpayers acted reasonably in light of the law as it existed at the estimated tax due dates. Corporations have a similar estimated tax payment requirement and they, too. are subject to this addition to tax.

H.R. 1680 provides relief for these taxpayers by excusing any additions to tax that arise because of those provisions of the 1976 act that increased income

tax liability for 1976.

Similarly, the 1976 act increased withholding tax liabilities in some cases. This bill excuses any sanctions for failure to deduct and withhold income taxes in 1976 to the extent that the duty to deduct and withhold was created or increased by any provision of the 1976

Also, some taxpayers had short taxable years or fiscal years that ended before the end of 1976 and filed their final tax returns for the year without fully understanding that the law had been changed to increase their liabilities for that year. For those people, this bill forgives any interest that would otherwise have been charged for any period before April 15, 1977, for individuals and March 15, 1977, for corporations.

In the past, when the Congress enacted laws late in the year which imposed income tax increases on some people from the beginning of the year, the Congress relieved taxpayers from assessments of the sort I described, to the extent that they were attributable to these tax increases. The committee concluded that this sort of relief is appropriate as a matter of custom and equity and has reported this bill in order to provide the same sort of relief for the 1976 act.

I might add, that, when the Ways and Means Committee and the House of Representatives acted on the 1976 act, we acted in 1975, when all of these changes would have been prospective only. Consequently, at the time the House passed that act, there was no need for these relief provisions. However, as we know, the bill was not finally enacted until 10 months after the House had completed its work and, by that time, many taxpayers had found themselves in the midst of the problems I have described.

The Commissioner of Internal Revenue has also recognized the inequity of imposing these sanctions in such cases and has announced that he has instructed the Internal Revenue Service to delay making assessments, to give the Congress a chance to act on this matter. Unless the Congress acts, the Service will eventually have to enforce present law on this point and assess and collect the amounts of the penalties, additions to tax, and interest.

The forgiveness of the sanctions is estimated to result in a one-time \$15-million reduction in receipts, all in fiscal year 1977. The third concurrent budget resolution, as agreed to by the Congress. provides sufficient room for this revenue reduction.

Mr. Speaker, I urge that H.R. 1680 be adopted.

Mr. CONABLE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 1680, which is designed to relieve taxpayers from additional tax liability as a consequence of certain underpayments of estimated tax and underwithholding of tax on certain wages, when such underpayment and underwithholding are a consequence of various provisions of the Tax Reform Act of 1976 with retroactive effective dates.

In earlier legislation, such as the 1969 Tax Reform Act, which Congress also passed late in the calendar year and which also imposed certain tax increases from the beginning of that year, Congress relieved taxpayers of liability for additions to tax, interest, and various other penalties in connection with tax increases as a matter of equity. Such provision was not included in the 1976 act. However, to date, the Commissioner of Internal Revenue has deferred assessment of additions to tax with regard to these changes in the 1976 Tax Reform Act upon congressional assurance that the failure to include such traditional relief in the 1976 act was a consequence of oversight and that the oversight would be remedied in the 95th Congress.

This deferral by the Internal Revenue Service cannot be continued indefinitely, absent a change in the law. Accordingly, the Ways and Means Committee concluded that it would be appropriate to grant taxpayers relief from these additions to tax, interest, and penalties, similar to the relief which has been traditionally granted by Congress in such

The bill is a reasonable one and I urge its enactment.

Mr. ULLMAN. Mr. Speaker, I yield 1 minute to the distinguished gentleman from Illinois (Mr. Mikva), a member of the committee.

Mr. MIKVA. Mr. Speaker, I want to compliment the chairman of the Committee on Ways and Means for his efforts in bringing forth this legislation. I believe that the Committee on Ways and Means strove strenuously last year to avoid any retroactivity insofar as any of its legislative enactments. But, unfortunately, bicameralism caused such a result notwithstanding our efforts. This bill seeks to mitgate the penalty on taxpayers for not having withheld sufficiently to accommodate the changes in the Tax Code.

Mr. Speaker, I particularly wish to pay tribute to my seatmate on the Committee on Ways and Means, the gentlewoman from Kansas (Ms. Keys) who was the originator of the bill that resulted in this legislation before us. The bill will help make sure that the taxpayers do not have to pay a penalty for the necessary changes that Congress wrought on the Tax Code. Ms. KEYS' leadership was indispensible in achieving this result.

Mr. CONABLE. Mr. Speaker, will the gentleman yield?

Mr. MIKVA. I would be glad to yield to the gentleman from Illinois.

Mr. CONABLE. Mr. Speaker, I think that the gentleman from Illinois is making a good point with regard to this and that is that bicameralism is what causes this kind of embarrassment.

The SPEAKER pro tempore. The time

of the gentleman has expired.

Mr. ULLMAN. I yield 1 additional minute to the gentleman from Illinois.

Mr. CONABLE. I think my colleagues will understand that we have no desire to set an effective date which is in the distant future when we pass a bill. If the Senate does not act promptly, however, and then adopts our effective date which has, in the meantime, become retroactive, there is no way it can be changed in the conference. The only thing that can be done is for us to come through with a bill of this sort later to relieve the people from the unnecessary problems resulting from the delay.

I think it is important that the Mem-

bers of the House understand that. The Committee on Ways and Means did not deliberately set these provisions up to be retroactive. This is one of those inadvertent problems that result from the delay between the enactment of legislation in one House, then in the second House and thus resulting in retroactivity unavoidable by the first House to act, or the conferees.

Mr. MIKVA. I thank the gentleman.

Mr. ULLMAN. Mr. Speaker, I would inquire of the gentleman from New York (Mr. CONABLE) if the gentleman has additional requests for time.

Mr. CONABLE. Mr. Speaker, I have

no further requests for time.

Mr. ULLMAN. I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Oregon (Mr. ULLMAN) that the House suspend the rules and pass the bill H.R. 1680.

The question was taken; and (twothirds having voted in favor thereof) the rules were suspended and the bill was

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ULLMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the two bills just passed.

The SPEAKER pro tempore. Is there

objection to the request of the gentleman from Oregon?

There was no objection.

TO AMEND SECURITIES AND EX-CHANGE ACT OF 1934 TO INCREASE AMOUNT AUTHORIZED TO BE AP-PROPRIATED FOR FISCAL YEAR 1977

Mr. ECKHARDT. Mr. Speaker, I move to suspend the rules and pass the Senate bill (S. 1025) to amend the Securities Exchange Act of 1934 to increase the amount authorized to be appropriated for the Securities and Exchange Commission for fiscal year 1977.

The Clerk read the Senate bill, as

follows:

S. 1025

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 35 of the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq.) is amended by striking the amount "\$55,000,000" before the words "for the fiscal year ending September 30, 1977" and inserting in lieu thereof the amount "\$56,500,000".

The SPEAKER pro tempore. Is a second demanded?

Mr. RINALDO. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Texas (Mr. Eckhardt) and the gentleman from New Jersey (Mr. Rinaldo) will be recognized for 20 minutes each. The Chair recognizes the gentleman from Texas (Mr. Eckhardt).

Mr. ECKHARDT. Mr. Speaker, I yield

myself 10 minutes.

Mr. Speaker, the bill that we are considering today concerns an apparently noncontroversial, but urgently needed supplemental authorization to the Securities and Exchange Commission for the fiscal year 1977. The appropriation of the funds which this bill would authorize has already been approved by the House on March 16. That appropriation measure is presently awaiting Senate floor action.

The authorization before us, S. 1025, was unanimously passed by the Senate on March 25, and was subsequently unanimously reported out of the Interstate and Foreign Commerce Committee

on March 29, 1977.

S. 1025 provides a supplemental authorization to the Securities and Exchange Commission of \$1.5 million, increasing its total authorization for the fiscal year ending October 31, 1977, to \$56.5 million. This additional amount is necessary to meet last October's cost of living pay increase, the recent executive salary raise, and to provide funding for the agency's urgently needed automatic data processing and recordkeeping systems.

Mr. Speaker, I reserve the remainder of my time.

Mr. RINALDO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this legislation, S. 1025, is a simple bill. The increase in an authorization, which totals \$1.5 million, is to meet increases in salary and to modernize the SEC's automatic data processing and record system.

The full Interstate and Foreign Commerce Committee reported the measure by voice vote and there is no controversy

over the bill's provisions.

I have no requests for time, and I would urge my colleagues to join me in supporting the bill's passage.

Mr. Speaker, I yield back the remain-

der of my time.

Mr. ECKHARDT, Mr. Speaker, I yield such time as he may consume to the gentleman from Texas (Mr. Kazen).

Mr. KAZEN. Mr. Speaker, I want to take this opportunity to congratulate the gentleman from Texas (Mr. Eckhard). This is his maiden voyage. This is the first bill that he has managed as chairman of a subcommittee. He did an excellent job, and I commend him for the efficient manner in which he accomplished it.

Mr. ECKHARDT. I thank my col-

league, Mr. Speaker.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. Eckhardt) that the House suspend the rules and pass the Senate bill S. 1025.

The question was taken; and (twothirds having voted in favor thereof), the rules were suspended and the Senate bill was passed.

A motion to reconsider was laid on the

GENERAL LEAVE

Mr. ECKHARDT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill just passed, S. 1025.

The SPEAKER pro tempore. Is there objection to the request of the gentleman

from Texas?

There was no objection.

PROVIDING TEMPORARY AUTHOR-ITIES TO THE SECRETARY OF THE INTERIOR TO FACILITATE EMER-GENCY ACTIONS TO MITIGATE THE IMPACTS OF THE 1976-77 DROUGHT

Mr. MEEDS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5117) to provide temporary authorities to the Secretary of the Interior to facilitate emergency actions to mitigate the impacts of the 1976-77 drought, as amended.

The Clerk read as follows: H.R. 5117

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior, hereinafter referred to as the "Secretary," acting through the Bureau of Reclamation and the Bureau of Indian Affairs pursuant to the authorities in the Federal Reclamation Laws (74 Stat. 882, as amended) and other appropriate author-

ities of the Secretary, and the authorities granted herein, is directed to—

(a) perform studies to identify opportunities to augment, utilize, or conserve water supplies available to Federal reclamation projects and Indian irrigation projects constructed by the Secretary; and consistent with existing contractual arrangements, and State law, and without further authorization, to undertake construction, management and conservation activities which can be expected to have an effect in mitigating losses and damages to Federal reclamation projects and Indian irrigation projects constructed by the Secretary resulting from the 1976-1977 drought period: Provided, That construction activities undertaken to implement the programs authorized by this Act shall be completed by November 30, 1977;

(b) assist willing buyers in their purchase of available water supplies from willing sellers and to redistribute such water to irrigators based upon priorities to be determined by the Secretary within the constraints of State water laws, with the objective of minimizing losses and damages

resulting from the drought; and

(c) undertake expedited evaluations and reconnaissance studies of potential facilities to mitigate the effects of a recurrence of the current emergency and make recommendations to the President and to the Congress evaluating such potential undertakings including, but not limited to, wells, pumping plants, pipelines, canals, and alterations of outlet works of existing impoundments.

Sec. 2. (a) Payments for water acquired

SEC. 2. (a) Payments for water acquired from willing sellers will be at a negotiated price, but will not confer any undue benefit or profit to any person or persons compared to what would have been realized if the water had been used in the normal irrigation of crops adapted to the area, as determined by the Secretary.

(b) Purchases of water acquired under subsection (a) above shall be made at a price to be determined by the Secretary: Provided, That the selling price shall be sufficient to recover all expenditures made in

acquiring the water.

SEC. 3. (a) The Secretary shall determine for purposes of this Act the priority of need for allocating the water, taking into consideration, among other things, State law, national need, and the effect of losing perennial crops due to drought.

(b) For the purposes of this Act, the term "irrigators" shall mean any person or legal entity who holds a valid existing water right for irrigation purposes within Federal Reclamation projects and within all irrigation projects constructed by the Secretary for Indians.

"Federal reclamation project" means any project constructed or funded under Federal reclamation law and specifically including projects having approved loans under the Small Reclamation Projects Act of

(c) For the purposes of this Act, the term

1956 (70 Stat. 1044) as amended.

SEC. 4. The Secretary is hereby authorized to defer without penalty, the 1977 payments of any installment of charges including operation and maintenance costs owed to the United States by irrigators as he deems necessary because of financial hardship caused by extreme drought conditions: Provided, That any deferment shall be recovered and such recovery may be accomplished by extending the repayment period under the contracting entities' existing contracts with the United States.

SEC. 5. Actions taken pursuant to this Act are in response to emergency conditions and depend for their effectiveness upon their completion prior to or during the 1977 irrigation season and, therefore, are deemed not to be major Federal actions significantly

affecting the quality of the human environment for purposes of the National Environ-mental Policy Act of 1969 (83 Stat. 852, as amended, 42 U.S.C. 4321). SEC. 6. The program established by this

Act shall, to the extent practicable, be coordinated with emergency and disaster relief operations conducted by other Federal and State agencies under other provisions of The Secretary shall consult with the heads of such other Federal and State agencies as he deems necessary. The heads of all other Federal agencies performing relief functions under other Federal authorities are hereby authorized and directed to provide the Secretary, or his designee, such information and records as the Secretary or his designee shall deem necessary for the administration of this Act.

SEC. 7. Not later than March 1, 1978, the Secretary shall provide the President and the Congress with a complete report on expenditures and accomplishments under this

SEC. 8. (a) The Secretary is authorized to make loans to irrigators for the purposes of undertaking construction, management, conservation activities, or the acquistion and transportation of water, which can be expected to have an effect in mitigating losses and damages resulting from the 1976-1977 drought period.

(b) Such loans shall be without interest with the repayment schedule to be determined by the Secretary, but loans for acquiring water under section 2 of this Act shall not exceed five years in duration.

The authorities conferred by this Act shall terminate on September 30, 1977.

SEC. 9. There is authorized to be appropriated \$100,000,000 to carry out the water purchase and reallocation program authorized by this Act: Provided, That 15 per centum of such appropriations shall be available for carrying out other programs authorized by this Act and for construction of emergency physical facilities under terms and conditions applying to expenditures from the emergency fund created by the Act of June 26, 1948 (62 Stat. 1052)

SEC. 10. (a) Funds available to the Secretary during fiscal year 1977 for expenditure pursuant to the Act of June 26, 1948 (62 Stat. 1052), shall be available for expenditure on behalf of (1) projects financed through loans pursuant to the Small Reclational Reclations. mation Projects Act of 1956 (70 Stat. 1044) as amended, and (2) projects financed with non-Federal funds notwithstanding the provisions of the third sentence of section 46 of the Act of May 25, 1926 (44 Stat. 649, 650), and any other similar provision of law. Expenditures undertaken under this authority shall be governed by the same terms and conditions as apply to programs regularly constructed under Federal reclamation law: Provided, That not more than 15 per centum of such available funds may be used on behalf of nonfederally financed projects and not more than \$1,000,000 may be expended on behalf of any individual contracting entity.

(b) Funds available to the Secretary during fiscal year 1977 for expenditure pursuant to the Act of June 26, 1948 (62 Stat. 1052), shall be available for expenditure for drought emergency programs conducted heretofore or hereafter by State water resource agencies during fiscal year 1977 if such programs are found to be compatible with the broad purposes of this Act: Provided, That not more than 5 per centum of such available funds may be used for purposes of this subsection and not more than \$1,000,000 may be expended on behalf of any State. In recognition of the widespread and diffused nature of the benefits deriving from this subsection,

all funds expended under the authority of this subsection shall be nonreimbursable.

(c) Funds available for expenditure under the provisions of this Act may be used by the Secretary for the purchase of water or for acquisition of entitlement to water from any available source for the purpose of mitigating damage to fish and wildlife resources caused by drought conditions. Not to exceed \$10,-000,000 may be expended for such activities and any amount so expended shall be nonreimbursable.

Sec. 11. Nothing in this Act shall be construed as limiting or restricting the power and authority of the United States or—

(a) as affecting in any way any law govern-ing appropriations or use of, or Federal right to, water on public lands;

(b) as expanding or diminishing Federal or State jurisdiction, responsibility, interests, or rights in water resources development or control;

(c) as displacing, superseding, limiting, or modifying any interstate compact or the jurisdiction or responsibility of any legally established joint or common agency of two or more States or of two States and the Federal Government:

 (d) as superseding, modifying, or repealing, except as specifically set forth in this Act, existing laws applicable to the various Federal agencies; and

(e) as modifying the terms of any interstate compact.

The SPEAKER pro tempore. Is a second demanded?

Mr. LUJAN. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Washington (Mr. MEEDS) is recognized for 20 minutes, and the gentleman from New Mexico (Mr. LUJAN) is recognized for 20 minutes.

The Chair recognizes the gentleman from Washington (Mr. MEEDS).

Mr. MEEDS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to rise for the purpose of presenting to the House the bill, H.R. 5117, to provide temporary authority to the Secretary of the Interior to facilitate emergency actions to mitigate the impacts of the 1976-77 drought.

This measure represents an integral part of President Carter's drought package submitted to the Congress on March 23, 1977, and includes the only portions of that program coming under the jurisdiction of the Committee on Interior and Insular Affairs. As chairman of the subcommittee having original jurisdiction over this matter, I am most appreciative of the cooperation of my colleagues on the committee in making it possible to bring this measure to the full House as quickly as this.

Mr. Speaker, the drought in the Western United States is the worst in the history of weather recordkeeping; consisting of the first and third driest years in history occurring consecutively. While H.R. 5117 is not a panacea, in any sense of the word, it does represent the only practicable response which we can make to solving some of the problems facing water users on projects which were developed by the Federal Government.

The major thrust of the bill is the creation of a program for the purchase and reallocation of water or annual entitlements to water. Under this program, the Secretary would seek out irrigators who are willing to forgo use of their water right entitlement for the 1977 crop year and negotiate a reasonable price for the use of that water supply for 1 year. The water thus acquired would be redistributed to irrigators of high-value crops who would be obliged to pay not less than the negotiated purchase price.

The committee visualizes that the major use of the program would be in the area of moving water supplies from an-nual relatively low value crops to perennial crops such as orchards and vineyards in the interest of saving the trees and vines requiring many years to establish. It is not intended that the measure would affect in any way the system of water rights in effect in the several States nor would it be continuing legislation. In fact, the authorities under the legislation will expire on September 30,

1977.

Accordingly, Mr. Speaker, it can be seen that time is of the utmost importance. The legislation must be passed immediately if it is to have any affirmative effect. Farmers must know now that the program is available. If supplies are not at all likely to be willing to sell. By the same token, the more effective the program, the more of the authorized \$100 million will be used.

H.R. 5117 does some other things. It authorizes 5-year interest-free loans to irrigators with which to defray the cost of acquired and redistributed water. The bill also extends eligibility to small reclamation projects, non-Federal irrigation districts, and State level water resource development agencies to participate in the emergency fund available to the Commissioner of Reclamation under existing law. This fund, which will have about \$32 million, can be used by qualified entities as a source of funding for emergency water supplies. These funds will be governed by the terms of existing law and must be repaid in accordance with the borrower's ability to

Also, Mr. Speaker, the legislation provides authority for the Secretary to purchase water from any source whatsoever for the preservation of fish and wildlife resources threatened by damage or extinction by the drought.

Finally, the measure authorizes deferral of water charges due the United States under existing contract arrangements and provides that they shall be recovered by extending repayment periods if necessary.

In conclusion, we believe that passage of this bill is imperative if the Government is to be responsive to the needs of its citizens and is far less costly than would be the probable cost of disaster relief if we sit idly by and make no effort to forestall the disaster that is clearly in prospect for later this year.

I urge the support of all Members for its speedy passage.

Mr. McFALL. Mr. Speaker, will the gentleman yield?

Mr. MEEDS. I yield to the distinguished gentleman from California.

Mr. McFALL. Mr. Speaker, I want to commend the gentleman and the subcommittee and the House Committee on the Interior for their action on this bill. It is very important to us in California.

I hope there is a speedy passage and that it is signed by the President, because certainly the drought in California is a terrible disaster in our State and this bill and the provisions will help us in many wavs.

Mr. MEEDS. Mr. Speaker, I thank the gentleman from California for those comments. The gentleman is exactly right. The drought in California is worse than it is any place in the United States. The subcommittee was out there and took testimony on the severity of the drought. There is just no question under any possible scenario that the drought in California will be the worst since recordkeeping in weather has taken place.

would like also to mention the very valuable assistance and help that the Members on the subcommittee and the gentleman from California gave the committee in getting this legislation out.

Mr. McFALL. Mr. Speaker, if the gentleman will yield further to permit me another observation on the seriousness of the drought in my district, which is in the midst of the great productive San Joaquin Valley, we have two small irrigation districts that have been providing water without fail since 1913. This year there is only going to be three irrigations. There is very little water in the reservoirs at the present time. It is practically below minimum pool. There is very little snow in the mountains. It is anticipated there will be only three irrigations. That is less than half a season. So we are going to have to rely upon pumps and fortunately we have the water in the water table. I think this will be the way to do it; but there is a shortage of well drillers and it is unknown as to how much water we can really provide in this way; but at least with this bill we can try.

Mr. MEEDS, Mr. Speaker, as I recall the testimony that we received in California, they can expect approximately percent in California of the water which they had in the worst recorded year which was, I think, 1924. Mr. McFALL. That is right, 1924.

Mr. MEEDS. So by all estimates, it is of a disastrous nature.

Mr. PANETTA. Mr. Speaker, will the gentleman yield?

Mr. MEEDS. I yield to the gentleman from California.

Mr. PANETTA. Mr. Speaker, I would like to commend the committee and the gentleman for the very expeditious work on this very important piece of legislation. As the gentleman has stated, we do have the driest year, perhaps the driest year in history, going on in the western have a \$6 billion loss that is estimated right now that in agriculture alone we have a \$6-billion loss that is estimated in agriculture. We have with regard to farm employment something like 50,000

jobs that are expected to be lost as a result of those losses in agriculture. If we extend into the normal extension of a loss in agriculture to other areas at a 3 to 1 ratio, it makes about a \$20 billion loss in our economy in California and I believe 100,000 to 150,000 jobs affected by

The important thing about this bill is that it provides expeditious help, as the gentleman pointed out, to preserve what we have right now to give protection to farmyards, protect the trees in what certainly will be a very dry year this year and possibly the beginning of even a drier period; so I commend the gentleman for this fast work and I urge the House to pass this bill expeditiously.

Mr. MEEDS. Mr. Speaker, I thank the gentleman for those comments and point out that even very conservatively, the losses in agriculture were \$400 million, a very conservative estimate.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. MEEDS. I am delighted to yield to the gentleman from Washington (Mr. McCormack), one of the prime authors and sponsors of this legislation and in whose district some of the greatest harm will come from this drought.

Mr. McCORMACK. Mr. Speaker, I want to commend the gentleman for the expeditious manner in which this legislation has been handled and I congratulate the Members of the subcommittee for the intense interest they have shown in trying to do a good job promptly.

I make the same congratulation to the chairman, the gentleman from Arizona (Mr. UDALL).

The gentleman says that I am one of the original authors of this legislation.

I support the legislation. There are some passages of the bill now before us that have been changed from the original version, and some of those I would have preferred to have the way I originally wrote the bill, but it is a good bill.

I very much appreciate the work that was done in creating a water bank, in planning for future requirements, in planning for current programs for relief and reclamation, which are desperately important now. This is disaster relief. It is important, I think, in the Northwest Territories. As the gentleman from Washington just mentioned, the potential damage in my area alone is projected to be about \$400 million unless we do something about it. That is just in the area of Eastern Washington.

Nothing is more important to the West than water. This bill does everything that can reasonably be expected to be done at this time for the relief of the drought conditions. I congratulate the gentleman from Washington for his con-

Mr. MEEDS. I thank the gentleman from Washington for his comments, and also for his help in shepherding this legislation through the subcommittee and full committee.

Mr. LUJAN. Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. Don H. CLAUSEN).

Mr. DON H. CLAUSEN. Mr. Speaker, I am pleased to follow the gentleman from Washington (Mr. MEEDS) in placing emphasis on the legislation that is pending before us. I accompanied the subcommittee when we held hearings in the Seattle area which dealt with the States of Oregon, Idaho, and Washington; and then subsequently down into California so that we could have the California

I can state to the committee and to the Members who are on the floor now that this particular piece of legislation is urgently needed. While they talk about \$500 or \$600 million losses potentially in the Northwest, the loss in California is somewhere in the vicinity of \$4 to \$6 billion. The losses are extraordinary and

potentially devastating.

Mr. Speaker, the bill before us, as amended, is a good bill designed to provide temporary relief for those users of Federal water who face economic disaster this year because of the western drought. It goes as far as the jurisdiction of our committee permits us to go in using Federal prerogatives to forestall some of the farm losses. But it also points up the need for an overall water management program on each river system that would make such emergency legislation unnecessary in the future.

H.R. 5117 is stop-gap legislation. It provides a mechanism whereby the Secretary may act as a catalyst in arranging water sales between low-priority users and high-priority users. The "water bank" will operate much the same as a commercial bank, permitting depositors to be paid for their deposits at the time they put water into the bank and permitting water purchasers to pay for the water when they withdraw it from the bank. The bill provides for appropriations of \$100 million, but most or all of this money will be recovered through water sales and loan repayments.

The Subcommittee on Water and Power Resources, which handled this bill, has jurisdiction only over the water from Federal reclamation projects. So we were limited as to how far we could go in putting together a drought relief program. The result is a bill that applies to users of Federal water but does not cover private irrigators who obtain water from private sources.

These latter irrigators may obtain disaster relief from other sources, such as the Farmers Home Administration, Soil Conservation Service, and others, but each of these programs has different criteria and differing types of relief. The major difference between those programs and the relief provided in this bill is that H.R. 5117 will come into play before disaster losses have been incurred, with the intent of mitigating those losses. The other disaster relief programs are triggered only after disaster has struck and the losses have already been suffered.

We should, of course, pass this bill without delay. But then, Mr. Speaker, we must put together a comprehensive plan for coordinated use of scarce western water that will do two things: Establish a system of cooperative effort by all of the users in each water basin for maximum utilization and conservation of water supplies, and provide standby emergency plans developed by the users themselves for drought-year water allocations under a system of mutually agreed upon priorities. The Federal role in such a plan would be to bring all of our disaster relief programs under one umbrella, with standardized criteria, to help the users and their local and State agencies prepare for and cope with water shortages as they occur.

The bill before us provides relief that is needed right now and must pass without delay if it is to do any good.

As I have said before, Mr. Speaker, the legislation is essentially stopgap legislation. In the final analysis, we are going to have to address this water crisis in a much more comprehensive manner through the development of a total water management program for the future.

The drought is a major crisis, of major proportions. I am hopeful that we will take this as a signal to move in the direction of something more comprehensive in the future. I urge passage of the legislation.

Mr. LUJAN. Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. Rousselot).

Mr. ROUSSELOT. Mr. Speaker, I thank my colleague (Mr. Lujan) for yielding to me.

Mr. Speaker, I rise in support of this legislation (H.R. 5117). I appreciate what the Interior Committee has done to move on this drought legislation, which is truly emergency legislation and does not just have the sometimes overused tag of "emergency" attached to it. The thing that bothers me so many times is that we tend, in this body, to attach the name "emergency" to bills that do not necessarily have genuine emergency purposes included in the real content of the legislation. I compliment the Interior committee for bringing this genuine emergency legislation to the floor and doing so in a timely manner so the loans can do some good.

I know that the chairman of the subcommittee, the gentleman from Washington (Mr. Meed), came before the Budget Committee in an extraordinary session to try to make sure that the first budget resolution of 1978 include an authorization of \$100 million in loans for the drought now being experienced in the West. I compliment him for the able manner in which he was able to explain to the entire Budget Committee—the immediate necessity for this legislation.

I would also like to make the point that these are loans which must be paid back.

The people or organizations who take advantage of loans under this drought authorization realize they have to pay it back in 5 years. I think that gives an added protection to the Treasury. In addition, nothing is authorized for fiscal year 1978. All loans must be made in 1977 and as a matter of fact there is a termination date in the legislation of September 30, 1977.

I compliment the committee for the way it has put appropriate constraints in the legislation, so that in the name of

mum utilization and conservation of emergency individuals or groups cannot vater supplies, and provide standby misuse the authority.

California does need these drought loans, primarily in the northern part of the State.

I compliment the Interior Committee for the expeditious way it has moved (H.R. 5117). My understanding is that President Carter will sign this emergency bill.

Mr. LUJAN. Mr. Speaker, I yield such time as he may consume to the gentleman from Kansas (Mr. Skubitz).

Mr. SKUBITZ. Mr. Speaker, I rise in support of this bill to provide temporary disaster relief authority to the Secretary of the Interior, and I urge my colleagues to give it their unanimous support. Most disaster relief legislation permits help to be given only after losses have been incurred. This program aims at helping the farmers before disaster strikes so they can hold down their losses.

I would also point out that the \$100 million provided in this bill is mostly "seed money" that will be repaid to the Treasury. The Secretary will use this money to buy water and to make loans for the construction of new wells. The water he buys will subsequently be sold at the same price for which it was bought. And the loans will be repaid by the farmers. We have stipulated that the loans be made at no interest, because all loans to reclamation farmers are at no interest and we feel there is no justification for setting a precedent that would penalize reclamation farmers in their hour of need.

The water bank provisions of this bill will not be applicable to all of the drought-stricken areas of the West simply because the situation it envisions does not exist in all areas. But where it can work, it should work well. It will permit growers of annual crops to receive a price for their water that will compensate them for not planting this year, while making enough water available to perennial crop growers to permit them to save their orchards and vinevards.

At the same time, the bill provides loans to farmers outside of waterbank areas to permit them to develop new sources of ground water.

This is a timely bill and a needed bill. Without it, many farmers will not only be hurt by the drought but will lose their capital investments in their orchards and vineyards as well.

I urge the Members of this body to support this bill, because it provides the Secretary with funds and authority to immediately respond to the needs and interest of those farmers in the West who are previous users of federally supplied water and whose lifetime investments are now being threatened by drought. Although this bill can in no way be considered as the ultimate response to the water needs of the West, it does provide, in part at least, a short-term solution which will precipitate the highest and best use of this scarce and precious resource.

Mr. LUJAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I concur with the remarks of the chairman of our subcommittee, the gentleman from Washington. We have moved as swiftly as possible to create a relief program that will mitigate the losses of this recordbreaking drought.

We were unanimous in opposing the administration's position that the Government should charge interest for the disaster loans authorized in H.R. 5117. Throughout the 75-year life of the Reclamation Act, no reclamation farmer has been charged interest on loans. It illbehooves us to clamp on the interest charges at a time when the farmer's back is to the wall, because of water shortages.

I would emphasize that the \$100 million appropriation authority contained in this bill does not represent an expenditure of that amount. The money will be repaid, either by water purchases or by repaid loans. In that respect, this bill is in line with our policy of trying to make all reclamation-oriented projects pay their own way.

Time is of the essence in this bill. If the relief is to do any good, it must get to the farmer now, not next month. That is why, in our committee markup, we provided that 15 percent of the authorized money will become immediately available to those farmers who need loans for construction of new wells, pipelines, and other equipment needed to augment present water supplies.

I have purposely held my remarks to a minimum, because I feel we should pass this bill without any delay. I urge my colleagues to join in its support.

Mr. LEGGETT. Mr. Speaker, I rise in support of the drought emergency programs embodied in H.R. 5117 which authorize \$100 million in temporary spending authority for fiscal year 1977 for water acquisition and other drought relief activities designed to mitigate the impacts of continuing drought in our West and Midwest.

As you may know, the President has already declared "emergencies" due to severe drought in portions of 12 States stretching from Michigan to the Pacific coast. With moisture far below normal for almost 2 years now, even the rains and snows that fell over much of this region in late February have brought little if any relief as reservoirs continue to dry up and underground water levels drop precipitously lower. Therefore, unless conditions improve dramatically in the next few months, it appears likely that many of these States will experience, in rapid succession, 2 of the driest drought years of the century. And even if 1978 were to bring with it a return to more normal rainfall and snow, the water suply deficits inherited from this year in most of these States would be extremely difficult to erase. Moreover, we cannot assume that 1978 will be wet, nor that it will be the last dry year in a row. Indeed, my own State of California has had up to as many as 6 consecutive years in the past when precipitation was below normal.

Unlike most natural disasters which start abruptly, end distinctly, and leave readily identifiable, verifiable, and quantifiable damage, drought is a creeping phonomenon—a cancer against the land—resulting in losses that oftentimes

defy precise computation and continue to plague us for many years afterwards.

As March 1977 began, wheat, fruit, and vegetable crops were threatened with ruin throughout much of the droughtstricken West and Midwest. Cattle and other livestock herds were being sold and slaughtered for lack of pasture, and cornplanting prospects for this spring remained poor at best. Dry-farm grain and nonirrigated rangeland have been hardest hit as seasonal precipitation over the past 2 years has varied between 30 and 50 percent of normal. Even irrigated agriculture has been hurt as a result of insufficient surface runoff and declining water tables. In many areas, only enough water remains for about one good irrigation, compared to the usual 15 to 20 irrigations required for healthy crops.

What is the magnitude of such potential drought-related losses, and can we place any reliable figures on these projected disruptions? As I have already indicated, it is difficult at best to estimate with any degree of accuracy the probable economic impacts of a continuing drought. This is especially true in agriculture, where, in many instances, decisions on whether or not to plant this year have not yet been made.

I am not presently aware of any comprehensive econometric modeling efforts or forecasts which specifically address our current drought situation in an attempt to quantify its overall macroeconomic repercussion on GNP, economic recovery, inflation, and unemployment for 1977 and 1978. However, Chase Econometrics and Data Resources. Inc. have recently released alternative agriculture forecasts which explore the partial implications of continuation of the drought throughout 1977. Both studies agree that the potential for a major crop production shortfall in 1977 is very strong, given the current dry conditions over much of the and Midwestern farming Western regions of the United States. They feel that inadequate water supplies for irrigation, particularly in California. Oregon, and Nebraska, will cause a shift in planting to dryland crops which will put downward pressure on yields since irrigated production is typically much higher. Such diminished crop yields will, in turn, lead to dramatically reduced production levels, as illustrated in table 1, which compares 3-year projections for selected crops under conditions of both continuing drought and no drought:

TABLE 1.—COMPARISON OF PRODUCTION LEVELS FOR SELECTED CROPS UNDER DROUGHT AND NONDROUGHT SCENARIOS!

Selected crop	1977	1978	1979
Corn (million bushels):			
Control Drought	6, 673 5, 031	6, 587 5, 297	6, 777
Wheat (million bushels):	2.017	L.S.	
DroughtSoybeans (million bushels);	2, 017 1, 987	2, 103 2, 049	2, 156 2, 194
Control	1, 476 1, 298	1, 563	1,616
Cotton (million bales):		A Secretary	SHAVAN
Control Drought	11.46	12.17 9.74	12, 30

¹ Source: Data Resources, Inc.

As can be seen, the most precipitous inventory changes in the worst crop scenario occur for corn. However, even more extraordinary results are reflected in likely crop prices. Even with the large grain carryovers from 1976–77, drought reduced crop reductions will create a substantial wave of grain price inflation, as indicated in table 2:

TABLE 2.—COMPARISON OF SELECTED CROP PRICES UNDER DROUGHT AND NONDROUGHT SCENARIOS 1

Iln			

Selected crop	1977	1978	1979
Corn:	2, 44	2, 36	2. 33 3. 45
DroughtWheat:	2.75	3. 37	3. 45
Control	2.72 3.04	2.80 3.83	2.72 3.98
Soybeans: Control Drought	6.89 7.28	5.82 7.57	5.65 7.28
Drought	1.28	1.51	1.2

¹ Source: Data Resources, Inc.

Again, corn prices are expected to lead this inflation, and continue to play a major role in reversing what was once considered a very favorable feeding outlook for livestock. Although continuation of the drought will force additional marketings of nonfed cattle throughout 1977, thereby tending to restrain meat prices in the short term, the combination of rising feed costs and reduced livestock herds will drive up consumer meat prices significantly in the longer term, as portrayed in table 3:

TABLE 3.—COMPARISON OF SELECTED LIVESTOCK PRICES UNDER DROUGHT AND NONDROUGHT SCENARIOS¹

Selected livestock	1977	1978	1979
Steers (dollars per hundredweight):		3 196	110
Control	40.25	43.96	42.44
Drought	40. 98	45. 91	44. 55
Hogs (dollars per hundredweight): Control	38.76	43.61	43, 28
Drought	39, 40	45. 85	50.37
Broilers (cents per pound):			
Control	39. 59	43.40	42.26
Drought	40, 11	45. 29	47.68

¹ Source: Data Resources, Inc.

These agricultural projections do not bode well for consumers. Indeed, the Data Resources Inc. study suggests that wholesale food price inflation will approach an annual rate of 11 percent for 1977, largely as a result of continuing drought in the West and Midwest. Utilizing standard rules of thumb for translating food price increases into probable impacts upon both the overall consumer price index and the Federal budget, we find that total drought-related pressures will likely lead to between a 2- and 3-percent increase in the overall consumer price index and cause additional expenditures in the Federal budget totaling around \$5 billion for directly related programs, and \$6 billion for indirectly related programs.

Extensive estimates regarding anticipated drought losses and impacts upon overall gross national product and employment expectations for 1977 do not presently exist for the entire United States. Therefore, to give you some indications of just how serious these eco-

nomic impacts might be, I would like to dwell for a moment on the plight of just one State—my State of California.

While the water shortage is pinching large urban areas, and while some small communities depending upon their own wells and reservoirs are nearly out of water, the continuing drought in California is having its most devastating effect on agriculture, where some of the richest land in the world-when it is properly irrigated—is now drying up due to lifesucking drought. Based upon revised figures released last month by the State Department of Water Resources, under the most optimistic scenario the drought could cost \$2.9 billion in gross State product and 57,000 lost jobs. Under the most likely scenario, fully \$4.5 billion and 140,000 jobs could be lost. And under the most pessimistic forecast, nearly \$6.3 billion and 259,000 jobs could conceivably be lost.

Such potential disruptions are unconscionable as long as we have at our disposal the means to ameliorate even a small portion of these projected losses yet fail to respond in a positive and timely manner. This bill before us today is by no means a comprehensive solution to the problems of a continuing extreme drought. However, it is an encouraging start which will allow the Secretary of the Interior to finance emergency water delivery facilities and administer the purchase and reallocation of emergency irrigation water supplies between willing buyers and sellers within the constraints of existing State laws. In particular, such a program would permit redistribution of water from farmers in drought areas who grow annual crops, such as vegetables and pasture crops, to those with perennial crops, such as fruit orchards, nut groves, and vineyards. Clearly, the rationale behind such legislation is that perennial farmers stand to lose considerably more during a severe drought than annual farmers who are able to sow and harvest their crops in one growing

Therefore, I strongly urge my colleagues to support this first step forward in coming to grips with the longer term effects of continuing drought in our West and Midwest.

Mr. MEEDS. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Washington (Mr. MEEDS) that the House suspend the rules and pass the bill (H.R. 5117), as amended.

The question was taken; and (twothirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

Mr. MEEDS. Mr. Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs be discharged from the further consideration of the Senate bill (S. 925) to provide temporary authorities to the Secretary of the Interior to facilitate emergency actions to mitigate the impacts of the 1976-77 drought, and ask for its immediate consideration.

The Clerk read the title of the Senate hill

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 925

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior, hereinafter re-ferred to as the "Secretary", acting through the Bureau of Reclamation pursuant to the authorities in the Reclamation Laws (74 Stat. 882, as amended) and the authorities granted herein, is directed to-

(1) perform studies to identify opportunities to augment, utilize, or conserve water supplies available to Federal reclamation projects; and, within existing contractual arrangements and pursuant to State water law, to undertake without further authorization construction, management, and conservation activities which can be expected to have an effect in mitigating losses and damages to Federal reclamation projects resulting from the 1976-77 drought period;

(2) within the constraints of State water acquire available water supplies by purchase from willing sellers and to redistribute such water to users either within or outside Federal reclamation projects based upon priorities to be determined by the Secretary with the objective of minimizing losses and damages resulting from

the drought;

(3) undertake expedited evaluations and reconnaissance studies of potential facilities to mitigate the effects of a recurrence of the current emergency and make recommendations to the President and to the Congress evaluating such potential undertakings including, but not limited to, wells, pumping plants, pipelines, canals, and alterations of outlet works of existing impoundments; and

(4) make payments to Federal reclama-tion project landowners who are without irrigation water supplies to carry out soil conservation measures to protect the productivity of project lands for future seasons.

SEC. 2. Payment for water acquired from willing sellers will be at a negotiated price, but will not confer any undue benefit or profit to any person or persons compared to what would have been realized if the water had been used in the normal irrigation of crops adapted to the area, as determined

by the Secretary. SEC. 3. (a) The Secretary shall determine for purposes of this Act the priority of need for allocating the acquired or developed water, taking into consideration, among other things, State law, national need and the effect of losing perennial crops due to

drought.

(b) Where the allocation of the water is to a Bureau of Reclamation contracting entity such entity will be responsible for payment on terms and conditions within the repayment capability of the beneficiaries as determined by the Secretary and the funds used for developing or acquiring emergency water supplies that exceed the repayment capability, shall be nonreimbursable.

(c) In order to provide assistance to industrial irrigators outside Federal reclamation projects, the Secretary is authorized to make interest-free loans to such irrigators for the purposes of undertaking construction, management, conservation activities, or the ac-quisition of water, which can be expected to have an effect in mitigating losses and damages resulting from 1976–1977 drought period and to make payments to landowners out-side Federal reclamation projects who are without irrigation water supplies to carry out soil conservation measures to protect the productivity of their lands for future seasons

(d) Each irrigator desiring a loan or payment pursuant to subsection (C) of this section shall make application to the Governor of the appropriate State or his designee. The Governor or his designee shall determine whether the intended use of the amount requested, in his judgument, meets the purposes of subsection (c) of this section and complies with the requirements of the ap-propriate State laws. The Secretary shall approve such loans on the recommendation of the Governor that these requirements are met. The period of repayment for such loans shall not exceed five years.

(e) For the purposes of this section, the rm "irrigators" shall mean any person or legal entity who holds a valid existing water

right for irrigation purposes.

SEC. 4. The Secretary is hereby authorized to defer without penalty, the 1977 and 1978 payments of any installment of charges including operation and maintenance costs owed to the United States on Federal reclamation projects as he deems necessary because of financial hardship caused by extreme drought conditions: Provided, That any deferment may be added to the end of the repayment period under the contracting entities' existing contract with the United States.

SEC. 5. Actions taken pursuant to this Act are in response to emergency conditions and depend for their effectiveness upon their completion prior to or during the 1977 irrigation season and, therefore, are deemed not to be major Federal actions significantly affecting the quality of the human environment for purposes of the National Environ-mental Policy Act of 1969 (83 Stat. 852, as amended: 42 U.S.C. 4321). SEC. 6. The program established by this

Act shall, to the extent practicable, be coordinated with emergency and disaster relief operations conducted by other Federal agencies under other provisions of law. The Secretary shall consult with the heads of such other Federal agencies, as he deems necessary. The heads of all other Federal agencies performing relief functions under other Federal authorities are hereby authorized and directed to provide the Secretary, or his designee, such information and records as the Secretary or his designee shall deem necessary for the administration of this Act.

SEC. 7. Not later than March 1, 1978, the Secretary shall provide the Congress with a complete report on expenditures under this Act, which shall include, but not be limited to, an itemized account of each contract for construction or the purchase and sale of

water pursuant to this Act.

8. There is hereby authorized to be appropriated to the Emergency Fund Act of 1948 (62 Stat. 1052; 43 U.S.C. 503), a sum, not to exceed \$200,000,000, to carry out the purposes of the Emergency Fund Act and the purposes of this Act. The Secretary is hereby authorized to transfer to the emergency fund such fiscal year 1977 funds appropriated for other purposes as may be available to the Bureau of Reclamation: Provided, however, That no more than \$200,000,000 of fiscal year 1977 appropriated funds shall be expended from the emergency fund to carry out the purposes of this Act. Construction activities undertaken to implement the programs authorized by this Act shall not be initiated after October 1, 1977.

SEC. 9. Nothing in this Act shall be construed as limiting or restricting the power and authority of the United States or-

- (1) as affecting in any way any law gov erning appropriation or use of, or Federal right to, water on public lands;
 - (2) as expanding or diminishing Federal

or State jurisdiction, responsibility, interests, or rights in water resources development or control:

(3) as displacing, superseding, limiting, or modifying any interstate compact or the jurisdiction or responsibility of any legally established joint or common agency of two or more States or of two or more States and the Federal Government;

(4) as superseding, modifying, or repeal-ing, except as specifically set forth in this Act, existing laws applicable to the various Federal agencies which are authorized to develop or participate in the development of water resources or to exercise licensing or regulatory functions in relation thereto; and

(5) as modifying the terms of any inter-

state compact.

MOTION OFFERED BY MR. MEEDS

Mr. MEEDS. Mr. Speaker, I offer a motion

The Clerk read as follows:

Mr. Meens moves to strike out all after the enacting clause of the Senate bill S. 925 and to insert in lieu thereof the provisions of H.R. 5117, as passed by the House.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 5117) was

laid on the table.

GENERAL LEAVE

Mr. MEEDS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The Speaker pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

AUTHORIZING SUPPLEMENTAL AP-PROPRIATIONS FOR MILITARY CONSTRUCTION AND FAMILY FAMILY HOUSING

Mr. NEDZI. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5502) to authorize supplemental appropriations during fiscal year 1977 for military construction and for operation and maintenance of family housing, and for other purposes.

The Clerk read as follows:

H.R. 5502

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I-MILITARY CONSTRUCTION

SEC. 101. In addition to the authorizations contained in titles I, II, and III of the Military Construction Authorization Act, 1977 (Public Law 94-431), the Secretary of the military department concerned is authorized to accomplish energy conservation, fuel conversion, and pollution abatement projects in the following amounts:

(1) For the Army, various locations,

\$16,796,000.

(2) For the Navy, various locations, \$20,330,000.

(3) For the Air Force, various locations, \$20,000,000.

TITLE II-MILITARY FAMILY HOUSING SEC. 201. In addition to the authorizations contained in section 502 of the Military

Construction Authorization Act, 1977 (Public Law 94-431), the Secretary of Defense, or his designee, is authorized to accomplish alterations, additions, expansions, or extensions, not otherwise authorized by law, to existing public quarters at a cost not to exceed—

(1) for the Department of the Army,

\$13,155,000; (2) for the Department of the Navy, \$4,000,000; and

(3) for the Department of the Air Force,

\$9,382,000.

SEC. 202. In addition to the funds authorized to be appropriated by section 505 of the Military Construction Authorization Act, 1977 (Public Law 94-431), there is hereby authorized to be appropriated for use by the Secretary of Defense, or his designee, for military family housing as authorized by law for the following purposes:

(1) For authorized improvements to public quarters and minor construction, an

amount not to exceed \$30,000,000.

(2) For maintenance of existing military family housing, an amount not to exceed \$35,000,000.

TITLE III—GENERAL PROVISIONS

SEC. 301. Authorizations contained in this Act shall be subject to the authorizations and limitations of the Military Construction Authorization Act, 1977 (Public Law 94-431), in the same manner as if such authorizations had been included in that Act.

SEC. 302. This Act may be cited as the "Supplemental Military Construction Au-

thorization Act, 1977".

The SPEAKER pro tempore. Is a second demanded?

Mr. WHITEHURST. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Michigan (Mr. Nedzi).

Mr. NEDZI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the bill H.R. 5502 provides the required authorization for the \$122,126,000 in military construction and family housing appropriations added by the House on March 16, 1977, by floor amendment, to the fiscal year 1977 supplemental appropriations bill (H.R. 4877).

The Subcommittee on Military Installation and Facilities considered the bill on March 25, after hearing from the Department of Defense, and ordered the bill reported favorably by voice vote to the full committee. On Wednesday, March 30, the full committee approved the subcommittee recommendation and ordered the bill reported favorably without objection.

Specifically, H.R. 5502 authorizes \$57,-125,000 in energy conservation and pollution abatement projects and \$65 million for repairs, improvements, and minor construction of military family housing. These figures are identical to amounts appropriated for these same purposes in the fiscal year 1977 supplemental appropriations bill.

As you know, the appropriations for these construction categories were added to the supplemental appropriations bill, primarily to help stimulate the national economy since they are job producing projects. But, there is another reason equally important for accelerating these projects. Besides the economic

stimulus of generating an estimated 2,000 direct jobs in 1 year, they will move the armed services closer to the Federal Government's goal of eliminating all pollution sources at military bases and reducing energy consumption through various conservation measures.

For example, the \$32 million proposed in this bill for pollution control will enable 14 military installations to meet existing standards this year. Also, it is estimated that the energy conservation projects in this bill will result in a reduction of energy consumption equivalent to 250,000 barrels of oil each year, equal to a savings of \$5.8 million yearly.

In addition, the \$65 million contained in the bill for family housing repairs and alterations will help reduce a backlog in these categories now estimated at

more than \$500 million.

The projects to be authorized by H.R. 5502 originally were requested by the Department of Defense for the fiscal year 1978 budget, but both the previous and new administrations deferred them and other projects pending a study of future basing requirements.

While the Department did not request the authorizations in this bill, departmental witnesses testified that the Department has no objection to the bill and gave assurances that the bases where these projects are planned will continue as active installations in the foreseeable future.

At the subcommittee's request, the three services supplied lists of high priority energy conservation and pollution abatement projects and family housing projects that they feel certain can be put under contract between now and October 1, 1977, the start of the next fiscal year. Those are the projects authorized in H.R. 5502.

Mr. Speaker, this concludes my statement. I recommend approval of H.R.

Mr. HOWARD. Mr. Speaker, will the gentleman yield?

Mr. NEDZI. I yield to the gentleman from New Jersey.

Mr. HOWARD. Mr. Speaker, I thank the gentleman for yielding.

I have a question concerning page 4 of the committee report. Under the heading, "Department of the Army," for "Water Pollution Abatement," I would like to refer to two items: First, Fort Belvoir, Va., where it lists "Pump Station Emergency Power," \$369,000; and, second, "Vint Hill Farms Station, Va., Sewage Treatment," \$960,000.

My question to the gentleman is this: Are these amounts of money for these two installations needed for water pollution abatement under the existing personnel situation in these two installations, or is this money needed, because of any anticipated increase in personnel at these two installations?

Mr. NEDZI. Mr. Speaker, in listening to the testimony of the Department of Defense and in reviewing these projects, as well as all of the projects, the committee found that the projects were originally scheduled so that there was no change in the course of this fiscal year. These were postponed projects, so that it is our understanding that the projects do not anticipate any increase in per-

sonnel. They are there to satisfy existing EPA requirements in the case of Fort Belvoir, Va., and the State of Virginia requirements in the case of Vint Hill.

Mr. HOWARD. Mr. Speaker, to further clarify this, I would ask the gentleman from Michigan whether it is his understanding that this money is not needed, because they have an increase or because they anticipate a substantial increase in the number of personnel who might be located at these locations compared to what is there now?

Mr. NEDZI. Mr. Speaker, in the judgment of the chairman this has nothing to do with the number of personnel which are or could be assigned to these

particular installations.

Mr. HOWARD. I thank the gentleman. Mr. NEDZI. Mr. Speaker, I reserve the balance of my time.

Mr. WHITEHURST. Mr. Speaker, I yield myself such time as I may consume. Mr. Speaker, I rise to express my full support of H.R. 5502 whose purposes have been described by the distinguished

gentleman from Michigan.

We have heard a great deal of debate lately about the need to create immediate jobs by accelerating Government-sponsored construction projects. Indeed, this bill will accomplish that goal. But other benefits, equally as important, will result from enactment of H.R. 5502.

It is estimated that the energy conservation projects authorized in H.R. 5502 will reduce energy consumption at military bases equivalent to 250,000 barrels of oil each year. This is equal to a savings of \$5.8 million annually. So, we should see not only the savings of dollars, but the savings of precious fuel as well.

As stated previously, this bill will help eliminate air and water pollution sources at various military bases which are now in violation of air and water quality standards. As you know, Congress has been authorizing and appropriating an average of about \$110 million yearly since 1971 for projects to control pollution at all military installations. This year, however, the Department of Defense has only requested \$22 million for pollution control in the fiscal year 1978 budget. This bill will greatly supplement that meager effort and hopefully will help the Department meet its goal of having all bases pollution-free by September 1979.

In closing, Mr. Speaker, this is a multipurpose bill and should have the support of all of us. Therefore, I urge the passage of H.R. 5502.

Mr. SIKES. Mr. Speaker, the supplemental military construction authorization bill under consideration is a good example of the manner in which the Department of Defense can properly ease unemployment, provide needed stimulus to the overall economy and at the same time, help to meet our national goals of abolishing air and water pollution and conserving energy.

The projects which will be funded under this authorization were of sufficiently high priority to have been included in the original department of defense request for fiscal year 1978. However, an untimely and unwise cut by the Office of Management and Budget in the 1978 request caused the projects to be

dropped. I have said many times that this move by OMB went directly contrary to our national interests. The funds provided in this authorization will help remedy that situation.

By providing this authorization, which will provide \$122 million for air and water pollution projects and energy conservation projects, money will go into highly labor intensive projects within 60 to 90 days from the time the money is provided. It will keep thousands of Americans at work and at the same time will help to provide clean air and water and save precious enegy.

Mr. Speaker, this bill is a sensible approach. The projects should not have been deleted in the first place by OMB and certainly they should not be denied now that we in this body have the opportunity to correct the OMB mistake.

I urge passage of this bill so that this important work can go forward at military installations across our Nation and keep Americans in jobs.

Mr. NEDZI. Mr. Speaker, I have no

further requests for time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Michigan (Mr. Nepzi) that the House suspend the rules and pass the bill H.R. 5502.

The question was taken; and (twothirds having voted in favor thereof), the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. NEDZI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed, and to include extraneous material

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER pro tempore. Debate has been concluded on all motions to suspend the rules.

Pursuant to the provisions of clause 3(b), rule XXVII, the Chair will now put the question on each motion on which further proceedings were postponed in the order in which that motion was entertained

Votes will be taken in the following

H.R. 5027, H.R. 3695, and H.R. 1828. The Chair will reduce to 5 minutes the time for any electronic votes after the first such vote in this series.

CLARIFYING THE REQUIREMENT THAT MEDICAL SERVICES BE PROVIDED BY THE VETERANS' ADMINISTRATION

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. DANIELSON. Mr. Speaker, when the vote was taken on the bill H.R. 3695 a short time ago, I was compelled to be off the floor. Had I been present I would have voted "aye."

PERMISSION FOR COMMITTEE ON INTERNATIONAL RELATIONS TO FILE REPORT ON H.R. 5717

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that the Committee on International Relations may have until midnight tonight to file a report on the bill H.R. 5717, to provide for relief and rehabilitation assistance to the victims of the recent earthquakes in Rumania.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

CONFERENCE REPORT ON H.R. 4800, TO EXTEND EMERGENCY UNEM-PLOYMENT COMPENSATION ACT OF 1974

Mr. ULLMAN. Mr. Speaker, I call up the conference report on the bill (H.R. 4800) to extend the Emergency Unemployment Compensation Act of 1974 for an additional year, to revise the trigger provisions in such act, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to
the request of the gentleman from Oregon?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see prior proceedings of today.)

Mr. ULLMAN (during the reading). Mr. Speaker, I ask unanimous consent that the further reading of the statement be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

The SPEAKER. The Chair recognizes the gentleman from Oregon (Mr. Ullman).

Mr. ULLMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this is a very important conference report. The FSB provisions of the law expired on last Thursday evening. It is important that we understand the contents of this bill, and for the purposes of explaining the nature of the agreements arrived at in this conference report, I yield 10 minutes to the gentleman from California (Mr. CORMAN), chairman of the Subcommittee on Public Assistance and Usemployment Compensation.

Mr. CORMAN. Mr. Speaker, the major provisions of H.R. 4800 as agreed to by the House and Senate conferees include the following:

The Federal supplemental benefits—FSB—program is extended until November 1, 1977, with a phaseout to February 1, 1978.

Until April 30, 1977, up to 26 weeks of FSB—or a combined maximum of 65 weeks of regular, extended, and Federal supplemental benefits—will continue to be paid in States where the insured unemployment rate is 6 percent or higher. This provides a 4-week transition period for those unemployed workers who have exhausted the first 13 weeks of FSB but have entitlement remaining in the second 13 weeks of this program.

As of May 1, 1977, up to 13 additional weeks of unemployment compensation can be paid to unemployed workers who exhaust regular and extended benefits. These additional benefits will be payable in States with insured unemployment rates of 5 percent or higher. This provides for a combined maximum of 52 weeks of regular, extended and Federal supplemental unemployment compensation benefits in States with high unemployment.

No new claims for FSB can be accepted after October 31, 1977, under this extension of the program. Unemployed workers who have applied for FSB prior to that date, however, will be able to continue to draw benefits until they have used up their FSB entitlement or until January 31, 1978, whichever comes first.

Under present law, FSB is financed out of refundable Federal general revenue advances to the Federal unemployment trust fund. The general revenues used to finance this extension of FSB will not be repayable.

H.R. 4800 requires States to deny FSB to individuals who do not actively seek work or who refuse offers of suitable work. Under the provisions of this legislation, for the purposes of the FSB program any work would be considered suitable if it is within the capabilities of the FSB claimant, pays the minimum wage and gross average remuneration equal to the individual's unemployment benefits, is listed with the State employment service or is offered in writing, and meets the other requirements of Federal law and State law and practices pertaining to suitable or disqualifying work that are not inconsistent with the provisions of this bill.

The conference agreement delays for 2 additional years, until January 1, 1980, the provisions in Federal law which provide for the automatic recoupment of outstanding Federal unemployment insurance loans to States.

The conference agreement also contains a Senate amendment requiring that future pay increases for Members of Congress, Federal judges, and senior Federal officials be subject to a rollcall vote in

both the House and Senate.

The Federal supplemental benefits program was enacted in December 1974. This program was in response to the sharp increase in the unemployment rate and the large number of workers who were expected in the coming months to exhaust their regular and extended benefits before obtaining suitable employment. Initially FSB contained both National and State triggers to initiate and terminate the additional unemployment compensation benefits. It provided up to a maximum of 13 additional weeks of unemployment compensation benefits-or a combined maximum of 52 weeks of regular, extended, and Federal supplemental benefits-in all States when the national insured unemployment rate was 4.5 percent or higher, and, if the national IUR dropped below 4.5 percent, the 13 weeks of FSB could be paid in States with insured unemployment of 4 percent or higher. As a part of the Tax Reduction Act of 1975 Congress increased from 13 to 26 the maximum number of weeks provided under the FSB program. This increased the combined maximum to 65 weeks of regular, extended, and Federal supplemental benefits.

Public Law 94-45, enacted in June 1975, extended FSB until March 31, 1977. It extended through December 1975 the payment of up to 26 weeks of FSB on the basis of National or State triggers. Beginning January 1, 1976, the national trigger was eliminated and FSB was made payable on the basis of State in-

sured unemployment rates.

Under current law, in States with insured unemployment rates of 6 percent or more. FSB provides a maximum of 26 additional weeks of unemployment compensation—up to a combined maximum of 65 weeks of regular, extended, and Federal supplemental benefits-to unemployed workers covered under the permanent State and Federal unemployment compensation programs. In States with insured unemployment rates between 5 and 5.9 percent. FSB provides a maximum of 13 additional weeks of unemployment compensation—up to a combined maximum of 52 weeks-to unemployed workers who exhaust their regular and extended benefits.

As of March 12, 1977, 34 States met the trigger requirements to pay FSB. Nine States had insured unemployment rates between 5 and 5.9 percent, making a maximum of 13 weeks of FSB payable. In 25 States the insured unemployment rate was 6 percent or higher, allowing the payment of up to 26 weeks of FSB to unemployed workers who exhaust their regular and extended benefits. Currently over 500.000 claimants are receiving FSB

payments.

H.R. 4800 extends the FSB program to November 1, 1977, with a phaseout to February 1, 1978. As of May 1, 1977, it limits to 13 the maximum number of additional weeks of unemployment com-

pensation payable to unemployed workers who exhaust regular and extended benefits. The combined maximum will then be 52 weeks of regular, extended, and Federal supplemental benefits, and FSB will be payable to unemployed workers in States with insured unemployment rates of 5 percent or higher.

Under this extension, new FSB claims may be filed and accepted through October 31, 1977. No new claims may be filed after that date. However, individuals who have filed an FSB claim prior to November 1 of this year can continue to draw benefits until they have exhausted their FSB entitlement for January 31, 1978,

which ever comes first.

Present law provides that when the unemployment in a State reaches the level required to pay FSB, these additional benefits will continue to be paid in the State for a minimum of 26 weeks. In other words, once the State meets the FSB requirement, it stays triggered on for at least 6 months, regardless of flucuations in the State unemployment rates that might occur. The conference agreement reduces the minimum duration of a State FSB payment period to 13 weeks. This is consistent with the 13-week maximum FSB entitlement for individual claimants provided in this bill.

The conference agreement on H.R. 4800 provides that Federal general revenues used to finance any FSB paid for weeks of unemployment ending after March 31, 1977, will not be repayable. Under current law, FSB is financed by employer paid Federal payroll taxes-FUTA—which are paid into the Federal unemployment insurance trust fund. Part of the money from the FUTA tax revenue is credited to the extended unemployment compensation account in the unemployment trust fund. This account is used to pay the Federal share of extended benefits and all of FSB. It has been necessary to supply repayable advances from general revenue to the extended unemployment account in fiscal years 1972, 1973, and 1975 through the present. The debt is currently \$8.1 billion, of which \$5.3 billion is attributable to FSB.

The shift to general revenue financing of FSB provided in this bill is based on the position that after a person has exhausted regular and extended benefits the reason for his unemployment can no longer be attributed to his previous employers. Therefore, the financing of any additional unemployment compensation benefits should be shifted from employer-paid payroll taxes to general revenues.

Under the provisions of section 104 of the bill, in addition to any eligibility requirements of the applicable State law, an individual will be disqualified from receiving FSB for failing to actively seek work; failing to apply for any suitable work to which he or she was referred by the State agency; or failing to accept any offer of suitable work.

To meet the "actively seeking work" requirement for any week the FSB claimant will have to engage in a systematic and sustained effort to obtain

work during such week, and provide tangible evidence to the State agency that he or she has actively sought work for such week.

For the purposes of the FSB program, any work will be considered "suitable" if it—

Is within the capabilities of the claimant:

Meets the conditions of present Federal law:

Meets the conditions of State law and practices pertaining to suitable or disqualifying work that are not inconsistent with the provisions of the section, such as not requiring an individual to take a job that involves traveling an unreasonable distance to work or poses an unreasonable threat to the individual's morals, health or safety;

Pays wages at least equal to the Federal or, if higher, any applicable State

or local minmum wage:

Pays wages at least equal to the Fedtion equal to the individual's weekly unemployment compensation benefit, plus any supplemental unemployment benefits—SUB—to which the individual might be entitled because of agreements with previous employers; and

Is listed with the State employment

service or offered in writing.

State agencies will be required to refer FSB claimants to any job that would be considered suitable for the individual under the provisions of this section. However, if an individual furnishes satisfactory evidence to the State agency that his or her prospects for obtaining work within a reasonably short period in his customary occupation are good, the determination of whether any work is suitable for the individual will be made in accordance with State law and practices pertaining to suitable or disqualifying work rather than the provisions of this section pertaining to suitable work. An example of the type of evidence required would be a recall notice from a former employer.

Failure to "actively seek work" or to apply for or accept an offer of "suitable work," as defined above, will disqualify an individual from receiving emergency benefits until he had worked at least 4 weeks and earned 4 times his or her weekly unemployment compensation

amount.

All State laws now provide for the disqualification of an individual who refuses to accept suitable work. These provisions vary substantially from State to State and were enacted to govern the operation of the permanent unemployment compensation system. The requirements of this section would not override the provisions and practices of State programs as they pertain to benefits under the regular and extended unemployment compensation programs, but would broaden the grounds for disqualification under the Federal supplemental benefits program.

The bill also requires an individual to actively engage in seeking work or be disqualified from benefits. It is intended that each FSB recipient actively search for employment opportunity and substantiate his or her activity to the State

agency. This is a more stringent requirement than that imposed by most State laws. It requires that FSB recipients be treated differently than beneficiaries of regular and extended benefits because of the duration of their unemployment and their inability to obtain reemployment in

their customary occupations.

Section 105 establishes provisions which require the utilization of a State's fraud procedures in the case of individuals who receive FSB benefits fraudulently. In addition, specific provisions are set forth to recover overpayments which are made erroneously. Correspondingly, there is provision for waiver of repayment when it is determined that a payment was received without fault of the individual and repayment would be contrary to equity and good conscience. Under the present statute, waiver is permitted only in those States which have State law waiver provisions applicable in their regular unemployment insurance program. Some States have no such provision, and, in those that do, the provisions vary. Section 105 provides for uniform waiver procedures in every State, and would thereby make the FSB program consistent with the present nationally uniform waiver provisions in the special unemployment assistance program.

The conference agreement also provides that an individual's FSB entitlement will expire 2 years after the end of the benefit year for which regular benefits were payable. Essentially, this means that an individual eligible for a total of 52 weeks of regular, extended and Federal supplemental benefits would have to draw those benefits within a 3-year period. After approximately 3 years, his or her FSB entitlement would expire.

Section 201 of H.R. 4800 would delay for 2 additional years, until January 1, 1980, the provisions in Federal law which provide for the recoupment of outstanding Federal unemployment insurance loans to States. The recoupment operates through an automatic increase in the Federal unemployment tax paid by employers in States with outstanding loans.

As of February 15, 1977, 22 States had borrowed a total of \$3.8 billion from the Federal Government to enable them to continue paying unemployment com-

pensation benefits.

Under permanent law, if all Federal advances to a State are not repaid within 2 years, the Federal unemployment taxes paid by the covered employers within that State are automatically increased by 0.3 percent per year until the total loan has been repaid. Public Law 94-45 delayed these automatic recoupment provisions until January 1, 1978. In order to qualify for the delay in the automatic tax increase, a State has to take actions aimed at restoring solvency to its unemployment insurance fund, such as increasing the State unemployment tax rate or taxable wage base, or changing the experience rating system.

The States that have been forced to borrow Federal funds are generally those that have been hardest hit by unemployment in recent years. In most cases, these

States are still faced with higher than normal levels of unemployment. It is the committee's position that the present suspension of the recoupment provisions be extended 2 more years in order to delay the increase in employer payroll taxes which would impose an additional burden on State economies still suffering from high joblessness. Furthermore, the additional 2-year delay would provide Congress with time to consider any recommendations pertaining to State and Federal unemployment insurance financing that might be forthcoming from the National Commission on Unemployment Compensation established by Public Law 94-566.

Title III of the bill makes some technical and clarifying changes in the Unemployment Compensation Amendments of 1976 (Public Law 94-566) that will resolve problems with the language as adopted. Also, it allows States the option of denying unemployment compensation benefits to school employees during established and customary vacation or recess periods, such as Christmas and Easter, if there is reasonable assurance of employment following the vacation or recess period.

Under the provisions of Public Law 94-566, effective October 1, 1979, unemployment compensation benefits must be reduced by the amount of any public or private retirement benefits received by an individual. A provision in H.R. 4800 delays this effective date until March 31, 1980, so that Congress will have sufficient time to consider the recommendations of the National Study Commission pertaining to the treatment of retirement benefits. Another provision in H.R. 4800 delays for 6 months the due dates for the interim and final reports of the National Commission on Unemployment Compensation established by 94-566.

There is one provision of the conference agreement not pertaining to unemployment compensation. This is a Senate floor amendment that amends Public Law 90-206. It requires rollcall votes in both the House and Senate on future pay raises for Members of Congress, Federal judges, and other senior Federal officials recommended by the Commission estab-

lished by Public Law 90-206.

FSB has been a necessary program. It has fulfilled the objective of providing additional unemployment compensation during a period when it has taken unemployed workers substantially longer to find work. The additional weeks of unemployment compensation provided by this program have made it possible for thousands of workers to sustain themselves and their families during the past several

Even though the economy has shown definite signs of improving, it has not improved enough to justify a complete termination of the FSB program. Total unemployment is still in excess of 7 percent, and over 7 million unemployed workers are searching and competing for existing jobs. The conditions which led Congress to enact the FSB program are still sufficiently severe to warrant its ex-tension as provided in this bill.

I urge the Members to support the extension of the FSB program as provided in the conference agreement that is before them.

Mr. CONABLE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of this conference report.

It will insure the continuation of the Federal supplemental benefits program through November of this year.

As Members will recall, recently the House paseed H.R. 4800 which in addition to extending the FSB program until March 31, 1978, also made a number of other changes in that program which were of importance. One such change alters the suitability of work provisions in the FSB program. The new provision would deny FSB payments to an individual unless he or she is actively seeking work or refused to take a job which pays at least the minimum wage or 120 percent of the claimant's unemployment compensation weekly benefit, plus any supplemental unemployment benefits he or she might be entitled to.

In addition the House bill provided general revenue financing for FSB after March 31, 1977. Further, it reduced the number of weeks a worker could be potentially eligible for unemployment benefits from 65 to 52 and by providing a 13-week maximum Federal supplemental

benefits program.

The House version of H.R. 4800 changed present law to allow the payment of FSB benefits to workers in labor market areas which had insured unemployment rates of 5 percent or higher. As a result of this provision workers in those areas of high unemployment would receive FSB benefits even though the overall State unemployment rate would not otherwise qualify them for such benefits. This provision was deleted in conference.

The conference agreement embodies the following provisions.

First. The changed program will be extended through October 1977 with a phaseout of benefits for a period running until the end of January 1978. This compromise is agreed to as a middle ground between what the House adopted and what the administration recommended and will allow for a smooth termination of this program next January.

Second. FSB will run for a maximum of 13 weeks. Availability of the program will be determined on the basis of the insured unemployment rate in a State rather than in the States as well as in local labor market areas as provided in the House version. The conferees reluctantly agreed to drop the area triggers provision of the House bill because the costs associated with other changes that were agreed to would have caused the conference report to run afoul of the Budget Act if the area triggers had been retained.

Third. Financing of the FSB program, effective March 31, will be from general revenues as provided in the House bill. Some people consider this a controversial measure.

Fourth. "Suitable work" and "actively

seeking work" provisions similar to but more stringent than the House-passed provisions were adopted. The House requirement that wages be equal to or higher than the Federal minimum wage for suitable work was accepted. This means that a worker will generally have to accept a job which pays 100 percent of his or her weekly unemployment compensation benefit or a job that pays the Federal minimum wage.

Fifth. The job that must be taken by the person must be offered in writing or listed with the State employment service. There was quite a bit of discussion

of this measure.

Mr. Speaker, it should be noted that the Senate added and the conferees have now adopted a floor amendment which requires each House of Congress to vote on future pay raises recommended by the President for Members of Congress and others. This provision, which I support, may be the subject of a separate

vote. I urge its adoption.

There was a great deal of skulking in the underbrush about this particular provision. The majority decided they did not wish to suffer the indignity of having a motion to recommit sponsored by the minority forcing the vote on this particular measure. The conference was recalled after the bill was not brought up last Thursday, and the majority then moved to recede and accept the Senate nongermane amendment. The fact that it was a nongermane amendment alone made it a controversial issue, but the emotional surcharge involved in our efforts to recapture our lost virtue on the issue of the pay raise of course further complicated the matter.

Mr. STEIGER. Mr. Speaker, will the

gentleman yield?

Mr. CONABLE. I yield to the gentleman from Wisconsin. I have not completed my presentation of the conference report but I know the gentleman has something trenchant to observe at this point.

Mr. STEIGER. Nothing trenchant at all. I want to thank my colleague, the gentleman from New York, for yielding.

The time has passed in which a separate vote can be ordered on the so-called Bartlett amendment, so the House will not have an opportunity to have a debate and a vote on that issue.

It is embodied in the conference report.

I might say, Mr. Speaker, that I am bemused by the decision of the conferees, but I am delighted that they have seen the virtue of accepting the Bartlett amendment.

I congratulate the conferees for their reconsideration of their previous action and I hope that the conference report will be adopted.

I must say, I find myself in a difficult position, because I strongly opposed H.R. 4800 when it passed this House. I think the conference report is an improvement over that which passed this House. I think the addition of the Bartlett amendment is one of the reasons for its improvement; so I intend to vote for the

conference report, but I must say that I would want my colleagues, and particularly the distinguished chairman of the subcommittee, to go back to my remarks during House passage, because I think we are going to face the issue again and I do want everyone to know that I think we have reached the end of the time we should extend FSB.

I hope this conference report will be the last time we have that opportunity.

Mr. CONABLE. Mr. Speaker, I thank the gentleman for that interpretation and for the work the gentleman has done on this bill

I think the agreement reached by the conferees is sound and the suitability of work provisions represent a major reform in this program. We have all been made aware of cases in our own States and districts where individuals known to us or to our friends have been collecting unemployment compensation benefits, while at the same time not seeking or taking available jobs. The change in this conference report relative to suitable work essentially requires an individual to take a job which he is capable of performing or suffer the loss of Federal supplemental benefits.

I would hope that the Subcommittee on Public Assistance and Unemployment Compensation of the Committee on Ways and Means will soon schedule hearings on extending this major reform to at least some other parts of the unemployment compensation program.

Finally, Mr. Speaker, I believe this conference report is sound. I urge its adoption at this point, regardless of how Members voted on the House bill as it originally passed.

Mr. ULLMAN. Mr. Speaker, I yield myself 1 minute. Then I will yield to the gentleman from Wisconsin (Mr. Obey).

Mr. Speaker, the situation in which we find ourselves in this conference report illustrates clearly a weakness in the rules of the House. I strongly urge that we change the procedures, because under the existing rules if a nongermane amendment is put on a bill on the Senate side, one of our bills or any other bill, and then comes into conference and we reject it, as we did the first time around on this matter before us today, there is no way that we can avoid a vote here in the House when we bring a conference report back.

Now, that rule was put in 2 years ago to cover some situations that had developed, but I think it is extremely unfortunate when we reject a nongermane amendment that it can be brought up under a motion to recommit. I strongly urge the House to change the rules so we can avoid this very bad parliamentary result.

Mr. Speaker, I yield 4 minutes to the gentleman from Wisconsin (Mr. Obey).

Mr. OBEY. Mr. Speaker, I will vote for this bill, because I believe in the principle of unemployment compensation which is encompassed in this bill, but I want to be one Member who makes it quite clear that I am very strongly opposed to amendment No. 26, which requires Members of Congress in the future to vote on their own pay. I know that the House will adopt the amendment, but I want to speak to that question. I want to take what I know is a minority view and I want to take what I know is an unpopular view, because I think the principle is important.

Frankly, to me, the idea that Members of Congress ought to vote on our own pay is absolutely utter nonsense. If anyone can tell me a more direct conflict of interest for Members of Congress than to be in a position of voting on their own pay, he is a lot smarter than I am. There is no more direct conflict of interest for a Member of Congress than voting to set his own pay. I have said many times before and I will continue to say that I will serve in this job at whatever pay level is established by someone other than myself.

Be it labor, be it business, be it the press—I know of no other segment of society which sets its own pay, and I do not believe it is proper for politicians to be placed in the position of setting their own pay either. The 1968 law, in my judgment, is an imperfect solution to an impossible situation, but it is designed as much as possible to remove Congress from an obvious conflict of interest situation.

I would like to make one point in that regard. House rule VIII says: "Every Member . . . shall vote on each question put, unless he has a direct personal or pecuniary interest" in the outcome of such question.

Can anyone here tell me when a Member of Congress has a more direct financial interest than in a vote on his own pay? I do not think so. That is why I do not believe we ought to be put in the position of voting on it.

The other thing that bothers me, frankly, is this: Some of the Members of Congress who have been most active in attempting to require Members of Congress to vote on their own pay are people who themselves have staggering outside incomes or private fortunes. Some of the Members of Congress who have gotten the most publicity in the press about their opposition to the last pay raise are Members who have come to me on this floor and told me privately that they think it should pass, that most of them want it to pass, but they do not have the guts to support it. I do not think the public interest is served by that kind of charade. The Members will remember what happened here a year and a half ago when we had the last vote on pay, the cost of living adjustment. That bill was ahead by 100 votes with 5 minutes left to go on the rollcall clock. Then, one by one, people bailed out. They changed their vote after they saw it would pass so they did not get the blame. It finally passed by one vote. I do not believe that kind of hypocrisy does the public any good. I do not believe that kind of hypocrisy does this institution any good.

I would strongly suggest—I know there is nothing we can do about it now—but I would strongly suggest that in terms of the integrity of our own institution we have made a fundamental mistake. We will not—we will not improve the public's esteem for this body by placing 435 Members in this body and 100 Members in the other body in the position of being required to consistently be in a conflict of interest when they vote on their own pay. I think it is a bad mistake. There is nothing we can do about it, but I think Members of Congress will rue the day it happened, and I think the public will as well.

Mr. ULLMAN. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. Pike), a member of the

ommittee.

Mr. PIKE. Mr. Speaker, I just feel constrained to say that, while I commend the intestinal fortitude of the preceding speaker, I disagree with him on the substance of what he has said. I think he is right when he attacks charades, and he is right when he attacks hypocrisy, but if we get into a position where we are attacking charades and attacking hypocrisy, then the thing we have got to attack is the manner in which we got our pay raise.

That is because, if ever there was a charade, it was the concept that, "Oh, if only we could have voted on this pay raise I would have voted against it, and I wanted to vote on it so badly, but I was unable to do so and therefore, reluctantly, I am compelled to accept

this pay raise."

Now, this, to me, is the height of charade. This, to me, is the height of hypocrisy, and I commend the conferees for having adopted the Senate amendment

Mr. CONABLE. Mr. Speaker, will the gentleman yield?

Mr. PIKE. I yield to my colleague from New York.

I would like to ask the gentleman, if we raise congressional pay, and if we make the increase effective at the beginning of the next Congress, do we not avoid the dilemma of raising our own pay? It seems to me that would be an entirely appropriate way to deal with this.

Mr. PIKE. I agree with the gentleman. Very frankly, I was one of either 75 or 85, I think, last year who did have the courage to vote for a 4.83-percent pay raise before the election, and it was to take effect in this Congress. I think that is the way it should be done.

Mr. ULLMAN. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio (Mr.

SEIBERLING).

Mr. SEIBERLING. Mr. Speaker, I would like to address a question to the distinguished chairman of the Committee on Ways and Means.

Last year, we had a situation in Ohio, and other States, where the State triggered out under the unemployment compensation law then and now in effect, and yet various metropolitan areas within that State, including the one I represent, still had a much higher un-

employment rate than either the State or national average. Yet those people had their unemployment compensation cut off.

I introduced a bill, which the gentleman from California (Mr. Corman) had hearings on, which would have corrected that situation and made the triggering mechanism applicable to metropolitan areas rather than to a State. That was in this bill as it passed through the House. But I see the conferees have now eliminated that feature which, it would seem to me, was a very desirable feature.

I wonder if the gentleman could ex-

plain what the reasons were.

Mr. ULLMAN. Mr. Speaker, I shall yield to the gentleman from California (Mr. Corman), the distinguished chairman of the subcommittee, to respond to that.

Mr. CORMAN. Mr. Speaker, in response to the gentleman's question, we really faced two things. First of all was the budgetary impact after we accepted the Senate's phaseout of people in the program and used up some \$43 million of that, and the other thing is that every State administrator indicated it would be difficult to administer.

I guess we will have to come back and fight another day. But we either need a national trigger, which covers everyone, or we need local triggers to supplement the areas of high unemployment.

I doubt that this program is to be ended now. If it is not to be ended but funded out of general revenue, there will be undoubtedly other kinds of requirements which will be imposed upon recipients.

Mr. SEIBERLING. I thank the gentleman.

Mr. Speaker, I appreciate the work the gentleman has done, and I think it is unfortunate that the Senate took this portion out of the bill.

My heart bleeds for the State administrators, but it also bleeds for the thousands of people who got their unemployment compensation prematurely cut off.

Mr. CONABLE. Mr. Speaker, I yield 2 minutes to the gentleman from Michi-

gan (Mr. VANDER JAGT).

Mr. VANDER JAGT. Mr. Speaker, I rise in support of the conference report on H.R. 4800. I think it is a tighter bill than that which passed the House overwhelmingly a few weeks ago. It reduces the maximum potential benefit period from 65 to 52 weeks. It also reduces the program's extension from 1 year to 7 months. In addition, the Ketchum amendment, providing a requirement for the acceptance of alternate work, was strengthened by the action of the conferees.

There is one Senate amendment which I very much regret the conferees did not adopt. As most of the Members know, many States have special unemployment compensation provisions which relate to substitute teachers. Under amendments which we adopted last year, the States, effective January 1978, will no longer have the right to provide special treatment for substitute teachers. In effect, what will happen is that a substitute

teacher will be able to teach for as little as 1 day a week for 14 weeks in my State and then qualify for a full 52 weeks of unemployment compensation. That makes absolutely no sense. It will add enormously to the cost of the substitute teaching program for our school districts and it will decrease the efficiency of the substitute teaching program.

When the Public Assistance and Unemployment Compensation Subcommittee considered H.R. 4800 we did not take cognizance of this problem. It was brought to our attention just before House consideration of H.R. 4800 that this situation prevailed. The rule under which H.R. 4800 was considered was closed, so it was not possible to offer appropriate floor amendments to deal with the coverage of substitute teachers.

However, the Senate did amend H.R. 4800 so as to allow the States the option of denying benefits to substitute teachers if the substitute teacher had been employed in the base period for less than 45 days. This was a sound amendment.

The conferees rejected the Senate provision. However, the chairman of the subcommittee did indicate that this subject will be addressed by hearings in the near future. The issue, in a sense, is not directly tied into the FSB program itself.

Mr. Speaker, because this program is urgent and because the bill on balance is good and sound—tighter even than the one that passed the House—I urge my colleagues to support the conference report.

Mr. ASHBROOK. Mr. Speaker, will the

gentleman yield?

Mr. VANDER JAGT. I yield to the

gentleman from Ohio.

Mr. ASHBROOK. Mr. Speaker, in the remaining time the gentleman has, I merely want to raise this question: I respect my friend, the gentleman from Wisconsin (Mr. Steiger) and respect the fact that he feels it is a conflict of interest for us to vote on our own pay. However, I do not see how it would be a conflict of interest for us to vote on our own pay and then not be a conflict of interest for us to vote on the question of ethics. How does he answer this paradox? Either both are a conflict of interest or neither are by extrusion of his reasoning.

Mr. CONABLE. Mr. Speaker, I yield 3 minutes to the gentleman from Minnesota (Mr. Frenzel).

Mr. FRENZEL. Mr. Speaker, we have before us today the conference report to H.R. 4800, the extension of the Federal Supplemental Benefits program.

Unfortunately, some of the bad features of the House bill have been retained in the conference report. Most notable is the assumption of corporate tax liability by general taxpayers through general revenue financing of the program. Further, the deferral of State repayments of past borrowings from the unemployment compensation trust funds leads to an additional assumption—unwarranted, I hope—of the unemployment tax burden by individual American taxpayers. I strongly believe that we

should not require general taxpayers to help bail out large corporations, or even the States, from their normal tax liabilities

The conference report has made several improvements, however. Most importantly, the bill represents a strong statement that Congress will finally let this program expire after this extension. The shortened duration of the extension, down from 1 year to 10 months, represents a step in the right direction. That reduces the cost from over \$1 billion to three-quarters of a billion dollars, a saving of \$250,000,000.

The suitable work provisions contained in the House bill have also been tightened up by requiring that a suitable job pay only 100 percent of the applicable miniumum wage. Also eliminated in conference were the proposed area triggers which would have substantially increased the total amount paid out under FSB. For those of us who see FSB as a disincentive to return to work, the removal of these triggers is a positive factor since it tends to reduce the disincentive.

Mr. Speaker, based solely on the improvements which were made in H.R. 4800 in the conference report, I would have been tempted to vote for it, even though I oppose the FSB program and did vote against the original House bill.

However, since the conference committee reconvened and passed the Bartlett amendment mandating a vote on future congressional pay raises, I do intend to support this conference report, and I hope that it will be adopted.

I think it is worthwhile to retrace the history of this most interesting conference committee. The committee brought back a conference report and asked unanimous consent to have that conference report brought up last Thursday. The gentleman from Wisconsin (Mr. Steiger) indicated at the time that he would move to recommit that conference report so that the conferees would have a chance to vote to bring back the Bartlett amendment, which would require a vote on future congressional pay raises.

Because the gentleman from Wisconsin (Mr. Steiger) was persistent—in fact some say he was recalcitrant—the conference report was pulled off the schedule last Thursday. The conference committee was reconvened, and the conference committee then decided that it would adopt the Bartlett amendment, and we have the conference report in that shape today.

Mr. Speaker, I would like to congratulate the gentleman from Wisconsin (Mr. Steiger), who has stood for a point that most Members of this body believe in very strongly, and that is that we should be obliged to vote on pay raises that affect us. I am not certain that we are the proper body to set our own pay levels, but as long as we have the ultimate responsibility for them, we certainly ought to have the courage to vote on them.

That is all the gentleman from Wisconsin (Mr. Steiger) was trying to do. That he was able to do so under the

rule simply means that we have a decent set of rules. I do not believe, if the conference report had been brought up, that the conference report would have been accepted without the motion to recommit. So I think we are all in the debt of the gentleman from Wisconsin for having brought this matter to a head.

I do not think what we have done needs to imperil the work of another committee and subcommittee that is going to go to work on the question of how we should approach congressional pay raises. I think that committee can bring us further improvements in the process. But one in the hand is worth a great many in the bush.

Mr. Speaker, thanks to the distinguished gentleman from Wisconsin (Mr. STEIGER) we have a bill that all the Members can support today, even those who like myself voted against H.R. 4800 when it was first presented to us.

The SPEAKER. The time of the gentleman from Minnesota (Mr. Frenzel) has expired.

Mr. CONABLE. Mr. Speaker, I yield I additional minute to the gentleman from Minnesota (Mr. Frenzel).

Mr. VOLKMER. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from Missouri.

Mr. VOLKMER. Mr. Speaker, I have been examining the Senate amendment on the pay raise, and I am unable to find the vehicle by which the procedure would be used to actually have a vote. All it provides is that there shall be a separate vote, but there is no provision for it. It also says there shall be a separate vote on each of the distinct pay provisions, executive, legislative, and judicial, which is not now present in law.

I would like to know this: Does the gentleman have any idea as to how we are going to do that? Are we going to do it by separate resolution on each one, or what is the procedure?

Mr. FRENZEL. Mr. Speaker, I am advised that under the language of the Senate amendment as it appears on page 9661 of the Congressional Record, the increases cannot become effective absent a vote

Mr. VOLKMER. Yes, but does the gentleman have any knowledge as to how there would be a vote?

Mr. FRENZEL. Other than stated in the amendment, I do not.

Mr. VOLKMER. The gentleman does not know how there would be a vote?

Mr. FRENZEL. Except as stated, that is correct.

Mr. ULLMAN. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. CORMAN).

Mr. CORMAN. Mr. Speaker, I take this time to make a comment about the Bartlett amendment.

First of all, Mr. Speaker, I have heard from the other side many times that bringing in significant legislation through a nongermane amendment to a bill is not the right thing to do.

Shortly after it was announced that the Bartlett amendment had passed the Senate, I was requested by the chairman of the Post Office and Civil Service Committee, which has jurisdiction over this matter, to reject it. The conference went along with that request. Had it been any other kind of nongermane amendment I suppose we would have had the support of most of the people on the other side of the aisle.

I cannot help but wonder how the members of Ways and Means who have argued so strongly in support of the Bartlett amendment would react if the Committee on Post Office and Civil Service brought a conference report back containing a tax cut or a nongermane amendment dealing with some other matter clearly under the jurisdiction of the Ways and Means Committee.

Mr. CONABLE. Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. Ketchum), who spent a great deal of time and a great deal of ingenuity in developing the suitability provision in the bill that will do a great deal toward the effectiveness of our unemployment compensation system.

Mr. KETCHUM. Mr. Speaker, much has been said about the FSB conference report and what went on during the conference session. Let me say at the outset that I am very sorry that the pay increase has become seemingly more important than the bill. I believe that the subcommittee and the full Committee on Ways and Means did a rather remarkable job on a relatively unpopular bill.

We attempted, as has been expressed on the floor, to solve the problem addressed by the gentleman from Ohio (Mr. Seiberling) relative to area triggers. Mr. Rangel, the gentleman from New York, did, I think, an oustanding job in attempting to deal with that problem. Unfortunately his position did not prevail in the conference. I think it was worth a try but we were not able to do it; we are going to stick with the State triggers.

The suitability provision I believe is a major step forward. I do believe that the position taken originally by the other body tightened that provision and made it better.

At the end of the conference we came finally to the provision requiring votes on pay raises.

Let me assure the Members that there is no Member of this House who more strongly supports the concept of voting on our own pay raises than I do, but to attach it to a bill such as this is, in my opinion, frivolous. It should never have been attached to this bill.

The House conferees, with one or two exceptions, totally supported striking the provision from the bill; it was not a partisan matter at all. Republicans and Democrats both agreed that that provision should be stricken.

I might remind the Members that when they return to their constituencies, the people out there may question them about a practice that they associate with the Congress, and that we associate with the other body. This is the practice of sending a bill over to the other body.

such as a social security bill, and knowing that bill may very well come back with a new wilderness area attached to it as a nongermane amendment. A point of order then would be raised on this floor and that amendment would be stricken. When that is done I believe we do a better job.

But, Mr. Speaker, I repeat, by attaching this particular amendment to this bill we have made a tacit admission on the part of every Member of this body, to me, at least, that the legislative proc-

ess will not or cannot work.

To those Members who say they would like to vote on that, all they have to do is march up to the desk and sign the discharge petition and you can vote on this issue this moment.

The SPEAKER. The time of the gen-

tleman has expired.

Mr. CONABLE. Mr. Speaker, I yield 1 additional minute to the gentleman from California.

Mr. KETCHUM. Mr. Speaker, I thank the gentleman for yielding me the additional time.

I submit that the FSB bill is a very poor vehicle for dealing with the pay raise. I would be delighted to vote on it separately under its own title.

I think that the conference has done a remarkable job. This is a bill that I have not supported previously, but I think that, recognizing the fact that we do have areas of unemployment that are extraordinary, we do have to find some way to face them, and what we have done is a step in the correct direction.

Mr. Speaker, I urge an aye vote on

the conference report.

Mr. ULLMAN. Mr. Speaker, I yield 1 minute to the gentleman from Texas (Mr. Pickle), a member of the committee.

Mr. PICKLE. Mr. Speaker, the conferees on H.R. 4800, the Federal supplemental benefits extension, have made numerous improvements. First, they have reduced the time of extending FSB from 1 year to 7 months. During the 94th Congress, the Ways and Means Subcommittee on Unemployment Compensation, of which I was a member, recommended, after a lengthy study, that the FSB should cease March 31, 1977. Inevitably, there was a move to extend its life.

Second, the onerous area-by-area trigger program was excised. This creates a real burden on States which must administer it and is also patently unfair to those areas which have high unemployment, but low population.

Third, the conferees have retained a provision calling for those beneficiaries to take "suitable work." This is a must for a program which provides assistance for more than I year. When we get to the point where a person can draw benefits for 52 weeks, or 65 weeks, prior to this legislation, we are straying far from the insurance concept into an assistance program. The National Study Commission must determine when this program, which has worked well since its 1935 inception, ceases being an insurance system and becomes a "relief" system. Although I can realize that the employers

of this country welcome the fact that these additional benefits will be paid from general revenues, I must admit to some reservations about that approach. Overall, however, the conference report is much better and I think it can be supported now.

This extends the FSB program until November 1 with a 3-month phase out through February 1, 1978. This would be for 39 to 52 weeks in those States which have more than 5 percent insured unemployment. The conference also approved a 4-week phaseout for those whose benefits expired March 31, 1977.

The conference report knocked out the trigger provision, retained financing from general revenue, kept provision regarding suitable work, and extended the repayment program for 2 more

years.

Mr. Speaker, I am pleased to see that the conferees did include a provision requiring votes on future House and Senate, and Federal executive pay raises. This should have been done 2 months ago. The gentleman from New York (Mr. Pike) is eminently correct that we have engaged in a charade. But that is a matter behind us, and at least all future pay raises must be voted on. Perhaps we can take some comfort in the fact that the pay raise amendment has brought us together more then any legislation before us.

Mr. ULLMAN. Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. Solarz).

Mr. SOLARZ. Mr. Speaker, I recognize the political and parliamentary problems which were created for the conferees by the Bartlett amendment, but it seems to me that the acceptance of this amendment in the conference report was unfortunate in the sense that even if one accepts it and agrees with the basic principle embodied in the Bartlett amendment, the fact is that that amendment is so technically flawed that it may well create more problems for the House than its sponsors think it will offer.

For one thing, it is questionable whether any amendment by statute can require the House to vote on anything. Despite what the gentleman from Minnesota said a few minutes earlier, the Bartlett amendment does not simply require a vote in the House before a Presidential pay recommendation can become effective; it requires a vote on the President's pay recommendations, period.

Second, the Bartlett amendment does not provide any vehicle on which the House can vote itself. It is not clear whether we are supposed to vote on a resolution of disapproval or resolution of approval, or a bill, or what-have-you.

Third, it does not provide any mechanism for bringing such a vote up on the floor of the House itself. Presumably the President's pay recommendations will be referred to the Committee on Post Office and Civil Service, but that committee may choose not to report the resolution or the resolution of disapproval out, in which case it is not clear how the vote required by the Bartlett amendment will

actually be secured on the floor of the House.

Fourth. It is not even clear according to the Bartlett amendment what we are supposed to vote on. If one literally interpreted the amendment, that would mean with respect to the pay recommendations which we received from the President in January, had the Bartlett amendment been in effect at that time, we would have been rquired to have voted 34 separate times on each of the 34 recommendations contained in the President's proposal.

Lastly, it is not even clear according to the terms of the Bartlett amendment what constitutes a majority. It is not clear for example whether the amendment refers to a majority of the whole House or just a majority of those voting, and in a close vote this could obviously be a very critical distinction.

But most importantly it seems to me the adoption of the Bartlett amendment prematurely deprives the House of an opportunity to deal with this kind of problem in a reasoned and responsible way. As chairman of the subcommittee of the House Post Office and Civil Service Committee, I can tell the Members our subcommittee was planning to consider legislation to deal with precisely this kind of problem as well as with the problem referred to by the distinguished gentleman from New York concerning the question of whether or not pay raises should be deferred to the next session of Congress after the one in which the pay raises were approved, but as a result of the incorporation of the Bartlett amendment in this conference report it will be rather difficult for our committee to bring to bear on this issue the kind of independent and impartial analysis which I think it requires.

Mr. STEIGER. Mr. Speaker, will the gentleman yield?

Mr. SOLARZ. I yield to the gentleman from Wisconsin.

Mr. STEIGER. Mr. Speaker, I am somewhat surprised I must say by the smokescreen of the gentleman from New York. If it were that difficult to understand the Bartlett amendment I might even be willing to say we have found some points to be made. I do not think it is that difficult. I do not think it is that unclear at all. But I am more surprised, frankly, by the unwillingness of the gentleman now to deal with the issue.

Mr. CONABLE. Mr. Speaker, I yield 1 minute to the gentleman from Oklahoma (Mr. EDWARDS).

Mr. EDWARDS of Oklahoma. Mr. Speaker, I rise in support of my colleague in the Senate from Oklahoma, Senator Bartlett, who has done a great service by offering the amendment which has been incorporated in this bill.

I think it is amusing to see the rhetorical gyrations and gymnastics by the gentlemen on the other side who are usually in support of such nongermaneness. If the leadership of this House had

permitted a vote in the first place on the question of the pay raise we would not have to be going through this exercise today.

Mr. ASHBROOK. Mr. Speaker, I would like to express my support for an important addition to the conference report on H.R. 4800. This is an amendment added by the other body which would require both House and Senate approval of all future pay raises for Members of Congress and others under the Quadrennial Commission.

Such a change is desperately needed. Americans watched in disgust as Members of Congress received a \$13,000 salary increase without even having to vote on it. I and a number of my colleagues tried to get a recorded vote on the increase, but were procedurally blocked from doing so.

When this back-door pay raise procedure was first passed, I opposed it and worked to have it defeated. It is about time that Congress did something about this.

The amendment adopted in conference will insure that there will be no more back-door congressional pay raises. Representatives of the people will have to show the people where they stand on future pay increases.

Mr. GRASSLEY. Mr. Speaker, my remarks will be brief and concern only that portion of the conference report to 4800 affecting the operation of Public Law 90-206, also known as the Federal Salary Act. While I am pleased that this language will subject future Quadrennial Commission pay increases to rollcall votes in the House and Senate. I regret that a \$12,900 increase in congressional salaries has already taken place this year without such an af-firmative vote. It would also be preferable for the language added in the Senate; namely, the Bartlett amendment, to be retroactive so as to undo the damage done to the Congress by the February 20, 1977, pay raise. The memory of the American public is not as short as some individuals would like it to be.

Finally, it is my understanding that this conference report only affects Quadrennial Commission salary creases. The mechanism which will permit Members of Congress to receive annual cost-of-living salary hikes remains intact. The provisions of Public Law 94-82 which set up the machinery for such automatic adjustments to our level of compensation must be repealed. I hope that this will be done so that it will not be necessary to raise this issue, which certainly does not add to the stature or public respect for the Congress, each time a legislative branch appropriations bill is brought to the floor of the House.

Mrs. HECKLER. Mr. Speaker, we are voting today on an amendment on the unemployment compensation bill which will insure a recorded vote on the question of congressional pay raises.

The amendment is a bit late, but at least it will guarantee against the type of maneuvering which led to a \$12,900

increase earlier this year without the requirement that we stand up and be counted.

Those procedures denied us the right to vote, and they denied our constituents their right to judge us on the basis

As you know, pending court action brought by one of our distinguished colleagues is aimed at preventing future pay increases without a recorded vote. I have joined other Members of the House in filing an amicus curiae brief, supporting the argument that Congress has a constitutional responsibility to vote on its own pay raises before they become effective.

This amendment, at least, will resolve the issue once and for all. The least we can do is to act ourselves to prevent a repeat of events which could only result in the further erosion of public confidence in government.

Mr. DERWINSKI. Mr. Speaker, the amendment adopted in the other body requiring a separate vote on each category of positions covered by the Quadrennial Commission on Executive, Legislative, and Judicial Pay is, I believe, an imperfect way to resolve the issue of toplevel Government pay with which we are all concerned. In addition to being nongermane to the matter at hand, the Senate amendment was poorly drawn.

The Committee on Post Office and Civil Service is prepared to assess this issue and is ready to go forward with a subcommittee which will bring to the House, in regular order, its recommendations on pay adjustment procedures on executive, congressional, and judicial

I have introduced legislation (H.R. 2037) to repeal the annual cost-of-living salary adjustment for these positions, which I believe is the first logical step toward untangling the dilemma we seem to find ourselves in. I can advise the House I intend to attach this legislation to the first available vehicle, whether it be in committee or on the House floor.

To accept the Senate amendment is to accept an incomplete solution. The Quadrennial proposals will not come up again for 3 years and 10 months. I suggest we give the Post Office and Civil Service Committee, which has jurisdiction and whose members have a fund of knowledge on this subject, the opportunity to work for its will and present a practical and logical proposal to the House.

Mr. CONABLE. Mr. Speaker, I have no further requests for time.

Mr. ULLMAN. Mr. Speaker, I have no further requests for time.

The SPEAKER. Without objection, the previous question is ordered on the conference report.

There was no objection.

The SPEAKER. The question is on the conference report.

Mr. CONABLE. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were-yeas 406, nays 2, not voting 24, as follows:

NOT VOTING-

Rostenkowski Heftel Aspin Smith, Iowa Clay Jeffords Jones, Okla. Staggers Teague Dickinson Krueger Milford Watkins Dicks Moorhead, Pa. Waxman Diggs Wilson, C. H. Young, Fla. Florio Pursell Ford, Mich. Rose

The Clerk announced the following pairs:

Mr. Teague with Mr. Rose.

Mr. Milford with Mr. Charles H. Wilson of California.

Mr. Heftel with Mr. Krueger.

Mr. Florio with Mr. Jones of Okla.

Mr Clay with Mr. Waxman.

Mr. Dent with Mr. Diggs.

Mr. Moorhead of Pennsylvania with Mr. Smith of Iowa.

Mr. Rostenkowski with Mr. Staggers. Mr. Ford of Michigan with Mr. Dicks.

Mr. SYMMS and Mr. PATTERSON of California changed their vote from "nay" to "yea."

So the conference report was agreed

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ULLMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report just agreed to.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

DEBT COLLECTION PRACTICES ACT Mr. MOAKLEY, Mr. Speaker, by direction of the Committee on Rules, I CXXIII-645-Part 9

call up House Resolution 469 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 469

Resolved, That upon the adoption of this resolution it shall be in order to move, clause 2(1)(5)(B) of rule XI to the contrary notwithstanding, that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5294) to amend the Consumer Credit Protection Act to prohibit abusive practices by debt collectors. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Banking, Finance and Urban Affairs, the bill shall be read for amendment under the five-minute rule. At the conclusion of such consideration, the Committee shall rise and report the bill to the House with such amendments as may have been adopted. The previous question shall be considered as ordered on the bill and amendments thereto without intervening motion except one motion to recommit which may include instructions if the House has not previously agreed to an amendment in the nature of a substitute for the bill.

The SPEAKER pro tempore (Mr. Long of Louisiana). The gentleman from Massachusetts (Mr. Moakley) is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, I yield 30 minutes to the gentleman from California (Mr. DEL CLAWSON), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 469 Protection Act to prohibit abuse pracbill (H.R. 5294) to amend the Consumer Protection Act to prohibit abuse practices by debt collectors.

It is a 1 hour open rule. It provides for one purely technical waiver of a point of order under clause 2(1)(5)(B), rule XI. This rule requires the reports of committees to bear on their face, the phrase "Including Congressional Budget Office cost estimate." House Report No. 95-131 contains no such notice but it does contain the Congressional Budget Office cost estimate. And the CBO estimate is that the bill will have no noticeable costs.

Mr. Speaker, under the rules of the House, it would be in order to offer a motion to recommit with instructions if no amendment in the nature of a substitute is adopted. A straight motion to recommit would be in order in any event. While the language in the rule specifically provides that this situation will be observed, it would be the case whether cited in the rule or not.

I do not believe that the rule presents any issues of controversy. Nor, for that matter, is the bill particularly contro-versial. It is quite similar to legislation which was pending in conference at the adjournment sine die of the 94th Congress. It had previously been adopted by overwhelming vote in the House.

The bill would provide standards which would prohibit debt collectors from harassing or intimidating any person in connection with the collection of a debt and from making false or misleading statements. It would regulate other aspects of debt collection, establish reasonable penalties and vest regulatory and enforcement authority in the Federal Trade Commission.

Mr. Speaker, the gentleman from Illinois (Mr. Annunzio) is one of the hardest working and most respected Members of the House. This is an issue on which he has worked tirelessly and I wish to commend him for his efforts and his concern.

Mr. Speaker, this is an excellent bill and the rule provides a fair and orderly procedure for its consideration which meets the concern of protecting the rights of the minority. I urge its adoption.

Mr. DEL CLAWSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 469 provides an open rule with 1 hour of general debate for the consideration of H.R. 5294, the Debt Collection Practices Act of 1977, which would prohibit abusive practices by debt collectors. The rule waives points of order lying against the bill for failure to comply with clause 2(1)(5)(B) or rule XI. This clause requires that the cover of the report contain a statement that the Congressional Budget Office cost estimate is in the report. The cost estimate is in the report but the cover statement was omitted. In addition, the rule provides for one motion to recommit which may include instructions if the House has not previously agreed to an amendment in the nature of a substitute for the bill. Since this language has never previously appeared in a rule, an explanation of its significance is in order.

Mr. Speaker, the motion to recommit with or without instructions" has been the subject of several debates within the Rules Committee since this session of Congress began. The recommit motion is important and therefore, should not be treated lightly. Historically the motion to recommit is included in rules to provide one last chance to be heard for those who may be opposed to a bill. Under a rule providing for a motion to recommit which does not include the language "with or without instructions," a straight motion to recommit may be offered, or a motion to recommit with instructions to amend a part of the bill not previously amended. However, a motion to recommit with instructions to only amend a part of the bill, which has already been amended, may not be offered. Herein lies the importance of those four little words "with or without instructions," since in a situation where an amendment in the nature of a substitute has been adopted, for example, a motion to recommit could not include any instructions to amend. In order to avoid this problem, the rule can provide, and has provided in the recent past, for a motion to recommit with or without instructions. This language insures that a motion to recommit can include instructions in all situations.

During the latter part of the 94th Congress, the language-with or without instructions—was routinely included in rules reported from the Rules Committee. A discussion on just this topic occurred in a Rules Committee meeting last week and a provision was offered by

Mr. Meens that was unique. This provision would allow recommittal with or without instructions, but only if an amendment in the nature of a substitute has not been previously agreed to by the House. If an amendment is adopted to title II, for example, this new language would allow a motion for recommittal with the instruction to amend that same portion of title II. However, this language would not allow a motion to recommit with instructions to amend if the adopted amendment was an amendment in the nature of a substitute.

Mr. Speaker, I realize this rule is complex and I felt that it should be fully

explained

Mr. MOAKLEY. Mr. Speaker, I move the previous question on the resolution. The previous question was ordered

The SPEAKER pro tempore. question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

WYLE. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were-yeas 347, nays 44, not voting 41, as follows:

Mr. Jones of Oklahoma with Mr. Rose.

Mrs. Keys with Mr. Diggs. Mr. Clay with Mr. Bonker.

Mr. TREEN changed his vote from "yea" to "nay."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the

Mr. ANNUNZIO. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5294) to amend the Consumer Credit Protection Act to prohibit abuse practices by debt collectors.

The SPEAKER pro tempore (Mr. MEEDS). The question is on the motion offered by the gentleman from Illinois.

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 5294, with Mr. Long of Louisiana in the chair.

The Clerk read the title of the bill By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Illinois (Mr. Annunzio) will be recognized for 30 minutes, and the gentleman from Ohio (Mr. WYLIE) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Illinois (Mr. Annunzio).

Mr. ANNUNZIO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I appreciate this opportunity to explain the contents and purpose of H.R. 5924, the Debt Collection Practices Act. This legislation will prohibit debt collectors from harassing or intimidating anyone, as well as from making false or misleading representations. Reasonable limits are placed on communication with a consumer generally, at work and with third parties such as a consumer's employer.

The House Banking, Finance and Urban Affairs Committee reported this legislation out by a strong margin of 35 to 8 and its Subcommittee on Consumer Affairs reported out this legislation unanimously. All 10 members of the subcommittee are cosponsoring the bill.

NEED FOR DEBT COLLECTION LEGISLATION

This legislation will have a profound effect on consumers throughout this country. Last year alone, according to testimony by the American Collectors Association, \$3.9 billion in debts were turned over to ACA members for collection. For far too long, unethical debt collectors have used harassment, abusive and deceptive tactics to collect money from consumers.

Frequently consumers are sent phony legal documents, are harassed by threats of contact with their employer or false threats of legal action. They are harassed by phone at home and at work. If these tactics do not work, threats of bodily harm or death are sometimes made.

It is not just the individual who owes a valid debt that is subjected to this outrageous treatment. Others such as persons who are contacted because of mistaken identity or because of mistaken identity or because of mistaken facts, as well as their friends, relatives, and neighbors—all are subject to the tactics of the disreputable debt collector.

This bill is needed because at present there is no effective regulation of debt collectors. State laws do not and cannot regulate interstate debt collection practices. Thirteen States have no debt collection laws at all and altogether 24 States—with a population of over 80 million—have either no law or toothless laws. Of the 38 State debt collection laws, only eight are strong laws. These statistics clearly show that it is weak laws, not lax enforcement of the laws, which gives rise to so much collection abuse.

At the present time there is no Federal debt collection law. There are several Federal laws that can be construed to relate to debt collection practices, but they were not written with debt collection abuse in mind and have not been successful in stopping debt collection abuse. For instance, Postal Service statutes were enacted to stop activities such as mail fraud or extortion, rather than unethical debt collection practices. These statutes frequently require specific intent which is difficult to prove. The Federal Communications Commission Act's provision against phone harassment also has a specific intent requirement making it difficult to enforce. None of these Federal statutes give consumers the important right to stop collection abuses by private suit. In the debt collection area, the Federal Trade Commission has only a set of debt collection guidelines

The goal of this legislation is to stop unethical debt collectors from using abusive tactics. In essence, what this means is that every individual, whether or not he owes a debt, has the right to be treated in a reasonable and civil manner. This bill is not meant to allow people to avoid paying legitimate debts, nor will it have that result. While this legislation will protect consumers, it will not put any unnecessary burdens on reputable debt collectors.

I want to make a special point: No Federal agency will write regulations for this legislation.

DEBT COLLECTION INDUSTRY SUPPORT FOR BILL

The subcommittee has met with representatives of the two national trade associations, the Associated Credit Bureaus, Inc., and the American Collectors Association, and both trade associations now support H.R. 5294 and want no further amendments. I would like to read

to you the letters these trade associations sent to the committee in support of H.R. 29—the bill number before a clean bill was introduced:

ASSOCIATED CREDIT BUREAUS, INC.,
Houston, Tex., March 18, 1977.

Hon. FRANK ANNUNZIO,

Chairman, Subcommittee on Consumer Affairs, House Committee on Banking, Finance and Urban Affairs, Rayburn House Office Building, Washington, D.C.

DEAR CHARMAN ANNUNZIO: Enclosed are copies of individual letters we have delivered to each member of the Subcommittee on Consumer Affairs urging them to approve H.R. 29 as a result of the changes you have made in the bill.

On behalf of the members of Associated Credit Bureaus I thank you for the leadership you have exhibited to resolve significant industry concerns without diluting the effectiveness of the legislation. Particular tribute should be paid to the time and careful consideration given to this legislation and to industry representatives by the Subcommittee Staff Director Curt Prins and his staff. It has been a pleasure working with you and your staff, and I personally appreciate all the courtesies you have extended to the members of ACB and its staff.

Best personal regards.

Sincerely,

JOHN L SPAFFORD, President, Associated Credit Bureaus.

AMERICAN COLLECTORS
ASSOCIATION, INC.,
Minneapolis, Minn., March 18, 1977.
Hon. Frank Annunzio,

Chairman, Subcommittee on Consumer Affairs, Committee on Banking and Currency and Urban Affairs, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: The purpose of this letter is to advise you that the American Collectors Association, Inc., supports H.R. 29, the debt collection practices act, which is presently pending before your Subcommittee.

As you know, the Association initially had several major problems with the bill as originally introduced (H.R. 29), however, through your good and reasonable efforts, and those of your Subcommittee counsel, we feel the legislation has been rewritten so as to be as fair as possible under all of the circumstances, and we will seek no further amendments.

The Association would like to thank you for your personal attention to our problems, and we hope to be able to work with you again in the future toward our mutual goal of an equitable and workable debt collection system.

Thank you again. Sincerely,

HYE H. HOLLAND,

President.
MICHAEL M. GOLDBERG,
First Vice President.
JOHN W. JOHNSON,
Executive Vice President.

Mr. Chairman, debt collection can be done successfully in a reasonable and honest manner. That is why the debt collection industry supports this bill. There are, however, some members of the industry who oppose this bill—there will always be opposition from the unethical element in the industry.

SUBCOMMITTEE MEMBERS' CONTRIBUTIONS

Mr. Chairman, a great deal of the credit for this legislation goes to the members of the Consumer Affairs Subcommittee who worked long and hard to bring this bill to the floor. The members of the subcommittee are: Gladys Noon Spellman, Bruce F. Vento, Clifford Allen, Fernand J. St Germain, Joseph G. Minish, Walter E. Fauntroy, Chalmers P. Wylie, Millicent Fenwick, and Thomas B. Evans, Jr.

I want to pay special tribute to the ranking minority member, the gentleman from Ohio, Mr. WYLIE, for the cooperation and hard work he has put forth on this bill. He has offered a number of excellent suggestions which have improved the bill and as always he has made my job as chairman a much easier one. I also want to pay special tribute to the gentlelady from New Jersey, Mrs. FENWICK, and the gentlelady from Maryland, Mrs. Spellman, who were among the guiding forces in bringing this legislation before the House. Mrs. Fenwick was one of the first to suggest the introduction of the legislation and during the hearings we constantly called upon her expertise as the former Consumer Affairs Director for the State of New Jersey. I remember the very first meeting of the subcommittee when Mrs. Fenwick stressed the need for a bill such as we are dealing with here today. At that time, it was only in the idea stage. But today that idea has developed into a piece of legislation in which every Member of this House can take pride.

CONTENTS OF THE LEGISLATION

This legislation specifically prohibits, among other things, falsely representing oneself as an attorney, making harassing or threatening telephone calls or visits to anyone, publishing "deadbeat" lists, impersonating an attorney or a law enforcement officer, threatening to take any action that cannot legally be taken or that is not intended to be taken, falsely threatening that failure to repay a debt will result in the arrest or imprisonment of any consumer and misusing postdated checks.

To protect consumers and related third parties from harassment, the bill regulates skiptracing activities used by debt collectors to locate consumers.

The provisions on communication in connection with the collection of a debt are some of the most important in this legislation. Communications, especially those by telephone, frequently are used to harass or intimidate a consumer.

Consequently, these provisions place reasonable limits on a debt collector's communication with a consumer in general, at work, and with third parties such as the consumer's employer. However, the bill does permit skiptracing and debt collecting by personal visit.

Communication with a consumer at work or with his employer, may work a tremendous hardship for a consumer because such contact can embarrass a consumer and can result in the consumer losing a deserved promotion or even his or her job. Such contact should only be made with great care. However, I want to make it clear that the bill does permit some communication with a consumer at work and it does permit communication with a consumer semployer

if the consumer consents, if a court orders it, or after judgment.

This legislation places no paperwork or bureaucratic burdens on debt collectors whether or not they are small businessmen. For instance, the legislation does not require registration or licensing, and there are no recordkeeping requirements. The notice to the consumer required by the validation section can be met by merely rubber-stamping the four items of information on the back of the initial debt collection notice and writing in the amount owed and the name of the creditor. The bill does not specify where this information is to be located on a collection notice or the size of the print, or any other characteristic. Consequently, no new forms should be necessary.

The Federal Trade Commission will be responsible for enforcement of this legislation. However, as I said earlier, no regulations will be issued. The bill provides for civil and criminal penalties consistent with those in the Consumer Credit Protection Act. Some opponents of this legislation have claimed that this bill would prevent a State with a strong debt collection law from regulating debt collection practices within the State. That is simply not true. The few States that have strong laws may prefer to enforce this legislation on a State level. Section 817, exemption for State regulation, provides for that. Then the provisions of the exempted State law would constitute the provisions of the Federal law for the purpose of sections 812 and 813, except to the extent that the State law contained provisions with requirements not imposed by this legislation.

SCOPE OF THE LEGISLATION

There are two areas of controversy with respect to this bill. First, whether the bill's coverage should be extended to cover credit grantors collecting their own debts.

Legislation almost invariably involves some form of classification in which a law affects some persons, and not others. And, in this case, there are good reasons for limiting the scope of the legislation to independent debt collectors. Only two-thirds of the States that do have debt collection laws do not cover creditors. Independent debt collectors compose an industry separate from creditors. Debt collectors' business is the collection of debts. Unlike creditors, they do not sell any product or service to consumers. Debt collectors do not actually compete with creditors because creditors first attempt to collect their own 30-day overdue accounts. On the other hand, according to industry testimony, debt collectors usually work on accounts that are at least 6 months overdue. Accounts are generally turned over to collection agencies only after a creditor has tried and been unsuccessful in collecting on his own. Therefore, these accounts are usually difficult to collect and are more likely to result in the use of harsh collection tactics.

Also, a company which is not in the debt collection business will be concerned

with maintaining the goodwill of its customers and, therefore, is less likely to chance angering them by employing harassing collection techniques. Creditors, unlike debt collectors, are usually larger and more stable. Therefore, if a Federal agency, such as the Federal Trade Commission, takes action against a major creditor, it usually has a deterrent effect throughout the entire industry. This is not the case with the debt collection industry.

EXEMPTION FOR STATE REGULATION

The second area of controversy is exemption of State regulation. Concern has been voiced by opponents of this bill that the passing of Federal legislation in the debt collection area might infringe on States' rights. This is not a real issue because, although 38 States have some law relating to debt collection practices, only 8 have truly strong laws to protect consumers. However, this matter has been considered and steps have been taken to minimize any such infringement. For example, under section 816. relation to State laws, the laws of any State with respect to debt collecting practices will not be preempted except to the extent that those laws are inconsistent with any provision of this bill.

In addition, section 817 provides for exemption for State regulation. If a State has a debt collection law with requirements substantially similar to those imposed by this bill, and there is adequate provision for enforcement, an exemption would be granted. There is no intent to preclude legislative experimentation by the States in the area of debt collection practices. Any State wishing to so experiment in passing strong legislation in this area will have a free hand to do so and may apply for exemption under section 817.

Congress is on firm constitutional ground when it, as is done in this bill in the definition of "debt collector," makes the provisions of a law apply to those who use an instrumentality of interstate commerce in connection with the activity being regulated. Those who argue that this bill would infringe on States' rights ignore decades of constitutional history as well as the recent history of the Consumer Credit Protection Act, which this bill amends. For instance, truth in lending, which is a part of the Consumer Credit Protection Act, applies to all creditors as defined in that act—whether or not they use any "instrumentality of interstate commerce." The same holds true for creditors with regard to the Equal Credit Opportunity Act.-All creditors are prohibited from discriminating in the granting of credit—not just those creditors who use an "instrumentality of interstate commerce."

In Perez v. United States, (402 U.S. 146), a 1971 Supreme Court case concerning the loan-sharking prohibition of the Consumer Credit Protection Act, the Supreme Court upheld the statute and found that even though individual loan-sharking activities may be intrastate in nature, still it was within the power of Congress to determine that loan sharking was within a class of activities which

did affect interstate commerce, thus affording Congress power to regulate the entire class. So, in terms of Congress constitutional powers, we are being conservative today when we include in the definition of debt collector the words "and who uses any instrumentality of interstate commerce in connection with such collections."

For the record, I would like to point out that the very nature of the debt collection industry makes it doubtful that there are any collectors whose business does not affect interstate commerce. The ever-increasing geographical mobility of the citizens of our country results in the forwarding of accounts for collection from debt collectors in one State to debt collectors in other States. The advent of WATS telephone lines has made it economically feasible for debt collectors to operate by telephone on a nationwide basis. With an economy that spans the continent, a debt collector in one State frequently ends up collecting an account of a creditor located in a second State from a consumer who lives in a third State.

EFFECT ON CREDIT

Opponents of this legislation assert that prohibiting harsh debt collection tactics will mean that fewer debts will be collected and this will increase the cost of consumer credit. Debt collectors claim only a small minority of their industry engage in the prohibited, unethical practices. If this is true, the bill should have little, if any, effect on the amount of bad debts collected.

However, if the result is that fewer bad debts will be collected because abusive tactics cannot be used, the response to this should be to grant credit more carefully in the first place, not to permit abusive tactics. Credit grantors have to share the responsibility for the large amount of uncollectable debts when they grant credit carelessly to people who are not creditworthy.

COMMUNICATIONS

The bill's limits on communication are quite reasonable and strike a fair balance between the debt collector's need to contact and the consumer's right to privacy and right to be free from harassment. Contact with the consumer generally is limited only to two actual contacts a week in which the consumer states his present intentions as to repayment. In other words, a letter or a message left by phone would not count toward this limit.

At work, contact may be made up to three times each month. However, if the consumer or the consumer's spouse informs the collector that he or she does not want to be contacted at work and the collector has another number where the consumer can be reached during the day, then the collector may not communicate with the consumer or spouse at his or her place of employment.

In permitting contact at work, one cannot ignore that such contact may have many harmful results for the consumer being contacted. Many employees are not allowed to get any calls at work. The calls can cause a consumer to be de-

nied a promotion or lose his or her job. Also, the contact can result in the consumer's coworkers and employer learning that the consumer owes an unpaid debt whether or not the debt is valid. Consequently, contact at work should only be made when absolutely necessary, not on an automatic basis. The communication section now provides for reasonable contact at work.

Unethical debt collectors would like to be able to call a consumer's employer all the time. This certainly would result in harm to the consumer and his family. Balancing a debt collector's desire to contact a consumer's employer against the harm that such contact can cause, the bill permits contacting an employer with the prior consent of the consumer, by express court permission, or after a final judgment.

It is simply not an employer's responsibility to collect debts for debt collectors. The subcommittee has yet to receive one letter from an employer requesting that debt collectors be able to contact him. However, we have received many letters from employers requesting that debt collectors not contact them. And in testimony before the subcommittee this year, one of the witnesses, a personnel staffing and employee relations specialist with the Interstate Commerce Commission, Mr. Robert E. Dietrich, stated that

Without some uniform law or amendment, harassment of people in the private and public sector will continue unchecked, resulting in the disruption of the individual's efficiency and performance on the job, the loss of reputation, or most importantly, the loss of his ability to earn a living.

There is no basis for contacting the consumer's employer prior to final judgment, unless the consumer gives prior consent or a court expressly permits it. If a consumer wants his employer's help, such as a debt counseling service, he can arrange for it himself.

If a consumer loses his job, he is in a worse position to pay the debt. Contact with an employer may intimidate a consumer into paying a debt he doesn't even owe. Prior to final judgment, the damage an employer contact could do to a consumer far outweighs any benefit from such contact. The bill's present limits on communication allow reasonable opportunity for contact with the consumer.

TESTIMONY ON CONSUMER HARASSMENT

I would like to quote to you from the testimony given before the Subcommittee on Consumer Affairs last month by Mrs. Sherry Chenoweth, the director of the Minnesota Office of Consumer Services. In her statement she provided the following examples of the types of harsh practices used by unethical debt collectors, which vividly reflect the need for this legislation:

In November 1976 the operator of a riding stable in Northfield, Minn., wrote my office complaining about the methods used by a collection agency. The complainant said that a debt collector ignored his requests to communicate in writing with his partner, who was the subject of the debt, and continued to telephone: "... up to 40 times a day, ringing back as soon as we hung up . . . After about a week of this, we complained to the telephone company, and after a few days the calls were reduced to about three or four a day.

"The constant and pointless telephone calls caused us considerable worry and anxiety, not only because the collector was rude and insulting, but also because our business phone was virtually put out of commission. We know of two cases in which our students could not get to us to report emergencies . . . We know of one instance in which a prospective student did not give up, but finally reached us after trying to get through for 2 weeks . . .

consumer in Minneapolis wrote complaining about a Missouri collection agency. She said a debt collector from that firm: "has been calling me, harassing, threatening to sue me, screaming, calling at work, on Saturday mornings at 8 o'clock, Saturday evenings at 9 o'clock-in other words, making my life miserable. I am a woman in my sixties, have high blood pressure and heart trouble, and I just can't take anymore . .

A consumer in Apple Valley, Minn., wrote that this same Missouri collection agency was also harassing her. She said: "an employee from this company has contacted my father many times prior to and following hospitalization for a heart attack, threatening to have him arrested for 'harboring a fugitive' when he would not give out my phone number. This person, identified as 'J. Kent' continued this type of threat and harassment until my father threatened legal action against the company.

"On or about August 15, 1976, this J. Kent contacted at least two neighbors in our apartment building, one being the resident manager, misrepresenting and lying and using similar tactics of threats and harassment with these neighbors. I am currently months pregnant and my health can't take the strain of his phone calls and threats."

A consumer in St. Paul, Minn., complained about the collection tactics of a Chicago collection agency. He said that a debt collector from that firm contacted him regarding an overdue Shell Oil bill. He demanded payment "I then told him I was sorry in full but: but I couldn't send the money in full. He told me they would not accept payments . he became belligerent and said he would have his check soon because he would call my wife constantly every day and my employment every hour on the hour every day until I was fired.

"Since that date, he has called my wife many, many times, refusing to hang up the receiver, thereby making our phone unusable. And without ever trying to hold a conversation that made any sense, but instead just yelling profanity and demanding payment. My wife has a heart condition so after so much harassment, one of our sons would answer the phone. He would tell that he was a Mr. Scott and had an urgent message for my wife. Then when she answered, he would laugh and start hurling insults and profanity and demands again. He has called my place of employment at least once a day for the past several weeks. We were also told that every long-distance call he made was to be added to what we owe Shell."

LEGISLATION: PROTECTS CONSUMERS AND IS FAIR TO DEBT COLLECTORS

The practices illustrated by the above comments are unethical and must be stopped. This legislation would stop unethical debt collectors from using these practices and establish standards of ethical conduct for all debt collectors.

Passage of the Debt Collection Practices Act is important if consumers throughout this country are to be protected from the mental anguish, and intimidation that are the consequences of abusive debt collection practices.

Mr. Chairman, before concluding, let me commend the Associated Credit Bureaus for the statesmen-like role that their organization played in bringing about a meaningful Debt Collection Practices Act. The president of that organization, John Spafford, worked long and hard with the subcommittee, and although he does represent a trade association, Mr. Spafford offered a number of suggestions which will greatly benefit the consumer. I commend the Association Credit Bureaus for their approach to this legislation and for their assistance rather than their resistance in coming up with a good bill.

The subcommittee has worked long and hard to insure this bill protects consumers and remains fair to reputable debt collectors. I believe the Debt Collection Practices Act accomplishes these two objectives. I strongly urge you to vote for this important consumer protection legislation.

Mr. WYLIE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of this bill and to commend it to my colleagues as a good bill on the subject of debt collection practices. Initially I would like to commend the gentleman from Illinois (Mr. Annunzio), the chairman of the Subcommittee on Consumer Affairs for his fairness, his openmindedness to compromise, and for his hard work in fashioning a bill that I really believe places reasonable limitations on certain tactics practiced by unscrupulous debt collectors and which are never used by ethical debt collectors.

I might add, Mr. Chairman, that I was not an early supporter of the concept of a Federal debt collection practices act and I did not cosponsor H.R. 29 when it was introduced. However, during the hearings in the 94th Congress and early on in this session of the Congress we did find that there were certain harassing and intimidating practices being used to collect debts by people who were not ethical debt collectors and who did not do the name of the ethical debt collectors any good.

This bill is similar to a bill which passed this House last year but did not get through the Senate because it was passed in the waning days of the 94th Congress. I think it is fair to say this is a much better bill. We have had some time to think it over. We have talked to people with the Associated Credit Bureaus and the American Collectors Association. Working with them and with the chairman of the subcommittee, the gentleman from Illinois (Mr. Annunzio), we have come up with a bill which I think is a fair compromise between the consumer group advocates who wanted a stronger bill and between some independent collectors who wanted no bill at all.

Both the Associated Credit Bureaus, through their officers and their board of directors, and the American Collectors Association through theirs, have endorsed this bill in writing. I have their letters with me today to that effect, similar to letters which the chairman of the subcommittee, the gentleman from Illinois (Mr. Annunzio), also received.

Mr. Chairman, I think it is a legitimate question to ask: Why should the Federal Government be involved in this at all? Why is this a business of the Federal Government especially in this year when we are talking about too many Federal laws, too many Federal regulations, and too many Federal rules.

I believe the reason is for standardization and uniformity of conduct in this area, if nothing else. Thirty-seven States have laws. Some laws are very restrictive. Some laws represent only a code of ethics, so to speak, without any civil or criminal sanctions. Other laws are mere statements of ethics as far as debt collectors in that State are concerned

So from the standpoint of uniformity and from the standpoint of a standard of professional conduct on the part of the debt collectors I think this legisla-

tion is important.

The Associated Credit Bureaus and the American Collectors Association have both endorsed this bill, as I say, because they think it will enhance their professionalism, if you please, that it will provide a standard of conduct which they can live and with which they have been living. As a matter of fact, this bill is basically the code of ethics of those two national associations. They have been living with it for a long time. Their members are embarrassed by the fact that certain people in the debt collecting business who are not necessarily members of these associations, have done some things which did not reflect credit on the independent debt collectors by using harassing tactics which make their business seem unsavory whereas it is a perfectly honorable profession. There is another reason why I think that this is important legislation in this area, and that is the fact that it imposes sanctions against debt collectors who operate in interstate commerce. Most of the abuses which we found occurred in the mail order book houses, in the record clubs and the magazine subscription outfits. I might say I have had a personal experience in this area of magazine subscriptions where a salesman comes to the door, the magazines just keep coming and coming and coming, and then one day the bill is turned over to a debt collector for collection.

We had representatives from various States such as California, Minnesota, Wisconsin, Oklahoma, and New Jersey come before our committee and say, " have a debt collection practices act in our State, but Mr. Congressman,"-and Mrs. Congresswoman (Mrs. Fenwick is on the committee and so is Mrs. Spell-MAN) - "we cannot do what we need to do because many of the acts which occur, occur in interstate commerce, and there is some question about whether our legislature can pass a bill which will allow us to pursue these people into interstate commerce. We would like to have a bill like this which can help us enforce the prohibitions against bad debt col-

So I say to the Members in all honesty

that I think this bill is a happy compromise between the concept of privacy, the right to be left alone, and the sanctity of contracts wherein the subsequent failure to pay a just debt becomes a problem to somebody who has sold a piece of goods to someone else and they refuse to pay.

I think there is a significant precedent in this bill, and I call this to the Members' attention. I am very proud of it because this is an amendment I insisted on in the 94th Congress and it is in this bill again. This bill provides that the Federal Trade Commission has no rulemaking power, no regulatory authority, so there will not be a shelf full of regulations promulgated by the Federal Trade Commission to enforce the law. The law is within the four corners of this bill now before the Members, and if there is not a sanction found therein, the Federal Trade Commission has to come back to this Congress to find out what they are supposed to do in the case of a practice which they find or think should be declared to be an unethical or unlawful practice. In other words, Congress is the final authority.

There is another amendment in here which I think will make the bill enforceable and eliminate harassing practices on the part of deadbeats. For example, a deadbeat cannot under this bill bring a class action like he can in some cases and require the person on the other side of that action to sustain the burden of proof to prove that he has complied with the law. In other words, in this case if a person who has avoided a debt and is being pursued by a legitimate independent debt collector thinks that his rights have been violated under this law, or that some criminal act has been committed, then that person must sustain the burden of proof and in the case of a crime, proof by a preponderance of the evidence is necessary.

So I recommend these two provisions to the Members. As I say, it is, I think, a reasonable bill. It is a fair compromise.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Kentucky.

Mr. SNYDER. I thank the gentleman for yielding.

Under "definitions" it says:

(f) The term "debt collectors" means any person who engages in any business principal purpose of which is the collection of any debt, or any person who directly or indirectly collects or attempts to collect a debt owed or due or asserted to be owed or due another, and who uses any instrumentality of interstate commerce in connection with such collections.

What about a small family corporation where one of the principals of the corporation is trying to collect the bill for that small corporation, which is another separate legal entity from the individual? It seems to me he would fall within that definition. I doubt if that was the intention of the committee.

Mr. WYLIE. He is in the practice of collecting a debt. If he makes a living that way, he is included; if he does not

make his living that way, he is not included.

Mr. SNYDER. No. It is:

. any person . . . who directly or indirectly collects or attempts to collect a debt owed or due or asserted to be owed or due

The gentleman and I are in business. We have a little group, a separate legal entity from either of us. Under the definition if the gentleman or I were calling about that corporation's debts, it would be covered, but I doubt that that is what the gentleman intended to do.

Mr. WYLIE. Using an interstate in-

strumentality.

Mr. SNYDER. Yes, by telephone or mail. I am fearful we have a separate legal entity the way that definition is drawn if we are incorporated.

Mr. WYLIE. I do not think so. We must have a reasonable interpretation of the bill and I do not think, if a person is collecting on behalf of the family, that he is an independent debt collector. I think he becomes an in-house debt collector in that case.

Mr. EVANS of Delaware. Mr. Chair-

man, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman

from Delaware.

Mr. EVANS of Delaware. Mr. Chairman, we have to have a reasonable interpretation and I think this is a debt collection agency whose sole business is in the collection of debt as applied to others.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Kentucky.

Mr. SNYDER. Mr. Chairman, I felt that is what the gentleman intended to do but I think it goes beyond that. Mr. EVANS of Delaware. That is what

we intended to do.

Mr. WYLIE. We are making a legislative history and I can say to the gentleman that is not what we intended to do, to cover the situation mentioned. This bill is supposed to cover an independent debt collector who collects directly or indirectly from another and who uses an instrumentality of interstate commerce. If he collects as a part of the family business it seems to me that makes him an in-house debt collector.

Mr. TAYLOR. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Missouri.

Mr. TAYLOR. Mr. Chairman, even though it was not generally held I would have some concern about someone who works for this corporation, or at least part or maybe all of his duties were those of collecting bills, and he would not be covered by the provisions of the law. I think this would be very unfair to the small business. I think I understand what the committee had in mind. This is a little troublesome, but we are making a corporation which has an employee working for it and collecting debts-we are saying it will not be covered by this

Mr. WYLIE. That is precisely it. If a

person is working for wages or drawing a salary from a corporation to collect debts for that company he is in fact an in-house collector and this bill does not

apply to him.
Mr. TAYLOR. Mr. Chairman, if the gentleman will yield further, in the event a retailer discounts paper to a bank, or an appliance dealer who takes a note, and they have in most States a universal code, and if the discounter sells the paper and discounts it in turn to the bank, it is the custom for the bank to engage in the collection of that account. Would that be covered under this?

Mr. WYLIE. That would not be. The bill does not cover the banking business. If the bank turns the bill over to another person to collect the debt for a fee and that person earns his livelihood collecting debts, he would be covered, but the

bank would not be.

Mr. TAYLOR. If the bank went out to collect a bill on behalf of the retailer who had discounted it to them, the bank would not be covered?

Mr. WYLIE. The banks would not.

Mr. TAYLOR. In the interest of making a little legislative history. I would ask the gentleman from Illinois, is the gentleman from Ohio (Mr. WYLIE) correct?

Mr. ANNUNZIO. Mr. Chairman, if the gentleman will yield, the gentleman from Ohio (Mr. Wylie) is correct. The banks are not considered part of the collection industry. It applies where we have the separate creditor and debt collector. The bank acting in that capacity would not be a debt collector.

Mr. WIGGINS. Mr. Chairman, will the

gentleman yield?

Mr. WYLIE. I yield to the gentleman

from California.

Mr. WIGGINS, Mr. Chairman, I have listened to this colloquy and I hope it clarifies a patent error in the bill. What we have been told is not something with which the bill would agree. Obviously when we get to conference perhaps there could be change from "or" to "and"

Mr. ANNUNZIO. I thank the gentle-

man very much.

Mr. WIGGINS. I have the conference report and not the bill in front of me. The bank would appear to be a debt collector in that it tends to collect a debt owed or due or asserted to be owed or due another. It is exactly the kind of hypothetical case stated and the gentleman said it was not covered. I say it is covered by the bill and I hope we can uncover it by changing "or" to "and".

Mr. CHAPPELL. Mr. Chairman, will

the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Florida

Mr. CHAPPELL. Is there anything in the bill against a bank collecting?

Mr. WYLIE. No. sir.

Mr. CHAPPELL. Would they be prohibited from the same actions? I am concerned about the device which might be used which would take the bill that is owed from the first owner into a collection agency which then becomes a bona fide owner. How do we address that?

Mr. WYLIE. I would say if he becomes

a bona fide owner of a debt and his primary business is "not" debt collecting then he is not covered by the bill. He is not an independent debt collector.

I think that the fact that the American Collector's Association and the Associated Credit Bureaus have endorsed this bill as being a bill with a valid purpose has persuaded me. I hope it will persuade my colleagues in the House to support the bill. I do recommend it as an excellent piece of legislation.

Mr. HALL. Mr. Chairman, will the gentleman yield?

Mr. WYLIE, I yield to the gentleman from Texas.

Mr. HALL, Mr. Chairman, with reference to the bill, page 10, section (4), line 5, this is a technical matter. I do not follow the reading of paragraph 4 that follows the words "false representation has nonpayment". Is there something lacking in that particular sentence?

Mr. ANNUNZIO. Mr. Chairman, will

the gentleman yield?

Mr. WYLIE. I yield to the gentleman

from Illinois.

Mr. ANNUNZIO. Mr. Chairman, that is a printing mistake that we were going to correct. After "false representation", it should be "that nonpayment of any debt".

Mr. WYLIE. Apparently it was a typographical error in the reprinting of the

Mr. HALL. Mr. Chairman, if the gentleman will yield further, one additional question. I notice here in the bill that there is a 2-year statute of limitations as to when a procedure may be brought to enforce the provisions of this bill. On page 17, line 11, at section (d) with reference to the amount in controversy, that suit can be brought in any U.S. district court, et cetera, within 2 years from the date of occurrence. I notice further in the bill that the Federal Trade Commission may take jurisdiction or take notice of these matters if a State does not have laws which the Federal Trade Commission perceives to be adequate for the occasion. Is that a correct statement?

Mr. WYLIE. That is correct.

Mr. HALL. Mr. Chairman, if the gentleman will yield further, in my State of Texas, having a 2-year statute of limitation after which suit may not be brought for the collection of an account such as we are talking about here, now, at what stage does the Federal Trade Commission enter into this picture, say on an isolated case where we have a collection that is attempted to be made and then it goes to the Federal Trade Commission for some clarification as to whether or not a State law might be applicable. Is it a fair statement to say, as I perceive it, that a period of 2 years could come and go before the Federal Trade Commission made its decision, and at that time the debt would be uncollectible in my State: has any provision been made to take care of that situation?

Mr. WYLIE. I am not sure if I understand the gentleman's hypothetical situation; but it is contemplated the 2-year statute of limitations will start to run as soon as an attempt is made to collect the debt.

Now, in the gentleman's case if the statute of limitations for the State law and the Federal statute is the same, then, of course, they would run concurrently. In some cases the State statute of limitations might be longer, I do not know about that, in which case an aggrieved party could file under the State law even after the Federal statute of limitations had expired. But once an action is filed with the Federal Trade Commission or the Federal Trade Commission enters the picture, then I would suppose the running of the statute is tolled.

Mr. HALL. It would be tolled as far as the Federal Government, but it would not be tolled as far as the State statute of limitations is concerned.

Mr. WYLIE. That would be accurate,

Mr. HALL. Is it not possible that the limitation in a State could terminate any action that could be brought in that State before the time that the Federal Trade Commission took any action such as this?

Mr. WYLIE, I would think the instances of that happening would be very minimal at best and certainly would represent a remote possibility. The situation would be no different in this case, where we have Federal statutes and State laws on the same subject. You pick your forum, pick a State court, and the State law prevails. If you pick a Federal forum, then the Federal law prevails.

Mr. EVANS of Delaware, Mr. Chair-

man, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Delaware.

Mr. EVANS of Delaware. Mr. Chairman, I would like to say in relation to the practices in the Federal department. on page 17, section (f) it says:

A consumer may not take any action to offset any amount for which a debt collector is potentially liable to such consumer under subsection (a) (2).

We are not talking about limitations other than limitations in the manner in which the debt is collected.

Mr. WYLIE. I thank the gentleman for his contribution, but I think the point the gentleman (Mr. HALL) is trying to make is that a person might be persuaded not to do anything at the State level because he thinks the Federal Trade Commission might intervene on his behalf in a Federal court, and after the 2-year period of the statute of limitations which started with the original contact by the debt collector, the Federal Trade Commission advises the debtor that the debt collector has not done anything which would be a criminal or civil offense, and that he has acted fairly; whereas the debtor or the consumer might think otherwise, and he would want to pursue the State remedy.

But, this is not unusual. It is a matter of picking a forum, and I think it is really better this way, that one cannot pick one forum, and if one loses there, he is able to go back and pick another forum later on.

Mr. HALL. Does the gentleman not agree that at that particular point it very likely would be that the cause of action would be barred in the State of Texas because of the passing of the 2-year statute of limitations?

Mr. WYLIE. I think that is possibly true. A person might be persuaded that he has a good cause of action as far as the Federal statute is concerned, and would not pursue his State remedy. But, I would say that if there is that much doubt about the proper course of action in the first instance, that is not the sort

of thing we are trying to correct against.

We are trying to correct against the obvious cases of the use of harassment tactics, the use of obscenity, of chasing down the consumer at all hours of the day or night—that sort of thing. We are trying to protect against the glaring examples of unsavory debt collection practices.

Mr. ANNUNZIO. Mr. Chairman, I yield 3 minutes to the gentleman from New Jersey (Mr. Minish), a member of the subcommittee.

Mr. MINISH. Mr. Chairman, I rise in support of the legislation, and want to commend the chairman of the subcommittee and all the members who participated. This is very difficult legislation, and I want to say that the committee, in my opinion, did a very excellent job.

Mr. Chairman, I would like to address myself to the question many reputable collection agencies have raised—what will this legislation do to the necessary business of bill collecting?

To those agencies who have aways observed reasonable and ethical practices in collecting valid debts, they should not find the Debt Collection Practices Act hindering their operation at all. This bill was not meant to interfere or stop them from performing a needed service to businesses. It was meant to set up guidelines for all agencies to conform to so there would be a standard code of ethics for all to follow.

It should be noted that we attempted to include provisions fair to the agencies. There are no recordkeeping requirements or licensing requirements hampering the collectors.

The bill does allow the collector to communicate with the consumer, at home and at work, but within reason. No means of communication have been denied the collector—only guidelines set to insure the consumer his right to be treated in a fair and reasonable manner.

If the result of this bill is that less debts are collected because abusive tactics cannot be used, then I say we must look back to the original credit grantor. We cannot permit abusive practices to continue just so debts are collected. What should be done then is for the credit grantors to take greater care in issuing credit in the first place.

To get back to the cry from the legitimate collector that these unscrupulous collectors are only a small minority in their industry and that this legislation will hurt them, I can only reiterate that establishing a standard code of ethics will be beneficial to the industry and fair to the consumer.

Mr. ANNUNZIO. Mr. Chairman, I yield 4 minutes to the gentleman from Minnesota (Mr. Vento), a member of the subcommittee, who worked long and hard on the legislation.

Mr. VENTO. Mr. Chairman, obviously I rise in support of the legislation which purports to regulate debt collectors. I think that the hearings were very extensive, and that the subcommittee had a complete review by agency, by consumers themselves who were affected, the debt collector organizations, debt collectors themselves, as well as State officials who reported on the conduct of the collector problems that they are experiencing within their own States.

I might say that at the conclusion of the hearings all these varied and diverse groups supported the legislation as it came forth from the subcommittee. I think there are some special problems with regard to debt collection and the activities that surround it.

I think if we reflect on our experience, it would be helpful. I would like to articulate some examples. One is that generally debt collectors are collecting a debt from persons they did not extend credit to, so they were not the primary extender of credit, but the secondary extender. The person having the debt collected by this group did not ask or did not seek credit from them. I think this is a very important consideration, because many examples can be found in which these are almost automatic with certain types of businesses in our society. They hand over the collection of debts to one of these collectors almost automatically, without any consideration as to whether or not it was a difficult debt to collect or

So, the imposition of another type of standard here, I think, is justified. The second point was raised by the gentleman from Ohio (Mr Wylle) about problems of interstate commerce.

Of course, very frequently, no matter what the law is within the State, the debt collectors are from outside the State, and unless there is an aggressive action by the Attorney General's office there is no way the State can in fact control agencies outside the State and the conduct of those groups or organizations with consumers within a State.

So it is clearly an aveune where Federal legislation is justified and necessary. And in this vein, of course, I think that in the hearings, it seemed to me, there was a good deal of evidence that most of the problems occurred with the out-of-State debt collectors. The question arose in my mind, and I am sure in the minds of the members of the subcommittee, as to whether or not business entities were in fact intentionally given the collection of debts by debt collectors to out-of-State groups so that they would not conform or be within the purview of the State law.

Another point which has come up here is the issue of a very detailed bill. Indeed, because the subcommittee in this instance, I think, took the course of trying to define the scope of the legislation, trying to put definitions into it, we invariably got into a situation where we have

many specifics in this particular bill. I think that is really what we want. If we as a legislative body can write rules and regulations—in this instance, I think we have done so successfully—then we ought to try to do so. I think in many instances we have given the responsibility or delegated it to a Federal or State agency. In this instance we have taken that task, and invariably we get into the minute detail regarding the various questions I have heard on the floor today. I think we have made a good effort, we have a good bill, and I urge the Members to support it.

Mr. ANNUNZIO. Mr. Chairman, I yield 1 minute to the gentleman from Wisconsin (Mr. Reuss), the chairman of the full committee.

Mr. REUSS. Mr. Chairman, I commend Mr. Annunzio, chairman of the Banking Committee's Subcommittee on Consumer Affairs, and the other members of the subcommittee for their fine work on the Debt Collection Practices Act. The subcommittee has listened to consumers, industry representatives, and public officials. They have produced a carefully drafted bill that successfully meets the problem of protecting consumers from harsh and deceptive tactics, while avoiding hardship to reputable debt collectors

There is need for this legislation, because some debt collectors abuse consumers with harassment, intimidation, and threats. Sometimes the debts are not bona fide. Often the wrong person is contacted because of mistaken identity or inaccurate information. The subcommittee's hearings both last year and this year demonstrated the need for this legislation because of frequent abuses by unethical debt collectors, the unsatisfactory nature of current Federal and State legislation to stop debt collection abuses, and the inability of States to protect their citizens from interstate debt collectors. Counting the 13 States that have no laws and the 11 States that have laws with few or no prohibited practices, over 80 million people are without any real protection from debt collection abuses.

This bill avoids the bureaucracy that might be entailed in requiring licensing or registration. It does not authorize the enforcing agency to write implementing regulations for each section. All too often, granting such authority has resulted in complex, confusing regulations that can be understood neither by those to be regulated nor those to be protected.

H.R. 5294 was reported out of the Banking Committee by a vote of 35 to 8, and a very similar bill was passed by the House last year, but not acted upon by the Senate. The well-documented extent of consumer abuse, and inadequate Federal or State regulation of debt collection practices, makes passage of this legislation appropriate and necessary.

Mr. ANNUNZIO. Mr. Chairman, I yield 3 minutes to the gentleman from New York (Mr. Badillo).

Mr. BADILLO. Mr. Chairman, I am pleased to support H.R. 5294, a bill to regulate the often frightening harassment that has been faced by people who owe money.

I want to commend the chairman of

the subcommittee, Mr. ANNUNZIO for bringing up this legislation. We have in this country an unfortunate tradition based on the legal maxim "caveat emptor" or "let the buyer beware." I cannot conceive of a more immoral concept to regulate a just society nor one that is more unacceptable. The Subcommittee on Consumer Affairs chaired by my distinguished colleague Mr. Annunzio has done much to reverse the unfortunate maxim and to insure that it is the seller that bears the responsibility for being truthful and honest with the consumer. And that honesty must extend to the collection of any outstanding debts by a third party and it is for that reason we need this enabling legislation.

Increasingly, in the past few years, debt collection agencies have engaged often in illegal or barely legal practices to bully unwary citizens and threaten them, without justification, with legal action, garnishment of salaries, and even loss of jobs. The most horrifying part of the way in which these agencies have operated has been that they have preyed on the most vulnerable—the poorest and

the least educated.

This long-overdue bill safeguards consumers from the outrageous practices they have been exposed to—the use of abusive or profane language by a collector; physical intimidation; threatening phone calls or visits. It appalls me to think that these are things that have gone on up until now. This bill will prohibit any collector from representing himself as an agent of the Federal Government, or of a law enforcement agency, or even as a lawyer threatening action that is not legal. In fact, there are stringent limits placed on the kinds of legal actions that can be brought.

But this is not a piece of legislation that is unfair to those wishing to collect debts, or to debt collection agencies. If it were, it would not have the support of the American Collectors Association and the Associated Credit Bureaus, Inc. It is a bill that legislates legitimate guidelines for collection agencies, and what such an agency can reasonably de-

mand from a delinquent debtor.

The reason that this bill has particular importance for me is because I have seen firsthand, in my district office, how painful it can be for someone poor, and someone who does not have fluency in English, to be intimidated by these unwarranted threats. The legislation is desperately needed by immigrants, non-English-speaking migrants, and others who are not well acquainted with the law of this country. Many of them are frightened by any appearance of legal authority, and many of them feel helpless in the face of this harassment.

That is why I offered an amendment to this bill, accepted by my distinguished colleague, Mr. Annunzio, that mandates that when the debt collector knows that the consumer is a member of a language minority, all communications with the consumer must be in the language of the minority group as well as in English. This, in conjunction with the new limits placed on agencies, will go a long way to

assuring that language minority debtors will be treated fairly.

The House has already passed this bill during the last session, by a wide margin. It is only right that all should now join in supporting this very important piece of consumer legislation.

Mr. ANNUNZIO. Mr. Chairman, I have no further requests for time, and I re-

serve the balance of my time.

Mr. WYLIE. Mr. Chairman, I yield 2 minutes to the distinguished ranking minority member of the Committee on Banking, Finance and Urban Affairs, the gentleman from Ohio (Mr. STANTON).

Mr. STANTON. Mr. Chairman, I take this time simply to express my personal appreciation and to compliment the chairman of the subcommittee who has brought this bill before us here this afternoon. I wish also to express my appreciation to all the members of the subcommittee, including the very capable and able ranking minority member of that subcommittee, my colleague, the gentleman from Ohio (Mr. WYLIE). The members took their time on this legislation and worked very hard in the subcommittee, and there was give and take on both sides. I think without a doubt they have come up with a bill covering a very sensitive subject matter that is in the best interest of the citizens of our great country.

Mr. Chairman, I rise in support of H.R. 5294, the Debt Collection Practices Act. This bill defines the limits to which independent debt collectors may press for the collection of overdue accounts.

Hearings before our Consumers Affairs Subcommittee document the poor performance of State laws in dealing with some unethical debt collectors. Laws administered by the Federal Trade Commission, the Federal Communications Commission, and the U.S. Postal Service provide for sanctions that amount to a slap on the wrist even for the most abusive debt collection practice.

My concern for this bill reaches my own State, inasmuch as Ohio has no law regulating debt collectors. Moreover, there are a total of 13 States that have no laws or regulations touching debt col-

lectors.

H.R. 5294 does not impair the ability of ethical debt collectors to collect just debts nor does it compromise the rights of consumers to be protected against harassment, deception, and unfairness.

In conclusion I find it most persuasive that the trade associations representing independent debt collectors have sent letters endorsing the bill.

Accordingly, I urge that my colleagues vote for H.R. 5294, the Debt Collection Practices Act.

Mr. WYLIE. Mr. Chairman, I thank the gentleman from Ohio (Mr. Stanton) for his generous remarks in support of the legislation.

Mr. Chairman, I yield 2 minutes to the gentlewoman from New Jersey (Mrs. Fenwick).

Mrs. FENWICK. Mr. Chairman, I would like to thank our subcommittee chairman, the gentleman from Illinois (Mr. Annunzio), and the gentleman

from Ohio (Mr. Wylie). I do not think the Members in this Chamber can know of the patience and the hard work they both have put into this legislation. There were long, long hours spent in the subcommittee, and all the members of the subcommittee worked hard, not only in this session but in the past session. It has really been a very heartening experience.

What were we trying to do? We were trying to protect the consumer. We were trying to devise a set of precise prescriptions which would allow an industry, which is necessary in our credit economy, to exist. We did not want to strangle or destroy what is in many cases a very honorable business, but we wanted to lay the rules down in black and white as to what is permissible and what is not. We wanted to define what is absolutely out of bounds in dealing with the people of this country.

We found that across State lines there is no method of control at all, and people have been faced with unconscionable harassment and outrageous practices. I will not give the Members examples because we do not need to go into them

here.

But we have, I think, devised a sensible and practicable bill. This will mean that the honorable collection agencies which are, as I say, necessary, will not be undercut by the less scrupulous agencies which have been guilty of harassment. It means that honorable debts can be collected. It means that people who are in temporary financial difficulty and who want to work a way out of their debts will have some decent and proper way of doing so.

Mr. Chairman, I think we have a good, sound piece of legislation. It is necessary, and I hope it passes with unanim-

ity.

Mr. WYLIE. Mr. Chairman, I thank the gentlewoman from New Jersey (Mrs. Fenwick) for her gracious comments with reference to my part in the developing of this legislation.

Mr. Chairman, I yield 2 minutes to the gentleman from Delaware (Mr. Evans).

Mr. EVANS of Delaware. Mr. Chairman, may I say at the outset that I have enjoyed the reasonable, fair approach that the subcommittee chairman, the gentleman from Illinois (Mr. Annunzio), has exhibited in his efforts here. I appreciate also the reasonable and fair approach that the ranking Republican member of this subcommittee, the gentleman from Ohio (Mr. Wylie), has given to this piece of legislation.

I think it is a balanced bill, and I think it is a sensible approach to a very pressing problem in our Nation today. Every piece of legislation should have an objective or a goal in mind, and I think it bears repeating that the goal of this bill is to prevent the unfair and unreasonable and, in many cases, unconscionable debt collection practices that some debt collection agencies employ. Unlike some legislative goals that our esteemed body tries to reach but fails to, the objective of H.R. 5294 is attainable with this bill's provisions.

As was brought out during our subcommittee's hearings, the Debt Collection Practices Act will not eliminate the legitimate debt collector. Small businesses today have a legitimate need for the honest debt collector. They cannot afford the luxury of having their own in-house collection agency. As every Member knows from the "Dear Colleague" letter of the subcommittee chairman, the gentleman from Illinois (Mr. Annunzio), and from the colloquy that has taken place in the Chamber today, this bill meets a very pressing need.

There was some question about the scope of this bill from the gentleman from Kentucky (Mr. SNYDER), my friend the gentleman from Missouri (Mr. TAY-LOR), and the gentleman from California (Mr. Wiggins). I think it is quite clear that this bill will only affect collection practices by a company whose principal business is the collection of debts. Companies that have their own in-house collection practices have an added incentive not to harass their customers. They have a vested interest in helping their customers pay their bills in a manner that is courteous, without using intimidating techniques. The person who is a debtor today may be a paying customer tomorrow. That is why this bill relates solely to debt collection agencies, not to those that have their own in-house method of debt collection.

No witnesses testified before our committee complaining about debt collection practices by in-house collectors. With Congress penchant for chipping away at the freedom our citizens enjoy, extending this bill to cover in-house collectors would extend the bill's scope beyond what is necessary to protect the unwary debtor.

Mr. Chairman, in closing, I would like to stress one part of this legislation that is especially attractive and unprecedented in consumer legislation. This bill authorizes the Federal Trade Commission to enforce its provisions, but the FTC is not to promulgate regulations to enforce this legislation. It is self-executing. No nonsensical, illogical, and incomprehensible regulations can be issued. Such a provision is highly desirable and is a start toward a total reform in the manner in which we impose our will on the general public. The sea of regulations that is slowly choking our country must be stopped.

I urge my colleagues to vote for this legislation, H.R. 5294 which is a good, balanced approach to the problem of the unscrupulous debt collector.

Mr. WYLIE. Mr. Chairman, I yield 1 minute to the gentleman from Washington (Mr. PRITCHARD).

Mr. PRITCHARD. Mr. Chairman, if I may have the attention of the chairman, the gentleman from Illinois (Mr. Annunzio) I would like to ask the gentleman whether my understanding is correct that a collector cannot contact the employer of the person that owes the bill?

Mr. ANNUNZIO. Only after a judgment has been entered.

Mr. PRITCHARD. Mr. Chairman, I have seen this work because I ran a small

company, and over and over again, if I could get into the act before they got into any judgments we could work out an arrangement. Help the employee back to the point where he only paid the bill and paid the collection agency without getting into all of the court costs and legal fees. I think in most cases the gentleman will find that if they can contact the employer at least once, they can get them help in the situation toward working out a solution.

In my State of Washington, we have a law which allows the collector to contact the employer once. It has worked. I think we are making a great mistake not having that provision in this bill.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ANNUNZIO. Mr. Chairman, I yield such time as he may consume to the gentleman from Texas (Mr. White).

Mr. WHITE. Mr. Chairman, there are certain questions that arise that I want to bring forward. In the first place, in reading this bill, I see nowhere that it applies strictly to interstate matters; it would touch upon intrastate. I know of nowhere in the Constitution where that would be permissible.

Second, I do not know how in this bill we are going to circumvent the freedom of speech article, the guarantee that a person can talk to whomever he wishes. In this bill the provisions prohibit a person under penalty from talking to someone. This is in violation of the constitutional provision contained in article I of the Bill of Rights.

On page 8 the gentleman indicates that there shall be prohibited as a violation of this section:

The publication of a list of consumers who allegedly refuse to pay debts.

The bill seeks to wipe out all credit bureaus as they operate now entirely, as I understand it.

On page 16 the gentleman is creating an entire new liability under the law which would bring about a mass of new litigation that I think is going to further overburden the courts. These are some of the points I wish to call to your attention.

Mr. WYLIE. Mr. Chairman, I yield such time as he may consume to the gentleman from Ohio (Mr. Devine).

Mr. DEVINE. I thank the gentleman for yielding.

Mr. Chairman, I agree that both the gentleman from Ohio (Mr. WYLIE) and the gentleman from Illinois (Mr. ANNUNZIO) devoted a great deal of time in putting this legislation together. I have a question or two. I have heard this bill referred to as the antiharassment of deadbeats bill. I know all of us are concerned with the abuses and intimidating practices of some debt collection agencies, but I see in the report under "Supplemental Views" that the American Bar Association has come out in opposition to the bill

Let me ask about a fact situation. Say I owe the gentleman \$50, and the gentleman comes to me on Monday and says, "How about that 50?" And I say, "I will pay you on Wednesday." Wednesday

comes along, and the gentleman says, "Have you got my money?" I say, "No; see me Friday."

If the gentleman comes on Friday and asks for the money, is that in violation because the gentleman cannot talk to me more than twice a week?

Mr. WYLIE. No. Debt collection is not my principal occupation or business.

Mr. DEVINE. I am talking about the three contacts.

Mr. WYLIE. No. If the debt is turned over to an independent debt collector, if the gentleman does not pay me and I turn it over to an independent debt collector and he contacts the gentleman three times within a week, after that it becomes harassment.

Mr. DEVINE. I see here it says it applies only to professional debt collection agencies and does not apply to anyone attempting to collect debts on behalf of a company who employs them.

Why that double standard?

Mr. WYLIE. Because the in-house debt collector is in the business of doing something other than debt collecting. They are principally in the business of selling a product, like Sears, J. C. Penney's, or Lazarus. They want to maintain good public relations. They are not as likely to be as aggressive in the collection of debts as independent debt collectors. Years ago our law firm had experiences where we represented corporate clients selling goods. If they could not collect a debt, after a certain time the client turned it over to our law firm, and we in turn turned it over to independent debt collectors who performed a valuable service.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ASHBROOK. Mr. Chairman, I urge the defeat of H.R. 5294, the Debt Collection Practices Act. This is an area better left to regulation by the individual States

There is an increasing trend in our society to federalize the issues. Too many people are looking to the Federal Government to solve every real or imagined problem. This is a serious mistake. As I have warned my colleagues on numerous occasions, there must be some limit on what the Federal Government can or ought to do. Not every issue should be made into a Federal issue.

Frankly, many matters are better left to States and localities. The bill before us today is one of these matters. Almost every State already regulates debt collection practices in some way. Why should the Federal Government now take over this area? Why should Congress pass a law that applies uniformly to such diverse States as Ohio, New York, and Montana?

I am also concerned that H.R. 5294 could substantially increase the costs of doing business. It will probably make it harder for businessmen to collect the money legitimately owed to them as well as encourage debtors to avoid paying their debts. The result will be higher prices for everyone.

H.R. 5294 constitutes another unjustified intrusion into State matters and business affairs. We should leave regulation of debt collection practices where it belongs, with the individual States. We should soundly defeat H.R. 5294.

Mr. FRENZEL. Mr. Chairman, I rise in support of H.R. 5294, the Debt Collec-

tion Practices Act.

This bill is not a perfect piece of legislation, but I understand it is good enough to have won the support of both consumer groups and debt collectors' associations.

This legislation is intended to insure that all debt collection agencies conduct their affairs ethically. The majority of agencies already do so, and are probably already in compliance with the proposed regulations. The bill will prevent, or eliminate, the use of harassment and abuse in debt collection by the small number of unscrupulous people who use, or might use, such tactics.

I would like to commend the committee for consulting all the concerned groups to produce a bill that is workable, and I urge my colleagues to support it.

Mr. BONKER. Mr. Chairman, I compliment the chairman of the Subcommittee on Consumer Affairs for putting before us today legislation which has met the objections of the industry it seeks to regulate, yet still contains the teeth to make it effective. I endorse the bill and intend to support it.

I would like to comment on one aspect of the bill, which leaves me slightly troubled. Constituents and friends alike, I believe, will grant my standing as an advocate of the interests of the consumer. Thus, I rise to question part of this bill with some reservation.

Section 804(c) (1) states that no debt collector may contact a consumer's employer prior to final judgment except with the consent of a court. This provision makes a lot of sense to me—with a slight reservation—as a safeguard against what can be the most vicious form of harassment—through an em-

ployer.

My reservation stems from a comparison of this bill with the State of Washington Collection Agency Act which is, I believe, one of the best in the Nation. It is a State law which controls debt collection activities and protects the consumer through prohibiting certain practices and providing remedies. But it is also an act which does not automatically presume an adversary relationship between the debt collector and the debtor. That is, in some ways it is like the juvenile justice system in recognizing that a more informal, cooperative approach is often best in helping a consumer resolve what may have become a crushing debt load.

This has been particularly helpful in my district, which is primarily rural and small town. In many of those towns, employers and employees have grown up together. The Washington State Collection Agency Act, with proper safeguards, has allowed limited contact with employers. The law allows only one contact with an employer, and then

only on undisputed claims.

I wanted to know how this provision of the Washington State law works, so I contacted Mr. Don Navone, consumer representative on the State collection agency board. He told me first of all that the provision has been accepted and applauded by both consumers and employers. Employers have often been able to work cooperatively with employees on the debt reduction plans which avoid the trauma and additional costs of a court decision and wage garnishment. Moreover, Mr. Navone tells me there has not been a single case of abuse of this provision in his memory.

In short, allowing limited and controlled contact with an employer in the State of Washington has allowed the employer to act as a friend rather than simply an instrument to collect a

court-decreed judgment.

I realize that this sort of relationship may not always exist between employer and employee, but the Washington State collection agency law does seem to provide a model which allows the best combination of protection to the consumer and assistance to him.

I know that the committee has spent many hours modifying and honing this bill, and I would not presume to gainsay its judgment at this time. I merely state my feeling that the bill would be strengthened if a provision somewhat similar to that in the Washington State Collection Agency Act, allowing limited prejudgment contact with employers,

could be incorporated.

Mrs. COLLINS of Illinois. Mr. Chairman, I lend my support to the passage of H.R. 5294, known as the Debt Collection Practices Act and encourage my colleagues of the House to join me. As a member of a double minority group—black women—I fully understand the positive impact that this bill will have upon the rights and privileges of minorities and others who are often subjected to harassment techniques and ultimately blacklisting by debt collectors.

The time is long overdue that consumers of this country that represent \$3.9 billion in debts have some major measure of protection from the unscrupulous collectors of the debt retrieval industry. To my way of thinking, H.R. 5294 is not a death-dealing blow to the independence of debt collection agencies, nor an invitation to debt payment avoidance schemes by consumers. This bill represents a first attempt to establish and promulgate a single, Federal law regulating debt collection, per se.

The bill has been sufficiently drafted with an eye toward sure enforcement and clear remedies for lack of compliance. In short, H.R. 5294 is a much needed piece of legislation with my endorsement.

Mr. HALL. Mr. Chairman, the Debt Collection Practices Act is one of those well-intentioned, seemingly beneficial efforts to help the consumer, which assumes that the individual's role as consumer can be isolated from his other responsibilities within our society. There is not, in my opinion, a single Member of this House who is not highly in favor of according to every person the kind of

decent, civil, and reasonable treatment to which he is entitled as a U.S. citizenwhether he is a debtor or a creditor. I also agree that while we cannot legislate good manners we could eliminate, by law, some of the more egregious instances of bad manners that amount to invasions of personal privilege. The problem is that by attempting the latter, we are creating a network of litigation that will overwhelm the courts, the legal profession, the small businessman-and also the consumer. If this bill becames law, I can see a tremendous new burden of reports and paperwork, and a proliferation of bureaucracy, added to the already impossible situation where government reports beget government reports like a geneological recitation from the Old Tes-

I believe that this legislation could engulf the consumer in an avalanche of additional problems and costs that will far outweigh the benefits contained in the bill. I am amazed at the unrealistic attempt to saddle the Federal Trade Commission with regulatory responsibilities for this legislation without the authority to issue regulations or employ additional staff. I do not want additional regulations, and I certainly do not want more Federal employees, but there is no way this bill can be administered in a complete vacuum.

The Debt Collection Practices Act also gives lip service to the role of the States which have traditionally monitored this consumer relations area, to the extent that each State desired to become involved. And to the extent that the State is not in accord with this Federal intervention, this bill becomes an unwarranted infringement upon State rights. I say further, Mr. Chairman, that in this matter by own opinion is reinforced by communications with my constituents who in each instance have stated their strong disapproval of this and similar measures.

Looking at the criminal provisions of this bill, we have apparently come full circle from the days of debtors prisons we now propose to imprison creditors unless they climb aboard this good will turned nightmare-tour of our newest paperwork empire.

With this bill, good intentions are once again paving the way to an undesirable

destination.

Mr. ANNUNZIO. Mr. Chairman, I have no further requests for time.

Mr. WYLIE. Mr. Chairman, I have no further requests for time.

The CHAIRMAN The Clerk will read.

The CHAIRMAN. The Clerk will read. The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Consumer Credit Protection Act (15 U.S.C. 1601 et seq.) is amended by adding at the end thereof the following new title:

"TITLE VIII—DEBT COLLECTION PRACTICES

"Se

"801. Short title. "802. Definitions.

"803. Acquisition of location information

"804. Communication in connection with debt collection.

"805. Harassment or intimidation.

- "806. False or misleading representation.
- "807. Unfair practices. "808. Validation of debts.
- "809. Multiple creditors.
- "810. Legal actions by debt collectors.
- "811. Furnishing certain deceptive forms.
- "812. Civil liability.
 "813. Criminal liability.
- "814. Administrative enforcement.
- "815. Reports to Congress by the Commission and Attorney General.
- "816. Relation to State laws.
- "817. Exemption for State regulation.
- "818. Effective date.

"§ 801. Short title

"This title may be cited as the 'Debt Collection Practices Act'.

"§ 802. Definitions

'(a) The definitions set forth in this section are applicable for purposes of this title.
"(b) The term 'Commission' means the

Federal Trade Commission. "(c) The term 'consumer' means any individual obligated or allegedly obligated to re-

pay any debt.
"(d) The term 'creditor' means any person who offers or extends credit creating a

debt or to whom a debt is owed.

"(e) The term 'debt' means any obligation of an individual to pay money arising out of a transaction in which the money, property, or services which are the subject of the transaction are primarily for personal, family, or

household purposes.

"(f) The term 'debt collector' means any person who engages in any business the principal purpose of which is the collection of any debt, or any person who directly or indirectly collects or attempts to collect a debt owed or due or asserted to be owed or due another, and who uses any instrumentality of interstate commerce in connection with such collections. The term does not include any officer or employee of the United States or any State to the extent that collecting or attempting to collect any debt is in the performance of his official duties, or attorneys-at-law collecting debts as attorneys on behalf of clients and in the name of such clients.

"(g) The term 'location information' means a consumer's place of residence, telephone number at such place, and place of

employment.

"(h) The term 'State' means any State. territory, or possession of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or any political subdivision

of any of the foregoing.

"(i) The term 'communication' means conveying information directly or indirectly to any person, except that with respect to section 804(a)(3), the term 'communication' means actual contact with the consumer which includes a brief statement in any manner of the present intentions of the consumer with respect to the repayment of the debt.

"§ 803. Acquisition of location information '(a) No debt collector may, in connection with the collection of any debt, communicate with any person (other than the consumer's attorney) pursuant to this section once the debt collector knows the consumer is represented by an attorney and has knowledge of such attorney's name and address, unless such attorney is unjustifiably nonresponsive to communication from such debt

"(b) Any debt collector communicating with any person for the purpose of acquiring location information about any consumer

shall-

"(1) identify himself and, if expressly

requested, his employer;
"(2) not state that such consumer owes any debt;

(3) not communicate with such person more than once unless expressly requested

to do so by such person, except for one additional communication to reconfirm location information:

(4) not communicate by post card;

"(5) not use any language or symbol, other than the debt collector's address, on any envelope when using the mail or telegrams, except a debt collector may use his company name provided that such name does indicate that the company is in the debt collection business: and

"(6) not use any language or symbol in the contents of mail or telegrams that indicates that the communication relates to the collection of a debt, other than the identification of the person as a debt collector.

"§ 804. Communication in connection with debt collection

"(a) COMMUNICATION WITH THE CON-SUMER OR HIS SPOUSE GENERALLY .- No debt collector may initiate communications with a consumer or his spouse in connection with the collection of any debt without the prior consent of the consumer or the express permission of a court of competent jurisdic-

"(1) before 8 antemeridian or after 9 postmeridian or at any unusual time or time known to be inconvenient to the consumer

or his spouse;
"(2) after the initial communication, if the debt collector knows the consumer represented by an attorney and has knowledge of such attorney's name and address, unless such attorney is unjustifiably non-responsive to communication from such debt collector; or

"(3) after the initial communication, more than two times during any seven-calendar-

day period.

(b) COMMUNICATION WITH THE CONSUMER OR HIS SPOUSE AT THE PLACE OF EMPLOY-MENT.—Without the prior consent of the consumer or the express permission of a court of competent jurisdiction, no debt collector may communicate with the consumer or his spouse in connection with the collection of any debt more than three times in any thirty-day period at the place of employment of the consumer or his spouse, except that if the consumer or his spouse informs the debt collector that he is not to be called at his place of employment and the debt collector has a telephone number where the consumer can be reached during the consumer's nonworking hours which occur after 8 antemeridian and before 9 postmeridian, then the debt collector may not communicate with the consumer or his spouse at the place of employment of the consumer or his spouse. If the debt collector does not have such a phone number, the debt collector shall request it from the consumer or his spouse.

"(c) COMMUNICATION WITH THIRD PAR-TIES.-Except as provided by section 803, no debt collector may communicate with any person other than the consumer or his spouse, parent (if the consumer is a minor), guardian, executor, administrator, or attorney in connection with the collection of any debt without the prior consent of the consumer or the express permission of a court of competent jurisdiction, expect-

"(1) any employer of the consumer after a court of competent jurisdiction enters a final judgment establishing the consumer's obligation to repay all or any portion of the

debt: or

"(2) any consumer reporting agency, as defined by the Fair Credit Reporting Act.

"(d) CEASING COMMUNICATION.-When consumer notifies a debt collector in writing expressing that such consumer absolutely refuses to pay or even discuss an account, such debt collector shall cease further direct collection efforts with the exception of advising the consumer that the collector's further efforts are being terminated and that

there is a possibility of an attorney invoking the creditor's remedies locally available. Any such notice to a debt collector may be made by mailing it to him at his last known address. Notification by mail is complete upon receipt or at the expiration of the time ordinarily required for transmission, whichever

"(e) PLEADINGS AND PROOF .- In any action brought by a consumer against a debt collector under this section, it shall be the duty of the consumer to plead both the existence of a communication from the debt collector and the lack of consent of the consumer thereto, and to make a prima facie showing that the communication took place and that there was no such consent. A prima facie showing that consent was not obtained may consist of testimony by the consumer. Upon such a prima facie showing, the burden of going forward shall be with the debt collec-

"\$ 805. Harassment or intimidation

"No debt collector may harass or intimidate or threaten or attempt to harass or intimidate any person in connection with the collection of any debt. Without limiting the general application of the foregoing, the following conduct is a violation of this section:

(1) The use of violence or other criminal means to harm the physical person, reputa-

tion, or property of any person.

"(2) The use of abusive or profane lan-

"(3) The publication of a list of consumers who allegedly refuse to pay debts.

"(4) The advertisement for sale of any debt to coerce payment of the debt.

"(5) Any communication to acquire location information about a consumer if the debt collector has such information or does not reasonably believe that such person has access to such information.

"(6) The making of harassing or threatening phone calls or visits to the home or place of employment of a consumer or his spouse or calling any person repeatedly or

constantly.

"§ 806. False or misleading representation

"No debt collector may make or threaten or attempt to make any false or misleading representation to any person in connection with the collection of any debt. Without limiting the general application of the foregoing conduct is a violation of this section:

"(1) Any false representation indicating that the debt collector is acting for or on behalf of the United States or any State, including the use of any badge, uniform, or any facsimile thereof of any law enforcement

"(2) The false representation of-

"(A) the character, amount, or legal status of any debt; or

"(B) any services rendered or compensation which may be received by any debt collector for the collection of a debt.

The false representation that any "(3)

individual is an attorney.

"(4) The false representation that nonpayment of any debt will result in the arrest or imprisonment of any consumer or the seizure, garnishment, attachment, or sale of any property or wages of any person.

"(5) The threat to take any action that cannot legally be taken or that is not in-

tended to be taken.

"(6) The false representation that a sale, referral, or other transfer of any interest in a debt shall cause the consumer to-

"(A) lose any defense to payment of the debt; or

"(B) become subject to any practice pro-hibited by this title.

"(7) The false representation that the consumer committed any crime or other conduct in order to disgrace the consumer.

"(8) The false statement to any person (including any consumer reporting agency)

that a consumer is willfully refusing to pay a debt.

"(9) The false representation that any writing (including any seal, insignia, or envelope) is authorized, issued, or approved by any court or agency of the United States or any State.

"(10) The use of any false representation or deceptive means to collect or attempt to collect any debt or to obtain information

concerning a consumer. "(11) The false representation that any

person is seeking information in connection with a survey.

"(12) The false representation that any person has a prepaid package for the con-

"(13) The false representation that a sum of money or valuable gift will be sent if the

requested information is presented.
"(14) The false representation that accounts have been turned over to innocent purchasers for value.

"(15) The false representation that any debt has been turned over to an attorney,

"(16) The false representation that documents are legal process forms.

"§ 807. Unfair practices

"No debt collector may engage in the following practices with respect to any person in connection with the collection of any

"(1) The collection of any amount (including any interest, fee, charge, or expense incidental to the principal obligation) debt collector unless such amount is legally chargeable to the consumer, or unless such amount is expressly authorized by a court of competent jurisdiction.

"(2) The acceptance by a debt collector from a consumer of any check or any other. negotiable instrument that is postdated, unless such consumer is notified in writing of the debt collector's intent to deposit such check or such instrument at least three business days in advance of the deposit of such check or such instrument.

"(3) The solicitation by a debt collector for the purpose of threatening criminal action of any check or any other negotiable in-

strument that is postdated.

"(4) The deposit by a debt collector of any postdated check or other postdated nego-tiable instrument prior to the date on such check or such instrument.

"\$ 808. Validation of debts

- "(a) Within five working days after the initial communication with a consumer in connection with the collection of any debt, a debt collector shall send the consumer a written notice containing the following information:
 - "(1) The amount of the debt. "(2) The name of the creditor.

"(3) A statement that unless the consumer, within thirty days after receipt of the notice, disputes the validity of the debt, the debt will be assumed as valid by the debt collector.

"(4) A statement that if the consumer notifies the debt collector in writing within the thirty-day period that the debt is disputed, the debt collector shall cease collection of the debt until such debt collector obtains certification of the validity of the debt from the creditor and a copy of such certification is mailed to the consumer by the debt collector, and a statement that, along with such certification, the debt collector shall provide the name and address of the creditor.

(b) If the consumer notifies the debt collector in writing within the thirty-day period described in subsection (a) (3) the debt is disputed, the debt collector shall cease collection of the debt until such debt collector obtains certification of the validity of the debt from the creditor and a copy of such certification is mailed to the consumer by the debt collector. The debt collector shall provide, along with such cer-tification, the name and address of the creditor to whom the debt was originally owed as it appeared in the original sales contract or bill of sale and the name of the creditor to whom the debt is currently owed, or if the debt did not arise out of a transaction involving a sales contract or bill of sale, the name and address of the

"§ 809. Multiple creditors

"If any consumer owes debts to more than one creditor and makes any single pay-ment to any debt collector with respect to such debts, such debt collector shall not apply such payment to any debt disputed by such consumer.

"§ 810. Legal actions by debt collectors

"(a) A debt collector shall not bring any action on a debt against any consumer-

"(1) in the case of any action to enforce an interest in real property securing the consumer's obligation, in a court that does not have jurisdiction in the judicial district or similar appropriate legal entity in which such real property is located; or

"(2) in the case of any action not described in paragraph (1), in a court that does not have jurisdiction in the judicial district or similar appropriate entity

"(A) in which such consumer signed the contract sued upon: or

"(B) in which the consumer resides at the commencement of the action.

"(b) A debt collector shall not cause process in any action on a debt to be served on a consumer unless such process served-

"(1) by an officer or employee of the United States or any State in the course of the official duties of such officer or employee:

"(2) by an individual appointed or approved by an appropriate court for that purpose; or

"(3) by an individual authorized to serve process under the law of the State in which process is to be served.

"(c) A debt collector shall not utilize, in connection with the collection of any debt, any officer or employee of the United States or any State whose duties include the service of legal papers, except in the course of such

"§ 811. Furnishing certain deceptive forms "(a) No person may furnish any form knowing or having reason to know that such form would probably be used to create the false belief in a consumer that a person other than the creditor of such consumer is participating in the collection of or in an attempt to collect a debt such consumer allegedly owes such creditor, when in fact such person is not so participating.

"(b) Any person who violates this section with respect to another person shall be liable to such other person to the same extent and in the same manner as a debt collector is liable under section 812 for failure to comply with any provision of this title. "§ 812. Civil liability

"(a) Except as otherwise provided by this section, any debt collector who fails to comply with any provision of this title with respect to any person is liable to such person in an amount equal to the sum of-

"(1) any actual damage sustained by such person as a result of such failure;

"(2) (A) in the case of an individual action, under this subparagraph, an amount not less than \$100 nor greater than \$1,000; or

"(B) in the case of a class action, such amount as the court may allow, except that (i) as to each member of the class no minimum recovery shall be applicable, and (ii) the total recovery under this subparagraph in such action shall not be more than the lesser of \$500,000 or 1 per centum of the net worth of the debt collector; and

'(3) in the case of any successful action to enforce the foregoing liability, the costs of the action, together with a reasonable attorney's fee as determined by the court.

"(b) In determining the amount of award in any class action under subsection (a) (2) (B), the court shall consider, among other relevant factors, the amount of any actual damages awarded, the frequency and persistence of failures of compliance by the debt collector, the resources of the debt collector, the number of persons adversely affected, and the extent to which the debt collector's failure of compliance was intentional.

"(c) A debt collector may not be held liable in any action brought under this section for a violation of this title if the debt collector shows by a preponderance of evidence that the violation was not intentional and resulted from a bona fide error notwithstanding the maintenance of procedures reasonably adapted to avoid any such error.

"(d) Without regard to the amount in controversy, any action under this section may be brought in any United States district court, or in any other court of competent jurisdiction, within two years from the date

of the occurrence of the violation.

"(e) No provision of this section or sec-

tion 813 imposing any liability shall apply to any act done or omitted in good faith in conformity with any interpretation thereof by. the Commission, notwithstanding that after such act or omission has occurred, such interpretation is amended, rescinded, or determined by judicial or other authority to be invalid for any reason.

"(f) A consumer may not take any action to offset any amount for which a debt collector is potentially liable to such consumer under subsection (a) (2) against any amount allegedly owing to such debt collector by such consumer, unless the amount of the debt collector's liability to such consumer has been determined by judgment of a court of competent jurisdiction in any action to which such consumer was a party.

"§ 813. Criminal liability

Whoever-

"(1) gives false or inaccurate information or fails to provide information which he is required to disclose by this title; or

"(2) otherwise fails to comply with any provision of this title; shall be fined not more than \$5,000 or im-

prisoned not more than one year, or both. "§ 814. Administrative enforcement

'Compliance with this title shall be enforced by the Commission. For the purpose the exercise by the Commission of its functions and powers under the Federal Trade Commission Act, a violation of this title shall be deemed an unfair or deceptive act or practice in or affecting commerce under that Act. All of the functions and powers of the Commission under the Federal Trade Commission Act are available to the Commission to enforce compliance by any person with this title, irrespective of whether that person is engaged in commerce or meets any other jurisdictional tests in the Federal Trade Commission Act. Nothing in this section shall be deemed to authorize the Commission to issue rules under section 18 (a) (1) (B) of that Act respecting any violation of this title.

"§ 815. Reports to Congress by the Commission and Attorney General

"Not later than twelve calendar months after the effective date of this title and at one-year intervals thereafter, the Commission and the Attorney General shall, respectively, make reports to the Congress concern-ing the administration of their functions under this title, including such recommendations as the Commission and the Attorney General, respectively, deem necessary or appropriate. In addition, each report of the Commission shall include its assessment of the extent to which compliance with this title is being achieved, and a summary of the enforcement actions taken by the Commission under section 814 of this title.

"§ 816. Relation to State laws

"The title does not annul, alter, or affect or exempt any person subject to the provisions of this title from complying with the laws of any State with respect to debt collecting practices, except to the extent that those laws are inconsistent with any provision of this title, and then only to the extent of the inconsistency.

"§ 817. Exemption for State regulation

'The Commission shall by regulation exempt from the requirements of this title any class of debt collection practices within any State if the Commission determines that under the law of that State that class of debt collection practices is subject to requirements substantially similar to those imposed by his title, and that there is adequate provision for enforcement.

"§ 818. Effective date

'This title takes effect upon the expiration of six months after the date of its enactment, and section 808 shall apply only with respect to debts for which the initial attempt to collect occurs after such effective date."

Mr. ANNUNZIO (during the reading). Mr. Chairman, I ask unanimous consent that further reading of the bill be dis-pensed with, that it be printed in the RECORD, and open to amendment at any

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will report the committee amendments.

The Clerk read as follows:

Committee amendments: Page 3, line 9, strike out "his official duties" and insert in lieu thereof "the official duties of such officer or employee".

Page 4, line 2, strike out "No" and insert in lieu thereof "For purposes of acquiring location information about any consumer,

no".

Page 4, line 3, insert a comma after "debt". Page 4, line 4, strike out "pursuant to this section".

Page 4, line 12, insert "or herself" after "himself".

Page 18, line 18, strike out "under section 18(a)(1)(B) of that Act".

Page 19, line 21, strike out "his" and insert in lieu thereof "this".

Mr. ANNUNZIO (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendments be considered as read, and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ANNUNZIO. Mr. Chairman, I ask unanimous consent that the committee amendments be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The CHAIRMAN. The question is on the committee amendments.

The committee amendments were agreed to.

Mr. WIGGINS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, on occasion, this House makes a serious error of judgment. Those occasions typically follow in the wake of an emotionally charged disclosure or the revelation of some antisocial conduct which touches many of our constituents. At such moments, however, there is a special need for detached commonsense and responsible restraint.

The proposed Debt Collection Practices Act is addressed to a problem which touches many of our constituents. Debt collectors, as a class, will win no popularity contests. Tough Federal regulation may fit the mood of the people.

But, especially at moments such as this, we owe a duty to ourselves to act carefully and responsibly.

At the threshold is the fundamental policy question of whether the Federal Government ought to involve itself in the regulation of debt collection practices. Quite clearly, the States have ample authority to do so. Moreover, the regulation of the conduct of professions is a usual and customary area of State authority under their police power. Congressman Pattison has emphasized this point and I totally agree with his dissenting views.

But if a majority should disagree, let there be no dissent from the proposition that we should invade an area traditionally left to State jurisdiction only for the most compelling and overriding national reasons. We are told that "interstate debt collection is a major lawless area." Such a sweeping statement is patently erroneous. State policy reflected in its statutes attach to the conduct of the collector in the State where that conduct occurs; or may protect the debtor, by providing defenses to collection, in the State where the debtor resides.

So much for the wisdom of Federal intervention. Let us look at the bill.

First, it must be borne in mind that we are creating a host of new Federal civil remedies and Federal crimes-all triable in the U.S. district courts.

It is made a Federal crime, punishable by a \$5,000 fine and 1 year imprisonment to:

First. Communicate with any person other than the debtor's attorney for the purpose of locating the debtor. The collector must speak only with the debtor's attorney. That is for greater protection than is afforded a defendant in a criminal case. And note that no exception is carved out for judicial proceedings, thus limiting normal discovery procedures.

Second. A collector may not, without consent, communicate with a debtor at his place of business-even though such place may be the only known location of the debtor.

Third. A collector must communicate—written and oral—in the language of a single language minority debtor, once that fact becomes known.

Fourth. A collector may not use "abusive" language in his communications. This is not sufficiently certain for a criminal statute.

Fifth. A collector may not publish the names of those who refuse to pay their debts—thereby undermining established and useful credit reporting practices.

Sixth. A collector may not visit the home of a debtor.

Seventh. It becomes a crime to use "deceptive means" to collect a debt. Surely such vague language cannot pass fifth amendment muster.

Eighth. The bill makes criminal the bringing of a collection action in a court which lacks jurisdiction.

Ninth. It is a crime to furnish any form knowing that it may be deceptive. The crime, I suppose, is committed by the printer.

The bill is also to be criticized for its civil impact.

First. A new cause of action cognizable in the Federal district courts for damages as small as \$100.

Second. A class action is recognized which apparently permits an award of punitive damages, without proof of actual damages-for what other reason would the resources of the defendant be relevant in any trial for damages.

Third. The impact on State court procedures is evident and beyond rational explanation. Why should the Federal Government undertake to dictate the form of pleadings and burden of proof in State court collection actions? Or to change established State law regulating the manner of service of process?

There is more. But it should be evident that we are dealing with an ill-conceived piece of legislation.

It should be defeated.

The CHAIRMAN. The time of the gentleman from California has expired.

(By unanimous consent, Mr. Wiggins was allowed to proceed for 3 additional minutes.)

Mr. SYMMS. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from Idaho.

Mr. SYMMS. Mr. Chairman, I thank the gentleman for yielding. I would like to compliment the gentleman for these excellent remarks.

I want to be sure I understand the gentleman's problems. It may be now that the people that owe money may be able to set up an entrapment process to entrap the people legitimately trying to collect. Would they make a big game out of it?

Mr. WIGGINS. It would be possible for an unscrupulous debtor to use the privileges of this act to fashion a Federal court remedy against the collector for contacting him four times a week, rather than three times a week, for ex-

Mr. SYMMS. Mr. Chairman, if the gentleman will yield further, I would like to add further that although I hold the Members working on this bill very sincerely, I think the highest level of competence has not been reached.

The CHAIRMAN. The time of the gentleman from California has again ex-

pired.

(At the request of Mr. Dellums, and by unanimous consent, Mr. Wiggins was allowed to proceed for 1 additional minute.)

Mr. DELLUMS. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from California.

Mr. DELLUMS. Mr. Chairman, I listened very carefully to the gentleman's argument and I am very impressed with the gentleman's style in making the presentation. If the presumptions are adequate, there is a validity to the assertion; but I challenge at least two areas. First of all, one assumption the gentleman made was that the bill would preclude the ability of people to communicate with folks at home during the hours before 8 a.m. and after 9 p.m. The statement was that would preclude people from calling. I realize that very few people work from 8 a.m. in the morning until 9 p.m. Most people get home between 6:30 and 7. I think there is some time to communicate with any person and that particular argument in its form really has no validity.

The second point to make an argument is that the bill would make it illegal for people to not communicate in writing to read with Mexican-Americans or Spaniards.

The CHAIRMAN. The time of the gentleman from California has again expired.

(At the request of Mr. Dellums, and

by unanimous consent, Mr. Wiggins was allowed to proceed for an additional 2 minutes.)

Mr. DELLUMS. Mr. Chairman, will the gentleman yield further?

Mr. WIGGINS. I yield to the gentleman from California.

Mr. DELLUMS. The assertion was that there are certain languages that cannot be reduced to writing. I think we have to put that in some perspective. The fact is that people coming from Mexico, that language can be reduced to writing. From Central and South America, that language can be reduced to writing. There are a few instances that language cannot be reduced to writing, but I suggest that is a microscopic number of people; so I would say in those two particular points, I challenge the gentleman's assumptions. The arguments fall away. There is room for people to communicate with people in a reasonable way after 6:30 and before 9 p.m.

The languages of most people who have debts can, in fact, be reduced to writing.

Mr. WIGGINS. I would think that if we were concerned about the inability of a debtor to understand the nature of his obligation, we should direct the language requirement to the making of the debt. When that debt was incurred. the debtor was able to conduct his business in English, but now finds it difficult to pay it in any language other than

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from Ohio.

Mr. WYLIE. I thank the gentleman for yielding to me. The gentleman is a very fine lawyer, and I know that he realizes that the provisions of this bill have to be read in para materia in order to ascertain its full meaning and intent. You cannot just pick out certain provisions. isolate them and say this is a bad bill because this provision is bad.

For example, on page 18, it says that any person who wilfully and knowingly violates the provisions of this act only then does criminal liability attach. The prosecutor has to prove a violation beyond reasonable doubt, and the violation must relate to the purpose of the bill which is to make it unlawful for a debt collector to harass or intimidate someone in the collection of a debt. Then, too, the Federal Trade Commission could make a determination that the practice is not a violation of the law.

It seems to me that when the gentleman just picks out one provision, criticizes the bill, he is not being fair. He is attempting to ridicule the bill to death.

The CHAIRMAN. The time of the gentleman from California has again

(On request of Mr. GUDGER and by unanimous consent Mr. Wiggins was allowed to proceed for 2 additional minutes.)

Mr. GUDGER. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield.

Mr. GUDGER. I direct the gentleman's

attention to page 6 and the top of page 7, lines 22 through line 3, which says:

No debt collector may communicate with any person other than the consumer or such consumer's spouse, parent (if the consumer is a minor), guardian, executor, administraor attorney in connection with the collection of any debt without the prior consent of the consumer or the express permission of a court of competent jurisdic-

Is it the gentleman's interpretation that this would prevent a bona fide debt collector from investigating the tax worth of a debtor, and gain other information concerning his other assets and ability to pay?

Mr. WIGGINS. I am not the father of this legislation, but it is my understanding that it does not preclude—I started to say third party contacts, but there is a section dealing with third party contacts.

Mr. GUDGER. I am referring to that part which says that no debt collector may communicate with any other person than the debtor or his spouse for any purpose without the debtor's permission. Would that preclude a bona fide debt collector from making investigations to ascertain assets?

Mr. WIGGINS. I know the gentleman to be a fine attorney, and the fact that it has raised a question in his mind indicates that it is not clear at all. One of the novel features of this bill is that one can only make a contact if one has prior consent, and I have often wondered how in the world one is going to get that prior consent without making a contact.

Mr. GUDGER. Would the gentleman yield for another question? On page 12, there is a provision that the debt collector is to send the consumer within 5 days after first contact certain specified information, and they list amount, name, creditor, and so forth. Then, there is provision for a criminal penalty.

The CHAIRMAN. The time of the gentleman from California has again expired.

(On request of Mr. Gudger and by unanimous consent Mr. Wiggins was allowed to proceed for 2 additional minutes.)

Mr. GUDGER. On page 18, there is provision that there can be a \$5,000 fine or imprisonment for 1 year, as specified on lines 8 and 9, for failure to provide information which such person is required to disclose by this title. My question is this: If a bona fide debt collector failed to provide this information within 5 days, is it the gentleman's interpretation that he would be subject to the criminal penalties and sanctions provided in section 813 on page 18?

Mr. WIGGINS. If the act were done willfully-and normally one intends the consequences of his act-if it were done willfully and knowingly, at least be would risk criminal charges against him.

Mr. SAWYER. Mr. Chairman. I move to strike the last word.

Mr. Chairman, I am only interested in addressing one aspect of this legislation, which I have read very carefully. I have looked at the bulletin board displaying examples of unethical bill collecting. I have been aware of the kinds of abuses that have been illustrated

there, and there is no question it is an appealing situation in which to legislate. It seems to me, however, the question

is: Is there some compelling need for Federal legislation in this regard?

The act itself recognizes the devastation wrought by a proliferation of Federal regulations. I think the same thing can be very well applied to Federal legislation. The States have full jurisdiction over this type of matter. It is a police matter, really, lying within the police powers of every State. They have much more adequate enforcement facilities.

Only a few days ago I received, as perhaps many of the Members did, a communication from the Judicial Conference of the United States, complaining bitterly over the backlog in the Federal courts and seeking legislation to remove the diversity jurisdiction from the Fed-

eral courts.

For those Members who are lawyers, they know that in civil matters arising between citizens of different States and involving an amount in excess of \$10,000, exclusive of interest and costs, the party, the out-of-State party, has the option of going into a Federal forum. This has resulted in 33,000 cases pending in Federal court, where really matters of State laws are essentially involved, and it has resulted somewhat in the outdated notion that State courts are parochial or that they discriminate against out-of-State groups, which has long ceased to be the fact, if it ever were.

Mrs. FENWICK. Mr. Chairman, will

the gentleman yield?

Mr. SAWYER. I yield to the gentlewoman from New Jersey (Mrs. Fen-WICK).

Mrs. FENWICK. I thank the gentleman for yielding.

I was consumer director in my State

before I came here, and I can only tell the gentleman that when one calls up a State, sometimes a neighboring State, sometimes a State quite far away, about one of these questions, they will say, "Look, we protect our citizens; we cannot worry about what is happening to

your people in New Jersey."

But I would also like to say one thing more. It is awfuly easy to make fun of people who are up against it. There are a lot of shops who have a sign on the front which says, "Aqui habla español," and one goes in, he can buy in Spanish, but it is turned over to somebody who does not speak a word of this language. I would like to bring that to the attention of this House.

Mr. SAWYER. I thank the gentlewoman for her remarks.

I would assume, in the situation posed by the gentlewoman from New Jersey, that, whereas the State of New York might not be that interested in the people of New Jersey, the legislature and the Governor of the State of New Jersey are interested in what happens to the people in the State of New Jersey and can adopt protective State laws in any manner they see fit, as dictated by the needs of the people of the State.

Mrs. FENWICK. If the gentleman would yield further, they are collectors from out of State. We cannot control them. They have the WATS lines, or something, and they call at 2 o'clock in

the morning. It is incredible. Ask some of the debt collectors what their competitors are doing.

Mr. SAWYER. The State of New Jersey has full authority for the consequences which are occurring in the State of New Jersey, and it does not make any difference if the communication was put into transmission in New York, the violation would occur, in the State of New Jersey. It would be under the full jurisdiction of New Jersey. I see no reason here why the invocation of Federal jurisdiction should be needed just because of the transmission of interstate telephone lines and the mails are used. Why should we further proliferate Federal legislation on a subject which the State can fully handle themselves?

Mrs. FENWICK. If the gentleman will yield further, it is a problem we cannot cope with. We have 13 States without any laws at all, and 16 more States have laws so weak that they do not control any of the things we are trying to con-

trol in this bill.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. SAWYER) has expired.

(On request of Mr. WYLIE and by unanimous consent, Mr. Sawyer was allowed to proceed for 2 additional min-

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. SAWYER. I yield to the gentleman from Ohio.

Mr. WYLIE. Mr. Chairman, I am somewhat persuaded by what the gentleman says because I took the same position when I first heard about this bill, the Debt Collection Practices Act. But then we had testimony from witnesses of law-enforcement agencies from States that have consumer debt collection practices acts, including California, New Hampshire, Minnesota, New Jersey, and others.

The biggest abuse in this area, we found, is in interstate commerce, in the interstate use of the mails by the book clubs, the magazine subscription outfits, and the record clubs.

These witnesses came to us, and they said, "We would like to have a Federal law so we can have this as an option."

Mr. Chairman, I have personally had this experience, as I said in my statement a little while ago, where a magazine subscription outfit comes to the door and sells a magazine subcription; the magazine just keeps coming, and you cannot shut it off, and then the magazine supplier refers the bill to an independent debt collector. This is one area in which we are trying to legislate.

Mr. SAWYER. Mr. Chairman, I can appreciate the problem. I am not arguing that the problem does not exist.

However, the question is that there is no unique or compelling reason why we have to enact Federal legislation. The Feds have jurisdiction or have the potential of taking jurisdiction because of the use of these instrumentalities in interstate commerce. That, however, in no way precludes the States from full and operable jurisdiction over the offense within their State lines.

Mr. Chairman, I think we have enough Federal legislation, and I think by the provisions of this act we expressly recognize that we have enough Federal regulation.

Mr. BAUMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise to oppose the bill and also to ask a question of the gentleman from Illinois (Mr. Annun-

We all received a "Dear Colleague" letter dated March 31 from the gentleman directed to our offices regarding this bill. In it there appears the statement that there is support of the bill from some members of the industry, but that "there will always be opposition from the unethical element in the industry."

Mr. Chairman, I would say to the gentleman that I have received letters from persons in my district who are engaged in debt collection, none of whom are engaged in any conduct which is unethical. They have opposed this legislation because they feel it is a Federal intrusion into an industry in which they are able to take care of their own matters.

I am sure that the gentleman does not mean to imply that anyone who is opposed to this debt collection legislation or who finds himself in opposition to the Debt Collection Practices Act is unethical, does he?

Mr. ANNUNZIO. Mr. Chairman, if the gentleman will yield, the gentleman's

statement is correct.

Mr. BAUMAN. Mr. Chairman, I appreciate the gentleman's reply, and I urge my colleagues to oppose this unwise and unnecessary legislation.

Mr. ROUSSELOT. Mr. Chairman, I move to strike the requisite number of

words.

Mr. Chairman, I rise in opposition to H.R. 5294, the Debt Collection Practices Act. There are a number of reasons why it would be most unwise, in my judgment, for the House to pass this legisla-

First. The scope of this bill is arbitrarily limited to independent or third-party debt collectors, but as the American Bar Association pointed out in its statement in opposition to this bill,

Most complaints against collection practices are against other retail credit grantors, not professional collection services.

Second. Increased costs of collection and the costs of defending individual and class legal actions authorized under this legislation must ultimately be passed on to those customers who pay their bills on

Third. Credit grantors may respond to the increased exposure to legal action on the part of recalcitrant debtors by tightening their credit policies. The poor and others who have had difficulty in obtaining credit in the past may find it even more difficult to obtain credit.

Fourth. There is no need for a Federal statute governing debt collection. Most abusive debt collection practices are violations of existing State or Federal laws. The 37 States already have debt collection laws on the books, and the California law is stricter than the bill we are considering today.

I agree with my distinguished colleague from California (Mr. HANNAFORD)

who will vote for this bill, who finds "this differentiation to be inherently discriminatory against the small businesses who rely on independent debt collectors as against larger firms who generally do their collecting in house." I also share his concern "about the curbs on contacts at the place of employment, as this is often the only location available for collectors to make contact."

As my colleague from New York, Edward Pattison, a member of the Banking, Finance and Urban Affairs Commit-

tee, has said:

Who are we to impose a national system on States as diverse as New York and Utah where the problems are undoubtedly different? . . .

Our question is not whether anyone approves of this bill. Our question is "Do we need it? Will it do any good? Should it be done at this level of government?"

I suggest that the burden of proof has not been satisfied in this case, and that for this reason, the bill should not become law.

One provision of this bill which I do support is the Wylie amendment, which is intended to deny to the FTC the power to make rules and regulations to implement the new law. This amendment is intended to prevent this bill from becoming another RESPA, and we certainly hope that it works.

Nevertheless, H.R. 5294 remains, on balance, another example of an unwarranted intrusion of the Federal Government into an area in which it does not belong, the costs of which are almost certain to outweigh the benefits.

Mr. SYMMS. Mr. Chairman, will the

gentleman yield?

Mr. ROUSSELOT. I am happy to yield

to the gentleman from Idaho.

Mr. SYMMS. Mr. Chairman, I thank the gentleman very much for yielding. I was trying to catch the attention of the gentleman from Michigan (Mr. Sawyer) when he made the point that we are just adding more Federal intervention and regulation. I think he made that point very well and I would like to compliment the gentleman on that. We are adding all of that on to the present system we have that now works.

We live in a society where we have to pay our debts. I know that as Members of Congress it is very popular for Members, both Republican and Democrat, to tell the people back home that we want to cut down on needless Government regulations, needless Government agencies, reform the Government, lower taxes, and do all of these wonderful things. But, let us just remember that one cannot suck and blow in the same breath. If we want a balanced budget budget by 1981, if we want to reduce Federal regulations and cut Government, then do not pass bills like this. And that is what we are trying to do in this measure. I think we should vote this bill down.

I appreciate the good intentions of the gentleman from Ohio (Mr. Wylie) and the gentleman from Illinois (Mr. Annunzio) and the others, who really have good intentions in this bill, but I would add that it is also the desire of many of us to reduce the harassment of the citizens of this country who are already being burdened by heavy taxes to the tune of 45 cents on every dollar

earned. If the Members are interested in those citizens then this bill should be voted down. It is not needed. We need to start thinking and talking about the real things of life, where part of that is paying one's debts. Those things are realistic in this world and they cannot be avoided. By passing this legislation we are, in fact, saying that we can, somehow, through Federal regulations, stop meeting our own commitments.

Mr. ROUSSELOT. Mr. Chairman, I thank my colleague, the gentleman from Idaho, for his remarks. I know that there is never any doubt as to where he stands, just as he now has so graphically expressed it. We clearly do not need this legislation.

Mr. EDWARDS of California. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to ask the chairman of the subcommittee, the gentleman from Illinois (Mr. Annunzio) in the would explain to me what Federal crimes we are creating. I understand that we are creating some criminal li-

ability here and I would like to know specifically what Federal crimes we are creating.

Mr. ANNUNZIO. If the gentleman will reread the bill, they are set out in the bill. As the gentleman knows, this is an amendment to the Truth in Lending Act.

Consequently we are carrying out the same provisions of the act with this amendment.

It has to be willful and it has to be knowingly.

Mr. EDWARDS of California. Willfully and knowingly doing what?

Mr. ANNUNZIO. To violate the provisions of this bill.

Mr. EDWARDS of California. I still would like to know what they are.

Mr. ANNUNZIO. To do that I would have to read every one of them.

Mr. EDWARDS of California. Would the gentleman from Illinois read me one or two of the crimes that we are creating?

Mr. ANNUNZIO. Will the gentleman yield?

Mr. EDWARDS of California, Certainly I yield to the gentleman from Illinois, if the gentleman will tell me what specific Federal crimes we are creating for which the Federal Bureau of Investigation would have to investigate or the Department of Justice would have to impanel grand juries concerning them.

Mr. ANNUNZIO. Calling the consumer's employer too frequently and in such a manner that the consumer may lose his

Calling a consumer at work so frequently as to possibly make him lose his job.

Calling a consumer's home in the middle of the night.

Calling a consumer's home every 5 minutes all day.

Threatening a consumer's family that he is going to be arrested or go to jail.

Falsely telling a consumer his child has been in an accident and undergoing surgery at the hospital in order to contact the consumer.

Sending phony legal documents. Falsely threatening lawsuits. And on and on and on. Mr. EDWARDS of California. Is this the kind of work the gentleman wants the FBI to investigate on a daily basis and wants the Federal Department of Justice and the U.S. attorneys throughout the country to spend their time on?

Mr. ANNUNZIO. What is going on?

What are they doing now?

Mr. EDWARDS of California. There are three pages of crimes that the FBI is responsible for now.

Mr. ANNUNZIO. The gentleman from California is an able lawyer, and the gentleman specifically states knowingly and

willfully, 19 pages.

We worked long and hard on the legislation, and it is spelled out. It is an amendment to the truth-in-lending bill. It is a bill that has the approval of the association. As I pointed out at the beginning of my statement, what we are trying to do is to curb debt collection abuses, and that is exactly what this bill will do—nothing else. If it cures that ill in our society, with all the hundreds and thousands of complaints that the subcommittee has received, then we will have achieved our purpose.

I will also point out to the gentleman from California that all of the States' witnesses that appeared before us representing the various offices of the attorneys general and the consumer fraud divisions in those States all asked for this legislation. They asked for help because the problem is so large they cannot cope with it in their own particular States.

Mr. EDWARDS of California. I thank the gentleman. Several years ago we passed a bill here late in the afternoon to make it a Federal crime to turn back odometers. The FBI had to hire 10 more agents to stop this practice around the country, when it was really a matter for the States to handle. Has the gentleman found out from the Department how many more FBI agents they are going to have to hire to investigate these crimes? I presume not.

The CHAIRMAN. The time of the gen-

tleman has expired.

Are there further amendments? There being no further amendments, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. Long of Louisiana, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (HR 5204) to amond the

State of the Union, reported that that Committee, having had under consideration the bill (H.R. 5294) to amend the Consumer Credit Protection Act to prohibit abuse practices by debt collectors, pursuant to House Resolution 469, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

Mr. Butler against. Mr. Dicks for, with Mr. Young of Florida against.

Mr. Wirth for, with Mr. Trible against. Mr. Clay for, with Mr. Dickinson against.

Mr. Diggs for, with Mr. Kemp against. Mr. Heftel for, with Mr. Staggers against.

Until further notice:

Mr. Roe with Mrs. Chisholm.

Mr. Obey with Mr. Aspin. Mr. Eckhardt with Mr. Ford of Michigan. Mr. Quie with Mr. Jones of Oklahoma.

Mr. Anderson of Illinois with Mr. Smith of Iowa

Mr. Jeffords with Mr. Waxman. Mr. Pursell with Mr. Charles H. Wilson of California.

Mr. SIKES and Mr. HEFNER changed their vote from "yea" to "nay."

Mr. YOUNG of Texas and Mr. GON-ZALEZ changed their vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ANNUNZIO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and include extraneous material, on the bill H.R. 5294, just passed.

The SPEAKER. Is there objection to the request of the gentleman from

Illinois?

There was no objection.

FURTHER MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4800) entitled "An act to extend the Emergency Unemployment Compensation Act of 1974 for an additional year, to revise the trigger provisions in such Act, and for other purposes."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3365) entitled "An act to extend the authority for the flexible regulation of interest rates on deposits and accounts in depository institutions, and for other

purposes.

CONFERENCE REPORT ON H.R. 3365, EXTENDING AUTHORITY FOR THE FLEXIBLE REGULATION OF INTEREST RATES ON DEPOSITS AND ACCOUNTS IN DEPOSITORY INSTITUTIONS

Mr. ANNUNZIO submitted the following conference report and statement on the bill (H.R. 3365) to extend the authority for the flexible regulation of interest rates on deposits and accounts in depository institutions, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 95-160)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3365) to extend the authority for the flexible regulation of interest rates on deposits and accounts in depository institutions, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate to the text of the bill and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate

amendment insert the following:

TITLE I

SEC. 101. Section 7 of the Act of September 21, 1966 (Public Law 89-597), is amended by striking out "March 1, 1977" and insert-ing in lieu thereof "December 15, 1977".

TITLE II

Sec. 201. Section 14(b) of the Federal Reserve Act (12 U.S.C. 355) is amended (1) by

striking out "November 1, 1976" and inserting in lieu thereof "November 1, 1978"; and (2) by striking out "October 31, 1976" and inserting in lieu thereof "October 31, 1978".

TITLE III

SEC. 301. Section 201 of the Federal Credit Union Act (12 U.S.C. 1781) is amended by repealing subsection (c)(3) thereof.

SEC. 302. (a) Paragraph (5) of section 107 of the Federal Credit Union Act (12 U.S.C. 1757) is amended to read as follows:

(5) to make loans, the maturities of which shall not exceed twelve years except as otherwise provided herein, and extend lines of credit to its members, to other credit unions, and to credit union organizations and to participate with other credit unions, credit union organizations, or financial organizations in making loans to credit union members in accordance with the following:

'(A) Loans to members shall be made in conformity with criteria established by the board of directors: Provided, That-

(i) a residential real estate loan which is made to finance the acquisition of a oneto-four-family dwelling for the principal residence of a credit union member, the sales price of which is not more than 150 per centum of the median sales price of residential real property situated in the geographical area (as determined by the board of directors) in which the property is located, and which is secured by a first lien upon such dwelling, may have a maturity not exceeding thirty years, subject to the rules and regulations of the Administrator;

"(ii) a loan to finance the purchase of a mobile home, which shall be secured by a first lien on such mobile home, to be used by the credit union member as his residence, or for the repair, alteration, or improvement of a residential dwelling which is the residence of a credit union member shall have a maturity not to exceed fifteen years unless such loan is insured or guaranteed as pro-

vided in subparagraph (iii);

"(iii) a loan secured by the insurance or guarantee of the Federal Government, of a State government, or any agency of either may be made for the maturity and under the terms and conditions specified in the law under which such insurance or guarantee is

"(iv) a loan or aggregate of loans to a director or member of the supervisory or credit committee of the credit union making the loan which exceeds \$5,000 plus pledged shares, be approved by the board of directors;

"(v) loans to other members for which directors or members of the supervisory or credit committee act as guarantor OF dorser be approved by the board of directors when such loans standing alone or when added to any outstanding loan or loans of the guarantor or endorser exceeds \$5.000:

"(vi) the rate of interest not exceed 1 per centum per month on the unpaid balance

inclusive of all service charges;

"(vii) the taking, receiving, reserving, or charging of a rate of interest greater than is allowed by this paragraph, when knowingly done, shall be deemed a forfeiture of the entire interest which the note, bill, or other evidence of debt carries with it, or which has been agreed to be paid thereon. If such greater rate of interest has been paid, the person by whom it has been paid, or his legal representatives, may recover back from the credit union taking or receiving the same, in an action in the nature of an action of debt, the entire amount of interest paid; but such action must be commenced within two years from the time the usurious collection was made;

"(viii) a borrower may repay his loan, prior to maturity in whole or in part on any busi-

ness day without penalty;

"(ix) loan shall be paid or amortized in accordance with rules and regulations prescribed by the Administrator after taking into account the needs or conditions of the borrowers, the amounts and duration of the loans, the interests of the members and the credit unions, and such other factors as the Administrator deems relevant.

"(A) A self-replenishing line of credit to borrower may be established to a stated maximum amount on certain terms and conditions which may be different from the terms and conditions established for another borrower.

(C) Loans to other credit unions shall be approved by the board of directors.

(D) Loans to credit union organizations shall be approved by the board of directors and shall not exceed 1 per centum of the paid-in and unimpaired capital and surplus of the credit union. A credit union organization means any organization as determined by the Administrator, which is established primarily to serve the needs of its member credit unions, and whose business relates to the daily operations of the credit unions they serve.

"(E) Participation loans with other credit unions, credit union organizations, or financial organizations shall be in accordance with written policies of the board of directors;".

(b) Paragraph (6) of such section is repealed.

SEC. 303. (a) Paragraph (7) of section 107 of the Federal Credit Union Act (12 U.S.C. 1757) is redesignated as paragraph (6) and

is amended to read as follows:

'(6) to receive from its members, from other credit unions, from an officer, employee, or agent of those nonmember units of Federal, State, or local governments and politi-cal subdivisions thereof enumerated in section 207 of this Act and in the manner so prescribed, and from nonmembers in the case of credit unions serving predominately low-income members (as defined by the Administrator) payments on shares which may be issued at varying dividend rates, and pay ments on share certificates which may be issued at varying dividend rates and maturities, subject to such terms, rates, and conditions as may be established by the board of directors, within limitations prescribed by the Administrator."

(b) Paragraph (8) of such section is redesignated as paragraph (7) and amended by adding the following paragraph:

"(I) In the shares, stocks, or obligations of any other organization, corporation, or association which strengthens or advances the development of credit unions or credit union organizations, up to 3 per centum of the total paid-in and unimpaired capital and surplus of the credit union with the approval

of the Administrator;".
(c) Paragraphs (9) through (14) of section 107 are redesignated paragraphs (8)

through (13).

(d) Paragraph (13), as redesignated, section 107 is amended by inserting after the first comma the following: "to purchase, sell, pledge, or discount or otherwise receive or dispose of, in whole or in part, any eligible obligations (as defined by the Administrator) of its members and".

(e) Section 107 is further amended by adding the following new paragraph after para-

graph (13):

'(14) to sell all or a part of its assets to another credit union, to purchase all or part of the assets of another credit union and to assume the liabilities of the selling credit union and those of its members subject to regulations of the Administrator;".

SEC. 304. Section 114 of the Federal Credit Union Act (12 U.S.C. 1761c) is amended as

follows:

(1) by adding "and lines of credit" after "loans" in the first sentence;

(2) by striking "No loan shall be made unless approved" in the third sentence and in-serting in lieu thereof "Except for those loans or lines of credit required to be approved by the board of directors in section 107(5) of this Act, approval of an application shall be"

and by adding "and lines of credit" after "the

power to approve loans";
(3) by striking "loan" as it appears after "each" and before "approved" in the fourth sentence, and inserting in lieu thereof 'application":

(4) by striking "loans" in the fifth senand inserting in lieu thereof tence

'applications":

(5) by striking "for any loan which" in the sixth sentence and inserting in lieu thereof with respect to any loan or line of credit for which the application";

(6) by adding "and lines of credit" after "loans" in the eighth sentence and by striking "the purpose for which the loan is desired":

(7) by striking the ninth sentence; and

(8) by striking "\$200 or" and "whichever is greater", in the tenth sentence.

SEC. 305. Section 116 of the Federal Credit Union Act (12 U.S.C. 1762) is amended by striking out the first sentence of subsection (a) and inserting in lieu thereof "At the end of each accounting period the gross income shall be determined." and by striking out all after the colon in subsection (a), by striking out subsection (b), and by inserting in lieu thereof the following:

'(1) A credit union in operation for more than four years and having assets of \$500,000 or more shall set aside (A) 10 per centum of gross income until the regular reserve shall equal 4 per centum of the total of outstanding loans and risk assets, then (B) 5 per centum of gross income until the regular reserve shall equal 6 per centum of the total of outstanding loans and risk assets.

'(2) A credit union in operation less than four years or having assets of less than \$500,000 shall set aside (A) 10 per centum of gross income until the regular reserve shall equal 71/2 per centum of the total of outstanding loans and risk assets, then (B) 5 per centum of gross income until the regular reserve shall equal 10 per centum of the total of outstanding loans and risk assets.

"(3) Whenever the regular reserve falls below the stated per centum of the total of outstanding loans and risk assets, it shall be replenished by regular contributions in such amounts as may be needed to maintain the

stated reserve goals.

"(b) The Administrator may decrease the reserve requirement set forth in subsection (a) of this section when in his opinion such a decrease is necessary or desirable. The Administrator may also require special reserves to protect the interests of members either by regulation or for an individual credit union in any special case."

SEC. 306. Subsection (b)(3)(B) of section 120 of the Federal Credit Union Act (12 U.S.C. 1766) is amended by striking out "shares" and inserting in lieu thereof "member ac-

counts"

SEC. 307. (a) Subsection (g) (1) of section 206 of the Federal Credit Union Act (12 U.S.C. 1786) is amended by striking out "and that such violation or practice or breach of fiduciary duty is one involving personal dishonesty on the part of such director, officer, or committee member"

(b) Subsection (g) (2) of such section is amended by changing "dishonesty and unfitness" to read "dishonesty or unfitness"

each place it appears therein.

SEC. 308. Paragraph (4) of section 101 of the Federal Credit Union Act (12 U.S.C. 1752), the second time it appears therein, is amended by inserting immediately before the semicolon at the end thereof the following: and such terms mean those accounts nonmember credit unions and nonmember units of Federal, State, or local governments and political subdivisions thereof in which payments are received by a credit union pursuant to section 107(6) of this Act;"

SEC. 309. The third sentence of section 113 of the Federal Credit Union Act (12 U.S.C. 1761b) is amended by striking out "that may

be held by an individual" and inserting in lieu thereof "and share certificates and the classes of shares and share certificates that may be held", and by striking out "and the maximum amount which may be loaned with or without security to any member" and inserting in lieu thereof ", the security, and the maximum amount which may be loaned or

provided in lines of credit".

SEC. 310. Section 117 of the Federal Credit Union Act (12 U.S.C. 1763) is amended to

read as follows:

"DIVIDENDS.—At such intervals as the board of directors may authorize, and after provision for required reserves, the board may declare, pursuant to such regulations as may be issued by the Administrator, a dividend to be paid at different rates on different types of shares and at different rates and maturity dates in the case of share certificates. Dividend credit may be accrued on various types of shares and share certificates as authorized by the board of directors.".

And the Senate agree to the same.

HENRY REUSS, FERNAND ST GERMAIN, FRANK ANNUNZIO, JERRY M. PATTERSON, JOHN J. LAFALCE, J. WILLIAM STANTON. JOHN H. ROUSSELOT,
Managers on the Part of the House.

WILLIAM PROXMIRE, THOMAS J. MCINTYRE, JOHN SPARKMAN. EDWARD W. BROOKE, Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3365) to extend the authority for the flexible regulation of interest rates on deposits and accounts in depository institutions, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Senate amendment to the text of the bill struck out all of the House bill after the enacting clause and inserted a substitute text.

The House recedes from its disagreement to the amendment of the Senate with an amendment which is a substitute for the House bill and the Senate amendment. The differences between the House bill, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

The House bill provided that the authority for the flexible regulation of interest rates on deposits and accounts in depository institutions would be extended to March 1, 1978. The Senate bill provided that this authority would extend to October 1, 1977. The conferees agreed to an extension of the authority to December 15, 1977.

The House bill provided that savings and loan associations chartered by the Federal Home Loan Bank Board be allowed to permit withdrawals, overdrafts, or transfers of accounts on negotiable, transferable, or nonnegotiable check, order, or authorization, to such extent and subject to such requirements and conditions as may be applicable under New York State law to institutions of the same type chartered under the laws of New York State. The Senate bill contained no comparable provision. The conferees rejected the House provision.

The House bill provided for an extension of the Treasury Department's authority to bor-row funds from the Federal Reserve System to August 31, 1977. The Senate bill contained no comparable provision. The conferees accepted the House provision.

The House bill provided for the modernization of the Federal Credit Union Act. The Senate bill contained no comparable provision. The conferees accepted the House pro-

An agreement was reached concerning the credit union mortgage lending authority. The House bill contained a provision which limited the sales price of dwellings eligible for credit union mortgage lending approval to a price not in excess of 150 percent of the median sales price of residential real property situated in a geographic area in which the property is located. The conferees agreed that such sales price shall be determined to the extent feasible on a market area basis. In those instances where a determination on a market area basis is not available, the sales price limitation shall be based upon the appropriate regional figures. In all instances, the National Credit Union Administration shall be the ultimate arbiter of the policies and procedures of federal credit unions in their determination of a median sales price pursuant to section 402 of this Act.

HENRY REUSS FERNAND ST GERMAIN. FRANK ANNUNZIO, JERRY M. PATTERSON, JOHN J. LAFALCE, J. WILLIAM STANTON, JOHN H. ROUSSELOT, Managers on the Part of the House.

WILLIAM PROXMIRE, THOMAS J. MCINTYRE, JOHN SPARKMAN, EDWARD W. BROOKE. Managers on the Part of the Senate.

ADJOURNMENT OF HOUSE ON WEDNESDAY, APRIL 6, 1977, AND SENATE ON THURSDAY, APRIL 7, 1977, UNTIL MONDAY, APRIL 18,

Mr. WRIGHT. Mr. Speaker, I offer a privileged concurrent resolution (H. Con. Res. 186) and ask for its immediate consideration.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 186

Resolved by the House of Representatives (the Senate concuring), That when the House adjourns on Wednesday, April 6, 1977, it stand adjourned until 12 o'clock meridian on Monday, April 18, 1977, and that when the Senate recesses on Thursday, April 7, 1977, it stand in recess until 12 o'clock meridian on Monday, April 18, 1977.

The concurrent resolution was agreed

A motion to reconsider was laid on the

ADDITION TO LEGISLATIVE PRO-GRAM FOR TOMORROW

Mr. WRIGHT. Mr. Speaker, I take this time to advise the Members that tomorrow there will be one additional bill on the list of suspensions. This is a bill that was not announced on last Thursday.

This additional measure is H.R. 5717, providing for the relief of victims of the Romanian earthquake. There being three suspensions on the list now, votes on suspensions will be deferred until the completion of debate on all three bills.

RESIGNATION AS MEMBER OF SPE-CIAL COMMISSION ON ADMINIS-TRATIVE REVIEW

The SPEAKER laid before the House the following resignation as a member of the Special Commission on Administrative Review:

WASHINGTON, D.C., March 29, 1977.

Hon. THOMAS P. O'NEILL, Jr., Speaker of the House of Representatives.

DEAR TIP: Now that I have been confirmed by the Senate and sworn in as Under Secretary of State for Security Assistance, Science and Technology, I regretfully must resign as a member of the Special Commission on Administrative Review. I was very pleased to have been asked to serve on that Commission and to have had a chance to work with David Obey as well as the other members of the Commission.

David has been an exceedingly good Chairman and we all have appreciated your strong interest and support in dealing with these very sensitive matters. I regret I will not be able to be involved in the remainder of the

Committee's work.

Please accept my resignation with great regrets! All my best to you.

LUCY WILSON BENSON.

The SPEAKER. Without objection, the resignation is accepted. There was no objection.

RESIGNATION AS MEMBER AND AP-POINTMENT OF MEMBER OF SE-LECT COMMITTEE ON NARCOTICS ABUSE AND CONTROL

The SPEAKER laid before the House the following resignation as a member of the Select Committee on Narcotics Abuse and Control:

WASHINGTON, D.C., March 15, 1977.

Hon. THOMAS P. O'NEILL, Jr., Speaker, House of Representatives, Washing-D.C.

DEAR MR. SPEAKER: I must regretfully resign from the Select Committee on Narcotics Abuse and Control. The heavy demands of my other committee assignments have simply made it impossible for me to give the work of the select committee the attention

I greatly appreciate having had this opportunity to serve on the select committee. I consider its mandate to study the problem of narcotics abuse a critically important area for intensive congressional review.

Thank you for your consideration in this

Sincerely,

HENRY A. WAXMAN, Member of Congress.

The SPEAKER. Without objection, the resignation is accepted.

There was no objection.

The SPEAKER. Pursuant to the provisions of House Resolution 75, 95th Congress, the Chair appoints the gentleman from Georgia (Mr. Evans) as a member of the Select Committee on Narcotics Abuse and Control to fill the existing vacancy thereon.

WORK ON BREEDER REACTOR SHOULD GO FORWARD

(Mrs. LLOYD of Tennessee asked and was given permission to address the House for 1 minute, to revise and extend her remarks and include extraneous matter)

Mrs. LLOYD of Tennessee. Mr. Speaker, during recent weeks more and more attention has focused on President Carter's energy message of April 20. However, a large portion of the public has become deeply concerned by the administration's apparent decision to terminate the development of a breeder reactor. The breeder reactor, as has been testified to over and over by the utility industry, is the essential next step in the development of nuclear power for domestic

It would serve little point to go into the technical details of the breeder's potential at this time. However, it should be noted that the opposition to the breeder comes from those who express concern over the potential for proliferation of plutonium which is a byproduct of the breeder. I am inserting at this time an article from the Washington Post of Friday last, April 1, by Mr. J. W. Anderson. The article points out quite clearly the futility of trying to persuade other nations of the world to end their plans for developing breeder technology.

While I do not agree with Mr. Anderson's opinions on the proper role for U.S. development of breeder reactors, I believe his conclusions about the development of this technology by foreign countries are completely accurate.

Thank you very much. The article follows:

THE POLITICS OF PLUTONIUM

(By J. W. Anderson)

The plutonium breeder reactor has a lot in common with the Concorde, the super-sonic jet, as a device for souring this country's relations with Europe. In political terms the chief difference between the two is that the breeder reactor touches immensely greater national interests. If American nuclear policies are not managed with very great skill, they will inflict a degree of damage of which the surprisingly bitter row over Concorde provides only the mildest warning.

Once upon a time people thought that high technology would tie nations together, because of the need for scientific cooperation massive investments. That happy thought turns out to have been a bit too optimistic. The United States now seems to be in the process of changing its mind about plutonium as a commercial fuel. The U.S. government is beginning to discourage the dispersal of this technology around the world. That's the issue in the Carter administration's attempt to interrupt the sale of West German plutonium equipment to Brazil.

Consider the parallel with Concorde. The United States chose not to build it-but the British and French partnership decided differently. Now the machine is in the air, and it wants to land in New York. Americans complain about the noise, but Europeans consider that objection to be hardly more than a veil for crass commercial protectionism plus, perhaps, a strain of resentment at a technology that does not have the American flag stamped on it. The issues here are really rather minor: costs, noise levels and whether your trip to Europe takes eight hours or four. But the politics of the landing rights has become disproportionately divisive.

Concorde, Unlike energy technology touches national necessities of the first order Europeans sharply point out that the United States enjoys the luxury of reconsidering plutonium only because-unlike Europe-

this country has vast reserves of coal and plenty of uranium. Plutonium is derived from uranium. But the magic of the breeder reactor is that it produces about 70 times as much energy, per pound of uranium, as the uranium-fueled light water reactors producing electricity in this country. There's a price to be paid for this magic-plutonium as a fuel is vastly more dangerous than uranium.

Europe is prepared to take that risk. Europeans now see the breeder reactor as the ultimate answer to their dependence on foreign fuel sources. Which foreign sources? For one, the United States which, to be candid, has given other nations reason to be

cautious about its reliability. The United States has been the Europeans' main supplier of enriched uranium for the present generation of commercial reactors. But recently the United States has been vague and noncommittal about its plans for expanding its uranium exports. There has also been increasing strain over the controls that the United States wants to put on the fuel that it sells-controls that Europeans consider unnecessary and demeaning. Because of these uncertainties and disagreements, Europe has now begun to buy enriched uranium from the Soviet Union which, as one European official puts it, is much more

flexible.

But this choice between American and Russian supplies only reinforces the Europeans' intense desire to unhook themselves from both of the superpowers-and to use their own great command of technology to achieve both independence and security of supply. The major European powers have already gone a very long way in their commitment to the development of plutonium breeder reactors. France and Britain have both had experimental breeders running since the 1960s. Germany has one in operation now, and there's another under construction in Italy. As for the much bigger commercial breeders. France has now decided to go ahead with the world's first-the 1200 megawatt Superphenix. A 1300 megawatt breeder is under design in Britain.

These pronotypes demonstrate the European command over the technology. But here we come back to the Concorde analogy again. They won't be competitive, in economic terms, unless they are widely used. There is going to be fierce pressure on European governments to export these machines, to help pay for the enormous development costs. The German sale of the plutonium reprocessing plant to Brazil isn't the last of these cases. It's more likely to be only the first.

American ideas on the subject currently run strongly in favor of U.S. guarantees to deliver enriched uranium to Europe, in order to make plutonium reprocessing unnecessary. But Europeans fear that U.S. policy might be subject to change with each successive President, and that internationalization of the reprocessing plants will only dilute their own control.

The United States still has time to back away from the plutonium breeder. But it's too late for Americans to persuade Europe or, for that matter, Japan) to come with them. At this point, the only realistic goal for U.S. policy is to try to limit the worldwide traffic in plutonium to those countries with very large requirements for electric power-and with proven records in weapons control. That much of a policy is necessary, but even going that far threatens an unpleasantly high level of friction between this country and Europe.

Advanced technologies, it turns out, quickly become national symbols of deep emotional force. If you doubt it, keep watching Concorde.

TRIBUTE TO DR. MARC J. MUSSER. FORMER CHIEF MEDICAL DIREC-TOR OF THE VETERANS' ADMIN-ISTRATION

(Mr. ROBERTS asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. ROBERTS. Mr. Speaker, it is with sorrow I report that on the morning of March 29, 1977, a great physician who had served his country well both in war and in peace passed away at the Veterans' Administration Hospital in Washington, D.C.

Dr. Marc J. Musser served as the Chief Medical Director of the Department of Medicine and Surgery, Veterans' Administration from January 5, 1969 until April 15, 1974. Prior to that he had served in the VA at all levels, having entered the service as the chief of staff at the VA hospital, Houston, Tex. Later he became the Director of the Research Service in the central office in Washington, D.C., the Assistant Chief Medical Director for Research and Education and the Deputy Chief Medical Director.

In 1966 Dr. Musser left the service of the VA to become the executive director of the North Carolina regional medical program with appointments to the academic staff at Duke University, Bowman Gray School of Medicine, and the University of North Carolina. It was from this position that he was recalled to become Chief Medical Director of the Veterans' Administration.

Dr. Musser had a very distinguished military record. He was commissioned in the Wisconsin National Guard in April 1939, and assigned to the 135th Medical Regiment from which he entered active Federal service in the grade of major in January 1941. He was promoted to lieutenant colonel of the Medical Corps in April of 1943 and in June of that year assumed command of the 135th Medical Regiment—later designated as the 135th Medical Group probably the largest and most important medical command serving in the war against Japan. He was promoted to colonel in December of 1944 at the age of 34 and spent more than 3 years as a medical commander in the Southwest Pacific area.

For his service in this position the U.S. Army awarded him the Legion of Merit. After his separation from active military service he accepted a commission as a colonel in the Medical Corps of the U.S. Army Reserves from which he transferred to the Wisconsin National Guard in June of 1947 and was assigned as the surgeon in the office of the adjutant general of the State of Wisconsin. He later transferred to the Texas National Guard in April of 1958 and was assigned as a commanding officer of the 117th Armored Medical Battalion.

Prior to his entry into the service in World War II, Dr. Musser was a prominent member on the faculty of the University of Wisconsin School of Medicine. After his graduation from that school of medicine in 1934, he served an internship at Kansas City General Hospital in Kansas City, Mo., then returned

to his alma mater, the University of Wisconsin, to serve in residency positions at the Wisconsin General Hospital in both internal medicine and neuropsychiatry from 1935 to 1938. After completion of his residency training, Dr. Musser served as instructor and assistant professor in neuropsychiatry at the University of Wisconsin School of Medicine as well as assistant professor, associate professor and full professor in internal medicine at that school. Upon his entry into the service of the Veterans' Administration as a chief of staff at the Houston VA Hospital, he was appointed a professor of medicine at the Baylor University College of Medicine.

In addition to the Legion of Merit, Dr. Musser was awarded the American Defense Medal, the Asiatic-Pacific Theatre Campaign Ribbon with six battle stars, the American Theatre Defense Ribbon, the World War II Victory Medal, the Commendation Medal for the Papuan Campaign, the Philippine Liberation Medal, the Philippine Presidential Citation, and the Reserve Medal.

Dr. Musser was a member of numerous professional societies and organizations and has had many scientific and professional articles published in the area of his specialties. He served as president of the Association of Military Surgeons in 1971.

Mr. Speaker, Dr. Musser will be buried with military honors and laid to rest in Arlington National Cemetery on Friday, April 1, 1977. With his passing the American veteran and the medical profession has suffered a great loss. He will be sorely missed.

SELECT COMMITTEE ON ASSASSINATIONS

The SPEAKER. Under a previous order of the House, the gentleman from Texas (Mr. Gonzalez) is recognized for 60 minutes

Mr. GONZALEZ. Mr. Speaker, a questionable precedent has been established by the House leadership when it allowed the rules of the House and the mandate of the House to be flouted. When the House approved House Resolution 222, the so-called Bolling resolution, on February 2, it made it clear that it was reestablishing the Select Committee on Assassinations only for a period of time not to exceed March 31, and, repeatedly reflected in a litany of statements by the same leaders and everyone else, that under no circumstances would the expenditures allocated for the purposes of carrying out the work of the committee exceed \$84,333 per month.

Nevertheless, somehow, sometime, in some yet to be publicly stated manner, this same committee, by its own admission has overspent \$200,000. Apparently, judging by what the present chairman told the House on Wednesday, March 30, the fact that these moneys are owing the House contingency fund, rather than the funds allotted to the committee, seems to make that excess legitimate.

How did this come to pass? If the House mandated only \$84,333 for this purpose why did the committee get its hands on \$200.000 more without coming back to the House? Did the leadership

do this, and if so, by virtue of what authority?

The present chairman bragged that when he assumed that position there were no moneys for phone calls, travel, et cetera, but that he has taken care of those things. Naturally, the mandate of the House was being respected, and the adamant refusal of the chief counsel then to even discuss economy and the need to trim surplus staff and unnecessary expenditures was thereby condoned by the majority of the committee, and, apparently with the consent of the leadership—there simply was no money for those items.

But now let us suppose that another committee of the House, standing or select, decides it wants more money than what the authorization allows it, shall it too not have the same privilege of dipping into the House contingency fund? And if not, why not? Shall it depend on the momentary caprice or whim of the leadership? Is there some other method? Is this the great budgetary control reform the House leaders and others boast of? If this has been permitted to happen without a whimper, what other shoddy bits of financial wheeling and dealing is the House guilty of, that nobody knows about or cares to say anything about, simply because it is in the domain of a few, privileged and unaccountable peo-

I have also charged that expense vouchers for expenses, other than salary, incurred in 1976, have been paid, somehow, some way, within the last month and a half. Out of what funds? Who authorized 1977 funds to pay 1976 deficits.

Nobody has asked, nobody apparently cares.

The House has not heard the last of this malodorous business. It will be haunted and hag-ridden by embarrassments in the making. One in particular was the matter of the unauthorized and mysterious connections between the recently departed chief counsel and the Cuban ambassador to the U.N. Why has no accounting been demanded?

In that connection I offer a statement from one of the former assistant counsels and attorney-investigators of the committee, Mr. Kenneth Brooten:

(c) Actions involving international relations. On or about December 1, 1976, while was in Mexico City interviewing witnesses, Mr. Sprague advised me that he had received information that if I went to the Cuban Embassy in Mexico City, they would provide me with information about Oswald. I advised that, in my judgment, such action would be an "Act of State," and proceeded to discuss the matter with the American Ambassador, Joseph John Jova. Upon my return to Washington, Mr. Sprague proceeded through the Department of State Liaison who advised of several alternatives for obtaining such information. Mr. Sprague chose to go through an intermediary, Carl Migdale, a U.S. News and World Reporter, who was apparently a friend of Mr. Sprague and who was interviewed by him. Because of the sensitive nature of the subject, I assumed that Mr. Sprague had contacted members of the Committee as to how they wished to proceed-he had not! As I recall, Mr. Gonzalez was particularly upset since there had been "reports" that Cuba was seeking to normalize relations with the U.S. and any actions which were taken in the name of the Committee could have had an effect upon

the government of Cuba. In another instance, a nurse who had been at Parkland Hospital in Dallas was called in Camaroon by staff members of the Committee. I took a call from the Department of State Liaison advising that the simple placing of the call by the "Assassination Committee," had caused some problem with the government of Camaroon. As I am sure you can well understand, incidents of this nature, however well intentioned, can cause considerable embarrassment to the Congress, especially when taken without prior consultation, guidance, and instructions from the Committee. It seems to me the proper protocol for such situations is for the Committee Chairman to contact the Department of State and then proceed with their guidance.

But, I submit that a committee made up with Members of the House who cannot deal with the truth regarding their chief counsel cannot be expected to deal with the truth regarding the assassinations of President John F. Kennedy and Dr. Martin Luther King—even if they should stumble upon it.

I submit for the RECORD the article by George Lardner, Jr. of last Friday, April 1, 1977, as an example of this inability to handle the truth:

ASSASSINATIONS PANEL STUDIED "CHORE-OGRAPHY" AS THE ART OF SURVIVAL

(By George Lardner, Jr.)

The House Assassinations Committee spent much of its time at a secret meeting two weeks ago on the "choreography" and "scenario" for winning congressional and public support of its inquiry.

"This, of course, is not the way to conduct an investigation," Rep. Samuel L. Devine (R-Ohio) observed at one point, according to a transcript of the session that was released inadvertently. "But what we are talking about today is survival."

talking about today is survival."

At another point, committee Chairman Louis Stokes (D-Ohio) was reminded of the members of the press waiting outside the meeting room and was asked what he might tell "these wolves outside the door."

"I think you should keep them right where you have them now, champing at the bit and not tell them anything," advised Rep. Floyd J. Fithian (D-Ind.).

The March 17 meeting came at a time when the committee was still struggling to survive in the wake of weeks of acrimony over the efforts of former Chairman Henry B. Gonzalez (D-Tex.) to fire the committee's chief counsel, Richard A. Sprague. House leaders, already chagrined by the committee's slow pace in investigating the murders of President Kennedy and the Rev. Martin Luther King, Jr., were widely predicting its likely downfall.

With Stokes as their new chairman, committee members seemed to have been heartened by the publicity stemming from the public hearing of the day before, March 16, at which gangland leader Santo Trafficante, Jr., refused to testify, invoking the Fifth Amendment and other constitutional rights.

Rep. Robert W. Edgar (D-Pa.) proposed another public hearing that might include "something like what we did yesterday" when "we had Mr. Trafficante there and he was pleading the Fifth Amendment."

"I think we did more yesterday, even without getting factual information, simply because it focused again on the fact that we are looking into the issue," Edgar said enthusiastically.
"... I realize that, in terms of the investi-

"... I realize that, in terms of the investigative technique and issues, that is not the way to go," the Pennsylvania Democrat added, "but I guess I have some concern about the scenario and the choreography and I realize that while we do not want a circus atmosphere, we want it to be as content-filled as possible..."

In the continuing discussion, Fithian cautioned against placing too much reliance on press coverage of public hearings by the committee. He complained specifically about cov-

erage in The Washington Post.

Fithian agreed, however, that the two or three public meetings the committee had had were helping to erode the feeling generally held by many members of the House that "we really have not done anything" even "regardless of how badly Lardner [Washington Post staff writer George Lardner Jr.] has reported them, and he has reported them pretty badly."

Suggestions were made for secret briefings of the House Democratic leadership and other influential members of Congress such as the members of the Rules Committee. Edgar kept suggesting a follow-up public hearing that might include a discussion of

the budget and other matters.

He said the meeting could begin with a 45-minute segment, "split between the Ken-nedy and King assassinations as to what direction we are going and what evidence and information we can share publicly."

Deputy chief counsel Robert J. Lehner, the man in charge of the King investigation, said later in the meeting he would really be hard put to hold forth in public for the requisite length of time.

"I think when you talk about 45 minutes, I would have to do a little 'soft shoe dance' in the middle of it," Lehner told the com-

mittee.

Sprague agreed that a public session on the fruits of the investigation wouldn't work because the staff would be forced to serve up "almost a rehash" of what has long been

public.

That, Sprague emphasized, would amount to "not saving anything." He said that "the only things that they [the staff] can say of significance" are "things that are too raw and uncorroborated for us to be stating publicly."

In the end, the committee, which survived its House test narrowly this week but only after Sprague resigned, simply issued a report listing some of the uncorroborated leads

it is pursuing.

At the March 17 meeting, committee members also agreed that the report should say nothing "of the impediments and the financial limitations and the problem of the pre-vious Chairman [Gonzalez]."

Sprague asked how those sore points should

be treated in the committee report.

"Ignored, I would say, completely," Chair-

man Stokes ordered.
"Benign neglect," interjected Rep. Christopher Dodd (D-Conn.).

Stokes, a black congressman from Cleve land, agreed. "Yes," he said. "That deplorable

The March 17 transcript was inadvertently released late Wednesday after the committee had authorized release of another hitherto secret transcript containing Sprague's rebuttal of various charges against him.

Ever since last Thursday morning when the news began to flash that Richard A. Sprague has resigned as the Chief Counsel and Staff Director of the House Select Committee on Assassinations, I have been receiving telegrams and letters in my office saying that "right fi-

nally prevailed," or words to that effect. However, Mr. Sprague's resignation does not end the basic problem which plagues the House Select Committee on Assassinations for not one of these members of the committee has yet to deal with any of the charges against Mr. Sprague.

In an executive session held by the committee on March 16 Mr. Sprague was. in a fashion, questioned regarding these

charges. The transcript reveals that actually nothing of a substantive nature was asked Mr. Sprague. It was all very generalized with no one asking any direct questions of any consequence regarding the charges I laid before the committee, and which the committee refused to consider.

What now? With Mr. Sprague's departure, one might assume from the press reports that the investigations are going on. I guess they are, after a fashion, and despite undercover agents, according to Norman Mailer.

All of this is very sad because I have sought, as had many Americans, a serious review of the political assassinations of our country, for more than 2 years.

Mr. Speaker, I am including, for today's RECORD a copy of my remarks of February 19, 1975, when I first introduced a resolution calling for a study of political assassinations—the first since the Warren Commission Report.

Eventually, this proposal had a total of 64 cosponsors-most of which had joined before the end of 1975.

I am also submitting a copy of my testimony before the House Rules Committee on March 31, 1976, at which resolutions proposed by former Congressman Thomas Downing and me were both tabled:

U.S. REPRESENTATIVE HENRY GONZALEZ ASKS CONGRESS TO STUDY ASSASSINATIONS: SE-LECT COMMITTEE TO INVESTIGATE ASSASINA-TIONS AND ATTEMPTED ASSASSINATIONS

Mr. Gonzalez. Mr. Speaker, today I am introducing a House resolution calling for you to name seven Members of the House to select committee of seven Members of the House, one of whom you shall designate as chairman, to conduct an investigation and study of the circumstances surrounding the deaths of John F. Kennedy, Robert F. Kennedy, and Martin Luther King, and the attempted assassination of George Wallace.

Under the terms of the resolution the committee is authorized and directed to conduct a full and complete investigation and study of the circumstances surrounding the deaths of these men-a President of the United States, a U.S. Senator seeking the Presidency, a civil rights leader of international prominence and the attempted murder of the Alabama Governor as he was seek-

ing the Presidency.

For the purpose of carrying out this resolution the committee, or any subcommittee thereof authorized by the committee to hold hearings, is authorized to sit and act during the present Congress at such times and places within the United States, including any Commonwealth or possession thereof, whether the House is in session, has recessed, or has adjourned, to hold hearings, and to require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memorandums, papers, and documents, at it deems necessary; except that neither the committee nor any subcommittee thereof may sit while the House is meeting unless special leave to sit shall have been obtained from the House. Subpenas may be issued under the signature of the chairman of the committee or any member of the committee designated by him, and may be served by any person designated by such chairman or member.

The committee, under the terms of this resolution, shall report to the House as soon as practicable during the present Congress the results of its investigation and study, together with such recommendations as it deems advisable. Any such report which is

made when the House is not in session shall be filed with the Clerk of the House.

Mr. Speaker, I have introduced this resolution after much consideration. It has not been a decision I have made hastily.

It is time that we study all this in retrospect, and with calmness and dispassion.

There are questions to be resolved. I was at Dallas the day that President Kennedy was killed, and I suspended judgment on the questions that arose then and shortly thereafter until Watergate, August 1973, revealed possibilities heretofore considered not possible.

I feel there is a congressional responsibility, and make no mistake about it. there is a great mass of American people and citizens in the world who are greatly concerned. And, believe that since the national psyche has been traumatized by all of these shocking crimes there is a clear and impelling responsibility for the Congress to discharge.

Congress has never before studied the assassination of any President, but as the elected representatives of the people, I feel that it is clearly our responsibility to do so if there is any indication or reason to suspect that the truth of the circumstances resulting in the murder of a President have not been revealed, and any parties responsible and not previously known have not yet been brought to justice.

No similar period-the assassination of other nationally politically prominent peo-ple—has ever followed the deaths of the other assassinated American Presidents prior to John F. Kennedy, and there is a large body of knowledge done by committees and organizations involved in the study of the assassinations and independent researchers—scholars, journalists, pathologists, and others in forensic medicine—which warrants our attention and at least our attempt to

verify.

During the past several months I have become increasingly sensitive to the need to conduct such an investigation because I have become a rallying point for people from throughout the country who are un-satisfied with the findings of the Warren Commission about the death of President Kennedy.

There has long been a need for further study of this death alone because, as the Gallup poll taken in January 1967 revealed, some 64 percent of the American public believed that more than one man was involved in the assassination.

Study of this assassination or any of the others is not something which I alone, or even one small select committee can do. It will take support of a majority of this legislative body, and I hereby call for that support.

We must settle for once and for all in the interest of the welfare of our country and the future of its people the truth of happened at Dallas on November 22, 1963 and what Lee Harvey Oswald carried to his grave before he had his day in court, and erhaps what Oswald did not know.

We must find out if the President's death was in retaliation to the Bay of Pigs invasion against Cuba, and what connection did Oswald's murderer, Jack Ruby, also dead, have with all of this.

We must find out if there is any connection with the death of Senator Robert Kennedy and Dr. Martin Luther King, and why there is any reason for cases of their two assassins to be back in the courts.

There is reason to subpena E. Howard Hunt and Charles W. Colson, the Nixon assistant, who, according to the Washington Post, called Hunt following the attempted assassination of Governor Wallace to order him immediately to Milwaukee and to break into Wallace's apartment of suspected assailant.

There are many more disquieting questions to be resolved—so many as to boggle the mind—but they must be answered—

with calmness, objectivity, dispassion, and fairness.

STATEMENT OF UNITED STATES REPRESENTATIVE HENRY B. GONZALEZ, BEFORE THE HOUSE RULES COMMITTEE, WEDNESDAY, MARCH 31, 1976

On behalf of himself and 64 co-sponsors of H. Res. 204, H. Res. 593, H. Res. 455, H. Res. 456, H. Res. 721, H. Res. 873, H. Res. 1035—legislation which would establish in the U.S. House of Representatives a select committee of seven members, appointed by the Speaker, for the purpose of studying the circumstances surrounding the deaths of President John F. Kennedy, U.S. Senator Robert F. Kennedy, and Dr. Martin Luther King, and the attempted assassination of Governor George Wallace.

Mr. Chairman, my distinguished colleagues—members of the House Rules Committee: When I first introduced this House simple resolution—which would establish a congressional study of the political assassinations of the past decade, and the attempt on the life of Governor George Wallace, a year ago last February 19, I did so alone, with little reason to think I would obtain addi-

tional support.

Most of the coverage which I got as a result of the introduction of H. Res. 204 was in the foreign press—the media in the United States was not too interested, and there seemed little indication at that point that there was

any interest in Congress.

Within a period of a few months, all of this had changed. My good colleague, Congressman Thomas Downing of Virginia, became convinced that there was need to reopen the study of the assassination of President Kennedy, and introduced the resolution last April; but limiting it to a select committee to restudy the assassination of President Kennedy only, rather than including the deaths of Senator Robert Kennedy and Dr. Martin Luther King, and the attempt on Governor Wallace.

We have both made introductions of the resolutions several times on behalf of ourselves, and more than 125 co-sponsors, and the established media has decidedly picked

upon the issue.

Presently, however, the interest of the media, as well as others, has begun to wane. Those who are losing interest demand that somehow those of us who have sought a congressional investigation show them the proof of a conspiracy, or that others, other than the accused or convicted assassins, were actually involved.

No, I cannot, nor do I think my good colleague, Congressman Downing, can produce such proof. As I have told a number of news reporters, as well as several individuals, beginning more than a year ago, if such proof was readily available to me then there would be no need to seek an official investigation. I would just simply make the information known through every means I knew how, and would demand that the proper law enforcement agencies take action.

What I do know for certain is this: the more than a decade of political assassinations has caused great harm to the collective national psyche, has fostered great mistrust in our system of government, and fear in the minds of many people.

There has never been in the history of this great nation a similar period in which so many national leaders have been eliminated by a bullet.

You do not have to be a follower of Governor George Wallace to see how wrong it is for him to be eliminated from a crucial Presidential race as a viable candidate. It is wrong because our system of government demands that the people be given options. As well as it being wrong from the standpoint of the Judeo-Christian commandment "Thou Shall Not Kill", it is wrong in our society to shoot

down a man or woman in a position of political leadership because such an act manipulates our electoral system and thwarts the democratic process.

Why, one might ask, do I, and many others, not accept the official findings in respect to each of these assassinations, and the attempt on Governor Wallace? Why do we not want to believe that each of these acts were the result of lone individuals, or lone "nuts", as many would term them?

We do not accept these theories because there are too many unanswered questions begging answers, and since Watergate we know that such things as governmental coverups do exist—and at a very big scale.

I was in Dallas on November 22, 1963, when President Kennedy was killed. It was a highly traumatic experience for me and many others—and one which we shall never forget.

Many have asked me whether I did not have some questions when this occurred. Well, of course, I did, but it was a very chaotic time—but before Watergate—and I wanted to believe, as did most Americans, that the local, state, and federal law enforcement bodies would do a good job and find out the truth.

I was suspicious when Jack Ruby managed to kill Lee Harvey Oswald right in front of us on television, but I wanted to believe that the Warren Commission had taken the time to really thoroughly investigate and produce a truthful report.

Because I wanted to believe, I did not do any personal investigating, nor was I really aware of the many thousands of Americans engaged in independent research on the John F. Kennedy and later on the other assassina-

Watergate changed all that acceptance and belief with me and many other Americans. Prior to Watergate there were already many Americans who doubted that Lee Harvey Oswald acted alone, but after Watergate many other Americans joined the ranks of the doubters of the Warren Report and of the official findings in respect to other political assassinations.

There are several, of course, who question the wisdom of pursuing the course of trying to obtain a congressional review of the findings in respect to these assassinations.

One of the first arguments presented against such a move is that it will cost too much money? Also, one might ponder that it is time to go on to the problems of today, and not think about the past. For the most part, I believe in forgetting the past, and looking to the future, but what if the past keeps affecting the future?

If it were not for the assassination of President Kennedy, for example, we would not have the 25th amendment to the Constitution of the United States which enables us for the first time in history to have both an unelected President and an unelected Vice-

President.

That assassin's bullet literally changed the course of our history, and yet we are hesitating about finding out the truth which Oswald took to his grave, because he himself became the victim of an assassin before he had the opportunity to be brought to trial.

As the result, we have government information which has been classified for a period of 75 years. I say it is the people's right, as well as the Congress' right, to know the truth—whatever it is, so that we the people will better know how to handle the future.

will better know how to handle the future. The recent CBS series on the American Assassins—which dealt with precisely the same assassinations and the attempted assassination which I have asked this House to investigate—raised more questions than they answered.

In many instances it was stated by Dan Rather during the series that CBS was denied access to some particular piece of information. This, of course, has been the problem in respect to many independent studies which have been conducted by countless individuals—including pathologists, political scientists, writers and journalists, social scientists and so forth—they are denied access to important information which could either prove or disprove their findings. Many independent researchers have been in litigation for years trying to get information or permission to run tests and so forth.

Although it did not ask for a reopening

Although it did not ask for a reopening of the Warren Report on the John F. Kennedy assassination, CBS did conclude that there is a need to investigate the possible "Cuban connection" in respect to the killing

of the President.

I would like to look into the "Cuban connection," too, but I would also like to know more about the whereabouts of certain domestic spies and what they were up to during November 1963. As well as his connection with Cuba, I would also like to know what Oswald's connection was with our own intelligence community.

There are many people who will tell you that if Robert Kennedy had not been assassinated he would have been our next President, after Lyndon Johnson, and not Richard

Nixon.

I do not necessarily believe that would have been the case, but many will always believe that is what would have been, and the truth is for a fact that, if he had not been killed, a large segment of the Democratic Party would have fought for his nomination to the Presidency right down to the wire.

His death—at an assassin's hand or at the hands of several assassins—disenfranchised many people from participating in our system of nominating a candidate for the Presidency of the United States of one of the two major political parties in our country.

As long as questions remain regarding the circumstances surrounding the death of Senator Kennedy, as he sought the Presidency, do we dare bury our heads in the sand, and pretend there is no need to investigate—and wait for the same thing to happen to another candidate under similar circumstancese?

I have, for example, been in touch with Mr. William Harper, a California firearms expert, who says that he is still convinced that two guns were involved in the 1968 assassination of Senator Kennedy. He says that a Washington Post story on December 19, 1974, to the contrary misrepresented his views. Despite an incredible amount of correspondence back and forth between Mr. Harper and the Post—he has supplied me with copies of all of it—the Post has yet to publish a correcting story.

The panel of experts in Los Angeles, who

The panel of experts in Los Angeles, who refired Sirhan Sirhan's gun by court order, were unable to match victim bullets with Sirhan's gun. Attorney Vincent T. Bugliosi, who was previously with the Los Angeles' District Attorney's office, cross-examined each of these experts to substantiate, and feels that the second gun theory is definitely

Former Congressman Allard Lowenstein has pursued the reopening of the study of the assassination of Senator Kennedy relentlessly, and definitely feels that there is need for a congressional investigation.

I have heard the argument made by some of my colleagues that they did not want to be a part of reopening the studies of the assassinations of the Kennedy brothers, unless the Kennedy family wanted the cases

reopened.

While I am in the deepest sympathy with the Kennedy family and their suffering, to paraphrase Mark Lane, who wrote "Rush to Judgment" and who has been active in efforts to get the study of the assassination of John Kennedy reopened, we are talking about leaders of a country, not members of a family.

Not as much has been written questioning

the findings of the Robert Kennedy assassination as the John Kennedy assassination, and not nearly as much has been written about the assassination of Dr. Martin Luther King and the attempt on Governor Wallace, as has been written on the Kennedys.

However, recent revelations in congressional hearings as to conduct of the FBI in respect to Dr. Martin Luther King has spurred CBS in its series on assassinations, and others, to call for a complete investigation into the circumstances surrounding the death of Dr. King.

In an interview with writer Wayne Chastain, Jr., as revealed in a new book, "The Assassinations: Dallas and Beyond—A Guide to Cover-Ups and Investigations," (edited by Peter Dale Scott, Paul L. Hoch, and Russell Stetler, Random House), James Earl Ray says that his guilty plea in the killing of Dr. King was coerced.

What is the true story regarding the death of Dr. King? More Americans than just Mrs. Coretta King and I, and the co-sponsors of my legislation, have the right to know.

Dr. King was a dynamic force for good in our country, who has never really been replaced. A Nobel Peace prize winner, he was fast becoming the leader of a coalition of peace and labor group members, as well as civil rights activists, when he was taken from us. Whether rightly or wrongly, his death resulted in domestic strife and chaos when we could have kept many tempers under control, if we could have had his leadership.

Several months ago Gov. George Wallace, who survived an assassin's bullet, endorsed my proposal. He has never been satisfied with the determination that Arthur Bremmer acted alone.

For one thing, I would like to know why Charles Colson dispatched E. Howard Hunt, who was later convicted of breaking into the Democratic National Committee headquarters, to go to Bremmer's Milwaukee apartment before the police got there.

I would like to know how Bremmer could finance himself to travel around the country

following Wallace.

If we find the answers—the truth—to the questions I have raised in this statement, as well, as many others, will the truth make us free? Yes, it will, for the truth will make us free to pursue democracy—our system of government—through the ballot box, and we will not be subject to government by bullets.

The truth will enable us to prevent such a series of events from happening again.

Believe me when I tell you that people from throughout this great country are literally crying to us for the truth.

During the past 15 months I have amassed a mailing list of several thousand Americans from throughout the country, who have urged me to continue my efforts to obtain a congressional investigation of the assassination—from Maine to California and crisscrossing the country the other way, too, as well as from Americans living in Germany, Australia, Mexico, and Canada.

In a letter I received Monday in response to the mailing of my speech given on the House floor on March 18, an attorney in the northern part of Texas, a former state senator, wrote:

"Henry, you are 100% right about these assassinations. I talk weekly with the average citizen on the street, at snack bars and other places. Almost 100% of these people have doubts about how these assassinations occurred. They do not know who to believe."

Earlier this year a nun from my San Antonio district implored me to continue my efforts. She commented that she felt that these stories about President Kennedy's personal life were a deliberate attempt to try to portray him as someone unworthy of the truth being known about his death.

Whether any of these current stories about John Kennedy are true is, of course, not the question at hand. The question is, who, if anyone else other than Oswald, actively participated in killing the President of the United States—an event which set off a chain of events which greatly damaged the stability and credibility of our government.

Richard E. Sprague* is a distinguished gentleman from New York, who has kept in close contact with me and my office. He is a writer and a researcher of these assassinations, who is currently writing a book about them. He and Dr. Cyril Wecht, the Allegheny County coroner in Pittsburgh, Pa., who has been so active in disputing the findings regarding the John F. Kennedy assassination, should be called to testify before this committee.

So should Michael Canfield and A. J. Weberman, who wrote "Coup D'Etat in America" (about the CIA and the assassination of President Kennedy) of which I wrote the foreword, and Harold Weisberg, who has written a whole series of books regarding all of these assassinations; also, Rusty Rhodes of the Committee to Investigate Political Assassinations. Each has valuable information.

To get the truth many other people will have to be called, including those who apparently destroyed evidence or withheld evidence—for whatever reason.

As years go by, more and more of these people will become unavailable through death or whatever.

In this bicentennial year, now is the time to retrieve democracy and to replace our government by bullets with it. It is time for us to act now—before it is too late.

THE BUDGET PROCESS

The SPEAKER. Under a previous order of the House, the gentlewoman from Maryland (Mrs. Holt) is recognized for 60 minutes.

Mrs. HOLT. Mr. Speaker, the Budget and Impoundment Control Act of 1974, enacted by the Congress with high expectations, was designed as an instrument for fiscal discipline. Many of us worked very hard to gain enactment of this important legislation, but we also warned at the time that it would work only if Congress wanted it to be effective.

I recall that time very well. We realized that the budget was out of control, that huge inflationary deficits were draining the substance of our people by destroying the value of their earnings, and that we could no longer afford the luxury of authorizing and appropriating funds without regard to the total, cumulative effect of our actions.

The most important feature of the Budget Act enabled Congress to impose ceilings on total spending and on spending for each of 17 broad, functional categories. The Budget Committees of House and Senate are charged with the responsibility of recommending the spending ceilings and revenue floors.

The act provides that the Congress must enact its first budget resolution for the ensuing fiscal year by May 15, and a binding budget resolution with necessary adjustments by September 15, just before the October 1 beginning of a new fiscal year.

A budget ceiling can be used to impose

*This man should not be confused with the Richard A. Sprague, who became the chief counsel and staff director. discipline, or it can be used to accommodate spending at any level. We have excellent staff, good economic data, but sadly enough, the Congress has been pursuing the latter course. Ceilings are simply being raised to accommodate spending proposed by the administration and congressional committees.

So great is our appetite for more of the people's earnings that we recently enacted an extraordinary third budget resolution for the 1977 fiscal year. Our estimated outlays of \$417 billion will exceed revenues by \$70 billion in this fiscal

For fiscal 1978, President Ford proposed outlays of \$440 billion, President Carter revised them upward to \$459 billion, and the House Budget Committee has recommended \$462 billion, including a \$64 billion deficit. The national debt would swell to \$801 billion by the end of the 1978 fiscal year, and would be hitting the taxpayers for \$43 billion in interest payments during the fiscal year.

Perhaps it can be argued that the budget system is still too new for any meaningful analysis of its effectiveness. We are only in our second year of being bound by the budget process provided by the 1974 act. But I would emphasize that our track record is not very edifying so

One of the Budget Committee's problems is straying into the thicket of line item budgeting. Members seem unable to resist the temptation to debate specific amounts of money for this or that project or program, then cut or raise the aggregate amounts of the functional categories to reflect decisions on items. The Budget Committee has even become inclined to explain its actions in terms of specific items.

This diverts attention from its important mission, which is to determine the total levels of Federal expenditures and revenues for each fiscal year and total level of spending for each major functional category.

The legislative history on the jurisdiction of the Budget Committee is very clear. It does not have jurisdiction over authorizations and appropriations, and certain committee chairmen of the House have very properly expressed alarm that the Budget Committee has been trespassing on their jurisdictions.

On March 10, 1977, the House Appropriations Committee submitted to the Budget Committee a report containing an excellent summary of the problems. The Appropriations Committee said this:

CONCERN ABOUT THE CONGRESSIONAL BUDGET PROCESS

The Committee is concerned about the failure of the new Congressional budget process to relate the spending and revenue sides of the Budget adequately. One of the principal thrusts of the Budget Act was to create a mechanism for the Congress to relate consciously the two sides of the Budget revenues provided by taxes and spending by various appropriations. This has not been done, except in a generally superficial and nonanalytical manner, and certainly not in the fashion contemplated in the Act.

Essentially all that has been done in the Budget Resolutions thus far has been to go to great lengths to detail spending policy line item by line item and only touch in the

CXXIII-646-Part 9

broadest way the totals of taxation policy. This approach defeats the macro-economic thrusts of the Budget Act and offers the potential for poor overall Congressional budg-

etary policy.

When the Budget Act was originally passed, it was thought that by carefully studying taxation and spending in relationship to one another, it would be possible to determine a better mix of taxation and spending policy. In fact, this has not been done in any more sophisticated or improved manner than when the two processes of spending and taxation were completely separate. This is a serious shortcoming of the Congressional Budget Process and must be corrected.

With respect to the content of the reports on the concurrent resolutions on the budget, the Committee notes with concern the tend-ency to identify and to make recommendations for specific appropriation line items. While these line item recommendations have no actual effect, they do tend to obscure the overall macro-economic responsibilities of the Budget Committee and to needlessly duplicate much of the hearings and deliberations that are the responsibility of the authorizing and appropriating committees. There has been some evidence that there is increasing pressure to fragment the functions into more detailed aggregations of Federal activities. This fragmentation should be avoided since it will only serve to focus the overall debate on the "means" and mechanics of Federal programs, not the broad-based macro-economic objectives of the Federal budget.

What are we doing about the truly critical and important issue of national policy that is of greatest concern to the public? I refer to the growth of Government spending and the huge inflationary deficits.

The answer, Mr. Speaker, is that we are not dealing very well with the problem that should be the major concern of the Budget Committee. Ceilings are being raised to accommodate more deficit spending, not being lowered to accomplish fiscal discipline.

And what of our task of determining the priorities as we review the functional categories? We are not doing very well in this responsibility, either. The only category that is a prime target for cuts is national defense, which is the unique and primary responsibility of the Federal Government, but has only 24 percent of the budget. Given the nature of the dangerous and powerful adversary that confronts us, any deep cuts in this function risk our national security.

President Carter showed his concern for the condition of our military strength in the budget he proposed to the Congress. Unfortunately, the House Budget Committee cut his defense proposals by more than \$4 billion in budget authority and \$2.3 billion in outlays.

President Carter has also announced his determination to seek a balanced Federal budget by 1981. I have long advocated the attainment of this goal, but this will be impossible unless the Budget Committee improves its performance.

Mr. Speaker, a major issue that should be of concern to the Budget Committee is the little-understood phenomenon of huge unobligated budget authority bal-ances in the Federal departmer*s. The Budget Committee has reduced the unobligated balances of the Defense Department by \$1.3 billion for fiscal 1978, yet the unobligated balances of the other

departments totaling more than \$200 billion were only feebly challenged. We need to know more about the subtle fiscal and policy implications of these balances-what impact their reduction or continual escalation will have on the national economy, national security, and international stability. These are the macro issues that remain unaddressed while much intellectual effort and debate within the Budget Committee are wasted on micro questions. In this connection, the Congressional Budget Committee has completed a study identifying the existence of the budget authority balances both obligated and unobligated. But little else is known about what options we have in dealing with these balances.

I strongly urge that while we still have the chance to make the budget process meaningful, we get it back on the right

track.

Mr. ROUSSELOT. Mr. Speaker, I would like to thank the gentlewoman for yielding and for taking the initiative to provide many of us the opportunity to comment this afternoon on our experience in the area of fiscal control and Government spending since the passage of the Budget and Impoundment Control Act of 1974. As one of the original members of the committee which was formed by the act, the House Committee on the Budget, Mrs. Holt has been a strong leader in our efforts for fiscal responsibility and restraint in Federal spending.

Almost 3 years ago, the 93d Congress passed the Budget and Impoundment Control Act of 1974. The law was hailed by many as a "great step forward" in budgetary control. After years and years without a formal method by which Congress could monitor its spending procedures, the Budget Control Act was greeted as the answer to our problems, the means by which the congressional "fiscal house" would finally be put in order. Under the act, Budget Committees were established and timetables were created for congressional action on essential elements in the budgetary process, allowing Congress to view budget outlays and anticipated revenues as a total package before proceeding with the appropriations process and other budget related items, such as changes in the public limit. However, after 2½ years of "budget reform" as called for by the act, our fiscal house is far from being in order. A quick review of the record since passage of the act tells the story:

First. There has been no progress toward real restraints in increases on the expenditure side. Under the Budget Control and Impoundment Act, we all hoped that progress would be made toward restricting the tremendous escalation in budget expenditures that has taken place in recent years. It took the U.S. Government 181 years to reach its first \$200 billion budget. In 1977, only 6 years later, Congress approved a budget that was more than twice that size: \$417 billion. And the increases continue. This week, the Budget Committee will report out the first concurrent resolution on the budget for fiscal year 1978, by far the largest budget in the history of the Union—\$462 billion. Since 1974 alone, the year the Budget Control Act was passed, the U.S. Government has spent well over \$1 trillion, and the size of the Federal budget has almost doubled. It is plain to see that the restraints in increases that many of us had hoped for simply have not materialized.

Second. There has been no real move toward a balanced budget. The size of Federal budgets only tells half of the story. They do not reflect, for example, the amount of capital the U.S. Treasury robs from the private marketplace in order to finance the massive deficits.

Seventeen of the last eighteen budgets approved by Congress have been run in the red. The 1977 estimated budget deficit will be over \$66 billion and the deficit for fiscal year 1978 is projected by the Budget Committee to be over \$64 billion. Since passage of the Budget Control Act, Congress has spent over \$125 billion in the red.

These deficits, of course, need to be financed and such financing tends to harm the economy in a number of ways. Over the past 10 years, the Federal Government will have borrowed in the capital markets a total of approximately one-third of a trillion dollars on a net basis. The national debt is now growing at a rate of more than \$1 billion a week.

Third. Spending ceilings are not adhered to. The so-called spending ceilings established under the Budget Control and Impoundment Act have been extremely ineffective in terms of actually controlling Government spending. Rather than being treated as true limits of what Government should spend, they are treated as targets for what Government must spend. Furthermore, when it is determined that the "ceilings" not adequate to accommodate luxurient whims of the majority, they are simply raised to agree with the new "projections." As we observed in February, a third budget resolution can even be invoked to accommodate "special" economic circumstances. As originally introduced, the Budget Control Act would have required a two-thirds majority to exceed expenditure ceilings in the second budget resoution. Unfortunately, this provision was later defeated which makes changes in the ceilings much easier

At the end of this month, the first concurrent resolution on the budget for fiscal year 1978 will come to the floor. The committee report on the resolution will call for a deficit for the coming fiscal year of over \$64 billion. The new debt ceiling under the resolution will be over \$800 billion. It seems clear by considering such figures that the act, rather than controlling deficits, has "legitimatized"

In summary, the Budget Control and Impoundment Act of 1974 has not dealt effectively with the problems of restraining increases in spending, achieving a balanced budget, or adhering to and respecting its own expenditure ceilings. It is only by vigorous discipline and hardnosed self-restraint—and not by lipservice to an ineffective, weak-kneed Budget Control Act—that we will truly eliminate red ink financing and put our fiscal house in order.

Mr. FRENZEL. Mr. Speaker, I ap-

preciate this special opportunity to delve more deeply into our budget process and policies than is possible under our normal procedures. I believe that Representative Holt should be commended for doing us this service and wish to extend my personal gratitude.

The members who participated in the drafting of the original Budget Control Act, the subsequent committee reports, and the floor discussions all tell us that the bill was intended to accomplish different purposes. Different Members have different ideas of what the bill means. I want to frankly state that my early support and continued interest is based on our crying need to reduce expenditures, control a "nonrational" system and, eventually, balance our budget. In my view these needs are brought sharply home by the fact that we have managed in the 10-year period from fiscal year 1967 to fiscal year 1977 to increase our public debt by \$360 billion-more than we managed to accumulate in our first 190 years as a nation. This has increased our total debt to \$710 billion with interest payments skyrocketing to as much as \$45 billion in this fiscal year alone.

The Budget Control Act, as described in both the bill and the committee report, was to operate with three cardinal principles. It was to provide a new mechanism for relating and evaluating revenues and expenditures on a conscious-rational level, new legislation to close back door spending, and to provide for more timely action by changing the fiscal year, and adding advanced authorizations. I believe that it is worth our time to look closely at several of these

goals. The BCA, as we all know, did not become a realistic force until its second year of operation in the consideration of the budget for fiscal year 1976. The original deficit proposed was \$52 billion. Our very first resolution upped this to almost \$69 billion. Our second jumped that to \$74 billion. However those of us who thought that this \$22 billion increase was perhaps not in keeping with the first cardinal principle were in for a big surprise. Somehow in the consideration of the budget for fiscal year 1977 we have progressed from our first total of \$50.6 billion through our second at \$50.7 straight upward to the present level of \$69.7 billion. I would be hard pressed to explain precisely how this \$19 billion increase is demonstrative of the effectiveness of our efforts to relate revenues and expenditures on a conscious-rational

I well understand that we have not made an effort to handle this difficult task under the jurisdiction of any one committee since 1865 but I believe that we can and must do better if we are to live up to our legislative promises.

We as a body have also made some progress in the control of "back door" expenditures. The Budget Control Act was a giant step forward toward reversing the trend of splintering budget authority. But we must remember that here we are talking about financial pledges of the full faith and credit of the United States through contract authority, entitlement programs, and Treasury borrowing.

In addition to our huge national debt we added, in fiscal year 1977 alone, \$176 billion worth of liability through guaranteed and insured loans. This, following the pattern, is up from \$161 billion in fiscal year 1976 and \$153 billion in fiscal year 1975. In the bill we thought that we were totally shutting out future contracting and borrowing under the old mechanisms, and converting any such committee action into mere authorizations.

However, many of us missed section 904 which provided that certain provisions were to be considered as rulemaking authority for either House and not as statutory requirements. Thus, the prohibition disappeared. In dealing with entitlement legislation we provided for a wondrous new mechanism of referral to committee and a 15 calendar-day period for consideration. This was a sound step forward but we forgot the ingenuity of our fellow Members. What next occurred was deliberation over whether a legislative action was a new or an old entitlement. The best sample product of this debate that I can recall is the black lung program.

Under the old legislation evidence of the disease, along with other factors, was required before a sufferer was entitled to Federal assistance. With the passage of last session's bill evidence is no longer required and proof of employment for a given number of years is now considered sufficient proof of the need for Federal assistance. This may have been badly needed and eminently justifiable legislation but it was never considered by the appropriate committees for its financial consequences. Another interesting example of the unfortunate effects of this debate is the school lunch program. The Federal support level was legislatively lifted from 25 to 35 cents. This may also be the right thing to do, but again it was not considered under the program that we had supposedly devised to cover it.

Along with back door spending comes the problem of off-budget expenditures. However, this, unlike some of the others, is not a problem which we can refer back to Congresses decades ago. We created the first real off-budget agency, the Export-Import Bank, in 1971. Just 6 years later we have pushed total spending on top of the public debt up to \$11 billion per year and added eight more Federal activities to the list. The Budget Committee recommended in 1976 that we bring these activities back into the fold, and President Ford made a point of urging us to do the same in a budget mes-

It strikes me that we have largely closed the back door to our finances but have converted the front to Dutch doors and the bottom half seems to be swinging wider every year.

The third principle of more timely action and a change in the fiscal year has, largely, been accomplished. The change in the fiscal year was a big step forward, and I doubt that we will ever again have to face another day like that of last June when we passed the foreign aid authorizations for both fiscal years 1976 and 1977 within minutes of each other. However, our Budget Office's 5-year projections seem to be more wishing and

hoping that the economy will pick itself up than realistic appraisals of our economic situation. But all considered, it does seem better that the taxpayer get ripped off on time rather than in our previous haphazard fashion...

The budget process, as shaped by the Budget Committees, has been improving every year and the committees do deserve some praise. But I, along with many Members, am becoming increasingly concerned with the "line item" actions of the committees. The committees' purpose was intended to be the formulation of functional classifications to derive eventual totals on the basis of fiscal policy. The purpose was well demonstrated by sections 301 and 302 of the Budget Control Act.

However, as seems to be the usual case in this body, a power play for assuming the function in detailed expenditures took place. The resulting fragmentation has led the committee into an overall debate on the means and mechanics of expenditures, not the pursuit of broadbased macro level objectives which was intended. There is some legitimacy to the level of detail which the committee pursues, but I believe that it is very much an open question as to whether the degree of detail can be justified. The President's budget and the Appropriations Committee's figures are worked out through intensive research and hearings. Many thousands of pages of testimony and analysis go into the final product. The Budget Committee does not have the tools, and I would not wish it to duplicate these efforts. Beyond the question of basis of determinations is the growing pattern of role reversals which

we have observed recently.

One particular example in the handling of rescissions comes immediately to mind. Following the President's recommendation for the rescission of approximately \$200 million for the Nimitz aircraft carriers, the Budget Committee acted to delete all consideration of the program in the third budget resolution. This is, of course, a proper function of the committee, but they did it before the Appropriations Committee had acted. In the Appropriations Committee itself a motion to support the rescission failed by a 12 to 13 margin in the Subcommittee on Defense Appropriations. It then went to the full committee where the motion to delete passed largely on the strength of a very strange argument. The point made was that the money had to be deleted or we would be forced to consider a fourth budget resolution and face the adverse political ramifications of such an This is a berserk reversal of our original intentions, and if it is indicative of the future, it calls for some immediate consideration and reevaluation of the original bill.

The implementation of the act has had a number of strange effects, but the most ironic of them seems to be in the interpretation of title X on impoundment control. The bill's intention, as reported in the committee report, was to place an additional congressional stop on impoundments and rescissions. However, the drafting of the bill was such that the OMB and the Comptroller General ruled

on it as new authority for impoundments, and today we see impoundment actions coming back to this Chamber with title X of the original bill cited as authority.

I believe that the original bill had some quirks and serious deficiencies which should be treated if we are going to be able to rely on it as a valuable tool in the future. But, I am afraid that the problems run deeper than legislative reworking can readily accomplish. I supported the Budget Act, knowing full well that the fiscal responsibility of our Members was crucial. However, it has become a wholly political exercise. Instead of bringing further insights, it has served to incorporate 25 new Members into the expenditure justification ball game. We have not seen the desired side effect of forcing individual Members to make the hard choices on specific pieces of legislation. Instead of focusing on the appropriation and using the President's budget as point of reference, we now have Members hurriedly searching through either budget hoping to find some method of declaring their latest vote as "within the This is both silly and unforbudget." tunate.

In short I believe that the Budget Act as a legal document does require amendment to bring it up to the performance level which we anticipated, but our real problem is ourselves. It is just another classical "I have seen the enemy and he is I" situation.

Mr. MICHEL. Mr. Speaker, First I would like to commend the gentlelady from Maryland for taking the time to discuss this very important subject.

We on this side of the aisle are very fortunate to have Mrs. Holt serving on the Budget Committee. She has gained a reputation around here as a very industrious member and that committee certainly requires it. Moreover, I know of no more fiscally responsible Member in this House, so we do value her judgment.

Mr. Speaker, not only am I concerned that the congressional budget machinery has not succeeded in placing any kind of a checkrein on runaway Federal spending, but as a member of the Appropriations Committee, I have to also be concerned over the developing tendency of the Budget Committee to move deeply into the realm and responsibility of our Appropriations Committee.

When we passed the Congressional Budget Impoundment and Control Act, the intent was not only to give Congress a better grip on the overall budgetary process, but also to place overall limitations on Federal spending. Has this happened? No. The amounts in the budget resolutions have consistently been above those recommended by the executive branch, regardless of which party has occupied the White House. What is even more distressing is the failure of the Budget Committee or Congress to stay within the perimeters of the overall projections established in the first budget resolution. The idea of a reconciliation process has apparently been thrown out the window. The intent of the Budget Act was that once an original spending framework was established, we would stay within it, and if increased spending

in one area were needed, then we would make comparable reductions in other areas. Only in emergencies would it be permissible to change the overall perimeters.

Instead, what we have seen is an adjustment of the overall perimeters almost at will. This is, of course, the easiest, less disciplined path to pursue, and Congress went in this direction with a vengence in the recently passed third budget resolution, where the budget authority spending ceilings were increased by a massive \$30 billion, and the deficit by \$20 billion. So regardless of the intent of the Budget Act. Congress has found a way to manipulate this machinery to continue in its undisciplined, free spending ways.

In fact, the budget process is not only being manipulated to allow higher spending, it is also being used to justify higher expenditures. The amounts in the budget resolution were originally intended as targets or ceilings on expenditures, but increasingly they are being cited as the amounts that must be appropriated. How often have the heard arguments on this floor to the effect that the budget resolution allows such and such amounts for this or that program, and therefore we have a responsibility to appropriate additional amounts to meet those figures.

One of the reasons for this development has been the move of the Budget Committee from the general to the specific. The Budget Act called for estimates by major functional category, and the only further breakdown provided for is, and I quote from the act:

With respect to each major functional category, an estimate of budget outlays and an appropriate level of new budget authority for all proposed programs and for all existing programs (including renewals thereof), with the estimate and level for existing programs being divided between permanent authority and funds provided in appropriation acts, and each such division being subdivided between controllable amounts and all other amounts.

Nowhere in this language is there any reference to providing estimates for individual programs. A further indication that specific program estimates were not intended is shown by the sample first concurrent resolution contained in the report of the Senate Rules and Administration Committee on the Senate version of the Budget Act. The breakdown is by major functional category, with the only additional breakdown occurring between existing and proposed programs, and within existing programs between permanent authority, controllable amounts, and all other amounts.

Yet, we see the Budget Committee currently arguing over whether to include funds for certain specific public works projects. Amendments have been adopted in the committee markup providing funding estimates for such specific programs as impact aid, head start, aid to the handicapped, child welfare, SBA loans, Forest Service resource planning, and several others.

In the third budget resolution recently adopted by Congress, the Budget Committees ventured far beyond their functional category responsibility and included specific dollar recommenda-

tions for such individual programs as countercyclical assistance, EPA construction grants, CETA, older Americans community service employment, and railroad construction, among others.

Setting forth specific amounts for specific programs is not the responsibility of the Budget Committee. It is the responsibility of the Appropriations Committee. The Budget Committee is responsible only for setting forth spending estimates for broad functional categories, with the allocation of funds among programs within these categories left to the Appropriations Committee.

If the Budget Committee continues down its present course, we might as well abolish the Appropriations Committee, because it will end up as little more than an echo of the Budget Committee. I suggest that the Members of this body ought to think very carefully as to what role the Budget Committee ought to play in our deliberations. If it is to be an allencompassing role, governing the specific actions of all our other committees, then we ought to set out right now in undertaking an overall revamping of our committee system, because it is simply a waste of taxpayer dollars to fund committees whose only real purpose is merely to ratify decisions of the Budget Committee.

Mr. PICKLE. Mr. Speaker, control of the purse strings by the legislative branch has always been the key to democracy. If the legislative branch does not control what happens to the people's tax money, the legislative role becomes sort of like a pantomime show on radio—the show goes on, but it does not mean anything to the people on the receiving end.

When we were writing the Budget Reform and Impoundment Control Act we faced a dual threat to the control of the purse strings.

The budget was out of our control. We raised taxes in one body, spent them in more than a dozen others—and no one was really sure what anyone else was doing. We had little, if any, advance planning about what individual programs might cost. We concerned ourselves even less about what the total would add up to. There were only wild guesses how the totals would fit into the economy.

Second, faced with a Congress which did not agree with him, President Nixon fell into a practice of doing what he wanted with Federal funds—spending them when and where he chose, and not spending them when and where he chose, regardless of the law and the mandates of Congress. He was not the first to impound funds, but previous instances had been small in number and in dollar amount.

Faced with a clear threat to the basis of democratic power, the Congress moved to reclaim this territory. The medium was the Budget Reform and Impoundment Control Act.

Seldom has a law been passed with more pride and more hope. We were proud, and had a right to be, because we, the supposedly weak and disintegrating little Congress, stood up and said, "Enough."

Moreover, the supposedly irresponsible Congress moved with great responsibility to put its own house in order-to bring our own budget procedures into a recognizable and coherent process.

And we have succeeded.

I make that statement openly and without reservation. Because, I think that whatever problems we face, we need to remember where we came from in this matter. I do not think we should destroy or put aside the new budget process for an instant.

I think we should make it work.

And here, we definitely have some problems.

Before the new budget procedures, we jumped and jerked with each change of the economic indicators. When the indicators dropped for a few months we jumped to pump money into the economy; and then we jerked it back when the indicators went too high; and we usually did so too greatly or too lightly too late.

Now we have much better control. We know what our total revenues and spending are likely to be, and we have time to think about the economy and about how our budget should fit into that economy.

Why then are we continuing to jump and jerk with each change of the eco-

nomic indicators?

Why are we having three and talking about maybe having four budget resolutions in 1 year? Why are we not planning enough leeway and alternatives in our original budget resolutions so that we can stick to them?

Why are we continuing to act like we have no tools for planning and foresight

when we do?

If we do not stick to our budget resolutions, I suggest that soon our resolutions will mean nothing to us. We will pass anything in them because we will know that we can just go back and change them anyway we want in a few weeks.

That, my friends, is a waste of our time-time we do not have to waste.

The planning envisioned in the budget resolution gives the Congress more than an adding machine to total up the various bills passed. It gives us the opening we need to look just a few days down the road and do some real planning, to have some honest foresight-if we will. The current danger is more than missed op-

portunity, however.

Mr. Speaker, if the Budget Committee does not get more resolve, I am fearful that in an effort to be helpful and co-operative, they will destroy the whole budget act. I hope the chairman and the members of the committee become hardnosed about the process and set a budget and stay within it. Congressman Adams did that last session, and Congressman GIAIMO ought to do that this session. This business of raising the budget figure constantly and even allowing votes on line items can get this Congress in big trouble. And 4 years from now the Congress will be held accountable for it.

FDA PROPOSED BAN ON SACCHARIN

The SPEAKER. Under a previous order of the House, the gentleman from Illinois (Mr. O'BRIEN) is recognized for 60 minutes.

Mr. O'BRIEN. Mr. Speaker, there are two reasons why I requested a special order today to discuss the Food and Drug Administration's proposed ban on the sugar-substitute saccharin.

First, we are laying on the record the evidence of the almost universal response of the people back home: The proposed saccharin ban does not make much sense.

Second, the point is made here today that while we do not all agree on the best approach to solving the saccharin dilemma, while we do not all agree on the fine points of rolling back the saccharin ban, we are, nonetheless, united behind the idea that the saccharin ban must be blocked.

For my part, I call to the attention of my colleagues two editorials from Chicago newspapers, "Alter the Rules On Food Bans" from the Chicago Sun-Times of March 18, 1977, and "A Time to Review Food Laws," an editorial from the Chicago Daily News for Marc 19, 1977.

Finally, my compliments to Congressman James Martin for his exceptional leadership in this exceptionally worthy

effort.

The material follows:

ALTER THE RULES ON FOOD BANS

The Food and Drug Administration's proposed ban on saccharin has proved to be a bitter pill that many consumers don't want to swallow. They shouldn't have to.

Granted, the public doesn't always know best, but it's reasonable to assume that most people don't ordinarily eat 140 pounds of saccharin a year—the human equivalent of the amount that caused cancer in Canadian rats and prompted the FDA decision.

The saccharin ban illustrates an interesting defect in the Delaney Amendment to the Food and Drug Act. The amendment says food additives must be banned if they ever cause cancer in people or animals. Well, Canadian rats may get cancer after eating saccharin, but that doesn't necessarily mean

people will, too. In addition, the Delaney law prevents the FDA from evaluating conflicting scientific tests on additives. Those tests have become more sophisticated since the amendment was approved in 1958. Few chemicals, if any, are completely beyond suspicion of causing cancer. Americans eat these chemicals every day canned, frozen and other convenience foods; saccharin isn't the only suspect. But for now saccharin is the only source of sweetness for diabetics and others who can't have

Congress should look anew at the Delaney amendment and similar measures to determine whether its ban on any substance ever suspected of causing cancer in any animal is justified

Meanwhile, Americans should be educated eat less sweetner and more fresh foods. That'll be tough; already many people are snapping up artificially sweetened foods. Obviously they don't feel threatened.

So when does a substance become an unacceptable health risk? The FDA, not the public, should call the shots. But as things stand now, the FDA is forced to choose black or white in a gray area.

A TIME TO REVIEW FOOD LAWS

Public outrage over the probable ban on saccharin may finally force Congress into a long-needed review of the federal Food and Drug Administration and the laws under which it operates. Something is plainly wrong when an agency set up to protect the public overprotects to the point of creating a new hazard to health.

Saccharin, the only noncaloric, artificial sweetener currently on the market, has served a significant purpose for about 80 years. It helps diabetics who cannot tolerate sugar, and it helps dieters in a land afflicted by obesity. If it vanishes and there is no substitute for sugar, where are these peopleand they number in the millions-to turn?

Proof that saccharin was a danger to health would of course justify a ban. But there is no proof that any human being has developed cancer by using saccharin. The test on which the ban rests involved feeding rats doses of saccharin—far more than a human dieter could possibly consume. Sure enough, a few rats developed tumors. Under the socalled Delaney Amendment to the Food and

Drug Act, saccharin had to go.

The Delaney Amendment, passed in 1958, allows no leeway. It provides that "no food additive shall be deemed to be safe . . . if it is found . . . to induce cancer in man or animal." But the problem is that many useful substances, if taken in sufficient quantity, may induce cancer, and almost any food or drink, consumed in massive amounts, may cause death. In recent days, two cases have come to light of death caused by drinking too much water. If the Delaney Amendment applied to harmful effects other than cancer, there would be nothing left to eat or drink, not even water.

The bizarre tests conducted by the FDA have led to other bans, such as the one still in force against cyclamates, another artificial sweetener regarded by most experts as harm-And who now remembers the great "cranberry scare" of 1959? The finding of minute traces of weedkiller in a few cran-

berries destroyed a whole crop.

Congress should take a fresh look at the Delaney Amendment, and consider modifying its absolute language. If the FDA determines that a food product or additive is risky, that should of course be made known. when the risk is as small as it is with saccharin, the consumer should at least be left with some freedom of choice. On the evidence so far, substituting saccharin for sugar is no riskier than getting out of bed of a morning. Or should that, too, be banned?

Mr. RINALDO. Mr. Speaker, the FDA's decision to prohibit the sale of saccharin has triggered a tidal wave of public protest. I am certain that I speak for many of my colleagues when I say that I have received a vast number of letters and telephone calls from outraged constituents.

Much of the public protest can be attributed to the obvious fact that this FDA decision poses grave problems for diabetics-and for those who are seriously overweight as well. In short, even from the standpoint of protecting the health of Americans, the net impact of the saccharin ban may well be negative.

Yet the impact of the saccharin ban on diabetics does not, in itself, seem sufficient to explain the current explosion of public indignation. I suspect that another force is at work: An instinctive, spontaneous public perception that Government has tried one time too many to control individual lives

No public uproar followed the FDA's decision to ban cyclamates and Red Dye No. 2. In the case of the cyclamates ban, substitute-saccharin-was readily available: the impact upon individual lifestyles was negligible. In the case of Red Dye No. 2, substitutes were also available, and the prohibited food dye was not viewed as central to certain individual lifestyles; thus, the impact upon individual Americans was also minimal.

The saccharin ban does not follow the pattern. First, since saccharin is the last artificial sweetener on the market, this is really a ban on sugar substitutes rather than a displacement of one sweetener in favor of another. Second, artificial sweeteners are an integral part of the lives of millions of diabetics and tens of millions of dieters.

It should, therefore, come as no surprise that many Americans view the saccharin ban as a Government-ordered alteration of individual lifestyles. In a nation that has long treasured the right of each individual to make his own decisions, and the corollary right of each individual to take his own risks in pursuit of perceived benefits, lifestyle restrictions by Government decree are bound to be wildly unpopular.

The question remains: What can we do, as Members of Congress, to respond to the obvious will of the people on this

In the short run, we can overturn the ban on saccharin. I have sponsored legislation which would permit the sale of saccharin products when those products are accompanied by a health warning. I am quite optimistic about the prospects for enactment of this bill or similar legislation.

Once the immediate problem of the saccharin ban has been resolved, we can take a fresh look at the "Delaney clause" of the Food, Drugs, and Cosmetics Act. The present language of this statute, which the FDA claims left it no discretion on the saccharin question, is clearly too inflexible. While the FDA's basic authority to ban cancer-causing substances must be retained, it is time for Congress to allow FDA some discretion in determining when the evidence of carcinogenic effects is sufficient to justify a ban; it is also time for Congress to allow the FDA to take intermediate steps between inaction and a total prohibition.

In the long run, Congress can recognize a distinction between those substances which are peripheral to individual lifestyles and those substances which are an integral part of certain lifestyles. Congress has implicitly recognized this distinction by effectively exempting alcohol and tobacco from public health criteria which, if applied, might well lead to a ban on these substances. By keeping this distinction in mind, Congress may be able to avoid future public rebellions against actions perceived as restrictions on individual freedoms.

Mr. Speaker, the people have spoken clearly on the saccharin ban. We would be wise to heed their message by overturning the ban, but we would also be wise to apply the lessons of this particular issue to comparable issues in the future.

Mr. MARTIN. Mr. Speaker, let me commend the gentleman from Illinois for his special order on this timely subject.

All Members of the House have been hearing from constituents regarding the proposal of the Food and Drug Administration to ban saccharin from the food supply. This is an especially critical issue, since saccharin is the last remaining, heretofore regarded safe and legal artificial sweetener available for public consumption.

The people are riled. My mail has been running 200 to 1 against the ban. It has been unusually heavy: Nearly 6,000 letters so far.

They believe that no persuasive case has been made that saccharin in normal doses causes cancer in humans. They are puzzled and angered that FDA was required to "post the bans" on saccharin on the basis of bladder tumors in rats fed massive overdoses of saccharin by Canadian researchers.

The people recognize that this research does not prove that normal doses of saccharin are unsafe. They properly interpret as bizarre the analogy given by the Acting Director of FDA that the experimental conditions are like unto a lifetime daily diet of 800 cans—12 ounces—of diet soda. In fact, no one can swallow 800 cans of drink: The first 50 cans would contain enough water to kill most of us.

Put another way, one would have to gulp 1,850 half-grain saccharin tablets daily for life; or the same number of packets of saccharin powder. That is nearly 4 pounds of the stuff every day. You cannot do it.

In contrast with this is the more reliable and more pertinent finding, from epidemiological statistics of large human populations, that saccharin is not harmful in normal use. Yet under the present law the Delaney clause does not allow the FDA or the Secretary of HEW to consider this evidence; the ban is automatic. It is an absolute prohibition with zero tolerance.

How did this happen? It happened by legislative design as the most cautious way evident in 1958 to protect the public from hazardous exposure to carcinogenic additives to the food supply. No one today wants the public exposed knowingly and avoidably to substantial risk of cancer. This is further testimony to the great contribution of the gentleman from New York (Mr. Delaney) in leading the examination of food additives two decades

The saccharin ban controversy is the first clear case in the 19 years since its adoption where the public benefits of an additive to be banned under the Delaney clause clearly exceed the public risks of permitting its use.

Great care, however, must be exercised to be certain that proposals to amend this standard are faithful to the basic principle of the Delaney concept to protect the public interest.

Accordingly, I have drafted a bill to amend the Food, Drug, and Cosmetic Act to authorize the Secretary of HEW to make a finding regarding the public risks and benefits of a food additive, taking into account the best evidence and expert judgment possible, before finding it not to be safe. It is my view that such authority is highly desirable regarding substances known from the best evidence and expert judgment to have little risk in normal use by humans. My amendment preserves the Delaney clause, while adding what I hope many of its other supporters will regard as a useful improvement in the light of current understanding. The 177 cosponsors cover the entire political spectrum in the House of Representatives.

While this proposal has been fashioned

with valuable technical assistance from FDA personnel, food experts and various public interest groups, I invite my colleagues to assist me in perfecting its provisions.

My bill specifically includes an additional section, similar to those introduced by other Members, to suspend the proposed ban on saccharin until such time as it is found, using the best judgment contemplated under the foregoing section, to constitute an unreasonable risk to the public. This unequivocal remedy for saacharin is clearly required if we are to respond to the needs of millions of American consumers who, for reasons of health—diabetes, heart illness, age, limited physical activity and metabolic problems—must restrict their use of sugar.

For the Record, let me insert at this point a text showing the effect of my amendment. It begins with the Delaney proviso and the one existing exception for animal feed additives. It continues, showing the second exception as proposed in my bill, H.R. 5166. It concludes with the new subparagraph (B), setting forth the procedures to be followed, including the recommendations of a blue-ribbon panel of experts and representatives of different points of view.

There follows a current list of the 177 cosponsors.

SECTION 409(c)(3)(A) OF THE FEDERAL FOOD, DRUG, AND COSMETIC ACT AS AMENDED BY H.R. 5166 (Mr. MARTIN)

[Substantive changes in italic]

(3) (A) No such regulation shall issue if a fair evaluation of the data before the Secretary—

(i) fails to establish that the proposed use of the food additive, under the conditions of use to be specified in the regulation, will be safe: Provided, That no additive shall be deemed to be safe if it is found to induce cancer when ingested by man or animal, or if it is found, after tests which are appropriate for the evaluation of the safety of food additives, to induce cancer in man or animal, except that this proviso shall not apply with respect to (I) the use of a substance as an ingredient of feed for animals which are raised for food production, if the Secretary finds that, under the conditions of use and feeding specified in proposed labeling and reasonably certain to be followed in practice, such additive will not adversely affect the animals for which such feed is intended, and that no residue of the additive will be found (by methods of examination pre-scribed or approved by the Secretary by regulations, which regulations shall not be subject to subsections (f) and (g)) in any edible portion of such animal after slaughter or in any food yielded by or derived from the living animal; or (II) any food additive to be used as an ingredient of food for human consumption if, upon petition setting forth the grounds therefor, the Secretary has, in accordance with subparagraph (B), made and published in the Federal Register a finding that based on all the data presented the benefit to the general public from permitting the use of the additive outweighs any risk to human health that permitting such use

(ii) shows that the proposed use of the additive would promote deception of the consumer in violation of this Act or would otherwise result in adulteration or in misbranding of food within the meaning of this

(B) (i) A finding described in subparagraph (A) (i) (II) may be made only after the Secretary has received and considered

Mr. Dan Daniel (D-VA). Mr. Robert Daniel (R-VA).

Mr. Davis (D-SC)

the recommendations respecting such finding submitted by an advisory committee appointed by the Secretary from (I) individuals who are qualified by scientific training and experience to evaluate the carcino-genic effect of the food additive with respect to which such finding would be made and to evaluate the other effects of the use of such additive, (II) persons representative of the interests of consumers and the food additive industry affected, and (III) nutri-tionists, economists, scientists, and lawyers. The Secretary shall also provide reasonable opportunity for interested persons to com-ment on such a finding, and such a finding shall not take effect until the expiration of 120 days after it is published in the Federal Register.

(ii) In making such a finding with respect to a food additive, the Secretary shall con-

sider and in the finding—
(I) evaluate the intake level at which the food additive causes cancer in animals in relation to the reasonably expected intake level of the additive by humans,

(II) evaluate the quality of any test data and the validity of any tests which may have been performed of the food additive,

(III) assess human epidemiological and exposure data respecting the food additive and statistical data on human consumption

(IV) evaluate any known biological mechof carcinogenic effect of the food

(V) evaluate the means, available to minimize human exposure to the risks presented by the food additive and the adequacy of

the data available on such means, and
(VI) evaluate the probable effects of prohibiting the use of the food additive and
evaluate the probable effects of permitting its use, such evaluations to be made in accordance with the following priorities: first, health risks and benefits; second, nutritional needs and benefits and the effects on the nutritional value, cost, availability, and ac-ceptability of food; third, environmental effects; and fourth, the interests of the general public.

COSPONSORS OF H.R. 5166 (As of noon, April 4, 1977)

,Mr. Abdnor (R-SD) Mr. Addabbo (D-NY). Mr. Anderson (R-IL). Mr. Andrews (D-NC). Mr. Archer (R-TX). Mr. Ashley (D-OH). Mr. Bafalis (R-FL). Mr. Bauman (R-MD.) Mr. Beard (R-TN). Mr. Bedell (D-IO). Mr. Benjamin (D-IN). Mr. Bevill (D-AL) Mr. Blouin (D-IO). Mr. Bowen (D-MS) Mr. Brinkley (D-GA). Mr. Brooks (D-TX). Mr. Brown (R-MI) Mr. Broyhill (R-NC) Mr. Buchanan (R-AL). Mr. Burgener (R-CA). Mr. Young (R-FL). Mr. Young (R-AK).

Now Mr. Speaker, there are of course those who disagree. Many columnists and editorialists have missed the entire point of the saccharin controversy. Some have uncritically accepted the premise of the Ralph Nader Health Research Organization: namely, that saccharin and the Delaney clause represent a classic conflict between consumers and producers. Rather, if anything, this is more clearly a conflict between con-sumers and consumer advocates—at least, those advocates who would disregard the most valid evidence of risks as well as the substantial benefits associated with saccharin.

My bill, H.R. 5166, was drafted with the technical assistance of the Food and Drug Administration and allows the balance of benefits and risks of the general public-consumers not producersto determine whether an additive will be banned. That regulatory concept has won wide support in principle from medical and nutritional specialists, from consumer groups not dominated by the antibusiness presumption of the Nader organization, and by three former FDA Commissioners.

While the food industry has a vital and valid interest in the outcome, and has offered its own alternative legislative measures, my bill with 177 cosponsors is derived from the viewpoints of

consumers, regulators and health

My bill does not arbitrarily reject massive overdose experiments on rats. It allows their evaluation as well as that of other scientific evidence, such as tests on other animals, and epidemiological studies of human health statistics, if available. If the best evidence, that most pertinent to ordinary human use, shows no evidence of increased cancer incidence due to saccharin, that should be taken into account too. It cannot be unless the Delaney clause is amended.

Reports on the carcinogenic risk of a flame-retardant chemical, tris-(2,3-dibromopropyl)-phosphate, have cited the validity of the "Ames" test which shows that chemical to be mutagenic, therefore very probably carcinogenic. Why not take into account the report that Dr. Ames has not found saccharin

to be mutagenic?

The Delaney clause pertains only to food additives. If you accept uncritically its basic premise that it is an unacceptable risk to permit in our food supply any detectable trace of a chemical that causes cancer in animals fed massive overdoses, you must contemplate banning half the grocery shelf of natural foods. You cannot presume that natural carcinogens in food are less potent than synthetic additives. You can, however, take into account evidence that normal exposure is no great risk and that the benefits exceed any remote risk. Why not do the same for saccharin?

Under my bill, a suspected carcinogen would not be allowed as a food additive unless its public benefits clearly outweigh its risk. Does saccharin have such

public benefits?

Ask millions of consumers who have heart disease, diabetes, hypertension, hypoglycemia, obesity. Some writers hypoglycemia, obesity. Some writers have uncritically accepted the Nader-Wolfe philosophy that saccharin had no medical value, but is only a convenience of taste.

To be sure, some people can do without sweeteners in their diet-just as some people can voluntarily give up smoking-having done so over and over again. Millions cannot. They cannot muster the elitist dietary discipline. For them, nonnutritive sweetening is an important part of their successful diet control.

It is becoming increasingly recognized that obesity predisposes to cancer as well as diabetes and heart illness. It increases your risk. Thus, if saccharin enables millions of consumers to control their weight better than without it, then banning the last of the noncaloric sweeteners may well increase the risk of the very disease we seek to avoid—and more.

If saccharin is, for some, a disposable convenience; for many millions of others it is effective preventive medicine. That cannot be tested by feeding rats massive overdoses. It can be tested by public health statistics and by past experience.

Only if we provide for such a cautious exception to the otherwise absolute ban of the Delaney clause, can we resolve the saccharin controversy so as to serve the best health interests of real consumers. Because of its subject matter, the Delaney clause deserves to be amended only with great caution; but it deserves to be amended.

Now, let me insert the recent testimony of Dr. Kurt Isselbacher, M.D., of Harvard Medical School, whose impressive credentials eminently qualify him to assess this issue:

TESTIMONY OF KURT J. ISSELBACHER M.D. BE-FORE HOUSE SUBCOMMITTEE ON HEALTH AND THE ENVIRONMENT, MARCH 21, 1977

Congressman Rogers and distinguished Members of the Subcommittee:

I am Kurt J. Isselbacher, M.D., Professor of Medicine and Chairman, Executive Committee of the Departments of Medicine, Harvard Medical School, Boston and Chairman of the Harvard University Cancer Committee.

I am here to express to you my personal concerns as a physician and clinical investigator about the FDA proposal to ban the use of saccharin in foods and beverages because saccharin has been found to cause malignant bladder tumors in rats. As Chairman of the Harvard University Cancer Committee, and from professional inquiry I can assure you am deeply concerned about the problem of environmental carcinogens. The issue before us today clearly emphasizes the complexity of the problem of determining whether a given chemical or agent poses a possible potential or real and probable human hazard.

In the case of saccharin I believe (1) that the results of the available rat experiments appear to have been overinterpreted in regard their application to man; and (2) there is an extensive body of information on human consumption of saccharin over the last 70 years to provide some indication as to whether or not saccharin may have a role in producing human bladder cancer; finally quantitative extrapolation from animal studies to evaluate the human hazard entails many uncertainties, and each case must be individually evaluated-taking into consideration many factors such as (a) whether the agent is a weak or strong carcinogen, (b) whether the results have been replicated in other species or other test systems, (c) how the data compare with the amounts that might be consumed by man, and (d) finally, assessment of the possible social, economic or medical benefits.

A. THE RAT EXPERIMENTS

In some of the rat experiments the amounts of saccharin used were as much as 8,000 times the amounts calculated to have been consumed by the average, adult male in 1972 [2.5 gm/Kg/day(rat) versus 0.3 mg/Kg/day(man)] 1. I suspect there would be few individuals who could ingest even 1/1,000 of such a tumor-producing dose (weight for weight in rats)—namely, 56 saccharin tablets a day. This raises the important question of the potency of saccharin as a carcinogen and balancing this against the amounts that might possibly be ingested by a human being during his or her lifetime.

If one examines the data indicating that cancer of the bladder also occured in second generation rats which have been continually fed on saccharin, it must be noted that, since saccharin crosses the placenta, the fetus must have been exposed to an ever higher dose than that to which the adult animal was exposed.

We recognize that giving excessive doses of any drug or agent to an experimental animal can have adverse or toxic effects. Imagine if water, salt or sugar were to be introduced today as possible agents for use by us and fed to rats in these excessive doses. The animals would undoubtedly die before they could develop a malignancy!

The extrapolation of experimental carcino-genicity data to the human situation is strengthened by obtaining results in more than one species or more than one system.

Apparently the feeding of saccharin to monkeys has not produced evidence of malig-nancy after 6.5 years. Extensive use is also currently being made of the "Ames which monitors the development of bacterial mutations as a possible indication of carcinogenicity. The available data indicate that saccharin is not mutagenic in the Ames "Salmonella" system. Dr. Ames verified this as recently as last week.

B. THE HUMAN EXPERIENCE

Man has often been accused of rat-like and at other times mouse-like behavior, and perhaps it is expected that we might look askance at experiments in mice or rats. However, even with subhuman primates, such as baboons and monkeys, major discrepancies are known to occur, and adverse effects have been found in such primates, but not in man, presumably because of metabolic differences.

It is fortunate for us that saccharin has been used for over 70 years and that there are numerous well-designed epidemiologic studies by workers from Oxford 123 (England), Baltimore 4 and Boston 5 on the possible relationship between saccharin ingestion and bladder cancer. Many of these studies have been carried out in diabetics known to consume more saccharin than the general population. In all of the studies, even with evidence of an above average saccharin intake, no increased incidence or mortality of bladder cancer has been demonstrated. It is recognized it may take 20 or more years for a carcinogen to produce cancer in man. However, in one of the reports, over 10 percent of the diabetics studied consumed saccharin for more than 25 years. Thus, clearly to date there has been no epidemic of bladder cancer as a result of saccharin consumption!

C. THE RISK/BENEFIT RATIO

While the "Delaney Clause" prohibits the use in food of any ingredient shown to have produced cancer in animals or man, it is evident that more than this must be sidered. Actions must be based upon indi-vidual considerations. The criteria appropriate for one agent may not necessarily apply to another.

I would submit to you that, in the case of saccharin, the available data indicate that humans for developing cancer the risk of from saccharin in the amounts ingested by the average individual is remote: the harm. however, which may occur to millions in the absence of a non-nutrient sugar substitute is great. In this country the problem of obesity is far greater than that of malnutrition. The problem is so great in fact that a significant number of patients with obesity are subjected to a special type of surgery testinal bypass) which in fact is associated with significant hazards, including death. Patients with these disorders need help, and here is an example where the medical benefit clearly outweighs the remote risk based upon the rat data. Also, as you have heard and as you are aware, diabetics clearly benefit from the use of non-nutrient sweeteners or sugar substitutes. Patients with obesity and diabetes are indeed at risk-but not in my view from developing cancer as a result of the ingestion of saccharin-but at risk of developing the serious and well-recognized complications associated with these diseases

On an anecdotal note, several days ago, a distinguished international chemist and former Presidential Science Advisor told me, "I'm not worried. I have stored up enough saccharin to last me a lifetime!" That's fine for him, but not for those of us who do not have such a stockpile.

Let me conclude by indicating to you that in my personal view given the current information, the banning of saccharin is counterproductive, and I believe is not indicated until or unless some "safer" non-nutrient sugar substitute is available.

In conclusion, Mr. Speaker, let me summarize the argument for amending the Delaney clause.

First. We know saccharin has no discernible risk at normal dosage (approximately 3 grains per day).

Second, Saccharin is the first additive to fail the Delaney test for which the benefits clearly outweigh risks.

The public health risk of banning saccharin are far greater than the public health risk of permitting it.

Previous amendments to the Delaney clause lacked this clear motive.

Third. In the Canadian study, rats developed bladder tumors after a lifetime of massive daily overdose.

In the absence of other evidence or considerations this ought to ban an additive

With saccharin, more valid evidence shows no carcinogenesis associated with normal human use.

Under the Delaney clause (1958), all such evaluations must be suspended if any dose produces tumors. This absolute standard allows zero tolerance. It stifles further research.

Fourth. Therefore, the Delaney clause needs modern adjustments to permit the FDA and the Secretary of HEW to exercise reasonable judgment.

If the risks are too great: Ban it.

If the benefits are too dear: Minimize exposure, but do not ban it.

Fifth. Other approaches focus exclusively on saccharin. This may be necessary if all else fails but it raises consequent problems.

Problem 1. This requires congressional intervention on any subsequent cases.

Problem 2. This locks saccharin out of FDA purview when new evidence appears.

Again, the Delaney clause deserves to be amended only with great caution; but it deserves to be amended.

Mr. JONES of North Carolina. Mr. Speaker, as most of us are beginning to realize, the more information that has developed since the Food and Drug Administration first announced its proposed ban on the artificial sweetener, saccharin, the more ridiculous the ban begins to be. After making some personal investigation, I was advised by the

American Cancer Society that three or four comprehensive studies done recently show there is no indication of any higher incidence of death from cancer in diabetics than in people who are not diabetic. And, of course, the average diabetic uses far in excess of the average person, a daily number of foods and beverages containing saccharin. In fact, the mortality ratio of deaths due to all types of cancer for males was only 85 percent of that found in the general population. These facts have been documented by Dr. C. Cuyler Hammond of the American Cancer Society Headquarters in New York. Along with others, I urge the early passage of H.R. 5166, to amend the Delaney clause by providing a mechanism for a reconsideration of an adverse determination made by Food and Drug Administration on a certain food additive, or actually, provide a way of appealing a ban when an additive is found to induce cancer in test animals Certainly the theory that public benefits outweigh public risk factors is sound and must be maintained.

Mr. RYAN. Mr. Speaker, I want to join my colleagues in expressing disapproval over the recent FDA decision to ban saccharin. This is only one example of the level in which decisions are made by the FDA in regard to the use of drugs. The most significant consequence of this decision, however, affects the vital health of over 10 million Americans who must restrict sugar in their diets—primarily the diabetics. There are millions of others, however, who use saccharin for the purpose of keeping their caloric intake down and for others, physical reasons such as heart disease, hypertension or cardiovascular diseases.

The response in my office to the ban has been tremendous. Over 200 of my constituents have written in asking me to oppose this decision by FDA. I am hopeful that this Congress can achieve some permanent change in the amendment which caused all the trouble in the first place.

Mr. HAMMERSCHMIDT. Mr. Speaker, because the proposed FDA ban on the use of saccharin affects so many people, it seems to me the situation demands that we give a great deal of careful thought to the approach we take and the direction of our efforts and that we try to find the right balance.

I am certainly not an advocate of any extreme action because the questions raised by the recently announced ban cannot necessarily be answered immediately in a precise manner. This is really a question of values and so many variable factors come into play that a common sense approach is called for.

In actuality, it is not possible at this time to accurately predict the percentage of the population that will develop cancer from exposure to a dose of a particular substance for a certain period of time. This is so because there is no direct observation of the human population. In a sense, this lack of conclusive evidence based on human consumption forces us into a situation whereby the real question might be one of benefits versus risks. The entire issue is not only a scientific one; it is a complex issue with social, health and economic aspects.

Like some other of my colleagues here today, I have joined in various legislative efforts to deal with this situation. I have signed a letter to the FDA Commissioner expressing the view that the announced ban on the use of saccharin is precipitous, inasmuch as the action was based on the results of a Canadian study, rather than on an FDA study of its own.

And, I have joined with our colleague, JIM MARTIN, who has initiated this special order today, in sponsoring a resolution expressing the sense of the House that the proposed ban should not go into effect until the Congress has held hearings and found that normal consumption of saccharin is unsafe. In addition, I am pleased to have joined with him in cosponsoring legislation to change the process of determining the safety of food additives and permitting the continued use of saccharin. I believe this to be a responsible and practical approach. The bill does not repeal the Delaney clause. which is the legislative basis for the testing of food substances by the FDA. And, I for one certainly do not advocate that we scrap that law entirely; I feel that we should perhaps modify it. The measure which I have cosponsored provides us with a mechanism for reconsidering an adverse determination by the FDA when a food additive or substance is found to induce cancer in animals. This will insure a degree of flexibility in the way of allowing an appeal of a proposed ban, something which is so obviously absent in the current testing process. It will offer an opportunity to make a more responsible determination, taking into account the various factors involvedhealth, social and otherwise.

Mr. Speaker, millions of Americans depend on the use of saccharin for health reasons—those with diabetes, heart disease, hypertension, and cardiovascular disease, as well as many others who are overweight or who want to prevent obesity. These people will be adversely affected by a ban on saccharin. We must act with deliberation in taking a responsible course of action on the proposed saccharin ban. What we do now on this will have a far-reaching effect on untold millions of people now and in the future.

Recently, I had the opportunity to read a most interesting and, what I believed to be, a well-reasoned article in the Washington Post by the noted biologist. Barry Commoner, in which he reflected a good deal of insight into the entire issue of the testing of food additives and substances. Because I feel that it is an objective assessment of the problem, I submit the article for the consideration of my colleagues, in the hope that it will serve as a useful guideline for our current and future actions on this complex issue:

[From the Washington Post, Mar. 27, 1977]

SACCHARIN AND CANCER

(By Barry Commoner)

The current controversy about the Food and Drug Administration's decision to ban saccharin, based on tests which show that it produces cancer in laboratory rats, reveals a serious degree of confusion about the significance of such tests and about what steps should be taken to reduce the risk of cancer.

Some claim that tests carried out on rats do not apply to people because of the biological difference between the two species. ("People aren't rats.") Some claim that the results of such tests are irrelevant because they involve extremely high exposures never encountered in human experience. ("A person would have to drink 800 bottles of diet soda per day to be exposed to the amount of saccharin equivalent to that fed to the rats.") Finally, others propose that the Delaney Amendment, which forbids the addition to food of any amount of a substance known to cause cancer in any species of animal, should be replaced by a procedure which balances the anticipated risk of cancer against the social benefits of using the substance.

This confusion is dangerous because it threatens to hinder the most important step that can be taken to reduce the enormous human toll of cancer: that of reducing exposure to environmental agents believed responsible for at least three-fourths of the

U.S. cancer incidence.

To begin with, we must understand that because of the unquestionable scientific evidence that most of the U.S. cancer incidence is due to environmental agents, the only possible prevention for the disease is to reduce contact with these agents. Nearly all of these agents are carbon-containing chemical substances, mostly synthesized by the petrochemical industry, rather than occurring in nature. There is sound scientific evidence that most of these substances do not directly trigger the development of cancer, but that they are converted into active carcinogens in the body by the metabolic action of enzymes.

It has also been established that the ability of different animal species to metabolize, or convert, environmental carcinogens into inherently active cancer-causing substances varies greatly. Thus, when fed a particular carcinogen called AAF, rats will almost always develop cancer, whereas guinea pigs

will never develop it.

Clearly, the best way to determine what substances cause cancer in people would be to observe the effects of different substances on people. Obviously, since deliberate exposure is unthinkable and because epidemiological data are obscured by long delays and demographic factors, such information is very difficult to obtain. An exception is the kind of intense occupational or accidental exposures that too often occur. Studies of such exposures yield a list of about 10 to 20 substances which can be directly shown to cause cancer in people. But this list is far too short to explain the strong dependence of the incidence of cancer in the United States on the environment which is revealed the National Cancer Institute's countyby-county survey. Many more substances must be involved; the question is how to identify them.

Meanwhile, tests on laboratory anmials, particularly rats and mice, have produced a list now approaching a thousand substances known to cause cancer in one or more species. What does this information tell us about the likelihood that a particular substance will cause cancer in people?

ANY ANIMAL EQUALS SOME PEOPLE

A basic fact about animal tests is this: Laboratory animals are strains which have been intentionally bred into highly uniform populations. Most laboratory animal strains are highly uniform in their sensitivity to carcinogens. In any one strain each laboratory rat is very much like the next one; but as already indicated, one strain, or species, may be very different from the next.

One of the most important factors that determines the sensitivity of a species or strain of animal is the activity of the enzyme system which converts environmental carcinogens into active metabolic products that actually trigger the cancer. (In the previous example, the rat's carcinogen-activating enzymes are able to convert AAF into the active metabolic product, while the guinea pig enzymes are not.)

(A new type of test, in which the ability of

a substance to induce genetic changes, or mutations, in bacteria is used to predict its carcinogenicity toward laboratory animals, promises to deliver this information more rapidly than animal tests.) Once this information is in hand, a decision regarding whether and how human exposure to it is to be controlled becomes inescapable. Such a decision can be made in two alternative ways:

1. ABSOLUTE (i.e., the Delaney Amendment): This approach involves the decision that, given the disastrous health effects of cancer, no benefit from a particular substance worth the risk, however small it may be. And, evidence that a substance causes cancer in a laboratory animal means that some people also run the risk of cancer. Accordingly there is scientific support for the scientific assumption inherent in the Delaney Amendment-that a positive animal test for carcinogenicity is evidence of a risk to people. In effect, then this approach involves no further evaluation by society, other than the assertion that no risk of cancer to people is ever, under any circumstances, to be deliberately induced. No evaluation of benefits is undertaken in this approach. Thus, once the absolute evaluation of the importance of the cancer risk is accepted, the decision rests only on a purely scientific fact: that, on the basis of animal tests, a substance is or is not carcinogenic.

2. RELATIVE (i.e., risk/benefit evalua-tion): This approach is now being urged in opposition to the Delaney Amendment. In keeping with the approach used to evaluate general environmental hazards, this method asserts that action should be based on the socially perceived balance between the carcinogenic risk of exposure to a substance. and the benefits to be derived from using the substance. For example, the risk of cancer from using saccharin would be balanced against the benefits it yields in weight control or in the diet of diabetics. This approach involves the scientific evaluation of the risk of cancer, as well as the scientific evaluation of the benefits associated with a substance. However, balancing the benefits against the risks belongs not to the domain of science, but to society. The assessment is a value judgment-a social rather than a scien-

tific process.

In order to ensure an informed social evaluation, the magnitudes of the risks and benefits need to be scientifically evaluated. As already pointed out, animal tests about a given carcinogen can produce a vital but qualitative conclusion: that the risk of cancer among exposed people is not zero. On the other hand, the benefits of a substance, such as saccharin, can often be assessed over a wide range of values.

For example, if saccharin is essential in the diet of a diabetic, it has the considerable benefit of extending human life. In contrast, saccharin used in the massive marketing of "diet soda," which for most people could be replaced by another product, can be assigned a much lower benefit.

Similarly, the social benefit of an antileukemia drug which is itself carcinogenic may be quite high, whereas the social benefit

of a carcinogenic food dye is very low.

In the same way, the use of polyvinylchloride—from which the carcinogen vinyl chloride may leach—may have a very high social value in an artificial heart valve, because there is no substitute for this essential function. In contrast, the use of the same polyvinylchloride in food packaging has a much lower social value, because safer substitutes,

such as glass or paper, are available.

Thus, if we choose the option of balancing the risks and benefits of carcinogens we face a rather unusual situation: While it is possible to attach a wide range of values to the various possible benefits of using a carcinogen, about all that can be said about the risk is that it does or does not exist. Given this situation, the practical course of mak-

ing the social risk/benefit judgment can take one of the following general forms:

1. If, balanced against the fact that the

1. If, balanced against the fact that the risk of cancer from a particular substance is greater than zero, it is determined that the associated benefit is essentially zero, then the substance would be banned. For example, carcinogenic food dyes would be banned on the grounds that they contribute nothing to nutrition, which is the social value of food.

2. At the other extreme, if the social benefit associated with the use of a carcinogen is judged to be so great—for example, saving a life that would certainly be lost otherwise—that it warrants even a large carcinogenic risk, the substance would be approved for that social use. For example, saccharin might be approved for use by diabetics who have no alternative way to achieve an acceptable diet, but banned for massive use in diet soda, on the grounds that there are equally or more effective ways to control weight.

3. In intermediate cases, it would again be necessary to reach some judgment of the benefits associated with the use of the substance, so that its social value can be balanced against the evidence that it creates some risk of cancer. Such a judgment would be more difficult than the first two, but not

impossible.

What is noteworthy about this kind of risk/benefit evaluation—necessitated by the peculiarly qualitative nature of carcinogenic risks—is that the social balance between risk and benefit is, in practice, based on a comparison of the social benefits of different substances which are known to involve some, unmeasurable but real, risk of cancer. This means, therefore, that if the risk/benefit approach is chosen to deal with carcinogens (for example, if, in the case of food additives, the Delaney Amendment is revoked) the decision will need to be based on the social evaluation of the benefits to be derived from any chemical that imposes a risk of cancer.

The foregoing arguments apply not only to the carcinogenicity of chemicals, but also to most of the toxic effects of chemicals, since these are often as difficult to assess quantitatively. In effect, then, if the risk/benefit approach is adopted, it means that society must undertake to determine, on the basis of their value to society, what chemical substances are to be produced, and are permitted to come into contact with people. This will require social governance of decisions—about what chemicals to produce and for what purposes—which, in our present economic system, are governed not by social,

but by private interests. Now, the situation in people is vastly dif-ferent. Human populations are, of course, much more variable in their characteristics than inbred strains of laboratory animals. There is now specific evidence that this variability occurs in the enzymes that are involved in activating environmental carcinogens. For example, according to a recent study of enzyme activity in the placentas of pregnant mice and pregnant women, activity varied by only 10 per cent among individual mice, while among different women, it varied by 7,000 per cent. In this experiment, the women were all cigarette smokers, and the mice were also exposed to cigarette smoke. (This reflects another essential fact about carcinogen-activating enzymes: their production is considerably increased by exposure to a number of environmental agents-of which many, but not all, are carcinogens—including tobacco smoke, chlorinated hydrocarbons such as DDT and PCB and certain

People then, are more variable than purebred strains of laboratory animals in their genetically determined levels of enzyme activity (this may well explain why not all smokers develop cancer); in addition, people are exposed to a much more variable environment of substances (such as tobacco smoke) that can stimulate the carcinogenactivating enzymes.

This very different range of variability among populations of laboratory animals and of people must be carefully considered in interpreting animal tests on carcinogens. In the absence of direct data on people, there is little point in comparing the entire human population to either a population of carcinogen-sensitive rats or to a population of carcinogen-resistant guinea pigs. Rather, because the human population is so variable, will contain some individuals who react like one species, some who react like the other and many who occupy the whole range in between. Once it is established that a substance is carcinogenic toward any species of laboratory animal, it is likely that it will cause cancer in some individuals in the human population.

WHY THE LARGE DOSAGE

At this point it is important to consider the actual incidence of cancer observed in laboratory tests and in human populations. The overall annual incidence of cancer in the United States is about 0.3 per cent; and at that rate cancer is the second highest cause of death. A 1 per cent incidence would be huge. To reduce this incidence, we need to know what environmental substances are responsible for incidences of cancers of the order of about 1 per cent.

In order to measure such a small statistical effect in a laboratory experiment, huge numbers of animals would be needed. Therefore, much higher doses of carcinogen are used, so that the cancer incidence among the test animals is usually between 50 and 100

per cent.

The purpose of the animal test is not to determine whether people would get cancer from such high exposures, but only to decide in a feasible, statistically significant way, whether or not the substance will cause cancer in the test animal. Such tests can usually give an unequivocal answer, at the large doses that are customarily used. For example, animals fed large amounts of sugar, aspirin or sulfa drugs do not develop cancer. It is therefore scientific nonsense to assert, as some people have that "any chemical given in a sufficiently high dose will cause cancer.

To compare the carcinogenic potency of different substances is extremely difficult. According to the most comprehensive evaluation of the carcinogenicity of chemicals, "Comparison of potency between compounds can only be made if and when substances have been tested simultaneously." Since such comparison tests are rare and involve relatively few substances, there is little basis for quantitative evaluation of the potency of most carcinogens, especially where it is necessary to extrapolate from animal data to human beings. However, it is generally agreed that there is usually no absolutely "safe" level for exposure to a carcinogen; low exposures involve a small, but not zero, risk.
In the absence of direct observations of

human populations, it is impossible to predict what percentage of the population will develop cancer when exposed to a given concentration of a particular substance over a stated period of time. Except for the relatively few substances (such as vinyl chloride) directly observed to cause cancer in people, those substances shown to be carcinogenic to animals must be regarded as a cancer risk of unknown degree. Animal tests tell us that the risk is not zero, but they do not tell us the size of the risk.

RISKS AND BENEFITS

We now come to the question of whether the risk of a carcinogen to people ought to be evaluated against its benefits.

For example, what is the benefit of a carcinogenic dye that makes hot dogs red? If the social purpose of hot dogs is to nourish people, then-leaving aside the argument about what contribution the hot dog itself makes to human nutrition—the dye has no value at all. If "market research" shows that people are more likely to buy red-dyed hot dogs than a competitive brand which is not dyed, then the only social value of the dye is to enable the first company to sell more hot dogs.

In the same way, the social benefit derived from preservatives is that they help make possible the production of foods at large, centralized factories from which they are shipped over large distances and necessarily long times. If a food preservation turns out to be carcinogenic, then the risk must be evaluated not against the benefit of buying "fresh" food but against the relative benefits of preserving food for long shipment, or arranging to produce it locally and to deliver it fresh.

It can be seen, therefore, that once the attempt is made to weigh the risks against the benefits of a food additive-or of any of the numerous synthetic chemicals introduced into the environment by the petrochemical industry-very far-reaching economic, social and even political questions are raised. In practical terms, a substance is designated as a "carcinogen" by animal

Mr. McCLORY. Mr. Speaker, at some time during his career, nearly every American politician has been given this simple advice: trust the people. Generally these words have been wise. Indeed, the ability of the people to govern themselves is the foundation on which our American system is built.

If my mailbox is any indicator, there has been more spontaneous outrage against the Food and Drug Administration's saccharin ban than against any other recent Government action. The common thread in this letter is this: Saccharin is important to Americans. They have benefited, not suffered, from its availability. They want to continue to use it.

In other words, the people are asking their Government to trust them to act in their own best interests. A modest request, I submit, in the greatest democratic society the world has ever known.

As it often does, the message the people are sending to Washington makes sense. No evidence exists to indicate that saccharin has ever harmed a human being. But because of the Delanev amendment, which has been examined so closely in recent weeks, and decried so forcefully by my colleagues this afternoon on the floor of the House, saccharin will be taken off the market in July with-

out congressional action.

Mr. Speaker, the saccharin prohibition affects citizens in every congressional district. But the Delaney amendment has had a previous impact on my 13th District of Illinois in connection with the banning of cyclamate in 1969. Cyclamate, widely acclaimed as the best of the artificial sweeteners, was developed by Abbott Laboratories of North Chicago, Like saccharin, it has never shown to cause cancer-or any other malady-in a single human being. But because massive doses caused cancer in laboratory animals, the FDA removed cyclamate from the market. The economic impact of this action on both Abbott and the entire North Chicago community was profound.

The saccharin ban is the most striking of many recent examples of a trend toward overprotective government. The general outcry against the ban holds echoes of many individual letters to my office protesting other well-intentioned Federal restrictions, imposing mandatory inconveniences on frequently unwilling citizens.

Mr. Speaker, I commend my colleagues from North Carolina (Mr. MARTIN) and Illinois (Mr. O'BRIEN) for reserving time today for discussion of this important

Sensible legislation has been introduced to amend the Delaney clause and allow saccharin to remain on the market, and I am pleased to lend my cosponsorship to this effort.

Mr. Speaker, I am hopeful that discussion of the issues surrounding this unnecessary and potentially harmful saccharin ban will raise for our further consideration the issue of how much the American public wants Congress to strip away its ability to make choices in its own perceived best interest.

Surely, Mr. Speaker, it is time for us to consider exactly how much we do trust

the people.

Mr. QUILLEN. Mr. Speaker, it is the responsibility of the Congress to act swiftly to amend the Federal Food, Drug, and Cosmetic Act to permit the continued use of saccharin by millions of people, including diabetics and those with weight problems, who need this important food additive. I have joined with many other Members in cosponsoring Congressman Jim Martin of North Carolina's bill, H.R. 5592, the food additive safety amendments of 1977, which will insure that saccharin will continue to be available on the market, and urge my colleagues to join us in support of this

The recent decision of the Food and Drug Administration to ban the use of saccharin has understandably loud and continuing protests, but the responsibility for this mischief lies not so much with the FDA as with the Federal law this Agency is required to enforce. A change written into the FDA statute in 1958 bars the use of any food additive that "is found to induce cancer when ingested by man or animal." The problem, of course, is that many beneficial substances, if taken in massive quantity, may cause cancer. Proof that saccharin was a danger to health would justify a ban. But saccharin has been used for over 80 years and there is no proof whatever that any human being has developed cancer by using this artificial sweetener. The test on which the ban rests involved feeding Canadian rats stupendous doses of saccharin-the equivalent of a human consuming 800 12-ounce bottles of diet soft drink daily for 40 years. This is ridiculous.

The bill I am sponsoring would change the present law by requiring an evaluation of the intake level at which a substance induces cancer in animals "in relation to the reasonably expected intake of humans," This provides a remedy which will prevent action such as this ludicrous ban on saccharin, while at the same time continuing to provide for the careful control of food and drug products that is so essential for the public health

But millions of Americans need artificial sweeteners for medical reasons or for use in diet control, and it is wrong to deny them this product when there is no clear and present danger of harm to human health.

Mr. ROBINSON. Mr. Speaker, all of us are concerned about the menace of cancer, and we want to provide for the highest practicable margin of safety against cancer in foods, food additives, and drugs which are taken into the human body.

The ruling on saccharin seems to be a most extreme application of limited evidence, however, and there is understandable concern among diabetics and other folks who should not consume much natural sugar.

As has often been pointed out, for example, a human would have to consume 800 diet sodas a day for a lifetime to ingest a comparable amount of the sac-

charin fed to the rats in the bizarre Canadian test. Hence, it is no wonder this ban is regarded as premature, arbitrary and cruel by millions of Americans.

Therefore, I am pleased to be cosponsor of the Martin bill, H.R. 5822, to amend the Delaney clause to reflect greater realism involving the assessment of research results. I am prepared to support any variation of it which would protect the public not only from adequately established cancer dangers in edible products, but also from overhasty rulings on shaky evidence, such as in the case of saccharin.

Mr. COLLINS of Texas. Mr. Speaker, the issue of banning saccharin has become a symbol to the American people of the autocratic authority of our Federal Government. This is the grossest experience of minutely directing the daily

lives of all of the people in our country.

The Federal Drug Administration should seek judicial review to see if it has the power to issue this ban. Public Law 85-929 was passed back in 1958 and stated, "be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, that this act may be cited as the Food Additives Amendment of 1958." This makes it very plain that it is the Congress of the United States and refers to the United States. The FDA interpretation would appear to be from the United Nations. The FDA has taken some rat experiments made by the Canadian Government in Canada and they state these Canadian studies establish mandatory law within the United States.

The FDA is referring to a section of the law which says "after tests which are appropriate for the evaluation of the safety of food additives to induce cancer in man or animal." Tests which are pre-pared in Canada are not appropriate for an evaluation in the United States. Both by nature of the fact that the law was passed by the U.S. Congress for the United States and by the explicit term appropriate it is evident that Congress never intended to establish our basis of life in this country based on directives and studies of the Canadian Government. We must have judicial review of the saccharin ban because the FDA proposes a constitutional violation of the civil rights of American citizens.

Legislation should be responsive to the American people. We live in a Republic where Congressmen represent the American people. I have just mailed a questionnaire to my district asking for their views and ideas. Of the eight questions I had one which asked "Do you favor placing a Federal ban on Saccharin?" I just picked up a random sample bundle of 2.558 questionnaires. There were 144 that had no opinion. There were 138 that believed in the Ban and 2,420 that were opposed to the ban. This survey is representative of all America.

Many people have asked us why they did not ban cigarettes instead of Saccharin. Many people object on the grounds that individual choice should charin. determine what we eat in our own living nattern

But the strongest objections come from the Weight Watchers and the diabetics. Let me quote on what I have just read:

I am physically unable to tolerate sugar and have been using saccharin for over 20 years and I can assure you I have never had any adverse effects from it. I am past 70 years old with crippling arthritis, as well as other ailments, and I find this added burden very hard to take.

In the entire history of our country there is nothing yet that has proved that saccharin causes cancer. Any chemical substance can have adverse effects if used in too great a quantity. Even pure water can have a negative reaction. Even sunlight can be adverse. But used in proper balance we find that pure water, fresh sunlight, and saccharin lead to a better balanced life.

Mr. BIAGGI. Mr. Speaker, I wish to associate myself with those of my colleagues who are sponsoring this special order to speak out against the proposed ban on saccharin. I feel sufficient participation by Members will greatly enhance our efforts to gain a reversal of this most unfortunate and unjustified position.

I would imagine that if I as an individual were to consume more than 1,000 saccharin-treated soft drinks in a year, I might conceivably increase my risks of acquiring cancer—not to add some other of illness. Yet, practically elements speaking, who consumes this quantity of soft drinks and who uses 1.5 million packages of saccharin a year? To my knowledge, only a collection of 100 Canadian rats ever were so brave and they really had no choice.

Yet, it was based on this most extreme of experimental procedures that the Food and Drug Administration issued their dictum proposing a ban of saccharin. Correspondingly under the provisions of the archaic Delaney Act this constituted appropriate testing sufficient to permit the Secretary of HEW to uphold this decision. Fortunately, this has not yet been the case. We in the Congress have an opportunity to make some necessary revisions in the Delaney amendment. I have offered legislation in this area which is designed primarily to give the Secretary greater discretion in his determination of those products which should be banned for health reasons.

In the case of saccharin, we are talking about a product used widely by millions of Americans for many years without any documented ill effects. It is a vital commodity for the chronically overweight and the 10 million diabetics in this Nation. What are they to do if the ban goes into effect? Will they then be forced to acquire saccharin by prescription-at a cost at least three times higher than at present? There is no real alternative to saccharin-true there are some substitutes being devised, but they are several years away and what is one to do for

The only real answer lies in the passage of legislation to revise the Delanev amendment for this, and any future attempts to ban important commodity or food substances. Such legislation is needed to prevent the saccharin ban from going into effect.

Let us not overlook the other side of the coin. The American Government does have an obligation to protect its citizens from clearly dangerous carcinogenic products. The incidences of cancer are increasing at a rate which mandates our continual monitoring of all suspected dangerous food products. But let us not be overzealous or hysterical in our pursuit of food additive safety. Changes in the existing law should strike a reasonable balance, and I fully support their immediate consideration by this Congress.

Mr. WINN, Mr. Speaker, I know that I am not the only Member of Congress who is besieged with hundreds of letters and petitions from citizens outraged by the proposed FDA ban on saccharin. Daily, my constituents have brought to my attention their unanimous disapproval of the removal of the only noncaloric sweetener which is still legal in the United States.

There are several reasons why I share their alarm. First, as the father of a diabetic and as an interested member of the Diabetes Association of Greater Kansas City, I have concern over the consequences which may occur in the lives of those who have relied on saccharin as the only substitute for sugar. I had a letter on my desk last week which contained the following brief message:

Please help us to keep saccharin. I am 70 years old and a diabetic. I can't have sugar.

It is difficult for me to think of a reply would satisfy this distressed which citizen.

I am receiving another type of letter. This letter is from people who have been using saccharin in their fight against weight problems. Often I assure you, their reliance on saccharin does not stem from cosmetic worries but from legitimate desires to improve or maintain a healthy weight. Many mature and responsible adults have written me:

I have been using sugar substitutes and sugar-free soft drinks for years to cut down on my caloric intake. I have done so for health reasons, with the specific advice of my physician.

All of us are aware of the overweight syndrome which plagues many Americans and increases their susceptibility to

heart disease, and for women, the possibility of breast cancer.

I would like to stress, however, that there is a third type of letter which disturbs me most of all. Many of my constituents from eastern Kansas have expressed intelligent, rational concern about the extent to which the Federal Government should regulate the lives of its citizens. I received a long petition which is only one illustration of the complaints about Federal interference. The signers of the petition stated:

As always, I ask that the facts continue to be given to me whenever tests are proven in the laboratories in regard to our Food and Drug usage but allow me to make the decision myself whether to continue using such a product or not. I do not want it dictated to me by government control.

It strikes me as absurd that in a society that permits the legal use of cigarettes, which long ago were branded a dangerous carcinogenic; automobiles, which result in at least 45,000 deaths a year; and alcoholic beverages, which are suspected to cause liver damage, would have a ban on a sugar substitute that may or may not cause cancer in humans. Americans are allowed to make choices about these other potentially dangerous elements, should they not have the right to decide for themselves in the case of saccharin?

My constituents are baffled about this discrepancy. I sincerely believe that Americans should be allowed to use their own common sense to heed a hazard warning.

I also think that Congress should show rational judgment and reform the rigid Delaney clause. I have cosponsored a bill which would amend the clause and authorize an evaluation of the risks and benefits of certain food additives before they are withdrawn from the market. The current clause which requires a ban on any ingredient shown to produce cancer in man or animal is much too dogmatic. There are no allowances made for the degree of risk involved. It is imperative that before such blanket decisions are made, we should know if they will result in more harm than good.

I sympathize with those Americans who are upset over the proposed ban on saccharin. Clearly, the Canadian study which has revealed that high doses cause tumors in rats, has opened a Pandora's box. Citizen opinion regarding the ban is negative and Congress must respond accordingly. Until more definitive proof that saccharin causes cancer in humans is obtained, plans to effect a ban must be postponed and the Delaney clause must be amended. We do not want to set a precedent of interferring with the freedom of choice guaranteed to each individual American.

Mrs. LLOYD of Tennessee. Mr. Speaker, I strongly urge my colleagues to consolidate their efforts in opposition against the Food and Drug Administration's ban on saccharin. I ask how many of you have received a letter or a call from a constituent indicating that he endorses the ban. The volume of my mail on this issue has been overwhelming, yet I have not received one letter which endorses this ban. Because of this substantial and

vocal opposition, I believe that we cannot ignore this ruling.

The Canadian Government has every right to adhere to its own findings, but I firmly believe that a more conclusive study to determine the effect of saccharin use on humans should be conducted by the FDA before any regulations are determined in our own country.

We must not forget the hardships which would be placed on people who have to restrict their amount of sugar intake. There are 10 million diabetics in this country who rely on this artificial sweetner. They are worried and frightened at the prospect of this product being removed from the market. There are also many Americans who are either overweight, suffer from hypertension or heart disease who need this substance for health reasons. These people are incensed over the possibility of this product being removed from the market on the basis of inconclusive evidence.

People who need this product will be able to acquire it through a prescription; but the additional cost of going to a doctor for a prescription and then having this prescription filled seems like an unnecessary burden both economically

and practically.

The FDA's acting is based on the Delanev clause of the Food, Drug, and Cosmetics Act which prohibits the use in food of any ingredient shown to cause cancer in animals or man. The Delaney clause denies the FDA the flexibility to include a reasonable test based on the quantity of the substance which produces cancer and the relationship between the costs and benefits of the substance. I have, therefore, introduced a bill, H.R. 5197, which would amend the Delaney clause to revise the standard for regulating food additives found to induce cancer in man or animal. I particularly feel that FDA tests should consider the quantity of a substance which will prove detrimental to a person's health. I am sure that we are all aware that the amount of saccharin that was fed to the rats was a ridiculously poor comparison to the amount of saccharin that is consumed by a human in a day.

For these reasons I ask my colleagues to seriously consider the effect which the saccharin ban would have on millions of people and I strongly endorse legislative action to prevent that ban from taking effect in July.

Mr. STOCKMAN. Mr. Speaker, on March 9, 1977, the FDA took the first step to implement its decision to ban the artificial sweetener, saccharin. This ban would remove from the market the only artificial sweetener now available to the consuming public. I believe that the FDA has shown bad judgment, Mr. Speaker, and it is incumbent upon the Congress to force the FDA to back off from its proposed ban on saccharin.

Saccharin has been used in food products for 80 years. It serves an extremely valuable function. It permits individuals to reduce their intake of sugar quite significantly without having to endure major alterations in their dietary habits. This reduction in sugar intake produces great benefit to the public.

First, the 10 million diabetics in the

country have no choice about reducing their sugar intake. They must do so in order to prevent damage to their health. Without artificial sweeteners, diabetics will be unable to partake of many kinds of food simply because it will not be available in a low-sugar version.

Other people also benefit from artificial sweeteners. The connection between obesity and numerous forms of illness has been well documented. People use saccharin to control their weight and thereby protect or improve their general health. Many people presently overweight who use saccharin to lose weight will have great difficulty losing weight without it. It is their dietary habits that contributed to their obesity; with saccharin sweeened products they must habits than completely giving up whole classes of foods.

The argument is made that the FDA had no choice under the Delaney clause, that it had to ban saccharin because the Canadian test showed it to be a carcinogen. Mr. Speaker, this is exactly the point at which the FDA exercised bad judgment. The FDA can reject test results if it believes that the test was not conducted properly or was poorly designed. In view of the many previous inconclusive tests on saccharin, I believe that the FDA would have been wise to wait until confirmation of the Canadian test by a larger scale, more thorough test.

If the FDA ban on saccharin goes into effect, far more harm will be done to the millions of diabetics and others who wish to reduce their sugar intake than can possibly be attributable to continued use of saccharin until better test results are in. The FDA seems to have lost sight of the forest for the trees when it comes to saccharin.

Mr. BAFALIS. Mr. Speaker, the American people have a tendency to look upon their Government with a jaundiced eye. And rightfully so.

For the most part, the things Government does for the people are things they could better do for themselves. And the people know it.

However, unless Government messes things up beyond comprehension, the average American is willing to let it pass.

Once upset, though, the people of this country let Government know it has strayed from the path of wisdom.

They did it when the seat belt interlock system was rammed down their throat.

And they are doing it now with the saccharin ban ordered by the Food and Drug Administration.

The people speak through their mail to their Congressmen, through the letters to the editor section of the local newspaper.

The newspapers, in turn, speak through their editorials which are cut out and sent to Congressmen.

And, Mr. Speaker, from my mail, and from my reading of the editorials in dozens upon dozens of daily and weekly newspapers in my district, I can tell you in no uncertain terms, the people are irate about this latest Government fiasco, this new, unnecessary and unwarranted intrusion in their lifestyle.

"Ridiculous," "uncalled for," "illogi-

cal," and "asinine"—those are just a few of the things this ban has been called. There have been others, including some which cannot be repeated on the floor of the House of Representatives.

I have yet to see, in any paper in my district, or in any of the scores of letters which have poured into my office, any indication of support for the FDA in this matter.

No, the people do not support the FDA. They get upset when the paternalistic Federal Government treats them as children, and not very bright children.

And they have plenty of reason to be upset with the FDA on the saccharin ban. That is why I have cosponsored legislation to amend the Food and Drug Ad-

ministration laws to provide a note of reason in the banning of materials sus-

pected of causing cancer.

The people want this measure of reason restored. And, as Representatives of the people, we can do no less than pro-

vide them with that request.

Mr. BAUMAN. Mr. Speaker, the FDA ban on the use of saccharin is ridiculous, and anyone with any commonsense knows it. To penalize citizens for the possession and use of artificial sweetener at a time when some misguided Members of this body are talking about decriminalizing marihuana and harder drugs is a sorry commentary on Federal policymaking. It is also a sorry commentary on the Food and Drug Administration which is once again using its regulatory power to thwart the wishes and deny the

rights of the people.

The FDA inquisition against saccharin users is yet another in a long line of abuses by a Federal agency overreacting to the symptoms of five laboratory rats which were fed enormous amounts of an everyday product found in millions of American homes for over 80 years. The saccharin ban was based on a study conducted by Canadian scientists who found "evidence of cancer" in less than 10 percent of 200 rats which were made to drink the equivalent of more than 800 12ounce cans of diet soda a day, or eat more than 1,850 packets of low-calorie sweetener in a 24-hour period. When you consider that drinking a mere 50 cans of pure, EPA-approved water in a short time period can kill you, it becomes just too obvious how absurd the FDA's action is in this matter.

Saccharin is the sole remaining dietetic sweetener allowed by the Federal authorities to be sold on the grocer's shelf. Previous decisions by the FDA, beginning in 1969 with the cyclamate ban, eliminated other sugar substitutes. In the future, American citizens will have to sneak into Mexico to buy their contraband diet drinks and perhaps U.S. customs authorities will be combing the continental borders to dissuade incoming motorists from Juarez from lining the upholstery of their cars with Sweet-'n-Low.

This situation is all the more serious for the more than 10 million Americans who suffer from diabetes. Without saccharin, these people are left without a product absolutely necessary for their health. I believe that it is time the FDA bureaucrats started spending less time with rats and more time with people,

time they realized how much damage they have done to the already precarious reputation of their agency in the eyes of rational people everywhere.

This is why I have cosponsored legislation originally drawn up by my distinguished colleague from North Carolina (Mr. MARTIN) in response to the FDA's recent ban on saccharin. This bill provides a new mechanism whereby a ban of a food additive by the FDA can be appealed. Upon reconsideration, the FDA could then authorize continued use of the product only if the public benefits of such use clearly outweigh the public risk. The legislation does not repeal the Delaney clause which currently governs banning procedures, but modifies the procedures by which it is implemented.

This legislation, therefore, will permit citizens to use saccharin while preserving the integrity of the FDA in those areas and in those ways it ought to function for the public interest. This public interest is now as it always has been and always will be, the combination of all the private interests and the stability and well-being of the society in which we live. Acting as precipitously and foolishly as it has in banning saccharin, the FDA does damage both to the public interest and to itself. The effectiveness and very existence of FDA directly corresponds to how much authority it maintains in the eyes of the citizens and their elected leaders. For FDA's own good as well as the larger, and certainly more important good of the public at large, I hope that the House acts swiftly to rescind this ban on saccharin and to change FDA's procedures and powers

Mr. YOUNG of Missouri. Mr. Speaker. was deeply concerned about the hasty and premature manner in which the Food and Drug Administration acted last month in proposing a saccharin ban. I am convinced that the results so far do not justify the extreme action proposed-an action that will affect the eating habits of millions of Americans.

For that reason, I believe that the House is completely justified in holding hearings aimed at the passage of remedial legislation. My concern over the proposed ban is aptly summarized in an incisive editorial that was broadcast recently on KMOX-Radio, the CBS station in St. Louis. The editorial, presented by Robert Hyland, regional vice president of the CBS Radio Division, follows

Did you drink 800 diet sodas today? Do you plan to drink another 800 tomorrow

These may sound like ridiculous questions, but they occurred to us when we heard about the Food and Drug Administration order banning the sale of saccharin.

It seems a Canadian laboratory fed 100 rats large doses of saccharin throughout their entire lifetime. Fourteen of them developed cancer. This is seven times the can-cer rate of rats on a normal diet. So the north of the border and our FDA took the same action here.

This seemed like a sensible precaution, at first glance. But then we read further. And we find a human being would have to drink 800 diet sodas a day throughout his lifetime to ingest the equivalent amount of saccharin fed the laboratory rats. Now the FDA ban on saccharin doesn't seem sensible-it seems ridiculous!

As we have stated in previous editorials,

it is vital and necessary for our federal gov-ernment, principally through the FDA, to protect the public from harmful substances. But we believe at times this agency goes to extremes. Saccharin is a case in point. This artificial sweetener has been on the market in this country for 80 years. Five million pounds of saccharin are used annually, primarily by diabetics and those watching their weight. Surely in all that time, with all that usage, it would have been found to be harm-

The FDA banned another type of artificial sweetener, the cyclamates, in 1970. And it has refused approvals for several drugs, the so-called beta-blockers that are commonly used in Europe with good results to treat heart disease and high blood pressure.

We're all for Government bans on harmful drugs, ingredients, and additives. But it seems to us the FDA moved too far, too fast, when it banned saccharin on the basis the Canadian laboratory report. We wonder if this isn't one more piece of evidence that the Food and Drug Administration at times is over-reacting.

Mr. RONCALIO. Mr. Speaker, I am sure that every Member of Congress has been made aware of the public's attitude toward the FDA's proposed ban on saccharin. This proposal points out once again the fine line that exists between Federal protection and Federal interven-

tion into our private lives.

Before this ban is enacted, we must consider the inconvenience involved in depriving obese and diabetic individuals of saccharin. While we now suspect a possible relation beween saccharin and cancer, the dangers of diabetes, hypertension, and heart disease related to obesity are known to all. Also, I note that the danger of saccharin use does not appear to be such that the FDA required recall of products already on the market.

If there were a suitable replacement for saccharin perhaps we would be facing a different problem, but it is the only artificial sweetener permitted in the American food supply. To the millions of diabetic and weight-conscious people of the United States, this ban may present a health hazard greater than the possible risks of saccharin use.

I feel a special sympathy for the many hundreds of diabetic children in the country. Although it is true that sweets are not nutritionally necessary, it is hard for a child to see other children eating candy and treats with no chance to en-

joy them himself.

Also, I reiterate that it is very hard to understand the continued sale of tobacco with its proven carcinogenic effect, while depriving Americans of sac-

As the Delaney clause now exists, it does not permit the FDA to analyze the relative benefits of a particular food additive versus the possible risks involved in its use. It specifies only that any substance that causes cancer when consumed by man or animal must be banned. This legislation should be revised to allow the FDA to weight the risks and benefits in an additive.

Time should be allowed for further study and evaluation of saccharin and its continued marketing until we have more definitive evidence that it is

At the least, there should be a review.

as there is to be in Canada, of the role of saccharin in special foods for diabetics and exemptions or sale by prescription through pharmacies should be permitted.

Mr. QUAYLE. Mr. Speaker, the recent ban on saccharin is one of the best examples we have had in the past few years of Government regulation gone haywire. The Delaney amendment has finally reached its logical extreme: The banning of a substance which has been used safely for years by millions of people. It was banned, finally, because one Canadian Government experiment—out of some half a dozen or more others—revealed that an unrealistically high dosage of saccharin resulted in a slightly higher percentage of cases of bladder cancer in laboratory rats.

The ridiculous extremes which were necessary to reach this test result need not be detailed here. The American public has had its grim chuckle over that already, and many have advocated outright repeal of the Delaney amendment.

Proponents of the Delaney amendment believe it to be the ultimate in consumer protection. Just try opposing the amendment—suddenly you find yourself portrayed as an ogre who favors cancer; who really does not care what dangerous chemicals the public ingests.

Somewhere between these two extremes lies the truth. The truth is that some food additives are harmful, and that the Government does have some role in the reasonable regulation of these chemicals. The key word here is reasonable.

Let us look at the other side of the saccharin issue, to see what effect this "protective" regulation has on the public it attempts to protect. I cannot be the only Member of this body who has received really heart-rending letters from constituents who are diabetics, to whom this ruling says "you can never have another sweet or dessert for the rest of your life." For example, a letter from a woman in my district who states:

I am only 32 years old and have been a brittle diabetic for over 21 years. My life must be governed by strict sugar-free standards. Since cyclamates were removed from the market, I am outraged that the U.S. is also removing the alternative.

Or another:

Don't know what we diabetics will do, for if they use corn syrup or honey to sweeten soft drinks, we still can't have them. Just another crazy and foolish idea.

These people need saccharin. They have a difficult time leading a normal life; the loss of saccharin in their diets makes their life that much more difficult. We who are supposed to be in all things concerned with the well-being of the people we represent cannot ignore this cruel result of our own legislation.

Then there are the dieters, a category that includes the majority of the American population at some time in their lives. Admittedly, saccharin is a crutch and not really a medical necessity for these people—although one constituent writes:

Obesity is much more life-threatening than is the danger of using normal amounts

of saccharin. In order to control my weight, I must use saccharin.

Does that mean, however, that we have the right to deprive them of this highly useful diet aid on such medically unsound reasoning?

The rule that banned saccharin needs amending. It needs to allow for reasonable tests to screen out harmful agents from the public. But it badly needs the flexibility to insure that this ridiculous episode will not happen again. If we do not take steps to correct this glaring malfunction of regulatory law, then we can hardly expect less than the rapidly dwindling respect for Government's at-

tempts at "protection."

Mr. BURKE of Florida. Mr. Speaker, I would like to add my voice to the growing concern over the recent decision by the Food and Drug Administration to ban the use of the artificial sweetener saccharin as of July 1, 1977. This action banning the only available sugar substitute on the market raises fundamental issues about the nature of scientific tests to determine cancer producing substances and about the role of the Government in protecting the public from the risks of cancer.

Mr. Speaker, the immediate occasion for this decision stems from a series of tests conducted by the Canadian Government which showed that laboratory rats fed high dosages of saccharin suffered an increase incidence of bladder tumors. According to the 1958 Delaney amendment to the Food, Drug, and Cosmetic Act of 1938, the FDA must ban any additive that causes cancer in laboratory animals.

Immediately affected are those millions suffering from diabetes, heart disease, and overweight. Ten million diabetics, 40 million overweight Americans, and countless others with heart disease and hypertension depend on the sweetener to control their diet. Without a sugar substitute, a potentially disastrous change in the control and life of these people could occur.

This is particularly true of the diabetic. Diabetics are unable to burn off sugar in the form of glucose and thus are dependent upon sugar substitutes in order to have effective diet control. If they are forced to turn to sugar, it is to be expected that they will be faced with the possibility of greatly increased complications resulting from kidney failure and infection. And these dangers are far greater than the chances of getting cancer by consuming saccharin.

But, Mr. Speaker, the potential of this decision goes far beyond those immediately affected. Underlying this decision is the question of whether or not animal research is an adequate measure of the extent to which substances can affect the human organism. In the Canadian tests two groups of 100 rats were given enough saccharin to constitute 5 percent of their diet. Of the first group, only three developed cancer while 14 of the second group of 100 rats not receiving saccharin also developed tumors.

To appreciate what this would mean in equivalent terms for humans, we have to realize that a person would have to drink 800 12-ounce cans of diet soft drink each day for a lifetime to ingest a similar amount. Or, a person would have to consume 4,000 packets of saccharin a day for a lifetime. These figures undermine the credibility of the study since it is physically impossible for one to drink so much in 1 day. Instead of suffering from cancer, a person who attempted to drink that much would certainly be afflicted with a good case of the bloat.

The nonrelevance of these tests was given support in testimony held on March 21 and 22 before the House Interstate and Foreign Commerce Subcommittee on Health and the Environment. Dr. Guy R. Newell of the National Cancer Institute said that—

I do not believe saccharin is a potent carcinogen, if it is a carcinogen at all.

He said that evidence linking bladder cancer to saccharin is, so far, only in animals. He further said that although bladder cancer in humans has been steadily increasing since 1935, the increase has been very slow and does not reflect the large increase in saccharin consumption during that time.

Mr. Speaker, we must take a closer look at the scientific validity of barring use of a food additive at safe levels simply because the same substance at much higher levels of use could cause cancer in laboratory animals. This is at the heart of the issue and it should not be

overlooked.

Second, and even more fundamental, is the question of the role of Government in protecting the public from the risks they face in life. The flood of angry mail coming into my office is a testimony to the fact that Americans are increasingly beginning to feel that this and similar decisions are in direct violation of their right to freedom of choice. It is my belief that we should proceed cautiously whenever we apply regulations to the lives of our citizens. Reasonable protection of our citizens must remain on balance with the rights of our citizens to choose for themselves.

Mr. Speaker, the recent decision to place a ban on the sale of saccharin has brought to the forefront these two very important questions. We should take this opportunity to view more closely the methods by which we determine cancer producing substances and the role of the Government in protecting the public from these risks. I am aware that such a review involves matters which are complex and far reaching. But it can only serve the higher interests of the American people.

Mr. JENRETTE. Mr. Speaker, I rise in strong opposition to the FDA's proposed ban on saccharin. A great injustice is being done to the consumer by the United States Government banning this product before conclusive tests have shown saccharin to be positively linked

to cancer in humans.

I have added my name to H.R. 5592, a bill to amend the Federal Food, Drug and Cosmetic Act to authorize an evaluation of the risks and benefits of certain food additives. This will permit the marketing of saccharin until such an evaluation can be made.

The benefits to diabetics, for example, must be considered. Many of my constituents have expressed a sincere concern in regards to the proposed ban and the role of saccharin in the treatment of diabetes. This role is described in a letter I would like to introduce into the RECORD today. Its author is the mother of an 11-year-old diabetic and the secretary of the South Carolina Diabetes Association. We should all heed her remarks and then move quickly to remedy this situation:

MARCH 30, 1977.

DEAR MR. JENRETTE: I have a daughter that is now eleven years old. She developed Diabetes at the age of four. When she is sick with a virus and vomiting I have to use sugar-free drinks to force fluids. I can use Sugar Free Tab, Diet Pepsi, Dr. Pepper, Seven-Up, etc. One night she was invited to an all-night slumber party. The lady giving the party was quite concerned over the fact she could not drink the cokes and eat the M&M candy she had for the other girls. I bought sugar-free drinks for her and some sugar-free candy. She took this with her to the party. The next morning when she had a negative urine (she was not spilling sugar) I questioned to find out what had happened. All of the girls drank her diet drinks and ate her sugar-free candy with her. They did not eat the other candy or drink the drinks that were available. This meant a great deal to this child. You see if Saccharin is banned it will take a great deal from a Diabetic. This will mean poorer control of a Diabetic and in the long run it could mean more complications such as Blindness, Kidney Disease, Liver Disease and even death.

I would like for you to please vote against the Ban of Saccharin. . . Saccharin has been used for over 80 years and it has not been proven to cause any problems. I would like to see them so more studies on various animals with a much more moderate amount of saccharin. If you need me to testify to Congress on this problem please feel free to call on me. I would feel it an

honor.

see 10 million Americans You Diabetics and approximately 125,000 are in South Carolina. Diabetes is increasing at the date of 6% per year. This is the only sugar-free sweetner available. You see I am Secretary of the South Carolina Diabetes Association and these figures are correct. So please feel free to call on me if I can

be of any assistance at all.

Thank you for your support against this Ban of Saccharin.

Sincerely,

MARGARET BROACH.

P.S.-I would like to know the name of the Commissioner that wants to ban Saccharin, is he diabetic or does he have any relative that is a diabetic? Does anyone on his Board have diabetes or anyone that is diabetic in their families?

Mr. ROUSSELOT. Mr. Speaker, on March 9, 1977, the Food and Drug Administration announced its intention to prohibit the use of saccharin in foods and beverages. This action by the FDA was incited by a Federal law-the Delaney amendment—which requires a ban on any additive which "is found to induce cancer when ingested by man or animal."

While the findings reported from Canadian tests used by the FDA were inconclusive and made no sensible case that saccharin in normal doses caused cancer in humans, under the special provisions in the FDA statute, the ban was automatic. As a result, a severe hardship will be imposed on approximately 10 million people who suffer from diabetes, millions of heart patients, and some 40 million overweight individuals who must control their weight to decrease their chances of becoming heart patients. For these people, saccharin is a necessary part of preventive medicine. This same point was made this past weekend by Dr. R. Lee Clark, the president of the American Cancer Society. While in Sarasota, Fla., Dr. Clark stated that diabetes and obesity pose more immediate dangers than the possible cancer-causing ability of saccharin.

I am cosponsoring legislation, introduced by my colleague Congressman MARTIN of North Carolina, which remedies the defects of the Delaney amendment. The bill, H.R. 5166, provides a mechanism for a reconsideration of an adverse determination when an additive is found to induce cancer in test animals. Under the proposal, the petition would be able to ask the Food and Drug Administration to reconsider its decision and the Secretary of Health, Education, and Welfare, would then be authorized to make a finding regarding the public risks and benefits of the given additive, taking into account the best evidence and expert judgment possible, before finding a substance unsafe.

Corrective legislation like the Martin bill will permit Federal agencies to make their decisions in a more responsible manner in determining whether a substance should be banned from the market and I urge my colleagues to strongly

support H.R. 5166.

Mr. MONTGOMERY. Mr. Speaker, I commend my two colleagues, Representative JIM MARTIN and Representative GEORGE O'BRIEN, for taking this time today in order that the Members might have an opportunity to air their views on the ridiculous proposed ban on saccharin. I would also urge my colleagues to join with them in cosponsoring their legislation that would halt the ban of saccharin.

I have long had doubts about some of our Federal agencies which have been powers unto themselves and have gone far beyond the legislative intent of Congress. There is no doubt in my mind the Food and Drug Administration must now be added to the growing list of bureaucratic agencies that are evidently incapable of making a reasoned and rational judgment.

Mr. Speaker, I am no scientist, but in analyzing the recent decision of FDA to ban saccharin even a layman is capable of knowing that they have made a very serious mistake. Their decision to ban this very necessary food additive, is based on a study conducted on a group of Canadian rats. These rats ingested saccharin in such large amounts that there is no wonder they developed bladder cancer. In fact, even the most nutritious of pure foods would probably have caused cancer if taken in the same quantities as sac-

I would also note that according to studies I have seen, it would almost be humanly impossible for a human to in-

gest a comparable amount of saccharin in relation to the weight of a rat and the weight of a human. Evidently the powers that be at FDA failed to note this very important point when they reached their decision to ban saccharin.

Mr. Speaker, I also seem to remember reading about saccharin studies and tests conducted on monkeys. If my memory serves me correctly, these tests on monkeys with saccharin did not cause cancer. From a strictly biological standpoint, it is my understanding that the human body is more similar to that of a monkey than that of a Canadian rat. I also seem to remember that in England studies were made of humans over a long period of time who take saccharin and there was no evidence that the food additive caused cancer.

For the life of me, I cannot understand why the FDA has suddenly grabbed upon the Canadian rat test while ignoring other tests conducted on the possible ill effects of saccharin

Mr. Speaker, I understand that the appropriate congressional committees will be looking more closely into this situation in the near future. I urge prompt action in order that we might pass the necessary legislation to prevent the withdrawal of the use of saccharin for that significant number of our fellow Americans who depend on the use of this necessary food additive when taken in realistic amounts.

Mr. CRANE. Mr. Speaker, are we a mindless mass, incapable of making decisions without the help of the Government and the bureaucracy? What ever happened to individual freedom of choice, or are we now, as citizens, limited only to exercise that precious right at Gino's? We can choose between Heroburgers, with or without cheese. Why not between sugar or saccharin?

What about the 10 million Americans who are diabetics? Since the FDA has said "no" to saccharin, these people are left without a product which is absolutely necessary to their health. Since saccharin is the only artificial sweetener permitted and approved by the FDA for use in the United States, what can diabetics and overweight persons do? At this point, nothing. As representatives of the people, it is our responsibility to act now. I urge all my colleagues to join in and help roll back the FDA's proposed ban on saccharin.

Mr. DRINAN. Mr. Speaker, the prospective ban on saccharin announced by the Food and Drug Administration on March 9, 1977, has raised a storm of protest from thousands of saccharin users throughout the Nation. While the FDA had no alternative to acting as it did under existing law, the proposed ban raises a number of serious questions regarding the viability of the Delaney amendment, scientific testing, and the role of food and drug regulation in a free society.

THE DELANEY AMENDMENT

The Delaney amendment to the Food, Drug, and Cosmetic Act was enacted in 1958. The amendment states that-

No [food] additive shall be deemed to be safe if it is found to induce cancer when ingested by man or animal, or if it is found, after tests which are appropriate for the

evaluation of the safety of food additives, to induce cancer in man or animal.

This amendment was enacted to protect the American consumer from cancer-causing foods at a time when scientists were still in the early stages of learning about the detection and prevention of this dread disease. The intent of the legislation was laudable; Americans should be protected from cancer to a reasonable extent. But the amendment was drawn up so absolutely, so restrictively, that it effectively denies the FDA the discretion it must have to make delicate balanced judgments which serve the public good.

THE CASE OF SACCHARIN

While the American consumers were shocked by the news of the proposed saccharin ban announced on March 9, both the food industry and the scientific community knew what was coming long ago. Questions regarding the safety of saccharin have been raised for many years. In 1971, researchers at the University of Wisconsin reported that some rats fed 5 percent saccharin in their diets for 2 years developed bladder tumors. In 1972, the FDA removed saccharin from its list of "generally recognized as safe" food additives and took steps to reduce public consumption of the product. In 1974, with numerous studies underway, the National Academy of Sciences could reach no conclusion regarding the safety of saccharin and urged additional testing. In late 1975, a GAO report questioned the legality of keeping saccharin on the market in light of the FDA's decision to reclassify the additive in 1972.

Thus, while the public may not have known it, saccharin has actually been leading a charmed life on supermarket shelves for the past 5 years. The FDA permitted the additive to remain on the market on an interim basis pending the outcome of definitive tests. Those definitive results, according to FDA scientists, came in the recent Canadian test which showed "unequivocally that this substance can produce malignant bladder tumors in rats." It was with that evidence in hand that the FDA acted under the Delaney amendment to remove saccharin from the market.

THE CANADIAN STUDY

The press has made much of the fact that extremely large amounts of saccharin were fed to the test animals employed in the Canadian study. As a layman, I, too, was surprised to learn that these test animals ingested the equivalent of 800 diet soda drinks each day. That sounds ridiculous to me, Mr. Speaker, as I know it does to many of my constituents. But I am not a scientist, and I am not qualified to evaluate the validity of this or any other scientific test. I have been informed by experts at the FDA, who are so qualified, that the Canadian test was scientifically valid. These experts state that a substance causing cancer in a small group of animals at high doses is likely to cause cancer in a large group of animals at lower doses. This principle lies at the basis of virtually all food and drug safety testing. Although the testing procedure may sound strange to the nonscientist, this was, in fact, a

scientifically valid test whose results must be considered with the utmost seriousness.

WHAT SHOULD BE DONE?

There is no question that saccharin, as the only artificial sweetener on the market, is a popular product. Diabetics have no alternative sweetener available to them. Neither do millions of Americans who suffers from hypoglycemia or other conditions which require them to restrict their intake of sugar. These people will be seriously inconvenienced and deprived of sweet foods altogether should saccharin be removed from the marketplace.

Balanced against these considerations is the Government's legitimate interest in minimizing disease and suffering among the American people. In the Canadian test, the incidence of cancer among the offspring of the saccharin-fed rats was more than twice that among the first generation. Thus, your decision to use saccharin may affect future generations as well. These factors make this issue far more complex than it may appear at first glance.

I believe that the following steps should be taken to resolve this most dif-

ficult problem:

First. The Delaney amendment should be revised to permit the FDA to weigh comparative risks and benefits in deciding what action to take concerning a food additive suspected of causing cancer. Possible actions in each case may include: banning the substance altogether. permitting the continued sale of the substance upon a doctor's prescription, permitting the continued sale of the substance in certain forms while prohibiting its sale in other forms, permitting the continued sale of the substance in all forms with an appropriate warning label. and withholding regulatory action altogether pending the completion of more conclusive tests. It would be up to the FDA, in exercising its best scientific judgment, to determine the proper action in each case after thoroughly reviewing all relevant factors.

Second. Until the comprehensive analysis called for under recommendation No. above can be completed, Congress should authorize the continued sale of saccharin in solid, powdered, tablet, and liquid forms with an appropriate warning label or by a physician's prescription.

Third. The FDA should give immediate reconsideration to artificial sweetener applications currently pending or sub-

mitted in the near future.

Mr. Speaker, the above measures will not please everyone, but I believe they strike a reasonable balance between the rights of the individual and the responsibilities of their Government. Decisions involving basic questions of human health must be based upon scientific expertise, not political pressure. I urge the Interstate and Commerce Subcommittee on Health, which is preparing a report on this issue, to give serious consideration to these proposals.

Mr. GILMAN. Mr. Speaker, as we are all too well aware on March 9, 1977 a ban on saccharin was proposed by the Federal Food and Drug Administration following the results of Canadian studies in which the second generation of labora-

tory mice developed-in 17 out of 100 cases-malignant bladder tumors when fed massive doses of saccharin. Pursuant to the Delaney amendment to the Federal Food, Drug, and Cosmetic Act, which states that any substance which is proven to cause cancer in either humans or animals when ingested may not be sold to the public, the FDA is moving to ban the use of saccharin in this country.

Although less than 1 month has passed since this proposed ban was made public, my office has received more mail opposing this ban than it has received on any other single issue since the beginning of this session of Congress. The letters are not only from individuals concerned about their sugar intake or are from those who are watching their weight, but from constituents suffering from diabetes, heart disease, and hypertension and who depend upon this artificial sweetener to control their diets.

Saccharin, the only legal artificial sweetener in use in the United States, has been used by millions of Americans for over 80 years without any demonstrable ill-effects. Chemists in the dietfood industry around the Nation have pointed out that if a human were to ingest the same amount of saccharin which was fed to the mice used in the Canadian tests, "he would have to drink 1,250 cans of diet soda or eat 4,000 packets of saccharin a day for a lifetime." (U.S. News & World Report, Mar. 24, 1977). Accordingly, it is appropriate that we question the validity of a law which would ban any substance based on such

flimsy testing methods.

Furthermore, it is not equitable to penalize the 40 million Americans suffering from diabetes, obesity, hypertension and heart disease, who rely on saccharin as their only form of sweetener, not to mention the inequity of disrupting businesses which produce diatetic foods for these individuals and account for over \$2 billion a year in sales. It should be pointed out that although it has been proven that the nicotine and tar in cigarettes causes cancer, emphysema, and heart disease in humans-rather than disrupt the tobacco and cigarette industry and curb smokers' freedom to use cigarettes and other tobacco products if they so desire, the surgeon general allowed the products to remain on the market by printing a warning label of their possible dangers on the package. Do we have the right to restrict the freedom of choice of saccharin users when we grant that same right to smokers, for that matter, to drinkers, drivers, and any other citizen who has the right to decide for themselves whether the risk they take is worth taking? I would like to share with my colleagues some of my constituents thoughts who do not think so:

DEAR CONGRESSMAN: Diabetics, like myself. satisfy their craving for something sweet with foods and drinks sweetened with saccharin. A low calorie food or beverage sweetened with honey . . . will not help us, but, in fact will undermine our health further. Putting saccharin on a prescription basis available to diabetics will only succeed in calating the price of that drug and will put it beyond our reach. . .

DEAR MR. GILMAN: I believe the FDA should review its stand and perhaps allow sweetened products to be sold with a warning label similar to that on cigarettes: The surgeon general has determined that using this product will endanger your health."

Dear Mr. Gilman: I have used saccharin since 1940 and have been able to control high blood pressure and obesity; I directly attrib-

ute my good health to its use.

DEAR SIR: Please try to stop the ban on saccharin. No human could possibly consume the quantity which has been fed to rats. It is very insulting to class us with rats.

DEAR CONGRESSMAN GILMAN: My mother has suffered from severe diabetes for over, 25 years. Two of her children died from it. Without saccharin, I don't know how she will be able to control her diet . . . People who smoke do so with a warning on the label. As they do so, they disturb many non-smokers around them. Give us a warning label and we wont bother anyone.

This is only a small sample of mail protesting the ban on saccharin: I could read on at length. The same message is made clear over and over again: "don't take away our freedom of choice; don't remove from the market our only alternative to using sugar; don't make our own decisions for us through the irresponsible use of restrictive legislation."

For this reason, I have cosponsored Representative MARTIN's legislation calling for a modification of the Delaney clause and urge my colleagues to do so as well. Whatever the experiments with rats and other animals show, there is still inconclusive evidence that saccharin causes cancer-or any other disease-in humans. Well-intentioned as the FDA's proposed ban may be, surely we do not have the right to regulate away our right of free choice, nor to cause a great economic loss to the producers of a product which is not proven to be harmful to our health. The national clamor, since the announcement of this proposed ban, provides ample evidence that saccharin is needed and wanted by the American public. I suggest we heed their message as we seek a more substantive investigation of this product.

ARE PRESIDENT CARTER'S PRO-POSED ELECTORAL REFORMS REALLY REFORMS?

The SPEAKER. Under a previous order of the House, the gentleman from Illinois (Mr. Michel) is recognized for 30 minutes.

Mr. MICHEL. Mr. Speaker, on March 22, 1977, President Jimmy Carter sent to the Congress a message containing his "recommendations for reforms in our Nation's electoral system." Those recommendations dealt primarily with voter registration, public financing of congressional election campaigns, direct popular election of President and Vice President, and repeal of the Hatch Act.

I have no doubt we will debate each of these issues fully and in detail when the proper time comes. For the present, however. I would like to share with you my general views on these reforms.

I will go into detail concerning my questions on each proposal, but for the moment let me briefly list what I am convinced are major flaws in the proposed reforms:

First. There is not enough scholarly

evidence to conclusively demonstrate that election-day registration will solve the problem of nonvoting. Indeed, some of the most prestigious studies suggest that the overwhelming majority of nonvoters fail to vote for reasons other than difficulty of registration. In this area, we clearly need more evidence than the President has supplied.

Second. The proposed reform does not take into account the possible effects of such proposals on the Federal system which is central to constitutional government in this country. I call for a full and detailed study of the impact of these proposals on the Federal system before we begin to debate the proposals as such.

Third. The reforms are offered in the name of the "right of every citizen to vote." But the right to vote, if it is to be meaningful, cannot simply mean ease of registration—it must also mean that the possibility of widespread voter fraud will not make this right a mockery. We need something more than the threat of punishment to guarantee that the right to vote for eligible voters is not made meaningless by corrupt and fraudulent practices. When it comes to protecting this right, threats are not nearly enough. We need safeguards. Where are they?

Fourth. The proposals are presented as cures for most of the electoral ills that beset our Nation. But is not the President, despite the clear lessons of recent history, promising more than can be de-livered? Are we not seeing once again that "Great Society" syndrome of promises of utopia which inevitably are followed by disillusionment as "reforms" turn out to be nightmares? Not all those who cry "reform" are doing the real work of reform. Let us find out precisely what 'reform' means in this context. Then let us see if the people and the States can handle such reforms in their own way before we thrust the Federal bureaucratic apparatus into areas it historically-and for good reason-has been kept away from.

Mr. Speaker, having listed these general points, allow me to examine each major proposal individually:

Let me begin with the proposed reform that has generated the most comment, both in the media and in Congress and that is the proposal for election day voter registration. Vice President WALTER MONDALE has called this the administration's "principal recommendation."

There are a number of arguments that have been used to justify such a step but basically they come down to one major point: In recent years there has been a trend toward lower levels of voting. Election day voter registration will remove barriers that have hitherto stopped citizens from voting and will thereby "open up the process" and bring in millions of Americans into the electoral process.

Such an argument, phrased in that way, seems at first to be irrefutable. Who indeed, wants to appear to be stopping millions of Americans from voting by opposing such a measure? The President has said the "right of every eligible citizen to vote" is at the very heart of this

I would like to suggest today that while the President has clearly identified the disease—low voter turnout—there is good reason to believe that he has proposed the wrong remedy. In this case, Carter's little liberal pill is not apparently the answer. To put it in the most charitable form, those who claim that low voter turnout is directly caused by current registration laws have not proved their point. Those who point to the higher turnouts in Wisconsin and Minnesota, where registration procedures are similar to that proposed by the President are in use, are assuming a cause-and-effect relationship that is not yet proved. Yes. these two States have election day registration. Yes, these two States had a higher voter turnout than the national average. But did the first directly and solely cause the second or were there other causes involved? And even if it can be conclusively demonstrated that election day registration was the sole cause of higher voter turnout in Wisconsin and Minnesota, how do we know the experience of these two States can be repeated in the other 48?

A detailed and scholarly look at the complex and unique aspects of each State's voter population, the political attitudes prevelant in these States, and the history of such phenomena as voter fraud in these States must be undertaken before we jump to the conclusion that one election's voter turnout in these States can be used as a justification of making such a system mandatory for all States. In fact, we need to investigate the entire field of nonvoting.

In order to provide the start of such an investigation let me quote from a publication of the Bureau of the Census, "Population Characteristics." In the issue devoted to voting and registration in the election of 1974, the Bureau's analysts found that, insofar as a failure to vote is concerned:

The largest share of non-registrants (about 51%) gave reasons that reflected apathy or cynicism regarding politics.

On the other hand only 8 percent said "barriers to registration" were the reason for not registering.

The same publication states:

Nonvoting has been a significant feature of recent American political history. Nonvoters comprised about 55% of the population of voting age in 1974 and 37% in the Presidential election of 1972. Cumbersome registration procedures have often been cited as discouraging many potential voters from participating in elections. In recent years, registration hours have been lengthened, more registration places have been provided, registration by mall is permitted in a few areas, and laws have been enacted prohibiting outright discrimination against minorities. Despite these measures, the level of registration in 1974 was below that in 1970, the last (non-Presidential election year) Congressional election.

In a paper delivered before the 1976 meeting of the American Political Science Association, Steven J. Rosenstone and Raymond E. Wolfinger of the University of California, Berkeley, read a paper in which they concluded that easier registration procedures—although not necessarily the one proposed by the President—would increase voter participation. But at the same time they stated:

Finally, we should note that the registration laws are not the only environmental variables affecting turnout. The modern peak of voter turnout was reached in 1960, when one- and two-year residency requirements, poll taxes and literacy tests were common; and when millions of southern blacks were disenfranchised through maladministration of the laws. Since then all these barriers have been removed, the nation's education level has risen substantially, and turnout has fallen. The 18 year-old vote does not explain the drop in turnout. Other aspects of the political environment clearly are at work. This caution, however, should not distract us from the finding of this paper that registration laws have a substantial effect on the percentage of the population that goes to the polls on election day.

Yes, this scholarly paper suggests that easier voter registration would lead to a high voter turnout. But it also strongly urges us not to lose sight of the other "environmental variables" at work. While I respect the work of these distinguished scholars, I want merely to add that their paper, while admirable, is not the final answer to the question before

So far as the scholarly findings are concerned, we can say this: Even if we accept the most optimistic findings of the effect of easier registration on voter turnout, we must ask ourselves if the additional numbers of voters we will gain is worth the very dangerous and unprecedented Federal intrusion into the electoral process and, possibly, the beginning of the end of the Federal system. In short, are the benefits, even measured by what its proponents claim, worth the cost?

One major study done on voter turnout showed that it is "attitudinal" rather than "structural" problems that cause most eligible voters not to vote. This is a social-science-jargon way of saying that most people fail to vote, because of the way they feel, not because of the way the voter registration is set up. And what many of them feel most strongly about is not such matters as voting registration procedure, but the perceived failure of both major parties and the Government to meet the needs of the people. I say "perceived" not to suggest that the failure is not real-it most certainly is, especially at the national level-but to emphasize that it is how people feel and what they believe to be true that is the major factor influencing the decision not to vote. If the President wanted to get real electoral reform and get millions of Americans voting he might better use his time talking with the leadership of Democratic-controlled Congress about its failures and with the high-level bureaucrats who make life miserable for these Americans. Let Washington clean up its own act first before it begins to lecture the States on how they should register voters.

You may take note, Mr. Speaker, that I mentioned the States. It is perhaps considered quaint and archaic to remind this body that there is such a thing as a Federal system, that it is not peripheral but central to our American system and that, given half a chance, it actually works. The Democratic-controlled Congress has of course looked upon federalism as a nice-sounding idea, but something that has to be put aside when enough pressure groups feel that the

Federal Government can provide goodies. Before we begin to consider adopting the proposed reform, I hope and pray there will be a full and informed debate on the possible ramifications of a Federal take-over of the electoral process. And let us not kid ourselves, Mr. Speaker, that is what we are talking about. As the Washington Post said about this proposed reform—

All in all, it's one of those nice-sounding but awful ideas. Anybody can guess what would come next: Affirmative action programs for precinct workers, "outreach" demonstration projects, charges that federal funds are being used as walking-around money, and more rules and restrictions and "reforms". And each such step erodes the traditional role of the states and stifles free, competitive political activity.

As the Post points out, when the Federal Government puts its foot in the door, nonsensical and dangerous ideas cannot be far behind. Why can we not leave it to the people of the States to make their own decision on registration reform?

Our distinguished minority leaders, in both the House and Senate, my very dear friends, John Rhodes and Howard friends, John Rhodes and Howard registration, generally speaking, is needed. I respect their position. They are both men of utmost integrity and political sagacity. All I am doing here is raising questions that I feel should be answered before any binding commitment is made.

The President's proposal to abolish the electoral college presents a different problem. This question has been debated back and forth for many years. I must confess that I am at a loss to determine precisely where the truth lies in this area. I have examined the question and I am not at all certain, as I was in the past, that such reform is needed. In fact the more I examine the issue the more I am convinced that this is one of those cases in which many things people take for granted turn out, upon investigation, to be simply not true. Let me illustrate that point. The major argument for abolishment of the electoral college is the danger of a system in which it is possible for a candidate to win the Presidency with fewer votes than his opponent. The Washington Star editorially addressed this issue and said:

As for the abolition of the electoral college, the sales-pitch offered in the President's statement to Congress repeats the shopworn slogans that pass for critical analysis in Senator Bayh's constitutional amendments subcommittee. Mr. Carter implies that the electoral college was directly to blame for the election of minority presidents in three elections: 1824, 1876, and 1888. He further implies that direct popular elections would avert that risk. Neither supposition is warranted.

Eighteen eighty-eight is the only apposite presidential election: Benjamin Harrison indeed defeated Grover Cleveland in the electoral college, while losing the popular vote. But in 1824, Andrew Jackson lost the presidency to John Quincy Adams because Adams and Henry Clay Joined forces in the House of Representatives. Senator Bayh's direct-election amendment, because it would require a runoff vote if the leading candidate fell short of 40 percent of the vote, would not prevent a first-round winner like Jackson from losing the second round if the runners-

up combined against him. What, then is the point of citing the 1824 election—or for that matter the 1876 election, which was complicated by disputed outcomes in three Southern states?

The proposed abolishment of the Electoral College is called by the President an issue of "overriding governmental significance." But as the Star pointed out, the examples he used to illustrate this supposed significance are both less than convincing. The case simply has not been made, in my view, that abolishment of the electoral college will improve the democratic process. What it would do, I fear, is to contribute to the growing homogenization of the American people. the move toward dealing with Americans as if they were interchangeable parts and with States as if they are vestigal parts of the body politic, a sort of appendix which may be cut off without much thought taken.

As I said, Mr. Speaker, this is one issue that is truly difficult to resolve. But I must say that while I have in the past leaned toward abolishment and the setting up of a different system, I am not at all certain this is the best way. I look forward to the debate that I know will bring forth learned and compelling arguments on both sides.

As for the other reform proposals of the President, let me deal with them briefly: The President want to revise the Hatch Act. He wants to do so, he states, in the name of "full opportunity to participate in the electoral process." Unfortunately, revision of the Hatch Act will simply turn over millions of Federal employees to the tender mercies and not-so-subtle pressures of political and labor union bosses. It puzzles me as to why anyone knowing the political facts of life would make such a suggestion, unless, of course, he thought political and labor bosses deserve "full opportunity" to extend their power.

When the Hatch Act was originally passed it sought to protect Federal employees from political pressure coming from their bureaucratic or appointed political bosses. But the pressure today comes equally from a different set of bosses, the union bosses. Revision of the Hatch Act would leave Federal employees helpless before the new, as well as the old, bosses. This is such a bad idea I seriously cannot understand why it was proposed in a message dealing with "reform."

Insofar as public financing of congressional elections is concerned. I view it as the Incumbent's Protection Act of 1977 and I do not like it. I am an incumbent, but I do not want to go into an election knowing that my opponent and I are equally "limited" to the same expenditure of funds, but that with all the special exposure that incumbency gives, I am "more equal than others." I want to win, but I want to win fair and square. I might add that while I may be in the Congress myself, one of my dreams is to see my party become once more the majority party and that is not going to happen if we have an Incumbent's Protection Act helping the current majority.

In passing, Mr. Speaker, let me note that I find it a rather striking coincidence that every proposed reform, given the current facts of political life, would in all probability work for the current majority and against the current minority. I am not, of course, suggesting that this is the only reason such reforms were presented, but one wonders; one just wonders

And that is what I ask this House to do about the proposed reform: Wonder about them. Think about them. I have deliberately played devil's advocate today and I want to hear the opposing arguments. I want a full and free debate—no closed rules, please, in the name of openess and no limit to free debate in the name of opening up the public dialog. Let us ask questions. Let us examine not only the proposed reforms on their merits, but also our own role in causing the current apathy and often bitterness that every major survey shows has kept Americans from the polls.

Seek not to find for whom reform is needed—it is needed in the Congress.

In my general remarks today, Mr. Speaker, I have not dwelled on the very real possibilities of fraud under such a procedure as election day registration. It is not that I am convinced such fraud will not happen—far from it—but that it is an issue of such major importance that I reserve the right to discuss it later as a single topic.

One of the major causes of voter alienation and apathy-which in turn is one of the major causes of nonvotingoverpromising and underdelivery of the Federal Government. All too often the Government presents programs in glowing rhetoric and promises to eliminate the ills that beset us. When the rhetoric wears off, and billions of dollars are spent, the ills remain and are often increased. The American people are sick of this kind of thing. That is why I urge caution as we look at these reforms. They promise much. But can they deliver? We simply do not know. And if we make them laws and then do not deliver, what you will see will be the biggest voter turnoff in American history.

Let us look at each of the President's proposals with care. Perhaps there is some merit to them. But let us take a good hard look.

JUDICIAL REVIEW FOR THE VETERANS' ADMINISTRATION

The SPEAKER. Under a previous order of the House, the gentleman from Maryland (Mr. Steers) is recognized for 5 minutes.

Mr. STEERS. Mr. Speaker, today I have joined as a cosponsor of legislation that would provide for judicial review of veterans' appeals cases. Our colleagues, Mr. BINGHAM and Mr. WIRTH, have each introduced legislation that would provide veterans with a right the rest of us have taken for granted, due process of law. I am cosponsoring both proposals.

The right of appeal is basic to our system of justice. It is a cornerstone that has been omitted from the process of VA appeals. In effect, this has denied veterans, dependents, and survivors the fullest opportunity to receive all of the benefits available as small payment for their service to this country.

The time has come for the Veterans'

Administration to move back into the framework of the Constitution. The VA is the third largest agency in the Government. The current law has given the VA the ability to develop rules and regulations outside of the intent of congressional actions.

I urge the Congress to provide to all veterans the checks and balances that are present in the rest of the Government. If we amend title 38 of the United States Code, we provide veterans with the full protection under the fifth amendment. I can think of no finer group of individuals or a group more deserving of the benefits the Constitution provides than the people who fought for their country.

ALASKA D-2 LANDS

The SPEAKER. Under a previous order of the House, the gentleman from Alaska (Mr. Young) is recognized for 30 minutes.

Mr. YOUNG of Alaska. Mr. Speaker, during the past months the Alaska congressional delegation and the Governor have conducted a series of meetings to discern the opinions of Alaska's citizens regarding the D-2 lands issue. These sessions have proved most informative and permit me to make two basic observations regarding D-2 lands: First, there is near unanimity among Alaskans that lands within the State be managed to preserve compatible, diversified uses; second, the statements delivered by Alaskans at these meetings convey this message in clear, unmistakable language.

Accordingly, I commend the following statements to my colleagues which represent approximately half of the submissions presented to the delegation; the remaining statements were inserted into the Congressional Record on March 17, 1977, by the senior Senator from Alaska, Mr. Stevens.

The statements appear in the following order:

First. Statement of the Alaska Resource Development Council on Agricultural Interests.

Second. Statement of the Alaska Section of the Society of American Foresters.

Third. Statement on behalf of the United Fisherman of Alaska, the Izaak Walton League, the Territorial Sportsman, and Trout Unlimited.

Fourth. Two statements from the Alaska Oil & Gas Association.

Fifth. Statement of the Alaska Coalition.

Sixth. Two statements by the National Defense Transportation Association: The material follows:

AGRICULTURAL INTERESTS—D-2 SELECTION CONCERNS

Preface.—The D-2 land selection process confronts Alaskans, and the U.S. as a nation, with decision alternatives that have profound implications for future as well as current generations. This potential transition of land management and control occurs in a setting of diminishing world capability to satisfy food needs. Decisions on land ownership and use are also being addressed before the U.S. as a nation has clearly identified and established criteria by which it would preserve prime agricultural land for future use.

Changing world energy reserves and shifting climatic conditions appear to have significant implications for future food production capabilities irrespective of man's influence. In continuing to address the question of D-2 land selection a maximum degree of flexibility therefore appears to be a high priority objective. Implicit in the concept of flexibility, is a need to not only identify Alaskan agricultural lands, but to make them reasonably accessible when needed.

them reasonably accessible when needed.

1. National policy regarding food may be subject to change in the direction of more complete utilization of food production resources to meet increasing world food needs.

2. An option should be incorporated into D-2 classified lands to allow "prime agricultural lands," identified at a later time within D-2 boundaries, to be considered for conversion to food and/or fiber production in the "national interest" as well as to meet future State needs.

3. Present D-2 proposals include lands with demonstrable food production capabilities of both intensive and extensive styles, i.e., from greenhouse through grazing livestock production; both types of food production resources within D-2 lands should be recognized.

4. D-2 lands proposed for selection potentially pose barriers to access to some private lands; consequently, provisions should be made for transportation across as well as to D-2 lands for legitimate needs. Transportation decisions require consideration of modes, costs and compatibility with D-2 land use goals.

5. Monitoring and identification of present air and water particulate conditions may be necessary to provide a rational base line from which future standards may be devel-

oped.

 Aquaculture and fisheries should be considered as viable options with respect to D-2 land values.

7. Complimentary features, compatibility and competitiveness of agricultural uses should be evaluated with respect to other natural resources, i.e., waterfowl, predators, big and small game, and aesthetics. Associated costs and values need definition.

8. Joint management philosophies and procedures appear to be beneficial for agricultural resource utilization on D-2 lands if they are consistent in providing for agricultural development where physically compatible with a particular region. Present federal agency policy and regulations primarily limit "multiple use" to grazing activities in the agricultural field.

9. Dedication of large blocks of land to new federal management systems carries a responsibility to continually assess the resources within those lands. Such assessments may indicate uses not currently perceived and which potentially involve the private as well as the public sector. Therefore, continuing and increasing federal support of such assessments appears essential, either directly through federal agency resources or indirectly through support of state level institutions.

STATEMENT OF THE ALASKA SECTION, SOCIETY OF AMERICAN FORESTERS

The Society of American Foresters is the only professional Society for foresters in the United States. It represents 20,000 members nationally and includes a professional membership of over 200 foresters in the Alaska Section.

Forestry is the science, practice and art of managing and using for human benefit, forest lands and natural resources that occur on and in association with forest lands, including trees, other plants, wildlife, soil, water and related air and climate.

Multiple use is a strategy of deliberate land management for two or more purposes, which utilizes without impairment, the capabilities of the land to meet different demands simultaneously. Renewable and nonrenewable resource, including wilderness, under multiple use, are identified and managed in a compatible manner to provide maximum economic and wildland benefits.

Classification of forested lands should be made only after careful study has determined that the social, economic and managerial benefits therefrom will promote more efficient use of natural resources and in-

creased public benefits.

There is need for classification of forested lands in Interior Alaska for management under the principals of multiple use. The total forest biome in the Interior provides excellent opportunities for management for wildlife, recreation, water range, minerals and agriculture. The forest resource is present in large enough areas that will allow for environmental protection and commodity uses. The forest resources can be identified as manageable units.

The Interior forests stand today like our western forests stood in the early 1800's, essentially inaccessible with limited market outlets. Today our western forests are of economic importance. So Alaska's Interior forests one day be looked upon to provide lands for recreation, wildlife, water and other wildland amenities and commodity uses, provided they are recognized for multiple-use characteristics.

The Alaska Native Land Claims Settlement Act of 1971 provides for the classification of 80 million acres into National Forests, National Parks, Wild and Scenic Rivers and Wildlife Refuges under Section (d)(2) of

this Act.

Interior Alaska contains lands of outstanding scenic beauty, critically needed wildlife and waterfowl habitat and other wildland amenities necessary for our citizens recreational and spiritual need.

Over 16 percent of the United States forested lands are found in Alaska with over 106 million acres located in Alaska's Interior.

The Interior forested lands of Alaska support 22.5 million acres of productive forest lands supporting over 14 billion cubic feet of merchantable timber.

The total value of the Interior's forested lands has the potential of national economic significance in providing both amenity and commodity needs for our nation.

Alaska's future growth and progress is dependent upon the wise use of the State's

national resources.

The Alaska Section of the Society of American Foresters supports multiple-use management of public lands, consistent with sound environmental protection as being in the best interest for contributing the most benefits to the economy and to the citizens of the United States.

The Congress of the United States has seen fit to recognize the need to manage all public lands including National Resource Lands for Multiple-Use indicated by the passage of P.L. 94-579, The Federal Land Policy and Management Act of 1976 and S. 3091, The National Forest Management

Act of 1976.

With these facts in mind, the Alaska Section of the Society of American Foresters recommends that legislation be enacted to provide, insofar as practicable, an equitable balance of National Parks, National Forests, National Resource Lands, Wildlife Refuges and Wild and Scenic Rivers be established under the provisions of ANCSA (d) (2) with appropriate consideration to be given to classifying forest resource lands into a multiple-use category.

ALASKA LOGGERS ASSOCIATION, INC., Ketchikan, Alaska, February 9, 1977.

Thank you for this opportunity to present our industry's views regarding the d-2 lands. These comments summarize our beliefs and

we will be prepared to support these statements with research and additional information when we meet with you on February 14 in Anchorage.

Two facts are essential to a land-use plan-ning and must remain the basis for intelligent decisions. One is the inevitable population increase of the United States and of the world, and the second is that Alaska contains vast resources valued by the people. We must recognize that the inequity between those demands and Alaska's supply will increase with time. As Max Brewer noted 442,-856,000 acres of land in Alaska have been provisionally committed in some manner or another.

It is with these facts in mind that intelligent, long-range, comprehensive land-use classification and planning must be determined. If our plans do not accurately access the eventual usage, problems and adverse en-

vironmental impacts will result.

Regardless if recent increases in demand for wilderness and recreational use of the land continues, it is questionable that we can afford low-use management of large areas of land. As resources dwindle and population increases, material values and developed high-usage recreational needs will logically and inevitably go to the fore-front. If any solution is best, it is one that optimizes the utilization of the land. If we truly understand conservation, we recognize it means the wise use of the land and its resources.

A particularly wise use of the land is the development of its renewable resources. Timber, of course, is one. Alaska contains 5.388% the commercial forest land in the United States and 6.742% of the commercial growing stock. Yet in 1970 we contributed only 1.119% of the United States round-wood

production.

In 1972 the timber industry's direct employment exceeded 2,800 people and related employment was over 4,000. The earnings in that year topped all basic resource industries in the state with \$41,000,000. Another industry contribution to the State is 25% of the federal stumpage fees, which exceeded \$4,000,000 in 1976. Despite the significance of these contributions, the potential of the industry dwarfs these figures.

In southwest Alaska, where the industry is currently centered, the potential total related employment is 8,800. Although this is more than double the current development, is based on a conservative sustained-yield calculation and includes setting aside 12% of the Tongass National Forest for wilderness

The interior contains 225 million acres of commercial forest, an area larger and with greater per acre stocking of wood than Minnesota where a 30,000 job industry exists.

Representative Udall's National Interest Lands bill includes 4,400,000 acres of the Tongass National Forest, 1,429,017 acres of commercial forest, and would eliminate 3,630 timber industry related jobs. In the interior, Udall's proposal would eliminate a substantial portion of the commercial forest land and untold thousands of jobs; not to mention depriving the people of millions of cubic feet of much needed wood annually and forever.

Hasty, politically motivated land-use classifications without the benefit of comprehensive, long range planning based on researched resource values will not only impact the land actually withdrawn but large amounts of adjacent lands as well. Expensive access, inflexible air and water quality standards and lost efficiencies of scale will all hinder responsible development of the remain-

A major reason for these demands to lock up the land is environmental concern. The Report of the President's Advisory Panel on Timber and the Environment states:

"Many citizens conscious of the demands modern society places on our environment, criticize operations and management objec tives on national forests. They have found much that upsets the erosion from logging roads, streams clogged with logging debris, spawning beds silted over, huge quantities of slash and defective material left on logging sites, and large areas clearcut thus oftheir esthetic sensibilities. Some fending question if long-term forest management can e practiced without soil depletion.

"The Panel has made a thorough inquiry into these and related matters. A careful review of scientific findings together with onsite inspection revealed that most of such damage caused by logging can be avoided or minimized. Many of the fears that have been expressed are unfounded, misleading, or exaggerated, often due to extrapolation from an isolated case to forest lands in general.

'Properly executed logging operations do not destroy wildlife habitat, though they

may temporarily alter it."

Forest Service and State regulations on logging operations carefully safeguard the environment. Bald eagle nest trees, salmon streams, wildlife corridors, scenic areas, estuaries and many other areas receive special protection. As research is accumulated, additional regulations are added, thus improving the compatability of logging with other resource values.

A significant positive benefit of the timber resource is that during cultivation of the crop, the same land is productive of many other resources: improved wild life habitat, stabilized streamside vegetation and watershed cover; and improved access via logging roads to recreational and hunting areas.

Another concern is that Alaska is depleting its valuable timber resource only to the benefit of foreign peoples and big business. To begin with, timber is renewable, and rather than depleting our wood stock, we are currently removing low value, old-growth timber which will contain twice as much commercial volume per acre. Additionally, the cost of logging Alaska wood is so much higher than Canadian and south 48 timber consumers cannot afford it. However, by exporting our products to Japan, we ease demand on and lower the price of Canadian wood, which provides over 20% of the U.S. consumption. All Americans benefit from export of Alaska timber.

With these thoughts in mind the Alaska Loggers Association makes the following

recommendations:

Only a minimal amount of land and only that which is particularly rare, be selected for inclusion in the single-use land classifications through the d-2 procedures.

All land selected for such classification must first be studied to determine the values of all resources, prior to final classification.
The value of the single-use should exceed

the combined values of excluded uses in order to restrict the land-use possibilities.

In that the valuation of scenic beauty and undeveloped recreation is tremendously subjective in the current political/economic situation ALA recommends that determination of such single-use classifications be carried out through the U.S. Forest Service land-use planning procedure.

We must realize that the best interests our state and nation will be served if we make long range plans for the development of the land and its resources; particularly renewable resources. We cannot over-emphasize the danger of poorly or un-planned de-velopment in the future if we withdraw excessive amounts of land now.

Sincerely.

DONALD A. BELL, General Manager, Alaska Loggers Association.

A SPECIAL REPORT OUTLINING THE CONCERNS OF RECREATIONAL FISHERMEN AS THEY MAY BE AFFECTED BY LAND CLASSIFICATIONS

(Presented by Rupert Andrews representing United Fisherman of Alaska, Izzak Walton League, Territorial Sportsmen, and Trout Unlimited)

The report that follows will emphasize those special concerns of the recreational fishing community; not only resident Alas-kans but non-resident visitors as well. Recreational anglers comprise the single

largest wildlife resource users in Alaska. The 1976 calendar license sales were in excess of 167,000. Add to this figure an estimated 60,000 juveniles under 16 years of age and persons over 60 years of age meeting residency requirements for free angling privileges for a total of some 227,000 persons participating or eligible to participate in sport fishing. Population characteristics indicate that 40 percent of the total estimated Alaskan population will participate in sport fishing in 1977.

Surveys have shown that sport fishing provides many social and economic benefits while substantially contributing to the quality of Alaskan living. It is estimated that during 1976, sport fishing activities in Alaska generated in excess of \$60.0 million to the

total Alaskan economy.

Alaska enjoys the unique situation of being able to provide an extraordinary share of the nation's recreational fishing needs. Perhaps, even more significantly, a large percentage of the state's anadromous and resident species fisheries are on native wild stocks in untouched wilderness environments. The large size of Alaska, coupled with an abundance of fresh water (about 16 percent of the total fresh water contained the continental United States) enables Alaska to assume a deserved reputation as an angler's paradise. The Secretary of the Interior and the U.S. Congress have the opportunity under the d-2 section of ANCSA to classify up to 80.0 million acres of land in Alaska in a manner that will shape the use of these lands for recreational fishermen for generations. It is, therefore, important that this classification adequately provide for angler needs for optimum use of the fishery resources.

A foremost concern of anglers is the problem of access to the fishery resources—access in fact, as well as law. All of the proposed classification systems will provide legal access for anglers. The problem is logistical access. In order to best serve angler and people needs, historical and traditional means of access must be considered for each and every classification proposal. This would include amphibious or wheeled aircraft and/or motorized watercraft in many instances. Of course, modes of transportation must conform to the rules and intent of each classification act.

Research, fishery enhancement, and development and rehabilitation projects, particularly as regards anadromous species of fish, should be allowed and encouraged where necessary and where opportunities exist. It is recognized that provisions are included in both the Wilderness Act and the National Wild and Scenic Rivers Act for specifically delineating the responsibilities of the states with respect to fish and wildlife.

However, the State of Alaska is embarking on the most ambitious anadromous fishery rehabilitation and enhancement program ever undertaken by a single state. Creation of new or expanded National Park and Wild and Scenic Rivers will pose special problems and considerations in order to accomplish fishery enhancement projects including construction of hatchery facilities. Early on, it is recommended that this be included in the language of each of the separate classifications.

Classification of lands under National Park management are of concern to users of fishery resources, in that the National Park Service has no historical tradition of fishery expertise. Park officials have not developed management experience in fisheries and have in fact, demonstrated a lack of flexibility in meeting changing public needs. Proper fishery management requires knowledge of annual fluctuations in fish populations for optimum harvest rates; it also requires an appreciation of community ecology in order to maintain reasonable levels at each step in the food chain.

Proper fishery management also includes that under-utilized species be harvested by more liberal bag limits than fully-utilized species. A case in point are sport fishing regulations for national park areas in Alaska that prohibit the use of bait to take fish. This regulation, while having merit during ice-free months, effectively eliminates historical ice fisheries especially for burbot in an area such as Katmai. Burbot are underutilized in this area and can only be taken by use of bait fishing methods. In summary, it is recommended that, due to the flexibility and management expertise of the state management agency for fish and game, that fishery harvest rates and methods and means of harvest be established on a cooperative basis.

ALASKA OIL AND GAS ASSOCIATION, Anchorage, Alaska, February 10, 1977. Hon. TED STEVENS, U.S. Senate, Anchorage, Alaska. Hon. MIKE GRAVEL, U.S. Senate, Anchorage, Alaska. Hon. DON YOUNG. U.S. House of Representatives, Anchorage, Alaska. Hon. JAY HAMMOND, Governor,

Anchorage, Alaska. GENTLEMEN: The Alaska Oil and Gas Association welcomes the opportunity to present to you its views concerning the D-2 lands question. Our comments suggest basic ideas which will be amplified during our planned discussions with you on February 15, 1977.

Members of our Association strongly be-lieve that the concept of "multiple use" of public lands is the only logical guideline to the final disposition of the D-2 issue.

Multiple use promotes the compatability of oil and gas exploration and development not only with other resource industries such as forestry, agriculture, hunting and fishing, but also with the concepts of wildlife ranges, recreation areas and preservation of regions of scenic beauty or historic importance.

We do not believe this issue to be one

which must be resolved in a fashion that is either black or white, i.e., one which is totally to the benefit of one group at the expense of being totally detrimental to the cause of another. We believe that a middle ground exists which will accomplish the major goals of each of the various interest groups and thus be beneficial to the nation as a whole.

Specifically, resource development on D-2 lands should not proceed in total disregard for the environment, nor should environmental concern totally preclude the benefits to be derived from resource development. These activities can be carried out compatibly and are not mutually exclusive.

The concept of multiple use of lands is critical to our nation's need for raw materials and essential for our economic existence and national survival. The domestic energy supply situation in this country is increasingly serious, and, this winter, it has become very apparent to many persons whose homes, transportation and livelihood are being affected by the lack of oil and gas. This situation serves to emphasize the adverse economic effects on everyone resulting from the import of almost 50% of our country's petroleum needs. No single system should be permitted to take precedence and thus exclude the remaining values so critically important and necessary to our future existence.

The ultimate decisions that Congress must make on the disposition of the D-2 lands will have a lasting impact on not only the 83 million acres now classified as "D-2" lands. but also all of the adjoining 103 million acres of D-1 lands; state lands and the newly acquired 40 million acres of native lands. Once classified, only an act of Congress can change the classification. Therefore, any lands on which exploration is forbidden are likely to remain so for many years to come. A National crisis could bring the required Congressional action. However, we must realize that there will be many years of delay from the time lands ultimately become available for exploration and the time when any newly discovered hydrocarbons can make their way to the consumer to alleviate the crisis. For the benefit of the long-range needs of the nation, it seems more sensible to allow exploration and development to take place under a multiple use concept while adhering to good conservation practices.

We feel our position is fair and reasonable. rather than extreme. We recognize that any D-2 land concept must be compatible with the needs and wishes of the American people. The nation's need for energy is obvious; the wish of reasonable people to preserve the beauty of Alaska equally so. We are confident that both these requirements can be met by responsible industries in Alaska if the multiple use concept is applied to D-2

We have attached for your consideration a list of specific comments on issues already before you, including a definition of the multiple use concept.

We appreciate this opportunity to present our views concerning the final disposition of D-2 lands. Our Association is prepared to offer any assistance necessary to aid you in reaching a position on this most important

ALASKA OIL AND GAS ASSOCIATION: COMMENTS ON ISSUES CONCERNING D-2 LANDS DIS-POSITION

DEFINITION OF MULTIPLE USE CONCEPT

The Alaska Oil and Gas Association suggests and promotes the concept of "multiple use" as a means of achieving compatibility between varied interests concerning the D-2 lands question.

In order that no ambiguity surrounds this term, we accept the definition of the Department of the Interior as set forth in 43 CFR.

viz . . "(0) 'Multiple use' means the management of the various surface and subsurface resources so that they are utilized in the combination that will best meet the present and future needs of the American people; the most judicious use of the land for some or all these resources or related services over areas large enough to provide sufficient latitude for periodic adjustments in use to conform to changing needs and conditions; the use of some land for less than all of the resources; and harmonious and coordinated management of the various resources, each with the other, without impairment of the productivity of the land, with consideration being given to the relative value of the various resources and not necessarily the combination of uses that will give the greatest dollar return or the greatest unit output."

ISSUE 1. WILDLIFE MANAGEMENT/HUNTING/ SUBSISTENCE

Oil and gas exploration and development is compatible with wildlife management, hunting and fishing (both sport and subsistence) and often enhances these activities by supplying the necessary access, and invariably aids wildlife management. There is little doubt that the area in the vicinity of Prudhoe Bay is one of the most intensely

studied biological habitats in the whole of the State. The operations there, along the Alyeska pipeline and at the oil fields on the Kenai Peninsula all preclude hunting and fishing by industry operating personnel. Such considerations, plus numerous other protective measures, allow fish and game to thrive.

The compatibility of oil and gas exploration and development with wildlife management, sport and subsistence hunting has been demonstrated in Alaska.

ISSUE 2. ACCESS/TRANSPORTATION

Prospective oil and gas basins in Alaska conservatively occupy only a minor percentage of D-2 acreage. The attached map outlines the major sedimentary areas in the State and illustrates the relative geographical isolation of many of them and their present inaccessibility. If these lands are to be adequately explored and the benefits of my hydrocarbon deposits made available to the American people, reasonable access is absolutely essential. Furthermore, the cheapest and safest method of moving oil or gas is by using a pipeline, and future production will require pipeline routes. Without means of access through D-2 areas, oil and gas development is impossible. This can only be to the detriment of the American way of life and standard of living.

With the principle of multiple use of D-2 lands, reasonable access makes available both the beneficial utilization of resources, and the enjoyment of the esthetic intangibles which these lands offer.

ISSUE 3. MINERAL EXPLORATION AND DEVELOPMENT

The oil and gas industry is supportive of exploration and development on D-2 lands. As has already been mentioned, a portion of the selected D-2 lands has a reasonable potential for accumulations of oil and gas. The domestic energy supply situation in this country is increasingly serious, and this winter, it has become very apparent to many persons whose homes, transportation and livelihood are being affected by the lack of oil and gas. The present situation serves to emphasize the adverse economic effects on everyone resulting from the import of almost 50% of our country's petroleum needs.

The discovery of the hydrocarbons neces-

The discovery of the hydrocarbons necessary to decrease the country's reliance on foreign supplies is largely dependent on the availability of new areas for exploration. At the present time millions of acres covering sedimentary basins in Alaska are closed to exploration by the petroleum industry. America needs more oil and gas. It can only be obtained by allowing immediate access to favorable regions for oil and gas so that their potential may be evaluated as soon as possible.

Our society is energy dependent. However, this dependence is compatible with preserving the scenic beauties and delights of Alaska. Almost 1,000 wells have been drilled in Alaska and 19 oil and gas fields have been discovered. These fields cover a total area of less than 450,000 acres out of Alaska's 375,-303,000 acres (703 square miles out of 586,412 square miles). Of that area, only a small portion is utilized for surface facilities, and the effects of industry presence on that land is negligible. In fact, it is beneficial due to the extra environmental protection and care afforded it. For example, the total surface components of the Prudhoe Bay Field occupy much less than 1% of the area of the hidden subsurface oil and gas deposits. The remaining surface area of the field will continue to serve as wildlife habitat. Similarly, the Alyeska pipeline, with all its related facilities will cover a mere 14 square miles of Alaska's 586,412 square mile area. The pipeline will be capable of delivering 2 million barrels of oil a day to the economic benefit of the state and the nation.

The proven techniques of operation of the oil and gas industry are now compatible with the preservation of scenic and wildlife values. D-2 lands must allow mineral exploration and production as part of a multiple use concept.

ISSUE 4. WILDERNESS REVIEW

AOGA wishes to express total opposition to the wilderness proposals contained in Congressman Udall's D-2 land proposals set out in HR 39. The designation of any wilderness area should only be made after it has been reasonably determined that oil or gas resources are not present.

ISSUE 5, AGRICULTURE

Agriculture is clearly compatible with the multiple use concept favored by AOGA.

ISSUE 6. COOPERATIVE MANAGEMENT

The effective operations of an oil and gas lease are inevitably an intense exercise in cooperative management. This is imposed on the oil companies by practical necessity and stipulation. It is covered very adequately by existing Federal and State laws and further promotion of Cooperative Management in a D-2 bill will only add to bureaucratic involvement without easing the administrative burdens of oil and gas operations. We recognize that this issue is not aimed at the oil industry, but we suspect it would not have a beneficial effect on any multiple use operation.

In more general terms, the American public has recently indicated a desire to reduce bureaucracy in the United States—Cooperative management would problably not achieve that.

ISSUE 7. FIFTH MANAGEMENT SYSTEM

AOGA does not wish to make a specific recommendation for the designation of the D-2 lands beyond stressing that the management system must allow the land to be open to oil and gas exploration and development. Also, the land should be managed by a multiple use agency such as the Bureau of Land Management or the Forest Service. It is our contention that a specialized agency such as the Fish and Wildlife Service or the National Park Service is not competent to manage multi-use land. We strongly oppose the provision in Mr. Udall's bill (H.R. 39) for the management of NPR 4 to be undertaken by the Fish and Wildlife Service.

No matter which multiple use system eventually administers D-2 lands, it should not be necessary to create a new bureaucratic organization to oversee it. Such tasks are well within the capability of existing Federal and State Departments.

ISSUE 8. FEDERAL CLASSIFICATION ENTITY

AOGA has no comment on this issue.

ISSUE 9. FORESTRY

Forestry management should be encouraged as part of a multiple use system for D-2 lands.

THE ALASKA COALITION AND THE ISSUES OF THE D-2 LANDS

H.R. 39.—the Udall bill—expreses the judgment of the Alaska Coalition concerning the type of classification and management that conservationists propose for the National Interest lands.

We feel that the basic choice presented to Alaskans by the D-2 issue is one involving the kind of Alaska we want to live in, and that we want to bequeath to future generations. The strong emphasis and impetus to expedite development of Alaska's natural resource base in order to build a stable economic situation must be balanced by an equal emphasis on the preservation of large areas in a natural state to provide for wild-life habitat, renewable resource protection and the continuation of the quality of life

and the perpetuation of a variety of Alaskan life styles dependent on these values.

This does not mean that lands so preserved will not represent real economic values in the future, for we are entering upon a period in which the economy of scarcity will prevail, and proportionately within the U.S., wild lands are becoming the rarest of commodities. Alaska's unpeopled spaces will become jewels beyond price to those living in the future.

We perceive land and resource allocations to be matters of social judgment, the most preferable means of balancing conflicting viewpoints to satisfy human needs, desires, and interests. The proposal which led to the creation of Yellowstone National Park was a social judgment, now recognized as one of the greatest creative ideas America has contributed to world culture.

What areas of land to include under protective management, how much land, and how strictly to protect it are, thus, social judgments.

We support the desirability of obtaining as many facts as possible. This will give all concerned the sharpest available tools for best judging how to obtain the ultimate balance, so as to gain maximum possible protection of lands with high natural values, with the minimum possible negative impact upon availability of lands or resources highly valued for other purposes. If we must err because of lack of specific knowledge of all resources present in areas of high scenic or other natural values, let us err initially on the side of protection, for this judgment can be amended later, but once despoiled, these other values may be forever lost.

As a result of Statehood and ANCSA, approximately 150 million acres of Alaska will be under the exclusive control of Alaskans. In addition there will be tens of millions of acres of state-owned tide- and submerged lands. An important feature of both grants is their priority vis-a-vis the d-2 lands. Also, Native and State selections have been made from some of the most economically valuable land within the state.

Past federal actions designed to foster industrial development and provide access to energy resources include the establishment of the national forests, the National Petroleum Reserve—Alaska, and millions of acres of public domain managed by the BLM. In addition, the right-of-way for the Trans-Alaska pipeline was a direct federal action committing Alaskan lands to maximum economic development.

These dispositions will result in about two-thirds of the state being available for community, transportation, mineral, and other developmental purposes, while about one third will be in protective categories, much of it above the 3,000-foot altitude level.

Alaskan conservationists have played a leading role in the d-2 issue from the very beginning. Alaskans on the former Federal Field Committee originated the idea for a Congressional review of the remaining unreserved public lands for potential national park and wildlife refuge purposes, as part of settling the Alaska native land claims. In 1971, Alaska conservationists lobbying in Congress for the National Interest Lands provision broadened the refuge and park review to include wild and scenic rivers and previously classified BLM lands.

Since that time, conservationists here have worked with their national colleagues in preparing the Coalition's d-2 recommendations to Congress.

The Alaska Coalition is composed of numerous Alaskan and national environmental groups, including The Alaska Center for the Environment, Fairbanks Environmental Center, Alaska Conservation Society, Brooks Range Trust, Denali Citizen's Council,

Southeast Alaska Conservation Council, Trustees for Alaska, Anchorage and Janeau chapters of National Audubon Society, Interior Alaska branch of Friends of the Earth, Alaska chapter of Sierra Club, and Alaska members of the Wilderness Society. Alaska based membership numbers in the thousands.

Nationally, Alaska Coalition membership includes Defenders of Wildlife, the Federation of Western Outdoor Clubs, Friends of the Earth, National Audubon Society, National Parks and Conservation, Sierra Club, The Wilderness Society, and American Rivers Conservation Council.

These groups have collaborated to provide the basic framework of HR 39, designed to further their strongly held common goal, ie: to provide the greatest protection for the lands we have selected as representing a diverse and varied assortment of landscapes, habitats, wildlife populations, and high quality scenic and recreational opportunities.

The overriding concept under which boundaries were drawn is that of encompassing in each case as complete an ecologic or physiographic unit as practicable. Lands selected are intended to encompass the greatest possible diversity of landscapes and habitats. We also emphasize the concept that lands most likely to be infringed upon by human activities deserve the most immediate attention for protective status.

WILDLIFE MANAGEMENT/HUNTING/SUBSISTENCE

Our proposal fully supports the concept of permitting continuation of subsistence and related life-style activities where such activities now exist. Under a policy framework designed to define objectives and procedures, decisions relating to subsistence would be promulgated by local boards composed of the local people who are most knowledgeable of the subsistence use patterns prevailing in their area, and which people are actively engaged in subsisting.

We recognize that a considerable diversity of ways of living are included under the concept of "subsistence". We intend that our bill will allow for practicable application of this policy, and for its evolution as well, as conditions in geographic locations and over time may dictate. The situation in the northwest Arctic is an example of where a similar approach is already required, and is now occurring.

We think that our bill protects opportunities for subsistence and related life-styles better than any other proposal, since it encourages continuation of existing uses, allows for primarily local management, and would best protect the largest tracts of land whose continued productivity and uncrowded condition is necessary for these ways of living to continue.

Current wildlife management fails to provide the necessary research, the innovative and imaginative approaches to both habitat and wildlife resources which will insure the perpetuation of existing Alaskan species. There are strong pressures for correction of these failings by upgrading federal authority, but in our view the essential changes will involve much more than this—it will involve the forging of strong cooperative agreements between state and federal wildlife managers and those land proprietors having responsibility for the maintenance of habitat, whether state, federal or private.

Sport hunting is provided for in many of the areas included in the Udall bill. Among these would be wildlife refuges, national preserves, U.S. Forest Service lands, including wilderness areas.

ACCESS AND TRANSPORTATION

The proposals in the Udall bill do not in general present obstacles to transportation of materials to market nor of access to resource areas. We do not favor the designation of specific corridors or routings across d-2

lands, but would rather see legislation provide a process by which such corridors could be delineated in the future as needs arise. This process must include a thorough analysis of all viable alternatives to such crossing of reserved lands.

MINERAL DEVELOPMENT

We propose that all National Wildlife Refuges and National Park Units be closed to new mineral entry or leasing. A number of recent publications, from such sources as the U. of A. Institute for Social and Economic Research (Tussing and Erickson), Resources for the Future (Brubaker and Krutilla), U. of California at Santa Cruz (Shaine) and the Office of Technological Assessment all conclude that preservation of wildlands of high known values in most cases can be justified for exclusion from utilization on the basis of speculative mineral values, without impacting seriously U.S. supplies of scarce minerals.

Where changing needs indicate that a reevaluation should be made, Congress has set precedents for making such a re-determination

WILDERNESS

We view the existence of the quality of wilderness to a high degree as central to most of our proposals. Indeed, in some cases, existence of such values was a criterion for their selection and boundary determination. Areas to be placed under protection of the National Wilderness Preservation System would be subject to valid existing rights of use or access, as stated specifically in the Wilderness Act. In many existing wilderness areas, considerable flexibility has been demonstrated in permitting such uses, where problems of access or human safety occurred.

AGRICULTURE

In the opinion of the Alaska Coalition, agricultural development in the State of Alaska will not be significantly affected by placing all of the d-2 lands in the classifications we have determined. Ample lands with agricultural potential exist within state and native selections, and within lands which will continue within the federal public domain, under BLM management.

COOPERATIVE MANAGEMENT

As we have indicated in reference to the management of fish and wildlife resources, the Alaska Coalition strongly supports development of cooperative management agreements between federal agencies, between federal and state agencies, and between both federal and state agencies and private landholders where problems or situations exist or develop which require such cooperation in order to have rational land and resource management. The pattern of land ownership in many areas of Alaska upon conclusion of the land exchanges under ANCSA, State-hood land selections, and the final patterns federal public domain holdings will inevitably fragment ecosystems and logical management units, and some means must be devised to permit comprehensive land use planning.

FIFTH MANAGEMENT SYSTEM

If the presently-existing federal land-management agencies fully utilize the flexibility of their various categories and classifications, we fail to see that an additional management entity would be necessary or advisable. As noted below, we do recognize the need for some type of interface between the federal government and the state government, but whether such an interface arrangement depends upon the designation of a fifth management system is uncertain.

FEDERAL-STATE CLASSIFICATION ENTITY

The idea of an entity to serve as a facilitator between federal and state offices, agencies and personnel is certainly one of the alternatives for providing for land classification. The exact nature of such an entity is a matter which we feel deserves detailed and searching study, especially if it is visualized

that this entity will have actual authority to classify and reclassify lands. Experiences to date with the Federal Field committee and the Federal-State Land Use Planning Commission demonstrate both the values which can be realized and the hazards which exist in such arrangements.

Many questions arise: What are the alternatives? Should it be an advisory body, or actually possess power to classify lands, both state and federal? What types of lands should be placed within its classification authority? Should it have part-time members, or full-time, fully-paid members of equal stature? Who would select its members, and what criteria would be set? Should members serve regular terms or serve at the pleasure of the appointing official?

FORESTRY

The issue of forestry within the interior forests of Alaska has been fairly extensively explored within the Resources for the Future study by Krutilla and Brubaker. In essence, we oppose designation of any new National Forests within interior Alaska. We recognize that there has been and will continue to be some commercial utilization of interior forests for local use. However, we do not feel that such utilization provides a reason for increasing the presence of the U.S. Forest Service in Alaska. Experience in Southeastern Alaska has demonstrated that the U.S.F.S. is a predominantly single-use agency operating under a multiple-use banner; timber cutting has been the major activity funded, with only passing attention to the other aspects of multiple use, such as watershed management, fisheries protection, recreation,

wilderness protection, etc.

Management of interior forests can be carried out by the state on state lands, and by BLM on public domain lands as it has in the past. Research projects by U.S.F.S. research laboratories have been operating on these kinds of lands in Alaska for many years.

The Alaska Coalition appreciates the opportunity for the type of discussion of issues which is presented by this meeting with Governor Hammond, Rep. Young, and Senators Gravel and Stevens. However, we want to suggest that the lands which are under discussion are designated as 'national interest' lands, and they will properly receive national consideration within the Congress of the U.S. We look forward to being a part of the ongoing legislative process, and hope to bring our Alaskan perspectives to this important and crucial decision-making setting.

NATIONAL DEFENSE TRANSPORTATION ASSOCIATION d(2) LANDS STATEMENT

Today our representation before you includes:

Ben Benediktsson, president North Pole Chapter of NDTA and Managing Director of the Alaska Carriers Association.

Bill Coghill, administrator, Alaska Railroad.

Tony Watson, operations officer, Military Sea Lift Command, U.S. Navy.

Jack Barnett, Crowley Maritime.

We of the National Defense Transportation Association very much appreciate the chance to make this presentation today. The NDTA is a national joint, nonpolitical, nonpartisan Military and Civilian Transportation Association. We have two basic goals which are:

To support the civil defense effort.
 To encourage a healthy interchange between military and civilian transportation

There are two chapters in the State (Fairbanks and Anchorage). The Anchorage chapter represented here has some 170 members from all of the transportation modes in the State. In fact, NDTA is the only nongovernmental multimodal agency in existence in Alaska.

Since both civilian and military members belong to the association there are certain caveats which must be observed in making a presentation like the one we are making today. NDTA can and is very pleased to act as a spokesman for the States transportation industry. It must be emphasized, however, that the position we present is not that of NDTA but rather is a consensus taken from civilian and military transportation members. The modes we represent include: Trucking, air, water, rail, and pipeline. Additionally we have solicited the input of the newly formed citizens for the management of Alaska's lands (CMAL). CMAL is a coalition of labor, miners, contractors, truckers, foresters, and native regional corporations among others. They represent probably the best readily available source of information on d(2) lands and their potential use.

Transportation is one of the most critical and sensitive functions we must deal with in the State. Nationally, transportation accounts for 20 percent of the gross national product. One in every five dollars spent for goods and service goes into the movement of commodities and people. The problem with transportation we face in Alaska, however, can not be measured in a simple dollar and cents context. Nor can those services be compared to contracting or merchandising of the goods carried. In the lower 48, if there is a strike against a railroad one can usually opt to ship his product by road. In Alaska the redundance of a second mode is almost a luxury (big mountain story). In this State a shipper has to do it right the first time or often not at all.

When I was approached to make this presentation I scrambled around through various documents from the North Report initiated at the direction of Governor Miller, through military studies to the BLM Multimodal Transportation Utility Corridor System in Alaska study. It was in this last document that I found probably the most definitive work on transportation which has been written in the state. It is thorough, comprehensive and extremely well documented. Our initial intent was to define potential corridors. After examining the BLM study we discarded this idea. With the time available and without a full time staff we probably could not improve on, or for that matter, really offer constructive criticism of the 40 corridors identified. Secondly any such duplication of effort would simply reinvent the wheel. Our primary objection to this approach, however, is not a matter of technique but rather of intent.

Establishing corridors as a first step to planning is simply putting cart before horse. The BLM study does not define areas of service beyond their potentiality. The premise employed, and it is a good one, is that if the State or Federal Government wants to get a particular area—this is how you have to do it. It should be emphasized at this juncture both from the point of view of this presentation and the BLM study that surface transportation systems are being considered solely. d(2) land decisions are not going to impact heavily on air corridors. Additionally, that cargo which is air worthy is not the cargo which supports or supplies the renewable or non-renewable assets which make Alaska unique in the United States.

We then considered the possibility of attacking the problem by mode—using a mode by mode view of potential transportation problems or applications. This too was discarded for basically the same reasons applying to the BLM study—too specific and too limiting. Moving people and expansion of existing social systems as a rationale was dismissed for a totally different reason. If resource areas are accommodated workers and support personnel must be provided for. One cannot go without the other.

Since we are a quasi-military group the military facet of our position must be dealt with. Regardless of the threat, your military machine needs to know what to protect before it can plan that protection.

Last, as a guiding premise, corridors, however defined, must be precise. To say simply that corridors will be made available begs the simple question of "where", more forceably "why" or probably more pragmatically "why me." This sort of problem need not be. Early definition of corridors will eliminate many, many problems down stream.

Our position base derives from the broader position of location of resources including but not limited to:

- 1. Minerals, including coal.
- 2. Forest lands.
- 3. Recreation and wildlife lands.
- 4. Petroleum.
- 5. Agriculture.

Positions on the matter of utilization of Alaska's lands range from unlimited exploitation to nearly total blockage of access to resources through the imposition of single purpose recreation lands. The organizations represented by the NDTA take a middle of the road position. We desire neither extreme. Rather we espouse a position which ensures that the following objectives are adhered to:

- 1. Ensure optimum usage.
- 2. Impose multipurpose development where needed.
- Allow for military access to those resource areas designated as critical or of economic importance.
- 4. Avoid those areas which have been determined to be single purpose usage for human or wildlife reasons.

Alaska is a significant source of minerals of critical importance to the nation. Among them are chromium (91 percent imported), tin (75 percent imported) and nickel (71 percent imported). Timber is another resource of considerable value to the United States roughly 106 million acres of the state is forested, 21 percent of this has been designated as having economic commercial potential. The potential of Alaska's interior forests compare favorably with lake states. For example stands in Minnesota average 5774 ft. 3/acre—interior Alaska everages 634 ft. 3/acre. The total new saw timber volume in interior Alaska is estimated to be 31 mm board feet. Of this 73 percent is in commercially viable stands. This is of course a renewable resource.

Our petroleum resources both liquid and gas have, of course been the subject of enough press and personal exposure to warrant a simple statement that the resources are very significant. The potential for other energy minerals including uranium is here. Unfortunately, the resource must be discussed in terms of potentiality not proven reserves. If one examines the Canadian and Soviet finds on either side of us and realizes that Alaska has the same geological make up it is a reasonable assumption that we too have those minerals in sufficient quantities to make them an economically feasible resource. Coal, on the other hand, is a proven resource. The coal in the Cook Inlet area alone could satisfy the nation's requirements for years. Agriculture in Alaska has a much greater potential than is usually recognized even in the State itself. The Tanana and Yukon flats areas alone offer high potential for specialized crops including barley which could bring revenue into the state.

Consideration should be given to recreation, subsistence and wildlife areas. Those areas which are critical to the States wildlife or which have unique scenic value must be preserved for all of us and our children. One of the considerations which often is not applied in looking at the ecological impacts which are the heart of most of the wildlife and recreational concerns is that people are one part of the ecological equation. Transportation corridors must be defined to allow citizens of average means to have access to those lands. Very large recreational blocks of land simply mean that either an airplane

or significant amounts of time are required to ensure enjoyment of the facilities.

None of this so far has posed any firm solution to the identification of specific areas or corridors. We are not going to try to lay out specific geographical boundaries but rather suggest that specific rules be applied to the definitions of included and excluded areas.

We are in favor of eliminating proven resource areas from d(2) land choice lize either the appropriate BLM corridor definitions or extensions to them to insure access. Where there is a potential for crit-ical or economically feasible resource let that land and the appropriate corridor be defined for multiple use until evaluation is made. At that time if there is no significant resource identified delete the corridor. If a resource area is determined to be worthy of exploitation then evaluate that particular problem for multiuse. This process should be repeated for each resource present. This of course would include the recreational and wildlife resources as well. Where critical wildlife zones are identified, however, there should be no corridors specified since there is no particular need for large scale access.

Where corridors are defined one last caveat must be observed. The corridors should be part of the continuous transportation system and although we do not advocate any modal designations for particular corridors the dimensions specified should be extensive enough to allow the planners sufficient flexibility to design the appropriate mode for the job required. We submit that the corridor criteria in the BLM study would be sufficient for planning purposes.

The approach I have just described, un-fortunately does not deal with certain of the political problems of land use planning. I am thinking in particular of the recreational/wildlife versus renewable or nonrenewable resources. How one prioritizes a ptarmigan breeding area against a chro-mium ore deposit presents a very difficult cost benefit problem. One approach might be to use the benefit-detriment analysis or something like it which I have provided to you. This was prepared for analysis of mining interests but it could be modified for almost any resource analysis. As far as transportation corridor analysis goes—we feel that the option should be left open to cross the wildlife lands through designation of potential corridors. Failing this there should be a well defined process to obtain corridors if needed at a later date.

For a moment I would like to depart from the commercial problems and talk about the military side of things. I see from the agenda you have published that General Boswell has made a statement. Since I have not seen it I cannot comment on it.

Our greatest potential threat in Alaska is, obviously, our next door neighbor to the West. His forces are highly mobile and highly mechanized. They are capable of operating in all terrains. What has been developed is essentially a distant successor to the German Panzer Divisions of World War II. Whatever forces we might have to put in the field will have to have a surface transportation capability (Jack Frost story).

If it becomes necessary to provide military support to Pet 4, Prudhoe Bay or the Seward Peninsula, for instance, there have to be transportation resources to get them there and to provide the necessary logistics support. Air transportation is simply not going

to do the trick alone.

We consider that transportation has a great deal of significance in the d(2) problem as well as the more general problems of daily living in Alaska. Transportation corridors impact on the military, development area alternatives, and recreation access. The costs for staples to support life are obvicusly influenced in part by the cost of moving them into the state. Before the required transpor-

tation planning can be made, however, support areas have to be identified and tradeoffs dealt with. We suggest that a reading of public policy in part defined by these meetings you are having will determine the d(2) problem.

We hope our input will help and again thank you for the opportunity to speak. I will be followed by Mr. Coghill from the

Alaska Railroad.

TRANSPORTATION CORRIDORS ACROSS D-2 LANDS-RAILROAD

Introduction. I am speaking today as a member of the National Defense Transportation Association. Having known each of you, I am sure you are aware that I am a lifetime legal resident of Alaska and am presently the Plans Officer of The Alaska Railroad. My family had an early association with transportation in this great State as my father President Harding drove the golden spike at Nenana, marking completion of The Alaska Railroad, and lived at Nenana until attending the University of Alaska in the early 40's.

Overview. I endorse Mr. Benediktsson's transportation position and wish to support it by centering my remarks on the railroad mode related to one specific corridor. For the purposes of this presentation, I have selected a general transportation corridor familiar to all of you-a North-South central corridor extending from the existing railbelt in the interior to the North Slope or Prudhoe Bay with a branch corridor to the Kobuk-Bornite area.

Discussion. First, why a transportation corridor to the North Slope and Northwest regions of Alaska? While I believe the need is obvious, let me note some reasons I believe are important:

Transportation is not adequate now for anticipated future needs. When the total need probabilities are considered, the magnitude is enormous.

A corridor will permit intelligent exploraiton and development of northern Alaska's rich natural resources. It will also provide access to secondary resources and the movement of people and goods.

There is now, and will be in the future on an increasing basis, a need to serve the oil and gas community. Also, the Kobuk region constitutes the largest section in the U.S. without surface transportation, and we already know it has extensive copper, lead, zinc and other mineral deposits.

A transportation corridor is required if Alaska is ever going to become competitive

in world markets.

The nation's national energy policy is moving towards the greater use of low sulfur coal. The coal reserves in northern Alaska may be as large as three trillion tons, which exceeds the total reserve in the Lower 48.

A corridor will provide a means to move the State's royalty gas. Of course, this is true whichever gas route is selected, but would be especially significant if Arctic Gas is selected.

Assuming a need for a transportation corridor to this region, let me review the rail-road mode, first relating some general in-herent qualities of this mode and then addressing specific conditions applying to the North and Northwest corridor.

General inherent advantages of rail include:

Energy efficiency. It is a fact that railroads are the most energy-efficient mode for overland transportation. The nation's railroads move 37 percent of the total freight ton miles, yet use only 13 percent of the total fuel used by all transportation modes. Railroads haul four times as much tonnage as trucks with only one-fourth as much fuel. Thus, railroads provide a positive focus on the nation's need to conserve and use wisely our dwindling supply of energy reserves.

Economic. Railroads are the most economical for freight, especially heavy and bulky commodities. In 1975 they handled 761 bil lion ton miles of freight which is greater than trucks, water carriers and air combined.

Environmental. Railroads can minimize the impact on the environment-an important factor in Alaska. Air pollution is also minimal as railroads cause one-sixth as much pollution as trucks carrying an equivalent amount of tonnage. Because railroads are essentially self-contained, there is no significant requirement for restaurants, filling stations, rest facilities, etc., as is the case for highways.

Multi-functional. A special advantage is the multi-functional accommodation to commodities such as petroleum, coal, minerals and people. Also, they have a piggyback capability such as trailers on flat

(TOFC)

Dependability. Railroads are an all-weather, year-round mode with a good record for safety.

Subsidy. There is less impact on the taxpayers since railroads are not subsidized in the manner that trucks, water and air carriers are subsidized.

National defense. Railroads have played a significant, strategic role for national de-

These are general issues that apply when considering a railroad mode. What about concrete issues relating to the North and Northwest corridor? I will cover some of the

stronger points.

Move North Slope gas liquids. When oil flows, Prudhoe Bay will initially produce associated gas liquids equivalent to 55 railroad cars, holding 30,000 gallons each, per day. Total gas liquids are estimated at 1¼ billion barrels of \$19 billion value. It is impractical to transport these gas liquids by pipeline, and it would require 167 trucks of 10,000 gallon capacity per day or one every 8½ minutes. A railroad is the most logical, effective and efficient way to move these oil liquids. Comparing the \$18 billion product value to \$2 billion cost of a railroad means a railroad would be justified on this one product alone. It is assumed our country will not permit the 'burning off" of this product at the well sites.

Cost savings. As an example, a railroad would have had a real cost savings impact on the trans-Alaska pipeline construction if one had been built to Prudhoe. The Alaska Railroad cost to move a ton 470 miles from Seward to Fairbanks is \$33 per ton, but to move it the like distance to Prudhoe from Fairbanks costs \$145 per ton by truck and about \$250 per ton by air. Had there been a railroad to Prudhoe Bay, millions of dollars would have been saved for the aborted barge freight in 1975: and if all freight is considered hundreds of millions in freight costs would have been avoided. A rail line would still benefit the TAPS line but will certainly have a drastic cost reduction impact on future lines. Also, reduced construction costs will increase well-head profit resulting in greater State royalty income. Dr. Bill Darsch, Alyeska's president, stated last week that a spade that sells for \$6 in Anchorage is worth \$10 on the North Slope because of freight costs.

Access versus environmental and other interests. A railroad provides the best mode to balance the needs of the State, of business and of the citizens to open the country while controlling access and insuring greater environmental protection. Native corporations will want to develop natural resources, yet they indicate strong support for the limited access a railroad provides

Minimizes freight handling. A rail car can move from any point on this extension to any location served by rail in the Lower 48 or vice versa without transferring the contents.

Moving resources. A railroad is the ideal

mode, especially with unit trains, for moving the heavy bulk coal and mineral commodities that exist in this region.

Cold region. This cold region can best be served by a railroad with savings to all concerned. It overcomes seasonal restrictions such as load limits imposed on highways.

Summary. While addressing the case for a railroad to the North and Northwest, the fundamental concern is that this region is an essential area which should not be denied transportation access either through a designated multi-modal transportation corridor now or a defined future process that makes one possible.

WHALEN PAY RAISE DEFERRAL PROPOSAL ADOPTED BY PANEL

The SPEAKER. Under a previous order of the House, the gentleman from Ohio (Mr. WHALEN) is recognized for 5 min-

Mr. WHALEN. Mr. Speaker, I am pleased to note that the members of the Ad Hoc Subcommittee on Presidential Recommendations, which was formed to hold hearings on the Quadrennial Commission-proposed increases in congressional and other salaries, have introduced a bill that incorporates the key features of the Congressional Pay Raise Deferral Act, H.R. 1365.

As you will recall, I introduced H.R. 1365 on the first day of this Congress, together with chief cosponsors NED PATTI-SON, DON PEASE, and NEWTON STEERS. We now have a total of 94 cosponsors on our bill

The primary feature of the Congressional Pay Raise Deferral Act is that it would defer any increase in congressional salary until the start of the Congress following the one in which it is approved. Thus, all Representatives and one-third of the Senators would be required to stand for election before they could benefit from any salary increase.

When the ad hoc subcommittee met in February, I appeared as the leadoff congressional witness. I understand that approximately 30 other Members also urged the panel to consider favorably the Whalen proposal for congressional pay raise deferral.

In its report, which was issued on March 17, the subcommittee said, in

The subcommittee agrees that pay adjustments for Members should be deferred until the Congress next following that in which they are considered. Such a practice would lessen the inherent and inescapable conflict of interest charges which Congress faces with respect to establishing its own rate of pay.

The subcommittee report also endorsed second key element of H.R. 1365, namely that while legislative salaries are delayed until the next Congress, executive and judicial branch increases are not deferred. This particular provision, however, is not specifically mentioned in the summary of the subcommittee bill, placed in the Extensions of Remarks section of the March 31 Congressional Rec-ORD. I shall seek further clarification from the ad hoc subcommittee regarding this matter.

I am pleased that the Ford subcommittee has come to the same conclusion as those of us who originally sponsored the Congressional Pay Raise Deferral Act;

namely, that there is an inherent conflict of interest when Members of Congress vote on their own salaries. I am hopeful that, with the added support of the ad hoc subcommittee, we soon will see substantive action taken on this legislation.

At this point in the Record, Mr. Speaker, I would like to insert a list of the 94 cosponsors of the Congressional Pay Raise Deferral Act. The names are arranged by State, with an asterisk appearing next to those 37 States whose constitutions prohibit State legislators from raising their own salaries:

LIST OF COSPONSORS
*CALIFORNIA

Clair Burgener, Robert Dornan, Mark Hannaford, William Ketchum, Robert Lagomarsino, George Miller, Norman Mineta.

*COLORADO

Timothy Wirth.

CONNECTICUT

Toby Moffett, Ronald Sarasin.

FLORIDA

Skip Bafalis, Richard Kelly, William Lehman, Bill Young.

*GEORGIA

Elliott Levitas, Dawson Mathis.

GUAM

Antonio Won Pat.

*ILLINOIS

Robert McClory.

*INDIANA

Floyd Fithian, Elwood Hillis, Philip Sharp.

Berkley Bedell, Michael Blouin, Tom Har-kin.

KANSAS

Dan Glickman, Martha Keys.

*KENTUCKY

Romano Mazzoli.

LOUISIANA

John Breaux.

*MAINE

William Cohen, David Emery.

*MARYLAND

Marjorie Holt, Newton Steers.

MASSACHUSETTS

Silvio Conte, Robert Drinan, Edward Markey, Paul Tsongas.

MICHIGAN

Bob Carr, Dale Kildee, Albert Quie, Harold Sawyer.

*MINNESOTA

Donald Fraser, Bill Frenzel.

*MISSISSIPPI

Trent Lott, Sonny Montgomery.

NEBRASKA

John Cavanaugh, Virginia Smith, Charles Thone.

*NEVADA

Jim Santini.

*NEW HAMPSHIRE

James Cleveland, Norman D'Amours.

*NEW JERSEY

Millicent Fenwick, William Hughes, Andrew Maguire, Helen Meyner, Robert Roe.
*New YORK

Barber Conable, Hamilton Fish, Stanley Lundine, Robert McEwen, Leo Zeferetti, Richard Ottinger, Ned Pattison, Frederick Richmond, James Scheuer.

*NORTH CAROLINA

James Martin, Stephen Neal, Charles Whitley.

*оню

Clarence Brown, Willis Gradison, Tennyson

Guyer, Thomas Kindness, Clarence Miller, Ronald Mottl, Donald Pease, Ralph Regula, William Stanton, Charles Whalen.

OREGON

Robert Duncan.

*PENNSYLVANIA

Robert Edgar, William Goodling, Robert Walker.

*SOUTH CAROLINA

John Jenrette, Floyd Spence.

*TENNESSEE

John Duncan, Marilyn Lloyd.

*TEXAS

James Collins.

*UTAH

Dan Mariott.

James Jeffords

*VIRGINIA

Joseph Fischer.

WISCONSIN

Robert Cornell, Robert Kastenmeier, Henry Reuss, William Steiger.

*WYOMING

Teno Roncalio.

REFORMING TAX REFORM

The SPEAKER. Under a previous order of the House, the gentleman from Connecticut (Mr. McKinney) is recognized for 5 minutes.

Mr. McKINNEY. Mr. Speaker, for those of us who recognized the inevitable unfairness of retroactively repealing the sick pay and disability exclusion, today's vote is an unhappy "I told you so." What appears as a sound tax bill when read in the cold, unintelligible language of the tax code, too often translates into hardship and undue burden for many middle-income taxpayers trying to make ends meet. That was the case last year when this House endorsed so-called tax reform legislation which good cause but through heavyhanded means eliminated the exclusion for sick pay. Like me, many voted for the bill because it extended basic tax cuts which protected the shrinking buying power of millions of hard-pressed citizens. However, that "tax reform" was accomplished at the expense of those who could least afford it-those who had already been disabled or received sick pay in lieu of wages and had withheld or estimated their tax liability on the basis of existing law. When we finally finished not reforming the Internal Revenue Code in October of 1976, it was those same people—not the rich, loophole finders—who found themselves with an unexpected tax bill often reaching hundreds of dollars.

When viewed in this light, the issue we face today is not just tax adjustment but fundamental fairness, a concept all but stifled by the code's relentless complexity. Taxpayers whose livelihood was already threatened by illness and disability and who planned through 1976 to soften the blow by excluding sick pay benefits were abruptly informed last October that "tax reform" required them to pay tax on that substitute income. Mr. Speaker, retroactive taxation is a concept I cannot endorse, but when it is applied to the sick and disabled, it be-

comes a bizarre distortion of equitable taxation.

Much time has been spent here debating the proper means to stimulate the economy and thereby reduce the inherent tax of inflation on the poor and not-so-rich taxpayer. In my view, we have in this bill an excellent opportunity to build citizen confidence in both our economic and political systems. Unlike the poorly aimed and misdirected spending and rebate proposals we have seen to date, this bill provides a one-time, immediate, and just rebate to a segment of the population we know is in need.

Finally, I was appalled to learn of IRS and Department of Treasury opposition to this bill solely on the basis of administrative difficulty. Since tax returns are already filed eliminating the sick pay exclusion, amended returns would be required from the estimated 1 million beneficiaries of this delayed implementation. The size of that constituency should only convince us, and them, that retroactive taxation and penalty levied on the sick and disabled is an unfair revenue device and no effort should be spared to reform that reform. The projected \$327 million loss is revenue to which we have no just claim and the \$6 million IRS administrative cost to refund the tax is the price we must be willing to pay if fairness is to be more than a forgotten tax concept.

Mr. Speaker, when those who were hurt by the elimination of the sick pay exclusion wrote to me last year seeking a single year's delay in the repeal, I was at a loss to promise results but expressed my hope that the situation could be corrected. Today, I urge my colleagues to fulfill that hope and allow me to respond to those taxpayers, "I told you so."

HENRY COUNTY FARM BUREAU VISITS LOCK AND DAM 26, ALTON. ILL.

The SPEAKER. Under a previous order of the House, the gentleman from Illinois (Mr. Railsback) is recognized for 5 minutes.

Mr. RAILSBACK. Mr. Speaker, on March 14, the Henry County Farm Bureau, Illinois, marketing committee sponsored a bus trip to Alton, Ill., the site of lock and dam 26. This group included Lowell Bjorling, president; Dick Anderson, vice president; George Larson, marketing chairman; and Carl H. Carlson, legislative coordinator on locks and dam 26. Weir Brokaw, president of the Mercer County Farm Bureau, along with Chuck Hallam, farm editor of the Rock Island Argus; Mary Roesner, farm editor of the Moline Dispatch; and Max Molleston, reporter for WHBF TV and Radio, as well as 32 members of the sponsoring organization. The group called me at my office in Washington from their onsite inspection, and, if I may, I would like to share some of their comments with you:

This is a vital issue to the economy of midwestern agriculture, for shipping our grain down the Mississippi as well as our supplies up River.

On a quiet normal day such as today, there was a 12 hour wait to lock through.

Even when your turn does come, it takes to 2 hours at its best by having to split the tow. This as we look at it, is a very ancient method

Lock 26 is a bottleneck carrying the largest load on the Mississippi because of its location below the confluence of the Mississippi and the Illinois Rivers.

Building a new lock and dam down river will never interfere with river travel.

To repair, will take 3 years and the lock

and dam would have to be closed.

The \$390 million spent (to rebuild) will all stay in this country. Visualize the man hours it will create directly and indirectly.

There will be plenty of business for both

the railroads, and the barges.

We feel it is the most important issue at stake to the midwestern part of the country.

Four days after the Henry County Farm Bureau visit to Alton, Harvey D. Carlson, president, Henry County Livestock Feeders Association, wrote a letter to me which stated in part:

This week I inspected Locks and Dam 26 at Alton, Illinois. I cannot impress upon you strongly enough the importance of moving swiftly to replace this structure. I also favor an amendment to pending legislation calling for a 600 foot lock in addition to the

proposed 1200 foot lock.

I am sure you are well aware of the deteriorating condition of the present structure and the long delays in traffic moving through the locks. What I think must be considered is the fact that even if pending legislation were to be passed immediately calling for the replacement of the present structure, it would be nearly a decade before the new lock and dam would be completed. If river traffic increases at the rate of even con-servative estimates, the new lock would be operating at or nearly at full capacity immediately.

It is my understanding there is much discussion on user fees. We midwest farmers aren't looking for a handout on this or any other program. We rely so heavily on efficient transportation for the exportation of grain and the supply of fuel and fertilizer that we must insist on a first class transportation system. To this end, we urge the implemen-

tation of user fees.

LEGISLATION TO BAN STEEL-JAW TRAPS

The SPEAKER. Under a previous order of the House, the gentleman from California (Mr. Van Deerlin) is recognized for 5 minutes.

Mr. VAN DEERLIN. Mr. Speaker, I am cosponsoring with Congressman Long of Maryland a bill to ban steel-jaw traps. These traps cause a great deal of suffering to animals, and I question the use of them from several points of view.

Chairing the House Communications Subcommittee brings me into contact with a lot of people who are concerned about what we are showing our children in our own homes. They worry, for example, that there is too much violence on television. I am sympathetic to that concern. Perhaps, as parents, we are less concerned than we should be about the kinds and degrees of violence that our children see. Perhaps we should be making a greater effort to demonstrate for our children a respect for living things.

Steel-jaw traps are used by trappers. many of them young people. Some States pay a bounty for what are considered undesirable animals. Additional animals are trapped for the sale of desired fur pelts. The victims sometimes include household pets or endangered species.

The steel-jaw trap works by pinning the leg of an animal between two steel Typically, the animal struggles against this restraint. Often there is a long slow death by exposure or starvation. Some animals are known actually to try chewing off the caught leg. A trapper finding a half dead animal usually mercifully clubs the struggling creature.

A child observing such incidents might come to accept them as routine, and why not? They are sanctioned by most State

fish and game departments.

I wonder if all this may be analogous to television violence, whereby young people are inured to violence, accepting it as normal.

Some will argue that violence is a normal part of nature. But predators do not take several days to kill their prey.

Many other countries have banned the steel-jaw trap. Other devices are available which are more discriminate, and more humane.

Let us lose no more time in putting the United States on the right side of this issue

THE BAN ON SACCHARIN

The SPEAKER. Under a previous order of the House, the gentleman from Alabama (Mr. Nichols) is recognized for 5 minutes.

Mr. NICHOLS. Mr. Speaker, in 1959 the Congress amended the Food, Drug, and Cosmetic Act of 1939 to include a clause offered by Congressman Delaney of New York. The amendment requires that food additives be approved and regulated by the Food and Drug Administration and "that no additives shall be deemed to be safe if it is found to induce cancer when ingested by man or animal * * *" There are no if's, and's or but's about the regulation; the law is absolute.

So when some Canadian scientists found that laboratory rats developed cancer when force-fed large amounts of a sugar substitute called saccharin, the FDA had no choice but to announce plans to ban the sale of this popular artificial sweetener.

For more than 70 years saccharin has been used as a sugar substitute with no known adverse effects. In 1970, when the FDA banned the sale of another sugar cyclamate, substitute. saccharin achieved universal use. The 1970 ban left saccharin as our only known source for artificial sweeteners.

To millions of Americans who are diabetic, who suffer from heart conditions, hypertension or who are overweight and depend on saccharin to control their diets, the announced ban on this artificial sweetener was a bitter pill to swal-

I suspect that if the laboratory studies had been reasonable the announced ban would have been accepted, but some very reputable organizations have shown that absurd amounts of saccharin were needed to cause cancer in the laboratory rats. Most estimates I have seen show that a human would have to consume 800 12ounce cans of diet soda a day, for life, to match the amounts of saccharin which was force-fed the rats.

Certainly no one wants to allow a cancer-causing substance on the market if reasonable and realistic tests demonstrate possible health hazards. The Delaney rule, however, does not allow for rationality but only looks at the bottom

I question the wisdom of this and I have cosponsored legislation which will set up a procedure whereby the FDA Secretary will have a select panel to evaluate a substance on a public health benefit risk basis. I believe Congress should allow commonsense to play a role in Federal regulation of food additives so as to reduce the chance of unjust, unreasonable, and unwanted intervention as in the case of the proposed saccharin

HUMAN RIGHTS AMENDMENTS TO THE INTERNATIONAL DEVELOP-MENT INSTITUTIONS BILL—H.R.

The SPEAKER. Under a previous order of the House, the gentleman from New York (Mr. Badillo) is recognized for 15 minutes.

Mr. BADILLO. Mr. Speaker. Wednesday, we expect that H.R. 5262, a bill authorizing increased participation by the United States in the International Bank for Reconstruction and Development-the World Bank, the International Development Association-IDA, the International Finance Corporation-IFC, the Asian Development Bank and the Asian Development Fund, will come before this body. I think that this is an important bill, for it authorizes us to pursue more effectively the most successful programs of aid to developing countries that we are now engaged in.

However, there is one part of the bill that is very disturbing to me, and that is title V, which contains human rights language. That language states:

The United States Government, in connection with its voice and vote . . . shall advance the cause of human rights, including by seeking to channel assistance toward countries other than those whose govern-ments engage in a consistent pattern of gross violation of internationally recognized hu-man rights, such as torture or cruel, inhumane or degrading treatment or punishment.

That language is fine, for it marks a positive step toward assisting those countries that are making an effort to respect the dignity and freedom of their citizens. However, it is not enough, particularly at a time when the President has articulated so strongly our national commitment to human rights.

Last year, as many of my colleagues know, we passed a human rights amendment introduced by my distinguished colleague, Tom HARKIN, to authorization legislation governing our participation in the Inter-American Development Bank and the African Development Fund. That amendment states that the U.S. representatives to those institutions must vote no to any loan or extension of aid to any country that is in violation of

the human rights of their citizens, unless that aid goes directly to help the needy

people of that country.

The Harkin amendment language, coupled with the new legislation, provide an ideal complement to one another. For it gives our representatives to the banks the opportunity to help those countries that are respecting the rights of their citizens, coupled with the power to express our disapproval of those who do not.

However, not only does the Harkin language not appear in the bill that is coming to the floor on Wednesday, but there is also a provision in the bill to strike that language from the IADB and AdDF law. Therefore, I shall be offering amendments that are, I feel, absolutely necessary in order to correct what I see as a step backward in our international human rights posture.

The first amendment I shall offer to H.R. 5262, amends title V by adding a new subsection (b) that reads:

In addition, the United States government, in connection with its voice and vote in the institutions listed in subsection (a) is authorized and directed to vote against any loan, any extension of financial assistance or any technical assistance to any country which engages in a consistent pattern of gross violations of internationally recognized human rights, including torture or cruel, inhumane or degrading treatment punishment, prolonged detention without charges, or other flagrant denial of the right to life, liberty, and the security of person, and including providing refuge to individuals committing acts of international terrorism such as hijacking of an aircraft. unless such assistance is directed specifically to programs which serve the basic human needs of such country.

The second amendment I shall offer is to strike subsection (e) of title V of H.R. 5262. This is the section of the bill that removes the "Harkin amendment" from IADB and AfDF law.

And finally, because I feel that when all is said and done, the question of how, in determining what countries shall receive aid and which shall not, we define "basic human needs" and "human rights" will be a matter of controversy and conjecture, I shall offer an amendment that will instruct the Secretary of State and the Secretary of the Treasury to initiate international discussions to establish viable standards for human needs and human rights. For it is only when we have internationalized what are now individual national criteria that we will begin to have a sound foundation for the increasingly important multilateral institutions.

My amendment states:

New Title V, Section 502

(a) The Secretary of State and the Secretary of the Treasury shall initiate a wide consultation, starting with the industrialized democracies, designed to develop a viable standard for the meeting of basic human needs and the protection of human rights, and a mechanism for acting together to insure that the rewards of international economic cooperation are especially available to those who subscribe to such standards are seen to be moving toward making them effective in their own systems of governance.

(b) No later than one year from the en-

actment of this Act, the President shall report to the Congress on the progress made by the Secretary of State and the Secretary of the Treasury in carrying out the above section.

These three amendments, coupled with the language already in the bill, will create a new standard that can serve as a model for all our foreign assistance in the coming years. I hope that all my colleagues, Republican and Democrat, liberal and conservative, will see the justice of this strong language and will join me in supporting it.

PERSONAL EXPLANATION

The SPEAKER. Under a previous order of the House, the gentleman from Illinois (Mr. Fary) is recognized for 5 minutes.

Mr. FARY. Mr. Speaker, on Monday, April 4, I was away on official business at the request of my chairman of the Committee on Public Works and Transportation. Had I been present I would have voted in the following fashion:

H.R. 5027, veterans medical service, "yea."

H.R. 3695, State grants for veterans home facilities, "yea."

NINTH ANNIVERSITY OF THE AS-SASSINATION OF THE REV. DR. MARTIN LUTHER KING, JR.

The SPEAKER. Under a previous order of the House, the gentlewoman from Illinois (Mrs. Collins) is recognized for 5 minutes.

Mrs. COLLINS of Illinois. Mr. Speaker, I wish to take this time to commemorate the death of one of America's great leaders for the cause of human rights and global solidarity, The Rev. Dr. Martin Luther King, Jr., who was felled by an assassin's bullet on April 4, 9 years ago.

The debt that all people, especially of our country, owe Dr. King can best be paid by steadfast adherance to the high principles that he lived and ultimately died for. To this end, I feel a combination of grief and joy as I reminisce about my friend Martin. The grief and joy I feel is based upon the untimely loss of this consummate man combined with the hope for salvation that he left for all to remember. Permit me to share with you the parting words of the last speech of Dr. Martin Luther King, Jr., delivered April 3, 1968:

We've got some difficult days ahead. But it doesn't matter with me now. Because I've been to the mountain top. And I don't mind. Like anybody, I would like to live a long life. Longevity has its place. But I'm not concerned about that now. I just want to do God's will. And He's allowed me to go up to the mountain. And I've looked over. And I've seen the promised land. I may not get there with you. But I want you to know tonight, that we, as a people will get to the promised land. And I'm happy tonight. I'm not worried about anything. I'm not fearing any man. Mine eyes have seen the glory of the coming of the Lord.

The following day, Dr. King was killed. May God rest his soul and lead us onward to complete his mission.

LITHUANIAN INDEPENDENCE DAY

(Mr. HANLEY asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. HANLEY. Mr. Speaker, February 16, 1967, was the day on which the Lithuanians throughout the world observed the 59th anniversary of the Declaration of Independence of Lithuania. On that date in 1918, the Republic of Lithuania was created, and declared its independence from the Russian Empire. On this occasion I am proud to join with all Americans of Lithuanian descent to commemorate this anniversary.

Over 1 million people of Lithuanian ancestry live in the United States. Many of them left their native land when it was occupied by Soviet troops and came to the United States. Thousands fled to other countries and many more were interned in Siberian prison camps.

In the 22 years of its independence, Lithuania, though a small nation, made great progress in reestablishing its national identity, its culture, and its society. Agriculture and industry also grew. However, this freedom was short lived, ended by the 1940 invasion of the Soviet troops.

Today, despite the fact that on modern maps Lithuania is shown as being part of the territory of the Soviet Union, the U.S. Government has maintained a policy of nonrecognition of this forcible seizure of Lithuania and her neighbors. Indeed, both the President and the Congress declared in no uncertain terms that agreement with the Helsinki Accords in no way constitutes a shift in our nonrecognition policy on Lithuania.

The Lithuania struggle continues to this day. Partisans of freedom and Lithuanian human rights continue their struggles. It is only fitting to pay tribute to their efforts and to the thousands of descendents and relatives that now grace this country with their work and their culture.

TRIBUTE TO M. SGT. WILLIAM D. BRIDGE, JR.

(Mr. HANLEY asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Before being forced to retire at the beginning of this year due to his age, 62, Sergeant Bridge served a long and distinguished career in the U.S. Armed Forces. His military career began in 1931, when he walked 115 miles from Portland, Maine, to the Boston Naval Yard to join the U.S. Marine Corps. The hike took 30 hours, and it was done on a dare.

After a tour in the Marine Corps and some schooling, Sergeant Bridge joined the U.S. Army Air Corps as an aviation cadet in 1942. Because of a severe accident, his aviation career ended, but he remained on active duty until 1945.

Sergeant Bridge then joined the 8312th

Recovery Group, Providence, R.I., as a reservist. When that unit disbanded in the early 1960's, he transferred into the 9223d and then the 9175th Air Reserve Squadron.

In the spring of 1972, the 59th Aerial Port Squadron was formed at Westover Air Force Base, Mass., and Sergeant Bridge joined as its first first sergeant. There he was an inspirational leader, who was loved and respected by all those with whom he worked and commanded.

Even after his retirement, Sergeant Bridge, at his own expense and on his own time, spent many hours away from his home, painting and cleaning up Hangar 9 at Westover Air Force Base in preparation for a MAC IG inspection which was coming up. He even brought his wife on numerous occasions to help him. The 59th APS, because of his efforts and dedication, received a score of excellent on the inspection.

It is with great pride that I ask this Congress to recognize the outstanding career of an outstanding man, William D. Bridge.

ON THE DEATH OF IRVING "PAT" SPIEGEL

(Mr. KOCH asked and was given permission to extend his remarks at this point in the RECORD and to include extrapeous matter.)

Mr. KOCH. Mr. Speaker, Irving Spiegel known by everyone as Pat died on March 31, and his funeral services are being conducted today in the Riverside Chapel in New York City. Everyone in politics knew Pat—he was everywhere. He was good humored; he was incisive; he was a superb reporter; and most of all, he was what Jew and non-Jew alike would refer to as a "mensch."

The obituary, which appeared in today's New York Times, conveys the feelings of those of us who had any kind of association with him. He will be sorely missed. He was a friend.

The obituary follows:

IRVING SPIEGEL OF THE TIMES DIES; EXPERT ON JEWISH AFFAIRS WAS 69

(By Murray Schumach)

Irving Spiegel, for more than 30 years the New York Times expert on Jewish affairs and, for many years before that, a generalassignment and police reporter, died yesterday of heart failure at Albert Einstein Hospital. He was 69 years old.

The senior reporter on the Times—he joined the newspaper as a copy boy in 1925—Mr. Spiegel's furious energy and irrepressible humor became famous in city rooms

throughout the country.

"A one-man crowd," his colleagues called him. Chunky, with piercing blue eyes and close-cropped curly hair, he was a superb mime who convulsed friends with anecdotes or with free translations of Shakespeare into Yiddish.

At social gatherings, he would raise his tenor voice in Irish song or, in a more solemn mood, would sit at the piano and play Chopin—until he suddenly broke away, snatched up a scratch sheet and went looking for horses to bet on the next day. He applied a credo of lese majesté to himself as well as to others.

REFUSED TO BOW TO ILLNESS

On a story, however, he was a fanatic. Even in recent weeks, when illness confined him to his apartment, at 11-20 73d Road in Forest Hills, Queens, he refused to give up his search for news. He spurned pleas by his wife, Vera, and instead, he bent over phone and typewriter, gathering and writing articles for the Times.

A few weeks ago, after Hanafi Moslem gunmen released more than a hundred hostages from B'nai B'rith headquarters in Washington, Mr. Spiegel, although he could scarcely walk across the living room with a cane, somehow got on a plane, flew to Washington and filed a story.

On his 50th anniversary at The Times,

On his 50th anniversary at The Times, Jewish organizations all over the country set up award ceremonies for Mr. Spiegel and sometimes had to put up with gibes

from their guest of honor.

Although Mr. Spiegel spent most of his reporting years covering stories about Jewish organizations and events—sometimes in Israel—he preferred to recall his work on police, feature and general stories, for which he won several publisher's awards at The Times.

FLATTERY AND CAJOLERY

He earned one of the prizes in 1959. While Mr. Spiegel was attending a meeting of the Union of American Hebrew Congregations in Miami Beach, The Times' national editor told him that a plane with 42 persons had crashed into the Gulf of Mexico.

Somehow—Mr. Spiegel on the trail of a story was as wily as a great con artist, mixing flattery, promises, threats and cajolery—he talked his way aboard a search plane and filed history.

The achievement he used to recall most happily—his arms fialling, his eyes burning, doing imitations of everyone involved—was his work in behalf of another reporter. His own name did not appear on the article.

It was a story about a young Ku Klux Klansman and member of the American Nazi Party, Daniel Burros. Another reporter, McCandlish Phillips, after days of digging and interviewing, was quite certain that the American Nazi was a Jew. He needed one bit of evidence—proof that Mr. Burros had been bar mitzvahed. Mr. Spiegel undertook this part of the investigation.

He went to the Queens neighborhood where Mr. Burros was supposed to have grown up. It was on a Saturday, the Jewish Sabbath.

He entered a synagogue, put on a prayer shawl and mixed with the worshipers. In Yiddish, he inquired if anyone knew a Daniel Burros. Interviews led him to a synagogue and the rabbi who had confirmed Mr. Burros.

In writing of this legwork, in 1967, when Mr. Spiegel was the guest of honor at a dinner in the Waldorf-Astoria Hotel given by Jewish organizations, Arthur Gelb, then the metropolitan editor of The Times and now its deputy managing editor, said, "It was the backbone of a front-page story that attracted worldwide attention."

Mr. Spiegel came into newspaper work after a childhood in tenements in the upper 90's between Madison and Park Avenues. It was there he got the first of his nicknames—Spizzy. It was given by a boyhood friend, Sam Levenson, the comedian. Originally, it was Spizzy Eagle.

The next nickname, Pat, came when he was a copy boy, taking courses at Columbia and trying to get on The Staff Times.

As was the custom, neophytes were given tryouts covering sermons. He covered St. Patrick's Cathedral so often that an assistant city editor began referring to him as the reporter from St. Pat's. By the time he began covering police stories, he was known simply as Pat.

Besides his wife, Mr. Spiegel is survived by a son, David, and a grandson, Eric. Funeral services will be held beginning at

Funeral services will be held beginning at 10 A.M. today in the Riverside Chapel at Amsterdam Avenue and 76th Street.

THE HANDICAPPED STRIKE

(Mr. KOCH asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. KOCH. Mr. Speaker, enforcement of the basic rights of our handicapped citizens must be effected as soon as possible. I have urged Secretary Califano of the Department of Health, Education, and Welfare to take immediate action on the implementation of section 504 of the Rehabilitation Act of 1973.

Section 504 is that part of the Rehabilitation Act which prohibits discrimination against disabled citizens by recipients of Federal funds. Regulations to implement section 504 were developed last year, and have been reevaluated by an intra-HEW task force. Unless regulations are signed, the handicapped will continue to be denied access to the labor force, public transportation, educational programs, hospitals, and other services.

Delays in implementing section 504 have been cited as contributing to the consistently high rate of unemployment among disabled persons, which is a rate which exceeds the figures for all other categories of people. This situation will continue to exist unless the most stringent guidelines are provided affirming the responsibilities of educational institutions or employers in the treatment of the handicapped.

This fall it will be 4 years since the Rehabilitation Act was passed. Urging Secretary Califano to implement the regulations expeditiously is a necessary step toward fulfilling the commitment we made in 1973 to incorporate our handicapped citizens into the mainstream of our society.

Mr. Speaker, because of these long delays, the handicapped community has found it necessary to express their dissatisfaction directly to the Department of Health, Education, and Welfare. Tomorrow, at 1 o'clock e.s.t., the handicapped strike. Demonstrations will begin at the 10 HEW offices across the country, including the Department headquarters here in Washington. I wish the demonstrators success.

My letter to Secretary Califano is appended:

Washington, D.C., April 1, 1977. Hon. Joseph Califano,

Secretary, Department of Health, Education, and Welfare, Washington, D.C.

DEAR JOE: I know you are quite aware of the controversy surrounding the proposed regulations implementing Section 504 of the Rehabilitation Act of 1973. I understand that you have appointed a special task force to make recommendations concerning the proposed regulations which you had been asked to sign immediately upon assumption of your duties at HEW.

As one who has supported the efforts of handicapped citizens to eliminate discrimination in employment and barriers of all kind—both legal and physical—I feel quite strongly that regulations implementing Section 504 should be adopted as soon as possible. As you know, because of various delays in that last Administration, the necessary regulations to implement Section 504 have been delayed for almost four years. These delays, I think we both recognize, are serious. Employers and government agencies should know, in easy, understandable terms, of

their responsibilities under the law, and handicapped individuals should be able to demand adherence to the regulations.

I am concerned that handicapped persons may remain excluded from potential em-ployment and from educational opportunities because of a lack of guidelines affirming the responsibilities of educational institutions or employers in the treatment of the handicapped. Therefore, I urge you to take prompt action following the receipt of your task force's report to sign a comprehensive and effective set of regulations implementing Section 504.

For my part, I am prepared as a member of the Appropriations Committee to urge the appropriation of funds necessary to enable affected public institutions, such as schools and libraries, to make the architectural modifications that may be necessary to comply with the regulations.

All the best Sincerely.

EDWARD T. KOCH.

PERSONAL EXPLANATION

(Mr. MIKVA asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MIKVA. Mr. Speaker, I was out of town last Thursday, March 31. Had I been present, I would have voted "yes" on House Resolution 393 (roll no. 114) and its amendment (roll no. 113), to authorize additional funds for the leadership offices.

I would have voted "yes" on H.R. 4895, the Strategic and Critical Materials Stockpiling Amendments (roll no 115), and "yes" on H.R. 4975, the Biomedical Research Extension Act (roll no. 116).

I also would have cast a "yes" vote for the Health Services Extension Act, H.R. 4976 (roll no. 118), and yes on the amendment that increases the authorization for demonstration projects for home health services (roll no. 117).

IRS REGULATIONS ON TUITION RE-MISSION PROGRAMS

(Mr. MIKVA asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MIKVA. Mr. Speaker, I am today introducing a bill which attempts in part to clarify a misconception on the part of the Internal Revenue Service about the intent of Congress in enacting section 117 of the Internal Revenue Code.

On November 3, 1976, the IRS issued proposed regulations which would require employees of educational institutions to treat as taxable income scholarships given to their families under a tuition remission program. At a hearing at the IRS on January 7 of this year, I testified in opposition to these proposed regulations. My opposition was for two reasons: First, I felt that the regulations were in clear violation of the statute, the intent of Congress, and the long-standing pracice of the IRS. Second, the regulation seized upon only one small piece of the "benefits in kind" problem, and thus aimed the axe exclusively at the private liberal arts colleges.

The IRS withdrew its plan to tax tuition remission plans on January 13: however. I think that the issue of congressional intent in this area should be re-

Further, at these IRS hearings, Commissioner Alexander indicated that another problem in this area was the cooperative arrangement between employers whereby one employer provides socalled scholarships to the dependents of the other employer. Although this situation occurs relatively infrequently, and usually among closed corporations, this bill provides that the determination of whether such reciprocal assistance is income will be made as if the assistance were furnished by the employee's own employer.

In conclusion, I believe that the IRS's position on the matter was short-sighted and not in the best interests of the country. To prevent the recurrence of similar or identical regulations, I urge the Congress to consider this bill favorably.

The text of the bill follows:

H.R. 5956

A bill to amend the Internal Revenue Code of 1954 to provide that amounts received under certain tuition remission programs will be exempt from taxation, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 117 of the Internal Revenue Code of 1954 (relating to scholarships and fellowship grants) is amended by adding at the end thereof the following new subsection: "(c) Tuition-Remission Programs Main-

tained by Institutions of Higher Educa-

"(1) In general.-For purposes of subsection (a), any amount received by an employee of an institution of higher education, or by the spouse or a dependent of such an employee, pursuant to a tuition-remis-sion program of such institution shall be treated as an amount received as a scholar-

"(2) Tuition-remission program.-For purposes of paragraph (1), the term 'tuition-remission program' means a plan of an institution of higher education if—

"(A) under such plan employees of such institution or the spouses or dependents of such employees may be provided with assist-ance for purposes of attending such institution or any other institution of higher education;

"(B) such assistance is provided only in the form of-

"(i) a reduction in the amount of the tuition charged for attending such institution (or any other institution of higher education if such reduction is pursuant to an agreement between such institutions), or

(ii) a grant to be used for purposes of paying tuition for attending an institution of higher education; and

"(C) the provision of such assistance to any employee, or to the spouse or dependent of such employee, is not conditioned on a reduction in the compensation which would otherwise have been paid to such employee or on an increase in the amount of services which such employee would have otherwise been required to perform for such institu-

"(2) Institution of higher education.—For purposes of this subsection, the term 'institution of higher education' means an educational institution in any State which-

"(A) admits as regular students only individuals having a certificate of graduation from a high school, or the recognized equivalent of such a certificate;

(B) is legally authorized within such

State to provide a program of education beyond high school;

(C) provides an educational program for which it awards a bachelor's or higher degree, or provides a program which is acceptable for full credit toward such a degree, or offers a program of training to prepare stu-dents for gainful employment in a recognized occupation; and

(D) contributions to or for the use of which are charitable contributions (as de-

fined in section 170(c)).

(b) The amendment made by subsection shall apply to all taxable years whether such years begin before, on, or after the date of the enactment of this Act.

SEC. 2. (a) Section 117 of the Internal Revenue Code of 1954 (relating to scholarships and fellowship grants) is amended by adding at the end thereof the following new subsection:

(d) Cooperative Agreements Between

Employers.-If-

"(1) an individual is employed by any person (hereinafter in this subsection referred to as the 'employer'

(2) such individual or the spouse or a dependent of such individual is furnished assistance by any other person for purposes of attending educational organization

scribed in section 170(b) (1) (A) (ii), and
"(3) such assistance is furnished by such other person pursuant to an agreement between him and the employer, then, for purposes of this section, the determination of whether such assistance is excludable from gross income under this section shall be made as if such assistance were furnished by the employer."

(b) The amendment made by subsection shall apply to taxable years ending after the date of the enactment of this Act.

SALES REPRESENTATIVES PROTECTION ACT

(Mr. MIKVA asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MIKVA. Mr. Speaker, today I am introducing a bill designed to provide a remedy for sales representatives working on commission who are unjustifiably terminated by the business firms whom they represent. Like the Franchising Termination Practices Reform Act which I introduced earlier this session, the Sales Representatives Protection Act will provide much needed reform in an important area of business conduct.

The vast majority of salesmen work long, hard hours attracting and maintaining customers for the business firms they represent. But, regardless of the number of successful contracts which they negotiate, many sales representatives are continually in jeopardy of having their sales relationship terminated or diminished arbitrarily and unjustifiably. The bill establishes certain minimum standards to protect sales representatives from unfair conduct by their principals.

The concept of providing substantive rights for the protection of commissioned sales representatives is not unknown-many European countries now guarantee such rights. And, the method of commissioned sales has continued to play an important role in the commercial life of those countries. This bill establishes no regulations of any kind, nor does it interfere with the right of principal and sales representative to enter into

a contract to which they mutually agree. Rather, the bill permits representatives to bring an action in court to obtain an indemnity when they are terminated or have their territories or commission rates cut without good cause.

It is clear that commissioned sales representatives serve an integral function in American commercial life. It is also clear that many businesses derive their profits from the hard work and sacrifice of their commissioned representatives. It should be no less clear that these individuals deserve to be protected from arbitrary and unfair treatment.

Mr. Speaker, I join with Mr. Baucus, Mrs. Burke of California, Mr. Dellums, Mr. Downey, Mr. Fraser, Mr. Harris, Mr. Hughes, Mr. Jenrette, Mr. Moakley, Mr. Simon, Mr. Solarz, Mrs. Spellman, Mr. Stark, Mr. Vento, Mr. Weiss, and Mr. Yatron in including the text of the Sales Representatives Protection Act in the Record:

H.R. 5957

A bill to correct inequities in certain sales representatives practices, to provide protection for certain sales representatives terminated from their accounts without justification, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

Section 1. This Act may be cited as the "Sales Representatives Protection Act".

FINDINGS

Sec. 2. The Congress makes the following findings:

(1) A substantial amount of useful business activity in and affecting interstate commerce is carried on and conducted under agreements or relationships between sales representatives compensated solely by commission and principals on whose behalf such sales representatives solicit orders.

(2) Such agreements and relationships benefit the economy, enhance commerce, and promote competition by providing a means for the sale and distribution of goods in an

efficient and economic manner.

(3) Such sales representatives, as independent businessmen, do not have the benefits of workmen's compensation, unemployment compensation, and company-sponsored retirement or pension plans and are not eligible to bargain collectively.

(4) Many such sales representatives are not sufficiently protected from wrongful termination from their accounts, reduction in the size of their sales territories, conversion of their accounts to accounts serviced directly by the principal, and other inequities.

INDEMNIFICATION BY PRINCIPAL OF UNJUSTLY TERMINATED SALES REPRESENTATIVE

SEC. 3. (a) Any principal who, without good cause, terminates or fails to renew any contract between such principal and any sales representative under which such sales representative solicits orders on behalf of such principal form an original or improved account of such sales representative to which such sales representative has been assigned to solicit orders on behalf of such principal for a period of not less than eighteen months immediately preceding such termination or fallure to renew shall indemnify such sales representative in accordance with section 4 (a).

(b)(1)(A) Any principal who takes any action to reduce the size of the geographic territory, if any, which such principal has assigned to a sales representative with respect to an original or improved account of such sales representative to which such sales

representative has been assigned for a period of not less than eighteen months immediately preceding such action by the principal shall, if such action results in a reduction of not less than 25 per centum in the dollar amount of commissions paid by such principal to such sales representative for orders accepted from such account in the twelve-month period immediately following such action compared with the dollar amount of commissions paid by such principal to such sales representatives for orders accepted from such account in the immediately preceding twelve-month period, indemnify such sales representative in accordance with paragraph (3).

(B) In any determination under subparagraph (A), any reduction in the dollar amount of commissions paid by a principal to a sales representative with respect to an account because such principal failed to fill orders submitted by such account due to an act of God, an act of war or insurrection, a strike, or an act of an agency of Government

shall be disregarded.

(2) Any principal who reduces the rate of commission paid to a sales representative of such principal for orders accepted by such principal from an original or improved account of such sales representative to which such sales representative has been assigned for a period of not less than eighteen months immediately preceding such reduction shall, if the total effect of such reductions in any twelve-month period is a reduction in rate of commission of not less than 25 per centum, indemnify such sales representative in accordance with paragraph (3).

(3) Upon a reduction in amount of commissions described in paragraph (1) or a reduction in rate of commission described in paragraph (2), the principal causing such

reduction shall-

(A) if the sales representative involved elects to terminate his contract with such principal with respect to the account involved, indemnify such sales representative for such reduction in accordance with section 4(a); or

(B) if such sales representative elects not to terminate his contract with such principal with respect to such account, indemnify such sales representative for such reduction

in accordance with section 4(b).

COMPUTATION OF INDEMNITY

Sec. 4. (a) Any principal required under section 3(a) or section 3(b)(3)(A) to indemnify a sales representative with respect to any account shall be liable to such sales representative—

(1) in an amount equal to the sum of the amounts of the commissions paid or to be paid such sales representative for orders accepted by such principal from such account during the base year and for orders received by such principal from such account during the base year and accepted after the end of the base year; and

(2) at the end of each successive twelvemonth period after the base year, in an amount equal to the product of—

(A) the total sales (if any) of such principal to such account in such twelvemonth period;

(B) the percentage of such principal's total sales to such account in the base year for which such sales representative received a commission; and

(C) one-half the percentage rate of commission paid to such sales representative for sales by such principal to such account in the base year.

Liability under paragraph (2) shall terminate at the end of the seventh successive twelve-month period after the base year or at the end of the period of years after the base year equal in number to one less than the number of years (rounded to the nearest whole number) during which such sales representative was a party to a contract or

contracts with such principal under which such sales representative solicited orders from such account, whichever occurs first. The amount in which any principal may be liable to any sales representative under paragraph (1) as an indemnity shall be in addition to, and not in lieu of, amounts owed to such sales representative as commissions.

(b) Upon election by a sales representa-tive under section 3(b)(3) not to terminate his contract with a principal with respect to an account after such principal has caused a reduction in the amount of such sales representative's commissions as described in section 3(b)(1), or in the rate of commission paid such sales representative as described in section 3(b)(2), such principal shall be liable to such sales representative as if such reduction were a termination or failure to renew under section 3(a) creating liability under subsection (a) of this section, except that each amount computed under subsection (a)(1) or (a)(2) as the amount of liability of the principal shall, for purposes of this subsection, be multiplied by the percentage of such reduction in amount of commissions or rate of commission.

(c) For purposes of this section, the term "base year", when used with respect to the liability of principal to a sales representative, means the twelve-month period preceding the date on which such liability first arose.

EXEMPTIONS

SEC. 5. (a) Section 3(a) shall not apply to any principal which, for a period of two years after a termination or cancellation referred to in such section, neither solicits, directly or through sales representatives, nor accepts orders from the account involved in such termination.

(b) Section 3 shall not apply with respect to any action by a principal with respect to a sales representative if the volume of sales of such principal in the line of business for which such sales representative solicits orders is in any twelve-month period ninety percent or less of the volume of sales of such principal in such line of business in the preceding twelve-month period.

DUTIES OF PRINCIPALS WITH RESPECT TO SALES
REPRESENTATIVES

SEC. 6. Any principal who enters into a contract with a sales representative under which such sales representative shall solicit orders for the merchandise of such principal shall—

 inform such sales representative, within a reasonable time to be specified in such contract, of such principal's receipt of each order from an account of such sales representative;

(2) furnish such sales representative, within a reasonable time to be specified in such contract, copies of all invoices and credit memorandums issued with respect to sales in the assigned geographic territory, if any, of such sales representative;

(3) furnish such sales representative monthly statements of commissions due such sales representative; and

(4) provide such sales representative, upon the request of such sales representative—

(A) an accounting showing each sale made by such principal in the preceding twelve months in the assigned geographic territory, if any, of such sales representative;

(B) information with respect to any matter which is related to any claim by such sales representative against such principal for a

commission; and

(C) access to the records of such principal for the purpose of verifying information supplied under subparagraphs (A) and (B).

PROCEDURE

SEC. 7. (a) An action to enforce any rights of liabilities created by this Act may be brought in a district court of the United

States without regard to the amount in controversy or in any other court of competent

jurisdiction.

(b) In the case of an action arising under this Act which is brought in a district court of the United States, such action may be brought in the judicial district where all the plaintiffs reside in addition to any other judicial district provided by law.

(c) No action may be brought under this Act later than five years after the right to

such action first arises.

(d) In any action brought by any sales representative against any principal under this Act, the burden of proof on the issue of whether such principal acted without good cause shall rest on such principal.

(e) In any successful action brought by a sales representative under this Act, the court may award reasonable attorneys' fees and costs to such sales representative.

WAIVER PROHIBITED

SEC. 8. Any provision in any contract between any sales representative and any principal requiring such sales representative to waive any of the provisions of this Act shall be void.

DEFINITIONS

SEC. 9. For the purposes of this Act:
(1) The term "principal" means any person who-

(A) is engaged in the business of manufacturing, producing, assembling, importing, or distributing merchandise for sale in commerce to a customer who purchases such merchandise for resale or for use in business;

(B) utilizes sales representatives to solicit

orders for such merchandise; and

(C) compensates such sales representa-

tives, in whole or in part, by commission.
(2) The term "sales representative" means any person (other than an agent-driver or commission-driver) who is an independent contractor engaged in the business of soliciting on behalf of a principal orders for the purchase of such principal's merchandise.

(3) The term "original or improved account", when used with respect to a sales representative, means a customer of a

principal-

(A) which purchases merchandise of such principal through such sales representative for resale or for use in business; and

(B) the business of which with such prin-

cipal-

(i) was initially solicited by such sales rep-

resentative; or

- (ii) was not less than 50 per centum greater in dollar volume in any twelvemonth period during which such sales representative was a party to a contract contracts with such principal under which such sales representative solicited orders from such customer than in the twelvemonth period ending with the month preceding the month in which such a contract was first entered into.
- (4) The term "good cause", when used with respect to the termination of, or failure to renew, a contract between a principal a sales representative, means conduct on the part of such sales representative with respect to such principal which constitutes-

(A) fraud, dishonesty, or criminal activity; (B) a material breach of the contract between such sales representative and such

principal:

- (C) failure to put forth a good faith effort to obtain orders for the merchandise of such principal; or
- (D) gross negligence in the performance the duties of such sales representative under such contract.
- (5) The term "commerce" means trade, traffic, transmission, communication, or transportation-
- (A) between a place in a State and any place outside thereof; or
 - (B) which affects trade, traffic, transmis-

sion, communication, or transportation described in subparagraph (A).

The term "State" means a State, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, and the Canal Zone.

EFFECT ON STATE LAW

SEC. 10. Nothing in this Act shall invalidate or restrict any right or remedy of any sales representative under the law of any

CHILEAN REFUGEE BILL

(Mr. OTTINGER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. OTTINGER. Mr. Speaker, the truth about Chile can no longer be ignored. The United States can no longer wash its hands of responsibility for the tragic series of events which culminated in the violent overthrow of a legitimately elected foreign government and the subsequent methodical bloody repression by the Pinochet dictatorship of those who supported that government. We learned painfully that this repression has not been limited to opponents within Chile when we recently witnessed right in our own capital the assassination of the Pinochet regime's leading critic and, incidentally, a totally uninvolved American woman, Mrs. Michael Moffitt.

Our Government cannot erase this tragic chapter in the lengthening history of misguided and misbegotten covert foreign intervention by the CIA, but at the very least we can offer sanctuary to those Chileans whose lives are every day placed in jeopardy at least in part as a result of those interventions. To this end, I am today reintroducing humanitarian legislation to grant asylum to these refugees from Chilean political terrorism.

This bill marks the continuation of a struggle to guarantee refuge for endangered Chilean nationals and their immediate relatives which I began last year when I introduced, along with 22 cosponsors, H.R. 14392, a bill that would have granted Chilean political prisoners permanent residence in the United States. This original bill met with staunch criticism from the State and Justice Departments because of the automatic provision to grant immediate permanent resident status. While I disagree with State and Justice, in order to get this urgent matter moving, in light of the objections. I have revised the bill to initially grant 2 years' nonpermanent residence, followed by a redetermination of status by the Attorney General. I am advised that this formula may be more acceptable.

We can no longer turn our backs on those whose desperate plight we have played a part in causing. As President Carter said so well in his inaugural ad-

Because we are free we can never be indifferent to the fate of freedom elsewhere. Our moral sense dictates a clear cut pref-erence for those societies which share with us an abiding respect for individual human

The military junta which rules Chile has shown no respect for human rights. However, we, a Nation of immigrants and refugees, must.

The text of the bill and section-bysection analysis follows:

HR 5969

A bill to grant admission to the United States to certain nationals of Chile and the spouses, children, and parents of such nationals, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) notwithstanding section 214 of the Immigration and Nationality Act, any alien who is a national of Chile and is not in the United States shall be issued a nonimmigrant visa and admitted to the United States as a nonimmigrant if the consular officer deter-

(1) that such alien-

(A) if in Chile, being persecuted or is in danger of persecution on account of his political opinions; or
(B) if not in Chile, would be persecuted

or be in danger of persecution on account of his political opinions if he returned to Chile;

(2) that such alien is not excludable from the United States under section 212(a) of the Immigration and Nationality Act without regard to paragraph (26) of such section;

(3) that such alien has applied for such admission during the one-year period which begins on the day after the date of enactment of this Act.

(b) (1) The admission to the United States of any alien under this Act shall be for the two-year period which begins on the date of admission. During such period any alien admitted under this Act shall be allowed to accept employment. Not later than the date on which such two-year period expires, the Attorney General shall examine the case of such alien and, if the Attorney General de-

(A) that such alien has not acquired permanent residence; and

(B) in the case of an alien other than an alien subject to this subsection by reason of section 3(a)(1) of this Act, that such alien would be persecuted or be in danger of persecution on account of his political opinions if he returned to Chile,

such alien shall be placed in the custody of the Immigration and Naturalization Service, and shall thereupon be inspected and examined for admission into the United States, and his case dealt with, in accordance with the provisions of sections 235, 236, and 237 of the Immigration and Nationality Act.

(2) Any such alien who, pursuant to paragraph (1), is found, upon inspection by an immigration officer or after hearing before a special inquiry officer, to have been and to be admissible as an immigrant at the time of his arrival in the United States and at the time of his inspection and examination, except for the fact that he was not and is not in possession of the documents required by section 212(a)(20) of the Immigration and Nationality Act, shall be regarded as lawfully admitted to the United States for permanent residence as of the date of his arrival.

Sec. 2. (a) Notwithstanding section 241 of the Immigration and Nationality Act, any alien who is a national of Chile and is in the United States on the date of the enactment of this Act shall be treated in accordance with subsection (b) if the Attorney General de-

(1) that such alien would be persecuted or be in danger of persecution on account of his political opinions if he returned to Chile:

(2) that such alien is not excludable from the United States under section 212(a) of the Immigration and Nationality Act without regard to paragraph (20) or (26) of such section:

CXXIII-648-Part 9

(3) that such alien has applied for such treatment during the one-year period which begins on the day after the date of enactment of this Act.

(b) (1) An alien subject to this subsection shall be examined by the Attorney General in accordance with paragraph (2) not later than the earlier of—

(A) in the case of an alien holding a valid nonimmigrant visa, the date on which the visa expires;

(B) in the case of an alien paroled into the United States by the Attorney General, the date on which such parole status expires; or

(C) the date two years after the date on which such alien makes application under

subsection (a) (3).

The Attorney General shall examine the case of an alien subject to this subsection and, if the Attorney General determines

(A) that such alien has not acquired per-

manent residence: and

(B) in the case of an alien other than an alien subject to this subsection by reason of section 3(a) (2) of this Act, that such alien would be persecuted or be in danger of persecution on account of his political opinions if he returned to Chile,

such alien shall be placed in the custody of the Immigration and Naturalization Service, shall thereupon be inspected and examined for admission into the United States, and his case dealt with, in accordance with the provisions of sections 235, 236, and 237 of the Immigration and Nationality Act.

(3) Any such alien who, pursuant to paragraph (2), is found, upon inspection by an immigration officer or after hearing before a special inquiry officer, to have been and to be admissible as an immigrant at the time of his arrival in the United States and at the time of his inspection and examination, except for the fact that he was not and is not in possession of the documents required by tion 212(a)(20) of the Immigration and Nationality Act shall be regarded as lawfully admitted to the United States for permanent

residence as of the date of his arrival.

SEC. 3. (a) Notwithstanding section 214 or 241 of the Immigration and Nationality Act-

(1) any alien who satisfies the requirements of subsection (b) and is not in the United States shall be issued a nonimmigrant visa, admitted to the United States as a nonimmigrant, and treated in accordance with subsection (b) of the first section of this Act; and

(2) any alien who satisfies the requirements of subsection (b) and is in the United States shall be treated in accordance with subsection (b) of section 2 of this Act.

(b) An alien satisfies the requirements of this subsection if the Attorney General

determines

(1) that such alien is the spouse, a child, or a parent of a national of Chile who has been admitted to the United States under subsection (a) of the first section of this Act or with respect to whom determinations described in subsection (a) of section 2 of this Act have been made:

(2) that such alien-

(A) is a national of Chile but does not satisfy the requirements for admission under subsection (a) of the first section of this Act or for receiving treatment in accordance with subsection (b) of section 2 of this

(B) is not a national of Chile; and

(3) such allen has applied for treatment under this section within the one-year period which begins on the day the date of enactment of this Act.

Sec. 4. An alien who acquires permanent residence under this Act shall not be chargeable for purposes of the numerical limitations contained in section 201 or 202 of the Immigration and Nationality Act.

Sec. 5. The Attorney General shall take

such steps as he deems appropriate to provide that any alien who is a national of Chile or the spouse, a child, or a parent of a national of Chile shall be informed of the treatment for which application may be made under this Act before such alien is otherwise excluded from admission into, or deported from the United States.

Sec. 6. The definitions contained in sections 101(a) and (b) of the Immigration and Nationality Act shall apply in the administration of this Act.

SECTION-BY-SECTION ANALYSIS

Section 1.(a) Provides for the admission of any National of Chile as a Non-Immigrant, if a Consular Officer determines that:
(1) If in Chile is being persecuted or in

danger of persecution; (2) If not in Chile, would be persecuted in danger of persecution if returned to

Chile;
(3) Further findings must be made that he is not excludable from the U.S., except relating to eligibility for a non-immigrant

(4) Must apply for admission within one year of date of enactment of this Act.

(b). Provides for the admission for a 2-year period, with authorization to accept employment. After a 2-year period, if alien has not acquired permanent residence and a determination is made that he would be in danger of persecution if he returned to Chile, he will accorded permanent resident status as of the date of his arrival in the U.S. notwithstanding the fact that he is not in possession of the appropriate documents.

Section 2. Relates to Nationals of Chile in the U.S. and provides the same relief as Section 1 of the bill for such applicants, provided they apply within a 1-year period fol-

lowing enactment of the Act.

Section 3. Related to the similar treatment for spouses, children or parents of a national of Chile (admission or adjustment of status to permanent resident)

Section 4. Exempts any person admitted under the Act from the numerical limitations imposed by or contained in the Immigration

and Nationality Act.

Section 5. Places responsibility on the Attorney General for disseminating information to possible beneficiaries concerning application for treatment under the Act. Especially the limitations on the time which they must apply for admission or adjustment of status

Section 6. Provides that the technical definitions used in the Immigration and Nationality Act are applicable to this Act.

SEARCH FOR PEACE IN THE MIDDLE EAST

(Mr. YATES asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. YATES. Mr. Speaker, with the Carter administration's resumption of the search for peace in the Middle East, one of the areas on which talks must surely focus is the dual plight of Jews displaced from Arab lands and Arabs displaced from Palestine. Joan Peters, in an article in Commentary magazine, has made a valuable contribution to understanding the full dimensions of the problem. I commend the remarks of this distinguished and accomplished writer to my colleagues in the House as well as all those who seek to understand the situation in the Middle East with a view toward eventual peace.

The article follows:

AN EXCHANGE OF POPULATIONS (By Joan Peters) *

More than sixty million persons have be-come refugees since World War II. Of these, most have been resettled and rehabilitated in the countries to which they fled, seeking asylum. Indeed, the world community has long considered the resettlement and integration of refugees in their host countries to be a moral obligation of the highest order, and this understanding has been embodied in international law. Except after military victory, there have been no instances of the successful mass repatriation of any refugee group once it has become absorbed in its host country.

The one striking exception to the general rule is the situation of the Arab refugees in the Middle East. The Arabs who left Palestine during Israel's War of Independence in 1948-49 have to this day not been resettled or rehabilitated in the Arab countries to which they fled. On the contrary, the Arab states have refused to absorb or integrate their brethren into their respective societies: instead they have made the "restoration" of the "legitimate rights" of these refugees namely, their repatriation to Jewish Palestine in a position of sovereignty they never previously enjoyed—the central demand in their confrontation with Israel: the "heart of the matter." This demand runs counter to all historical precedent and the universal present-day practice of mankind, yet it seems to have the approval and endorsement of a majority of the world community.

That this should be so is a tribute primarily to the success of Arab propaganda in persuading the world that in the Middle East the cause of justice lies on one side and one side only. That, however, is a serious distortion of truth, with respect to the "refugee problem" no less than with respect to the general situation. With respect to the refugee problem, the truth is that an exchange of populations has taken place be-tween Israel and the Arab countries. Far from being a case simply of Palestinian Arabs fleeing from Jews, what occurred in the Middle East in the late 1940's was a flight of refugees in both directions almost simultaneously. For every Arab refugee-adult or child—now competing for the sympathy of the world from Syria, Lebanon, or Jordan, there is a Jewish refugee now living in Israel who fled or was expelled from the Arab land of his birth where he and his ancestors had lived for two thousand years. Indeed, so symmetrical is the historical record that the actual numbers on each side are almost exactly the same-about 700,000 Palestinian Arabs versus about 700,000 Jews from Arab lands. And so far as property goes, the tradeoff leans, if anything, to the benefit of the Arabs, who confiscated Jewish-held assets in Iraq, Syria, Libya, Egypt, and elsewhere. The difference is that where the Israeli government, from the beginning, took it upon itself to attempt to integrate its refugees into society, the Arab states, successfully flouting precedent and disregarding the claims of conscience, have kept their fellow-Arab refugees in a condition of unremitting squalor and poverty.

^{*} Joan Peters contributed the much-discussed article, "In Search of Moderate Egyptlans," to our May 1975 number. The present essay, in a somewhat different version and augmented by transcripts of interviews with Jewish refugees from Arab lands, will form part of her forthcoming book on the Middle East conflict.

T

"Before the Jewish state was established there existed nothing to harm good relations between Arabs and Jews." Thus, to Henry Kissinger, spoke the late King Faisal of Saudi Arabia, a country which Jews are not even allowed to enter. The king was repeating a cliché which has attained something of the status of a myth: that, unlike the history of the Jews under Christendom, the history of the Jews under Islam was one of tranquility, equality, and friendship—until the advent of Zionism. Yet the assertion of Muslim tolerance is only a myth; one would have to search far indeed in doctrine and in historical practice to find substantial evi-dence of it as a reality. The fact that during certain short-lived periods Jews under Arab domination did achieve a greater degree of security than Jews often experienced in Christian lands should not be allowed to obscure the essential record, which is one of political subjugation, social humiliation, and officially decreed religious inferiority.

This inferiority is prescribed in the Koran itself, and is elaborated upon in the hadith, the traditional sayings attributed to the prophet Muhammad. Wherever Jews have lived under Islam, their condition has been determined by the legal ordinances of the Koran, which forbids followers of Muhammad from dealings with Jews, promises their eventual downfall and ignominy "because they disbelieve the revelations of Allah and slew the prophets wrongly," and in general denounces them as the enemies of the faith. It was to such Koranic imprecations that President Sadat of Egypt referred in 1972 when he said of Jerusalem: "We shall take it out of the hands of those of whom the Koran said, 'It is written that they shall be demeaned and made wretched.' . . . We shall celebrate the defeat of Israeli arrogance so that they shall return and be as the Koran said of them, a people 'condemned to humiliation and misery.'

The 7th-century Covenant of Omar delineates the twelve laws under which a dhimmi, or non-Muslim, was allowed to exist as a non-believer among believers. The charter codified the conditions of life for Jews (and Christians) under Islam-a life which became forfeit if the law was broken. According to the Covenant, Jews were compelled to wear a distinctive (sometimes dark-blue or black) habit with sash, and a yellow piece of cloth as badge; they were not allowed to perform their religious practices in public, or to own a horse; they were forbidden to drink wine in public; and they were required to bury their dead without letting their grief be heard by the Muslims. Islam's religious law decreed the lightest of penalties for a Muslim who murdered a non-Muslim; the testimony of a Jew (or Christian) against a Muslim was held invalid. As payment for being allowed so to live, the dhimmi paid a special head-tax and a special property tax.

These and other harsh restrictions of the Covenant were carried down through the centuries, implemented with varying degrees of cruelty or flexibility depending upon the character of a particular Muslim ruler. The extra head-tax, for example, was enforced in some form until 1909 in Egypt, Iraq, Syria, Lebanon, and Turkey, until 1925 in Iran, and in Yemen until the present day. Throughout the centuries, the Jews were the first to suffer in times of economic turmoil or political upheaval, and were also the victims of sporadic mass murders.

In the 20th century, with the departure of the Eurpoean colonial powers from the Middle East, the old Muslim attitude toward Jews—superior, condescending, possessive—came to be replaced by one of open hatred. Nazi anti-Semitism found a receptive home here in the 1930's and 1940's. As early as 1940 the Mufti of Jerusalem requested the Axis powers to acknowledge the Arab right "to set-

tle the question of Jewish elements in Palestine and other Arab countries in accordance with the national and racial interests of the Arabs and along lines similar to those used to solve the Jewish question in Germany and Italy." Hitler's crimes against the Jews have frequently been justified in Arab writings and pronouncements. In the 1950's Anwar Sadat, then a government minister, published an "open letter" to Hitler expressing the hope that he was still alive and would yet resume his interrupted cause.

The anti-Semitic literature (including The Protocols of the Elders of Zion and many official school texts) published by the Arabs since World War II has been voluminous, and is continually increasing, despite the almost total evacuation of Jews from the Arab world. The virulence of the literature aside, what is significant about it is its official origin-it is the product not of an extremist fringe of Arab governments, including those called moderate. And in the meantime the image of the Jew has taken on new colorations: despised for centuries as a non-believer, portrayed in the modern Arab world as the demoniacal incarnation of evil, the Jew living in an Arab country after the rise of Zionism and the establishment of the state of Israel came to be calumniated, as well, as a fifth columnist, a foreign agent, a de facto spy. This was the climate from which the Jews of Arab lands fled.

II

Of nearly 900,000 Jews who lived in Arab lands in 1948, only some 35,000 remain. The Arab world has been nearly emptied of its large and ancient Jewish communities.

The entire Yementte community of Jews, almost 50,000, swarmed into Israel via "Operation Magic Carpet" in 1948. Yementte Jewry, whose history went back 2500 years, was fleeing from what the historian S. D. Goitein has described as "the worst aspect" of Arab mistreatment of Jews. A Yemenite law had decreed that fatheriess Jewish children under thirteen be taken from their mothers and raised as Muslims. Goitein mothers and raised as Muslims. Goitein mothers "To my mind, this law, which was enforced with new vigor about fifty years ago, more than anything else compelled the Jews to quit that country to which they were very much attached. ... The result was that many families arrived in Israel with one or more of their children lost to them. . ." The stoning of Jews was still practiced in Yemen at the time of the 1948 exodus.

From Iraq, between the years 1949 and 1952 alone, 123,371 Jews fled to Israel, leaving their assets and communal holdings behind, Iraqi Jews took pride in their distinguished community, with its history of scholarship and

¹Some examples drawn from educational texts:

A history text for third year junior-highschool students, Jordan: "The Jews in Europe were persecuted and despised because of their corruption, meanness, and treachery."

From a religious-studies reader, second year of junior high school, Syria: "The Jews . . . lived exiled and despised since by their nature they are vile, greedy, and enemies of mankind."

An elementary-school exercise in syntax and spelling, Syria: "Analyze the following sentences. 1. The merchant traveled to the African continent. 2. We shall expel all the Jews from Arab countries."

A favored subject in much Arab anti-Semetic literature is the *infamous* Damascus blood libel of 1840. In 1962 the Egyptian Ministry of Education brought out an official book, *Human Sacrifices in the Talmud* (a reprint of a work dating from 1890), which repeats the charge that Jews use human blood for ritual purposes, and in 1973 a former minister in the Egyptian foreign service published a play based on the same idea.

honor. Under the British mandate many were writers, traders, and physicians, and some had become quite wealthy through commerce and banking. All this ended when Iraq declared independence in 1932. Almost immediately afterward, increasingly violent demonstra-tions took place over the "Palestine problem": many Iraqi Jews were murdered by agitated mobs, nitric acid was thrown by terrorists upon Jews in the street, and bombs were flung into synagogues. In 1941 the violence exploded into a bloody farhud-massacre—of the Jews, with the police openly participating in the attack; at least 150 were killed, hundreds more were wounded, and more than a thousand Jewish-owned houses and businesses were looted and destroyed. That same year, the Iraqi Minister of Justice proclaimed that "Judaism is a threat to mankind." From then on Jews suffered indiscriminate torture, imprisonment without charge, and relentless persecution.

When Iraq joined the Arab war against Israel in May 1948, government terror in-creased: Jews were forbidden to leave the country, and many fortunes were extorted or confiscated. Zionism was made a capital crime, and Jews were publicly hanged in the center of Baghdad. (A Dutch Jew was hanged as a "Zionist" in Iraq less than a year ago.) Although no laws authorized the confiscation of Jewish property before 1950, the Jews were stripped of millions of dollars through economic discrimination, "voluntary donations" appropriated by the government, and other subterfuges. An Egyptian journal reported in 1948 that all Iraqi Jews who went to Palestine and did not return would be tried in absentia as criminals. Those who were tried in absentia were sentenced to hang or serve extended prison sentences. Perhaps because of the desperate financial condition of the Iraqi government, Jewish "emigration" was later legalized-upon confiscation of property and permanent loss of citizenship. The Jews their accumulated holdings behind, and within the first three years of the law, most fied. As of 1975, only 400 of this ancient and distinguished community of 150,000 remained behind

In 1948, 75,000 Jews lived in Egypt; today there are 350, the remnant of a community dating back millennia. Under Ottoman rule. Egyptian Jews had flourished; despite occasional eruptions of hostility toward them, their standard of living into the 20th century was much better than in most other Arab countries. Yet by the late 1930's Egyptian nationalism, Arab hatred of Zionists, and Nazi propaganda combined to erupt violently against the Jews. The first major incident was the burning of synagogues, churches, and other communal buildings belonging to non-Muslims. From 1945 on, many Jews were killed or injured in organized riots. Jews suffered extensive economic losses when the Egyptians passed a law that largely excluded Jews from employment; the government confiscated much Jewish property and wrecked the economic situation of the Jews within a few months. In 1948 anti-Jewish riots were rampant. According to one account, in one seven-day period, 150 Jews were murdered or seriously wounded. With the outbreak of the 1948 war, Egyptian Jews were barred from leaving Egypt, whether to go to Israel or elsewhere. Then, early in August 1949, the ban was abruptly lifted, and much sequestered Jewish property was returned. From August until November of that year, more than 20,000 of Egypt's 75,000 Jews fled, many to Israel. A brief period of tolerance under General Naguib was followed by the takeover of Gamal Nasser who instituted mass arrests of Jews and confiscation of their property.

After the Sinai campaign of 1956, thou-

After the Sinai campaign of 1956, thousands of Egyptian Jews were interned without trial while thousands more were served with deportation papers and ordered to leave

within a few days; their property was confiscated, their assets frozen, and they were forced to acknowledge in writing that they were leaving voluntarily. When the Six-Day War began in 1967, many Jews were again arrested and held in camps, where they were beaten and whipped, deprived of water for days on end, and forced to chant anti-Israel slogans. By 1970, these Jews too had left the country. "Egypt," according to the officer in charge of one internment camp, "has no place for the Jews." By 1975, Egypt was virtually Judenrein.

From North Africa more than 300,000 Jews have crowded into Israel since 1948. Almost 250,000 of these are from what is now Morocco, where Jews have lived since the destruction of the First Temple. Down through the 19th century, Jewish existence in Morocco remained insecure and tenuous. Under Islam, André Chouraqui has written, the Jews of Morocco were subjected at various times to "such repression, restriction, and humiliation as to exceed anything in [Christian] Europe" except for the Nazi Holocaust. Charles de Foucauld, a French Christian officer who in 1863-84 posed as a rabbi in an intelligence-gathering mission, was one of many to record Jewish life under Arab rule in 19th-century Morocco:

"... Bled white without restraint, ... they are the most unfortunate of men... Every Jew belongs, body and soul, to his sid [Muslim seigneur]... he came in the sid's possession through inheritance as part of his personal belongings under the rules of Muslim law ... or [if] he settled only recently in the place where he lived, then immediately upon 'arrival he had to become some Muslim's Jew... Once having rendered homage, he was bound forever, he and his descendants... Nothing in the world protected the Jew against his sid: he was entirely at his mercy."

By contrast, in those regions of Morocco which were under Turkish rule the Jewish condition was less desperate, and some Jews even achieved a measure of affluence.

French rule came to Morocco in 1912 and brought welcome relief for the Jews, despite pogrom in Fez that killed sixty Jews left 10,000 homeless, and despite the fact that (unlike Algeria and Tunisia), Jews remained under local Arab rule. By 1948, Jews had even become nominally involved in local When Israel was established, the French authorities strove to maintain calm between the Muslim and Jewish communities, and the Muslim sultan appealed to his subjects not to commit violence against the Jews. Yet early in June 1948, mob violence erupted simultaneously against the Jewish communities of several towns in Northern Morocco, and dozens of Jews were killed. Shortly afterward, the first major group of Moroccan Jews-30,000-fled to Israel. The fate of Morocco's Jewish community fluctuated with each strong political wind: Moroccan independence was declared in 1956 and although emigration to Israel was declared illegal, 70,000 more managed to reach the Jewish state. The Sultan's return was followed by appointment of Jews to major government posts; in 1959, Zionism became a crime. Two years later the new king attempted to appease the Jews by legalizing emigration; another 100,000 made their way to Israel. Israel's victory in the 1967 brought heightened hostility from the Muslims, and by 1975 Moroccan Jewry had shrunk to less than 10 per cent of its former number. The 22,000 or so who remain reportedly live well, and King Hassan is anxious for them to stay, but many Jewish schools are now run by Muslims, there has been no Jewish press since 1960, and occasionally there are renewed anti-Israel demonstrations.

The Algerian Jewish community generally shared the treatment of Moroccan Jews. In the 1930's the ascent of Nazi Germany, re-

inforcing Muslim attitudes of the past, gave rise to new waves of anti-Semitism; a massacre at Constantine in 1934 left twenty-five Jews slain. dozens wounded, and Jewish property pillaged. In 1940, when the Vichy government took over, Jews were stripped of French citizenship, banned from schools and public activities, and legally rendered "pariahs." Only the Allied landing prevented the transfer of Algerian Jews to European death camps. (However, Messali Hadj, "father of the Algerian nationalist movement," refused to support Nazi Germany.) After World War II, Jews were caught in the middle of the struggle for Algerian independence between the French and the nationalists, and in addition Algeria had now forged stronger links with the Arab League. The Jewish community of Algeria which had numbered 140,000 in 1948 diminished within months at the height of hostilities in the early 1960's; about 14,000 Jews fled to Israel 125,000 went to France. The Jewish population in Algeria now numbers 500.

Tunisian Jews were somewhat better off than either their Algerian or Moroccan brothers throughout the last centuries, but the separate Jewish quarter of Tunis was not much less squalid and miserable than were other North African mellahs or haras—Jewish ghettos—before French rule. When Tunisia became independent in 1956, a Jew was included in the Bourguiba cabinet, yet the Jews of Tunisia were soon forced to flee from the extremism which the "Arabization" of policy of the government now fostered. Of 105,000 Jews in 1948, only a tiny fraction, about 8,000, live in Tunisia today; 50,000 emigrated to Israel and many others have gone to France.

Jewish history in Syria dates back to bibtimes. By 70 c.E. 10,000 Jews dwelled in Damascus, and a consistent Jewish presence was maintained there for more than two millennia despite periodic eruptions of vio-lence, the best-known of which in modern times was the Damascus blood libel of 1840it is still being invoked to this day. The French, assigned mandatory rights over Syria in 1920, made persistent attempt to protect the Jews from attack by Arabs, but the growing dispute over neighboring Palestine in the 1930's crystallized local hostility and brought anti-Jewish riots in 1936. In 1937 a Nazi delegation paid a visit to Damascus, the level of anti-Jewish propaintensifying ganda and bringing about closer affiliations between German and Arab youth organizations. From Damascus, the Arab Defense warned the Jewish Agency: Committee Your attitude will lead you and the Jews of the East to the worst of calamities that has been written in history up to the pres-." In 1944 and '45 the Jewish quarter was raided; in the latter year Syria won its independence, Damascus and the warned at a religious conference that if Jewish immigration to Palestine were not halted, all countries of Islam would declare a "holy war" against the Jews. Shortly afterward a Syrian student mob celebrated a Muslim hol-

In December 1947 anti-Jewish feeling climaxed in a vicious program: Syrian mobs poured into the mellah of Aleppo and burned down most of the Synagogues, destroyed 150 Jewish homes, five Jewish schools, fifty shops, and offices, an orphanage, and a youth club. Holy scrolls, including a priceless ancient manuscript of the Old Testament, were burned, while the firemen stood by and police "actively helped the attackers." By early 1947 only 13,000 Jews remained in Syria of as estimated 30,000 four years earlier. Letters smuggled out of Syria told a "war against

iday by desecrating the Great Synagogue of

Aleppo, beating Jews at prayer and burning

prayer books in the street. Government in-

timidation was initiated, and Jews were pro-

hibited from leaving the country. Jewish leaders were forced to denounce Zionism

Zionists [which] has turned into a war against the entire Jewish people. . . ."

Since that time regimes have come and gone in Syria, but except for brief periods Syria's ever-diminishing Jewish community has remained huddled together in a ghetto. without collective or individual rights. Despite Government-monitored or staged media presentations for propaganda purposes, the only candid reports available on the condition of the Jews in Syria are those of escapees. The plight of Syria's Jews-menaced both by officialdom and by hostile Palestinian Arabs who have been moved into the homes left by Jewish escapees-has become an international issue of human rights, and world attention has been focused on the government's repressive tactics. No one knows what will become of the 4,350 Jews still in Syria.

The Jews of Lebanon-a country about which, at this point, it is difficult to generalize—have historically enjoyed greater freedom than any other Jewish community living in the Arab world. In fact, many Jews fled to Lebanon from other Arab lands in the years following Israel's independence, boosting the Jewish population there to 9,000 by 1958. In that year, in the wake of the attempted revolution in Lebanon, the Jews began to depart; the 1967 war and the infiltration of Lebanon by Arab terrorists caused most to fiee. The latest figure estimates the number of Jews still in Lebanon at 1,800, but that figure was calculated prior to the recent warfare there between Muslims and Christians, which has produced many Christian refugees and undoubtedly some Jewish ones.

Libya's Jewish community has virtually disappeared. Of the 38,000 Jews whose roots were deep in the North African terrain that is Libya today, perhaps twenty are left. Most fled in the years after World War II, which saw virtually unceasing violence against a community that had already suffered horribly during the war. One violent anti-Jewish program, in November 1945, was described by Clifton Daniel in the New York Times: Babies were beaten to death with iron pars. . . . Old men were hacked to pieces where they fell. . . . Expectant mothers were disemboweled. Whole families were burned alive in their houses." By the time Libya achieved independence in 1952, there were only 8,000 Jews remaining to attempt to take advantage of the equality purportedly of-fered under the new constitution. Libva's entry into the Arab League made life even more hazardous after the Six-Day War of 1967. Libya's remaining Jews were forced literally to run for their lives, leaving behind everything they owned; most became a part of Israel's refugee community.

What this cursory survey indicates is an unwavering pattern all over the Arab world. and reaching far back into history. No Arab nation has ever accepted the Jews (or any other minority) on an equal footing in its midst, none has given any sign of a readiness to do so, despite all the PLO talk of a "sec-ular democratic" state to be established in Palestine. No Arab state today is or has ever been secular; none is or has ever been democratic. It is in light of this melancholy fact, indeed, that one should understand the extraordinarily cynical "invitation" recently extended by various Arab governments, amid much publicity, to Jewish refugees from Arab lands, to return to their countries of birth and resume there the life of "harmony and amity" which they supposedly left behind. "invitation," by Lib-Responding to one such "invitation," by Lib-ya's President Qaddafi, the Tunisian-born writer Albert Memmi summed up the real plight of the Jews from Arab lands, and contrasted it to that of the Palestinian

irabs:

"Do you believe that the Jews who were born in Arab countries can go back, where

they had been robbed, massacred, and from which they had been expelled? . . When all is said and done, the disaster of the Arabs Palestine amounts to their having been displaced for some fifty kilometers within the same enormous Arab nation. How much more serious is our case: we Jews from Arab countries have been displaced for thousands of kilometers, after having lost everything."

ш

Quite some time before the 1947 Partition Plan which proposed the division of Palestine into a Jewish and an Arab state, there were British advocates of an exchange of populations—the Arabs of Palestine for the Jews in Arab countries-to facilitate the formation of homogeneous populations in the envisioned new sovereignties. (Modern precedents for such an exchange include those between Turkey and Bulgaria in 1913 between Turkey and Greece in the 1920's; in the postwar period perhaps the best-known example of an exchange of populations is that between India and Pakistan in the 1950's-81/2 million Sikhs and Hindus from Pakistan to India, an almost equal number of Muslims from India to Pakistan.) Among the arguments advanced in favor of the proposed Arab-Jewish exchange was that of the British Colonial Secretary in 1937, who observed before a hearing of the Mandate commission that since the Arabs living in the Jewish areas of Palestine "had not hitherto regarded themselves as Palestinians but as part of Syria, as part of the Arab world as a whole," they would be "going to a peo-ple with the same civilization" and "therefore the problem of transfer would be easy. In fact, a preponderance of the approximately 650,000 Arabs living in Jewish Palestine in the mid-40's were relatively recent arrivals, having been attracted there by the affluence and work opportunities created by the Jews (a circumstance that in itself gives the lie to present-day claims of a centuries-old Arab "Palestinian identity").

As is well known, neither the proposal for a Jewish state nor the plan for an exchange of Arab and Jewish populations won the approval of the Arabs themselves. They rejected the 1947 UN Partition of Palestine, and instigated hostilities immediately upon Israel's declaration of independence. Ironically, it was as a result of these Arab hostilities that the war of independence and the Arab-Jewish population exchange did

take place.

At the time of the 1948 war the invading Arab governments were certain of a quick victory. Arab leaders exhorted their fellow Arabs to leave Jewish Palestine in order to clear the roads for advancing Arab armies and to cause general chaos. They promised a triumphal return after the hostilities, meanwhile creating panic and fear by spreading false stories of Jewish "revenge." The Jews in fact had pleaded with the Arabs to stay. After the Arab defeat, of course, the Arab position changed: now their demand was for "return" of the "expelled" refugees to their former homes, but only after those homes ceased to be "occupied" by Jews. Emile Ghoury, Secretary of the Arab Higher Command, stated the new Arab position in the Beirut Telegraph on August 6, 1948: "It is inconceivable that the refugees should be sent back to their homes while they are occupied by the Jews. . . . It would serve as a first step toward Arab recognition of the state of Israel and Partition." Thus was created the status of semipermanent refugeehood which the "Palestinian" Arabs have assumed ever since.

Right after the war international experts cited undisputed evidence that resettlement of the Arab refugees within the larger community of Arab nations would not only benefit the refugees but would also contribute

needed additional labor forces to the underpopulated and underdeveloped Arab world.2 Iraq and Syria seemed especially ideal for such resettlement. A report by President Truman's International Development Advisory Board, headed by Nelson Rockefeller, asserted that Iraq alone could absorb an Arab refugee population of 700,000.3 As for Syria, a Catham House Survey estimated that that country "might well absorb over 200,000 Palestine refugees within five years in agriculture alone." In 1949 an editorial in a Damascus newspaper stated that "Syria needs not only 100,000 refugees, but five million to work the lands and make them fruitful." The paper suggested that the government place these "100,000 refugees in districts where they will build small villages with the money appropriated for this purpose," and in fact Syrian authorities began the experiment by moving 25,000 refugees into areas of potential development in the northern parts of the country. The overthrow of the ruling regime in August 1949 changed the situation, however, and the new leadership reverted to the rigid Arab League position against reset-

As late as 1959, UN Secretary-General Dag Hammarskjold reiterated that there were ample means for absorbing the Arab refugees into the economy of the Arab region. Hammarskjold detailed the estimated cost of the refugee absorption, which he proposed be financed by oil revenues and outside aid. But plans for permanent rehabilitation of the refugees were rejected by the Arabs, because such measures would have terminated their status as "refugees" waiting to be repatriated. At a Refugee Conference in Homs, Syria, the Arabs declared: "Any discussion aimed at a solution of the Palestine problem which will not be based on insuring the refugees' right to annihilate Israel will be regarded as a desecration of the Arab people and an act of treason."

Over the years there have been individual Arabs who have admitted in public to the cynical use made of the Arab refugees for propaganda advantages. Khaled El-Azm, who was Syria's prime minister following the 1948 war, wrote in his 1972 memoirs: "Since 1948 it is we who demanded the return of the refugees while it is we who made them leave. . . . We brought disaster upon one million Arab refugees. We rendered them dispossessed, unemployed. . . . We accustomed them to begging and . . . participated in lowering their morale. . . . Then we exploited

² This continues to be the case. This year it has been reported that Saudi Arabia alone is seeking to recruit up to half-a-million workers to develop its growing economy, and an Iraqi official confirmed recently that Iraq "inviting Egyptian farmers to settle is now there.

³ The report also acknowledged explicitly that what had occurred was an actual ex-change of populations. At the same time, anauthoritative study noted that the flight of Jews from Iraq had opened a gap that could best be filled by Arab refugees from Palestine. Even Arab sources were known to put forward suggestions of this kind. El-Balad, a daily paper in Jordanian Jerusalem, stressed the value to Arabs of the Jews' flight from Iraq. According to the paper "roughly 120,000" Jewish refugees had fled Baghdad to go to Israel, leaving all of their goods and homes behind them. "Now the 120,000 Arab refugees could replace the Jews, occupy their houses, and find opportunities to earn a livelihood which had been left vacant." In fact, many of these homes left behind in Syria, Libya, and Iraq by Jewish refugees who fled to Israel are today occupied by Arabs who formerly lived in Palestine.

them in executing crimes of murder, arson, and throwing bombs upon . . men, women, and children—all this in the service of political purposes in Lebanon and Jordan, Some of them become so accustomed to crime that their thirst for it is never quenched. . Others have gone so far as to acknowledge the reciprocal nature of the refugee question. Thus, Sabri Jiryis of the Institute for Palestine Studies wrote last year in the Beirut journal, Al Nahar: "This is hardly the place to describe how the Jews of the Arab states were driven out of their ancient homes, . . . shamefully deported after their property had been commandeered or taken over at the lowest possible valuation." Jiryis envisages a day when Israel will claim. " Israelis entailed the expulsion of some 700,-000 Palestinians. However, you Arabs have entailed the expulsion of just as many Jews from the Arab states.' Actually," he goes on, "what happened was a kind of 'population and property exchange,' and each party must bear the consequences. Israel is absorbing the Jews of the Arab states; the Arab states for their part must settle the Palestinians in their own midst and solve their problems...

But these are isolated voices. Today, the official Arab position remains as it was stated in 1949 by the Egyptian Minister for Foreign Affairs, Mohammad Salah al-Din: "Let it therefore be known and appreciated that, in demanding the restoration of the refugees to Palestine, the Arabs intend that they shall return as the masters of the homeland.... More explicitly: they intend to annihilate the state of Israel." It is in line with this position that the Arab governments over the years have rebuffed every effort to secure the well-being of their refugees, have insistedwithout legal or moral foundation-on their 'legitimate right of return," and have sought to obscure the fact that, with the exchange of Arab out-migrants from Israel for Jewish out-migrants from Arab lands that occurred in the late 1940's and early 50's, a balance of refugee populations has already been struck in the Middle East.

THE KEMP PROPOSAL: TAX RE-FORM THAT WILL CREATE JOBS

(Mr. MICHEL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MICHEL. Mr. Speaker, it is a very great pleasure for me to bring to your attention an article written by my good friend and esteemed colleague, Jack KEMP. The article, "Needed—Tax Reform That Will Create Jobs" appears in April's Reader's Digest and I am glad to see such an excellent article in a magazine that has such wide distribution both in the United States and throughout the world.

JACK KEMP reminds readers of some of the basic facts of economic life, facts which are too often forgotten today. If there is not enough capital to invest there will not be any jobs to fill. If Government increasingly takes money away from citizens in the form of high taxes, there is less money available for investment to create jobs.

Simple? Yes. Elementary? Yes. But almost totally forgotten by the Congress when it comes time to talk about job creation. Jack Kemp has not forgotten. He outlines his Jobs Creation Act in the article and shows how true reform can

lead to tax cuts and increased capital investment.

As the article notes, passage of the Jobs Creation Act would not result in a loss of tax revenues. This is because the lowering of high tax rates would remove the disincentives which presently exist to increased production, investment, and employment. Thus GNP would expand and thereby expand the tax base itself. Furthermore, the jobs created would be tax producing jobs in the private sector, rather than tax-consuming public service jobs.

But I believe the best way to learn about Jack Kemp's thoughtful approach to job creation is to read his informative and important article. I include the article in the Record at this point:

NEEDED—TAX REFORM THAT WILL CREATE JOBS

(By Representative Jack Kemp, Republican of New York)

In the traffic circle at Niagara Square in Buffalo, N.Y., stands the white marble William McKinley Memorial, a handsome 93-foot obelisk that has been a local landmark for almost 70 years. Unfortunately, it has also now become a landmark example of how not to create jobs. Consider:

With the city hard hit by the recent recession, a decision was made to create jobs by building a brick wall around the base of the monument. Buffalo hastly scraped up \$135,-000 to "match" \$440,000 in federal funds, and the bricklayers went to work. Only as the fortress-like wall began rising did citizens realize how grotesquely it altered the beauty of the square.

A great public outcry finally halted the job, the project was torn down, and the monument area restored to its original condition. But by the time the last truck had hauled away the debris, taxpayers all over the country had chipped in on a "project" that added nothing to the wealth or well-being of the city and did nothing for the area's flagging economy.

Buffalo needs jobs. America needs jobs, for the millions now out of work and for the almost two million young men and women who will be entering the market each year. But America does not need McKinley monument-type jobs like those urged by too many of my colleagues in Congress. Tax rebates, temporary tax credits and government makework programs, such as those advocated by the Carter Administration, cannot deal permanently with unemployment because they do nothing to increase real wealth and exist only as long as the private sector supports them with its taxes. Real jobs—those that produce goods and services, pay taxes and, in turn, create more jobs—come only one way: by harnessing private enterprise, the ultimate source of all of America's wealth.

Today, however, America's job machine, once the wonder of the world, is slowing down. Its fuel supply—the investment capital to start new companies, expand old ones, develop new products, replace obsolete or worn-out machines—is slowly being choked off.

How has it happened? The voracious combination of taxes rising on the tide of inflation has been eating up profits and discouraging the saving and investment necessary to increase our pool of job-producing, economy-expanding capital. Corporate after-tax profits (as a percentage of corporate domestic income) were 13 percent in 1965. By 1975 they had dropped to 5.1 percent.

This decline has also meant a drastic drop in retained earnings, the money left after paying dividends that business plows into job-producing modernization and expansion.

A study by the Machinery and Allied Products Institute, adjusted to show the effects of inflation, shows that in 1965 corporations had \$19 billion in retained earnings. A decade later, retained earnings had been wiped out.

The consequences of this economic reality are evident in every part of the country. In Buffalo, a major employer decides not to expand plant capacity. In Ohio's Mahoning Valley, a group of small steel companies considers a drastic pooling of resources to acquire enough capital to build a jointly operated mill that would replace antiquated blast furnaces. Fears of anti-trust violations are raised, but the alternative is frightening: get out of business. Indeed, this whole capital issue is the jobs issue. There is no economic lesson more basic than that capital creates jobs (a man can't hire people to cut wood if he hasn't first invested in saws) and increases productivity-and therefore wages by buying better, more efficient tools.

The most important factor in increasing productivity is the amount of capital investment spent per worker. In the 1950s, we were investing an average of \$84,000 per worker added to the labor force. In the '70s, that rate dropped to \$60,000 per new worker. As a consequence, American workers are losing ground in the productivity race against world

competitors.

Lest anyone think there is no correlation between investment capital and real economic growth, look at Japan. The free-world leader in productivity growth (close to 11 percent a year), it has also been the leader in private investment, plowing an average of 35 percent of its GNP back into capital expenditures. In West Germany, the figure is 26 percent; in France, 25 percent. The United States trails all major free world nations, with an investment rate of only 18 percent.

Because our investment rate ranks last among the major industrial nations, we also rank last in growth of real wages and benefits. From 1965 to 1975, the real income of the American worker increased only 15.7 percent. In Sweden, it increased 68.8 percent; in Germany, 78.1 percent; and in Japan, 137.9 percent. In the United States by 1950, per-capita income was twice that of Sweden or Switzerland. Today, both have surpassed us, and other industrial nations are not far behind.

If we are to meet our energy needs, compete with foreign industry, build a projected 28 million new homes and maintain our standard of living, staggering amounts of capital are essential—\$4 trillion in new investment between now and 1968. If present trends continue, we will fall \$650 billion short of this goal.

Despite such predictions—plus the relationship between our dwindling rate of investment and jobs—we find Congress today still talking about soaking the rich and increasing taxes on business. It is the spectacle of a man choking himself. But if the advocates of "getting the fat cats" and "placing the burden on business" have their way, we will see still further reduction of our ability to save, invest, energize the economy.

There is, however, a way to encourage investment and provide millions of new jobs. Many of my colleagues in the House have joined me in sponsoring the Jobs Creation Act. Its most important proposals:

An across-the-board cut of ten percent on all personal income-tax rates. The American taxpayer's need for permanent relief is painfully obivous. The total tax bill of the average American household in 1975 (the most recent year computed) was \$5,844, or 41.2 percent of household income. Because of the universality of the federal income tax, a permanent cut at that level would be the most equitable and easily attained form of relief. Such a cut would be far better than one-shot rebates of money that has already been funneled to Washington and is then sent back—without interest, plus the added ex-

pense of printing and mailing checks. We can best stimulate the economy by leaving more money with the people in the first place.

An exemption to each taxpayer of up to \$1,000 on a new savings account, money added to existing savings, or new investments in stocks and bonds. This will treat everyone equally and is a basic step to encourage the saving that is the heart of capital formation. Of the nine major industrial nations of the free world, the United States ranks eighth in taxation of what we consume. But it ranks first in taxation of wealth—the pool from which we must draw to finance the kind of productivity that makes things available to consume. Only by encouraging investment can we provide the trillions of dollars that American industry needs to supply real jobs for millions of workers.

An end to the double taxation of corporate dividends. This double dip by the U.S. Treasury has reduced the benefits of investment to individuals. After whacking 48 cents out of corporate profit dollar for federal taxes, the government then extracts tax a second time from the dividend checks of individual stockholders. The bite can go as high as 70 percent. This virtual confiscation of at least half and often more of a profit dollar has made many people reluctant to invest in business. The evidence: while 548 small companies (under \$5 million net worth) were able to sell stock and raise \$1.5 billion in capital in 1969, only four new companies issued stock in 1975, raising just \$16 million

A reduction of the tax rate on small businesses. Today many small businesses must pay 48 percent of all earnings above \$50,000 to the government—more than double the already high (20 to 22 percent) tax rate on earnings below \$50,000. The tax jump is a formidable disincentive to firms that might otherwise expand. While these smaller businesses cannot borrow one of the same terms as bigger companies, nor easily sell stock to raise funds, they are taxed at the same rate as multimillion-dollar businesses.

I also believe in adjusting personal and corporate income taxes to the consumer price index so that individuals and businesses are not penalized when they are pushed into higher tax brackets solely because of inflation. It is the automatic result of inflation that income taxes as a percent of the average worker's income have risen steadily since 1950. Case in point: a Chicago construction worker earned \$7,196 in 1965 and saw \$634, or 8.8 percent of it siphoned off to Washington via income tax. In 1975, he earned \$13,798, nearly double his pay of a decade ago. But Washington slipped \$1,386 out of his pay envelope—more than ten percent of his earnings. There's a hidden story here of how relentlessly the government tax machine runs on. When inflation is factored in, it turns out that the worker's pay increased only 12.4 percent over the decade, while his real taxes increased 28.1 percent, more than twice the wage rate.

The Jobs Creation Act would obviously increase after-tax corporate profits. This means bigger dividends, but also more money for job-producing capital expansion. In short, the "bonanza" would be widespread—through new jobs and through the financial benefits to the more than 25 million U.S. stockholders, many of them workers and retirees.

As I have found from the wide blue-collar support in my home district, working people understand all this better than do many supposedly pro-labor Congressmen. More than 51 million workers have a vital stake—beyond their jobs—in American business. Their retirement funds are invested in stocks and bonds (in fact, the controlling interest—at least one third of the shares—

of the 1000 largest U.S. industrial corporations is held by about 1300 of the biggest union, teacher and employe pension funds). In addition, more than 380 million life-insurance policies depend to a great degree on business investments.

A major study-directed by economist Norman Ture-shows that enactment of the Jobs Creation Act would restore production incentives and generate a substantial amount of new jobs and higher wages. As such economic activity increases, the tax base grows. The revenue loss would be substantially less than usual estimates because lowering the high tax rates, which are the roadblocks to a more vigorous economy, would result in an increased GNP and, there fore, increased tax base. This is because jobs in the private sector pay for themselves, while the taxpayer foots the bill for publicsector jobs. And, of course, more privatesector jobs mean fewer unemployment-related expenditures by government, such as food stamps and unemployment compensation.

On the other hand, if we go the route of government make-work, we will find ourselves dreaming up largely nonproductive jobs at a cost that could reach \$34 billion a year in public money. We are clearly at a time of decision. We can "create" jobs that are, in fact, an ill-disguised divvying of a shrinking economic pie into smaller and smaller portions. Or we can set about baking a bigger and better pie.

We've known the recipe for 200 years in America: it's the intrinsic genius of the capitalist system. But we've been stifling that genius through restrictive, regressive tax policies. It's clearly time to examine, revise and in some cases throw out those policies and let that genius breathe free.

OVERHAUL OF POSTAL SYSTEM TO AVOID BLEAK PREDICTIONS

(Mr. ANDERSON of California asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. ANDERSON of California. Mr. Speaker, on April 18 Congress will receive the recommendations of the Commission on Postal Service on changes necessary to maintain the Postal Service by the year 1985. And according to reports appearing in the press, they do not paint an optimistic view.

Of course, the full study report is yet to be released. Three of the recommendations are elimination of Saturday service, increasing Federal subsidies, and increasing the first-class mail rate from the present 13 cents to 22 cents.

In other words, the American taxpayer will see more of his tax dollars going to the Postal Service, he will pay more for the delivery of mail, and he will lose 1 day of service.

There can be no question that, considering the volume of mail and the size of our Nation today, the Postal Service is doing an incredible job. But it is also true that the past few years have seen a steady increase in the costs, coupled with a drop in service.

The Commission's report may well be realistic. But I strongly feel that the Congress should take any steps necessary to avoid the bleak outlook predicted for 1985—and apparently that will entail a complete overhaul and reorganization of the Postal Service.

INTRODUCTION OF LEGISLATION RESTRICTING SSI PAYMENTS

(Mr. SISK asked and was given permission to extend his remarks at this point in the Record.)

Mr. SISK. Mr. Speaker, today, I am introducing legislation which will for the most part restrict payment of supplemental security income—SSI—to citizens and legally admitted permanent resident aliens who have resided in this country for at least 5 years, and to authorize the deportation of any alien who within 5 years after entry becomes a public charge.

Recently a series of articles appeared in the San Francisco Examiner graphically illustrating how foreigners could sign up for SSI 30 days after they arrived here and since that time I have been deluged by letters from angry constituents. I believe many of my California colleagues have received similar letters.

I was in Congress back in 1972 when the SSI program was adopted and I strongly supported it. As I recall, some concern was expressed then that aliens would be allowed to receive these Federal welfare benefits as well as citizens, but our consideration of the issue came in the wake of a significant U.S. Supreme Court decision. On June 14, 1971, the Supreme Court in Graham v. Richardson, 403 U.S. 365, held that State statutes which deny welfare benefits to resident aliens or those which deny them to who have not resided in the aliens United States for a specified number of years violated the equal protection clause of the Constitution and encroached upon the exclusive power of the Federal Government over the entrance and residence of aliens. Against that background it was felt that we could not exclude legal resident aliens or impose a residency requirement for aliens, although the law does make it clear that illegal aliens are not eligible.

That belief persisted until recently. On June 1, 1976, the Supreme Court in Mathews against Diaz et al., the Supreme Court held, in effect, that the Congress has no constitutional duty to provide all aliens with the welfare benefits provided to citizens and that a residency requirement for aliens is permissible.

Therefore, I believe the time has come to close this loophole. I do not believe that we have an obligation to provide welfare benefits to aliens who have made no contribution to this country, have no equity here or have paid no taxes.

Before obtaining an immigrant visa, an alien must prove to the satisfaction of an American consular officer that he is not likely at any time to become a public charge in this country. To meet this requirement the alien usually presents evidence that he will have a job, that he has income or assets of his own to support himself, or that relatives in the United States will provide adequate support. Unfortunately we have found that relatives in the United States, many with considerable income and assets, who promise to provide support, claim that

they cannot provide that support once the alien arrives here. The courts have ruled that those affidavits of support filed by U.S. relatives are not legally binding. So the alien with no assets of his own, particularly the elderly alien with limited potential for success in the labor market, applies for and receives SSI as well as medicaid assistance.

The legislation I have introduced today will hopefully eliminate this problem by making all aliens ineligible for SSI until they have resided in this country for 5 full years. Illegal aliens, of course, will continue to remain ineligible at all times. The second bill would authorize the Attorney General to deport any alien who becomes a public charge within 5 years after his arrival here. Because in some cases an unavoidable event such as accident, disease, or illness develops after the alien's entry, the legislation will give the Attorney General discretionary authority to waive deportation in the case of total disability which arose after entry. The bill also requires the Secretary of HEW and State welfare agencies to report the names and addresses of aliens receiving public assistance on a regular basis and the Attorney General will be required to initiate an investigation to determine whether such aliens are deportable.

Mr. Speaker, welfare costs in this country have skyrocketed, and I am sure my colleagues will agree that this Government does not have an obligation to support newly arrived immigrants, particularly when financial solvency was a condition of their admission to this country in the first place.

try in the first place.

SELECT COMMITTEE ON POPULATION

(Mr. SCHEUER asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. SCHEUER. Mr. Speaker, on the opening day of Congress I introduced a resolution (H. Res. 70) to establish a Select Committee on Population. Over 235 Members have joined me as cosponsors of this proposal.

Presently, jurisdiction over populationrelated programs is scattered among many committees:

The Interstate and Foreign Commerce Committee has jurisdiction over the domestic family planning services and population research program authorized under title X of the Public Health Services Act and the family planning services provided under medicaid;

The Ways and Means Committee has responsibility for family planning services authorized under title XX of the Social Security Act;

The International Relations Committee oversees AID's population programs;

The Banking, Finance and Urban Affairs Committee handles housing legislation:

The Transportation and Public Works Committee is concerned with transportation;

The Agriculture Committee has jurisdiction over legislation affecting food and agriculture:

The Interior and Insular Affairs Committee is responsible for legislation affecting energy and the environment.

The Judiciary Committee has jurisdiction over U.S. immigration policy;

The Education and Labor Committee has the responsibility for developing population education programs; and

The Census and Population Subcommittee of the Post Office and Civil Service Committee has jurisdiction over demographic aspects of the population problem.

Some focal point within Congress is necessary if we are to cope with the problems caused by a world population that is doubling every 30 years. In 1972, the Commission on Population and the American Future, on which I served, recommended that a Committee on Population be established in the Congress. Clearly, one committee should have responbility for studying issues from the perspective of their effect upon population growth and distribution, for spotlighting problems, and for reviewing the implementation of Federal programs in these areas.

The proposal to establish a Select Commmittee on Population has received considerable support. Not only have 235 Members cosponsored the resolution, but also various individuals and groups from across the country have expressed their support for this proposal. Sunday's editorial in the Washington Post is the latest example of the growing awareness of a need for their select committee.

Mr. Speaker, at this time I would like to include in the Record some of the letters of endorsement which I have received and the Washington Post editorial.

These letters are evidence of a growing concern about the effects of current population growth on the quality of life in this country and around the world. I commend them to my colleagues' attention. The letters and editorial follow:

THE POPULATION INSTITUTE, December 23, 1976.

Congressman James Scheuer, U.S. House of Representatives, Washington, D.C.

DEAR CONGRESSMAN SCHEUER: I want to express my strong support for your efforts to create a Select Committee on Population for the 95th Congress. As a private organization concerned with ensuring better prospects for the present and future quality of life for the world's people, we feel that the causes and consequences of population growth must be forthrightly addressed.

There are few issues that touch so profoundly on most aspects of life as population growth. We in the U.S. feel these effects daily with increased congestion, inflation and warnings of scarcities of essential resources. And although we have made major strides in coping with our own population growth, a large potential for future growth remains which would only exacerbate present problems, as concluded by the Commission on Population Growth and the American Future.

Even in the U.S., there are 3 million women without access to family planning services. Aside from the demographic implications, it is essential that our citizens have the means to ensure the number and spacing of the children they desire for the well-being of the family and the nation.

The world population problem looms large for the future security of the world and its people. It is estimated that 500 million people are currently facing starvation or mainutrition, yet the present 4 billion could double in just 35 years. Although that prospect appears overwhelming, we can be guardedly optimistic as we see the result of the U.S. foreign assistance program. In recent years, our population programs have had notable successes and the climate of opinion in developing countries is generally one of enthusiasm for working in partnership with us in pursuing these essential development programs. We have gained a great deal of know-how and have the responsibility to use it well and effectively.

A Select Committee on Population would provide an excellent mechanism for investigating the causes and consequences of population growth and those approaches best suited to bring population in balance with the earth's capacity to support it.

Sincerely,

RODNEY SHAW, President.

HOLY REDEEMER COLLEGE, Washington, D.C., January 27, 1977. Hon. James H. Scheuer, U.S. House of Representatives, Washington, D.C.

DEAR MR. SCHEUER: I am delighted to have had the opportunity to meet and lunch with you, the other day; and I enjoyed your kindness in introducing me to the Speaker, Mr. O'Neill, and to your good friends, Congressmen Delaney, Wright and Brademas.

As I believe I indicated in our conversation

As I believe I indicated in our conversation regarding the demographic problem, I am very much in favor of your proposal for a Select Committee of the House on Population. It would be not merely useful but most important in sorting out the problems involved in the United States position on World Population as well as in our relations with the underdeveloped countries.

I feel strongly that, while definitely well-intentioned, the policies adopted by our government, thus far, do not reflect the total, benevolent attention we are capable of giving to this grave source of difficulty affecting both the future of the U.S. and world destiny. A Select Committee on Population could draw all the strings together, reflecting the political, social, economic, religious, ethical and ethnic thinking of our people vis-a-vis the demographic dangers facing the United States and the world.

Should you feel that I can be of any assistance to you in this matter, please do not hesitate to contact me. With every good wish, I remain

Sincerely yours, Francis X. Murphy, C.SS.R.

SIERRA CLUB,
San Francisco, Calif., January 24, 1977.
Congressman James H. Scheuer,
House Office Building,
Washington, D.C.

DEAR CONGRESSMAN SCHEUER: We are aware of your introduction of a bill, together with one hundred other sponsors, to create a Select Committee on Population in the House of Representatives for a two-year period. We support your efforts and believe the proposed Select Committee would be an important vehicle for raising population policy issues within Congress. Currently jurisdiction for legislation dealing with the many dimensions of population problems is split among the Committees on Education & Labor, Government Operations, International Relations, Interstate & Foreign Commerce, Judiciary, Post Office & Civil Service, and Science & Technology. A Select Committee would provide a much needed focus for discussion of the U.S. response to world population growth as well as our own. In addition, your proposal would generate interest in and knowledge of those domestic and foreign programs cur-

rently being supported by or proposed to Congress dealing with the reduction in population growth rates.

The Sierra Club has been concerned for many years about the rapid population growth rates in many parts of the world and the slower but nevertheless substantial growth in the United States and most other developed countries. It is our view that population growth intensifies the environmental problems associated with energy and resource use; increases pressure on sensitive agricultural, coastal, and wild lands; and makes achievement of air and water quality goals more difficult. Throughout the world, population growth threatens the survival of many species of animals and plants, is associated with deforestation and the spread of deserts, and makes the problems of hunger and poverty more difficult to solve.

We realize the Congress is looking for ways to streamline its committee organizations. However, we do feel the purposes of this proposed Select Committee are valid and important ones and are concerned that the goals be realized somewhere within the organizational structure of the House of

Representatives.

We would therefore like to add the name of the Sierra Club to the list of organizations supporting your bill. Please let us know how we can be of further assistance in speeding the passage of this measure.

Sincerely,

MICHAEL MCCLOSKEY, Executive Director.

DEPARTMENT OF STATE,
Washington, D.C., January 6, 1977.
Hon. James H. Scheuer,
House of Representatives,
Washington, D.C.

DEAR JIM: Or, with the new Administration should I call you Jimmy? Many thanks for your letter of December 27 with its enclosures. Here are a few comments:

First, your article appearing in the New York Times on December 23 was well balanced and constructive. Congratulations.

Second, the letter to your colleagues regarding the establishment of a Select Committee on Population has an impressive list of co-sponsors, but, more importantly, the resolution itself could not be stated better.

The longer I deal with population, the more I am convinced that the major weakness of most governments we are supporting is their failure to enlist their own people in social and community action programs for solving their own problems. Enlisting the positive support of people is especially essential in those poorest countries whose only real resource is their people. Until they do that, there is little that outsiders can do to help that will be of much use.

All the best this coming year in your highly important work, especially in the population field.

Sincerely yours,

MARSHALL GREEN, Coordinator of Population Affairs.

FORDHAM UNIVERSITY, DEPARTMENT OF SOCIOLOGY AND ANTHROPOL-OGY.

Bronx, N.Y., February 16, 1977. Rep. James H. Scheuer, U.S. House of Representatives,

Washington, D.C.

DEAR MR. SCHEUER: This is in support of your recent resolution, H. Res. 70, to establish a selective committee on population in the U.S. House of Representatives. I am pleased to see that this step is being taken and certainly hope that the committee is active in the near future.

As both a college teacher and an active professional demographer, I have been very concerned about the lack of a sound knowledge base in the formulation of U.S. policies and programs related to Population. In fact, recently chaired a Technical Consultants Panel of the U.S. National Committee on Vital and Health Statistics which was charged with reviewing "Statistics Needed for the Formulation of Fertility Policies." We found many gaps in the available data base. The same situation exists with respect to migration and health programs.

I urge this committee, when it is established, to work on some mechanism for a regular interchange between policy makers, including those in the House of Representatives and Senate, and professionals who are

also working in this area.

Again, this is to wish you success with your efforts in this area.

Sincerely,

MARY G. Powers, Professor, Member, Board of Directors, Population Association of America.

FRIENDS OF THE EARTH, Washington, D.C., February 1, 1977. Hon. JAMES H. SCHEUER, House of Representatives, Washington, D.C.

DEAR JIM: On January 22, 1977, the Executive Committee of the Board of Directors of Friends of the Earth unanimously approved the following resolution:

Whereas Friends of the Earth believes that many environmental problems would be alleviated if the growth of the globe's human

population were reduced, and

Whereas Congressman James Scheuer with more than 80 cosponsors, has introduced House Resolution 74, calling for a House Select Committee of Population to study means of reducing population growth, now therefore, be it

Resolved that Friends of the Earth supports House Resolution 74 and directs its Washington representatives to convey our approval to the sponsors and to urge its support by other congressmen and by our mem-

bership. This letter, then is to notify you of this resolution, of our support for it, of our thanks for the leadership you are showing on this, and our desire to help you make creation of a Select Committee on Population a reality.

> DAVID R. BROWER President.

LUTHERAN COUNCIL IN THE UNITED STATES OF AMERICA, Washington, D.C., February 25, 1977. Hon. JAMES E. SCHEUER. House of Representatives,

Washington, D.C.

DEAR CONGRESSMAN SCHEUER: I wanted to share a copy of the February issue of our office newsletter, FOCUS, with you. Your name figures prominently in two articles, the first dealing with the Maternal and Child Health Care Act, and the second with H. Res. 70, which would establish a Select Committee on Population.

I am grateful for the assistance which your special assistant, Marion Ein, gave to me in preparing an analysis of the Health Bill for comparative chart being prepared by the Interreligious Coalition on Health Care. The bill is an important one, and would represent a proper "next step" in the quest for a na-

tional health care policy.

I would also like to express my personal support for the establishment of a Select Committee on Population. While the work of the Subcommittee on Census and Population the House Committee on Post Office and Civil Service has been important, I personally believe that the issue does deserve much more visibility. Every best wish.

Sincerely.

ALLAN C. CARLSON, Assistant Director, Office for Governmental Affairs.

CXXIII-649-Part 9

UNIVERSITY OF WISCONSIN-MADISON, February 17, 1977.

Hon. JAMES H. SCHEUER, U.S. House of Representatives, Washington, D.C.

DEAR CONGRESSMAN SCHEUER: I read in Intercom, a publication of the Population Reference Bureau, that you have recently introduced a resolution to create a House Select Committee on Population. As a political scientist with a great interest both in Congress and in population policy developments, I would very much like to have a copy of that resolution and any supporting speeches made at the time of introduction.

The Intercom article quotes you as saying that Congress "has failed to devote adequate attention to the population issue despite the countless social, health, environmental and economic implications and consequences of population growth for individuals as well as entire societies in the United States and the rest of the world." I couldn't agree with you more. My doctoral dissertation at Yale dealt in part with documenting that inattention to population and related environmental issues, and I am currently writing an article on Congress and population policy-making for a symposium I am editing for the Policy Studies Journal on American population policy analysis. Thus I certainly wish you the best of luck with the resolution. Apart from Pat Schroeder's hearings in 1975 and 1976, there has been precious little follow-up to the Commission on Population Growth and the American Future. Congress can hardly afford to ignore the issues much longer.

I look forward to seeing the new resolu-tion and your introductory remarks.

Sincerely,

MICHAEL E. KRAFT, Assistant Professor.

INSTITUTE OF PUBLIC ADMINISTRATION, Washington, D.C., January 8, 1977. Mr. JAMES H. SCHEUER.

U.S. House of Representatives,

Washington, D.C.

DEAR MR. SCHEUER: Thank you very much for your letter of 6th January and enclosures. Your proposal to establish a Select Committee on Population is well-timed and much needed. U.S. policy in foreign aid is not on the best course and a well-written report from the Select Committee could certainly help in correcting that course

There is no doubt at all that population growth is causing the poorest group of nations to become progressively even poorer, relative to the richer nations and absolutely In particular, see the tables at page 10 of the enclosed study, "International Distribution of Income Among 188 Countries, 1971 and 1972", which I wrote in 1974 and updated in 1975.

Using simple World Bank Atlas data, I showed in this study that the long-alleged spreading of the gap was taking place. True, the poorest nations conduct vigorous trade by barter, so the World Bank's monetary measures of per capita income are deficient, but even doubling or trebling those incomes does not much change the basic dismal situ-

Worse, I firmly predicted both in the original paper and in the updated version that is enclosed that the standard or level of living would continue to fall, not rise, despite efforts of the developed world to assist the less developed nations. The World Bank confirmed this in its December preprint of the World Bank Atlas, I regret to say (see enclosed clipping from the New York Times, 27th December, 1976).

Economic incentives can be used to influence health programs, as was shown in the success of rewards for identifying smallpox

suspect cases. In fertility control, India has turned to more coercive measures. The availability of unrestricted abortion has been studied and found to be widely used in the nations where it is available (see enclosed article from the new issue of Scientific American).

Ideally, a "technical fix" would be developed, viz., a time capsule which would have zero side effects and provide complete protection while installed, yet be reversible when removed. Being a time capsule, it would not be affected by the vagaries of an illiterate population. Certainly the adjustment of social outlook on high fertility is too slow in countries even where the mortality is dropping dramatically and where retirement income is available from grown children. Fatalism and adverse expectations are the rule and are extremely difficult to change. A comprehensive review of the situation is long overdue.

Yours faithfully.

FRANK M. GRAVES.

ZERO POPULATION GROWTH, Washington, D.C., December 29, 1976. Hon. JAMES SCHEUER. U.S. House of Representatives.

Washington, D.C.

DEAR CONGRESSMAN SCHEUER: The national membership of Zero Population Growth, Inc. commends you on your introduction of legislation to create a Select Committee on Population in the House of Representatives. We stand ready to assist you in working for the passage of your bill.

It has been nearly five years since the Commission on Population Growth and the American Future, created by President Nixon, filed its report containing 52 recommendations for government action on population issues-recommendations which have virtually been ignored by Congress and the Executive branch.

In 1974, the United States played a major role in the U.N.-sponsored World Population Conference and was among the 136 countries endorsing the World Population Plan of Action. But in the two years that have followed the United States has done little to live up to the commitments contained in the Plan.

The world's population exceeds four billion and is doubling every 38 years, and growth rates in the poorest countries exceed three percent. Finite resources are causing the nations of the world to become increasingly interdependent; the United States, with only five percent of the world's population uses aprpoximately one-third of the world's non-reproducible resources and energy. Yet, surprisingly enough, the policymakers of this country demonstrate only a minimal awareness of the global implications of continued U.S. and world population growth.

We are hopeful that the Select Committee on Population which you propose will serve as a vehicle for promoting an increased awareness by those policymakers as well as the general public. The Committee can do this by demonstrating that continued population growth contributes to international food and resource shortages, environmental degradation, impeded development of Third World countries, and political instability.

Zero Population Growth, Inc. shares your belief that continued population growth is one of the root causes of many of the world's ills and we congratulate you for looking beyond the symptoms to the cause in seeking a solution.

Sincerely,

ROY MORGAN. Executive Director. AMERICAN FREEDOM FROM HUNGER FOUNDATION, December 30, 1976.

Hon. James H. Scheuer, U.S. House of Representatives, Washington, D.C.

DEAR CONGRESSMAN SCHEUER: The American Freedom from Hunger Foundation commends your efforts to establish a Select Committee on Population in the U.S. House of Representatives to examine on a continuing basis worldwide population growth, one of the most serious global problems of our time.

At present, the United States and other industrial countries are islands of affluence in a sea of poverty. The 12 to 1 income gap between rich and poor nations grows wider while population growth—most of it in poor countries—continues unabated.

Efforts to fight poverty around the world through assistance in health, education, nutrition and improvements in agriculture are strongly affected by these burgeoning popu-

lation growth rates.

The American people worry about the population problem and the growing split between rich and poor. However, we know that curbs on population growth rates alone cannot solve global inequities. We know that population is part of the systemic problem of social injustice. Deep inside, each American knows that security and peace in the last quarter of the 20th century depend on this nation taking an active and creative role in grappling with global problems.

A Select Committee on Population is animportant step in underscoring an American commitment to the ideals of egalitarianism and social justice worldwide.

Sincerely yours,

GERALD E. CONNOLY, Executive Director.

Washington, D.C., January 3, 1977. Hon. James H. Scheuer, House of Representatives, Washington, D.C.

DEAR CONGRESSMAN SCHEUER: Congratulations and thanks for taking the initiative to propose a Select Committee on Population. This should help surface the whole problem and clarify U.S. policy. You have certainly been most successful in obtaining the backing of a distinguished group of Congressmen. This initiative is just what the people who attend to the population growth situation need.

Sincerely,

FRED O. PINKHAM,
Former Assistant Administrator for
Population and Humanitarian Assistance, AID

N.O.N.,

Baltimore, Md., January 8, 1977.

Hon. James Scheuer,
U.S. House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN SCHEUER: This letter is written to extend the support and encouragement of the national membership of the National Organization for Non-Parents in regard to your proposed formation of a Select Committee on Population in the House of Representatives.

As one of its concerns, N.O.N. recognizes the need to raise the awareness of the public and policy makers to the role continued population growth plays in resource depletion, environmental corruption, and other political and economic global problems.

The World Population Conference held in 1974 was designed to focus world attention on population problems. While most nations recognized the existence of population problems within their own borders and in the world community, there was much disagreement about causes of the problems and workable solutions. A World Population Plan of Action was agreed to only after intense debate. This conference represented the first

time that virtually all the countries of the world faced up to population problems and their relationship to other important economic and social issues

nomic and social issues.

The U.S. policy makers and general public must be made aware of the important role our country needs to take in finding solutions to population problems globally as well as domestically. The U.S. must recognize that while Americans account for only six percent of the total world population, their high per capita consumption causes the size and growth of their population to have a disproportionate impact on world resources, a matter of considerable importance in view of the fact that it now appears that the combination of increasing world demands, higher costs of fuels, and lower grades of reserves is overtaxing supplies, according to the Fifth Annual Report of the Council on Environmental Quality.

We are concerned that the policy makers of our country are not paying sufficient attention to the tremendous implications population has for the future of our country and of the world. We fully support the establishment of a Select Committee to investigate the problems more intensively in the hope of laying the ground work for creative productive solutions.

ductive solutions. Sincerely.

CAROLE GOLDMAN, Executive Director.

INTERNATIONAL EDUCATION
DEVELOPMENT, INC.,
New York, March 2, 1977.

Hon. JAMES H. SCHEUER, House of Representatives Washington, D.C.

DEAR CONGRESSMAN SCHEUER: I was very pleased to read your recent N.Y. Times Op. Ed. article on the essential birth reducing programs to level population growth. I am in full agreement with that December 23rd statement.

I was also pleased to read in the February Interdependent an article stating you have proposed a House Select Committee on Population.

Our organization is about to begin a three year program funded by AID to mobilize indigenous organizations in Latin America. In the third year we will be including Africa in this effort. The purpose is to encourage local leaders to work collaboratively on integrated development programs. Most of the indigenous group leaders we will be working with relate directly to grass-root problems affecting the poor. Most of them have not been including a population component. I feel the program we are beginning has tremendous potential for reaching the rural poor in ways to which they can immediately respond.

I would appreciate the opportunity of meeting with you to discuss how we might try to raise the consciousness of other members of Congress as to the seriousness of the population growth rate. I look forward to hearing from you on your next trip to New York

Sincerely,

JANE K. BOORSTEIN, Director of Population Programs.

CONSORTIUM ON PARENTHOOD APTITUDE,
New York, N.Y., December 29, 1976.
Hon. James Scheuer and Colleagues,
House of Representatives,
Congress of the United States,
Washington, D.C.

DEAR MR. SCHEUER: The Consortium congratulates you and your colleagues who have proposed a House Select Committee on Population. Your leadership is greatly to be admired.

We recognize how vital it is for elected congressional leaders to examine profound world questions of food, resources, demographics. We hope the Select Committee will explore personal dimensions of the population problem as well—such as the psychological determinants of population growth in various nations of the world.

We offer all possible professional resources and support for your effort—and look forward eagerly to future word on creation of

the Select Committee.

We again thank you and your colleagues for your resolution to create the Committee. Sincerely,

ELLEN PECK, Co-Director,
For the Consortium Board and Membership

POPULATION FOOD FUND, Grand Forks, N. Dak., February 2, 1977. Hon. James H. Scheuer, House of Representatives, Washington, D.C.

DEAR REPRESENTATIVE SCHEUER: I was pleased to see that you had introduced legislation to establish a Select Committee on Population. We believe that, though the public has not yet accepted it, overpopulation is the most dangerous pressure on global stability we face.

I am enclosing a paper by Dr. Cargille [President of Population Food Fund] on NIH's lack of policy direction and also a paper which we prepared for a member of the Carter Transition Team at HEW. The latter outlines the immensity of the population problem, points to the institutional vacuum in policy making, and suggests the need for presidential leadership and a new institutional authority, perhaps at the Cabinet level, to formulate and coordinate all the elements of a coherent population policy.

Please let us know if the Population/Food Fund can be of any further assistance to the Select Committee in its important work.

Sincerely,

ELIOT GLASSHEIM, Executive Vice President, Population/ Food Fund.

THE ENVIRONMENTAL FUND, Washington, D.C., December 30, 1976. Hon. James H. Scheuer, U.S. House of Representatives, Washington, D.C.

DEAR MR. SCHEUER: The Environmental Fund is pleased to have this opportunity to comment upon the proposed creation of a Select Committee on Population. We believe that there is no more pressing or more urgent problem that needs to be addressed by Congress than the effect of population growth on the human environment.

The critical question that mankind faces in the last quarter of the twentieth century will be whether his ingenuity and creativity will stabilize his numbers or whether nature, through famine, pestilence and war, will halt population growth. It is a problem unprecedented in all of human history.

dented in all of human history.

Almost a decade ago, a Presidential Commission on Population recommended that the U.S. seek to stabilize its population. However, since that time, the U.S. population has not only continued to increase, but increased at a faster rate, primarily due to illegal immigration.

In the poorest parts of the world, populations continue to grow at rates higher than those of ten years ago. For example, Asia (excluding P.R.C.) grows by 2.2%; Africa grows by 2.8%; Latin America grows by 2.6%. These growth rates, if continued, mean populations will almost double each generation. But as a recent Worldwatch publication warned, the world's population may never double because of the growing environmental destruction and the resulting rise in death rates.

We do not believe that the development efforts of this country, or any other country, can be successful, if the world's population doubles in so short a time.

Speaking before the second committee of

the General Assembly a few weeks ago, Senator McGovern underscored the dilemma we face:

"Development which ignores actionoriented population programs is no development at all . . . Without a halt to population growth, development and food aid assistance cannot result in meaningful social change."

As poor nations' populations continue to grow, the gap between the rich and poor nations will continue to grow. In addition, the rapacious consumption of raw materials by the industrialized world cannot long be controlled if its population continues to grow.

The establishment of a population committee would enable Congress to consider carefully the problems raised by population growth both here in America and worldwide. It would make it possible to ask the questions that have not been asked before. The answers which the Committee seeks are desparately needed in this crowded world of ours. What those answers are we do not know, but we would gladly support the task of seeking them.

If there is anything we can do to help,

please let us know.

With every good wish, sincerely yours,

Justin Blackwelder.

[From the Washington Post, April 3, 1977] FIGHTING THE POPULATION BATTLE

A potentially useful project is gaining in the House to sharpen the American attack on the world population problem. Under a proposal carefully framed by Rep. James Scheuer (D-N.Y.) to mute domestic opposition, and co-sponsored by 200-plus House members, a select committee would be set up to study for two years (1) the "major adverse effects" of international population growth, (2) "approaches" to cope with it "with emphasis on those measures designed to reduce the frequency of conception rather than the termination of pregnancy," and (3) "means to encourage" countries to adopt "proven" fertility-reduction methods. Only tangentially, it seems, would the committee enter domestic waters

The steam behind this proposal seems to arise less from a dissatisfaction with U.S. government population programs than from the deepening frustration many Americans feel as they watch population growth chew into the resource base and development efforts of the world's needlest countries. American-supported family-planning programs are now funded at the rate of \$143 million. This is due to rise to \$177 million next year. To the extent that general development rather than any specific family planning program reduces fertility rates, to be sure, the American contribution to population control is much greater. But the problem remains huge.

Much more than money is involved. Research on cheap, reliable and safe contraception methods, for instance, is considered inadequate. The integration of family-planprograms into overall development planning needs to be furthered. Techniques for mobilizing social pressures against large families—techniques short of coercion—must be refined. The way the U.S. government is organized to conduct population activities, and to bring its influence effectively to bear on foreign governments, is scarcely beyond improvement. The Helms amendment, barring use of aid funds for foreign abortion programs; severely limits American relevance to foreign needs. It must also be asked if the United States would not have a higher claim to advise other countries on their official population policies if it had one itself.

The complexity of these questions is no reason why a select House committee should not help other concerned Americans, in and out of government, to cope with them. Rapid or "excessive" population growth is as urgent as any issue on the U.S. international

PRESIDENT CARTER'S DISCHARGE PROGRAM

(Mr. HAMMERSCHMIDT asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. HAMMERSCHMIDT. Mr. Speaker, I have introduced a bill that would deny automatic veterans' benefits to those individuals who will be receiving upgraded discharges from the administration's program for review of Vietnam-era discharges. I would like to invite those of my colleagues who are interested to join me as cosponsors.

This legislation is not offered as the result of bitterness, nor would it completely deny benefits to the veterans concerned. It merely makes the distinction between "compassion," which is the administration's purpose in upgrading discharges, and "honorable service," which is what the taxpayers of this country pay for when they extend veterans benefits to those who have earned them.

My bill will preclude veterans who have received upgraded discharges as a result of the lowered standards of the administration's program from automatically qualifying for veterans' benefits. However, it still allows these veterans to apply to the Veterans' Administration for a determination of the character of their service, under procedures that have existed for years. The Veterans' Administration will then review the applicant's service record comprehensively, and if it is found that a person's service was other than dishonorable, he will receive veterans' benefits. This is the procedure veterans with less than honorable discharges have been required to follow for years, and I see no reason to abandon the procedures for a select group who have received a Presidential windfall.

I believe this legislation is eminently fair to all concerned. The person who takes advantage of the lowered standards of the Carter program is not completely precluded from receiving benefits, and has the same opportunity to receive them as veterans of other eras. The veteran who served honorably and well is able to maintain some sense of worth regarding his effort. And the taxpayers who foot the bill will be paying benefits only to those who earned them with honorable service.

GENERAL LEAVE

Mr. MARRIOTT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include therein extraneous material on the subject of the special orders today by the gentlewoman from Maryland (Mrs. Holf) and the gentleman from

Illinois (Mr. O'BRIEN).
The SPEAKER. Is there objection to the request of the gentleman from Utah? There was no objection.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. Young of Florida (at the request of Mr. Rhodes), for April 4, 5, and 6, 1977, on account of eye surgery.

Mr. JEFFORDS (at the request of Mr. RHODES), for today and the balance of the week, on account of illness in the family.

Mr. STUMP, for today, on account of official business with the Subcommittee on Aviation, as requested by Chairman ANDERSON.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. MICHEL, for 30 minutes, today, and to revise and extend his remarks and

include extraneous matter.

(The following Members (at the request of Mr. MARRIOTT) to revise and extend their remarks and include extraneous material:)

Mr. Steers, for 5 minutes, today. Mr. Young of Alaska, for 30 minutes.

Mr. WHALEN, for 5 minutes, today.

Mr. McKinney, for 5 minutes, today.

Mr. STOCKMAN, for 5 minutes, today. Mr. RAILSBACK, for 5 minutes, today.

Mr. EDWARDS of Oklahoma, for 60 minutes, April 19.

Mr. Lent, for 15 minutes, April 5.

Mrs. HECKLER, for 5 minutes, today.

Mr. MARTIN, for 30 minutes, today. Mr. Burke of Florida, for 5 minutes, today.

(The following Members (at the request of Mr. HUCKABY), to revise and extend their remarks, and to include extraneous matter:)

Mr. Van Deerlin, for 5 minutes, today.

Mr. Annunzio, for 5 minutes, today.

Mr. PREYER, for 10 minutes, today.

Mr. Dopp, for 5 minutes, today

Mr. Nichols, for 5 minutes, today. Mr. Badillo, for 15 minutes, today.

Mr. Fary, for 5 minutes, today.

Mrs. Collins of Illinois, for 5 minutes, today.

Mr. Jones of North Carolina, for 5 minutes, today.

Mr. Badillo, for 60 minutes, on April 5.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted

Mr. YATES, and to include extraneous matter notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost \$1,047.

Mr. Wylie, to revise and extend his remarks following Mr. Hammerschmidt's remarks on H.R. 3695 and H.R. 5027.

Mr. Young of Alaska, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public

Printer to cost \$2,174.

Mr. Scheuer, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the Record and is estimated by the Public Printer to cost \$886.

(The following Members (at the request of Mr. Marriott) and to include extraneous matter:)

Mr. RINALDO in two instances.

Mr. SARASIN.

Mr. MICHEL in two instances.

Mr. WHITEHURST.

Mrs. PETTIS.

Mr. McKinney.

Mr. Forsythe.

Mr. GRASSLEY.

Mr. Collins of Texas.

Mr. BROOMFIELD.

Mr. Dornan in two instances.

Mr. DEL CLAWSON.

Mr. Bob Wilson.

Mr. LAGOMARSINO.

Mr. MARTIN.

Mr. ROUSSELOT.

(The following Members (at the request of Mr. Huckaby) and to include extraneous matter:)

Mr. Murtha.

Mr. RODINO.

Mr. CARNEY.

Mr. Patterson of California.

Mr. KOSTMAYER.

Mr. Byron in two instances.

Mr. Fraser in three instances.

Mr. Fary in two instances.

Mr. VAN DEERLIN.

Mr. DANIELSON.

Mr. CORRADA.

Mr. DE LA GARZA in 10 instances.

Mr. Rosenthal in 10 instances.

Mr. Sisk.

Mrs. LLOYD of Tennessee in five instances.

Mr. Annunzio in six instances.

Mr. Anderson of California in three instances.

Mr. Gonzalez in three instances.

Mr. Brown of California in 10 instances.

Mr. Hamilton in 10 instances.

Mr. OTTINGER.

Mr. BRINKLEY.

Mr. TEAGUE in four instances.

Mr. EILBERG in four instances.

Mr. Downey in two instances.

Mr. Ford of Michigan.

Mr. ICHORD.

Mr. Wirth in two instances.

Mr. NEAL.

Mr. HOLLAND in three instances.

Mr. McDonald in four instances.

Mr. PATTEN.

Mr. ZEFERETTI.

Mr. HARRIS.

Mr. HARKIN. Mr. CHAPPELL.

Mr. OBEY in 10 instances.

Mr. Dopp.

Mr. BINGHAM in five instances.

Mrs. Collins of Illinois in two instances.

Mr. PERKINS.

Mr. Sikes in two instances.

Mr. Stark.

Mr. EDGAR.

Mr. Mann in three instances.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 37. An act to amend the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5906), and for other purposes; to the Committee on Science and Technology.

S. 1153. An act to abolish the Joint Committee on Atomic Energy and to reassign certain functions and authorities thereof, and for other purposes; to the Committee on Rules

ENROLLED BILL SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 4800. An act to extend the Emergency Unemployment Compensation Act of 1974, and for other purposes.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 626. An act to reestablish the period within which the President may transmit to the Congress plans for the reorganization of agencies of the executive branch of the Government, and for other purposes

ADJOURNMENT

Mr. HUCKABY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 40 minutes p.m.), the House adjourned until tomorrow, Tuesday, April 5, 1977, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1152. A letter from Secretary of Agriculture, transmitting the annual report for calendar year 1976 on animal welfare enforcement, pursuant to section 25 of the Animal Welfare Act of 1970; to the Committee on Agriculture.

of Defense (Comptroller), transmitting notice of the intention of the Department of Defense to obligate funds available in the DOD stock fund for war reserve inventory for the Army, pursuant to section 735 of Public Law 94-419; to the Committee on Appropriations.

1154. A letter from the Deputy Director, Office of Management and Budget, Executive Office of the President, transmitting a report that the appropriation for fiscal year 1977 to the Department of the Treasury for "Salaries and expenses," U.S. Customs Service, has been reapportioned on a basis which indicates the necessity for a supplemental estimate of appropriation, pursuant to section 3679(e)(2) of the Revised Statutes, as amended; to the Committee on Appropriations.

1155. A letter from Deputy Director, Office of Management and Budget, Executive Office of the President, transmitting a report that

the appropriation for fiscal year 1977 to the Department of the Treasury for "Salaries and expenses," U.S. Secret Service, has been reapportioned on a basis which indicates the necessity of a supplemental estimate of appropriation, pursuant to section 3679(e) (2) of the Revised Statutes, as amended; to the Committee on Appropriations.

1156. A letter from the Deputy Director, Office of Management and Budget, Executive Office of the President, transmitting a report that the Federal Crop Insurance Fund has been reapportioned on a basis which indicates the necessity for a supplemental estimate of appropriation, pursuant to section 3679(e)(2) of the Revised Statutes, as amended; to the Committee on Appropriations.

1157. A letter from the Acting Secretary of the Air Force, transmitting the justification for the proposed closure of Craig Air Force Base, Selma, Ala., pursuant to section 612 of Public Law 94-431; to the Committee on Armed Services.

1158. A letter from the Acting Secretary of the Air Force, transmitting the justification for the proposed closure of Kincheloe Air Force Base, Mich., pursuant to section 612 (a) of Public Law 94-431; to the Committee

on Armed Services.

1159. A letter from the Acting Secretary of the Air Force, transmitting the justification for the proposed closure of Webb Air Force Base, Big Spring, Tex., pursuant to section 612(a) of Public Law 94-431; to the Committee on Armed Services.

1160. A letter from the Deputy Assistant Secretary of Defense (Installations and Housing), transmitting notification of the location, nature, and estimated cost of six construction projects proposed to be undertaken by the Naval and Marine Corps Reserve, pursuant to 10 U.S.C. 2233a(1); to the Committee on Armed Services.

1161. H.R. 6000. A bill to amend the Davis-Bacon Act, and for other purposes; to the Committee on Education and Labor.

By Mr. RODINO:

H.R. 6001. A bill to amend the Clayton Act to expand the applicability of section 7 of the act to activities which affect commerce; to the Committee on the Judiciary.

By Mr. ST GERMAIN: H.R. 6002. A bill to amend title II of the Social Security Act to provide that the automatic cost-of-living benefit increases authorized thereunder shall be made on a semiannual basis (rather than only on an annual basis as at present); to the Committee on Ways and Means.

By Mr. STANGELAND (for himself, Mr. Grassley, Mr. Nolan, and Mr.

PRESSLER):

H.R. 6003. A bill to amend the Agricultural Act of 1949 to provide that the eligibility for, and the amount of, certain disaster benefits paid with regard to wheat and feed grains shall be based on the actual acreage planted in such commodity; to the Committee on Agriculture.

By Mr. THORNTON (for himself, Mr. Brown of California, Mr. Hammer-schmidt, Mr. Murphy of New York,

Mr. Ryan, and Mr. Bonker): H.R. 6004. A bill to reduce the hazards of earthquakes, and for other purposes; to the Committee on Science and Technology.

By Mr. ANDERSON of California (for himself, Mr. Patten, Ms. Oakar, Mr. Baucus, Mr. Pike, Mr. Udall, Mr. Mann, Mr. Symms, Mr. Walgren, Ms. MEYNER, Mr. VANDER JAGT, Mr. EVANS of Georgia, Mr. Rogers, Mr. Steiger, Mr. ROBINSON, Mr. ARCHER, Mr. KIL-DEE, and Mrs. Collins of Illinois):

H.J. Res. 371. Joint resolution to provide for the designation of a week as National Lupus Week; to the Committee on Post Office and Civil Service.

By Mr. DEL CLAWSON:

H.J. Res. 372. Joint resolution to authorize the President to issue a proclamation designating the week in November which includes Thanksgiving Day in each year as National Family Week; to the Committee on Post Office and Civil Service.

By Mr. CONTE (for himself and Mr.

MARKEY):

H.J. Res. 373. Joint resolution proposing an amendment to the Constitution to provide for the direct popular election of the President and Vice President of the United States; to the Committee on the Judiciary.

By Mr. DERWINSKI (for himself, Mr. ANNUNZIO, Mr. BEARD of Tennessee, Mr. Benjamin, Mr. Burke of Florida, Mr. Crane, Mr. Dan Daniel, Mr. Dodd, Mr. Fary, Mr. Hyde, Mr. Mc-CLORY, Mr. MITCHELL of New York, Mr. MURPHY of Illinois, and Mr.

UDALL):
H.J. Res. 374. Joint resolution to authorize monument to General Draza Mihailovich in

the District of Columbia, in recognition of the role he played in saving the lives of approximately 500 U.S. airmen in Yugoslavia during World War II; to the Committee on House Administration.

By Mr. ENGLISH:

H.J. Res. 375. Joint resolution designating April 14, 1977, as National Free Enterprise to the Committee on Post Office and Civil Service.

By Mr. ENGLISH (for himself and

Mr. Hightower): H.J. Res. 376. Joint resolution to establish priorities for the usage of natural gas for agricultural purposes; to the Com-mittee on Interstate and Foreign Commerce.

By Mrs. FENWICK:

H.J. Res. 377. Joint resolution to authorize the President to proclaim the last Friday of April each year as National Arbor Day: to the Committee on Post Office and Civil Service.

By Mr. MOTTL (for himself, Mr. Archer, Mr. Badham, and Mr. MITCHELL of New York):

H.J. Res. 378. Joint resolution proposing an amendment to the Constitution of the United States to prohibit compelling attendance in schools other than the one nearest the residence and to insure equal educational opportunities for all students wherever located; to the Committee on the Judiciary.

> By Mr. MARKS (for himself, Mrs. CHISHOLM, Mr. CORNWELL, MARKEY and Mr. RICHMOND):

H. Con. Res. 187. Concurrent resolution expressing the sense of the Congress with respect to potential cancer risks associated with past radiation treatment of tonsil, adenoid, thymus, and similar problems; to the Committee on Interstate and Foreign Commerce.

> By Mr. HORTON (for himself, Mr. STEED, Mr. ABDNOR, Mr. BALDUS, Mr. FRENZEL, Mr. BLANCHARD, Mr. TREEN, Mr. ROUSSELOT, Mr. EDGAR, Mr. JEN-RETTE, Mr. HAGEDORN, Mr. PEASE, Mr. WHALEN, Mr. BEDELL, Mr. WHITLEY, Mr. Pursell, Mr. Flood, Mr. Cor-coran of Illinois, Mr. Robert W. DANIEL, JR., Mr. NEAL, Mr. WALGREN, Mr. O'BRIEN, Mr. Long of Louisiana, Mr. Nolan, and Mr. Patterson of California):

H. Res. 471. Resolution to amend clause 7 of Rule XIII of the Rules of the House; to the Committee on Rules.

By Mr. MATHIS:

H. Res. 472. Resolution expressing the sense of the House that no ban on saccharin should take effect without prior congressional approval; to the Committee on Interstate and Foreign Commerce. PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BLOUIN: H.R. 6005. A bill for the relief of Raymond W. Quillin; to the Committee on the Judiciary.

By Mr. MIKVA:

H.R. 6006. A bill for the relief of the Nedlog Co.; to the Committee on the Judiciary. By Mr. THOMPSON:

H.R. 6007. A bill for the relief of Habib Haddad; to the Committee on the Judiciary.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as

75. By the SPEAKER: Memorial of the Legislature of the State of Idaho, relative to firearms control; to the Committee on the

Judiciary.

76. Also, memorial of the Legislature of the State of Michigan, requesting that Congress propose an amendment to the Constitution of the United States providing for the direct popular election of the President and Vice President; to the Committee on the Judiciary.

77. Also, memorial of the Legislature of the Commonwealth of Virginia, relative to a national coal policy; jointly, to the Com-mittees on Interior and Insular Affairs, and Interstate and Foreign Commerce.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

70. By the SPEAKER: Petition of La Société des Quarante Hommes et Huit Chevaux, Grande Voiture No. 832, Paris, France, relative to amnesty; to the Committee on the Judiciary.

71. Also, petition of the Ohio River Valley Water Sanitation Commission, Cincinnati, Ohio, relative to the deadline for application of "best practicable control technology currently available" to effluent treatment under Public Law 92-500; to the Committee on Public Works and Transportation.

72. Also, petition of the city council, Seward, Alaska, relative to the trans-Alaska gas pipeline; jointly, to the Committees on Interior and Insular Affairs, and Interstate and

Foreign Commerce.

73. Also, petition of the city council, Yonkers New York, relative to quotas on the importation of raw sugar; jointly, to the Committees on Ways and Means, and Agriculture.

EXTENSIONS OF REMARKS

H.R. 4082-RENEGOTIATION REFORM ACT OF 1977

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. DOWNEY. Mr. Speaker, last week the House Banking, Finance and Urban Affairs Committee heard testimony on H.R. 4082, the Renegotiation Reform Act of 1977.

I am very concerned about the effects this bill would have on small businessmen. I intend to support efforts to raise the minimum threshold floor to \$5 million, to exempt many small businesses from the act.

I would like to submit my testimony as part of the RECORD:

HON. THOMAS J. DOWNEY'S TESTIMONY BE-FORE THE OVERSIGHT AND RENEGOTIATION SUBCOMMITTEE OF THE HOUSE BANKING, FI-NANCE AND URBAN AFFAIRS COMMITTEE, MARCH 29, 1977

Mr. Chairman, I appreciate this opportunity to appear before your committee today testify on H.R. 4082, the Renegotiation Reform Act of 1977.

Let me begin my testimony by stating that

I am no expert in the field. But, I did feel that it was important for the committee to hear a number of complaints about the renegotiation Act that have been voiced by the small business community of Long Island. With me today are Mr. Robert V. Cox and Mr. John Brown of the Long Island Association of Commerce and Industry and Mr. Manfred Goldstein, a professional consultant to small businessmen. They will fol-low up my comments with specific testimony concerning the effects of the act on small businesses.

I offer no specific solutions, although the small businessmen who follow me may. My interest is to outline some problems with the present act which I hope this committee will consider before it completes its work on the bill introduced by my colleague, Mr. Minish.

I know that many of the witnesses you will hear today share my concerns about the Renegotiation Act. These concerns were succinctly stated by Goodwin Chase, President Carter's choice to chair the Renegotiation Board, who has been quoted recently as saying that the Board's focus in recovering profits has been "generally in minimal dollar amounts—from small defense contractors".

As the chart I brought along with me shows, small businesses are renegotiated more often and forfeit more money than

their larger counterparts.

For instance, small businesses with total sales from \$1 to \$10 million accounted for 34 percent of all excess profit determinations by the Board between 1972 and 1976. In contrast during that same period, large defense contractors with sales of over \$250 million accounted for only 13 percent of these determinations. In terms of monies collected, the same pattern holds—approximately \$78 million from firms below \$10 million in total sales and approximately \$30 million from firms above \$250 million in sales. In the past four years, over one-third of the excess profit determinations and over one-third of monies retrieved has come from the smallest firms that file with the Board.

I think that the Board's administration of the act has been arbitrary and uneven as it affects the small business community.

I believe that this is a clear case of the government giving with one hand and taking with the other. Small business defense contractors are given specific set asides to insure their participation in our overall defense procurement plans. But, in effect, small businesses are being told by the Renegotia-

tion Board that they will be subject to disproportionate scrutiny if they do business with Uncle Sam.

My small business constituents tell me that one reason they are subject to such scrutiny by the Board is their lack of a battery of lawyers and accountants that large defense contractors use to combat allegations of excess profits. In addition, large firms can shift overhead costs, therefore paper profits, from one division to another in order to satisfy the Government—an accounting capability that small businessmen don't usually enjoy. In sum, my small business friends believe that the Board concentrates on them because they make easier targets than larger corporations.

I would like to make one final point based on testimony I have heard as a member of the Armed Services Committee. There has been a dramatic growth in other Government monitoring techniques dealing with defense procurement. Legislation and protections like the truth in Negotiations Act, the cost accounting standards, performance reporting, the establishment of the Defense Contract Audit Agency, and the Defense Contract Administration Services branch have all been instituted since the Renegotiation Act of 1951. It seems to me that these other checks would certainly be adequate to watchdog small businesses if they were exempted from the act.

In conclusion, let me say that I firmly believe in the principle of stemming excess profits in defense procurements. I also believe that the small businessman's experience under the present Renegotiation Act should be an important factor in the consideration of its future. Perhaps the solution may lie in raising the minimum threshhold floor to \$5 or even \$10 million to allow

the Renegotiation Board to concentrate its efforts against big contractors and not small businesses.

For, it would be tragic if small businessmen were driven from the defense procurement field because of misguided government regulation.

A PROPOSAL FOR AIDING RURAL FARMERS IN LESSER DEVELOPED COUNTRIES

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. OTTINGER. Mr. Speaker, I have recently had an opportunity to review a proposal developed by Dr. John Loret to aid rural farmers in the less developed countries of the world.

Dr. Loret is director of environmental

studies at Queens College of the City University of New York. He has conducted environmental study courses in Meso-America since 1969. In 1974, Dr. Loret initiated a program in simple subsistance technological skills in developing a living historical center on Long Island. N.Y.

I believe that Dr. Loret's ideas could be put to good use in programs such as those carried out by the Peace Corps, AID, and other agencies concerned with increasing food production to satisfy the needs of the world's growing population. I would, therefore, like to insert this proposal into the Record at this time:

A PROPOSED PROGRAM IN APPROPRIATE SUB-SISTANCE TECHNOLOGY FOR RURAL FARMERS IN LESSER DEVELOPED COUNTRIES

(By Dr. John Loret)

Today we are constantly reminded of the exploding world population and the much slower progress in increasing food production. Information collected by organizations such as the Food and Agriculture Organization (FAO) of the United Nations, World Health Organization (WHO), and U.S. Department of Agriculture (USDA) all indicate that the world is rapidly approaching a point when it will be unable to feed itself. The most immediate pressing problems exist in the lesser developed countries (LDC's) where in some cases more than 60 percent of the

population are suffering from "protein-calorie malnutrition." (1) Shortages of food supplies have prompted the United States and other aid-donor countries to develop international agricultural programs in LDC's. However, many of these attempts involved the exportation of western technologies which are oriented towards the problems of highly industrialized countries using modern intensive agricultural practices. Such programs had little or no effect on the productivity or increase in the standard of living for populations in rural areas of LDC's. (2) Many of these programs were preoccupied with production for commercial markets employing 20th Century technology that require advance knowledge and skills, high capital investment, and equipment dependent on industrial support systems and services. This emphasis on sophisticated intensive technology has proved to be too cumbersome and in some cases not adaptable to the environment of the host country. hence they were wasteful of capital and natural resources. In some cases Governments and wealthy business entrepreneurs have developed in LDC's that have been directed to short-term exploitation rather than toward a more sustained-yield agriculture.

Such programs would obtain capital from areas at a cost much less than its value. (3) People living in rural areas of most LDC's are poor. They are usually family farmers lacking capital, have an insufficient infrastructure, are uneducated and have little or no organization. Economist, Dr. E. F. Schumacher in his book, "Small is Beautiful,"

states the problem so:

"In many places in the world today the poor are getting poorer while the rich are getting richer, and the established processes of foreign aid and development planning appear to be unable to overcome this tendency. In fact, they often seem to promote it, for it is always easier to help those who can help themselves than to help the help-less ..." The new thinking that is required for aid and development will be different from the old because it will take poverty seriously. It will not go on mechanically saying: 'What is good for the rich must also be good for the poor.' It will care for people."

(4) If improving the nutritional intake and well being of the rural disadvantaged populations of LDCA's is to be one of our goals, then we must obviously plan to carry out development in such a way that the benefits are widely shared. Family farmers in rural areas of LDC's are large in number, however, the potential of their labor force has not been fully developed. With this group as a focus, the author, has proposed a scheme to train change agent teams in a comprehensive program in simple subsistence, labor-intensive and appropriate technology to work with family farmers in rural areas of LDC's. Because of their small size, many of these family farm enterprises could be the most efficient users of the land if sound basic ecological agricultural practices were employed and by using a technology requiring simple hand and animal powered tools and hardware. This could result in an increase in productivity in terms of food supply and afford a gain in the standard of living for this segment of the population.

In many rural areas of LDC's the existing technology is at a level more primitive than the self-sufficient systems which were used in many of the developing countries in the 19th Century. Further, many of these rural agricultural areas have never been introduced to the many efficient hand and animal tools and hardware technology of this last period.

The following are some of the advantages which could be realized by introducing a

simple hand and animal powered technology into rural and remote areas of LDC's:

 This simple technology can be introduced at a low capital investment.

2. Tools and hardware of this technology are not cumbersome and can be transported without difficulty to remote areas using existing roads and trails even using animal or man power

3. The users of this technology can be self-sufficient as the facilities and resources for producing and repairing the tools and hardware can be almost wholly indigenous.

4. The technology is dependent on hand labor and thus can be used by the broadest segment of these rural populations.

5. The simplicity of this technology has the capability for immediate implementation into many rural areas and family farm enterprises.

The main purpose of this proposal is to seek assistance in developing a program to train change agents and students who wish to work in LDC in the knowledge and skills of basic subsistence agriculture using hand and animal powered tools and hardware.

Such a training program organization must require multi-disciplinary approaches and should include:

I. An understanding of the intellect, energy and abilities of the people living in specific remote areas of LDC as well as their social structure and cultural patterns.

2. Proficiency in the skills and techniques required to make a general assessment of the physical environment in terms of land use potential and the ability to design and apply the most appropriate technology to an area.

3. Knowledge and skills in the use of the tools and hardware of simple hand and

animal powered technology.

4. The ability to develop a program of technological priorities for individual, group, or family needs, i.e. Many rural communities and farm families in LDC are living at a primitive, poor or less than subsistence level which results in high incidents of disease, malnutrition and possible retardation. Motivation for such groups and families is as expected, low. Thus in designing a program in such situations, it is important that the well-being of the group be given first consideration and attempts be made to improve the general health situation and thus stimulating their internal motivation to work.

It is contended that the establishment of new simple technologies will improve the productivity of existing technologies using the same infra-structure and other features of the economy and social structure. Further, a program as proposed will develop greater internal motivation and pride in the family farm enterprise.

It is not the intent of this program to replace any existing technology with a technology proposed to be "correct" but rather that the existing technologies be complemented and supplemented in a course of improvement.

Current agricultural curricula in modern universities in developed countries is not suited for application in LDC's. Many hungry nations are located in tropical or sub-tropical environments. Agricultural assistance these areas has been in terms of introducing technologies which were developed for temperate zones and not designed for the carrying capacity of tropical regional resources. mono agriculture, crops dependent on mechanization, irrigation and intensive fertilization. In addition, research in tropical agro-ecosystems have in the past been parochial and discipline oriented. Holistic approaches are not common and little work has been done to adapt technological finding to tropical systems.

Family farmers in rural areas of LDC's

do not need modern intensive agricultural technological systems but rather assistance to show them how hand care technology can be better used and how to integrate what is already known into developing a greater sustained yield.

The major objective of this Proposal will therefore be to develop a scientific farmer for small system agriculture, with the broadest possible knowledge and skills in simple appropriate subsistence technology.

The proposed program will be divided into two phases. Phase I, will include twelve months of intensive resident training in general background courses concerned with environmental and cultural aspects of a specific underdeveloped region or country as well as the learning of appropriate skills and technologies for use in these areas. The general courses will be designed to acquaint participants with the physical and biological environment of the host LDC, its people, their language, customs, contributions to civilization, history, education, economic and political problems and relations to other states. Training in appropriate technology studies will include the development of skills using basic hardware of simple subsistence technology, employing current agricultural ecological concepts, i.e., nutrition, ecosystem management, soil genesis, crop ecology, insect and pest management, small farm tems, food utilization, simple agricultural technology, livestock science and energy alternatives.

Upon completion of Phase I, participants will enter the second phase of the program and be required to fulfill a field practicum in a rural community of a LDC for a minimum of eighteen months. Individuals will be placed in teams consisting of four to five persons per team. Although all participants will receive the same training education, individuals will be encouraged to develop strengths and proficiencies in an area of their choice i.e., social or cultural science, nutrition, technological skills, farming, etc. Teams will be selected by placing individuals with varied competencies and skills on each team. Each team will function as a unit and work in a community in a rural area of a LDC.

Implementation of this program in rural areas of LDC's will make a long-lasting contribution to family farmers in these areas. Expectations of the program are realistic and get to the heart of the problem through education and demonstration. With such a program, rural farmers will be better able to evaluate the resources they have and learn how to organize social systems that will increase their standard of living using those resources.

THE PEOPLE WIN AGAIN—CAL-OSHA BITES THE DUST

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. HANSEN. Mr. Speaker, CAL-OSHA inspections have been declared unconstitutional and I commend the court for upholding the Constitution of the United States as well as the constitution of the State of California.

The consensus of Judge Green's decision is that CAL-OSHA inspectors cannot make random searches or inspections of private property. The CAL-OSHA decision marks the 11th consecutive time that OSHA has lost a court

case involving our fourth amendment guarantees against warrantless searches. Five Federal courts and six State courts in a row during the past 15 months have now consistently voted to uphold the constitution.

Judge Green states in his decision

The Court finds that the facts stated in each count do not constitute a public offense in that the statute relating to said counts is unconstitutional and void. Each charge is found to be unconstitutional on its face in that the warrantless searches demanded by the statute do not comply with the fourth amendment requirements of the U.S. Constitution and article I, section 13 requirements of the California Constitution.

Mr. Speaker, the CAL-OSHA decision will additionally strengthen the fourth amendment case against OSHA presently being considered by the U.S. Supreme Court. The news release follows:

CAL-OSHA DECLARED UNCONSTITUTIONAL

Washington.—U.S. Rep. George Hansen said today inspections under California's occupational safety and health law have been declared unconstitutional by a Fresno municipal court.

The California safety laws, now administered by CAL-OSHA, were forerunners of federal occupational health and safety

statutes.

The court found on March 24 that the statute is "unconstitutional and void" and that "the warrantless searches demanded by the statute do not comply with the Fourth Amendment requirements of the U.S. Constitution and Article 1, Section 13 requirements of the California Constitution."

California, Hansen said, joins federal decisions against OSHA in Idaho, Texas, Ohio, New Mexico, and Georgia, and State decisions in Maryland, Kentucky, Alaska, Oregon and Utah, where judges have found warrantless searches of private property unconstitutional.

"The California decision is a most significant one," Hansen said, "because it is against one of the toughest programs in the nation and since it involves the biggest State in the Union. It proves again that with courageous action, rights of the individual can be preserved by the Constitution and the Bill of Rights."

Hansen's congressional office serves as a national clearinghouse for complaints against

OSHA.

APPEARANCES COUNT, TOO

HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. ABDNOR. Mr. Speaker, recently the Daily Belle Fourche Post which is published in my South Dakota congressional district, carried a very thoughtful editorial on the subject of lobbying, and its potential for abuse. The editorial prompted one of my constituents, to ask for my comment, at the same time conveying her admonition that it behooves legislators to avoid not only evil but also the appearance of evil.

My constituent's concern underscores our need to be constantly alert for any abuses of the privilege of letting our legislators know our needs and ideas: MY GOSH

One does not realize how far removed he is from the realities of today's life until he reads something like the recent report on the amount of money spent by various organizations for lobbying in Washington.

It is almost beyond our comprehension to read that a postal workers union spent over \$8 million lobbying and that another \$2 million was spent by a letter carrier's union. The first reaction is "My gosh!"

Those are just two examples. There were numerous other groups and organizations which spent staggering sums in lobbying.

To your garden variety citizen who will probably never see more than \$1000 at one time in his lifetime, the knowledge that such sums are spent by one group or organization to promote their own interests is staggering. If they can spend that kind of money to promote their particular idea the returns must be enormous and who is paying the bill?

We don't know that such thinking is right. We only know that such thinking occurs. An early reaction is one of massive suspicion. It automatically makes any related legislative action highly suspect in the mind of the person who is aware that millions were spent by the parties affected.

One cannot say what is being done is wrong. Perhaps that is the way things are done. Congress should be aware, however, that a report like this coming on the heels of the huge back-door pay increase which the legislators quietly turned their back on and permitted to happen, really does raise questions.

Whether or not the conclusion is correct, the fact is that such information coming on the heels of the great pay raise thing, makes the ethics of congress suspect in the minds of millions.

It also raises the question as to how congress is able to withstand such massive pressures and whether this is a problem that can be controlled without excessive restriction or abuse of rights.

The theory seems to be that the more money you have to spend, the better your chances of getting your way. The theory probably works beautifully, but somewhere along that line of thinking lies the wreckage of justice and equality. Remember them?

TESTIMONY ON H.R. 2222

HON. SHIRLEY N. PETTIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mrs. PETTIS. Mr. Speaker, I would like to insert for the Record a copy of my testimony which I have given today to the House Subcommittee on Labor-Management Relations concerning H.R. 2222, a bill to amend section 2(12)(b) of the National Labor Relations Act to specifically make interns, residents, fellow and "other such trainees" employees.

My testimony follows:

STATEMENT OF SHIRLEY N. PETTIS

Mrs. Pettis. Mr. Chairman, for the greater part of my adult life I have been closely connected with the medical profession. As a former: nursing student, wife of a physician, wife of a medical school vice president, partner in a medical educational foundation, and now, as the Congressional Representative of one of the finest medical training facilities in Southern California—Loma Linda University Medical Center—I take more than just a

Subcommittee Member's passing interest in the measure we are considering today—H.R. 2222. My interest lies in seeing that the long-standing educational objectives of our nation's medical training centers are not jeopardized; and that the authority of the National Labor Relations Board is not undermined by Congress.

Therefore, after carefully reviewing the "decision and order" and the "dissenting opinions" of The U.S. National Labor Relations Board in the case of Cedars-Sinai Medical Center and the Cedars-Sinai Housestaff Association, 223 NLRB No. 57 (March 19. 1976), the amicus curiae brief submitted by The Association of American Medical Colleges, the arguments of the Physicians National Housestaff Association and various communications from several medical schools I am convinced that Congress is not justified in amending Section 2(12)(b) of The National Labor Relations Act as amended to specifically make interns, residents, fellows and "other such trainees" employees if they receive "a stipend or compensation for work performed in connection with such programs or for performing related work" provided that they have completed the educational requirements set forth in Subsection (IV) of Section 2(12)(a).

The reasons I take this stand are as follows:

(1) Internship/residency programs are traditionally an integral part of the medical education process. Interns/residents are selected rather than "hired" through the National Intern and Resident Matching Program—a process designed to fulfill the educational needs and requirements of these students—not to enable them to earn a living. Moreover, stipends received are characterized as "a scholarship for graduate study" and not compensation for services rendered. As a result, the intern/resident is primarily a student whose relationship with the hospital is based on an educational, rather than an industrial model.

(2) Application of the industrial model would clearly disrupt the graduate medical education process, since many fundamental aspects of medical training would become "bargainable" subjects, e.g., hours, wages, reappointment policies, rotations, testing, length of training programs. This would not only preclude individualized treatment of each graduate based on his/her needs, but leave the fashioning of the intern/resident's educational program to his/her exclusive bargaining representative. Moreover, hospitals would be forced to bargain about subjects over which they do not have sole control. Graduate medical programs are often jointly administered by a medical school and are prescribed by "the Essentials of Approved Internships/Residencies." In cases of deviation from "The Essentials" a teaching hospital would face loss of accreditation.

(3) Implicit in (1) and (2) is the inevitability of The National Labor Relations Board becoming the final arbiter concerning structure, content and form of graduate medical education.

(4) Congress has given the National Labor Relations Board the authority to define "employee" under the National Labor Relations Act. The NLRB did not refuse jurisdiction but held in case of Cedars-Sinai that house staff were students and as such made the same determinations as they have in the past for students who receive stipends. Congress defining a particular category of persons—interns/residents—as employees rather than leaving determination to the NLRB would undermine the Board's subtentile.

would undermine the Board's authority.

(5) As drafted, this legislation goes much further than merely according "employee" status to intern/resident physicians. It

would also convert into "employees" graduate students in other fields-law, arts, humanities, sciences-who receive a stipend or compensation for work performed in connection with a graduate program; thereby, overruling two NLRB cases—Adelphi University, 195 NLRB No. 107, and Sanford University, 214 NLRB No. 82—which respectively held that graduate teaching and research assistants were primarily students, not "employees."

Mr. Chairman, there are many other prob-lems associated with the approach of this legislation which I will not go into at this time. However, I would like to add one final note, lest the interns, residents and clinical fellows of this country feel I am unmoved by their representational claim that their primary interest for "employee status" is the improvement of patient care.

I do not doubt for one instant that their claim is anything but sincere. But I do not believe that the introduction of a third party-the collective bargaining process what traditionally has been a two party relationship—patient-physician—will serve the interests of either our medical training system or the quality of patient care. In fact, nothing will jeopardize the quality of our medical training and patient care more than our allowing yet another governmental -the National Labor Relations Boardto intervene between patient and physician for whatever reason.

Whose interest are we really serving by allowing an agency-the NLRB-whose expertise is not rendering quality medical care but arbitrating labor-management grievances-to decide whether a first year resident must take calls at night when it is inherently necessary for any physician to have had the experience of around-theclock patient care? How are we helping the patient by leaving it to collective bargaining whether a physician has taken enough medical histories, observed enough surgery, or read enough EKG's so that no more of the same should be required of him/her? Irrelevant questions? Hardly. These areas conceivably fall under bargainable "working conditions."

Mr. Chairman, I submit that individually and collectively the effects of this legislation would seriously reduce the effectiveness of medical training programs to the detriment of new physicians and the society at large, and therefore, strongly urge its defeat.

IT TAKES MORAL FIBER TO FIGHT COMMUNISM

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES Monday, April 4, 1977

Mr. McDONALD. Mr. Speaker, each year in this body we debate how much defense spending is enough for the needs of the security of this Nation. Each year the debate rages as to whether we have enough or too few of a given weapon. However, as was recently pointed out, it takes more than weapons to resist an enemy. There has to be the will to fight and win. We all recall the story of France prior to World War II wherein it had tanks superior to the Germans and a good Air Force, but these were of no avail because the leadership of the country and the rank and file soldier lacked the resolve to fight. The Honorable Julian Critchley, Conservative M.P. in Great Britain, recently summed up the problem in an editorial that appeared in the Daily Telegraph of January 12, 1977. I commend it to the attention of my colleagues:

A THOUGHT FOR TODAY'S DEFENCE DEBATE: IT TAKES MORAL FIBRE TO FIGHT COMMUNISM (By Julian Critchley)

Has Western Europe the moral fibre that would enable it to resist the encroachment of Soviet Russia? We know that the military balance has tipped in favour of the East, but what of the "moral factor"-first identified by von Clausewitz-which, by giving peoples and politicians the will to resist, should underpin Western defence? Have the changes in Western European societies in the past 25 years weakened or strengthened our resolve?

The changes in attitudes that have taken place are dramatic in their effect. There has been a growing materialism, with material values overtaking the spiritual at the expense of a readiness to serve and sacrifice. Idealism, such as exists, is directed either towards social problems or the Third World. Much

of it is Marxist-inspired.

Yet another change has been the decline of religion, the increasing secularisation of thought. The West is challenged by Marxism-a religion of sorts; can we meet this challenge without the transcendental factor in our moral and mental make-up? Religion has been a cement both for men and nations: will it be enough to put prosperity in its place?

A third change has been the end of patriotism. The nation-State survives but without the legitimacy of public affection. What is terrifying is that the politicians have put nothing in its place. The unity of Europe ought to be an end in itself, just as the unification of Germany and Italy, or of the con-tinental United States were "ends" in themselves, but we have been sold Europe not as a super-State to which we should owe love and loyalty, but as a super-market.

There is, too, a growing hostility towards history, the teaching of which is, in some parts of Europe, being positively discouraged. In its stead are to be found sociology and political science with their blueprints for the future. After all, what has history to teach us but wrong and out-dated ideas? Those who would manipulate our future must first

destroy our past.

In the West we overemphasise our rights and ignore our duties. Words like "service" 'duty" are thought old-fashioned. We make higher and higher claims on the State for this and that benefit, without being pre-pared to pay the price in terms of taxes and service. We have become hyper-critical of our own societies, of our own Governments, of our own institutions. We have been encouraged to develop feelings of guilt, guilt for our past; guilt at the idea that our Western societies are "capitalistic" and hence morally inferior to "socialist" societies. We tend to forget that capitalism as a wealthproducing mechanism actually works, at least in those countries of Western Europe where it is allowed to do so.

We have also been tricked into accepting the false notion that the quarrel between Nato and the Warsaw Pact is one between capitalism and socialism-in other words that we are prepared to fight, if need be, for dollars and Deutsche Marks-whereas our opponents are the defenders of the rights of the common man. The issue that divides East from West is not capitalism versus socialism but liberty.

These changes, intellectual and moral, which I have listed, have weakened the West. They mark the profound nature of the social revolution which Europe has experienced since the war

Until recently, Europe was governed by a

traditional elite which ran Foreign Offices and military establishments, and set the of government. The private ethos of Europe was upper-middleclass, and those who had not climbed the ladder aspired to it. All this has changed.

The lower-middle and working classes have moved into positions of power and influence. They have Americanised the social and ethiclimate of Europe. Their materialism, their acquisitiveness, their ability to win for themselves in a few years possessisons and living standards which would have been beyond the dreams of their grandfathers would put any American to shame.

THE NEW ISOLATIONISTS

Moreover, these people are not just interested in politics, for unlike their American counterparts they are not involved in the political processes and seem to have no wish to be involved. They are European isolationists in the same sense that their cousins in America were isolationists 50 years ago. They can see no point in standing up to the Soviet Union when time could be more usefully occupied watching football or television.

I do not exaggerate. In a study made for years 1972-73 by the Social Service Institute of the German Armed Forces, 24.3 per cent of men in uniform saw no sense at all in their military service, 26.3 per cent saw little sense, 21.4 per cent saw some sense, but then modified their view, while only 2.1 per cent. saw very much sense in

their military service.

Two world wars have debilitated the will of peoples and Governments. There is a feeling in Europe, not always articulated but prevalent, that almost any policy is better than war—for war only destroys without settling anything. At one level this is reasonable enough, for no one in his right mind would wish that we took war lightly; but, at another level, should not one ask whether a philosophy of pacifism in a world where few are pacifist is itself an health attitude?

There is also a tendency towards defeatism. Armies are generally regarded as superfluous, if not dangerous. The armed forces enjoy a lower social prestige, unlike their counterparts in the Soviet Union. The Swiss sociologist, Rolf Biegler in his recently published book "The Lonely Soldier" comes to the conclusion that the defence of a country is seriously endangered when defence and the soldier no longer enjoy public prestige, and when the public feels that their armed forces are no longer really capable of assuring the defence of the country anyway.

Are the politicians to blame? As power has passed from the MP, first to his party, then to the Executive, and now to the bureaucracy and beyond so popular democracy has been substituted for the Parliamentary kind. We do not lead, we follow. We tend to make sure first what is the trend of public opinion, and then pronounce ourselves in favour of it. And in which country in Western Europe is public opinion in favour of defence spending when it is not constantly and courageously reminded of its vital necessity? If the British Government cuts defence spending four times in less than three years, is it any wonder that the public continues to put defence spending at the bottom of its list of priorities?

How do the Russians regard us? We can hide nothing. They see our present confusions as the fruit of their policy of détente. They will cling to that policy. As we weaken, will become more truculent manding. Sooner or later they will try to translate their military superiority into po-litical advantage. At what point can we, and will we, resist?

And are Russians convinced that we are still capable of resistance, not only militarily but intellectually and morally? May they not come to believe that the whole structure of

Western defence, including the deterrent which depends for its credibility on the will to use it, is but a pack of cards?

The policy of détente is not new. It is peaceful co-existence under another name. Its essence is that there shall be no war but that the ideological struggle should be waged most intensely. What does that mean for our defence? It surely means that we must pay much more attention to the intellectual and moral factors that underpin defence.

What the West needs is leadership. Leadership that would restore our self-confidence. Leadership that would offer the peoples of Europe the objective of unity. Leadership that would take the ideological offensive. For we have the more powerful ideology. The idea of the rule of law, the idea of personal freedom, the idea of human dignity are extremely powerful ideas. They have agitated humanity for centuries and their appeal is fresh and inexhaustible. Should we not deploy them before it is too late?

REFORM OF THE FEDERAL GRAIN INSPECTION SERVICE

HON. RICHARD H. ICHORD

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. ICHORD. Mr. Speaker, as you know the Senate unanimously passed S. 1051 to eliminate recordkeeping requirements and supervision fees established by the U.S. Grain Standards Act of 1976, and to establish a temporary committee to advise the Federal Grain Inspection Service Administrator on March 30, 1977. I hope the House of Representatives will take expeditious action to see that this legislation receives favorable action.

This legislation makes necessary changes in the Federal Grain Standards Act passed late last year by Congress. The bill repeals provisions for inspection and weighing by country elevators, as well as any payment of fees by them. The cost of weighing and inspection by Federal agencies will be by appropriated funds to the Federal Grain Inspection Act. Commercial grain elevators are now required to keep for 5 years records of purchases, sales, transportation, storage, weighing, handling, treating, cleaning, drying, blending, and processing of various types of grains. This bill repeals provisions of the previous law requiring local elevators to keep records to 5 years. Export elevators would still be required to keep records on file of grain samples for 5 years. This proposal would help alleviate the bureaucratic problems of the small businesses having to comply with these ridiculous recordkeeping requirements

In addition, the bill would create a seven-member advisory committee from all segments of the grain industry, from farmers to consumers, to advise the Administrator of FGIS on regulation development, registration requirements for export elevators, weighing provisions, and improvement of grain standards. This advisory committee would allow thorough examination of the regulations

and help avoid any disruption in the marketing of grain.

I have cosponsored a bill identical to S. 1051 and am hopeful my colleagues will act favorably on this proposal.

DENIS BRACKEN

HON, GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. ANDERSON of California. Mr. Speaker, in this age of the specialist, it is becoming increasingly rare to see a person who routinely displays a wide variety of interests and abilities in his everyday life. Denis Bracken, radio reporter and personality for KNX in Los Angeles, was truly a "renaissance man" in modern broadcasting. His unfortunate demise last Sunday, March 27, was a cause of sadness not only to his family and friends, but also to the many people who had listened to his programs and reports over the years.

A native of New York City, "Deni" Bracken, as he was known to his audience, was a graduate of Fordham University where he worked as a student sportscaster. After starting his professional career in Syracuse, N.Y., he moved to San Diego as a reporter for radio station KSON in 1959. Bracken joined the KNX news team in 1963, where he worked until his passing this week at the age of 45.

Versatility is the word that best describes Denis' career. He was probably best known for his 6-day a week "Meet the Chef" radio show, which was broadcast nationally by CBS. In addition, he handled regular features such as "Voice of the People" and "Citizen of the Week." However, Bracken never lost touch with hard news, and often handled breaking stories of major importance. His last assignment was yet another tribute to his wide-ranging abilities as he handled the commentary for the Santa Anita Derby horse race.

I came to know Denis over the years as an excellent interviewer on a wide variety of issues. He had a way of asking probing, intelligent questions while at the same time making one feel relaxed and at ease. At the same time, few stones were left unturned—and I always came away impressed with his preparation in obtaining background knowledge on the issues.

Through the wide variety of coverage he handled on radio news, Denis Bracken became one of the best known broadcasting personalities in southern California. No matter what one's interests were, there was a good chance that a Los Angeles area resident had at some time listened to Denis Bracken doing a story on it. This versatility made him one of the mainstays of the KNX news radio staff, and he will surely be missed by those who worked with him over the years. Those of us who knew and lis-

tened to him almost daily will also miss his voice.

My wife, Lee, joins me in expressing our sincere condolences to Denis Bracken's lovely wife, Bee, and their children, Kathleen and Denis. Jr.

HISPANIC-AMERICANS LEARN THE GAME OF POLITICS

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. WIRTH. Mr. Speaker, William Greider's article "Hispanic-Americans Learn the Game of Politics" is an excellent outline of one of the important present and future forces in American politics. Hispanic-Americans number 11 million in the United States, and are starting to forge the kind of organization needed to make their voice heard.

This is particularly important in States like Colorado, where the large Chicano population has already made a governmental impact, and as a large minority group, is more clearly heard every

If we are serious about this democracy, it is essential that all members of the society have a fair stake and clear role. And to achieve these goals, organization must come from the grassroots, while help affirmative action, and support comes from governmental institutions and elected representatives.

Mr. Greider's good article once again reminds us of the continuing quest for justice and equity in a democratic society—a quest we must all recommit ourselves to every day. I commend it to my colleagues:

HISPANIC-AMERICANS LEARN THE GAME OF POLITICS

(By William Greider)

The enduring puzzle of modern politics involves a bit of magic—how do invisible people make themselves seen and heard?

The black minority figured it out. Now it appears that another vast constituency, long neglected, not listened to much, is beginning to learn the trick; the 11 million Hispanic-Americans.

"Hispanics are learning how the game is played," said Alfonso Ludi, an equal-opportunity officer at NASA by day and a community activist on his own time.

Willie Velasquez, of San Antonio, who heads the Southwest Voter Registration Education Project, explains: "It's similar to what happened in the South with blacks. The same thing is happening with Latinos except we're a couple years behind. But there's no question that political action is the priority now."

Rep. Edward R. Roybal, the Los Angeles Democrat who has started a fledgling five-member Latino Caucus on Capitol Hill, puts the transition in this perspective: "I still think we're in a gray area. I don't think you could say the Hispanic community is being recognized yet, but the potential is there. There's a different attitude."

While these things are impossible to measure, Washington does have some tangible evidence that the citizens of Spanish origin, from Mexican-Americans to Puerto Ricans, are influencing the political decisionmaking

with more force and more sophistication. This does not mean the millennium is at hand—any more than blacks have arrived at their political objectives. Still, the change is evident from a few years ago when the wide array of Hispanic groups often squabbled among themselves and watched in frustration as other special interests moved in on the pie—especially federal jobs and funds.

Consider these scattered examples:

The heat is rising on President Carter to follow through on his generous campaign promises of jobs for Hispanic-Americans, whose disappointment ranges from mild to furious. While some groups work with a velvet glove of low-key persuasion, others are keeping their "frustration visible," as Ludi put it.

This month, the Hispanic-American archbishop of Sante Fe, N.M., the Most Rev. Robert Sanchez, is scheduled to celebrate a special mass at the Lincoln Memorial, followed by La Marcha de Reconocimiento—March of Recognition—around the White House. Ludi, an organizer, accused the Carter administration of lapsing into "the business-as-usual treatment of our needs as soon as

the election ends."

Some Hispanic spokesmen are confronting, on a number of levels, the traditional priorities of filling minority-designated jobs with

"Generally, I think our goals are similar," said Lupe Saldana, an equal-opportunity officer at the Environmental Protection Agency and Washington representative for the GI Forum. "But we do find that history has put the blacks in almost as our middleman, where we have to go to him for our money and our jobs, and we don't like that

particularly."

The Mexican-American viewpoint, which has become much more unified in the last two years, is now an important factor in whatever legislation organized labor hopes to attain on the problem of illegal aliens from Mexico. The combined force of Hispanic groups might not be strong enough to sell all of their own proposals, but it is acknowledged that they can ally themselves with other interests to help kill the legislation, as they did last year.

The Hispanic groups went head-to-head with the NAACP last year on a particular issue—whether the Voting Rights Act should be broadened to cover the Spanish-speaking of the Southwest—and the Hispanic position

prevailed in Congress.

The growth of Latino elected officials has been slow over the last decade, according to Velasquez, but he expects the pace to quicken, based on the voter drives underway. Mexican-Americans now claim two governors and 74 legislators in the five states of Texas, Colorado, Arizona, New Mexico and California where they have 17 per cent of the population. Only 6 per cent of municipal officials are Spanish-origin citizens.

"There is a new type of leadership that is sophisticated and moderate," said E. B. Duarte, a special assistant and Hispanic liaison for the U.S. immigration commissioner. "These aren't people who are off the wall. They're taking government jobs and doing a good job with them. It's not different really from the Irish or Italians or blacks. It's the

American way."

A FEDERAL BEACHHEAD

A decade ago, when minorities were in ferment and struggling to develop voices in politics, the only Hispanic figures who got much attention nationally were the ones with the most provocative rhetoric, staging street confrontations or worse in the interest of arousing their own people and building political movements. In a sense, their success

is reflected in the greater sophistication and more substantial political muscle which has eclipsed them.

One place where Hispanics have made a small but important beachhead is in the federal government itself—the "ghetto in public service," as Ludi called the equal-opportunity offices in federal agencies. This at least gives them access to make the complaint, to gather the data and churn the political system.

Their favorite statistics are these: from 1968 to 1975, a period when minority employment was supposedly a priority, the federal government increased its Hispanic job-holders only from 2.8 to 3.3 per cent. They

expect Carter to do better, faster.

On the other hand, Ludi said, access and prodding do change things, as he has learned at NASA. The agency was burned by controversy when its well-known civil rights officer was fired. In the year which followed, Ludi said, equal-opportunity hiring improved considerably—including 33 Hispanic engineers, slightly more than the number of black engineers hired.

The black-brown conflict keeps popping up. Manuel Fierro, president of El Congreso, a lobbying coalition, wrote a very strong letter last month to HEW Secretary Joseph A. Califano Jr., opposing the appointment of William Robinson as director of HEW's Office of Civil Rights. Robinson is black and general counsel of the Equal Employment Opportunities Commission, where Fierro claims he neglected Hispanic employment discriminantion.

"We've got to overcome this idea that civil rights positions are only for blacks," Fierro said. "They called us, trying to get us together, and I said, look, I'm not interested in trying to sensitize him any more. He ought to be sensitized already."

El Congreso has been shot down on some other initiatives. Fierro lobbied in vain for Hispanics to serve as EEOC chairman and as assistant secretary of state for Latin Amer-

On the other hand, the Carter administration has made at least three Hispanic appointments to jobs at the assistant secretary level—including the new commissioner of immigration and naturalization, Leonel Castillo of Houston. So Fierro and other leaders are generally optimistic about the future even while they continue to raise complaints.

PLAYING "CATCH-UP"

On most issues, the Hispanic organizations see a natural alliance with blacks, seeking greater funding for federal programs, protecting human rights in domestic settings. So the points of conflict are often minimized.

"Within the last several years, the Mexican-American community has been playing a kind of catch-up in many communities," said Manueal Lopez of Los Angeles, a leader of the Mexican American Political Association. "At that time, they may have come in conflict with blacks who were in the managerial positions, but on a broader scale we seek coalition."

Rivalries between organizations and leaders are still a factor but apparently less dramatic than they once were. Congressman Roybal and others are organizing a National Association of Latino Democratic Officials, hoping to pull together some 5,000 to 6,000 elected and appointed public officials as a nationwide assembly which would lobby government.

Legislation to curb the influx of illegal

Legislation to curb the influx of illegal aliens by imposing federal penalties on employers who hire them has been bottled up in recent years by what Duarte calls "an unholy alliance" among the agribusiness lobby (which likes the influx of cheap labor), Hispanic-American groups, the Catholic Church (which supports the Hispanics) and

civil libertarians who fear broad-brush police actions.

The consensus position of the Hispanics now is that they would go along with tougher controls only with these conditions: The government grants an amnesty to the 8.5 million "undocumented workers" (5.5 million are Hispanic) who are already living and working in this country; the government creates some sort of reliable identity card for job-seekers so that Mexican-Americans will not be discriminated against; the government launches a long-range trade-and-aid program for Mexico to solve the problem at its source.

While the prospects for settlement are mixed at best, the Latino position suggests what some see as another future issue—when Hispanic-Americans develop a heightened sense of foreign-policy interests just as other ethnic groups, Jews and Irish and blacks, have tried to help ancestral homelands through U.S. diplomacy.

That development is still a ways off. But these things do change, "It's not really very strong right now, but it's growing," said Saldana. "We will begin to take positions on things like the Panama Canal treaty. We're gathering momentum. We're beginning to

see a broader picture."

MAYOR RIZZO DESIGNATES WEEK OF APRIL 17-24 AS RED MAGEN DAVID WEEK IN PHILADELPHIA

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. EILBERG. Mr. Speaker, Mayor Frank L. Rizzo has issued a proclamation designating the week of April 17-24 as Red Magen David Week in Philadelphia, and a copy of that proclamation has been presented by Managing Director Hillel S. Levinson to Joseph A. Katz, president of Liberty Chapter, American Red Magen David for Israel at appropriate ceremonies at City Hall.

The American Red Magen David for Israel is a volunteer nonprofit organization which solicits aid in the United States for the Magen David Adom, Israel's official Red Cross service.

Like the Red Cross, Magen David Adom provides life saving and healthgiving services for the people of Israel. It provides blood and plasma storage facilities, 24-hour ambulance service, first aid and emergency hospitalization services, and first aid training.

The American Red Magen David for Israel was formed as the authorized support wing in the United States to provide funds, blood plasma, trained personnel, ambulances, bomb shelters, and scientific equipment to Israel's Magen David Adom.

The Liberty Chapter of the American Red Magen David for Israel was organized here in Philadelphia, Tel Aviv's sister city, in 1975, to help Israel's Red Magen David build a central blood bank and fractionation center in Tel Aviv, and to provide funds and emergency sup-

plies to aid in the fight to preserve and ECONOMIC AND ENERGY GROWTH protect life in Israel.

SUPPORT FOR A NATIONAL HOLI-DAY TO HONOR MARTIN LUTHER KING, JR., CONTINUES TO GROW

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES Monday, April 4, 1977

Mr. CONYERS. Mr. Speaker, I want to bring to the attention of my colleagues a resolution adopted by the City Council of New York City on February 22, 1977 calling upon the Congress and the President to make the birthday of the late Dr. Martin Luther King, Jr., a national public holiday. Particularly on this day, the anniversary of Dr. King's tragic assassination, many in the Nation should pause, reflect upon, and rededicate themselves to his vision of equality and justice for all Americans and for peace in the world. Nine years after Dr. King's passing, respect continues to grow for his unshakable faith in people, his indomitable courage, and his magnificent ideals. This past weekend, the Committee for the Renaissance, a regional civic organization in the Mid-Atlantic States met here in Washington carrying thousands of signatures on petitions in support of legislation to make Dr. King's birthday a national holiday. Just today I received from Mr. Howard Bennett, chairman of the National Citizens Committee for a Martin Luther King, Jr., Holiday, 50,000 additional signatures in support of a national King holiday bill.

I applaud the New York City Council for their supporting resolution, and also thank 102 of my colleagues who have thus far joined with me in cosponsoring H.R. 2972, a bill that would make Dr. King's birthday a legal public holiday. The New York City Council resolution follows:

RES. No. 849

Resolution by the City Council of New York City Calling Upon the United States Congress and the President of the United States to Make the Birthday of the Late Dr. Martin Luther King, Jr., a National Holiday Whereas, the late Dr. Martin Luther King

has won national and international acclaim as one of the strongest advocates for human rights, human dignity and peace among nations, and

Whereas, the late Dr. Martin Luther King, Jr., devoted his life in a courageous and consistent struggle to attain these ideals for all people, and

Whereas, the peoples of the world of all creeds, races and national origin have been the beneficiaries of the work and activities of this great American, now be it

Resolved, That the Council of The City of York call upon the Congress of the United States and the President of the United States to take whatever steps are necessary to the end that the birthday of the late Dr. Martin Luther King be hereafter observed as a National Holiday in memory of the life, the work and the contributions of this great American.

February 22, 1977.

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Monday, April 4, 1977

Mr. BROWN of California. Mr. Speaker, I would like to share with my colleagues some information concerning the connection between economic growth and energy growth. I am sure all of you have seen graphs which show a close correlation between the annual percentage growths in gross national product GNP-and total energy consumption. Many people interpret these statistics to mean that any slack in our resolve to supply abundant energy would be disastrous to our material well-being. However, I have always felt that we could significantly decrease the amount of energy we use per unit of GNP without any damage to the economy. In order to see if my intuition was valid, I recently sought more information and here is what I found.

First of all, energy consumption per unit of real GNP has decreased over the last 60 years by nearly 40 percent-since 1947 the decrease has been on the average about 0.6 percent per year. These efficiency improvements have occurred in spite of an accompanying sharp decline up to 1974 in both the deflated cost of energy and the relative cost of energy compared to other commodities. As real energy prices were declining, energy in-tensive industries were still becoming more efficient. Also, our economy was evolving to a decreasing mix of goods to services—the latter are less energy intensive per dollar—and this trend is expected to continue. Nevertheless, the residential, commercial, and transportation sectors were requiring more energy per unit of product, which illustrates that there is a considerable potential for efficiency improvements. Since 1974, the price of energy has rapidly increased, in fact wiping out the total decrease in the real price of energy for the last half century, and we know this trend will con-tinue. With higher priced energy, a considerable improvement in energy efficiency is highly cost effective in every sector. Therefore, it appears reasonable to assume that the ratio of energy consumption to GNP will probably decrease even faster in the future.

In 1976, with the economic recovery and the cold winter, energy consumption rose 4.8 percent; yet the ratio of energy to GNP fell 1.8 percent which is three times the historical decline. Moreover, several sources estimate, through detailed examination of end use, that we can reasonably achieve an average yearly decrease in the ratio of energy to GNP of 2 percent-see John G. Myers, "Energy Conservation and Economic Growth-Are They Compatible?" the Conference Board Record, February 1975, and F. von Hippel and R. Williams, "Nuclear Energy Growth Projections", Center for Environmental Studies, Princeton University, March 1977. This large potential for effi ciency improvements is further substantiated by the fact that several European countries have a ratio of entry to GNP which is one-half and two-thirds of that in the United States.

The significance of these efficiency improvements over the next 30 years can be estimated as follows. If we assume that real GNP will increase on the average at this historical rate of 3.5 percent, which is an exceedingly optimistic assumption since population growth is slowing, than a 2 percent yearly decrease in energy to GNP means that energy consumption will grow at only 1.5 percent per year, which is roughly one-half its historical rate—leading to total energy consumption slightly over 100 quads in the year 2000. Consequently, we can maintain a dynamic economy, with maximum employment, while at the same time greatly slowing our growth in total energy consumption.

PRESIDENT CARTER PASSES ARMS TALK TEST

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES Monday, April 4, 1977

Mr. FASCELL. Mr. Speaker, on April 1, 1977, the Miami Herald carried an editorial entitled "Despite Arms Talk Setback, the President Passed a Test," about which I wish to comment.

It is a brief editorial, as good editorials should be; it is a good editorial in my judgment because of its perceptiveness of the implications of the known facts on our future relations with the Soviet Union on negotiating arms agreements.

The President is credited for taking a forthright position based on principle. The necessity to limit the proliferation and the reduction of strategic arms is imperative. President Carter has demonstrated his appreciation of this and his intense desire to achieve results. He knows the matter cannot be waffled; he knows that both sides must negotiate with honesty and full recognition of the implications of a breakdown of negotiations. As the editorial notes, this danger does not appear to be a likelihood.

More probably the Soviets are taking extra time to test President Carter's firmness and sincerity. On this, there should be no doubt, but as the editorial suggests that we allow the Soviets the necessary time to understand and digest this, we must be patient and not panic into moving precipitously in any direction.

With this last point in mind, I wish to note what appears to be the outcropping of the negative tone of "Monday morning quarterbacking." The tendency to criticize the lack of immediate success of the President's first negotiation with the Soviets is understandable, but regrettable. The President is on trial at home, as well as abroad, on a whole range of matters, and we, as a Nation, often are impatient when we do not have immediate success. But what about the success of this arms

talk-the Soviets were offered an innovative and justifiable plan for reductions and limitations of horrendously destructive weapons. The negotiations have not terminated; they must be continued and they will be, as has been agreed to by the Soviets. President Carter has set a solid base for future negotiations. As the Miami Herald editorial notes, he passed the test well and we can well afford the time needed for future, positive, no-nonsense results.

Mr. Speaker, I commend the editorial to the attention of our colleagues:

DESPITE ARMS TALK SETBACK, THE PRESIDENT PASSED A TEST

A new President embarking, as he must, on new theories and practices in the conduct of foreign policy is always a challenge to the rest of the world.

How much will he borrow from the past? How sincere is he? What is his real strength at home, not only with the people but also with the Congress, which will have to ratify one way or another any agreements to which he seeks to commit the Nation? Is he strong or is his negotiating muscle flabby?

These questions, we think, rather than Russian annoyance at Mr. Carter's global view of human rights, explain the apparent collapse of the Moscow talks on arms limitations. They have come to a halt, but not a screaming one as in the past when President Eisenhower was read the riot act after the U-2 incident, After all, didn't Andrei Gromyko speak good ole boy English in seeing Sec-retary of State Vance off at the Moscow airport?

President Carter has shown neither dismay nor anger at the outcome, toward which there had been so much diplomatic preparation. He showed his aplomb. He also showed some muscle in hinting at greater U.S. arms production. The Russians felt it. As for the curtness of the thing, the President is on record as once saying that "some people are concerned every time Brezhnev sneezes."

Mr. Carter's view for the consumption of the American public is that a quick agreement eliminating the new Cruise missile from the talks and a limitation at once on both old and new weapons was too much for the Kremlin to swallow on the spot.

This may be so, but in pre-Moscow negotiations it must be that the Russians knew what was coming and at least were salivating. The test theory is more likely. The Soviets have always thought that time is a diplomatic weapon. We haven't, but so should we in overcoming traditional American impatience with results.

The proof of the pudding, of course, is in the eating. Yesterday the Russians showed plainly that they had tentatively swallowed and wanted to digest Mr. Vance's proposals, for they joined this country in the announcement that the Strategic Arms Limitation Treaty talks will be resumed in Geneva in May.

The communique continued enigmatically: "The consideration of practical questions of bilateral relations produced several specific understandings." No identification of specifics on the one. Yet we are led to hope that it concerns a recess in the production of nuclear weapons. Both sides now possess enough of them to kill each other 12 times over, so their concern and possible understanding is with preventing proliferation of the ultimate

Jimmy Carter has passed his first world test: Stand up to the Soviets, but do it with diplomatic grace and preservation of principle. In good time he can go on from there.

INFORMATIVE AND ENLIGHTENING BY WILLIAM STATEMENT LUERS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES Monday, April 4, 1977

Mr. HAMILTON. Mr. Speaker, I found the following statement of Mr. William H. Luers to be informative and enlightening. I include it in the CONGRESSIONAL RECORD for the benefit and use of my col-

STATEMENT BY WILLIAM H. LUERS, ACTING AS-SISTANT SECRETARY OF STATE FOR INTER-AMERICAN AFFAIRS, BEFORE THE SUBCOM-MITTEE ON INTER-AMERICAN AFFAIRS, HOUSE INTERNATIONAL RELATIONS COMMITTEE, MARCH 24, 1977

Mr. Chairman: On behalf of the Bureau of Inter-American Affairs, I welcome this series of hearings. I hope they can contribute to an illumination and to a better appreciation of the profound changes that have taken place in our hemispheric relations over the past generation.

In this opening statement, I plan to describe briefly:

How our perceptions of the hemisphere

have lagged behind reality.

How differently we and the other nations of this hemisphere perceive our mutual interests.

How strikingly different our perceptions are from the Latin Americans on the proper emphasis on rights.

And how we are setting out in this environment to improve hemispheric coopera-

OUR PUBLIC AWARENESS OF THE HEMISPHERE

America's appreciation of and attitude toward Latin America and the Caribbean have not kept pace with the dramatic changes that have taken place in this hemisphere since the early days of the Alliance for Progress. Symptomatic of this lag is the fact that a major U.S. newspaper carried an editorial on Brazil only last month and referred to its capital as Rio.

Today the nations of Latin America and the Caribbean are more diverse, confident, independent and self-aware than any gional grouping in the Third World. they also have a crushing burden of foreign debt, an alarming population growth, and a dizzy rate of urbanization. As change has transformed these societies, inequities have become exaggerated—stark poverty exists alongside prosperity.

Most of the nations of the hemisphere have given up one-man rule for more institutionalized forms of government. But the dominant institution is the military. Democracy, never strongly rooted in Latin America, is less prevalent today than at any time since World War II. Yet, while there are repressive governments, many democratic freedoms coexist-paradoxically-with serious abuses of human rights.

Latin America and the Caribbean present most dramatically the importance of the North-South issues to the people of this counrty. From no other part of the world does foreign poverty impinge so intimately on our society or create such an implicit obligation to help:

As our living standards outstrip theirs, we become the illegal but logical haven for workers escaping the despair of poverty.

Regional proximity sharpens our humanitarian perceptions that poverty is a global rather than a national problem.

As our market for illicit drugs expands, our corruption and crime extends itself into the poor agricultural areas where the products the poppy and the coca plant valued commodities.

As our interchanges of finance, trade, and tourism grow, they impact deeply on citizens of this country.

And as citizens from our neighborhood enter the United States, our society is enriched and our labor force expanded.

The people of this hemisphere are longer in awe of us. They respect our vitality, success, technology and prosperity. But they charge that we have an insatiable thirst for the world's resources, that we are unwilling to share our expanding wealth, and that we have used our enormous power arbitrarily in the past.

If Latin Americans are still described in cliches by us, so we, likewise, are little understood by them.

OUR INTERESTS IN THE HEMISPHERIC NATIONS DIFFER FROM THEIR INTERESTS IN US

Let me turn now to discuss briefly how our interests in the nations of Latin America and the Caribbean contrast with their interests in us.

The United States:

Hopes that this hemisphere remains free from military conflict, from arms races, and from the proliferation of nuclear weapons.

Depends on the expansion of two-way trade with a rapidly growing and industrializing market.

Looks to the leaders of this hemisphere to play a mature and moderating role in the international councils now exploring the reordering of the world's economic institutions and procedures.

Desires to see the end of torture, persecution, arbitrary arrest and violence from the left and the right.

And hopes that economic development will be accompanied by the development of democratic institutions which provide the most certain guarantee of human rights.

the nations of Latin America and the Caribbean seek from us is quite different. From each nation of the hemisphere comes a different set of requests, reflecting the diversity of the region. You will be examining this diversity with my colleagues. There are common threads, however:

Trade and resource flows are at the center of their concerns. They want expanded and preferred access to our markets and guarantees of stabilized earnings from their exports. They want financial backing for their heavy debt burdens.

They insist that we not intervene in their internal affairs. Their obsession with U.S. interventionism has a long history. By interventionism they often mean not only military intervention and subversion but also the ubiquitous U.S. products and television programs.

They also want our respect, and our appreciation of their dignity, independence and sovereignty. They want our understanding and our attention.

Interdependence requires that we respond to these hemispheric interests. Otherwise we cannot expect responsiveness to ours.

DIFFERING PERSPECTIVES ON HUMAN RIGHTS

I would like here, Mr. Chairman, to make a comment on the differing perspectives that we and many Latin nations have on human rights.

Some governments see our urging respect for human rights as a new type interventionism. They are annoyed that our comments and program restrictions reflect failure to understand their particular domestic problems and security threats. We do not pretend to measure or judge the domestic threat. It is the type and severity of the response that concerns the American people. As President Carter said, no signatory of the U.N. Charter "can avoid its responsibilities to speak out when torture or unwarranted deprivation of freedom occurs in any part of the world."

And let it be said that other hemispheric governments and many people in this hemisphere welcome and are heartened by our renewed attention to values that still form a unique part of this New World. In our increased interest in human rights, we are not imposing our political preferences on any nation. But we are summoning governments to respect the principles to which they have ascribed in numerous U.N. and OAS documents.

There is a second aspect of the rights question, the perception of which separates us from many governments, leaders, intellectuals, and ordinary citizens in this hemisphere. We stress as fundamental the rights of liberty and freedoms from physical and mental persecution. Yet many in this hemisphere see the rights to food, shelter, work and survival as fundamental. If the right to be free from torture and persecution is vital to man's dignity, so are the economic and social rights. We must be alert to the charge that we justify our decision not to share our wealth on the grounds that others violate human rights. Our conscience thus eased, some charge, we continue to devour a third of the world's resources.

I should like to quote here again from President Carter's address to the United Nations. The human rights issue, he said, "is important by itself. It should not block progress on other important matter affecting the security and well-being of our people and of world peace. It is obvious that the reduction of tension, the control of nuclear arms, the achievement of harmony in troubled areas of the world, and the provision of food, good health and education will independently contribute to advancing the human condition. In our relations with other countries, these mutual concerns will be reflected in our political, our cultural and our economic attitudes."

Mr. Chairman, if we are prepared to match our morality with our generosity, if compassion for the poor is equal to our passion for freedom, and if we pay as much attention to egalitarian as we do to libertarian issues—our message will be heard and understood.

TOWARD IMPROVED HEMISPHERIC COOPERATION

Mr. Chairman, I am optimistic about our capacity to shape a more cooperative relationship with the other nations of this hemisphere.

First, we have with our neighbors a long experience in shaping economic change and growth. The global North-South debate in a real sense began in this hemisphere. The leaders of Latin America are advanced in their ideas on how the United States might become better partners in their economic development. We must address simultaneously global, regional, sub-regional and bilateral issues. Our approach to many economic issues will depend on solutions developed in a global framework. Other issues we can best work out through a strengthened inter-American system with the Organization of American States at its center. Still others we can best approach cooperatively through existing sub-regional organizations. Finally there will be a number of questions we can resolve most effectively only on a bilateral hasis

Second, this is a hemisphere whose nations are at peace with each other. Although there are repressive governments, there is no serious threat of war. The nations of Latin America and the Caribbean spend less on armaments than any region in the world. And while violence is too often turned inward in the Americas, the governments have the interest and capacity to improve the lot of their pepole. Most people throughout the Americas respond instinctively to fundamental humanitarian values. Even authoritarian governments accept these ideals and explain departures from them in terms of priorities rather than preference. Without war, governments and societies can devote their energies to people.

Third, we must make clear that the long

era of U.S. interventionism has passed. Governments will remain skeptical of our assurances. We must be open in our relations and abstain from our historic compulsion to design the future of our neighbors. We can convince them now only by our performance, not rhetoric.

Fourth, there is a new sense of cooperation between the U.S. private sector and the governments of this hemisphere. Governments have better defined the terms under which foreign capital is wanted. U.S. companies for their part are demonstrating a new sensitivity to the national pride and sovereign rights of their hosts. Improved cooperation with the private sector is critical to capital and technology transfers.

to capital and technology transfers. Fifth, the increasing role of hispanic Americans and people from the Caribbean in our society is beginning to raise the American consciousness about our neighborhood. We must develop together with the Congress and the media new ways and new programs for expanding our understanding of this hemisphere and its peoples. It is likewise essential that the nations of this hemisphere make greater efforts to understand us.

Finally, President Carter has shown an unprecedented interest in Latin America:

His first Presidential visitor was, by no coincidence, from Mexico. We have already set an energetic and cooperative course with the Government of Mexico to manage the complex problems we share.

A first priority of this Administration after the inauguration was to give urgent attention to negotiating a new treaty with Panama for the canal. This is an issue of importance not just between us and Panama, but for our relations with the entire hemisphere.

Several Foreign Ministers have visited Washington as a first step to rebuild our relations with traditional friends.

We have indicated a readiness to talk to the Cuban Government without preconditions on a range of issues that divide us.

We are committed to continued strong support for international and regional financial institutions and to sustaining significant bilateral assistance programs which are critical to the development needs of the region. In this endeavor we shall need the support of the Congress.

And although we know it will be difficult to move rapidly on the many economic issues critical to this hemisphere, this Administration is committed to engage the issues seriously.

Mr. Chairman, we have an opportunity and obligation to cooperate constructively with this new hemisphere. We must do so without sentimentality but with a sense of strong tradition, without paternalism but with respect for the sovereignty, independence, and dignity of each nation to find its own future.

MATCHING FEDERAL DOLLARS
FOR STATE'S SOCIAL SERVICES
PROGRAM

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. McDONALD. Mr. Speaker, today I am introducing legislation to allow the States to use "in kind" goods and services provided by private sources as part of a State's share in matching Federal funds for the State's social services program.

Presently, under title XX of the Social Security Act, the States are unable to claim in kind services—the value of

space, supplies, staff—provided by private institutions to meet the required State share of the cost of its social services programs. This prohibition does not apply, however, to in kind contributions of public institutions, which may be claimed as part of the State's share in matching Federal funds.

Not only is this unwarranted discrimination against private institutions, but it places an unnecessary burden on the States and the taxpayers. The function and value of an in kind service is the same whether provided by a private or public institution: it allows for more efficient social service programs by making use of existing facilities and personnel. The only difference is that in kind services of private institutions are funded by private sources, thus saving the taxpayers some money and, in effect, giving the State a free gift.

By being denied the use of available services provided by private institutions, States in many cases are put in the position of either discontinuing social service programs or increasing State expenditures and thus State taxes. For example, consider the following situation in my own State of Georgia. For the past 4 years the State has contracted with Berry College, a private institution, to provide day-care trainers to work in the various day-care centers in the area of Rome, Ga. The funds for this program came from the Appalachian child care project and the State was able to claim certain in kind services from Berry College as part of its share in matching Federal funds.

On August 1, 1976, however, all training in the day-care centers became funded by title XX. And because of title XX's prohibition against in kind services from private institutions, either the tax-payers or Berry College will have to provide the 25-percent required match in cash. It so happens neither can afford this, and the State's day-care programs in that area may have to be discontinued, even though both the State and Berry College are very eager to continue their relationship which has worked so well in the past.

The effect of the law as it presently stands is to add to the cost of social service programs and thus reduce the services available for a given amount of public funding.

Rural and nonurban areas, where public institutions often are not available, are particularly hard hit. The citizens of these areas are taxed to pay for social service programs, but are unable to use the facilities of their private institutions to compete fairly for the establishment of social service programs in their area. And to add insult to injury, they also pay State taxes to support State institutions in urban areas, the facilities of which are used as in kind services to attract social service programs away from the rural areas.

Mr. Speaker, whatever the reason for including the prohibition of in kind services from private institutions in title XX, I am sure it was not intended to add to the cost and discourage the establishment of social service programs. Removing this prohibition and allowing States to use all in kind services and goods

available to them will require only a minor change in title XX, but will allow much more efficient and fair operation of the social services programs.

I urge my colleagues to give their support to this legislation.

ELECTORAL REFORM: BEHIND THE SHINE, A SMELL

HON. DEL CLAWSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. DEL CLAWSON. Mr. Speaker, it is always incumbent upon us to look beyond the wrappings and the euphemistic labels of legislative packages sent to the Congress. Mr. James J. Kilpatrick in his column of March 29 in the Washington Star reminds us how close examination often reveals potential disaster. The column is included for the information of my colleagues at this point in the Record.

ELECTORAL REFORM: BEHIND THE SHINE, A SMELL

(By James J. Kilpatrick)

President Carter last week sent up his package of proposals for electoral reform. A sorrier package seldom has been dumped on the congressional stoop.

The President's plan contains four principal elements. The first, and worst, is for a constitutional amendment to provide for the direct election of presidents. A second measure would extend federal subsidies and controls to congressional elections. A third would scrap the Hatch Act, thus politicizing the federal civil service. The fourth would create an elaborate scheme for registering

overs on election day.

On the surface, the four-part package exudes the innocence of a gurgling grand-child. These reforms, it is said, would promote the principle of one man, one vote. They would increase political participation. They would strike a blow against the special interests. They would enhance the democratic process. But one is reminded of John Randolph's dead mackerel in the moonlight: The proposals both shine and stink.

The constitutional amendment would be absolutely destructive of one of the oldest, soundest, and wisest principles of American government: the principle of federalism. In a hundred ways, ours is of course "one nation." We have one Constitution, one flag, one currency, one defense establishment, and so on. But the great genius of the American plan is that diversity underlies the uniformity. When we act politically, we act not as citizens of the separate states. Politically we are not one consolidated nation; we are a federation composing a federal union.

No amount of pitter-patter about "equalized voting" can conceal the revolutionary nature of Mr. Carter's proposal. In asking that the old system be scrapped, he is striking at the very heart of our political process. Only three weeks ago the President himself seemed to realize this. In response to questions on March 9, he appeared uneasy about the proposed amendment. But someone, probably Vice President Mondale, abruptly turned him around. One should not get born again so quickly.

again so quickly.

The proposal for public financing of congressional elections is accompanied by psalms of piety and virtue. By limiting fat-cat contributions, and by subsidizing the candidates' campaigns, the invidious special interests

will be thwarted. Who could oppose a plan of such noble intentions?

Humbug! The President's pious little bill is the sweetest scheme ever devised for insuring the election of incumbents into the end of time. An incumbent member of the House or Senate already has every imaginable advantage over an unknown challenger. In the hundred-yard dash of a fall campaign, the incumbent starts about 30 yards down the track. Public financing would hand him 10 yards more.

The bill to scrap the Hatch Act sweats the same bogus perfume. The idea is to make the 2.8 million federal employees whole citizens again—to let them participate fully in partisan political activities. Only those in exceptionally "sensitive" positions would be inhibited hereafter. But the reasons for the Hatch Act are as sound today as they were when the act was adopted in 1939. Indeed, with the rise of public employee unionism, the reasons are all the more compelling. This is a bill to create a Democratic political machine. It cannot be successfully disguised.

Nothing good can be said of the President's scheme for election day registration. Ostensibly, the idea is to remove those terrible "antiquated" and "arbitrary obstacles to voting." Under Mr. Carter's bill, states would be com-pelled to register and to give a ballot to any person who staggers, stumbles, is led or bribed to the polls on election day. The bill bristles with formidable penalties for fraud, but these are the kind of fictitious penalties, like \$500 fines for littering, that never are imposed. There would be no practical way of detecting or punishing the phantom voters who could be herded like sheep to the polls. The package, in brief, is a bad bill of goods. The measures might be great for the Democratic party, but if they pass, Lord help the Republic.

ENERGY AND THE NEW CIVIL WAR

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. TEAGUE. Mr. Speaker, the hardships of this last winter and the natural gas shortages which resulted have set different regions of this country at odds with each other. Charges of fuel withholding have been leveled at the Western and Southwestern States by the Eastern and Midwestern States. They say that their development has been deliberately prevented. The Western and Southwestern States are hesitant to develop the oil and gas that lies on their Outer Continental Shelves. They feel that it is unfair that similar demands are not made on the eastern coast States. This internecine conflict is truly deplorable. A description and attempt at resolution of this problem is contained in the following editorial of the March 12, 1977. Houston Chronicle:

Hypocritical and Parochial Withholding of Energy

"This winter politicians (from the East, Midwest and West) and judges have sat on huge deposits of fossil fuels, while their constituents have frozen." . . . "To my mind there is a deplorable, hypocritical, parochial brand of withholding that is growing all the more prevalent in the national energy policy debate."

Strong words those. And we could not agree more. They are Sen. Lloyd Bentsen of

Texas describing known and probable natural gas and oil deposits in and off the Eastern and Midwestern states whose development has been deliberately and admittedly prevented.

As Sen. Bentsen says, it is neither fair nor rational to drill off the Texas and Louisiana coasts and refuse to drill off other coasts. Neither is it fair nor rational for those consuming states to get gas at a low, subsidized price while the people of Texas and other producing states pay, through their free intrastate marketplace, for virtually all the natural gas exploration that is being done in the country.

For this same hard core of people as Sen. Bentsen describes to then have the arrogant effrontery to charge that gas is being withheld from them by the producing states and the oil-gas industry is just too much. We would not think anyone could be so shame-

There is a hue and cry from these demagogues for yet another "investigation"—all the others having been fruitless—into suspicions of withholding of gas from the interstate market. That is being done.

Very well. Then let there be an investigation of the withholding of energy from production in the East and Midwest, Sen. Bentsen has called on Interior Secretary Cecil Andrus for just such a probe. He cites at least three known areas in the East and Midwest "where there was natural gas in the ground that was not being produced and supplied to the American people during the coldest winter in the history of our Republic. I want to know how many other cases there are."

What is fair in one instance is fair in another. Unfortunately, fairness and rational debate are seldom in the vocabulary of those who have tried to turn the serious questions of energy policy into emotional diatribes.

of energy policy into emotional diatribes.

We are sure that Sen. Bentsen deplores as much as we do that the country cannot address its energy problems without these attempts from consuming states to set one section of the country against another.

tion of the country against another.

But one can only take so much. The oilgas producing states are being subjected to ideological and political warfare. They cannot be expected to stay silent while being crucified in a frantic attempt to shift the blame from where it belongs to those who have warned for decades that precisely what happened this winter was going to happen.

COUNTY BOARD OF ELECTIONS REACTS TO CARTER VOTER REGISTRATION PROPOSAL

HON. EDWIN B. FORSYTHE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. FORSYTHE. Mr. Speaker, all of my colleagues here in the House are aware of President Carter's March 22 election reform proposal. Of that five-part package, perhaps the most controversial "reform" proposal is the so-called "Universal Voter Registration Act." The purpose of this proposal is to simplify registration and supposedly thereby enable millions of additional voters to participate in Federal elections.

In the State of New Jersey we have postcard voter registration and have been able to substantiate very little if any connection between easier registration and increased participation in elections. Additionally, postcard registration has it-

self created enough problems to make local election officials quite apprehensive of the sweeping changes proposed by President Carter.

For the information of my colleagues I am including in the RECORD of these proceedings a recent letter from one of the county election boards in my congressional district.

Mr. Speaker, an informed and participating electorate is one of the fundamental strengths of a democracy. I think I can say without hesitation that we all support the principal underlying attempts to increase voter participation. Unfortunately, however, as responsible legislators we also have an obligation to our constituents to provide laws which reflect the realities of the world in which we must function.

The following letter, I think, highlights some of the unrealities of the Universal Voter Registration Act. As the letter states,

Too often legislators dream dreams without taking into consideration the practical.

In protecting our constituents' right to a fair election process, I strongly feel that we have no choice but to be practical in spite of the temptation to dream.

BURLINGTON COUNTY
BOARD OF ELECTIONS,
Mount Holly, N.J., March 24, 1977.
Hon. Edwin B. Forsythe,
Cannon House Office Bldg.
Washington, D.C.

Dear Congressman Forsythe: As members of a County Board of Elections, we strongly oppose voter registration at the polls. We look upon the right to vote as a privilege that should be extended to everyone who can qualify; but, with that privilege, should be born the responsibility of establishing proof of those qualifications. It is no greater effort to go to the proper authority to register in advance of an election, than it is to go to the polls to vote on election day. With registration by mail, one need not even leave his home to register to vote.

Workers at the polls should not be given the authority or responsibility of determining a persons qualifications to register; nor should they be given the added burden of handling registrations while they are supervising an election. A poll workers' day is long and arduous, and if there are 50 people in line waiting to vote and register at the moment the polls should close, they must be permitted to do so and the election could go on ad infinitum.

With what identification does one establish qualification to register to vote? A birth certificate and drivers license may establish age, but neither establish citizenship or residency. Many people hold a drivers license from another state or county. A property deed does not necessarily establish residency, since many people own dual properties. One could register from a resident property and again from a vacation property. The same person could use a different means of identification to register in several different locations. A person could register in the name of a deceased person before the death is known. Providing false identification is simple and the possibilities for fraud are endless.

Imposing large fines and years of imprisonment for fraudulently registering to vote is similar to locking the barn door after the cow is out—it is after the fact. Moreover, with the large court backlogs, it could be years before an offender would be penalized. Courts are lenient in regard to voting infractions; Prosecutors don't follow through, and

election boards cannot afford to hire suffi-

In Burlington County, we have uncovered some fraud in Registration by Mail simply because it is made so easy, and because the forms get into the hands of irresponsible people who use them. One is the case of the mother who signed her two sons names to registration forms. Our appeal never reached the Court, because the Prosecutor contended that, since the boys did vote, the intent was there; and the mother, being next of kin, had a right to sign her sons names. Another, two minors registered and the fact was discovered by parents who notified the Election Board. Then, there is the case of a dozen or so high school teenagers who registered to get their ID cards. The fact was discovered at the local level and reported to the press. After the story appeared in the news, we asked the press for the names, and were refused on the grounds of Privacy. We, then appealed to the Prosecutor to obtain the names for us, but he was uncooperative since they were minors. As a result, they are still registered—fraudulently. We are sure that if we had cooperation and the means to investigate, we could find many more.
Further, we believe it would be using tax-

Further, we believe it would be using taxpayers money unwisely were the federal government to refund to the states an approximate \$15.5 million, or 20 cents per voter registration. To begin with, it costs much more than 20 cents in equipment, supplies and employee salary and time to process a single registration. Moreover, this refunded money, as we have seen with the 50 cent per registration in New Jersey, goes into the general treasury and never filters down to the level of an election board for its use.

We believe that too often legislators dream dreams without taking into consideration the practical and impractical sides of such legislation; and, without considering, how the job is going to be accomplished by those who are responsible for acomplishing it; namely, County Boards of Elections.

ing it; namely, County Boards of Elections.

We believe, also, that if this country is to have an informed and responsible electorate, we must give that electorate some responsibilities of its own, such as registering to vote at a proper time and place. We believe that an informed and responsible electorate wants, and has the right to expect, proper safeguards in the right to vote.

Very truly yours,

Mrs. Dorothy P. Main, Chairman.

PEARL B. BUSH,

Secretary.

JIMMY FLEMING: TALENTED WRITER AND RARE HUMANITARIAN

HON. EDWARD J. PATTEN

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. PATTEN. Mr. Speaker, recently Jimmy Fleming, the talented, respected, and popular columnist of the Home News of New Brunswick, N.J., reached his 70th birthday. He is the youngest looking 70-year-old I have seen in years.

Jimmy is modest by nature, so practically no one knew it was his birthday. Because of his many friends and position, there could have been an elaborate party, but it was celebrated in a simple, but moving way.

On his birthday, Jimmy was eating in a restaurant in New Brunswick, where scores of friends and admirers—from plain workers, to executives—simply went up to his dining table and just said, "Happy birthday, Jimmy."

Mr. Speaker, I am sorry I could not be there to extend my congratulations on Jimmy's achievement, so I am now doing that in the Congressional Record. Thanks, Jimmy, for your fine writing over these many years, for your "Hemingway touch"—clear and beautiful writing—for your versatility, but most of all, thanks for the real and great feeling you have for people. Your mind is bright, your heart is warm, and your soul is beautiful and wonderful. You love people and they love you. Happy birthday, Jimmy.

SENATOR EDWARD ZORINSKY SPEAKS OUT ON PRESENT OPERA-TIONS OF CONGRESS

HON. CHARLES E. GRASSLEY

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. GRASSLEY. Mr. Speaker, it is always a matter of satisfaction to me to read when a Member of the Congress speaks his or her mind about the present operations of the Congress. It is especially noteworthy when a Member courageously speaks out on some of the abuses in our congressional system.

This courage has been recently demonstrated by the newly elected Senator from Nebraska, Edward Zorinsky. The Senator gained nationwide attention for his candid assessment of the practices and procedures followed in the politics of the Senate. This action is especially praiseworthy because it did not come from a Member of the minority party but from a Member of the majority party.

It would have been much easier for Senator Zorinsky, to keep quiet and go along with the system despite private scruples. He could have adopted the motto "go along in order to get along" by refusing to rock the boat through silence. He could have easily become "one of the boys" by closing his eyes to distasteful political practices and accepted the system without a word of criticism. But it appears that this is not the nature of such a man as Senator Zorinsky. He attacked two of the so-called sacred cows in politics: patronage and the closed caucus meeting discussing issues. In his recent statements, he has provided a guide to all of us who are concerned about the "politics as usual" we see demonstrated in the Halls of Congress.

I wish to call the attention to my colleagues to two editorials on Senator ZORINSKY'S critique: "Senator ZORINSKY Disowns Patronage" from the Omaha World-Herald—March 1, 1977 and "Mr. ZORINSKY in Washington" in the Wall Street Journal—March 15, 1977.

[From the Omaha World-Herald, March 1, 1977]

SEN. ZORINSKY DISOWNS PATRONAGE

(By Darwin Olofson)

Washington.—In trying to shake up the "system," Sen. Edward Zorinsky has shaken some political plums right off the patronage

tree into the eager hands of several of his Democratic colleagues.

He also may have shaken up Senate Major-

ity Leader Robert Byrd.

Zorinsky told how he and other freshman Democratic senators were summoned to Byrd's office and told "that we were privileged to enjoy the fruits of the patronage system."

Up for grabs were a number of jobs in the Senate Post Office, one of which paid \$9,519 a year for four hours of work a day.

The other positions paid \$8,517 a year for

five hours of work a day.

It was suggested to the senators that they might find some deserving young people, about 17 years old, to fill the jobs, according to Zorinsky.

I informed Sen. Byrd that I would have nothing whatsoever to do with the placing of patronage jobs and that I felt they should all be abolished," he said.

"I saw a mass grab by the other senators for the jobs I was turning down," he added.

What was being suggested to the senators, the Nebraskan said, was that they find out whether any of their key political supporters had 17-year-old sons who would like a wellpaying job that would require them to work only a half day.

"Then, when election time comes around there's an IOU outstanding," he said.

'If you pay a 17-year-old \$9,500 a year for four hours of work," Zorinsky said, "then you have helped him embark on a lifetime of

dependence on government subsidization.' He said he felt unemployed persons should have a chance to compete for jobs that are

now filled on a patronage basis.

He also criticized the existence of certain patronage jobs, such as those held by the operators of automatic elevators on Capitol Hill, calling it "a gross misuse and waste of taxpayers' dollars."

[From the Wall Street Journal, March 15, 1977]

MR. ZORINSKY IN WASHINGTON

Senator Edward Zorinsky, elected from Nebraska last fall, was so appalled by his initial experiences in Washington that he considered chucking the job and going back to Omaha, or so he told The Washington Star. It would have been a principled and spectacular political act, but Mr. Zorinsky's wife persuaded him to reconsider.

Among other frustrations, the Senator was annoyed over having to sit through a particular extended closed-door session of the Senate Democratic caucus. The momentous, hush-hush subject? Free haircuts in the

Senate barbershop.

It seems that what with sharp congressional pay raises, office-girl scandals and the like, some Senators were worried that the tradition of free haircuts was like rubbing the taxpayer's nose in the dirt. A price of \$3 was agreed upon but then somebody mentioned that the House barbershop charged less and that everyone's staff would be wasting time waiting to get in the chairs over there. Market economics puzzle Senators so this question required considerable debate.

"You talk about federal projects," groused Mr. Zorinsky. "They could have built a dam in less time, and it's still not resolved."

It no doubt occurred to Senator Zorinsky, as it does to us, that there must be a lot of guilt perched on the shoulders of men who would spend so long worrying over and de-bating appearances. And considering some of the ways Congress has found to spend the \$450 billion it extracts from the economy, maybe that should not be surprising. A \$3 penance does not seem high.

Mr. Zorinsky finds the ambience of Washington no more enchanting outside the Senate halls. "Everybody here is at the public trough," he complained. What with some of that \$450 billion leaking through the cracks into the local economy, land values approximate a gold rush town. "They conZorinsky.

We're happy that Schator Zorinsky will stay on. Iconoclasts may not change things much but they are good to have around.

ENERGY POLICY AND THE NEED FOR A CLIMATE PROGRAM

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Monday, April 4, 1977

Mr. BROWN of California. Mr. Speaker, this morning the Subcommittee on the Environment and the Atmosphere of the Committee on Science and Technology heard from the Administrator of the Federal Energy Administration on the need for a national climate program. While it is not generally my practice to bring such testimony to the attention of the full House before legislation is reported. I believe the statement by John F. O'Leary deserves to be seen by every Member of this body.

The basic point made by Administrator O'Leary was that the energy policy of this country and the world is profoundly affected by the climate, and the energy strategies of this country should meet the variations in the weather which have, and will occur. Mr. O'Leary made the point that if the long range weather forecasters of this country had been able to tell the energy planners of this country what last winter would be like the energy shortages which occurred could have been avoided.

Mr. Speaker, I expect the Committee on Science and Technology to report legislation to establish a comprehensive Federal climate program, designed to serve users of climatic information, before May 15. The testimony of Mr. O'Leary demonstrates why this is important.

The testimony follows:

STATEMENT OF JOHN F. O'LEARY

Mr. Chairman, members of the Subcommittee. I am pleased to speak before you today on proposed legislation to establish a National Climate Program. This past winter has dramatically shown that changes in weather and climate are extremely critical to the energy situation. Improving our knowledge and ability to anticipate changes in climate and weather conditions is vital to our efforts in developing energy policy and in dealing with current and future energy prob-

My comments are brief and address the of information and analysis which would be useful and suggestions in implementing a National Climate Program.

With regard to the specific proposal under consideration for a National Climate Program, I do not feel I am in a position to make a recommendation on the need for new legislation. Consequently, I wish to defer to the Administrator of the National Oceanic and Atmospheric Administration on the draft legislation.

I will begin by stating simply that even a cursory glance at the alternatives which are available to us for meeting our future energy needs reveals the intimate connection which exists between climate and energy. Our energy requirements are directly related to the climatological conditions which surround us, as is our capability to effectively

demn houses that cost \$100,000," said Mr. mobilize some of the more abundant energy resources.

> RELATIONSHIP BETWEEN WEATHER AND ENERGY

The past winter is an excellent example of the effects weather can have on energy supdistribution, and use. Because abnormally cold weather experienced by the eastern portion of the country, space heating needs increased significantly for natural gas, distillate fuel oil, propane, and electricity. These larger fuel needs resulted in increased natural gas curtailments and spot shortages. The warm dry air in the West has lowered the snow pack and decreased river flows, thus affecting the generation of hydroelectricity. Our oil imports increased dramatically; they were temporarily driven to over 10 million barrels per day. In addition, our economy was adversely affected; at one point over one million jobholders were furloughed.

The fuel situation last winter was monitored closely in regions of the country where increased energy demands could have resulted in fuel shortage problems. As one part of the monitoring system, FEA was in daily contact with the National Weather Service to obtain 5-day weather outlooks and also projections of 10-day forecasts being conducted on an experimental basis by the Weather Service. The available information was found to be useful to FEA. Dr. Schlesinger and other parts of the government.

However, our understanding of the relationship between weather and fuel consumption is still in its infancy. Available information shows that while heating degree-days and energy consumption are definitely correlated, there is a wide range of estimates in the actual statistical relationship. As a consequence, we estimated that the additional heating costs of this last winter could range from \$4.3 to \$7.8 billion, and the impact of the winter on oil demand and imports could range from 0.8 to 1.6 million barrels per day more than would have occurred in a normal winter. (A copy of an FEA working paper on "Alternative Estimates of the Energy Costs of This Year's Colder than Normal Weather" is attached for submission to the record.) This variation of nearly 100% illustrates the importance in greater emphasis on understanding weather and how it influences energy consumption, supply, and distribution.

Mr. Chairman, the climate will be of central relevance to the mission of the Department of Energy, and I believe that an improvement in our understanding of climatological processes could be of inestimable value in carrying out that mission. Of course, we will work closely with agencies involved in climate research, and provide them with feedback on our interests in weather and climate information. As we begin to lay the foundation for the energy systems which will sustain us beyond the era of the natural fluid hydrocarbons, and we are doing so today, we most assuredly do not wish to bear risks stemming from any climatological uncertainty which lies within our power to resolve.

The profoundly disturbing anomalies in the

global circulatory patterns of the past few years which have manifested themselves variously as wheat shortages in the Soviet Union in 1973, drought in Africa that is traceable back to 1969, prolonged drought in England and western Europe, and again in our extreme winter just passed, and our continuous Western drought all point to the possibility that major climatological changes could be taking place.

While the likely duration and the implications of these events is very uncertain at present and the subject of a growing scientific discussion, there is no question but that the scale of these changes is foreboding, and that these occurrences warrant increased study and attention.

The prolonged and extremely cold weather experienced in the eastern United States from mid-October through early February of this past winter resulted from complex changes in the factors determining the weather. The pronounced blocking ridge over the western plateau was discernable as early as last August and remained essentially stable for over six months, giving us cold in the East and drought in the West. Understanding why last winter's prolonged colder than normal weather occurred and knowing if this is likely to be repeated next year and in subsequent years with a greater probability, could be important to not only those concerned with energy but also to those dealing with water resources and agriculture.

NEEDS FOR CLIMATE AND WEATHER INFORMATION

The needs for information on climatic changes and the weather broadly fall into short-term efforts on monitoring and analyzing the current situation, and long-range forecasting of future weather and climate patterns. While both types of effort are important, I believe that more attention and resources need to be used on longer-range "strategic" forecasting.

SHORT-TERM WEATHER INFORMATION

1. Knowing on a current basis the temperatures, degree-days, precipitation, solar insolation, and wind speed and direction by regions of the country is required. Information should be gathered, processed, and validated and made available to users in a readily accessible manner.

Increased accuracy in snow aerial extent and snow water content information would be useful for hydroelectric planning. Remote sensing of such data by satellites offers significant improvement over standard aircraft

snow surveys.

3. Data on solar insolation is critical for computing the size and projected heating load of a solar collector system. The Weather Service currently collects these data on approximately 120 locations throughout the United States. More extensive solar insolation data will be extremely useful for designing systems suitable for specific areas.

LONG-TERM WEATHER AND CLIMATE INFORMATION

1. There is a need for accurate long-range forecasts of weather so that the government and industry can plan their actions regarding fuel use and allocations. High accuracy in 1- and 5-day forecasts is important, but having good long-range forecasts that could be used to assess energy needs months or more in advance would be very helpful for planning and taking appropriate actions to address potential fuel shortage problems.

2. We should make every effort to determine whether or not the combustion of fossil fuels is significantly affecting our climate, or has the potential for affecting the climate if world consumption were to grow significantly above today's levels. The primary concern I refer to is the requirement to understand and measure the greenhouse or heating effect which some researchers contend could result from the increased amounts of carbon-dioxide we are venting into the atmosphere. We should also push forward with the study of the possible cooling effects that could result from the small dust particles in smoke, or aerosols, which remain in the air for long periods.

3. We also should seek to understand whether the atmosphere's capacity to act as a heat sink will be stressed by the continued growth of our use of all forms of energy. We do not think that this particular climate altering potential is approached by the present activities, but we must be concerned with potential climate modifications which could be stimulated by increasing levels of waste

heat.

4. Forecasting energy consumption over the next one to two years on a quarterly or more frequent basis, as well as even for longer time periods (10 and 15 years), should be based on long-run climate and weather variables. To explain variations in demand for

weather-sensitive energy products, both heating and cooling degree-day information is needed. Historical degree-day data are currently used at the state level by month. Improvements in long-range forecasts by geographical region would be of great value in assessing potential energy demands.

5. In regard to projected gas curtailments and alternate fuels information for a coming winter, the ability to know well in advance if weather in specific areas of the United States would be materially colder or warmer than normal would be an invaluable tool for additional analysis. Since the usage of fuel is affected by a combination of wind and weather (i.e., chill factors), better information on the relationship of these factors would be helpful.

6. Long-run studies of climate and weather patterns are also important. For example, understanding the factors which caused last year's weather which pushed warm air up into Alaska and cold air down over the Midwest and East would be useful. Greater attention should be placed on strategic climate patterns, how they are changing, and their implications for the future on energy, agri-

culture, and the economy

7. A greater effort should be made to utilize weather information in government decisionmaking. User agencies such as FEA are beginning to consider the relationships between weather and energy. More effort is clearly required. The agencies responsible for developing weather and climate statistics and forecasts should apply their expertise to meet the users needs of weather information in application areas such as energy, agriculture, and water resource management.

SUGGESTIONS FOR IMPLEMENTING A NATIONAL

Even though my comments are not directed specifically to the proposed legislation, I would like to make several general suggestions in implementing the national

climate program.

1. I strongly support the need for close coordination with user organizations. The lead agencies in the climate program should determine what information is needed, in what form, and on what frequency. The survey should seek out how weather data is being used, what problems are being addressed which require weather or climate information, and what results are emerging from studies relating to weather.

2. A strong applications program should be built based on the results of the user survey to complement agency programs. Staff should include expertise not only in meteorology and climatology, but also in such fields as agriculture, energy, environment, water resources, and economics. Studies should be conducted on the use and application of weather information to

these application areas.

3. A long-range program should be developed reflecting national information needs. User agencies such as FEA or the Department of Energy should be provided the opportunity to comment on the plan and suggest research and data priorities.

4. The process by which information is exchanged between meteorologists and those who must react to the weather should be seriously examined. The current communications process with regard to weather and climate could be inhibiting the exchange of information between those who seek to understand and those who need what is known about the weather. It is the communication of the available knowledge and insight that is of greatest value-and to that communication we increase build into the design of a national climate program a liaison group that is specifically charged with the mission of facilitating this two-way exchange. This liaison group mission of facilitating should contain both climatologists and professionals trained in hydrology, agricultural sciences, energy, economics, and other fields. Thank you for this opportunity to comment. I would be pleased to answer your questions.

WHO OWNS THE PRESS?

HON. BILL CHAPPELL, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. CHAPPELL. Mr. Speaker, I rise to voice the concern of many Americans over disturbing trends in this Nation's media industry. Increasingly, independent media outlets—newspapers, radio and television stations—are being swallowed into giant firms, communications chains, and even industrial conglomerates. This phenomenon, which has reached an epidemic level in recent years, has several dangerous implications.

Lest I be accused of overstating the case, Mr. Speaker, let me present the following statistics: At least 71 percent of newspaper circulation is now controlled by chains or is under some forms of multiple ownership; this represents 60 percent of America's newspapers. The era of the independent newspaper is plummeting toward its end—increasingly, we find independent status only among small papers of 10,000 circulation or less. We are approaching a time when all news will reach us through the funnels of media barons.

The foremost danger is the jeopardy in which we are placing the rights guaranteed us by the first amendment. For all practical purposes, we are seeing freedom of speech and press fall under the control of fewer and fewer individuals. And when a freedom is restricted, it loses its meaning.

No one needs to be reminded of the tremendous power the communications industry holds in our society. Creation of empires in that industry also creates communications lords, who can dictate how the news is reported—what is to be revealed and what is to be suppressed. As we see more and more of our smaller news sources being absorbed into these empires, we should realize that we are also seeing the disappearance of local autonomy—and the sacrifice of a certain degree of freedom.

Except by the tolerance of ownership an individual editor or publisher can no longer print according to his own conscience. He must follow the dictates or whims of his company's policies.

Many of our communities presently have only one newspaper as it is. To place the control of a community's only source of printed news in the hands of a giant conglomerate—which may be far-flung both geographically and philosophically from the society of that community—places the citizens of that area under a very real sort of dictatorship. They become characters right out of George Orwell, fed only what some remote Big Brother wants them to have.

On Friday, March 25, a thought-provoking article appeared in the Washington Post. The author, Charles B. Seib, is to be commended for his insights into the present trends in America's media. I submit Mr. Seib's piece for the Record, in the hope that it will serve as a warning signal of what is happening in our

news industry. If Americans are approaching a state of imperial news control, they should at least be aware of the fact. The article follows:

WHO OWNS THE PRESS? (By Charles B. Seib)

Remember the cartoon showing the little fish being eaten by a bigger fish, and that fish being eaten by a still bigger fish and so on? That is what is beginning to happen in the news business. The multiple-paper chains, having gobbled up the pick of the country's newspapers, are now beginning to feed on each other.

The result is increasingly centralized ownership of newspapers. This has profound meaning for those who care about the role of the press in America.

Last year 72 daily newspapers changed hands, according to Editor & Publisher, a trade magazine. The previous year the figure

The chains were active in the busy trading. As usual, they added to their strings by buying individual papers. But perhaps more significantly, the big ones gobbled up some little ones.

Two recent examples of chain-eat-chain were the purchase of the Booth Newspapers by chain owner Samuel Newhouse and an agreement by the Gannett chain to buy the Speidel papers.

Newhouse paid \$300 million for the Booth properties. For that he got eight daily newspapers in Michigan, Parade magazine and some odds and ends. This brought his holdings to 30 newspapers with circulations totaling 3.7 million. He is the king of chain owners in total circulation.

The Gannett purchase of Speidel—13 newspapers for \$178 million—will, along with some other recent acquisitions, bring that chain's total to 73 papers. Gannett number one chain in papers owned, although it is below Newhouse and several others in circulation.

The dealing continues unabated. Last month Capital Cities Communications, Inc., bought the Kansas City Star, which had been owned by its employees. The price: \$125 million, which turned 15 or 20 newspaper people into instant millionaires.

A few days later, the Buffalo (N.Y.) Evening News was sold for about \$33 million to Blue Chip Stamps of California. Blue Chip is controlled by Warren Buffett, a director and major stockholder of the Washington

Post Company.

The result of all the buying and selling over the past few years is that three out of five of the country's 1,750 dailies belong to chains. The 12 largest chains publish nearly 40 per cent of the 61 million newspapers sold every day.

Group ownership is not bad per se. Chains sometimes nurse sick and shoddy papers back to journalistic health. And many chain newspapers serve their communities well while producing nice profits for the owners.

Nevertheless, the great, discordant choir that makes up the press of America is losing its independent voices, one by one. If the trend continues, its music may end up resembling the slick, superficial harmonies of a barbershop quartet. And that is bad.

At stake is diversity. The First Amendment guarantees a free press—not a fair, honest or good one. Diversity has always been the essential ingredient that made the whole thing

A recent report on newspaper ownership asked a question: "How much competition is required to insure a forum for unbiased jour-nalism?" That is not quite the issue. The nalism?" That is not quite the issue. The real question is: "How much competition is required to insure that the press will do its job despite biased journalism?"

the brisk trade in newspapers? For one thing, they are businesses and they are subject to the same pressures as other businesses. Those pressures today are expressed in words like acquisition, consolidation, diversification and conglomeration.

Also, newspapers are extremely attractive properties. A monopoly newspaper in a healthy community is second only to a television license as a money-maker. And it comes equipped with its own special constitutional protection.

Rupert Murdoch, the Australian press lord who is becoming a power in American journalism, has said that a monopoly newspaper is "a license to steal money forever." Otis Chandler of the Times-Mirror Co. of Los Angeles put it less crudely: A monopoly paper, he said, "gives you the franchise to do what you want with profitability. . . . You can control expenses and generate revenues almost arbitrarily."

It should be noted that the number of monopoly newspapers—newspapers with no true competition—grows each year. When they feel the need to improve their image, the moguls of the news business like to point out that the First Amendment's protection of a free press is not something that belongs to them. It belongs to YOU-the public, they

That is good PR and it also is true, at least in the large sense. If a free press is necessary to an open society, then it is indeed the precious property of the citizens of that so-

But a more mundane and equally valid truth was expressed by A. J. Liebling, the late press watchdog and iconoclast: "Freedom of the press belongs to the man who owns one." That concisely sums up the concerns aroused by what is happening to own-

And it doesn't help that Liebling's aphorism may soon be outdated. Before long, a more accurate version may be: "Freedom of the press belongs to the conglomerates that

NATIONAL DRAFTING WEEK

HON. MATTHEW J. RINALDO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. RINALDO. Mr. Speaker, the board of directors of the American Institute for Design and Drafting has proclaimed this week, April 4 through April 7, as National Drafting Week. It is fitting that national recognition be given to the drafting profession and to the dedicated men and women who make such a vital contribution to the countless items produced in meeting society's needs, such as household and business equipment, hardware for space missions, and concepts to enhance our environment.

The history of drafting is long and rich. Among the earliest records of engineering graphics is a stone engraving of a fortress plan made by the Babylonian engineer, Gudea, about 2000 B.C. Leonardo da Vinci illustrated his work profusely with technical drawings. His treatise on painting is regarded as the first book printed on the theory of projection drawing. It was Gaspard Monge, however, who is regarded as the first to make an organized record of the principles of engineering drawing that are used today. Drafting history continues to be made, and the accomplishments of contemporary professionals will render invaluable service to the present and future generations.

I am pleased to have this opportunity to pay tribute to our Nation's more than 350,000 skilled professional designers and draftsmen and draftswomen, and I wish them every success during their 17th anniversary held in Houston, Tex., this week

OPINION SURVEY

HON. WILLIAM S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. BROOMFIELD. Mr. Speaker, in order to better represent the people of Michigan's 19th Congressional District, I conduct a yearly district opinion survey on major national issues. This year, more than 13,000 people responded.

Because of the President's expressed interest in the views of the average citizen, I have written him conveying the results of my poll.

Mr. Speaker, so that my colleagues may also have the benefit of the results of this survey, I am inserting into the RECORD my letter to the President along with a breakdown of the constituent responses:

President JIMMY CARTER. The White House, Washington, D.C.

DEAR MR. PRESIDENT: More than 13,000 Michigan residents in Oakland and Livingston Counties responded to my 1977 Congressional Questionnaire on important national

Because of your interest in the views of average citizens, I thought you would like to know the results. More than ninety-six percent of those responding favor "sunset" legislation requiring every Federal program to rejustify its existence at least every five years—a program which you and I both support.

Ninety-two percent support mandatory sentencing for all crimes committed with a gun, and nearly as many-ninety percentare opposed to extending diplomatic recognition and aid to North Vietnam. Sixty percent favor your efforts to begin negotiations to normalize relations with Cuba.

A large majority-eighty-two percentfavor delaying auto emissions standards to allow the industry time to develop the technology to comply, an effort which I whole-heartedly support. The same percentage back Federal tax breaks and low-interest loans in the production and marketing of solar energy for residential and commercial use.

Two thirds of those responding said they favor legislation giving your Administration authority to re-establish the military draft, but only twenty-six percent said they supported your Vietnam-era amnesty program.

Only twenty-eight percent said they felt national health insurance was an urgent priority if it means higher taxes, while twenty percent backed direct Federal subsidies to cities in danger of defaulting. Three quarters of the respondents favor legislation allowing parents a tax deduction for the costs of financing their children's college education.

I look forward each year to this crosssection of views from the people in my Congressional District. I know you will be equally interested in their thinking on major national issues.

Respectfully,
WILLIAM S. BROOMFIELD, Member of Congress

QUESTIONNAIRE RESULTS (Tabulated by PSA, Inc., Baltimore, Md.) [In percent] 1. Military Draft: Would you support legislation giving the President authority to reestablish the miltiary draft? Yes _____ 2. Auto Emissions: Should auto emissions standards be delayed to allow the industry time to develop the technology to comply? 3. Sunset Law: Would you support legislation requiring every Federal program to re-justify its existence at least once every five years or be abolished? Yes _____ 96 4. Health Insurance: Do you believe that it is urgent that national health insurance be instituted even if it will mean increased Yes _____ 28 5. North Vietnam: Do you favor extending diplomatic recognition and financial aid to North Vietnam? Yes ______ 7 No _____ 90 6. Amnesty: Do you favor the President's program granting amnesty to Vietnam-era draft evaders? 7. Solar energy: Should the Federal Government provide tax breaks and low-interest loans in the production and marketing of solar energy for residential and commercial Yes _____ 15 8. Mandatory Sentencing: Would you support mandatory sentencing and a denial of parole for all crimes committed with a gun? Yes _____ 92 9. Aid to Cities: Would you favor direct subsidies to cities in danger of defaulting? No ----- 74 10. Cuba: Do you favor beginning negotiations to normalize relations with Cuba? 11. Parents' Tax Break: Do you favor legislation allowing parents a tax deduction for the costs of financing their children's college education? Yes

CAPITOL POLICE OFFICER ADOLPH KRENN

(Balance equalling 100 percent undecided.)

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. FRASER. Mr. Speaker, the small, informal community made up of Mem-

bers, staff, and House employees is minus a well known senior colleague this week— Capitol Hill Police Officer Adolph Krenn. Officer Krenn died Tuesday, March 29, and he was buried April 1 in Shenandoah Pa.

I learned of Adolph Krenn's death through Ron Mazzoli's March 30 Record statement. Because we moved our office from 1111 Longworth to 2268 Rayburn this January, Adolph Krenn's absence from his post was not noted by myself or my staff. Our habits of entering the Longworth Building each day at the police post located near the New Jersey and C Street entrance were ended early this year.

Now, with Adolph Krenn's death, all of us are forever denied the good feelings we exprienced as we walked past Adolph's post and he greeted us. He was the first House employee many of us met most mornings and this experience was always a good way to start the day.

My staff and I extend our sincere condolences to his family. We share with them a sense of loss. Adolph Krenn was a valued member of our small House community

BELLA'S BOONDOGGLE IS NOT WORTH \$5 MILLION

HON. ROBERT L. F. SIKES

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. SIKES. Mr. Speaker, James J. Kilpatrick, an articulate speaker and a capable writer, has voiced the sentiments of many persons in a column which appeared in the Washington Star on April 2. The title of the article is, "Bella's Boondoggle Is Not Worth \$5 Million." Many of us voted against the appropriation of \$5 million for a National Commission on the Observance of International Women's Year. The questions raised by Mr. Kilpatrick were apparent in the debate on the measure. Even so, it could have been worse. The proponents sought an appropriation of \$10 million for the project. This was rejected.

I submit the article for reprinting in the Congressional Record:

BELLA'S BOONDOGGLE IS NOT WORTH \$5 MILLION

(By James J. Kilpatrick)

President Carter on Monday reconstituted the National Commission on the Observance of International Women's Year, and named Bella Abzug as its chairperson. Speaking simply as one taxpayer, I am minded to ask what in the world goes on. The commission is to include 42 public

The commission is to include 42 public members plus two from the Senate and two from the House. One of the senators is Birch Bayh of Indiana, whose modest claim is to have written more of the U.S. Constitution than any man since Madison. He is the constitutional expert. But if there is any constitutional authority for this exercise in public expenditures, it eludes ready identification.

The gentlewoman from New York, as chairperson of this outfit, has been handed a \$5 million kitty to stroke. It is immaterial that in a budget of \$460 billion, an item of \$5

million dollars is not even pocket change. The \$5 million has been taken from the people under the compulsions of taxation. For what purpose?

The ostensible purpose, spelled out in the authorizing legislation in 1975, is to assess the progress toward "equality between men and women in all aspects of life in the United States," and to identify the barriers that prevent women from participating fully in all aspects of national life. Jimdandy.

The commission also is charged with set-

The commission also is charged with setting up a series of state meetings to be followed by a national whoop-te-doo in Houston in November.

The ulterior purpose, unless I am vastly mistaken, is something else. This commission will be spending our money in a desperate, last-ditch lobbying effort for the pending Equal Rights Amendment. Any such diversion of public funds is unpardonable—and probably unlawful as well.

Perhaps my speculations are unjust. Back in December of 1975, as a member of the House, Mrs. Abzug reassured her doubtful colleagues. The commission's conferences, she said, would afford an opportunity "for every kind of woman, representing every viewpoint," to make her concerns known. Mrs. Abzug promised that "some who are opposed to the ERA" would be represented.

It will be interesting to see what develops. In the normal pattern of such ventures, study commissions follow a classic outline. First is the lofty statement of purpose—in this case, an executive order by former President Ford. This is followed by enabling legislation, approved by a Congress that finds it politically inexpedient to challenge so noble an undertaking.

The study commission then is appointed, according to demographic rules as immutable as the laws of physics—so many blacks, so many members with Spanish-American surnames, so many from the South, the West and the East, a smattering of Republicans, a celebrity or two. Most of the commission members will attend only three or four meetings; some will attend none at all.

The work will be done by a carefully rigged staff under the supervision of a chairperson whose views are as predictable as the vernal equinox. The final report could be composed, for all practical purposes, before the first organizational meeting is held.

The ultimate report at last languishes, unread, in a thousand library files. And \$5 million goes down the drain.

It will be phenomenal if Bella's boondoggle follows any other course. Nothing will be learned from this expenditure of public funds that could not be gleaned from the women's magazines or from the consistories of the League of Women Voters.

The same speakers will make the same ritual points they have been making for months. The commission's 38 employes will draw their pay and will process travel vouchers. We will have press releases, agendas, programs, statements.

The only excitement will come, as it came in Mexico City in the summer of 1975, when some of the participants get to howling and pulling hair.

Persons who oppose the Equal Rights Amendment would be well advised to mount a counter-offensive. With vigorous effort on their part, stacked conferences can be unstacked, and rigged schedules of witnesses can be unrigged.

Bella tends to overwhelm opposition, but the gentlewoman is not invincible. As head of a public body, spending public funds, she is in a position of public trust. Deliberate lobbying can't be tolerated. As these conferences proceed, perhaps the local press will seek to keep the lady in line. ED KLITCH

HON. GOODLOE E. BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. BYRON. Mr. Speaker, last Friday in the portfolio section of the Washington Star newspaper, Reporter Boris Weintraub honored one of western and central Maryland's outstanding citizens, Ed Klitch.

Ed Klitch is host of Phone Party each morning on WJEJ Radio in Hagerstown. Phone Party is a relaxed source of information and guidance for area residents. With Ed at the helm, the program is a source of promotion of the beauties and advantages of western and central Maryland.

For more than a decade, Ed has been seen and heard on radio and television in the area. He has been a force in making western and central Maryland a better and more enjoyable place to live.

I would like to join my fellow residents of the Sixth Congressional District in thanking our friend, Ed Klitch, for a job well done. And I would like to share with my colleagues in the U.S. House of Representatives this tribute to Ed Klitch and WJEJ radio by Boris Weintraub in the Washington Star:

IN HAGERSTOWN, RADIO IS THE PEOPLE'S VOICE

(By Boris Weintraub)

HAGERSTOWN, MD .- It begins like this:

"Good morning, you're on Phone Party." "Good morning. If anybody listening has some scrap metal or old batteries they don't want, I'll pick it up free. They don't have to pay anything."

Nothing at all, huh?"

"No. They can call me at . . ."

It begins like that at 11 a.m. four days a week, Tuesdays through Fridays on WJEJ, AM and FM, from this bustling small town in Washington County, Md., population 108,000. It's called Phone Party, and it is a perfect example of how a radio station in a small town

can bring people together. The show, which has been on WJEJ for 14 years and has its counterpart in other towns of comparable size, has a very simple premise: People who want advice, information, guidance, whatever, call in and state their problem. Host Ed Klitch, who has been with WJEJ for four years and has worked on Phone Party most of that time, converses with them, commiserates and restates the problem and the caller's phone number. Then listeners who want to help either call the first caller or call the show and offer an answer.

"I need somebody to plow up a garden. It's 20 yards by 20 yards."

What could be simpler?

Ed Klitch is a native of Baltimore, a 60year-old, gray-haired, crew-cut, superstraight veteran of 25 years in the Army who got into radio in Frederick, Md., when he retired from the Army in 1964. He is a bluff, hall-fellow-well-met, local-booster type who is a ready talker and a quick ad-libber. As such, he is almost a prototype for the type of person who should be hosting a program

like Phone Party.
"My idea is to put people in touch with other people," Klich says.

If other listeners can't help him his callers, Klitch keeps a file of persons or agencies that offer the sort of services that his listener-callers tend to request. A partial list:
Amway, animal rescue, bathtub tiling, bike

parts, carpet cleaning, chair caning, clowns, clock repair, concrete contractors, dog houses, electric stove repair, eyeglasses, German food store, handymen, lawnmower repair, majorettes, newspaper collection, paint remover, piano teachers, player piano repair, refrigerator pickup, sandblasting, saw sharpening, scissor sharpening, seamstresses, slipcovers, tinsmithing, upholstery, washing machine repair, Welcome Wagon and wicker baskets.

'I have a three-gallon garden spray that doesn't work."

"I'll bet you 10 to 1 it's the rubber gasket at the bottom.'

Well, maybe so. If someone can help,

I'd appreciate it. The number is . . ."
"Sometimes," says John Staub, owner and general manager of WJEJ, "things are a little slow on the show if Ed opens the show and has some things to say. They'll wait till he finishes, then they start to call. The variety of things they call about is amazing.'

"The most memorable call ever," says Klitch, "was from a woman who called and said, 'I'm sturdily built, and I need panty-hose for a big frame that are reinforced in the heel.' I said, 'Lady, I wouldn't touch that with a 10-foot pole.' People still talk about that when they see me."

"I'd like to obtain a World War II flight

helmet. I'm a pilot and a collector, and I need a flight helmet."

Ed Klitch is the "morning man" at WJEJ, driving in from his Frederick home at 3:30 a.m. to get the station on the air at 4:30. He also is responsible for doing newscasts, mostly of the rip-and-read variety, but also involving checks with local police, for selecting some of the station's recorded music—it has a "contemporary MOR" format—for doing a Sunday night show of nostalgic, recorded big band music, and for doing a variety of interview features.

When a caller to Phone Party suggests an interest in something unusual, such as World War II flight helmets, Klitch often extends the conversation. You never know, he says, when such a conversation might lead to an interesting interview for one of his other

"Hi, Ed, how are you?"

"I can't stand the hot weather. How are

"I'm fine, I just wanted to tell you that I took the wife and kids to see the 'Up With People' show last week and they were terrific: I was a music major in college and I don't think you could see a better show this side of Broadway."

"I agree with you. What I especially liked was the way they played for us free down at the mall, and the way Hagerstown opened its hearts and its homes to them."

When things get slow on Phone Party, as they sometimes do, Ed Klitch fills in with various announcements and comments. For example, he'll plug an upcoming concert by the South Hagerstown High School concert band and wind ensemble, or he'll joke about the engineer, Sue Burns, who is also one of the station's disc jockeys. At a station this size, there is litle room for specialists.

The prevailing atmosphere, both at the station and on the program, is relaxed and small town. The station, the show and Ed Klitch are Hagerstown fixtures. Could this work in a bigger market, such as Washington? Klitch thinks so.

"Everybody thinks that big city people are so sophisticated, but there's plenty of unsophisticated folks out there who need the same sort of help they get on this show,

John Staub, the station's boss, isn't sure. He thinks that the show would have to be adapted to a larger market in some way, but that it might work.

"There are magazines now aimed at apart-ment dwellers," he says. "Maybe there would be some way to aim a show like this at people who live in apartments. But this show amazes people who have lived in big cities and now live here. They're always commenting about it, and using it, too. They call in and ask what's a good time for planting, or young housewives call in and ask for recipes. Then the . . . let's call them 'more mature' ladies call in and answer."

In fact, one of the most endearing aspects of Phone Party is the direct communication that individuals conduct, using the show as a third party. On this day, a caller says that she saw Red Skelton on the Academy Awards show and was surprised because she thought he was dead. A few calls later, another caller reports that Skelton happened to be on the Mike Douglas television show that morning, that the show would be repeated on channel 13 later that day, and that the first caller might want to tune in.

'I have a little grandson who's starting to walk pigeon-toed and I wonder if there's anywhere in Hagerstown I can get special shoes

for him?"

The calls keep coming in as the half-hour races by: Does anybody have a Busy Lizzy Bright Begonia? Did you know that this is a good time to gather dandelions and cook them? Where can I get an electric motor repairman? Finally, near the show's end, Mrs. Queen calls.

"Good morning, Mr. Klitch."
"Good morning, Mrs. Queen."

"The lady who wanted the Busy Lizzy, she might try one of the greenhouses. The woman about the shoes, after she sees the doctor, she might try . . . shoe store. The gentleman who wanted to repair his motor, he might call . . . These are good days for planting the 1st and 2nd for flowers, the 3rd through the 7th for vegetables. The woman who called the other day about a Dutch Boy quilt pattern, she can call me and I'll give her a number."

If Phone Party has a star other than Ed Klitch, it's Mrs. Juanita Queen, a sprightly 75-year-old black woman (Klitch calls her "a Negress") who is the show's most regular caller. Over the years Juanita Queen has built up a file of her own on things that just about everybody in the "Four-State area"parts of Maryland, West Virginia, Virginia and Pennsylvania can hear WJEJ's powerful FM signal--would want to know, and she has no hesitation about sharing her knowledge with Phone Party's listeners

'She used to call after almost every call with an answer, so we put in a rule that limited people to one call per program," Klitch says affectionately. "So now she saves up till the end of the show, and then she calls and answers everyone at one time."

Corny? Of course it is. Laughable? Sometimes. But the Federal Communications Act requires a radio station licensed to use the public airwaves to serve the "public interest, convenience and necessity." What could do that better than a show like Phone Party?

EMERGENCY ASSISTANCE FOR SCHOOLS ACT

HON. CARL D. PERKINS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES Monday, April 4, 1977

Mr. PERKINS. Mr. Speaker, today, I am introducing, on behalf of the American Association of School Administrators, the Emergency Assistance for Schools Act. The basic purpose of this legislation is to assist our educational institutions, especially our elementary and secondary schools, to meet the budgetary crisis they are presently facing due to the rapidly accelerating costs of fuel.

The American Association of School

Administrators has taken the leadership in urging congressional action to help meet this crisis; and Senator CLAIBOURNE Pell, chairman of the Senate Subcommittee on Education, has responded by writing and introducing legislation proposing a program of Federal assistance. Senator Pell and the American Association of School Administrators are to be highly commended for taking the initiative in this area. Senator Pell has always been an outstanding leader in education, and the legislation he has introduced confirms this leadership role.

The bill I am introducing today is basically a companion bill to Senator Pell's bill, S. 701. It is my hope that the introduction of this bill will spurt prompt hearings in the House on the problems our educational institutions are facing as regards the energy crisis.

Our Nation's schools alone consume 11 percent of the heating/cooling fuel in this country. Yet, it has been estimated that almost half of the energy they consume is wasted, mostly because school buildings were constructed in a very energy inefficient manner. In fact, the Federal Energy Administration has estimated that if 30 percent of the Nation's elementary and secondary schools were retrofitted to become more energy efficient, we would save 25 million barrels of oil a year.

We must focus on making our schools more energy efficient not only because of the effect their wasteful consumption has on our Nation's balance of payments, but also because of the effect that this waste is having on the quality of education being offered in this country. In school year 1974-75 the Nation's public schools spent an estimated \$514 million more on fuel than they had in school year 1972-73, even though consumption dropped slightly over that 2-year period. At current salary levels, this increase in the cost of fuel represents about 43,000 teaching positions. In other words, our schools could have hired 43,000 teachers to reduce the pupil/teacher ratio with the money they had to spend for the increased cost of fuel.

Another way of looking at this cost is to compare it with the cost of textbooks purchased by our schools every year. The additional \$514 million spent on fuel represents the total amount of money schools usually spend every year for new textbooks.

Obviously, the increased cost of fuel, and the inefficient manner in which the schools are using this fuel, has placed an extreme strain on school budgets. Local school districts traditionally spend between 12.5 to 15 percent of their discretionary funds for fuel. This year, they are now committing between 25 and 35 percent of their discretionary funds for this purpose. Often, these funds must come from other areas of local school district budgets which obviously has a direct impact upon the quality of teaching and learning. Furthermore, since local school expenditures are usually the largest item in every locality's budget, this means that every taxpayer in the country is paying more for the increased cost of fuel in the schools and for the presently inefficient manner in which schools are consuming

For all of these reasons, I am today introducing the Emergency Assistance for Schools Act. I believe that we must focus immediate attention on this problem, and I would hope that the administration and the Congress will make schools as more efficient energy users a prime element of our emerging national energy policy.

Mr. Speaker, I am enclosing at the end of my remarks a short summary of the Emergency Assistance for Schools Act:

SUMMARY OF THE EMERGENCY ASSISTANCE FOR SCHOOLS ACT

The purpose of this legislation is to provide Federal financial assistance to local educational agencies to help them meet the emergency caused by the high costs of energy and to make their schools more energy efficient. The bill authorizes three types of grants: basic grants to make school facilities more efficient to operate, (2) demonstration grants to State agencies and educational institutions for projects which show great promise of improving energy efficiency; and (3) technical assistance to such agencies and institutions.

Three hundred and fifty million dollars is authorized for the basic grants section for each fiscal year from fiscal year 1978 to fiscal year 1981. Half of the sums appropriated is to be distributed on an equitable basis among the States by the Commissioner, and the other half is to be distributed to local educational agencies on the basis of severe energy hardship. These grants may be used energy conservation measures including the costs of insulation, remodeling, renovation and modifications of school facilities.

Thirty million dollars is authorized for fiscal years 1978 through 1981 for a program of demonstration grants to projects which show unusual promise in promoting the objective of developing energy conservation methods. These grants can be made to local educational agencies or to State educational agencies, energy offices, other appropriate State agencies and institutions of higher education to work in conjunction with local school districts.

One hundred and twenty million dollars is authorized for fiscal years 1978 through 1981 for technical assistance to local educational agencies or agencies and institutions working in conjunction with local districts. This technical assistance can include temporary employment of specially qualified personnel to plan and implement energy conservation projects, and the conduct of specialized studies, feasibility studies, and energy use evaluations.

Local educational agencies are required to match Federal funds received under the Act on a 50-50 basis for the basic grants and technical assistance grants, and on a onethird/two-thirds basis for demonstration grants.

HUMPHREY-HAWKINS FULL EM-BALANCED PLOYMENT AND GROWTH ACT

HON. RONALD A. SARASIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. SARASIN. Mr. Speaker, controversy continues to rage over the Humphrey-Hawkins Full Employment

and Balanced Growth Act. I would like to share with my colleagues some of the thoughts and concerns of Raymond J. Saulnier, professor emeritus of economics, Barnard College, Columbia University, in the form of his correspondence with the Honorable Augustus F. HAWKINS:

MARCH 22, 1977.

DEAR MR. HAWKINS: I will not undertake here to respond to all points made in your statement (Congressional Record, February 17, 1977) criticizing an article of mine (Business Horizons, February 1977, Indiana University Graduate School of Business) introduced by Senator Goldwater into the Congressional Record, February 10, 1977, in thich I commented negatively on the Humphrey-Hawkins bill (H.R. 50), but I believe a rejoinder is warranted on four major issues

(1) It is surely no error to describe H.R. 50's approach to reducing unemployment as putting people into some form of federallyassisted employment and as a "last resort" into project-type public service jobs. The bill does indeed say that it gives top priority to the expansion of private employment, and would not activate its reservoir of last-resort projects within two years of enactment, waiting in the interim for private employment to absorb adult unemployment down to the 3 percent level, but it is a fair description of the bill that it would do nothing in the interim (nor thereafter) to promote private employment, unless one regards an increase in federal spending under provisions of the bill not subject to the two-year standstill as a means to that end. Nor would H.R. 50 do anything to remove obstructions to the increase of private self-supporting jobs. It remains a fair criticism of the bill that, lacking encouragement to the creation of private jobs, its effect would be to lodge assisted persons more or less permanently in makework public projects.

(2) I fail to see why it is an error to say that the bill would offer federally-assisted employment at market rates of pay when it specifically requires that assisted persons be paid at rates equivalent to what the public or private employer pays others doing the same work. It still seems to me that this pay standard would attract persons to federally-assisted jobs from lesser-paid private or public employment, that it would be exceedingly difficult administratively to prevent such transfers, that there would be a strong pull of additional persons into the labor force, and that these effects could make it impossible ever to reach the bill's unemployment-reduction goal. Clearly, it would be a mistake to overlook or minimize these implications of the pay standard the bill would mandate in assessing how it would work in practice and thus what it would

cost in annual federal outlays.

(3) In part because of considerations raised in paragraph two above, it is unclear what the bill would cost, but surely the outlays could be enormous. My estimate dealt exclusively with those provisions of the bill under which the Federal Government would act directly to try to bring the adult unemployment rate down to 3 percent. It was made by multiplying the number of persons presumably eligible for aid as of October 1976 (2.65 million) by \$18,000, which, seemed a reasonable average of what the cost would be per person assisted, counting administrative overhead and needed facilities and equipment as well as pay, and net of costs such as unemployment compensation and welfare payments that in many cases would be obviated. I see estimates of per person public service employment costs that are close to \$10,000, but then again there are estimates of costs to create a single new public works job

CXXIII-650-Part 9

as high as \$40,000. Thus, the \$18,000 average, and the \$48 billion estimate of startup costs, which would be incurred over an indefinite period as the corps of persons being assisted was expanded, seems to me not at all a "wild exaggeration." And if the \$48 billion figure needs cutting back-for example, if the estimate of persons ultimately obtaining assistance should be less than 2.65 million-costs for other programs the bill would authorize, such as that which would aim to underwrite "stabilization and needed growth and State and local budgets," could easily make up the difference. Moreover, the \$48 billion estimate deals not at all with the continuing, as distinct from the startup, costs of the bill.

(4) It is surely not "categorically erroneous" to conclude that the bill would lead to a widening range of direct controls over the economy. This would be the inevitable result of passing a bill which, while it would be immensely inflationary, includes a provision that would prohibit any increase in the inflation rate. The combination would lead sooner or later to what the bill calls "administrative and legislative actions to promote reasonable price stability," and which I cannot read otherwise than as direct wage and

price controls.

Moreover, government cannot set a battery of numerical targets to be met by the economy within what is alluded to as a "comprehensive planning framework," as H.R. 50 would require, without at some point being explicit and mandatory in directing how the targets should be met. It is simply too much to ask one to believe that government can set out not only the rules of the game and the limits of the playing field, but in this case what the score should be, without at point telling the players how they should play the game.

I have never meant to underestimate the seriousness of structural unemployment or the urgency of getting on with measures to reduce it. My view is simply that H.R. 50 is not the way to do it. As I stated in my testimony on February 22, 1977 before the Sub-committee on Equal Opportunities of the Committee on Education and Labor, which you were unable to attend, my position is that H.R. 50 should be abandoned in favor of action in two separate but related areas.

First, something must be done to increase the effectiveness of the "training and employment" programs that H.R. 50 would greatly expand. As the Carter administra-tion's fiscal year 1978 budget revisions (page 51) shows, actual outlays on these programs were \$7.3 billion in fiscal 1976 and authorization is proposed for outlays reaching \$9.3 billion in fiscal 1978 and \$11.2 billion in fiscal 1979. Surely there is reason to expect benefits from expenditures on this scale greater than would appear to have been produced to date.

Second, it is surely time to face squarely the need to devise and enact a program of measures to help increase private, self-supporting jobs. In part this is a matter of re-moving or reducing present obstructions to the increase of private employment, in which I would put the need for modification of minimum wage and related laws at the top of the list. I do not underestimate for a moment the opposition that moves to make these laws economically defensible would encounter, but somehow the political courage and will must be found to close, at least reduce, the gap between the wage that is paid and the productivity that can realistically be expected from the employment. You and I would agree, surely, that the better way to close the gap is to lift productivity, and I would spare no expenditure that can reasonably be expected to produce this essential result, but it is futile to expect this approach to succeed in the face of efforts to

raise minimum wage rates that in many areas are already a deterrent to employment. In addition to removing, at least reducing, obstructions to the increase of private employment, steps need to be taken also, mainly in the area of tax law, to increase incentives to save and to invest. In short, there is a need for a broadbased program to increase private self-supporting jobs.

It is unreasonable to expect all this to be done at once, and even more unreasonable to expect instant results. What is important is to get started on the right road. I hope you and your committee will reconsider H.R. 50 in the light of this need.

Believing that other members of your committee will be interested in my reactions to your Congressional Record statement, I am taking the liberty of sending each a copy of this letter.

Sincerely,
RAYMOND J. SAULNIER, Professor Emeritus of Economics.

A TRIBUTE TO DE LA SALLE INSTI-TUTE OF CHICAGO

HON. JOHN G. FARY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES Monday, April 4, 1977

Mr. FARY, Mr. Speaker, I rise to pay tribute to the De La Salle team runnersup in the Illinois State AAA Basketball Championship recently held in Champaign. Ill.

It is with a great feeling of nostalgia as I stand before my colleagues and reminisce about De La Salle Institute and the great contributions it has made over the years to the Chicago community in the education of our youngsters and the molding of their character so as to prepare them for the difficulties and tribulations they will face in life.

The history of De La Salle began in 1892. Classes were opened by Brother Ajutor, F.S.C. and are still conducted by the Brothers of the Christian Schools.

Two years later, 22 men became the first graduates of De La Salle and shortly after that the school alumni association was organized and established on a firm basis as the Annual Alumni Association of 1895.

Today it is vigorous in its yearly service of meetings, retreats, and individual class reunions. It has built the distinction of being the largest gathering of any high school or college in the country, and has helped build the reputation of De La Salle to the point where today Chicago Radio Station WLS honors it as the high school of the year.

Its recent outstanding achievements in athletics is one more tribute to the quality of this institute. Just this year the De La Salle Meteors swung the third place markup in the All American State High School Basketball Champion-

This is the first year the Meteors have competed and, like all other areas De La Salle has concerned itself with, they are excelling quickly. The great strides of De La Salle are often attributed to the rigorous reserve of young talent combined with a strong sense of excellent teamwork.

It was this running formula that brought the De La Salle team up through the regional championship in the Chicago area and later to topple the St. Lawrence Vikings of Burbank, Ill., bringing them to the runners-up position in the Illinois State basketball championship held in Champaign, Ill.

In Champaign 15,000 parents, students and fans cheered for a victory. The great sophomore center Darrel Allen added fire to those cheers while breaking the State's rebound record of 55 for the tournament. Before the end of the game Darrel Allen had pushed his 6-foot 6inch height to capture a new State rebound record of 58. Allen was the choice of the press for the most outstanding player award in the tournament—he was chosen as an All State Center by the Chicago Tribune.

Much of this team's rising success stems from the detailed coaching techniques developed by Coach Jerry Tokars. As pointed out by Coach Tokars, the technique fits in with De La Salle's athletic motto, "A team that won't be beaten."

Coach Tokars has coached the Meteors for 22 years and was recently honored by being selected as the alternate coach of the State tournament. His name is listed in the Chicago Tribune's Illinois Basketball Association Hall of Fame.

Coach Tokars is setting the team on a straight course to next year's championship playoffs. The outlook for this goal is promising with many of this year's veteran players continuing into next year's season. Darrel Allen will be returning with Aaron Harris. Upcoming freshmen will add to this talent bank that Coach Tokars will draw from to reach the playoffs.

Mr. Speaker, I am proud to honor these young men whose determination and fine team work brought the De La Salle Meteors up through the regional competition and super sectional contests to the semifinals who were honored at the 39th Annual Community Congress of the Back of the Yards Neighborhood Council

I attended the congress held on Palm Sunday at Saint Michaels Social Center, along with 400 guests and delegates. Chicago Mayor Michael Bilandic gave an eloquent speech and paid tribute to the long De La Salle history of accomplishments.

The history of De La Salle is impressive. Its listing of graduates include athletes such as Ed Riska, all American of Notre Dame; Bob Kennedy, who was in pro baseball with the Chicago White Sox and is now general manager of the Chicago Cubs; La Rue Martin, all American at Loyola University.

De La Salle has inspired and graduated many fine civic leaders such as three of Chicago's mayors, Mayor Richard J. Daley, Mayor Martin J. Kennelly, and Mayor Michael A. Bilandic. Other civic leaders include Morgan Murphy, the chairman of Commonwealth Edison; Joe Meegan, community leader and editor; the late Daniel Ryan, whose name now endows Highway 90-94; the late James B. McCahey, president of the Board of Education of Chicago, and the late Mike Connolly, a Hollywood columnist.

The school's listing of religious, civic, and professional leaders goes on and on—so too does the school's listing of new

achievements.

Whether it is in athletic accomplishments or in preparing the future leaders of our great community, De La Salle Institute stands as a model to the entire Nation and I am proud of its many contributions to the city of Chicago.

"WHAT AMERICA MEANS TO ME"

HON. TOM HARKIN

OF TOWA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. HARKIN. Mr. Speaker, each year the Veterans of Foreign Wars of the United States and its ladies auxiliary conduct a Voice of Democracy Contest. This year nearly 500,000 secondary school students participated in the contest competing for five national scholarships.

The winning contestant from each State will attend the Veterans of Foreign Wars Annual Congressional Convention and Dinner to be held March 4 to 9.

The 1976-77 Voice of Democracy scholarship Iowa winner is Jan Leslie Elias, the daughter of Mr. and Mrs. Norman Elias of Persia. It is my pleasure to insert into the Record, Jan's winning speech:

WHAT AMERICA MEANS TO ME

America! It's only a small word, but a word that my life centers around. Our country is "home" to me. Anything that I have ex-

perienced is "America."

America is not made up of just "baseball, hotdogs, or apple pie," nor is it simply a red, white, and blue flag rippling in the wind. No, she is much more than those symbols. She becomes more and more a part of "me" as I live within her boundaries. America reveals herself to me through everything I see, hear, or feel.

I see America in a vast number of varying places and situations. She is the majestic Grand Canyon. I see her on snow-peaked mountains and in fertile green valleys. America can be scampering rats in city dumps or sparkling silver in "Tiffany's." I see America at bustling football games, at chaotic family reunions, in crowded shopping centers, and on television every evening with Walter Cronkite.

America is the smile of a parent when his child has taken his "first" step! She is the terror-stricken eyes of a five-year-old at his first day of school. Watching teenagers learn how to drive a stick-shift; noticing the eternal twinkle in Grandpa's eye . . . these are

America.

Our country means new Easter dresses, playing Monopoly, horseback rides, prom night, and semester tests. America, word of opposites, can be Las Vegas or Harlem.

America watches a tear roll down a child's face. She is the middleclass worker, striving to "break even." I see her on the wrinkled faces of the aged while time crumbles away. I can "see" America in all things, but I

"hear" it, too. She's chirping robins, the humming air conditioners, rustling leaves, and the crunchy snow.

America screams at a pep rally before a championship game. It is the rustle of magazine pages. The friendly yip of a puppy, a gentle spring shower, the moaning siren: all ring America!

I hear America on television: The Fonz on "Happy Days", and the pop of champagne bubbles on the "Lawrence Welk Show". She harmonizes with the Mormon Tabernacle Choir, or crickets chirping on a summer evening.

The surging blast of rock and roll music or Beethoven's majestic fifth symphony, the joyous racket of Christmas carolers, the banging fireworks of July 4th—all are America.

Our nation is blaring horns at five o'clock traffic on congested freeways or dead silence in an "old cemetery" road. America shouts—and sighs.

I can "feel" America. America feels satisfaction after passing the final exam with an "A". Our land is the continual struggle between you and another person for that vacant position. America can be frustration when your car has a flat tire or she is joy when you find that "one special person" to share your life with. America is sadness when your best friend moves a thousand miles away.

I feel America all around me, every moment of the day. She expresses every known emotion. I see her in time of crisis—her strength is shown through those who "pick up the pieces" and start over after the tornado. I see her in the face of death, evident in the solemn stare of a young boy who wonders why mommy will never "wake up."

America lives in new fads or solid corner-

America? She is truth. Democracy hears her subjects criticize and reprimand. Her freedom sees riots on campuses and campaigns for equal rights. Our country touches opportunity with no limitations.

My senses perceive hope and belief that things will always get better in America. To me, she is trust in God, facing day with a renewed surge of strength.

America is my birthplace, my home, my family, my friends, my religion, and will probably be my grave.

America. It's not just a word. It's not just the flag, or the superbowl, or the band playing. My country is much more than those. America: it's Me!!!

MR. WILLIAM E. PAINE COMMENDED BY CARNEGIE HERO FUND COM-MISSION

HON. CHARLES J. CARNEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. CARNEY. Mr. Speaker, I would like to pay tribute to Mr. William E. Paine of 4235 Dobbins Road, Poland, Ohio, upon being awarded a bronze medal by the Carnegie Hero Fund Commission for his outstanding act of heroism in rescuing Mr. Walter L. Wilfong from a burning

On January 14, 1976, Mr. Walter L. Wilfong was involved in a serious automobile accident. Pinned in the front seat of his automobile, Mr. Wilfong at-

tempted to escape as flames erupted in the engine compartment and spread to the interior of the car.

A labor foreman, Mr. William E. Paine, who was in the vicinity at the time of the accident, rushed to the motor vehicle and proceeded in vain to pry open the battered car door. Exercising quick judgment, Paine lunged through a partially broken car window and seized Mr. Wilfong. With extreme difficulty, he dragged the injured man from the wreck as it was consumed by flames. Mr. Wilfong's life was saved and later he recovered from his injuries and burns.

Mr. Speaker, I commend Mr. William E. Paine for performing this brave act and for risking his life to save the life of another human being.

LITHUANIAN INDEPENDENCE DAY

HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. KOSTMAYER. Mr. Speaker, I would like to join with my colleagues in the House of Representatives in commemorating the 59th anniversary of Lithuanian Independence Day.

I think that we can all find much to admire in the long history of Lithuania. Dating back to the year 1009, Lithuania has always been known as a country of people devoted to the preservation of basic human freedoms, faithful to their religion, language, and traditions.

In modern times Lithuania has suffered much. Despoiled by World War I, the people of Lithuania were able to rally together and demand from their former German oppressors the right to conduct a congress for the purposes of establishing a free Lithuania. On February 16, 1918, this Congress proclaimed an independent Lithuanian state based on democratic principles.

A permanent constitution was adopted on August 1, 1922. Included in this Constitution were the freedoms of speech, assembly, religion, and communication.

Unfortunately, Lithuania was one of the first countries to suffer from the aggression of Nazi Germany and the Soviet Union. In the face of an ultimatum and the threat of war with Germany, Lithuanians were forced to give up part of their state in March of 1939. Soviet interference quickly followed. On August 3, 1940, Lithuania was declared a constituent republic of the Soviet Union.

I am proud to point out that the U.S. Government has never recognized the unlawful seizure and occupation of Lithuania by the Soviet Union. Despite being dominated by the Soviet Union for over 30 years the people of Lithuania have maintained a spirit of independence and a pride in their national heritage.

I applaud their courage and resiliency and hope that their goals of freedom and self-determination will soon be realized. ERA MYTHS

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. FRASER. Mr. Speaker, in 1923, Alice Paul authored the Equal Rights Amendment. She recently celebrated her 92d birthday.

In 1972, the Congress finally passed the Equal Rights Amendment. Thirtyfive States have now ratified the ERA. Three of these, Nebraska, Tennessee, and Idaho, have voted to rescind their ratification; but these reversals may not successfully withdraw their original ratifications.

Amy, a character in Gary Trudeau's "Doonesbury," was afraid that it would take 200 years to pass the ERA. Of course, Amy was right. It is now more than 200 years since her comic-strip apprenticeship with Paul Revere. We just celebrated our Nation's Bicentennial and we have not yet acknowledged that women and men must be treated equally under the law.

ERAmerica, women's groups, Members of Congress, Presidents, and First Ladies have all attempted to communicate information about the purposes of the ERA to Americans. Despite all these efforts, rumors, and misinformation continue to circulate.

Mr. Speaker, I would like to insert in the Record an article by Sylvia Porter that appeared in the Washington Star on March 30, 1977. Ms. Porter describes some of the myths about the ERA that continue to confuse Americans. She also reiterates some important facts about the ERA's effects. The article follows:

Your Money's Worth—Vicious Myths Stalling ERA

(By Sylvia Porter)

A full five years after the Equal Rights Amendment was passed by Congress and recommended to the states for ratification, it still is three states short of becoming a part of our Constitution. Why has so reasonable a measure been so long delayed?

Because of a deliberately waged campaign—characterized by scare tactics and misinformation—to create confusion and misunderstanding. Thus, below are six myths (some really ludicrous) that have been circulated about the ERA, along with the facts.

Myth No. 1: If the ERA is ratified, husbands will pay Social Security taxes twice, one on their own earnings and again on the value of their wives' services as homemakers.

Facts: This is simply not true! Some changes in Social Security law would be required, but they would be in the direction of recent Supreme Court decisions, giving husbands and widowers of woman workers the same rights as female spouses now enjoy. The rumor that ERA would double a husband's Social Security tax liability is a vicious lie.

There is great merit in the concept of giving a homemaker credit for the work she does in the home. But it would require enactment of a separate law—possibly permitting couples to share their family earnings, just as they now file tax returns.

Myth No. 2: Under ERA, a husband would no longer be obliged to support his wife. This, says Phyllis Schlafly, vehement opponent of ERA, "would take away the most basic and precious legal right every wife now enjoys." A wife also would have to "provide half the family income," adds Schlafly.

Facts: The ERA would not require any mathematically equal contribution to family support from husband and wife, an analysis of ERA in the Yale Law Journal of April 1971 states.

Instead, the decision would be based on such matters as the current resources of husband and wife, their earning power, the non-monetary contribution each makes to the family.

If one of the couple was a wage-earner and the other worked in the home, the wage-earner, regardless of sex, would have the duty of supporting the other spouse.

Myth No. 3: The ERA is an anti-male measure.

Facts: The title of this proposed 27th Amendment to the U.S. Constitution is "Equal Rights for Men and Women." Its purpose, says Mary A. Delsman, in "Everything You Need to Know About ERA," (Meranza Press, \$4.50 paperback), is to declare that "women and men have equal legal standing and that individuals should be treated as individuals, not all one way because they are all one sex."

The ERA allows for legal distinctions between the sexes when the subject concerns physical or functional differences unique to one sex. And that leads into the next myth, refuted again and again.

Myth No. 4: According to this absolutely silly rumor, there would be no separate bathrooms for men and women and the sexes would not be segregated in living quarters in dormitories, prisons, etc.

Facts: Of course, this is not true. The ERA deals only with public legal relationships. And even in the legal area, sex classifications based on physical or functional differences would continue.

Myth No. 5: Women would be drafted and assigned to combat duty.

Facts: Young women would be subject to the draft (if we had a draft) but not be required to perform military duties for which they were not qualified. Some might be assigned to combat duty, many would not be. (Nurses have been in combat zones in all our wars.)

Just as in the past, the single would be drafted first; childless, married persons, second; and then the situation in each family would have to be weighed to decide whether husband or wife, or neither, or both, were to be called up.

Myth No. 6: Upon ratification of ERA, states would be required to validate homosexual marriages.

Facts: Bunk. All that ERA proposes to do is give males and females equal rights. By definition, a marriage is the union of a man and a woman. ERA will not change that definition.

In the above myths lie the reasons legislatures have voted against ERA despite the attitudes of most of a state's residents.

In North Carolina, a poll showed less than 18 percent against ERA but the legislature defeated the measure.

In Florida, where ERA will come up for legislative action after April 6, polls show 67 percent favoring ratification, but the law-makers are being hit by an anti-ERA barrage—not valid arguments but fictitious, venomous propaganda, most from out of state.

H.R. 3869—TO COUNTERACT A CIVIL SERVICE COMMISSION RULING

HON. BALTASAR CORRADA

OF PUERTO RICO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. CORRADA. Mr. Speaker, on February 23, 1977. I introduced H.R. 3869 in order to counteract a discriminatory ruling by the Civil Service Commission. The ruling reduces the cost of living allowance—COLA—granted to Federal employees who have access to a commissary or exchange and reside in nonforcign areas outside the continental United States.

The proposed legislation would amend 5 U.S.C. 5941 (1966) by limiting the application of the ruling to civilian Federal employees. Military retirees with 20 years of service in the Armed Forces and honorably discharged veterans with 100 percent service connected disability, their dependents and unmarried widows or widowers are entitled to exchange and commissary privileges.

Veterans with 100 percent service connected disability and military retirees working for the Federal Government have access to commissaries and exchanges because they earned the privilege from service in the U.S. Armed Forces. Now the Civil Service Commission has turned this privilege into a handicap. By limiting the application of the ruling to civilian Federal employees, the law would affect only those who are presently receiving a windfall.

I have reintroduced the legislation as H.R. 5575 with the cosponsorship of Mr. Hawkins, Mr. Badillo, Mr. Roe, and Mr. Steers. To further explain the existing situation I would like to highlight the following points:

First. The nonforeign areas outside the continental United States have predominantly import-substitution economies and thus a high cost of living.

Second. Although the existing law theoretically applies to all Federal employees, it affects only veterans. Taking the existing situation in Puerto Rico as an example, only veterans have commissary or exchange privileges, civilian Federal employees do not.

Third. A veteran's exchange privileges are not granted to offset cost of living increases. They are an earned privilege derived from service in the U.S. Armed Forces.

Fourth. The Commission's ruling is based upon "access" to an exchange or commissary, not its actual use. The effect is to penalize the veteran regardless whether he/she uses the facility. It further encourages use of the commissary and chills the veteran's freedom of choice in consumer affairs.

Fifth. The term "access" to a commissary refers to the existence of the privilege rather than the availability of the facility. There are many veterans who reside in nonforeign areas outside the continental United States who do not

have these facilities in the surrounding areas. The cost and inconvenience of traveling to the exchanges further penalizes the veterans.

Sixth. Exchanges/commissaries do not fulfill all the consumer needs of a veteran. An elimination of the COLA places the veteran and his/her family at a distinct disadvantage in the civilian marketplace.

Seventh. Elimination of the COLA compounds inflationary conditions for veterans in nonforeign areas outside the

continental United States.

Mr. Speaker, I am including a letter from a constituent which exemplifies one aspect of the ordeal veterans and their families are undergoing because of the Civil Service Commission ruling:

DEAR MR. CORRADA: I am employed by the U.S. Postal Service at the General Post Office in Hato Rey, I have been a career Civil Service employee with the Federal Government

for the past 24 years.

In 1974, I married a veteran who had been in the U.S. Army for 21 years. As a Federal employee, I always received the cost-of-living allowance whenever one was in effect. However, I recently learned that I was going to lose my cost-of-living allowance solely due to the fact that because I am married to a veteran (by the way, he is a disabled veteran), and because as the wife of a veteran who served honorable for 21 years, I have an I.D. card which entitles me to buy in the PX and the Commissary. This means I am about to lose 7.5% of my salary.

What I wish to emphasize in this letter is the fact that I am going to lose the COLA within the next few weeks which means I shall lose a large amount of my salary. I have considerable loans and other expenses to pay and am, in a sense, the head of the house, as

far as expenses are concerned.

I believe it is terribly unfair that I must lose the COLA just because I married a veteran. It is especially unfair since my husband is a disabled veteran and can't even hold a job because of his illnesses, is not entitled to unemployment insurance because he is disabled, does not qualify for disability retirement from the Veterans Administration because he didn't work in the Federal Government for 5 years or more, and cannot collect Social Security, either.

I am only a PS-5 at the Post Office with no prospects for a higher grade, thus, my salary

is not considered a high one.

In view of the aforementioned facts, I would sincerely appreciate it if you would please do whatever you can to see that veterans and their wives do not lose the cost-of-living allowance.

I believe a person who has served in the Armed Forces of the U.S. for over 20 years deserves to have PX privileges and Commissary privileges and still retain his cost-ofliving allowance if he is a Federal employee.

In a case such as mine, don't you agree that it is cruel for my cost-of-living allow-

ance to be taken away from me?

Your opinion regarding this matter and any efforts you make towards helping people such as myself will be genuinely appreciated. Sincerely,

DOROTHY NEWBY,

Calle Domingo Delgado HW-18, Septima Sección, Levittown Lakes, Cataño, Puerto Rico 00632.

Note.—I wish to add that only on two occasions have I ever used the Commissary as I was very displeased with the quality of meat I purchased there as well as the fact that it was very high-priced compared to Pueblo Supermarket. My husband and I do not drink liquor and I don't smoke so I am not interested in liquor or cigarettes. Since my only opportunity to get to the Commissary would be on a Saturday, I would have to get up at 5:30 A.M. to be one of the first people on line there, would have to spend extra money for gasoline, seldom have the car on Saturdays as my husband uses it on that day, and would miss my morning at the beauty parlor or an opportunity to do household chores. What I am saying is that it is very difficult for me to get to the Commissary and I prefer the freshness of the meats and vegetables at Pueblo Supermarket.

I have just been informed that my next paycheck will be a very small one because deductions will be made concerning the C.O.L.A. retroactive to December 15, 1976."

QUOTAS TOTALLY UNJUSTIFIABLE

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. BIAGGI. Mr. Speaker, the recent statement by Health, Education, and Welfare Secretary, Joseph Califano, endorsing quotas as a means of implementing affirmative action programs in employment and education, have left many in this Nation with a sense of bitter disappointment. His position, in my estimation, is without any foundation and represents an insensitivity to the thousands in this country who have endured gross discrimination at the hands of quotas. In effect, Secretary Califano condones the establishment of reverse discrimination and this, in reality, is far worse than the discrimination which affirmative action programs were designed to correct. I do not believe that this is the Secretary's contemplation.

One opponent of Secretary Califano's position is Prof. Sidney Hook of New York University, who wrote a lengthy article denouncing the Secretary's point of view. Professor Hook refers to racial and sexual quotas as "illegal and immoral." He states as his main premise, that the only way to ameliorate the discrimination of the past, is to apply a single and fair standard for all. This rather simple proposal has been totally emasculated by the present system and as a result, we have unfair standards being applied to only a select few.

Professor Hook substantiates his argument by citing the example set by professional sports in overcoming their previous discrimination problems. In the

professor's own words:

In no field was racial discrimination so rampant as in professional sports until Jackie Robinson broke the color barrier. Today we do not set quotas in sports or engage in reverse discrimination to undo the past. We select the best qualified players, regardless of their race or national origin. Who worries about proper numerical representation? The same is true in music and the arts. Why should it be any different in other fields if we operate with a single relevant standard for all?

The Constitution of the United States provides for "equality" under the law for all. It does not provide for preferential treatment to allow some to achieve equality—it means equality for all. The only way one could possibly justify quotas

would be if they applied them equally for all. They are not—they are wrong—and they must be abolished for the good of this Nation.

The Supreme Court may provide us with the ultimate decision on this matter. The Court is expected to rule on a California case which determined that a medical school admissions program was unconstitutional because it specifically used race as a criteria in its admissions policy. I fervently hope that the Supreme Court will uphold the judicial wisdom of the California court, and strike out quotas once and for all.

It is especially disturbing to me that a man of the caliber and influence of Secretary Califano, would take such a position. He must be aware that qualified members of minority groups have been denied opportunities because of the quota system. He must be aware of the deeply rooted polarization which quotas have created in this Nation. My basic question to Secretary Califano is, why the necessity to take this position?

I have long been opposed to quotas and will continue to oppose them in my capacity as a member of the House Education and Labor Committee. The immo-rality and unjust nature of this system transcends whatever mythical benefits they are supposed to provide. Where discrimination exists, we should prosecute the offenders to the fullest extent of the law. If all the resources required for gathering records to support affirmative action programs were applied to antidiscrimination actions, justice would be swift, all-encompassing, and effectivethe best deterrent to further discrimination. Let us return to a system in which equality, justice, and merit prevail. This is what the American people want, and this is what the American people deserve.

I now offer Professor Hook's article, which appeared in the New York Daily News on March 27, 1977, for the consideration of my colleagues:

RACIAL AND SEXUAL QUOTAS: THEY'RE NOT ONLY ILLEGAL; THEY'RE IMMORAL

(By Sidney Hook)

The least one can expect from a Cabinet official sworn to uphold the law is that he not urge citizens to violate the constitutional law of the land. But in his endorsement of illegal racial and sexual discrimination, HEW Secretary Joseph Califano has done precisely that. He has called for support of racial and sexual quotas and policies of preferential employment and admission outlawed by the equal-protection clause of the Constitution and the Civil Rights Act of 1964.

A quota system is not only legally wrong; it is morally wrong. It smacks of the notorious "numerus clausus" system of reactionary European states that barred minorities from posts for which they were qualified. What made past discrimination against women and minorities wrong was a failure to consider them on the basis of their individual qualifications, the judgment of them not on their merit but on membership in a group or class over which they had no control. In the name of equality and justice, Califano is proposing new forms of inequality and injustice.

The only way to counteract past and present racial and sexual discrimination is by applying a single fair standard to all, and not by reverse discrimination that unfairly punishes some individuals today for the

evils of previous generations. Those evils flowed precisely from the same immoral principle that Mr. Califano now endorses—judging persons not by their specific capacities but by their color or sex.

Mr. Califano asks: Where shall I get firstclass black doctors, lawyers, scientists without a quota system? The answer is—by strengthening our elementary and secondary school education, and dropping all discrimination; then an adequate supply of first-class blacks will appear. Quotas are not needed for this.

Here is some evidence. In no field was racial discrimination so rampant as in professional sports until Jackie Robinson broke the color barrier. Today we do not set quotas in sports or engage in reverse discrimination to undo the discrimination of the past. We select the best qualified players, regardless of their race or religion or national origin. Who worries about proper numerical representation? The same is true in music and the arts. Why should it be any different in other fields if we operate with a single relevant standard for all?

It may be necessary in certain areas to offer remedial programs and economic aid to all persons whose education and social background have left them disadvantaged. But once they have overcome these handicaps, they must be selected on the basis of the same criteria of competence as we apply today in professional sports, music and the arts.

Those who, like Mr. Califano, urge a quota system and preferential hiring are sacrificing the civil-service principle, our most effective bar to corruption and all forms of invidious discrimination. He agrees that color, sex and national origin have nothing to do with what makes a person a first-class athlete or artist. Why, then, does he call for a quota system physicians, lawyers, administrators and scientists? Here his own unwitting racism and sexism are disclosed. He and those who think like him fear, as I do not, that members of minorities and women will not make the grade. He believes, as I do not, that regardless of all remedial programs, members of minorities and women need the special crutch of protective favoritism. His own and sexism are apparent in his racism patronizing assumption that equal opportunity is not enough, that when all invidious discriminations are outlawed, blacks, women and other minorities cannot make it on their

The great promise of the American tradition is that each person is entitled to be judged on his merits alone in any fair race or in any honest evaluation for a position. That tradition was betrayed by the racists and sexists of the past. It is being betrayed today by the partisans of a quota system who would root human rights not in the individual person but in race, sex or national origin.

To adopt Mr. Califano's quota system would be psychologically demoralizing. Self-respecting members of minorities and women would resent the imputation generated by the quota system that they owe their positions not to their capacities but to reverse discrimination.

To adopt Mr. Califano's quota system would be to plunge our nation into turmoil. If we abandon our present approach which is blind to color, deaf to religious dogma, indifferent to sex or national origin where only merit should count, we intensify endemic racial and national conflicts. The struggle for "proper quotas" among different groups, all vying to increase their quotas, will generate tensions that in time may burst with explosive force. Our pluralist society will become a permanently polarized society.

Instead of a quota system, let us aim for full employment and a guaranteed family income. Instead of reverse discrimination, let us build a learning society with remedial

educational programs at every level. Let us have open enrollment and universal access to post-secondary education, provided we do not dilute and abandon standards and lapse into a dead, dull sea of mediocrity.

Excellence in any field has no color, merit no sex, truth no national character.

(Note.—Sidney Hook is emeritus professor of philosophy at New York University and a senior research fellow at the Hoover Institution, Stanford University.)

WOMEN'S INTERNATIONAL LEAGUE FOR PEACE AND FREEDOM SPEAKS OUT ON BUDGET PRIORI-TIES

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. EILBERG. Mr. Speaker, the Women's International League for Peace and Freedom has presented some important testimony to the House Committee on the Budget, outlining its views on the priorities it feels we should establish in Federal spending in the coming fiscal year.

For more than 60 years, the league—which was founded by that great American social worker, Jane Addams, and which is headquartered in Philadelphia, Pa.—has acted as a conscience for America. The league's testimony, presented by Naomi Marcus, president of the U.S. section, is in keeping with the league's historic commitment to improving the quality of life in our Nation.

Because there is so much wisdom contained in Mrs. Marcus' testimony, I commend it to my colleagues in the Congress. The full text of the statement by the Women's International League for Peace and Freedom follows:

TESTIMONY FOR THE HOUSE BUDGET COMMITTEE, MARCH 2, 1977

The Women's International League for Peace and Freedom was founded in 1915. It works primarily through education and citizen action to achieve peace, freedom, and justice by nonviolent means. The League has sections in 23 countries and 120 branches in the United States. It has consultative status B at the United Nations. We are grateful to the House Budget Committee for giving us this opportunity to express our point of view, and congratulate the Committee for the excellent job it is doing in handling the Third Budget Resolution.

Budget Resolution.

The budget of the government of the United States is probably the single most important factor in determining the economic and social health and growth of our nation. The amount to be spent on federal services, subsidies, grants, and other programs, the amount to be collected by taxation of individuals and businesses, the amount to be borrowed to cover any deficit, are vital decisions. They necessarily reflect how the Administration and the Congress view the current state of the economy, and the relative importance to be attached to the needs of the nation.

It is appropriate, as our nation enters the third century of its existence, to remind ourselves of our Constitutional goals to "form a more perfect Union, establish justice, insure the domestic tranquility, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity." It is appropriate and necessary to examine the budgets of previous years and the proposed budget for Fiscal Year 1978 to determine whether federal spending reflects the historical purposes of our nation in view of our country's current needs. It is possible to make choices, to structure the federal budget without incurring additional deficits, so that the human needs of our country can be met.

The major problems facing our country today are economic. High rates of unemployment and inflation, increasing numbers of people officially defined as "poor," malnutrition, substandard housing, inadequate health care, decaying cities, the growing needs of the elderly and of small farmers—these are the problems that concern most Americans now. These are the problems, far more than any external threat, that must be dealt with at this time in our history.

How you, members of Congress, deal with these problems will determine the course of history for many years to come. You must make a careful appraisal of what our nation should spend on the various segments of our national life and that appraisal must be conducted in like of realistic assumptions about

The Women's International League for Peace and Freedom has serious reservations about the economic assumptions on which the revised budget for Fiscal Year 1978 is based. While the full impact of the severe winter just passed has yet to be assessed and while no one can predict how long the drought in the West will last or with what economic implications, most economists agree that there will be a significant depressing impact on the growth of the economy this year, with an increase in the anticipated rate of inflation. The Eggert Report prediction on unemployment is quite discouraging—that there is doubt that the jobless rate for the year will average less than 7.3 percent.

The need for economic stimulus is evident. It is the belief of the League that the most effective way to stimulate the economy is to provide jobs-and thus purchasing pow--for those who are presently unemployed. We do not believe that the "trickle-down" through tax reductions and rebates can do the job. We note that in 1975, 80 percent of the rebates went into savings. Therefore, we were disappointed by the formula for economic stimulus for 1977 and 1978 as proposed by the Administration. For Fiscal 1977, rebates, changes in standard deductions and business tax incentives account for \$13.8 billion of the \$15.7 billion proposed-allowing only \$1.9 billion total for public service em-ployment, expanded training and youth programs, accelerated public works, and creased countercyclical revenue sharing. For Fiscal 1978, the proposed spending is altered considerably, with \$8.1 billion going into changes in the standard deduction and busitax incentives and \$7.1 billion going into employment, public works, and revenue sharing. We are aware that Congress is now in the process of legislating changes in the Fiscal 1977 portion of the stimulus program and urge that Congress in its wisdom give careful consideration to revising the formulas for 1978 so that more money will go directly into job programs. Estimates of how many jobs would be created by the Administration proposal vary widely. Secretary of Labor F. Ray Marshall has predicted that the program, during its two year course, could place in jobs or training (directly or indirectly) 2,000,000 Americans who would otherwise be out of work, while others predict substantially smaller figures.

The Women's International League for

The Women's International League for Peace and Freedom is greatly concerned about the impact of unemployment, underemployment, and inflation on the lives of our fellow citizens. Bureau of Census figures released in September, 1975, showed that the

number of Americans living below the poverty line had risen in 1975 by 2.5 million, the largest increase since the government began keeping poverty statistics in 1959. The number of people defined as poor was 25.9 million, or 12.3%, with long spells of unemployment responsible for 42% of the 1975 increase. Census Bureau figures just released show that inflation hits low and moderate income families hardest. While inflation in 1975 was 7%, income increases for families in the bottom fifth of the income scale averaged only 4.3% over the previous year, while income for families in the top fifth increased an average of 6%.

ECONOMIC IMPACT ON WOMEN AND MINORITY GROUPS

Economic problems have special impact on women and minority groups. Women are entering the job market in unprecedented numbers, and now comprise 40.7% of the labor force. Twenty-three percent of them are single; 19% are divorced or separated; 29% are married to men whose incomes are less than \$10,000 a year. The Census Bureau in 1976 reported that about 1 out of 7 families in the United States is headed by a woman; yet unemployment among women since 1970 has run about 1.5% higher than the unemployment rate among men and median incomes in 1974 for women were \$6,772 and \$11,835 for men. The amount of hidden unemployment among women cannot be accurately gauged, but a tight job market and a paucity of day care centers limits the options for women. In 1976, the seasonally adjusted figures for August showed national unemployment at 7.9%, but unemployment among black females and other female minorities at 12.3%, and black teenagers at 40 2%

Tackling the problems created by poverty and near-poverty is going to be a monumental and expensive task, but the longer we delay the harder it will become. An extensive public jobs program will help considerably to revitalize the economy and to lift some of the poor and near-poor out of their misery. But we must face the fact that long neglect of the social problems of our country created a whole generation of young people whose development has been impaired by lack of adequate diet or education or training. About a year ago, a team of scientists estimated that more than one million American infants and young children have either suffered brain damage or risk it because of malnutrition. When the poor cannot afford to feed their children, the young are doomed to remain in the poverty cycle. At the other end of the life cycle, consider the fact that one out of every ten Americans is age 65 or over, and that one-third of the urban elderly live on incomes below the official poverty level.

We cannot accurately estimate the number of hungry or malnourished people in our country today, nor can we put a price tag on what it would cost to provide an adequate income maintenance program. But neither can we put a price tag on the lost potential and productivity of people trapped in the poverty cycle, nor on the cost of human misery.

The Women's International League for Peace and Freedom believes that it is time to institute a federally funded comprehensive health care program. Although federal funding for health care has been going up over the years, so has the cost of medical care. By 1970, elderly people were already paying more out of their own pockets for medical services than they did before Medical services than they did before Medical world in the world the United States now ranks 10th in public expenditures per capita on health care, 17th in population per physician, 29th in population per hospital bed,

17th in infant mortality, and 20th in life expectancy.

In housing, according to the Bureau of Census Annual Housing Survey: 1974, the United States has 3,062,000 houses lacking some or all plumbing and 3,438,000 additional homes that are overcrowded. Nor is this entirely an urban problem: about % of the homes lacking adequate plumbing are in non-metropolitan areas. Furthermore, according to the 1974 survey, 5,925,000 home owners and 9,666,000 renters were spending more than 25% of their income for housing.

The Women's International League for Peace and Freedom favors a complete revision of food programs, welfare programs, and aid for dependent children, with fairly uniform, nationwide payments and funding principally by the federal government. The purpose of such a program must be to assure a decent level of income maintenance for all. Elimination of the wasted costs of administering the present patchwork system would go a long way toward providing expanded services and aid to the recipients.

The Women's International League for Peace and Freedom recognizes that some of the needed social programs are expensive, and at the same time our organization takes a dim view of large federal deficits. However, we feel that funds can be reallocated to finance major increases in human needs programs. One of the two major sources of such funds is in the military budget. The other is through tax reform.

MILITARY SPENDING

The national defense function constitutes about one quarter of the total budget. However, this category has a much larger impact on budgetary decision making than this figure would indicate. The bulk of federal spending is relatively uncontrollable under present law, as shown on pages 90 and 91 of the 1978 Budget Revisions: February, 1977. Relatively uncontrollable outlays total \$335.4 billion out of the Carter Administration's proposed budget of \$459.4 billion. \$71.4 billion, or well over half, of the relatively controllable outlays come in the national defense function. Thus, it is clear that we must look very carefully at military spending if we wish to release significant funds to meet urgent demands without increasing the federal deficit.

The controls on military personnel costs which the Carter Administration has indicated it plans to institute may eventually release a few billion dollars annually for other uses. But to release substantial funds in the near term will require challenging some of the basic assumptions of military planners.

Is it reasonable, for example, to assume that our strategic nuclear forces need the capability of destroying half the opponent's industry and one fourth of its population after the United States has absorbed a well-designed first strike? Would a rational opponent risk anything close to that level of destruction? And could an irrational opponent be effectively deterred from instituting an insane military attack by any level of nuclear capability?

The strategic nuclear triad (bombers, land-based ICBMs, submarine-based ICBMs) is not engraved on tablets of stone. A prudent planner, concerned about shifting and preserving resources, might feel it was a redundancy we cannot afford. Nor must it be assumed that every weapons system is probably nearing obsolescence by the time it is well into production. One reason the Soviets, with a much smaller Gross National Product than we have, is able to compete in the arms race is that they replace weapons systems much less frequently than we do.

The Women's International League for Peace and Freedom notes that the procure-

ment figure in the budget for Fiscal Year 1978 (budget authority) is \$32.2 billion—up \$11.3 billion, or about 50%, from the actual budget authority figure for 1976. Even adjusted for inflation, that is a tremendous increase. We should like to state emphatically that spending that amount of money on military procurement just doesn't make economic sense; that it is, in fact, counter to slowing the rate of inflation and cutting back on the number of unemployed. Military production does not aid in the formation of productive capital; the weapons produced have no further impact on the economy in terms of generating demand for additional products or services. Military production is highly capital intensive, not labor intensive, and so produces far fewer jobs per billion dollars spent than does spending in the civilian segment of the economy. Military spending leads to instability in the economy s contracts are terminated or shifted from one locality or contractor to another. And cost overruns, lack of competitive bidding and government subsidies make military production expensive, while the demand it generates for scarce resources, including energy, is inflationary.

Larger military spending does not guarantee greater national security. In fact, the constant introduction of new weapons systems which change the arms balance is a destabilizing factor which in itself poses a threat to our national security. Wouldn't it provide us with more security if we devoted our resources and talents, which are enormous, to fulfilling the dreams of the American Revolution? Surely if we can demonstrate a greater degree of social and economic justice within a framework of political and cultural freedom, our standing as a nation in the world will improve.

The Women's International League for Peace and Freedom is aware of the argument, made by some, that cutting defense expenditures would have an adverse effect on our economy. This argument is usually based on the assumption that the long depression of 1930s was unrelieved and unrelievable until the U.S. went into high gear to produce armaments for World War II. But the fact is that an equal amount of money put into any form of production would have produced similar results. Furthermore an analysis of the economic impact of the large and abrupt defense spending cutbacks after the second world war and after the Korean conflict reveals that the economy was capable of adjusting itself rapidly with much smaller unemployment rates than had been predicted.

What is necessary in order to ease the transition period from a military oriented economy to a civilian oriented economy is government planning and government funding for the transition period. With such planning and funding, it is probable that a healthier economy would be produced with a stronger economic base than before the cuts.

TAX REFORM

The second major source of funds to meet human needs is tax reform. While we recognize that it is impossible to compute revenue losses attributable to provisions of the federal tax laws which allow a special exclusion, exemption, or deduction from gross income or which provide a special credit, a preferential rate of tax, or a deferral of tax liability (definition of "tax expenditures" in the Congressional Budget Act), it is clear that the sums are substantial. If one adds up the tax expenditure estimates in the Ford Administration's proposed budget for 1978, one gets a total of \$112.7 billion.

The budgetary impact of a reduction in revenue is just as real and as limiting to other budget options as the impact of a direct budgetary expenditure. However, it is less visible and is not subject to the appropriations process. In general, the Women's International League for Peace and Freedom

would favor the elimination of tax expenditures, and would prefer the use of normal budgetary means to achieve public policy objectives. Tax expenditures go disproportionately to the affluent. Clearly those with a very limited income have minimal capacity to take advantage of tax exemptions, deductions and exclusions, 231/2 % of tax expenditures* go directly to corporations. Even tax exceptions which at first glance seem designed to achieve worthy ends are skewed in favor of the wealthy. Home ownership, for example, is a laudable objective. But deductions for mortgage interest and property taxes provide great savings for the wealthy who would own their own homes anyway, but generally fail to allow the poorest to own their own homes.

We hope that President Carter's tax reform proposals, which are not reflected in his proposed budget revisions, will be comprehensive. Sweeping tax reform could generate tens of billions of dollars in additional revenue. Some of this might be foregone by lowering tax rates, but we feel the major portion should be retained for use in human needs programs which are discussed elsewhere in our testimony. At least in the initial stages of tax reform, certain exclusions from gross income, such as unemployment benefits and public assistance payments, which principally benefit the poor might be retained.

While we are aware that it may be too optimistic to expect that comprehensive tax reform will be enacted in time to have a major impact on the FY 1978 budget, we hope the Committee will seriously consider including some revenue gain from tax reform in its proposals.

SUMMARY AND CONCLUSION

In the view of the Women's International League for Peace and Freedom, the federal budget both reflects and determines national priorities. We believe that choices can and should be made in view of the nation's economic and social needs and its goals, and that a national debate on priorities should be instituted. We recognize that the House Budget Committee, as it moves toward presentation of the First Concurrent Resolution, will make major recommendations that will affect our national life for many years to

We have examined the budget for fiscal year 1978 and the budget revisions, and feel that additional funding is needed for job programs and social services and that less is needed for national defense. We believe that cuts in military spending and tax reform can provide much of the needed revenue for human needs programs, without significantly increasing the proposed deficit. We do not believe that our nation needs or can afford the redundancy of the strategic nuclear triad, and we believe that other savings in the national defense function are desirable and possible. We further note that many economists are convinced that a transition from a military-based economy to a civilian-oriented one can take place with a minimum of social and economic disruption, provided that federal funding is available to aid industry and workers during the transition period, and that the resulting economy would be healthier than the present one.

Unemployment is the major problem facing our nation today. A shift from defense spending to civilian spending could go a long way toward easing it. Bureau of Labor Statistics figures in "Structure of the U.S. Economy in 1980 and 1985" indicate that direct and indirect jobs produced for \$1 billion in final demand are 75,710 in defense contrasted with 112,363 in personal consumption, 100,072 in construction, 92,071 in transportation, 138,939 in health, and 187,299 in educa-

tion. Furthermore, military spending contributes to inflation—indeed, one of the causes of the present inflation is the high percentage of national spending that goes into military production; another is the result of the huge military spending that took place during the Vietnam War without compensating tax increases during that period.

We would point out that 75% of our population lives in urban areas, and that these areas are particularly in need of additional federal funding for social services and in-

come maintenance programs.

Vital decisions have to be made. Should spending on national defense consume one quarter of the national budget and well over half of controllable federal outlays? Or should funds be transferred to take care of pressing human needs—to provide jobs and homes and education and training and health care and mass transport? We suggest that it is imperative that our nation start now to strengthen the economy and to break the poverty cycle in which too many of our citizens are now trapped. There is an immediate need to redirect our dollars and maternal and human resources toward improving the quality of life in our nation.

We urge the House Budget Committee in considering the budget for fiscal year 1978 to begin to make the necessary transfers that will benefit all the people of our nation. We urge the transfer of \$15 to \$20 billion in the fiscal year 1978 budget from military spend-

ing to spending for human needs.

SOME THOUGHTS ON THE ELECTORAL COLLEGE

HON. STEPHEN L. NEAL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. NEAL. Mr. Speaker, there has been a great deal of talk recently about the need for changes in the electoral college system of electing our President and Vice President. I would certainly agree that some reform is necessary.

However, in spite of what I see as the need for reform, I would urge that we proceed carefully in this area. I am no expert on the electoral college—and I certainly do not have all the answers—but I am aware of the fact that there are many considerations which may not come readily to mind during discussions on abolishing the present system and electing our national leaders by direct popular vote.

A good friend of mine, Blanche Zimmerman of Winston-Salem, N.C., recently shared with me her thoughts on this important issue. Blanche is a very knowledgeable person, and I know she gave this issue a great deal of thought before coming to the conclusions she stated in a letter to me. I believe her comments will be of interest to my colleagues, and I would like to share them. Her letter follows:

DEAR STEVE: Since our last Presidential election reminded us again of what could happen in the electoral vote, I am concerned about whether or not Congress will consider electoral reform in this session.

I understand that the most popular proposal for reform is a decision by simple popular majority. This concerns me because I see in this method the possibility of three undesirable results:

 The candidates might concentrate on amassing large popular votes in populous areas and write-off less populous areas;

2. The popular vote would decrease awareness of concerns of electoral entities and decrease the impact of third parties, which are the breeding grounds for creative progress and the last spokesmen for preservation of particular traditional values;

3. The system could deteriorate into tyranny of the majority, fostering an entrenched elite concerned with maintaining the status quo and requiring overthrow of

the government to bring it down.

I also object to the concept of apportioning electoral votes according to the popular votes in states. In our increasingly mobile society geographical boundaries are becoming less and less viable as people identify more and more with groups that transcend geographical divisions. Also, like a national popular vote, this method would lessen identification of the particular concerns of identifiable groups.

The Declaration of Independence declares that the purpose of government is "to secure these rights" of the individual including the individual's part in determining the "consent of the governed." Of the major reform methods proposed, I feel that election of electors by Congressional Districts with two electoral votes going to the candidate winning the popular vote in the state is the

wisest proposal for reform.

Most certainly, reform of the Electoral College is long overdue; however, I also think we should avoid blind worship of unconditioned majority rule.

Respectfully,

BLANCHE ZIMMERMAN.

Now, Mr. Speaker, I call my colleague's attention to the lead editorial in the February 8 edition of the Washington Star. It addresses several additional points which the Congress and the public should consider carefully as the Nation debates the future of the electoral college.

We need to insure that a popularly elected President not be denied the office. But we must be diligent in protecting the rights of all our citizens, and careful not to destroy the delicate balance that has preserved our constitutional democracy and made it the most successful form of government in the history of mankind.

Therefore, I commend the following editorial to my colleagues as they, too, ponder the complexities of the electoral college issue.

[From the Washington Star, Feb. 8, 1977]
ANTI-FEDERALIST THINKING

The American Bar Association shares Sen. Birch Bayh's dim view of the electoral college and boasts that it has favored what abolitionists are pleased to call "reform" of that venerable institution for at least a decade.

With Senator Bayh, the ABA is pushing for a direct popular election of the president and vice president on the "one man, one vote" principle.

This is a plausible, but risky, alternative to the electoral college. But in last week's appearance before Senator Bayh's Senate constitutional amendments subcommittee, two ABA officials offered arguments that seem to us debatable indeed.

The ABA officials rest their case against the electoral college not on the federalist spirit of the Constitution itself but on the distinctly anti-federalist spirit of recent Supreme Court decisions in reapportionment cases.

"We believe," said President Justin Stanley, "that there is no valid reason why the

^{*}As defined by the Congressional Budget Act—see preceding page.

HUMAN LIFE AMENDMENT

HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. ABDNOR. Mr. Speaker, the Legislature of the State of South Dakota has joined a growing list of jurisdictions calling for a convention to consider a proposed human life amendment to the U.S. Constitution. Passage of the resolution demonstrated a broad base of bipartisan support indicating that in South Dakota there is a very strong belief that abortion is one of our grave national concerns which will have to be faced and resolved in a manner which will provide protection to the real victims of abortion-unborn children.

The resolution originated in the South Dakota House of Representatives where it passed 59 to 10. It passed the South Dakota Senate 34 to 1 and was concurred in by the House with a vote of 51 to 0. The text of the resolution is as follows:

H.J. RES. 503

A joint resolution, making application to the Congress of the United States to call a convention for the purpose of proposing a human life amendment to the Constitution of the United States in accordance with article V of said Constitution.

Whereas, millions of abortions have been performed in the United States since the abortion decision of the Supreme Court of January 22, 1973; and

Whereas, the Congress of the United States has not to date proposed, subject to rati-fication, a human life amendment to the Constitution of the United States; and

Whereas, in the event of such congressional inaction, article V of the Constitution of the United States grants to the states the right to initiate constitutional change by applications from the Legislatures of twothirds of the several states to the Congress, calling for a constitutional convention; and

Whereas, the Congress of the United States is required by the Constitution to call such a convention upon the receipt of applications from the Legislatures of two-thirds of the several states: be it resolved, by the House of Representatives of the State of South Dakota, the Senate concurring there-

That the Legislature of the state of South Dakota does hereby make application to the Congress of the United Staes to call a convention for the sole purpose of proposing an amendment to the Constitution of the United States that would protect the life of all human beings, including unborn children: be it further

Resolved, That this application shall constitute a continuing application for such convention pursuant to article V of the Constitution of the United States until the Legislatures of two-thirds of the states shall have made like applications and such convention shall have been called by the Congress of the United States; be it further

Resolved. That certified copies of this resolution be presented to the President of the Senate of the United States, the Speaker of the House of Representatives of the United States, the Clerk of the House of Representatives of the United States, and to each Member of the Congress from this state attesting the adoption of this joint resolution by the Legislature of the state of South Dakota.

BOEING-VERTOL LIGHT AIRBORNE MULTI-PURPOSE SYSTEMS

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES Monday, April 4, 1977

Mr. EDGAR. Mr. Speaker, the Navy is presently in the process of reviewing bids for a U.S. Navy helicopter called LAMPS, for light airborne multi-purpose systems. One of the proposals under review is by the Boeing-Vertol Co. in my congressional district. At their February meeting, the Aerospace Conference of the United Automobile, Aerospace & Agricultural Implement Workers of America-UAW-approved a resolution supporting the proposal of Boeing-Vertol, in light of the company's record of expertise and achievement. and in light of its recent economic difficulties. Those of us who are concerned about the well-being of Boeing-Vertol and about the need to bring economic recovery to the Delaware County area in which it is located appreciate this gesture by the UAW. I would like to share the UAW resolution with my colleagues, Mr. Speaker. The resolution follows:

BOEING VERTOL LIGHT AIRBORNE MULTIPUR-POSE SYSTEMS

Employment in the Boeing Vertol Company, whose employes are represented by the UAW, has declined from a peak of 15, 400 in 1968 to the present low of 4300. With the long decline in military orders for helicopters and most recently the loss of the Army UTTAS contract, the biggest helicopter award in 20 years, came the precipitous loss of jobs to Vertol workers. Any further losses seriously threaten the job security of remaining Vertol workers.

Over the years Vertol workers have demonstrated great ability in successfully fulfilling many major programs. This was demonstrated in military programs requir-ing superior technology and reliability durthe Korean War and the Vietnam hostilities.

Many of the Vertol workers have spent the majority of their worklife with this company. They now find that in many in-stances their skills are not being fully utilized.

With regard to the thousands who still remain on layoff from Vertol, they are acute-ly aware of the fact they are located in an area that has suffered massive layoffs and plant closings which has produced a 12 percent area unemployment level.

The Department of Defense is presently in the process of reviewing a proposal for a U.S. Navy helicopter called LAMPS (Light Airborne Multi-Purpose Systems).

The Boeing Vertol Company is committed to staying in competition for this \$700 million helicopter contract with the finest design of which it is capable. Sikorsky Aircraft Company, which received the UTTAS award, and the Westland Helicopter Company (located in Yeovil, England) are also being considered. It is expected that a decision on this award will be made within the next few months.

It is imperative to Vertol workers that the Boeing model be selected as the U.S. Navv's helicopter of the future.

The selection of the Boeing Vertol Helicopter would mean jobs and job protection for thousands of Vertol workers. Since Boeing is in a position to dedicate itself to the LAMPS contract exclusively, award of the

concept of one person, one vote should not be applied to the election of the highest offi-cers in our land." Pursuing the same line of argument, Mr. John D. Feerick, who is chairman of the ABA's special committee on elec-tion reform, declared: "To paraphrase an early 1960 decision of the United States Supreme Court, the thrust of political equality from the Declaration of Independence to Lincoln's Gettysburg address, to the 15th, 17th, 24th and 25th Amendments is that of one man one vote." This "thrust," he contended, should be embodied in the way we elect presidents and vice presidents.

Several rather obvious comments are in-

vited by these remarks.

In the first place, legislators, whether state or federal, have a function rather easily distinguishable from that of a president or vice president. Legislators and congressmen are, after all, representatives. A President is more than that. He is an official-the only one, it is sometimes said—with a truly na-tional constituency, and "one man, one vote" is not the only valid principle on which that constituency should rest.

Under the electoral college system, which counts votes by states, it is all but inconceivable that a president could be chosen without the substantial electoral vote of at least two sections of the country or scattered electoral support in all sections. Under the popular vote plan supported by the ABA and Senator Bayh, that need not be true. rolling up heavy popular majorities in a few populous states a president could be elected with only the slightest "national" con-stituency. One's view of whether this would be a desirable change depends, of course, on one's view of the federal system-we recognize that the states are regarded as mere nuisances in some quarters. As we have observed before, the electoral college is neither more nor less defensible than the federal system, of which it is a keystone.

If there is, in Mr. Stanley's words, "no vaild reason" why "the concept of one person, one vote should not be applied" in the election of a president, there is by the same token "no valid reason" why some states should have more representation in the Senate, in proportion to their population, than others. No reason, that is, except for the Constitution and the political values embodied in it.

That brings us to what Mr. Feerick said. Paraphrasing a dictum of Justice William O. Douglas in the Gray v. Sanders reapportion-ment case, he invokes, again, "the thrust of political equality." Of Justice Douglas' original observation, interestingly, the late Alexander Bickel observed that it was "notable for its reference to documents not commonly taken as having legal effect, and to the extralegal significance of provisions that do legal, but circumscribed, strictly application."

The Declaration and the Gettsburg Address were splendid embodiments of basic American political values, but no more valid as guides to constitutional questions or issues of basic institutional practice than any given speech on the Senate floor. Nor do the constitutional amendments cited by Justice Douglas (to which the ABA has now added two more) vitiate the federalist principle.

Thus the ABA attaches overriding priority to one, but only one, of the basic values of the constitutional system—political equality. Other values of great historic importancethe protection of minority views, the rights and prerogatives of the states, geographical balance, the checking and balancing of the popular will by anti-majoritarian institutions like the Supreme Court or the presidential veto-deserve at least equal consideration. Indeed, a powerful rhetorical case can be made against the electoral college by emphasizing one value and ignoring the others. But the case reaches no farther than the rhetoric, and that is not very far.

contract to Vertol would assure the Department of Defense of a second contract with viable competitive helicopter technology

and production capability.

Therefore the Vertol workers are asking the 18th UAW Aerospace Conference to go on record in requesting the Department of Defense to award the LAMPS contract to Boeing Vertol.

> THE COAL CONVERSION INCENTIVES ACT

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES Monday, April 4, 1977

Mr. MURTHA. Mr. Speaker, I will soon introduce the Coal Conversion Incentives Act. This bill is designed to increase domestic use of coal, and reduce U.S. reliance on natural gas and foreign oil.

The bill provides for the following:

First. A first year tax writeoff of 35 percent on expenditures for pollution abatement equipment and construction required to facilitate the use of coal;

Second. Permanent extension of FEA power to mandate powerplant conversion from natural gas and petroleumfired boilers:

Third. Require any new-and to the practicable existing—electric powerplant boilers and major industrial boilers which use fossil fuels to be capable of using coal as their primary fuel;

Fourth. Currently the United States is in an inferior position with other industrialized nations in regard to the investment tax credit. I have included a 1year extension of the 12-percent investment tax credit. In order to further encourage the conversion to coal, my bill provides a 1-year, 20-percent investment tax credit for existing electric powerplants and major industrial installations for the express purpose of investment in coal conversion construction and equipment investment; and

Fifth. Small industries and nonindustries will be offered incentives in the form of low interest rate loans for the purchase and installation of coal fuelfired boilers. This section will apply only to those existing small industries and nonindustrial facilities now using petro-

leum or natural gas.

This Nation lacks a complete energy policy. Two parts of my bill are aimed at promoting that policy. Part 1 requires the President to present by October 15 of each year an annual energy plan. The President would list the available energy supplies for the coming winter; provide evidence from independent Government audits of energy supplies; announce contingency plans for meeting energy shortages during the coming year, and outline Government plans for promoting energy

Part 2 gives the President authority to declare an energy emergency and take the following actions: Reallocate scarce energy resources to those regions most in need; require cutbacks in energy use in industrial facilities; allocate energy resources to seasonal industries; restrict business hours of schools, business, and

government, and temporarily relax Federal clean air standards for use of alternate fuels.

I believe the energy problems facing our Nation will be solved much more by incentives than penalties. This bill is aimed at providing some of those incentives. Any of my colleagues wishing to join me in sponsoring this bill are urged to contact me.

SACCHARIN—A CONSUMER ISSUE

HON. JAMES G. MARTIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES Monday, April 4, 1977

Mr. MARTIN. Mr. Speaker, the response to the Food and Drug Administration's proposal to ban saccharin has been phenomenal. My office has received close to 6,000 letters on the subject. Many who write plead with Congress to stop the ban because of a health problem or because of dietary conditions.

The saccharin controversy clearly presents Congress with the necessity for amending the food additives law which forced the FDA move to ban saccharin. Saccharin is the first clear case where the absolute zero tolerance standard of Federal law requires a substance to be removed from the market, even though its benefits to the general public clearly exceed any remote risk. Saccharin also has the distinction of being slated for a ban based on consideration of less valid evidence when far better evidence-tests on monkeys and public health statistics on human illness as opposed to tests on rats-show that normal use of saccharin poses no risk to the public health.

Yet the law requires that the best medical evidence and any consideration of health and nutritional benefits be dis-

In general, medical, scientific, and nutritional experts recommend a change in the law to allow reasonable judgment of all the evidence of risk as well as the public benefits.

Increasingly, it is recognized that obesity predisposes humans not only to diabetes and heart illness, but also to cancer. Accordingly, whether saccharin is regarded by some as essential and by others as a convenience, there is no question but that it helps millions of American consumers to maintain their dietary discipline. It is thus an important part of the preventive medicine regimen of those who need to control their weight. It is also of similar importance to elderly invalids and those who already have diabetes and heart illness.

This effort to save saccharin as a general purpose—as opposed to a more expensive prescription item-nonnutritive sweetener is not a case of producers versus consumers. Rather, it poses a conflict of consumers versus consumer advocates, at least those consumer advocates who insist upon the zero tolerances in the law. Those who would ban saccharin on the basis of a disregard for its benefits and the best evidence of safety are in the position of preventing FDA from

acting in the best interest of the health and nutrition of many millions of American consumers.

GEORGE BALL TALKS COMMON-SENSE ON MIDDLE EAST

HON. DAVID R. OBEY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. OBEY. Mr. Speaker, nothing makes one so susceptible to being misunderstood as saying anything which indicates that one is trying to deal with reality in the Middle East. We cannot offer constructive assistance in bringing peace to the Middle East if we approach the world like the board of directors of an optimist club. We must face hard realities and help our friends do the same. George Ball has written an important piece which does just that. I am inserting it in the RECORD at this point and I commend it to my colleagues:

[From the Washington Post, Apr. 3, 1977] How To Save Israel in Spite of HERSELF

(By George W. Ball)

Most Americans approach the problems of the Middle East with a pro-Israeli biasand rightly so. The desire of a dispersed people for a homeland cannot help but enlist the sympathy even of those with no Jewish roots; nor can any sensitive man or woman fail to be moved by the countless tales of valor and self-sacrifice in the years both preceding and following the creation of Israel. Set against the grim background of the Holo-caust, the story of Israel is a continuing chronicle of grit and enterprise.

Not only must Americans admire Israel; there can be no doubt that we have an interest in, and special responsibility for, that valiant nation. So the question is no longer whether the United States should contribute to assuring Israel's survival and prosperity, but rather how we Americans can best fulfill our responsibilities to Israel to ourselves and to other nations whose wellbeing could be endangered by further con-

flict

By expending substantial effort and political capital, we can probably overcome the technical impediments to a reconvened Geneva Conference, principally the question of representation for the Palestine Liberation Organization. Thus, by sometime next fall, Arabs and Israelis will presumably sit down around a green baize table or tables.

Yet, unless we are prepared to act more incisively than in the past, that conference will be the prelude to disaster. Neither side has altered its formal positions in any significant way. The Arab nations still demand that Israel withdraw from all territory occupied since the 1967 war, while refusing unequivocal assurances of full recognition of Israel. Israeli leaders, on their part, insist that their security requires the retention of substantial areas of their post-1967 territories.

The critical significance of this stalemate cannot be overemphasized; a breakdown of the conference would set in motion ominous forces, resulting, first of all, in the radicalization of the Arab front-line states. In Egypt, President Sadat has staked his political fu-ture on the belief that the United States holds the key to peace and is prepared to turn it. In Syria, President Assad's policies of moderation will be critically undermined if Geneva fails. And even Saudi Arabia, though currently the most effective force for Arab reasonableness, will, in the event of renewed warfare, be compelled by the dynamics of Arab politics to impose an oil embargo. Indeed, if the Geneva Conference disintegrates, it may even feel forced to use its oil weapon before hostilities begin.

So we dare not regard the projected Geneva Conference as merely another episode in the long-playing Middle East movie serial. If it ends with a whimper, it will be followed by a bang. The leaders of the front-line Arab states will concentrate on building fighting forces to attack Israel as soon as they can approach military parity. Faced with that prospect, the beleaguered Israelis may well jump off first.

However it begins, another Arab-Israeli war will be far more destructive than any in the past. Because both sides now possess surface-to-surface missiles, cities and civilian populations will almost certainly be targets, while the prospect for superpower involvement will be much greater than in earlier conflicts.

Yet, although the relatively impotent governments in the key Arab countries and in Israel can never by themselves devise a compromise solution, the conventional wisdom still rejects any suggestion that the United States should lay out proposed terms of a settlement. Instead—we are told—the parties must be left to find their way by palaver to some common meeting ground near the center of a no-man's land studded with land mines of hatred, religion, vested interests and rigid doctrines of military necessity, in bland disregard of the fact that the conditions essential to an effective negotiation do not exist.

First, there is no unanimous desire for peace on either side. Although weakened by events in Lebanon, the Rejection Front—which totally rejects the concept of Israel's right to exist—remains an influence in Arab politics, while in Israel some politicians still wish to avoid any negotiation in the wistful hope that Israel can hang on permanently to the territories seized in 1967.

Second, neither the Israelis nor their Arab neighbors believe that their side can gain as much as the other side by a major concession. Lacking even a minuscule quantum of mutual trust, each side views its own concessions in the narrow focus of the other's gains.

Third, the governments on both sides are politically too insecure to be able to offer the concessions requisite to a solution.

Finally—and most important—the positions of the parties are so far apart that they can never, by themselves, find their way to a compromise in the context of a total settlement.

For her own security, Israel can accept nothing less than an unequivocal Arab commitment to peace and full recognition, together with adequate safeguards; yet, in view of the primacy of the issue in Arab politics, leaders of the key Arab nations can give no such commitment without the assurance of an Israeli withdrawal from the territories taken in 1967.

WITHDRAWAL FOR RECOGNITION

Thus, to bring about a settlement, the missing preconditions to negotiation must either be provided or rendered unnecessary—and this can be accomplished only by an assertive United States diplomacy. This means that our government must advise the more moderate Arab states—Saudi Arabia, Syria, Egypt and Jordan—that it will use its leverage in the search for peace but not unless those states make clear their acceptance of Israel's sovereignty. At the same time, Israel must be made to understand that a continuance of the present stalemate is more dangerous than the concessions required for peace. Finally, America must play the indispensable role of relieving the political leaders on both sides of the need to make politically unpalatable decisions by enabling

them to yield with cries of outrage under relentless outside pressure.

I am not proposing at all that the United States lay down arbitrary terms of peace. Rather, we must insist that both sides carry out the United Nations Security Council Resolution 242 of 1967, (affirmed in 1973 by Resolution 338), which so far neither side has been willing to do.

To make progress possible, we must translate the principles embodied in that resolution into a comprehensive plan of settlement. That plan should establish as a firm precondition that Israel's neighbors explicitly recognize her as a Jewish sovereign state and that they commit themselves unequivocally to respect freedom of navigation in the waterways of the area for Israeli ships as well as cargoes, permit free movement of peoples and trade and take other specified measures to assure full political, economic and cultural intercourse. They must accept arrangements through leasehold or otherwise to provide Israel control over access to the Gulf of Aqaba by the maintenance of an adequate garrison at Sharm el Sheikh, acthe demilitarization of the Golan Heights and agree to the injection of neutral forces into that area and into other appropriate buffer zones under conditions where they cannot be withdrawn without agreement on both sides. To mitigate Israeli apprehensions of a West Bank Palestinian state, the front-line Arab states should commit themselves to discourage acts of violence terrorism against Israel. Some formal link of Palestine to Jordan, as recently proposed by President Sadat, might go far to assure a responsible government.

The principal powers supporting the proposal—the United States, Great Britain, France and, one may hope, the Soviet Union—would guarantee the inviolability of the boundaries as finally determined. In addition, we should seek agreement with the other guaranteeing powers to limit the flow of arms to both sides.

What chance does the United States have of persuading the Arab leaders to accept such commitments? There is accumulating evidence that Yasser Arafat, and such elements of the PLO as he can control, are moving toward the acceptance of a partitioned Palestine and, as the price for the return of the West Bank, would agree to recognize the sovereignty of Israel within her pre-

Moreover, the current leaders of Saudi Arabia, as well as of Syria and Egypt, desperately need a settlement to escape radicalization and the increase of Soviet influence in the area, as well as the high cost of maintaining Arab military might in an environment of hostility. Since the Saudis will be the principal source of financing for a Palestinian state, they should be able to exercise considerate discipline over whatever regime administers that state and to restrict the development of its military capability.

PRESSING THE ISRAELIS

But if it we are to persuade the Arabs to accept these commitments, we must insist categorically that Israel withdraw from the territories occupied in 1967-subject to the negotiation of minor border rectifications. We must preserve the principle that there be no territorial aggrandizement by as President Eisenhower made clear in 1956. Faced, in the aftermath of the Suez affair, with the Israeli refusal to withdraw from the Sinai territories in defiance of the U.N. Security Council resolution of Feb. 16, 1957, he responded with clarity and promptness. If the Israeli government did not comply, the United States would not merely suspend governmental assistance, but would also eliminate essential tax credits and take other administrative action to restrict the

flow of cash gifts and bond purchases from American private citizens.

That Israel today is far more dependent on United States help than in 1958 is shown by the fact that her gross national product is only slightly larger than her budget. Last year, our public sector aid alone amounted to \$2.34 billion, which means more than \$600 for every man, woman and child in Israel. A similar amount is in view for the current fiscal year, so that our contributions to a country of 3.2 million people will again be a very high percentage of our total foreign aid expenditures. Rarely before have so many done so much for so few. Yet the aid should not be begrudged if it works for the long-range interest of the Israeli people.

Thus, the national decision Americans must make is not whether we should try to "impose" an unpalatable peace on the Israeli people, but, rather, how much longer we should continue to assist Israel to maintain policies that impede progress toward peace, with all the dangers war holds not only for Israel but for the United States and other countries. Put another way, how much longer should we go on subsidizing a stalemate that is manifestly dangerous for all concerned?

The unhappy dilemma of Israel is that, so long as she refuses to relinquish the territorial gains from her 1967 conquest and thus prevents possible progress toward peace, she must continue as a ward of the United States. Already economically overstretched. Israel could not maintain anything like her present level of military capability the continued infusion of something approaching \$2 billion a year from the American treasury, to say nothing of the vast amounts provided by the generosity of the American Jewish community under American laws and regulations that facilitate such contributions. Even with that huge subsidy, it is doubtful she can long continue as a garrison state. With 38 per cent of her GNP committed to defense-equivalent to a U.S. defense budget of \$560 billion-with inflation running at 35 per cent, with the interest rate on bank loans ranging between 25 and 35 per cent, and with very nearly the world's highest tax rates, her economy slowed to an annual real growth rate of only 1 per cent a year in 1975 and 3 per cent last year, while in 1976 her balance of trade deficit amounted to more than \$3 billion.

Beleagured Israel is no longer the land of bright promise it was a few years ago; last year not only did her emigration exceed immigration but, in spite of strenuous efforts to encourage new immigrants, 60 per cent of the Jews permitted to leave the Soviet Union for Israel chose not to go there but moved by way of Vienna to such Western countries as the United States, Canada, and France.

Despite these foreboding developments, however, many still passionately contend that America should not undertake to turn Resolution 242 into a full-fledged plan of settlement, since only the Israelis are competent to decide what they need for their own security and we have no right to interpose our own judgment. Yet that assumes that the Arab-Israeli conflict involves the interests of only the direct participants whereas, if a war with sophisticated weapons should erupt in the Middle East the dangers for America and for world peace and prosperity would be appalling.

Let us suppose that Israel's arms should prevail and an Israeli column were moving on Damascus. Would the Soviet Union once again accept the humiliation involved in the defeat of its clients and again write off expensive armaments it has poured into the area? Or would it feel compelled to drop a paratroop division or two into Syria? In its present mood, would the United States respond by force? Merely posing that question

would tear our country apart—reawakening latent prejudices and creating bitter divisions.

Or, as a possible alternative, assume that Arab arms were triumphant and Israel was in imminent danger of invasion. Would the United States use its military might on Israel's behalf? Imagine the searing debate that issue would provoke! Nor can one ignore the possibility that, threatened with destruction, Israel might use, or at least threaten to use, nuclear weapons.

Even if none of these fearsome developments occurred, war would still mean catastrophic losses for the non-Communist nations. Not only would the dynamics of Arab politics require the oil-producing states to impose another oil embargo, but this time it would almost certainly be more destructive than the last. Nothing could more tragically undermine the solidarity of the West than an embargo applied in a consciously discriminating fashion.

FEARS AND NEEDS

It is hardly surprising that many Israelis believe they believe they cannot, under any circum-stances trust their Arab neighbors, who, as they see it, are committed to Israel's destruction. Thus, one can well understand their fear that a West Bank Palestinian state would menace Israeli security. Yet, that is circular argument. Irredentism for the Palestinians is a compelling abstraction not dissimilar to the Jewish desire for a national home. So long as there is no part of old Palestine which Palestinians can call their own and to which they can, in principle, return, so long, in other words, as they are denied the possibility of building their own nation in that part of old Palestine represented by the West Bank and the Gaza Strip, resentment, terrorism and excessive rhetoric are

Unhappily, Israel's relations with the Arab world are so distorted by history and hardship and the deep emotional commitment of her people to what is, at the same time, both a nation and a spiritual concept as to disable many Israelis and their American supporters from anything approaching objectivity. As a pro-Israeli friend replied when I recently mentioned the apparent inability of the Jerusalem government to face the hard realities of its own situation, "Don't you think they are entitled to their paranoia?"

It was not a flippant comment; instead, it reflected the fatalistic acceptance of a possibly grim evolution of events. When the historic agonies of the Jewish people and their understandable yearning for a national home are viewed against the background of the Holocaust, can one wonder at the fierce tenacity with which they seek to maintain, and to enlarge, their Israeli homeland, and the suspicion with which they regard their Arab neighbors who, they fear, threaten that very concept?

Yet, no matter how much we may sympathize with what my friend calls Israeli "paranoia," how far dare we let it determine American policy? How far, in other words, should we go in continuing to subsidize a policy responsive to Israeli compulsions which does not accord with the best interests—as we see it—either of Israel or the United States, but is a threat to world peace?

The fact we must reluctantly acknowledge is that the national interest of the United States and of Israel cannot, in the nature of things, be precisely congruent; there will necessarily be situations in which our policies must diverge from those of the Israeli government if our country is to be true to itself. Israeli is a power with only regional interests, and the very intensity of her long struggle to survive has produced an excessive preoccupation with her own quite limited range

of concerns—or, in other words, has forced her to view the world in short time spans and

with severely limited horizons.

America's view of the world and her responsibility for world developments are of a wholly different order. We must appraise the evolution of the Arab-Israeli dispute in a world setting, taking account not merely of what certain policies might do for, or to, Israel in the short run, but also of what consequences they might hold for other countries and for the peace and well-being of the world as a whole.

SOVIET SUPPORT?

I have suggested that, prior to the reconvening of the Geneva Conference, we should seek quietly to obtain the agreement of our Western allies, France and Great Britain, as well as of the Soviet Union, to support a carefully developed settlement plan.

Although the Soviets cannot by themselves bring about a solution, they can probably frustrate any settlement. Yet, even though the Kremlin voted for Resolutions 242 and 338 and the proposed plan would merely put flesh on the bare skeleton provided by those resolutions, would the Soviet Union go along with an American proposal to bring peace to the Middle East?

Today there is reason to believe that as an alternative to the maintenance of tension and turbulence—entailing irksome expenditures for arming the Arab countries as well as the danger of a superpower confrontation—the Soviet Union would elect to support—or, at least, not to sabotage—a peace proposal that accorded with Resolution 242, especially if it were given some recognition for its peacekeeping role. This is, at least, a reasonable hypothesis given credence by recent Soviet statements, and, although some may regard it with skepticism, it has not recently been tested.

To be sure, America once tried to make peace by expanding the principles of Resolution 242 in the so-called Rogers Plan. But those proposals could not have been floated at a less auspicious moment. In April 1969, Nasser had launched his War of Attrition; by October, Israel was heavily bombing Egyptian artillery positions, Egyptian casualties had reached high levels, her army's morale had fallen disastrously and over 1 million civilians had been evacuated from the Canal cities. Thus, when Secretary of State William P. Rogers launched his plan, the Israeli government was rapidly escalating the air war, feeling in strong position to impose its will and in no mood to bargain. The Egyptians, on the other hand, were smarting at their deteriorating military position and quite un-willing to negotiate when their power and prestige were at such a low ebb.

That was eight years ago. Today the Arabs have largely regained their self-respect in the light of their military achievements during the early days of the October 1973 war. Developments in Lebanon have reduced the authority of extreme Palestinian elements within the PLO. For the moment, there are responsible leaders in all the key Arab capitals, while Saudi Arabia, the central treasury for Araby, seems determined to press toward peace, although—at least for negotiating purposes—it may try to hold to Sadat's definition of peace as "a state of peace" excluding for this generation diplomatic relations and trade.

But without a settlement, these favorable conditions will not long prevail, for time is not working on the side of either Israel or peace. That the balance of strength will ultimately shift to the Arabs seems almost inevitable, not merely because there are 100 million Arabs opposed to 2.9 million Jewish Israelis, but because Arab financial resources and economic power have immeasurably increased since 1969 and are still expanding. Thus, because of the "logic of numbers,"

as well as the intolerable economic burden of maintaining a garrison state, Israel will absent a settlement, almost certainly lose ground, depsite the fact that, for the moment—but for the moment only—she holds military superiority due to the inflow of sophisticated United States weapons.

"SAVING ISRAEL FROM HERSELF"

Thus, the time is ripe for the United States to take a strong hand to save Israel from herself and, in the process, try to prevent a tragic war that could endanger the economies of the major non-Communist powers, separate the United States from its allies, precipitate a divisive domestic debate and pose a serious danger of a clash with the Soviet Union.

Up to this point, President Carter has not yet fully revealed his Middle East strategy, and the time is probably not yet ripe for him to do so. But he has, by publicly suggesting some of the elements of a final settlement, clearly departed from the more passive line rigorously pursued by the Ford administration. What is now to be hoped is that, as a probable reconvening of the Geneva Conference approaches, he will develop those views into a full-fledged solution that takes into account the security interests and other legitimate claims of both sides, then seek the agreement of the French, British and Russians—those permanent members of the Security Council that originally approved Resolution 242-to unveil the terms of a settlement the major powers would collectively support.

To carry through such an initiative, President Carter must be prepared to overcome formidable political opposition and to act with the same incisiveness President Eisenhower displayed in 1957. That will not be easy, for in the years since then Israeli supporters have greatly increased their political power in Washington.

Yet such a line of action would be responsible leadership by a great nation, while anything less would be highly dangerous.

SOUTH CAROLINIAN ELECTED TRUCKING ASSOCIATION PRESI-DENT

HON. JAMES R. MANN

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. MANN. Mr. Speaker, I am pleased to call to the attention of my colleagues the fact that Mr. Richard L. Few, president of Cooper Motor Lines, Greenville, S.C., was recently elected president of the Common Carrier Conference-Irregular Route. The conference, a major affiliate of the American Trucking Association, represents more than 450 trucking companies throughout the country.

Mr. Few brings to the presidency a broad background of knowledge and experience in the trucking industry, including 22 years of service with Cooper Motor Lines. He is a community leader in the Greenville, S.C. area, where he has given generously of his time and talents to promote worthwhile civic and community endeavors.

The conference has chosen well, and as his Congressman, I am pleased that his abilities and accomplishments have been recognized by his peers in the trucking industry.

NURSES LOSING PATIENCE

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. FRASER. Mr. Speaker, in a recent King Features syndicated column, Marianne Means outlined the recent history of involvement of nurses in national politics. Long accustomed to domination by doctors and other institutional authority, the nurses are beginning to be heard through the American Nurses' Association and its political arm, Nurses' Coalition for Action in Politics—N-CAP. The article which follows relates developments that led to the nurses involvement in last year's election:

THE NURSES ARE AROUND
(By Marianne Means)

There are one million registered nurses and 450,000 licensed practical nurses in this country, and only 380,000 doctors.

The doctors, whose average income is approximately \$48,000 a year, have long been the dominant outside factor shaping government health policy. The nurses, who earn an average of \$9,000 a year, have had the least to say of any group of health professionals about government policy, even though numerically they are the largest such group.

BIGGER DOLLAR LOBBY

The disparity stems not so much from the difference in job prestige and education but from the efforts of the American Medical Association, which is one of the most powerful national lobbying organizations. Common Cause has identified the AMA Political Action Committee as the single largest contributor to congressional campaign funding in 1974 and again in 1976. Of 1183 political committees organized last year to distribute campaign donations, 46 are affiliated with AMA.

The American Nurses Association (ANA), by contrast, has historically been too timid or too naive to get involved in political action. One of the major reasons for this is that nurses are trained to defer to doctors and other institutional authority; they are not accustomed to demanding anything themselves (as witness their salary level).

Therein lies a story. Two years ago, a group of nurses in New York decided they were tired of being taken for granted and appealed to ANA to get busy and raise the political blood pressure of nurses. However, the ANA ignored them, so they set up a rump organization and attempted to go into politics.

When the fledgling unit foundered in legal problems, the ANA, finally aroused, agreed to take over. It created the first nurses' political action committee, with a \$50,000 budget. Val Fleischhacker, a legislative aide for Rep. Don Fraser, D-Minn., became its director and chief of everything, with a total staff of one secretary.

The ANA remained somewhat nervous about the whole idea, but Fleischhacker plunged ahead. In a year the committee raised \$40,000 from nurses in small contributions, mostly below \$200, and made its political donations in the 1976 congressional races. Compared to the AMA and more established political action funds, the nurses are still a tiny factor. But now at least some congressmen and women know they are around.

CANDIDATES GET ELECTED

The nurses group, called N-CAP (Nurses Coalition for Action in Politics) contributed small amounts to 95 candidates. In addition, they endorsed 189 congressional candidates

with a formal letter. More than 90 per cent of those endorsed and more than 80 per cent of those to whom the group contributed were elected.

In addition, Fleischhacker has prodded schools of nursing to include courses on political science for the first time in their curriculum.

What the nurses have finally done is typical of concerned special interest groups across the country. "If nobody knows you're around," Fleischhacker says, "they won't do anything for you."

She knows the nurses are still a day late and a dollar short. The AMA, for instance, is working hard to block a House measure which would allow nurses for the first time to be reimbursed for work done without a doctor's supervision. The odds are the AMA will succeed.

But at least such a bill was introduced for the first time and a hearing was held. As Fleischhacker says, somebody's beginning to realize the nurses are around.

RESOLUTION OF TRIBUTE

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. FORD of Michigan. Mr. Speaker, the "Blue Engels" in my congressional district, one of the Nation's nearly 90 Engelbert Humperdinck fan clubs, have asked me to call the attention of my colleagues to the 10th anniversary year of this outstanding vocalist.

Engelbert Humperdinck, who in December became a permanent resident of the United States, is touring the country this year to mark the 10th anniversary of his first hit record, "Release Me," in

Each of his fan clubs throughout the Nation are working on individual charitable projects in his name. The Blue Engels have made their own personal commitment to the Arthritis Foundation and the Diabetes Association. Other Humperdinck fan clubs have raised money for such causes as muscular dystrophy, cerebral palsy, the Foster Parent Plan, and medical research at St. Jude's Hospital in Memphis.

Three years ago, the Michigan State Senate adopted a Resolution of Tribute to this great singer. I insert its wording at this point in the RECORD, and recommend it to the notice of my colleagues here in the House:

Whereas, The success of Engelbert Humperdinck in the entertainment field is both remarkable and inspirational for he has rapidly ascended to a position where he is regarded by the public and his peers as one of the most talented singers in the record industry; and

Whereas, During the past six years Engelbert Humperdinck has been immensely popular all over the world. After his first hit record, "Release Me," in 1967, Mr. Humperdinck broke numerous box office records as he toured the United States. Such an overwhelming reception to his music gives eloquent testimony to this man's talent and charm; and

Whereas, Born in Madras, India, where his father served as an officer in the British Army, Mr. Humperdinck moved to Leicester, England, when he was ten years old. At an early age, he had ambitions to be a singer; and

Whereas, Engelbert Humperdinck has a loyal following of fans in the United States in whom he inspires a sense of goodwill and kindness, his admirers have worked diligently for numerous worthy causes to eliminate disease and have undertaken the support of a little Korean girl in his name; and Whereas, Engelbert Humperdinck has a

Whereas, Engelbert Humperdinck has a long career yet to fulfill and it is natural to look forward to his future contributions in music and toward international goodwill; now therefore he it.

Resolved by the Senate, That this legislative body pay tribute to the achievements and talents of this remarkable entertainer and to welcome Engelbert Humperdinck back to Michigan; and be it further

Resolved, That a copy of this resolution be presented to Engelbert Humperdinck as an enduring testimony to the high esteem in which he is held by the Michigan Senate and the people of this State.

PROVIDING BETTER HEALTH CARE
FOR OUR VETERANS

HON. STEWART B. McKINNEY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. McKINNEY. Mr. Speaker, we have before us today, four bills which are designed to improve the quality and application of health care for our Nation's veterans. While I plan to support each of these proposals, I would like to explain my endorsement of one measure which I feel is particularly worthwhile and long overdue. The bill to which I refer, H.R. 3695, will increase the funds from which State entitlements are drawn for the construction and renovation of nursing home and domiciliary facilities.

As you know, Mr. Speaker, existing law authorizes financial grants by the Veterans' Administration to States for remodeling existing State hospitals and domiciliary facilities and also for constructing new State nursing homes. The VA is currently attempting to operate both programs under an annual authorization of \$10 million. Unfortunately, the present funding level is inadequate to meet the needs of the many States which have expressed an interest and desire to improve this type of care for their veteran populations.

In Connecticut we are presently engaged in a struggle to clear the way for the construction of a badly needed veterans nursing home in Fairfield County. While many of the obstacles that stand in the way of construction are "in-state" matters, there is no doubt that the additional \$10 million contained in this legislation will ultimately improve Connecticut's chances to obtain the proposed facility.

As in most States, the need for nursing and domiciliary care in Connecticut is increasing at a dramatic rate. Thousands of World War II veterans are approaching the age when nursing care is a necessity. In the not-too-distant future, Mr. Speaker, these ranks will be filled by an even larger number of Korean and

Vietnam-era veterans. Therefore, this Congress has an undeniable responsibility to accomodate the needs of these men who have sacrificed in the defense of this Nation.

I am in complete support of this legislation, Mr. Speaker, and will further endorse an additional increase of such funding should the necessity and opportunity arise.

A DEFENDER OF INSTANT PENSIONS

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Monday, April 4, 1977

Mr. STARK. Mr. Speaker, for several weeks now, a columnist in the San Francisco Bay Area has been doing a series of articles on the SSI program and the ability of aliens to receive benefits under that program. The issue has turned into a running controversy between the columnist, Guy Wright, and the defenders of the program. Mr. Wright has made a number of statements falsely linking the concept of the program to Phil Burton, and which are almost completely false in content but devastating in their impact. The mail that I and other bay area Members have received on this subject has been hateful and vicious toward the alien population of this country. I feel that Mr. Wright has stirred up prejudices toward immigrants the likes of which have not been seen since the days of the "yellow peril."

I would like to place in the RECORD an article written in response to Mr. Wright by Ralph Santiago Abascal, the deputy director of California Rural Legal Assistance. Mr. Abascal deals with the SSI program on a daily basis from the viewpoint of the recipients, whose voices have been lacking from this debate. I think that Mr. Abascal's article speaks for itself in terms of simplicity and accuracy. and I would hope that Mr. Wright pays attention to these words. The article appeared in the San Francisco Examiner on March 27, 1977:

> A DEFENDER OF INSTANT PENSIONS (By Ralph Santiago Abascal)

Within the past month, Guy Wright has written several columns regarding the eligibility of permanent resident (not illegal) aliens for Supplementary Security Income benefits for the aged, blind, and disabled.

He has, in doing so, assaulted Congress, Phil Burton, aliens and, most importantly, the truth. While the rabble-rousing nature of his attacks cannot now be undone, the public is entitled to know the truth.

First, and most important, is the fact that the policy of providing public assistance to poor aged, blind or disabled permanent resident aliens has been a fundamental part of the public policy of California and the United States for decades.

Wright obviously has just learned of the policy. It reflects how poorly he does his research when he calls it a "precedent shattering" policy.

Secondly, Phil Burton did not introduce the bill creating the SSI program. Wilbur Mills did, and he did it, moreover, at the request of President Nixon.

The alien provision was in the original bill which was drafted by the Nixon Administration; it was further expanded by Sen. Edward Gurney, Rep., Fla., on the floor of the Senate to provide for needy Cuban political refugees.

Indeed, a principal class of aliens who benefit from this provision today are those Vietnamese who fied South Vietnam during the closing weeks of our occupation there and the Filipinos who have recently fled from the Marcos dictatorship.

These Filipinos are part of a nation which sacrificed an untold number of its people defending our territory, the Philippine Islands, during World War II. I hope the memory of their courage, and the blood they shed displaying that courage, will endure longer in the pages of history than the hatred gen-erated by Wright's columns.

The most extreme example of Wright's irresponsibility was in his first column where he said: "Some aliens come here just long enough to sign up and then return home for months."

The clear implication of this statement is that the law permits such action. It doesn't. The statute specifically provides that when any SSI recipient leaves the country for at least one full month, payments are to stop immediately, and they are not resumed until the person has returned for at least 30 days.

Either Wright was unaware of this provision and didn't bother to find out, or he was aware and meant that there are dishonest aliens leaving the country and not telling Social Security

In that case, the fault lies with the bureaucracy, not Congress. Certainly, the dishonest recipient is at fault, but that doesn't mean we should destroy the SSI program any more than we should abolish columnists or newspapers just because some do sloppy research.

Any aged, blind or disabled person, alien or citizen, who receives less than \$296 monthly in Social Security, or any other income, and who is not receiving SSI, has good reason to complain. But the complaint should not be aimed at aliens. They are not denying them SSI benefits.

In nearly all cases, denial of benefits to an applicant whose income is less than \$205 is based upon the fact the applicant has assets in excess of the \$1.500 maximum.

SSI is available only to the poorest aged. blind and disabled people, and being "poor as Congress has defined it means having a low income and very few assets.

SSI is available only to the poorest aged, blind and disabled people, and being "poor' as Congress has defined it means having a low income and very few assets.

Such people should have been told by the bureaucracy that they have the option to spend some of their excess resources, get down to the \$1,500 limit, and then apply

Wright should try to rouse the anger of the citizenry against Congress by explaining how the \$1,500 limit, established in 1971, has had its true value depressed from inflation to less than \$1,000, considering the higher value of 1971 dollars.

Now there's some real inequity.

The last point I want to make hits close to home. Wright said in his first article that "aliens collecting those pensions never paid any taxes.'

My mother and father, as aliens during their first 40 years in this country, paid a lot of taxes. After 40 years, they got up their courage to deal with the English literacy requirement that we impose on all aliens before they can become citizens. They succeeded. Is this what, in Wright's mind, makes them worthy?

We're all-except native Americansaliens. Some of us just arrived sooner than others. In fact, those of you who arrived earlier did so under much more lenient immigrant laws.

The very stringent immigration laws that we have today are a result of successful stoking of the fires of paranoia over yellow (or brown or black) peril just like that which we've seen on these pages over the past few weeks.

Let's have an end to it.

Mr. Wright, if you want to help bring about some really necessary changes in the SSI program, we should get together so you can learn what the government is doing to the people rather than what the people are doing to the government.

SALUTE TO NEWARK'S EAST SIDE HIGH SCHOOL HOCKEY TEAM

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES Monday, April 4, 1977

Mr. RODINO. Mr. Speaker, it is with great pride that I wish to bring to the attention of my distinguished colleagues the outstanding achievements of members of the East Side High School hockey team of Newark, N.J. I wish to insert the following article from the front page of the March 26 edition of the Newark Star Ledger in the Congressional RECORD as I believe it excellently illustrates the accomplishments of these fine young men:

HOCKEY TRIP COMES TRUE FOR STUDENTS (By J. Gregory Clemens)

It was a "dream come true," a dream realized after weeks of hard work raising money, making endless phone calls and appealing for contributions from the public.

But they did it.

Newark's East Side High School ice hockey team left for Europe yesterday to compete against four high school teams in Finland and Sweden.

"We found out we had sufficient funds on Monday, and we were committed to go," said coach Stephen Leonardis, before the teenage athletes departed for the long-awaited flight to the foreign countries.

The coach said the team needed approximately \$20,000 to make the trip, \$11,000 of which was raised through a fund-raising campaign. The remaining portion was supplied by the parents of the athletes.

'I feel it's an experience, and a thrill these players will never have again," Leonardis said. I see it as an academic, cultural and athletic trip. It holds great value in all of these areas."

Speaking in the middle of an array of suitcases, bags and hockey sticks at the team's headquarters in Newark, the team official explained that the 17 ice hockey players will play four of the best high school teams in the respective countries.

"Our first stop will be Helsinki (Finland), where we'll play the number one team there (tomorrow) and Monday we'll play the eighth-ranked team," he said.

An overnight cruise from Helsinki will take the hockey players to Stockholm, Sweden, where they'll compete Wednesday and Thursday against the third- and 14th-ranked teams there, he added.

"I think we'll be competition for those teams and hold our own. We should come back with a split at least. And I'm sure we'll win one out of the two games in Fin-land," said the coach.

He characterized his squad as "one that is above-average, has good skating, lots of scoring power and, most of all, a lot of pride."

The East Side hockey team was invited to play abroad by the Finnish and Swedish high schools, and Finnair Airlines, an international competition sponsor, after the squad finished its season with a 15-6 record.

Center Luke Bearfield, 17, who was named this year's most valuable player in Division B, of the New Jersey Scholastic Hockey League, said, "We expect to come out pretty even. I hope to learn a great deal about how they play and vice versa.

Our attitude and desire for the game will

help us win," he added.

Senior team member Sal Bidot, 17, said, This is a once-in-a-lifetime chance. I think it'll be a heck of an experience."

Sophomore and left wing Bobby Kurdes, 15, agreed. "I'm really excited about the trip. and I hope we win the games. The other (European) teams will be pretty good. Hockey over there is like football over here."

Upon their return to New Jersey on April 2, the team will be the guests of a welcome home party in their honor by East Ward Councilman Henry Martinez.

Mr. Speaker, I would like to highly commend the East Side High School hockey team and wish them great success in their overseas tournaments.

HAL W. SHEAN RETIREMENT DINNER.

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. PATTERSON of California. Mr. Speaker, the California Conference of Machinists will honor grand lodge representative, Hal W. Shean, on Friday, April 15, 1977, in Sacramento, Calif. Mr. Shean, a 37-year member of the IAM and AW will be retiring in August of this year, and I would like to take this opportunity to commend his service to the IAM and AW and to bring some of his accomplishments to the attention of my colleagues.

His many friends who will be honoring him at his retirement dinner recognize not only the contribution that Hal has made to the California Conference of Machinists but also his national leadership on behalf of his fellow union members. Hal Shean is presently a member of the Labor Committee of the National Safety Conference, and has served as the chairman of the National Council of Aircraft Unions. He is currently assigned as the international representative in charge of safety legislation, health-apprenticeship, and new tech-nology programs in California, Arizona, New Mexico, Nevada, and Hawaii.

Before becoming grand lodge representative, Hal served as president of lodge 727-I in Burbank and was educational director for the southwest territory. He was the national contract coordinator for General Dynamics, Douglas, Lockheed Aircraft, and others and served as chairman of the Aerospace and Electronics Committee of the California Conference of Machinists. Hal and his lovely wife Madeline have three sons, Fred, Bill, and Chris, and five grand-

I invite my distinguished colleagues to join me in congratulating Hal W. Shean on his admirable and productive career. and to wish him success in his retirement activities. His work and dedication have left their impact on the California Conference of Machinists and his contributions to the labor movement will be long remembered.

IS THERE A SAFE ALTERNATIVE TO SACCHARIN?

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. WHITEHURST. Mr. Speaker, within the past few days two particularly interesting articles on the saccharin question have appeared in national publications. The first, entitled "Hunting a Safe Sweetener," comes from the April 4. 1977, issue of Newsweek, and the second, describing the "Incredible Replacement for Saccharin," was in the April 5 edition of the National Enquirer.

I have asked the FDA for a full report on this information, especially with regard to the grapefruit-peel extract, since the whole problem of finding a sugar substitute can be solved if this substance is indeed proven to be completely safe. Pending FDA action on this, I hope that the House will continue to consider legislation to permit the FDA to use a modicum of common sense in applying the Delaney amendment, by giving that agency the kind of leeway that my bill, H.R. 4994, provides.

I am pleased to share these two articles with my colleagues:

HUNTING A SAFE SWEETENER

Few government actions have soured the American people quite as much as the decision to ban saccharin. Congress has been deluged with mail. The Food and Drug Administration, which imposed the ban, has received more phone calls than on any other issue in its history. Amid the bitter reaction, scientists have stepped up research on a new sugar substitute.

Last week, the tangled issue was tossed in the lap of Congress. Testifying before a House subcommittee, manufacturers, legislators and physicians wrangled over the true significance of the Canadian studies responsible for the ban. Fed huge amounts of saccharina standard procedure for such experimentsthirteen out of 200 rats developed bladder cancer. Under the 1958 Delaney clause, no substance known to induce cancer in man or animals can be used as a food additive. The ban takes effect in about three months' time.

Chunky Rep. Barbara Mikulski, a Maryland Democrat who claimed to have lost 47 pounds on a diet supplemented by lowcalorie sodas, ridiculed the huge dose of sac-charin given to the rats—equivalent to human consumption of 800 cans of diet soda per day for a lifetime. "People would die of gas before they would die of cancer," she gibed. One manufacturer of an artificial sweetener called the ban "ludicrous." According to Robert Kellen, a lobbyist for diet prod-ucts, the ban would leave 10 million diabetics without a sugar-free sweetener.

Diabetics aren't the only patients who use saccharin. C. Joseph Stetler of the Pharma-ceutical Manufacturers Association pointed out that 619 separate medications, ranging from antibiotics to antacids, now contain the sweetener. And some, he said, could not be

reformulated with sugar since it serves as a natural incubator for bacteria.

OTTESTIONS

Perhaps the most objective testimony came from a panel of five physicians. They doubted neither the validity of the Canadian experi-ments nor the FDA's contention that their results could be projected into four cases of bladder cancer among every 10,000 Americans who drink just one 12-ounce can of diet soda per day. But they did question whether the risks of the sweetener really outweigh its medical benefits. "The potential of dying from obesity and its complications is as serious as the potential of dying from bladder cancer that may be caused by the use of saccharin," said Dr. Kurt J. Isselbacher of the Harvard Medical School. "Actually, cancer of the bladder is one of the more treat-able kinds of cancer."

The doctors' prescriptions for dealing with saccharin ranged from restricting its sale to diabetics and overweight patients to allowing it on the open market with a warning label, like that on cigarette packages. The physicians also proposed that a federally funded panel of experts analyze all data on saccharin's safety. The testimony did little to remove the confusion surrounding the subject. And with no more hearings scheduled, it was unlikely that Congress would resolve the controversy before the ban takes

effect this summer.

SEARCHES

One compelling reason why Congress eventually might make the ban less than absolute is the fact that new sweeteners are hard to find. Most sugar substitutes, including saccharin, have been discovered by accident, because experts know too little about the mechanism of taste. "The chemical struc-tures of all known sweetening agents are so diverse that it's almost impossible to predict that a chemical structure is going to produce sweetness," says Edward M. Acton, chemist at Stanford Research Institute. Acton himself has worked on SRI oxime V,

which is synthesized from petrochemicals and is 450 times as sweet as sugar. But testing and development of the clean-tasting, no-calorie compound could take up to ten years. Scientists at the Dynapol Co. in Palo Alto, Calif., are looking even further into the future. They hope to develop nonabsorbable sweeteners that pass completely unaltered through the body, leaving behind nothing more than a sweet message on the

tongue.

Some new sugar substitutes have already undergone intermittent public taste testing. Five years ago, the Miralin Co. introduced a derivative of a West African berry that, when consumed before a meal, gave sour foods a sweet taste. But the FDA, rejecting the company's plea that it was not strictly a food additive, forced the Miralin compound off the market. Abbott Laboratories is now running a high-pressure campaign for the reinstatement of cyclamates, which were banned in 1969. Abbott's argument: the cyclamates that produced cancers in laboratory rats were tainted with saccharin. Yet another product is xylitol. Extracted from birch trees, it is sold in some European countries as a sweetener for diabetics. Its appeal is limited, however, because it contains just as many calories as natural sugar.

Even the two most promising alternatives

to saccharin are more than a year from commercial production, largely because of the work involved in confirming their absolute safety. One of these, aspartame, is a compound of two substances found naturally in many foods; it tastes exactly like sugar, is 180 times sweeter and leaves no aftertaste. The other compound, known as Neo-DHC, is, ironically, derived from naringin, the main bitter component of citrus-fruit rinds. Neo-DHC can be produced most easily from grapefruit and Seville oranges.

RESOLUTION

Aspartame was actually cleared for marketing in 1974, but was withdrawn when a scientist objected that the compound could produce brain lesions. Moreover, questions were raised about the accuracy of the testing procedures used by G. D. Searle & Co., which developed aspartame. Those problems now seem likely to be resolved-but not for at least eighteen months. Animal studies suggest that Neo-DHC, which was developed by Robert Horowitz and Bruno Gentili of the Department of Agriculture, is extraordinarily safe. Two companies are preparing to petition for its use in toothpaste, mouthwash and chewing gum. Its major disadvantage is a strong aftertaste, which makes it hard to use in diet drinks.

One major reason saccharin can't be re-placed sooner is simply commercial. It costs millions of dollars to develop a new product, and the relative safety of the substitute is not established until the final testing phase. It's an expensive—and long-term—investment gamble. Thus, unless Congress unexpectedly agrees to alter the Delaney clause, dieters and diabetics are likely to face a prolonged period of life without sweetness.

LEADING GOVT. RESEARCHERS AND INDUSTRY EXPERTS REVEAL INCREDIBLE REPLACEMENT FOR SACCHARIN IS READY—It's 1,000 TIMES SWEETER THAN SUGAR AND COMPLETELY CAL-

(By Maury M. Breecher and Ron Caylor)

An amazing sweetener-one thousand times sweeter than sugar yet totally free of calories—has passed rigid government tests and could soon replace the controversial saccharin.

Top researchers and industry experts have revealed to the Enquirer that this sugar substitute could reach the market as early as this summer when the Food and Drug Administration plans to begin its ban on saccharin—an action that will affect millions of diabetics and consumers of diet food, low calorie soft drinks, and certain brands of gum.

"This new sweetener is the answer to the ban on saccharin," declared Dr. Arthur Morgan, director of the U.S. Department of Agriculture's Western Regional Research Center which has been testing the sugar substitute. "It could be used in all foods, drinks and other products which today are sweetened

by saccharin."

The USDA has "encouraged and supported research into this sweetener because it is a very promising substance," said Dr. Michael Pallansch, assistant administrator of the USDA's Agricultural Research Service in Washington, D.C.

"It's sweet and non-caloric and has been shown to be safe in animal tests. Its sweet-ening agent lingers in the mouth, making it ideal for products like diet drinks and sugar-

free chewing gum."

Added FDA biochemist Dr. Jacqueline Verrett: "This could be an ideal alternative to saccharin. I know of nothing that has no calories and is as sweet as this. The quickest it could possibly receive FDA approval and be on the market is three months."

The incredible sweetener, known as neohesperidin dihydrochalcone, ironically, is derived from a bitter compound in grapefruit peels. The bitter compound, naringin, is then chemically modified until it becomes an incredibly sweet white powder.

Dr. Robert Horowitz, a research chemist, at the USDA's Fruit and Vegetable Chemistry Laboratory, discovered the sweetener in 1961. "But in those years there was no great urgency for a new sugar substitute," he said.

There is nothing bitter in its taste. As far as we know, it doesn't cause cancer, it's a naturally derived substance and it is noncaloric. And it's 1,000 times sweeter than sugar." Dr. Arthur Morgan said all experiments precisely followed the guidelines laid down by the FDA.

"We used the substance on animals for more than seven years and there was never any hint of cancer or any other disease as a result of their consumption of the sweetener. Nor was there any evidence of a sweetener-related disease in their offspring."

The research, funded by the USDA, has been completed and the results have been sent to the FDA, said Dr. Morgan. "I see no reason why the FDA should not approve this substance for use by the public as an alternate to saccharin." Many manufacturers of diet soft drinks are banking on FDA approval to switch from saccharin to the new substance.

"My company is very interested in this grapefruit peel extract—it's a wonderful thing," said David Kirsch, president of No-Cal Corp., makers of 17 flavors of sugar-free drinks under the No-Cal label. "We're very interested in placing orders with manufac-turers of this sweetener. All we are waiting for is FDA approval."

Said J. Robert Bedell, director of marketing for Canada Dry Corp.: "The grapefruit extract is a definite possibility for Canada Dry. Each soft drink firm is testing it to see how

it works with their product."

Industry sources told The Enquirer that among those companies that have tested it are the makers of Sugar Free 7-Up, Tab, Diet Fresca, Sugar Free Mr. Pibb and Sugar Free Sprite.

The New Jersey-based Research Organic/ Inorganic Chemicals Corp. has been manufacturing the sweetener for experimental purposes under the trade name Sukor for seven years said Dr. Paul Pratter, the firm's technical director.

"It has been sold to hundreds of food and beverage producers for testing in their products," he said. "But until the FDA gives permission, these companies can't sell the products containing the new substance to the general public.

"It is so sweet that one teaspoon is equal

to 70 pounds of cane sugar."

The firm says it has petitioned the FDA to allow the sweetener on the market. Richard Ronk, director of the Division of Food and Color Additives at the FDA, told The Enquirer a meeting has been arranged between the FDA and the firm for April 5 to discuss research data and possible applications for the sweetener

"We are ready to go commercial," said the firm's president, Marianne Pratter. "We are in contact with Coca-Cole, 7 UP, Canada Dry and other companies. It can be used in soft drinks and in any other item that now uses saccharin."

If the saccharin ban goes through and the grapefruit peel-derived sweetener is not approved, the one-calorie diet drink will approved, the one-calorie diet drink will vanish from the grocery shelves, warn industry experts.

"Diet Pepsi and similar drinks will be a thing of the past," said Paul Rogers, president of Amurol Products, Co., producers of sugar-free and low calorie foods.

Instead of one-calorie drinks, people will be consuming low calorie drinks that will contain about 70 calories as opposed to 140 calories for a normal cola drink." (In order to qualify as a low calorie drink it must have 50 percent or less calories than its sugared counterpart.)

"The ban will affect at least 21 million Americans who buy saccharin-sweetened drinks," said Bob Lederer, managing editor of Beverage World. "A percentage are diabetics but the majority are weight watchers."

According to the American Diabetes Assn., the removal of saccharin could seriously affect many of the 10 million diabetics who are unable to do without a sugar substitute.

IF FDA CARRIES OUT ITS BAN: THESE PRODUCTS WILL NO LONGER BE ABLE TO CONTAIN SACCHARIN

Saccharin is found in a wide array of products from diet soft drinks to chewing gum. Among the products that will no longer to be able to contain the artificial sweetener if the FDA carries out its ban are:

DRINKS

Diet Pepsi. Sugar Free Dr. Pepper. TAB. Low Sugar Hawaiian Punch. Canada Dry Sugar Free Ginger Ale. Diet Rite Ginger Ale. Diet Rite Cola. Sugar Free Sprite. Sugar Free Mr. PiBB. No-Cal beverages. Gatorade. Schweppes Diet beverages. Sugar Free 7 UP. Sugar Free Diet Vernor's One Calories beverage.

Low Calorie Welchade Grape Drink. Welch's Sugar Free Sparkling Grape Soda. Lipton Iced Tea Mix, low calorie. Tetley Sugar-Free Iced Tea. Nestea Low Calories ice tea mix.

Alba 66 hot cocoa mix. Alba 77 Fit 'N Frosty low fat drink mix. Knox Grapefruit Drinking Gelatine.

SWEETENERS

Necta Sweet. Pearson Sakrin. Sweet 10* no-calorie. Sucaryl. Sugar Twin sugar replacement. Sweeta. Sweet 'n Low. Superose dietetic. Sweet Thing. Crystallose. Saccharin.

DESSERTS

Smucker's Artifically Sweetened Strawberry Jam.

Smucker's Artificially Sweetened Grape Jelly.

Diet Delight jams and jellies.

Dia-mel Diet Control Brand jellies, jams, preserves and marmalade.

Tasti-Diet Pancake and Waffle Topping. D-Zerta low calorie gelatin.

D-Zerta low calorie pudding and pie filling. D-Zerta low calorie whipped topping. Featherweight Gelatin Desserts and Pud-

GUM, COOKIES

CareFree sugarless gum. Blammo Bubble gum. Trident Sugarless Gum. Amurol Sugarless Gum. Amurol Sugarless Mints. Amurol Dietetic Wafer Bars. Harvey's sugarless gum.

O'BRIEN'S COMMONSENSE

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES Monday, April 4, 1977

Mr. MICHEL. Mr. Speaker, all of the controversy surrounding the proposed ban on the artificial sweetener, saccharin, has brought about a new awareness of the fact that regulatory agencies frequently sing sour notes when regulating our daily lives because they are basing their actions on the directives they receive from Congress. One of my colleagues from Illinois, Mr. O'BRIEN, along with others in this Chamber has focused new attention on this phenomenon. In Mr. O'BRIEN's district, the Kankakee Daily Journal brought the wisdom of this thinking to the attention of the public in a March 24, 1977, editorial comment entitled "O'Brien's Common Sense." At this point I would like to insert this commentary in the RECORD:

O'BRIEN'S COMMON SENSE

Rather than emulate his less sensible colleagues by mounting a nonsensical attack on the Food and Drug Administration for its proposed ban on the artificial sweetener, saccharin, U.S. Rep. George O'Brien, R-Joliet, has recognized the source of the problem--and based legislation on that fact.

In 1958, Congress approved the so-called Delaney Amendment, which mandates that the FDA ban any food additive found to cause cancer in either humans or animals. The FDA is given no options.

Tests in Canada produced evidence that saccharin causes bladder cancer in rats, hence the FDA action to ban the substance. But the human equivalent of the dosage given the rats in the Canadian tests would require the consumption of \$73,000 in diet soda a year over a 40-year period, after -as a whimsical O'Brien put it to The Journal-"8.5 times in 100, you would get a cancer on your bladder, if your bladder resembles that of a Canadian rat.

O'Brien wants to modify the Delaney Amendment, which has its good points, to give the FDA the missing latitude it needs to set reasonable standards for additives, rather than being forced to require zero tolerance.

LEGISLATIVE LEADERSHIP VERSUS COMMON CAUSE

HON. ROBERT L. F. SIKES

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES Monday, April 4, 1977

Mr. SIKES. Mr. Speaker, "Washington Report," the column by Lawrence Francis, contains this interesting comment subheading "COMMON under the CAUSE." I submit it for reprinting in the RECORD. The contents are not news to most of the Congress, but it confirms common suspicions about the policies of this organization.

COMMON CAUSE

Headed by John Gardner, a self-styled reformer who held high office under President Lyndon Johnson. Common Cause is a national organization with state and local units. It is one of the more effective grass-roots lobbies because of its articulate, active and committed membership. The group has been in the forefront of those working on behalf of reform in government. Some of its early efforts were laudable.

Though still stating the same lofty goals and high principles, some of the current objectives of Common Cause have become very controversial. Reform, it seems, is like beauty, being in the eye of the beholder and not necessarily universally agreed upon.

The so-called reforms currently advocated by Common Cause can profoundly affect the ability of other legitimate interests to fairly take part in the governmental processes. The highly perceptive strategists and lobbyists within Common Cause and a few other organizations seek to make profound changes in the rules of the legislative and political game-changes at the expense of other legitimate interests also having the right to be heard.

The reformers have sought to capitalize on the considerable hostility and distrust of government generated during the Vietnam and Watergate eras. Most of us want government to be more open and responsive. One of the favorite tactics used by these groups, however, is public attacks on their opposition. Those who may honestly disagree with Common Cause are branded as anti-democratic, against good government, reactionary or trying to cover up.

Our later examination of the federal lobby reform measures advocated by Common Cause should send shivers down the spines of all Americans, especially gun owners and

Mr. Francis' column was printed in the April issue of Guns & Ammo.

HOLY FAMILY COLLEGE, PHILADEL-PHIA, PA., TO DEDICATE NEW NURSING EDUCATION BUILDING APRIL 15, 1977

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. EILBERG. Mr. Speaker, on April 15, 1977, His Eminence John Cardinal Krol of Philadelphia will dedicate the new nursing education building at Holy Family College in the Torresdale section of Philadelphia.

In connection with this event, the Northeast Philadelphia Chamber of Commerce published an excellent article on this new facility in the March issue of the Northeast Business Monthly. I am pleased to join in paying tribute to those who made this new structure possible, and I would like to insert into the Con-GRESSIONAL RECORD at this point the full text of the article:

HOLY FAMILY COLLEGE, PHILADELPHIA, PA.,
TO DEDICATE NEW NURSING EDUCATION BUILDING APRIL 15, 1977

At one time it was possible to stand at what today is Frankford and Grant Avenues and see the broad Delaware River flowing by on its way to the sea. You would be standing on the top of a gentle slope and not only would you see the river but you could watch river traffic as well.

Shortly, students at Holy Family College who are participating in a degree program in nursing will be able to recapture this view of the river from the top floor of the new Nursing Education Building which is nearing completion at the corner of Grant and Frankford Avenues in the Torresdale section of Philadelphia. His Eminence John Cardinal Krol, Archbishop of Philadelphia, will dedicate this new facility on Friday, April 15,

Groundbreaking for this structure occur-red on November 21, 1975. Harmonizing with the pleasantly landscaped campus, the building has been oriented to the interior of the grounds. At the same time this four-story structure with an area of 29,312 square feet presents its modern brick wall to Frankford Avenue, blending with the College's front

The completion of building represents an important stage in the development of the Nursing Education Program that began in 1971. Following ever-increasing evidence both of student and public interest in the growing need for qualified personnel in health care occupations, a program in nursing was developed. The State Board of Nurse Examiners authorized Holy Family College to admit students into the program in September 1971. Full approval was given by the Pennsylvania Board of Nurse Examiners in July of 1974. The first graduates received their degrees in May 1973. The National League for Nursing granted full accreditation status to the baccalaureate degree program at Holy Family College in December

NURSING IS APPLICANTS' CHOICE

Since its introduction the nursing program has generated considerable interest in the community at large. Nursing is now selected by more applicants to the College than any other field. Doubtless the availability of late afternoon, evening and summer sessions has been an important factor. Registered Nurses find the time convenient to continue their education.

COLLEGE FOUNDED IN 1954

Now in its twenty-third year of operation, Holy Family College is an independent, fully accredited liberal arts college, founded in 1954 by Sisters of the Holy Family of Nazareth. The College is dedicated to preserving the historical character and traditions of the Catholic liberal arts college. This entails the development of graduates enriched by a sound cross-disciplinary foundation, having a major strength in one academic area and an abiding awareness of the spiritual dimensions of their existence.

Or, to put this in another focus, Sister Mary Lillian, CSFN, President of Holy Family College, observed: "Students in this program are able to draw upon professional theories and practices which are based upon Christian principles and enriched by the liberal Sister Lillian went on to say, "Our institutional philosophy has always been 'family-centered' and the preparation of the competent and compassionate nurse practitioner is but a further development of this philosophy. In our view, the program responds to a basic need of the human family."

DEGREES IN OTHER AREAS

In addition to a B.S.N. in Nursing the College awards B.A. and B.S. Degrees. Areas of concentration are: art, biology, business administration, chemistry, child care, economics, elementary education, English, French, history-social studies, mathematics, medical technology, nursing, psychology, sociology and Spanish. Special programs are available in: early childhood education, librarianship, secondary education, special education, teacher certification and premedical and pre-legal studies.

With a student body numbering about 1,000 and a student-faculty ratio of 12 to 1, the College offers a unique educational opportunity at a location of great convenience

to many.

ONLY 4-YEAR CO-ED COLLEGE IN N.E.

Being the only four-year, co-educational college in the northeast section of Philadelphia, the enrollment is derived chiefly from the expanding communities of the Delaware Valley. This same area has an exceptional number of laboratories, hospitals and other health care facilities with a continuing need

for the qualified professional.

Students enrolled in the nursing program, conspicuous by their nursing hats and green and white uniforms, as part of the academic sequence receive their clinical experiences from a number of community agencies. Major agencies currently providing this experience include: Nazareth, Jeanes, Parkview, Holy Redeemer and Friends Hospitals, Holy Redeemer Visiting Nurse Agency, Blessed John Neumann Nursing Home, Eastern State School and Hospital, Shriners Hospital for Crippled Children, and Philadelphia State Hospital.

In every instance, the host agencies have commended the college's nursing candidates for the quality of their technical preparation as well as their personal enthusiasm.

Mrs. Alice Phillips, Chairperson of the Department of Nursing, states: "The faculty and students of the Department of Nursing seem to generate an aura of purposeful accomplishment and professionalism which is immediately apparent. It is an essence that impresses their peer groups on campus as the community agencies with which they interact."

\$2,000,000 BUILDING

The new nursing building is neither elaborate nor extravagant. The total construction cost is approximately \$2,000,000. A Federal Grant of \$1,182,610 received from the Department of Health, Education, and Welfare leaves the College with a financial responsibility of almost a million dollars. For a nonprofit institution, this is a major responsibility. A community that takes pride in Holy Family College will want to share in

helping underwrite the balance. The Trustees of Holy Family College are dedicated to raising the necessary funds and confident that their decision to construct the new building is sound. The growth of the nursing program is greater than ever anticipated. Yet, to date, classes for students in virtually all programs have been held in a single academic building, Holy Family Hall. The need for additional office, classroom and

laboratory space is critical.

EDUCATIONAL CENTER FOR COMMUNITY

While Holy Family is a church-related institution it benefits the entire community. It educates not only nurses qualified by their Bachelor of Nursing Degree to act in a supervisory capacity in a nursing situation, but to assist the physician by performing para-

medical procedures.

The College is a center of continuing education for adults seeking their first college degree and adults returning to the classroom for additional professional education. The College also has a well-developed evening program which attracts housewives and secretaries and others in the general commuis, in short, an educational center for Northeast Philadelphia and surrounding suburbs. It has earned the support it has from Philadelphians, both Catholic and non-Catholic alike.

CHAMBER BOARD MEMBERS SERVE COLLEGE

Several members of the Board of the Northeast Philadelphia Chamber of Commerce serve on the Board of Advisers of Holy Family College. Francis S. Gregory, member of the Chamber Board, is a member of the Board of Trustees of the College. Robert J. McNuity, Sr., former President and Chairman of the Board of the N.E. Chamber, is Chairman of the College's Board of Advisers. Among the Directors of the Chamber serving on Holy Family's Board of Advisers are: Anthony Mazur and Raymond E. Mullen, Jr. Former member of the Chamber Board Salvatore S. Calderaro, President of Kingsbury, Inc., also serves as a Board Member of Holy Family College Advisers.

MR. VLADIMIR J. SZAREK

HON, HERBERT E. HARRIS II

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES Monday, April 4, 1977

Mr. HARRIS. Mr. Speaker, it was with deep regret that I learned of the recent death of Mr. Vladimir J. Szarek, a distinguished public servant. A naval aviator during World War II and a resident of Springfield, Va., Mr. Szarek began his public service career in 1952 as a member of the staff of the Counsel to the Comptroller of the Navy. In 1973, he was appointed Counsel to the Comptroller of the Navy and was serving in that position at the time of his death. Over the years, his selfless dedication to the Navy earned him the respect and admiration of all of those who came across his path. His superior performance and the high standards of professional excellence which he set reflect credit not only on himself and the Department of the Navy. but they also serve as a beacon to those who have chosen Government service as

At a time when we are striving to revive public confidence in our Government institutions and renew the desire of our citizens to enter the public service. I think it appropriate to pay public tribute to his accomplishments, in the trust that they will set an example for those who follow in his footsteps. The following summary of Mr. Szarek's accomplishments has been extracted from the documentation accompanying the Navy's Distinguished Civilian Service Award which was presented to him in January of this year:

Mr. Szarek served in the Office of Counsel to the Comptroller since 1952 and was appointed Counsel to the Comptroller in the Navy in October 1973 in recognition of his exceptional capabilities and distinguished service to the Department of the Navy. In this position, he expertly and diligently applied his extensive professional knowledge to provide superior and invaluable judgments on complex accounting, budgeting and fiscal matters. The professionalism which Mr. Szarek displayed provided executive leadership, and a profound influence on operational and special interest programs of the Navy Secretariat, the Chief of Naval Operations and the Commandant of the Marine Corps. He earned the highest respect of top officials, his colleagues and subordinates.

As Counsel to the Comptroller of the Navy, the demands of the position go beyond the interpretation of laws and regulations. Frequently, Mr. Szarek was called upon to provide counsel covering the gamut of organizational structures, contractual matters as well as legislative and executive department relationships. He was extraordinarily successful in providing the perceptive legal and managerial guidance that assisted Department of the Navy top management in addressing the highly intricate and crucial problems which have confronted the Department on a nearly continual basis. His analytical approach and concise logic resulted in many effective solutions. Without reservation, Mr. Szarek's sage guidance undoubtedly proscribed possible management problems across many spectrums and assisted in the avoidance of fiscal pitfalls.

Mr. Szarek was directly involved in the development of voluminous amounts of legal material in support of the Department the Navy budgets before the Congress. He personally appeared before Congress to insure the Navy's position was succinct and legally precise. In addition to the foregoing, Mr. Szarek was frequently called upon within the Navy to actively participate in solutions to prevailing contractual problems. His general perspicacity on fiscal matters transcended all boundaries of accounting, auditing or budgeting. His depth of knowledge proved most valuable through the years when difficult situations were encountered. During these especially demanding and austere times, his insight and counsel were

instrumental in providing a solid structure for the Department of the Navy Budget re-

Oftentimes, determinations on uses of appropriated funds affect agencies and governments other than the U.S. Navy. Mr. Szarek consistently displayed the ability to balance the qualities of diplomacy and forthrightness in dealing with representatives of other agencies and governments in a manner which consistently and tactfully upheld the best interests of the Department of the Navy and the U.S. Government. A recent example of such qualities arose with respect to the clearing of the Suez Canal. By his diligent and astute efforts, Mr. Szarek assured that in this complex operation, Navy funding was in concert with the directives and regulations, and intent of the Congress.

As the Navy's legal expert in contract financing, Mr. Szarek brought his energy and talents to the myriad of financial problems facing the Navy. He furnished legal, financing and accounting advice at all levels in contract financing matters which are of continuing concern to the Navy and the Congress. Additionally, his outstanding skills in this area have been recognized by many Government organizations. Agencies outside DOD frequently request legal advice; for example, the Justice Department recently requested that Mr. Szarek present the closing arguments on behalf of the United States after a lengthy bankruptcy hearing; the case, in significant part, turned on the question of title to inventory under a Government contract. The Government prevailed, due in large part to Mr. Szarek's astute efforts.

Mr. Szarek's authoritative knowledge of all aspects of financial management, comptrollership, and fiscal law have been recognized by various professional associations and universities seeking lecturers. He has been appointed honorary faculty member of the U.S. Army Logistic Management Center,

Fort Lee, Virginia.

Through crisis situations and extra work, and in spite of multitudinous demands, Mr. Szarek remained devoted to his responsibilities and focused his energies on contributing to Navy fiscal objectives. His superior performance, outstanding judgment, absolute integrity and pervasive professionalism are unexcelled and have had a profound impact on improving financial management within the Department of the Navy. Mr. Szarek's peerless performance has brought great credit upon himself, the Department of the Navy and on the Government Service.

THE NEED FOR FULL FUSION POWER FUNDING

HON. MATTHEW J. RINALDO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. RINALDO. Mr. Speaker, on March 30 I urged Mr. FLOWERS, chairman of the Subcommittee on Nuclear and Fossil Fuels of the Committee on Science and Technology, to support an increase in the fiscal 1978 authorization for fusion power research. In my letter to Mr. Flowers, I was joined by 18 other Members of Congress.

A similar letter, cosigned by myself and 10 other Members of Congress, has been sent by Mr. PURSELL to Mr. GIAIMO, chairman of the Committee on the Budget. The text of this letter will appear in the April 5 RECORD.

Mr. Speaker, these two letters are a

response to President Carter's cut of \$80 million in the fiscal 1978 budget for fusion power research. This budget cut. which represents a reduction of nearly 25 percent in fusion power funding, could not have come at a more inappropriate

Scientists at Los Alamos have recently succeeded in triggering a controlled fusion reaction through the use of a carbon dioxide laser; several physicists have now reported that this research breakthrough could lead to commercial fusion power at a date 10 to 20 years ahead of earlier estimates. However, the President's budget cut will make it difficult to build upon the recent research breakthrough, since the cut will mean the cancellation of several pilot fusion power plants-some of which are already under construction.

It now appears quite likely that the full House will be grappling with the issue of fusion power funding in the near future. Indeed, the issue may come before the House next month during the course of deliberations on the fiscal 1978 budget resolution.

Accordingly, for the benefit of my colleagues, I am inserting the text of my letter to Mr. FLOWERS:

> HOUSE OF REPRESENTATIVES, Washington, D.C., March 30, 1977.

Hon. WALTER FLOWERS, Chairman, Subcommittee on Nuclear and Fossil Fuels, Committee on Science and Technology, Rayburn House Office Build-

ing, House of Representatives, Washing-

D.C.

DEAR MR. CHAIRMAN: As Chairman of the Subcommittee having jurisdiction over Federal authorizations for fusion power research. you play a special role in determining the thrust and pace of fusion power develop-ment. We therefore urge you to support an increase in fusion power funding levels over the amount that the President has recommended

If President Carter's budget recommendations are allowed to stand, fusion power research funding will fall \$80 million below the level recommended by President Ford. This would be a cut in funding of nearly 25%

Furthermore, the \$80 million cut-\$60 million from magnetic fusion programs, \$20 million from laser fusion programs—is focused upon construction expenditures. The practical impact will be a serious delay in the development of pilot fusion power plants, some of which are already under construc-

Ironically, this massive budget cut has been recommended at a time when the prospects for fusion power have never been more promising. For the first time, scientists at Los Alamos have initiated a controlled fusion reaction through the use of a comparatively inexpensive carbon dioxide laser.

According to the Washington Post, "A laboratory spokesman called the achievement a breakthrough in fusion reaction that could cut 10 to 20 years from the time needed to develop a fusion reactor." According to the San Diego Evening Tribune, "Dr. Peter L. Auer of Cornell University told an American Association for the Advancement of Science audience that recent advances indicate a practical demonstration of fusion power could come within about five years. Dr. Edward A. Frieman, associate director of Princeton University's Plasma Physics Laboratory,

Now is the time to maintain a strong Federal commitment to fusion power de velopment. It is not the time to reduce that commitment.

We urge you to bear in mind the tremendous benefits of fusion power if this energy source can be tamed.

First, the energy yield from fusion power plants could put all other centralized power sources to shame; according to one estimate, a single large fusion power plant could generate electricity for the entire Atlantic Seaboard.

Second, the fuel utilized by fusion power plants would be abundant: deuterium, a form of hydrogen derived from common sea-

Third, the commercial advantages accruing to the first nation to develop fusion power plants could be ernomous.

Fourth, fusion power plants would generate no radioactive wastes and would therefore represent an immense improvement over nuclear power plants from an environmental standpoint.

In light of the many considerations that we have mentioned, we hope that you will strongly support an upward revision of the President's recommendations for fusion power resaerch authorizations.

Cordially,

Matthew J. Rinaldo, Clair W. Burgener, Edward J. Derwinski, Robert E. Badham, Dan Daniel, John J. Duncan, David F. Emery, Floyd J. Fithian, Norman F. Lent, Edward J. Patten, Claude Pepper, Peter W. Rodino, Jr., Bob Traxler, Millicent Fenwick, Thomas N. Kindness, Paul N. McCloskey, Jr., Edward W. Pattison, Carl D. Pursell, and Frank Thompson, Jr., Members of Congress.

A CHILD'S GARDEN OF PERVERSITY

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Monday, April 4, 1977

Mr. DORNAN. Mr. Speaker, an article appeared in today's Time magazine which relates the spread of the most vicious and sordid of all pornography: that which abuses children.

The article related the content of several of the most disgusting products of the "child-porn" industry. The films which are being made and sold are shocking. One 8-mm film depicts a 10-year-old girl and her 8-year-old brother in intercourse. Another shows a bike gang breaking into a church during a First Communion service and raping six little girls. Other examples are equally repulsive.

But as the article points out, efforts are being made by legislators in several States and in Congress to ban the sexually explicit pictures of children, whether or not they are legally obscene. The fine legislation introduced by my colleagues from New York and Michigan, Congressmen Murphy and Kildee, was singled out as a good example of the various efforts that are being made here on Capitol Hill to end this odious prac-

In the other body, the legislation introduced by Senator William V. Roth should also be noted by the House.

So that those of my colleagues who have not yet read this article may be made aware of the extent of this type of pornography, I ask that the Time article be included at this point:

CHILD'S GARDEN OF PERVERSITY

Lollitots magazine is one of the milder examples. It features preteen girls showing off their genitals in the gynecological style popularized by Penthouse and Playboy. Other periodicals, with names such as Naughty Horny Imps, Children-Love and Child Discipline, portray moppets in sex acts with adults or other kids. The films are even raunchier. An 8-mm movie shows a ten-yearold girl and her eight-year-old brother in fellatio and intercourse. In another film, members of a bike gang break into a church during a First Communion service and rape six little girls.

These and a host of other equally shocking products are becoming increasingly common fare at porn shops and sex-oriented mailorder houses across the nation. They are part of the newest growth area pushed by the booming billion-dollar pornography indus-

try: child porn.
"I just found out about these magazines and films this summer, and I've become a raving banshee over it," says Dr. Judianne Densen-Gerber, a Manhattan psychiatrist who has been barnstorming around the country in a crusade against this abuse of minors. Her effort is only one part of a new campaign against child porn. New York City has cracked down, and police have at least temporarily forced kiddy-sex periodicals and films out of the tawdry Times Square area. Some twenty states are considering childporn laws. Last week the Illinois house of representatives approved a bill setting stiff penalties for producing and selling child porn. The bill is expected to pass the senate and become state law.

Child porn is hardly new, but according to police in Los Angeles, New York and Chicago, sales began to surge a year or two ago and are still climbing. Years ago much child pornography was fake—young-looking women dressed as Lolitas. Now the use of real children is startlingly common. Cook County State's Attorney Bernard Carey says porno pictures of children as young as five and six are now generally available throughout Chicago. Adds Richard Kopeikin, a state's at-torney investigator: "They are even spreading to the suburbs, where they are now considered rare items, delicacies."

Among recent developments:

Underground sex magazines are heavily stressing incest and pedophilia. One current West Coast periodical ran ten pages of photos. cartoons and articles on sex with children.

In San Francisco hard-core child-porn films were shown in a moviehouse for five weeks before police seized the films last February. Even San Francisco's Mitchell brothers, the national porn-film kings, were out-raged. Says Brother Jimmy: "We think obscenity laws should start with child porn."

An Episcopal priest, the Rev. Claudius I. Vermilye Jr., who ran a farm for wayward teens in Winchester, Tenn., is awaiting trial on charges that he staged homosexual orgies with boys on the farm and mailed pictures of activities to donors around the country.

Until recently, much child porn sold in America was smuggled in from abroad. Now most of it appears to be home grown, with the steady stream of bewildered, broke runaways serving as a ready pool of "acting talent" for photographers. Pornographers who stalk children at big-city bus stations find many victims eager to pose for \$5 or \$10-or simply for a meal and a friendly word. Says Lloyd Martin, head of the Los Angeles police department's sexually abused child unit: Sometimes for the price of an ice-cream cone a kid of eight will pose for a producer. He usually trusts the guy because he's getting from him what he can't get from his parents— love." In many cases, the porn is a byproduct of child prostitution. Pimps invite children to parties, photograph them in sex acts, and circulate the pictures as advertisements to men seeking young sex partners. Frequently, the pictures are then sold to porn magazines.

Even worse, some parents are volunteering their own children to pornographers, or producing the sex pictures themselves. Last year a Rockford, Ill., social worker was sent to jail for allowing his three foster sons to perform sex acts before a camera for \$150 each. In January, a couple in Security, Colo., was charged with selling their twelve-year-old son for sexual purposes to a Texas man for \$3,000.

Some children in porn photos are victims of incest. Parents will have intercourse with a son or daughter, then swap pictures with other incestuous parents, or send the photos to a sex publisher. Sex periodicals, particularly on the West Coast, publish graphic leters on parents' sexual exploits with their own children. Says Los Angeles' Martin: "We had one kid in here the other day who is eleven years old. His father started on him when he was six, then sold him twice as a sex slave. The kid had been in movies, pictures, magazines and swap clubs. After a while, he broke down and cried and said how grateful he was to have been pulled out of it."

Such experiences can of course scar a child for life. Warns New York Psychoanalyst Herbert Freudenberger: "Children who pose for pictures begin to see themselves as objects to be sold. They cut off their feelings of affection, finally responding like objects rather than people." Some psychiatrists believe that children who pose in porn pictures are often unable to find sexual fulfillment as adults. Another danger, says Los Angeles Psychiatrist Roland Summit, "is that sexually abused children may become sexually abusing adults."

Child porn poses fewer hazards for the pornographers. Producers of child porn can be prosecuted for sexual abuse of children, but the children are hard to identify and locate. So are the producers, who often hide behind a welter of dummy corporations. Thus most prosecutions are under the obscenity laws, which generally make no distinction between children and adults as porn models. One result: many lawyers believe that the genital pictures in Lollitots, however offensive, might be judged no more obscene under the law than similar photos of adult women routinely published in most men's magazines.

To make prosecutions easier, angry legislators in several states and Congress are proposing a kind of end run around the obscenity laws—a ban on sexually explicit pictures of children, whether legally obscene or not. One bill introduced into the House of Representatives by Democrat John Murphy of New York and Dale Kildee of Michigan already has 103 co-sponsors. It would make any proven involvement with the production and sale of explicit sex pictures of children a felony. Says a Kildee aide: "Our bill is clearly enough directed toward child abuse so that the First Amendment should not arise. This is why we defined child pornography as a form of abuse, rather than a form of obscenity."

Under this approach, a salesman in an adult bookstore could be prosecuted as an active participant in the crime of sexually exploiting the children pictured in the store's magazines. New York Lawyer Charles Rembar, who successfully defended "Lady Chatterley's Lover" and "Fanny Hill" against obscenity charges, thinks the seller of child porn is a suitable target: "It is totally unrealistic to say that the people who sell these magazines and films are not involved in the act themselves." Yet other lawyers consider a broad child-abuse law a form of backdoor censorship. Says Ira Glasser of the New York Civil Liberties Union: "I assume if you put your mind to it, you could come up with an acceptable statute prohibiting adults from using children in explicit sex films and photos, but controlling what people see or

read is another matter. Everything published ought to be absolutely protected by the First Amendment."

Despite First Amendment problems, public pressure for some kind of laws is likely to grow. Many Americans battling against child porn view their efforts as a last stand against the tide of pornography. Says California State Senator Newton Russell: "This is a reflection of the social and spiritual morality of this nation. If there is to be any reversal in the trend, the place to start is child porn."

CYNTHIA SUE HINTON—VOICE OF DEMOCRACY

HON. GEORGE HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. HANSEN. Mr. Speaker, Cynthia Sue Hinton of Mountain Home, Idaho, has written a thought-provoking essay for the Veterans of Foreign Wars' Voice of Democracy contest. I appreciate this opportunity provided by the VFW which enables me to place Cynthia's excellent essay in the Congressional Record.

Cynthia is a senior at Mountain Home High School, the daughter of Mr. and Mrs. M. D. Hinton. Her interests are in civil affairs, both in school and off campus, and she hopes to attend the University of Idaho to begin a career in law.

A leader in activities in her school today, I suspect Cynthia will be heard from again tomorrow. After reading her essay, this is my hope.

The essay follows:

America is a land of pride, a crucible in which pride in a heritage uniquely its own has provided the powerful flame to cast a bond of unity; a country not mired down by its past but rather a country that is still living its history.

America is a land of glory, a nation begun by a mere handful of down-trodden people who make the current poverty standards appear as luxury. It can, and does, raise its sons and daughters to greatness; a nation which instills the strength to take a firm stand in support of its most cherished asset— Freedom; a country where the right to object is vigorously defended and where truth has greater value than wealth.

America is a land of beauty, not only in the breathtaking beauty of its panoramic vistas of plains and mountains, but in the staunch beauty of the faces of its people; in the vibrant, expectant beauty on the smooth faces of the citizens of tomorrow which are as yet untouched by the scars of living, and the wise, intuitive beauty on the weathered and lined faces where each wrinkle is a map—not only of the sorrows of life, but of its laughter and joy.

America is a land of compassion, whose citizens are able to subdue despair over misplaced trusts and prepare to rise to a new and grander tomorrow; who are able to look for the good in people of all nations and offer friendship; it remains a country born from a search for religious freedom and still offers this choice; where a man of strength can sit misty-eyed, without fear of scorn, as he listens to his friend play a haunting melody on a simple harmonica.

America is a land with a dream whose citizens look to the future and see a country that is not yet completely formed; where each new generation stands on that threshold of the dream whose foundation has

been laid securely by those who have passed before and view a country—not as it is, but as it potentially can be; who perceive a land that, as a lump of clay in the strong hands of its sculptor, has continued to mold a Utopia much sought after by those forced to live in nations which offer nothing but ask everything; where the sculptors of the Third Century can and will accept the challenge and responsibility to continue—and perhaps improve upon—the pattern left to be followed.

America is a land of pride, glory, beauty, compassion, and, because of its dream, so very much more. This is what America means to me.

BEVERAGE DEPOSITS

HON. JAMES M. JEFFORDS

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. JEFFORDS. Mr. Speaker, because of the increased interest in legislation requiring deposits on beverage containers. I recently wrote an article for Beverage Industry magazine, which relates my thoughts on why we should adopt a nationwide deposit system for beverage containers. The article shows that we are not talking of a measure which would simply reduce litter along our roadsides, but rather we have the opportunity to conserve substantial amounts of energy, material resources, as well as save the American consumer billions of dollars a year. I include the article in the RECORD:

THE CASE FOR MANDATORY BEVERAGE DEPOSITS
(By Congressman James M. Jeffords,
Republican of Vermont)

A few years ago, it might have seemed foolhardy to appeal to the beverage industry for support in an effort to enact a deposit system for beer and soda containers.

That, however, is my purpose in this forum. And while I expect you to be skeptical, I hope you will hear me out. Through personal experience, I have learned that the beverage industry is made up of a great many reasonable, intelligent, and well meaning people. For far too long, those of us who have traditionally supported deposit systems, and those of you who have traditionally supported deposit systems, and those of you who have traditionally opposed them, have raised our voices in emotional argument without actually communicating.

actually communicating.

Hopefully, the time has come for us to modulate our voices and engage in a meaningful give-and-take, to resolve the dispute in a manner which is reasonable and equitable for all concerned. This publication, Beverage Industry, has graciously opened the door for this type of exchange.

Undoubtedly, few of this magazine's readers will agree with everything I have to say. But I hope that some of you will see fit to get in touch with me, to respond to my comments, and to determine whether we share enough common ground to make continued dialogue worthwhile.

With that said, I will state my case: why I believe the industry should support, or at least withdraw opposition to beverage container deposit legislation.

One reason is purely practical. I firmly believe that national deposit legislation will be adopted; perhaps by this Congress, perhaps a few years from now but it is a coming thing.

This type of legislation has been proposed in many different forms, some of which are more beneficial to the industry (or less injurious, as the case may be) than others. In that light, it would seem that the industry's best strategy would be to cooperate in developing the most acceptable proposal, rather than offering blanket opposition to all beverage container deposit initiatives.

Even if, through blanket opposition, you were able to delay national legislation for a few years, initiatives will continue at the state level. Public support for the deposit laws in Vermont and Oregon is so strong that is clear those laws are on the books to

Proponents of deposits have been buoyed by successes in Maine and Michigan, and their near-miss in Massachusetts, as well as the adoption of a deposit system for federal installations. Efforts are now being organized in dozens of other states, and realistically, some of those efforts are bound to be successful. Surely it would be easier for the beverage industry to cope with a single national system than with a patchwork of state and municipal deposit laws.

A second argument for your support is somewhat more altruistic, but certainly no less significant. Simply stated, deposit legislation is a good idea which, if properly implemented, will provide substantial benefits.

You should be aware that the ground for argument has shifted somewhat since the time the state legislation was debated in Vermont and Oregon. The big issue then was litter—whether we were willing to accept a small inconvenience in exchange for cleaner roadsides.

The litter issue has not disappeared: the Vermont and Oregon roadsides are indeed cleaner, which is partly responsible for continued strong public support in those states.

ENERGY IS PRIMARY

But the big issue now, particularly when national legislation is discussed, is energy. We can quibble about the exact number of BTU's that would be saved-more about that later. But the savings would be significant, and, at this point in history, that is an extremely important consideration.

Other national benefits include savings of steel and aluminum, and preservation of space in sanitary landfills, which is increasingly scarce in many sections of the country.

As you know, two states in the U.S. and three Canadian provinces have had extensive experience with this type of legislation. The deposit law I am most familiar with, course, is the one in my home state of Ver-

The vast majority of Vermonters believes our state law has been a tremendous success. Two years ago, I conducted a poll, responded to by 10,000 Vermonters, an extremely large sample for a small state. At that time, 80% said they supported the state law and felt it should be adopted on a national level. As a politician, I naturally have extensive contact with the people of my state, and I strongly believe that support for the state law has increased since that time.

PEOPLE SUPPORT LAW

This is reflected in the State Legislature. Legislators who originally opposed the legislation have either changed their positions, or simply given up trying to repeal the law. In fact, last year, the Legislature voted to strengthen the deposit law.

There are some good reasons for this level of support within Vermont.

The original intent of the legislation, to reduce litter, has been realized beyond expectations. The beverage container portion of liter has been reduced by 76.1%, while total litter is down about 35%. The return rate is 95%.

Beyond that, and contrary to the claims of some opponents, Vermonters have benefitted financially from the legislation. Before the law was passed, most Vermonters

were not given the option of purchasing refillable containers

Now, refillables are available for the people who want them. And the average Vermont family choosing refillable saves something like \$60 a year. That's not a huge amount, but any savings is appreciated in these times of economic distress. As for the family which continued to purchase beverages in nonrefillables, the cost was no higher than it would be without the law.

The argument has been advanced that adoption of the Vermont law resulted in a substantial drop in beverage sales. This is not true. There was an initial slump in beverage sales in 1974, but the fact that it oc-curred following passage of the deposit law is coincidental. That year was a disastrous year for the tourist industry in Vermont, which accounts for a large part of our beverage sales.

SALES CLIMB

During 1974, Vermont experienced a lack of snow, a shortage of gasoline, severe inflation, and a summer flood. As a result, beverage tax receipts were down 9% below projections. Total state revenues for touristrelated taxes, however, were down by 10.8%, a fact which can hardly be attributed to the state's deposit law.

The following winter, in 1975, beverage sales surpassed pre-law levels and continued to climb at a rate far faster than in neighboring New Hampshire, which has lower beverage taxes and no deposit law. It is clear, therefore, that the initial slump was not a

reaction to the deposit law.

At the risk of repetition, I believe the strongest evidence of the success of the Vermont law is the level of public support it enjoys among the people. Vermonters are thrifty Yankee. Most are unimpressed by abstract statistics and studies. If they couldn't see an improvement in the appearance of the roadsides, if they couldn't see a savings at the checkout counter, they would have repealed that law in no time. They have chosen not to do so.

BOTTLER SUPPORT

Incidentally, while I have less direct familiarity with the situation in Oregon, the figures from that state would appear to be even more impressive. Beverage container litter in that state was down by 82% in the first two years the Oregon law was on the books, with no drop in beverage sales attributable to the law. In fact, survey reports from soft drink bottlers and distributors from that state indicated a rise in sales of almost 10%, well above the national average. And, a poll of Oregonians indicated 91% pub-

lic support for the forced deposit law there.
The continued support of Vermonters and Oregonians for their state laws becomes even more significant when you consider that a state law provides fewer benefits than would be obtained through a national deposit

system.

Even in terms of litter control. Vermont's roadsides would be cleaner yet along our borders if deposits were required on beverage containers purchased in neighboring New Hampshire, Massachusetts, and New York State

And, in a tiny state like Vermont, the quantities of energy and other resources saved through a deposit system are almost insignificant. There is some symbolic satisfaction in taking a step away from the "throw away mentality" which has pervaded American society for too long, but Vermonters are well aware that, by themselves, they are not saving enough energy, steel, and aluminum in this manner to make a real difference.

The savings would be real, and noticeable, on a national scale.

Recognizing that a beverage container deposit system makes most sense on a national scale especially when you consider the confusion which would result from a patch work of state laws. I recently introduced H.R. 936, with the co-sponsorship of nearly 50 of my colleagues in the House.

This is not a "bottle ban" or "ban the can" bill, although those catch phrases seem to

persist in the public lexicon.

My hill would allow consumers freedom of choice as to the type of beverage container they prefer. It would simply require a deposit of at least 5¢ on each container, a sufficient incentive to return the bottle or can for either re-use or recycling, as the case may

This is a very significant difference between my bill and some of the proposals that have been advanced in the past, which would eliminate cans in favor of refillable bottles.

The fact is that some people do prefer to purchase their beverages in cans. Cans are convenient, lightweight, and don't break. They can also be crushed at a redemption center, minimizing transportation needs when they are returned in quantity for recycling.

Because of these and other, less tangible factors (some people just like the feel of a can in their hands, as opposed to a bottle),

I feel that cans would retain roughly their present share of the market if my bill were passed. This has been the experience in Vermont, and assuming that the beverage industry continues to promote its products in cans, there is no reason to believe the experience would be any different nationwide.

This factor eliminates many of the strongest arguments which have been advanced against "ban the can" legislation. It would not cause severe economic displacements; more meaningful, high paying jobs would be created than eliminated.

The industry would have three years of leadtime to gear up for the change, although one feature of the bill, a ban on detachable "flip tops," would be implemented one year after passage.

FEW ADVERSE EFFECTS

Therefore, unlike "ban the can" proposals, my bill would absolutely minimize any potential for adverse effects on the industry. And the benefits would be virtually as great, as energy and other resource savings are nearly as great from recycling cans as from refilling bottles.

As I said, energy conservation is the biggest benefit to be attained through a national deposit system. Obviously, we will not save enough energy through this means alone to resolve our energy crisis, or even come close to that goal. But it is a start, something which can be done, and which will have measurable results. The natural gas shortage this winter was an urgent reminder that we need this kind of start-and many others which will cumulatively result in very substantial total conservation.

Nobody can predict with absolute accuracy the amount of energy which will be saved through my legislation. Many studies have performed, with varied conclusions. Probably the most comprehensive study is that released by the Federal Energy Administration (FEA) last fall. [see bi, Dec. 12, 1975]

This detailed study examines three major areas of potential impact based upon projected system requirements of the beverage industry by 1982 (the baseline year for which the impacts are projected).

The projections indicate that without a national deposit law, production and distribution of beverage would require 383 trillion BTU's of energy, \$7.3 billion in capital investment, and 369,000 jobs with a total of \$4.1 billion in labor earnings in 1982.

In determining impacts of beverage container deposit system, the FEA study makes use of two illustrative scenarios which fall within what FEA considered to be within the broad range of predictable behavorial responses to legislation such as the bill I introduced.

ASSUMED TRIPPAGE

The first scenario, which I personally consider to be most likely, assumes that in 1982 the market share for cans would be the same as it was in 1976. It further assumes that both cans and bottle will be returned at a rate of 90%—certainly reasonable in light of Vermont's 95% return rate.

The assumed trippage for refillable bottles is 10, very conservative compared to the current national average of 19 or 20 trips, according to industry publications.

according to industry publications.

Under this scenario, a national deposit system would reduce energy consumption by 168 trillion BTU's annually, or the equivalent of about 81,000 barrels of oil a day. This is a savings of about 44% of the energy projected for consumption by the beverage industry in 1982.

The second scenario, which I personally consider to be far less likely than the first, assumes that the 1982 market share of cans declines by about 50%, with a container return rate of 80% and a trippage of 5 for refillable bottles. Under these projections, the energy savings amount to 144 trillion BTU's figures are conservative in comparison with projections which have been made by others. For example, the Environmental Protection Agency has estimated a deposit system would lead to energy savings of 245 trillion BTU's the equivalent of 125,000 barrels of oil a day.

It has been argued, correctly, that regardless of what figures you choose to believe, the energy savings constitute only a fraction of one per cent of the current national energy consumption. This certainly proves that container deposits, by themselves, cannot lead us to energy independence. But nobody is claiming they would.

VOLUME SAVINGS

In terms of volume of savings, even the tiny percentage figure is very significant. One environmental group, using a savings figure of 211.5 trillion BTU's, illustrated this point dramatically by pointing out that this is equivalent to the amount of energy needed to supply the electrical needs of 9.1 million relatively affluent Americans for a year.

Put in other terms, the group computed that the savings would be equivalent to the amount of gasoline used by 1.69 million automobiles averaging 10 miles per gallon for a typical driving year of 10,000 miles or to heat 2 million 3-bedroom brick homes in the Middle Atlantic region with natural gas for an entire eight month heating season.

Certainly, we can quibble about the exact figures. I am not about to stake my reputation on a firm projection that we can heat a specific number of brick homes with our energy savings. And it's true that these are all energy equivalents: in practice, the savings would allow us to heat some brick homes, provide some electricity for people, and so on.

ENERGY USE

But we have just come through a period when schools and factories have been closed down because of a natural gas shortage, a situation which is likely to be repeated, with perhaps even more serious consequences, in the future. In the Northwest, electricity rationing now appears to be a serious possibility, a threat which will undoubtedly spread to other parts of the country in future years.

When push comes to shove, when the American people realize that they can keep even a few schools and factories open by sacrificing the convenience of throwing away their beverage containers, it is going to be awfully hard to convince the public that this "convenience" is more important.

As you know, beverage containers are big business. Over 90 billion containers are produced each year in this country, and over

8 million tons of them are discarded. Beverage containers are the most rapidly growing segment of all municipal solid waste, increasing at a rate of over 10% a year. Conservative but reliable projections estimate that with passage of national deposit legislation, this country would be able to reduce beverage container solid waste by 70%.

In this way, by 1980, a half million tons of aluminum, 1.5 million tons of steel, and over 5 million tons of glass would be saved on an annual basis. This, I point out again, is, in addition to the energy savings, prolonging the use of sanitary landfills, and litter reduction.

Your industry, of course, is concerned about the capital investments which would be required in a switch to a deposit system.

CAPITAL INVESTMENTS

The FEA study says that under the first scenario, \$820 million in capital requirements would be needed with the deposit legislation. The second scenario projects about a \$2 billion increase. These are, admittedly, significant figures.

The impact would be softened, however,

by several factors.

First, the FEA did not include in its equation the reduced capital requirements of certain primary suppliers, such as the energy sector.

Second, a part of any capital expenditure is recaptured in later years in income tax reductions because of investment depreciation

Third, my legislation would phase in a deposit system over a three year period, so new capital investment could be spread over that amount of time.

Fourth, the most substantial new capital requirements would come about only with a large-scale shift to refillable bottles. Although these costs would, over a period of time, have to be passed on to the consumer who purchases this type of container, that consumer would still come out ahead financially. This is because refillables are, and will continue to be, the most economical type of beverage container.

As I have mentioned, the economics of using refillables have been well documented in Vermont. The FEA says that, under its two scenarios, consumer savings from the use of refillables would range from \$1.8 billion to \$2.6 billion a year.

Your industry obviously is not the only source of waste of energy and other re-

sources. Therefore, you may very legitimately ask why you are so often singled out as an example of waste in America. It is, indeed, unfair to label you the "bad guys" unless that label is also applied to vast segments

of industry and the public.

You may well ask: "Why don't we take meaningful steps to improve fuel efficiency of automobiles?" Why don't we adopt large scale programs to recover all kinds of recyclable materials, and to use our landfills and even sewage treatment plants to generate methane?" "Why don't we conserve energy by providing incentives for improving home insulation?"

The list of questions along that line could go on at length. And the answer is simple. Yes, we should proceed as rapidly as possible with a wide variety of substantive steps to conserve our energy and other resources. We should start with the steps which will involve a minimum amount of true sacrifice by the American people. And we should—we must—be prepared to adopt more stringent conservation efforts if and when they become necessary.

A deposit system, in the form called for by my bill, is one of the steps we can take with minimum sacrifice; in fact, there will be financial savings, and it can be argued that returning beverage containers is not a sacrifice at all.

To be sure, it is not the only action we

should take in the name of conservation, but it is something which can be accomplished, with measurable benefits, without lowering our standard of living or compounding the nation's economic problems.

It is a big step for your industry, but for the public at large, the benefits will clearly outwelgh the inconvenience. Few people rank throwing away beverage containers as among their most cherished rights.

Momentum is growing rapidly on this issue, and for the reasons outlined in this article, I believe this is for good cause. More states and municipalities will adopt deposit systems, and sooner or later Congress will too.

Nearly 50 members of Congress have signed on to my bill, a very large number for any issue which is more controversial than apple pie. A great many more will vote for it when it reaches the floor—I do not know for certain whether proponents have a majority yet, but we are growing.

I hope you will let me know your views—particularly if you have any suggestions as to how the bill could be made more attractive to your industry without sacrificing its goals.

But I firmly believe that it is in your best interests to put on a white hat, help to put this legislation in the best possible form, then support it.

TRIBUTE TO COMMENDATORE ANDREW TORREGROSSA, SR.

HON. LEO C. ZEFERETTI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. ZEFERETTI. Mr. Speaker, I take great pleasure in being able to join with the many people in my district in paying tribute to one of the most respected members of our community, Commendatore Andrew Torregrossa, Sr., who will be honored by the Sons of Italy on the 16th of April. Mr. Torregrossa, who has just celebrated his 85th birthday, has devoted his entire life to others who, like himself when he emigrated to this country almost 70 years ago, so desperately needed guidance and help.

Commendatore Torregrossa came to the United States at the age of 16. Since that time, he has been directly involved with and responsible for the establishment of such organizations as an all Italian Longshoremen's Local, the Italian Catholic Union in the Diocese of Brooklyn, of which he was the Supreme Orator, the first Italian Plasterman's and Hod Carriers, the Citizens of Licata Society in Brooklyn, and the Anthony Torregrossa Democratic Club. Through these groups, he has illustrated time and time again his concern for his fellow man by working to improve working conditions and working for a better way of life. His successes, particularly in the field of labor, made him most popular among his fellow countrymen who came to him for help.

It is most fitting that the Sons of Italy, Verrazano Lodge, will be honoring Commendatore Torregrossa, for he has served with this organization since 1912, as venerable, grand treasurer and supreme delegate, among other positions.

However, it must be recognized that

Mr. Torregrossa has received the praise and honor for his civic and religious duties in the past. For example, he was conferred by the Republic of Italy as a Member of the Order of the Italian Star of Solidarity in 1957, followed by the title of Commendatore in the Order of Merit of the Republic of Italy in 1967. Only 7 years ago, he received a Papal Decoration by Pope Paul VI initated by Cardinal Terrance Cooke as a Knight of the Equestrian Order of the Holy Sepulchre of Jeruseleum, and was elevated as Knight Commander in 1972.

Commendatore Torregrossa's list of accomplishments and awards for community and religious service are almost too numerous to mention. However, each one is significant, and, it must be said, more deserved than the next. Surely, all of them serve as testament to the great-

ness of the man.

I believe that we can all learn from him. Andrew Torregrossa believed in America. As an immigrant, he put his faith and trust in this country and invested in her future. As a result of this faith as well as his strength and fortitude, he became successful in business, establishing the Andrew Torregrossa Realty Holding Corp., Andrew Torregrossa and Sons, Inc., and Andrew Torregrossa Securities.

Most importantly, however, these values and trust have been pased along to his children and his 10 great-grandchildren who will long carry out the Torregrossa name for generations to come. His family will gather with the many friends on April 16th to honor Andrew Torregrossa and to them, I offer my

congratulations and respect.

At this point, I want to extend to Commendatore Andrew Torregrossa my thanks on behalf of all who have benefited from his guidance and advice. We honor him and offer our most sincere respect. He has proven to our community if not the country that men still care about their fellow men and are willing to help. Personally, I am pleased to consider him not only as a constituent, but as a friend.

LOBBYING FOR THE B-1 BOMBER

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES Monday, April 4, 1977

Mr. WIRTH. Mr. Speaker, as the battle over the budget continues, major weapons systems continue to be a matter of significant controversy. As a body, the House is faced with the need to choose between those that are a needed part of a strong national defense structure, and those that have become technological wonders whose marginal defense value is limited, but whose jobs or "public works" value continues to be sold to the American public.

Included among the latter is the B-1 bomber, as heavily lobbied a weapons program as any we have seen. The enclosed article outlines the need to rec-

ognize an extraneous program when we see one. I urge my colleagues to read this carefully, and to continue to oppose this poor expenditure of public money:

THE LOBBYING FOR THE B-1 BOMBER

(By Jack Anderson)

The rallying of the arms lobby around the cause of the B-1 bomber is a stirring demonstration that the military-industrial complex has survived the embarrassments of the past and has lost none of its prehensile vitality.

At issue is the most expensive single weapons systems ever to get this far. The B-1 bomber program will cost an estimated \$92 billion, maybe over \$100 billion if past cost overruns are a guide. Each plane will cost from \$94 million to \$117 million, depending on whether one relies on official or independent analysts.

If such amounts baffle your comprehension, consider that the price of a single B-1 bomber could finance the operation of 1,000 rural health clinics for a year or, if you prefer, the construction of a capacious prison in each of our dozen most crime-ridden states.

Backers of the B-1 say it will assure U.S. supremacy in the air in the foreseeable future; opponents say it is already obsolete in a strategic world dominated by intercontinental missiles. But where vast expenditures are involved, arguments on the merits tend to get drowned out by the self-interests.

Each great weapons system develops by natural law an aggressive lobby to clear its path. The process by which pursuasion and pressure are brought to bear on the government process has been honed to an art form: success depends as much on political influ-

ence as professional competence.

In the executive suites of almost all the top defense contractors are retired generals and admirals who are on first-name basis with the Pentagon's big brass. They help to sell the weapons system to their former comrades in the armed forces. At the critical stage, the campaign becomes focused on Capitol Hill. Then the pressure people take over affable lobbyists who know the right people in the backrooms of Congress.

Whether the B-1 program should be adopted or not, based on the merits, has been lost in the lobbying effort. This effort is directed by the prime contractor, Rockwell International, on mostly extraneous, porkbarreling, log-rolling arguments, thus demonstrating once again that the vulnerability to well-financed lobbies is the Achilles heel of American democracy. From our own investigation, consider these findings:

Rockwell carefully listed the members of the key Senate and House committees in a document stamped "Not to be disclosed to unauthorized persons." Next to each member's name is a list of the companies in his district that have received subcontracts from the B-1 project. Sen. Clifford Case (R-N.J.), for example, has a \$400,000 Bendix subcontract in his state, and Rep. Louis Stokes, (D-Ohio), has \$227,000 going to the Cleveland Pneumatic Company in his district.

When Rep. Jonathan Bingham (D-N.Y.), asked for the basic economic facts about the B-1. Rockwell rushed him some charts that ignored his question but showed how the program would generate 45,000 jobs and \$2.3 billion in business for New York and New

Rockwell President Robert Anderson has urged all the firm's 119,000 employees to write their congressmen in behalf of the B-1, complete with stationery, stamps and en-

Rockwell has produced a film touting the B-1 and has distributed it to various Chambers of Commerce. Nowhere in the film is it mentioned that Rockwell was the producer.

Key Pentagon officials in charge of the B-1 project have been wined and dined by Rockwell at its Maryland hunting lodge. The Pentagon's former research chief, Malcolm Currie, was fined one month's pay after accepting a trip to Rockwell's Bimini resort as the guest of Rockwell's Robert Anderson.

The company has funneled campaign contributions to 18 key members of the House Armed Services and Appropriations committees. It also conducted a newspaper adver-

tising blitz for the B-1 last year.
Holding out the promise of 70,000 new jobs, the B-1 proponents have also enlisted the support of AFL-CIO President George Meany and the United Auto Workers. Not mentioned is the fact that the jobs would be only temporary. For that matter, twice as many jobs would be created by spending the same money on housing construction, say, or on education.

The General Accounting Office, mean-while, anticipates that the ultimate cost of the B-1 system could be several billion dollars higher than the military brass are predicting. The decision whether to undertake this massive spending will rest with President Carter, who has promised to cut military spending. But he is not likely to abandon the B-1 unless the Soviets also reduce

their military build-up.

When the idea of representative government was young, it was feared that a system subject to mass opinion and accountable to ordinary people would be unable to handle decisions requiring wisdom. Subsequent history, however, showed that the rough-andtumble of democracy usually produced wiser decisions than the pompous cogitations of the elite.

What has yet to be proved, as government largesse grows and spreads, is whether the thin, wide-flung forces representing com-mon sense and the general interest can withstand the concentrated forces that press the cause of their own purse. The case of Rockwell International and its allied mercenaries is furnishing a test.

RETAINING OUR NATION'S PRIME AGRICULTURAL LAND

HON. JAMES M. JEFFORDS

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES Monday, April 4, 1977

Mr. JEFFORDS. Mr. Speaker, on March 7, I introduced H.R. 4569, a bill which addresses the problems of retaining our Nation's prime agricultural land. I have been extremely pleased with the support this legislation has received from many Members of Congress. Yesterday, I reintroduced this legislation along with several cosponsors. It is apparent that the interest in this bill is tied closely to the many problems our agricultural land is currently facing. Soil erosion, urban sprawl, and skyrocketing land costs are a few of the current problems that pose a real threat to the continued existence of our family farms.

Recently, there has been an increasing amount of national publicity on the issue of our diminishing level of good farm

I would like to insert in the Congres-SIONAL RECORD two recent articles dealing with some of these issues:

[From the Christian Science Monitor, Mar. 29, 1977]

CROPLAND UNDER URBAN-SPRAWL ATTACK (By Richard J. Cattani)

OMAHA, NEBRASKA.-America's foremost land-use challenge-the loss of prime cropland to suburban house-lots and lawns—is getting closer scrutiny at federal, state, and local levels.

No overnight breakthrough in halting the loss of farmland to urban sprawl is at hand, according to rural land-use experts.

But the rising awareness of the issue, plus experiments in controlling urban sprawl and in preserving cropland, are generating fresh hope that prime farmland losses can be curbed.

Total cropland in the U.S. has been increasing, but prime lands have been declining—lost mostly to urban sprawl—as less rich lands have been brought into use.

But among positive signs noted at a recent land-use symposium here of the Soil Conservation Society of America, are these:

Congress is warming up to farmland preservation. The House is considering a demonstration bill that would fund special projects in critical farm-loss areas around the country. President Carter is expected to take a close look at the issue, too. And the U.S. Department of Agriculture has launched a nationwide farmland-mapping effort to identify imperiled areas.

States are trying a variety of farmland preservation measures. Three-fourths of the states have passed at least some legislation already.

New Jersey, which has been losing one farm on the average of every three days, is attempting a test program in Burlington County. The state will spend \$5 million to fund a permanent farmland preserve—paying farmers the difference between farm values as cropland and as housing, or other development in exchange for a guarantee that the land be kept under agricultural production.

Iowa's Black Hawk County has come up with a zoning scheme to control land-use. Housing development is allowed to continue at a steady pace in the county—"but this development is now occurring on soils deemed suitable for such land use, while the vast majority of land in the county remains in agricultural production," says Janice Clark, Black Hawk County zoning administrator.

CITIES ARE HELPING

Some farmers are getting an assist from the cities.

Only recently are cities noting that uncontrolled growth costs them money.

Crystal Lake, Illinois, near Chicago, made a study of the hidden costs of growth (bigger schools, added sewer lines) and discovered it was charging developers only a fraction of their fair share of service costs to the community.

"We've been subsidizing the exodus from the cities and close-in suburbs," says Crystal Lake Councilman Michael Hinebaugh. "We should promote redevelopment of areas that already have sewers and schools." Crystal Lake's solution was to hike service fees for developers 13-fold.

Chicago's planning department says the city could easily add another 2 million residents, for a total of 5 million, by full use of land within its limits. Instead, the city is expected to continue losing residents to housing developments on farmland in the region.

Omaha, which has suburb annexation powers lacking in Chicago, is attempting to deal with farmland loss by halting development in a farmland belt that rings the city.

The Omaha City Council is considering a city master plan which would compel better use of nonfarmland close in the city.

WHERE LAND GOES

The U.S. has been "losing" 2 million acres a year of first-rate farmland directly to urban sprawl for housing, shopping centers, and highways. Another 2 million acres are lost indirectly due to "leapfrogging"—cutting

off farmland from effective crop-use by development.

One million acres a year is lost to water projects for recreation, irrigation, or power. Hence, 5 million acres of U.S. farmland a year are being taken out of agricultural production

While much land has been lost to farming in recent years, land elsewhere was brought into production, keeping the U.S. cropland total at about the same 400 milion acres. In fact, between 1968 and 1975, cropland harvested actually increased by 10 percent, while the total supply of cropland declined by the same figure.

But farmers may have brought marginal land into production, increasing the chances of soil erosion and scrimping on good landuse practices, like conservation and crop rotation.

Still, some 70 million acres of potential prime farmland are available for crops, says the U.S. Soil Conservation Service (SCS). In all, about 100 million acres of good farmland could be tapped for crops, says Norman A. Berg, SCS associate administrator—or enough to offset the current farmland loss rate for 20 years.

[From U.S. News & World Report, Mar. 21, 1977]

GAINING MOMENTUM: A DRIVE TO STOP SUB-URBAN SPRAWL

States and communities in growing numbers are clamping down on how owners of rural and recreational land can use their property.

The drive reflects an increasing concern over the effects of population growth—particularly the spread of the suburbs—and of damage to the environment.

Behind this concern is the continuing loss of valuable farmland, marshes, beaches and scenic beauty spots that are bulldozed, paved over or fenced in each year.

The U.S. Department of Agriculture estimates 2 million acres of farmland disappear annually before advancing urban sprawl. California's Santa Clara Valley lost 140,000 prime acres between 1950 and 1970. In Iowa alone, about 25,000 acres of rich agricultural land—some of the most fertile in the world—are lost each year.

Resort developers rapidly are covering the nation's remaining open beaches with condominiums, motels and restaurants. Marshlands necessary for sustaining fish, waterfowl and aquatic animals are being filled in for housing subdivisions and shopping centers.

DEMANDS BY PUBLIC

Alarmed at this loss, the public now is demanding a greater role in determining how private property is used. Some examples:

Walworth County in southeastern Wisconsin has adopted a plan limiting the use of fertile land to farming. It also protects recreational areas and restricts checkerboard development by requiring that individual land purchases be at least 35 acres in size.

California has enacted a law that is sharply curtailing commercial development along the State's scenic 1,027-mile coastline.

Hawaii is trying to block the ouster of tenants from farmland upon which the owner wants to erect housing, a more profitable use.

Suffolk County on New York's Long Island is purchasing "development" rights from farmers to preserve the land. When a farmer surrenders his right to develop his property commercially, he is paid the difference between the land's agricultural value and its assessed tax value.

Experts believe that such land-use controls, as they are called, eventually will govern the utilization of almost all land in the country. Most movement is occurring at the State and local level, but Congress and the Administration also have expressed interest in greater land regulation.

FIERCE RESISTANCE

While some land-owners are strong advocates of controls, many fiercely resist any effort to give the general public power over private property.

Says J. Vernon Martin, president of the Soil Conservation Society of America: "Land use is a very controversial subject. It relates to a person who lives under the free-enterprise system, and he resents or resists being told how to use or dispose of his land."

Because land ownership is one of the most cherished dreams of Americans, fights over land-use control are emotion-charged and often end up with battles in the courts.

Controversy is most intense in areas with the greatest population density and the least open land. In Hawaii, for example, a shortage of land is a growing problem despite passage of perhaps the nation's toughest legislation governing use.

Fred Trotter, trustee of the Campbell Estate, one of the islands' largest land-owners, warns of chaos unless Hawaii's land problems are solved. "I want out," he says, "The first people they shoot in a revolution are landowners."

Landowners in urban areas long ago surrendered some control over their property with the advent of zoning laws, planning commissions, deed restrictions and building codes. Now these restrictions on property are applied with increasing frequency to rural land as well.

World food shortages, for example, have shifted the emphasis on land-use planning from protecting city neighborhoods and scenic areas to the preservation of farm-

The energy crisis also has heightened concern over the loss of open land. Taken together, current proposals for new power plants, strip mines, oil-shale plants, coalgasification projects and related facilities would require a land area the size of Missouri if all were built.

STRIP MINING HIT

At a recent congressional hearing in Washington, a group of Illinois farmers asked the Government to ban strip mining on agricultural land. Robert Masterson, zoning administrator for Knox County, Ill., said coal reserves underlie 61 percent of the county and that strip mining threatens to destroy 284,000 acres of farmland.

William M. Johnson, an official with the federal Soil Conservation Service, warns: "We are facing a squeeze in productive capability only a few years from now. We have very little time in which to build a protective fence around our cropland or lose it for all time."

Because many major cities grew from rural villages, some of the best farmland surrounds urban centers. Usually flat and well drained, this prime farmland is highly prized by developers who can offer a struggling farmer quick riches.

In Indiana, farmers who might receive \$1,500 to \$2,500 per acre for land sold for agriculture are selling the same land to developers for \$10,000 to \$25,000. If he refuses to sell, a farmer may see his tax bill escalate because of the higher market value of his land. This trend has converted some farmers into supporters of restrictions on their property, provided they can get protection from higher taxes.

Dairy farmer Charles McLaughlin of Britt, Ia., favors land-control laws, even though he has reservations about turning over control of his land to the State. "Farmers are rugged individualists by nature, and they oppose any controls that would interfere with free use of their land," he says, "But when we see our land being diverted into nonagricultural uses—the often wasteful, irreversible diversion of food-producing land—we began to see we need some kind of land-use policy."

This attitude also is prevalent in Lexington, Ky., where a tug of war is going on between developers who want to provide shopping centers and subdivisions and those who want to preserve the horse-breeding farms surrounding the city.

"We're feeling the pressure and we're starting to develop a growth-planning system," says Frank Mattone, Lexington planning director. "Land-use control is essential."

Because of the heavy loss of prime agricultural acreage, almost every State in the U.S. now has some program aimed at preserving farmland. The most popular method is to grant preferential tax treatment to farmers whose land has increased in value because of its proximity to urban development—typically, basing the tax rate strictly on the agricultural value of the land.

Land-planning advocates argue, however, that preferential tax treatment is not the

answer to the problem.

"Farmland-assessment programs have slowed down the rate of development, but in many States lower taxes are still not sufficient incentive to farmers," says Betty Wilson, assistant commissioner of New Jersey's department of environment protection. "While farmers gain some from such programs, there is still a larger chunk of money awaiting them if they sell to developers."

TAX BREAKS OPPOSED

Local governments often oppose tax breaks for farmers. Kent Shelhamer, Pennsylvania's secretary of agriculture, had this comment: "Our program of reduced taxation for farmers has not worked out as well as we would have liked it. Some commissioners are not in favor of preferential tax treatment for farmers because it holds down the county's tax base."

In Florida's Orange County, which is losing citrus acreage at the rate of 2,000 to 3,000 per year, county extension director Henry F. Swanson says local government officials frequently deny preferential tax treatment to farmers because development of the land

would bring in more tax dollars.

With encroachment continuing, more State and local governments are developing other programs to preserve farmland. New York State, for instance, has been designating farm areas as agriculture districts since 1971. Once in a district, farmers are entitled to preferential tax treatment and are subject to fewer restrictions than urban landowners who must comply with local building codes, deed restrictions and other limitations.

LONG ISLAND'S ANSWER

Proponents of controls believe programs such as one enacted by Suffolk County on Long Island can provide farmers with longrange protection against urbanization. Concerned that it had lost two thirds of its farmland to development over the past 25 years, the county embarked on a farmpreservation program that involves purchasing the development rights of farmlands. The price of development rights is equal to the difference between the fair market value of the land and the agricultural value. Farmers retain physical ownership of the land but cannot do anything but farm it. Purchasers acquire the land with the understanding that the property must continue in its present agricultural use. An obstacle to the program is the relatively large amount of money it takes. Last September, Suffolk County approved an appropriation of 21 million dollars to buy development rights.

With a modest program of restrictions, New Jersey has slowed a decline in farmland after losing 440,000 acres from 1957 to 1967. From 1967 to the present, New Jersey farmland has decreased 95,000 acres. One method involves the spending of 5 million dollars normally budgeted for acquisition of open space to purchase development rights from farmers.

In Iowa, Black Hawk County has a landcontrol plan based on the productivity of the

soil. Good land is reserved for farming and poor land for recreation and development.

By the end of the year, five other counties in the Iowa Northland Regional Council of Governments are expected to adopt a "soil mapping" plan similar to the one in Black Hawk County. "In some areas people are literally shot over zoning arguments, but we've had zoning for 20 years and it is pretty well accepted here," says Hugh Copeland, executive director of the council.

Land-use controls also are being employed to protect scenic and environmentally sensitive areas. New York, for example, now bars development on coastal wetlands unless the owner can prove economic hardship. Before implementation of its Tidal Wetlands Act in 1973, New York lost an estimated 7,000 to 10,000 acres of tidal wetlands over a 20-year period. Since 1973, only 100 acres have been lost

While everyone seems to agree that something needs to be done to preserve farmland, scenic and environmentally sensitive areas, other aspects of land-use controls are more controversial. Critics argue that controls often protect those who already own property, rather than the community at large.

A restrictive program in Eastlake, Ohio, made the headlines in 1976 when the U.S. Supreme Court upheld residents' rights to vote down a developer's plan to place a highrise apartment complex for senior citizens and low-income families in the town.

There is concern that California's law protecting the coastline will be used to exclude newcomers from acquiring property. One State senator, David Roberti of Hollywood, calls the law the "Elite Neighborhoods and Enhancement Act of 1976" because it protects existing ownerships.

STOPPING GROWTH

Critics also complain that advocates of restrictions on the use of land are employing environmental-protection laws to stop rather than control growth. With such laws, environmentalists can snarl a development project in red tape and, in some cases, litigate it to death in the courts.

Environmentalists recently blocked a proposed 500-million-dollar petrochemical complex on the Sacramento River near San Francisco and a dam in Tennessee. Environmental laws also have been used to block numerous energy-related projects around the country.

Some environmentalists fear the use of laws to halt growth could create a backlash. Says Ann R. Jennings, an official of the South Carolina Sierra Club: "When you are flush and you have plenty of money and jobs floating in by the thousands, it is easier to talk in terms of limiting your economic growth. The environment is a lot like the arts. It is something you do when you are rich."

For this reason, land-control advocates see little chance that the Government will adopt a nationwide land-use program until the economy improves and land becomes much more scarce.

Comments Richard C. Longmire, director of the National Association of Conservation Districts: "The American people react to crisis. There won't be anything like a land crisis for 20 to 30 years when people get hungry."

NATIONAL NEWS COUNCIL CON-DEMNS DOCUDRAMAS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, April 4, 1977

Mr. McDONALD. Mr. Speaker, I have been providing my colleagues with background information on NBC's 3-hour smear of Senator Joseph McCarthy. I have shown over and over again with documentary evidence that NBC lied and distorted the facts in its anti-McCarthy pseudo-history.

NBC calls its pseudo-history "Docudramas." The prestigious National News Council has now underscored the major point that I was making. "Docudramas" distort history in accordance with the bias of the writer, but pretend to be accurate reenactments of a historical incident.

The conservative writer, William A. Rusher, himself a member of the National News Council, wrote about the condemnation of "Docudramas" in his March 30, 1977, column. It gives me great pleasure to share this column with my colleagues:

THE CONSERVATIVE ADVOCATE: THE DANGERS IN "DOCUDRAMAS"

(By William A. Rusher)

DES MOINES.—The National News Council, at its meeting here, added its respected voice to the others that have recently been raised against the dangers inherent in television "docudramas."

The word "docudrama" was coined not long ago to describe a hybrid creature, half documentary and half drama, that recently made its appearance on America's television screens. The worst example to date of the abuses to which the form is subject was "Tail Gunner Joe," a heavily fictionalized biography of the late Senator Joseph McCarthy of Wisconsin, which ran for three hours on the NBC television network one Sunday evening not long ago, and broke all existing records for sheer numbers of outright lies artfully packaged to resemble truth.

(I owe an apology, by the way, to the American Express Company, which I listed in an earlier column on the subject, as one of the sponsors of "Tail Gunner Joe.") American Express says it sponsored a one-minute news summary that happened to appear during a commercial break in the "docudrama," but assures me it had nothing to do with "Tail Gunner Joe" itself.

Having served as one of the few conservative members of the National News Council at its foundation, four years ago, as a nongovernmental critic (and defender) of America's lustily free print and electronic media, I knew my colleagues well enough to be sure their judgment would not be swayed, one way or the other, by their personal opinions on the controversial McCarthy.

To stress that I wanted to focus their attention on the generic problems inherent in "docudramas," and not at all on the merits (if any) of "Tail Gunner Joe," I brought the question before the Council's Freedom of the Press Committee (which is specifically concerned to defend the independence of the media) rather than its Grievance Committee (which receives and passes upon specific complaints of alleged abuses by the media).

I am glad to say that both the Committee and then the Council as a whole saw the point and voted unanimously to sound the alarm. The Council's statement noted the problem "with deep concern," explaining: "These are dramas, purportedly based on fact, written and produced not by journalists but by dramatists, as entertainment in the broad sense. Because . . . they appear under the general umbrella of the same broadcast organizations that also present news and documentaries, the dangers of public confusion and historical revisionism or inaccuracy are considerable, particularly because the needs of drama may tend to take priority over journalistic standards . . . The Council ex-

presses its concern and urges that the television networks take this matter under serious consideration, going beyond mere routine disclaimers, to assure a proper regard for factual and historical accuracy."
